M. Spinoy, the Belgian Defence Minister, announced on April 15 that three of the depots of the British advanced military base near Antwerp were to be taken over by the Belgian Army because of changes in the British military organization.

NATO Military Appointments.

The following military appointments were announced in recent months.

Northern European Command. Lieut.-General Sir Horatius Murray to succeed Lieut.-General Sir Cecil Sugden as C.-in-C., Allied Forces, Northern Europe (announced on March 26).

Central European Command. Air General Pelissié (France) to join the staff of the C.-in-C., Allied Forces, Central Europe, with responsibility for the co-ordination of air defences, in succession to Air General Chassin, retiring (announced on March 6).

Supreme Command. General Leon Johnson (U.S. Air Force) was appointed as Air Deputy to the Supreme Allied Commander—a post which had been in abeyance since General Norstad succeeded General Gruenther as Supreme Commander (announced March 4). During the Second World War General Johnson led the Ploesti raid by the U.S. Air Force in August 1943.

With General Johnson's appointment the upper structure of the Allied Command is now: Supreme Commander, General Norstad (U.S.A.); Deputy Supreme Commander, Field-Marshal Lord Montgomery (Britain), to be succeeded in September by General Gale; Naval Deputy, Admiral Sala (France); Air Deputy, General Johnson (U.S.A.); Chief of Staff, General Schuyler (U.S.A.).

Following the French bombing of Sakhiet (Tunisia) the matter was discussed at a meeting of the Permanent NATO Council on Feb. 12. The French representative (M. de Crouy-Chanel) made a report on the situation and answered questions by other representatives.—(NATO Information Division, Paris - W.E.U. Press Dept., London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - Berlingske Tidende, Copenhagen - Politiken, Copenhagen - Frankfurter Allgemeine Zeitung - Giornale d'Italia, Rome) **(Prev. rep. 16006 A; 15965 A; Support Costs, 15723 A; German Armaments, 16141 A.)**

A. EUROPEAN NUCLEAR ENERGY AGENCY. — Agreement for Joint Operation of Norwegian Reactor.

The O.E.E.C. announced on June 12 that, as a result of studies undertaken by the European Nuclear Energy Agency in the field of experimental reactors, an agreement for the joint operation of the Norwegian experimental boiling water reactor at Halden had been concluded in Oslo by representatives of a number of European countries and of Euratom. The participating organizations were the Danish Atomic Energy Commission, the Euratom Commission (on behalf of the six member-countries of Euratom), *A.B. Atomenergi* of Sweden, and the U.K. Atomic Energy Authority, in addition to representatives of Austria and Switzerland. All these organizations will join with the Norwegian Atomic Energy Institute (the builders and owners of the reactor) in carrying out a joint programme of research and experiments over a three-year period beginning July 1, 1958. The agreement was subject to the necessary funds being made available by the appropriate authorities.

The Halden reactor has an output of 10 megawatts and is situated 75 miles south of Oslo; it is the only boiling water reactor in Europe, and the first heavy water boiling reactor in the world. An International Committee will approve the joint programme (which is estimated to cost $4,000,000), and a Technical Group will supervise its execution by the Norwegian Institute, which will employ a staff recruited from all the participating countries.

Representatives of the U.S. Government, who took part in the discussions, offered U.S. collaboration in the joint programme through the supply of specialists and exchanges of information.—(O.E.E.C. Information Division, Paris) **(Prev. rep. 16039 A; Kjeller Reactor, 11918 E.)**

A. WESTERN GERMANY - UNITED KINGDOM. — Dr Adenauer's Visit to London. - Political and Economic Discussions. - Anglo-German Cultural Convention.

The German Federal Chancellor paid a three-day visit to London on April 16-18, accompanied by Professor Ludwig Erhard, the Federal Vice-Chancellor and Minister for Economic Affairs, and Dr. von Brentano, the Foreign Minister. Dr. Adenauer and Dr. von Brentano had a number of discussions with Mr. Macmillan and Mr. Selwyn Lloyd on the international situation and Anglo-German relations, while Professor Erhard had discussions with Mr. Heathcoat Amory (Chancellor of the Exchequer) and Mr. Maudling (Paymaster-General) on economic matters, particularly with the regard to the proposed European Free Trade Area. The following communiqué (cross-headings inserted) was issued from Downing Street at the conclusion of Dr. Adenauer's visit.

". . . The principal subjects discussed were East-West relations, preparations for a summit conference, and economic problems, including the progress of negotiations for the establishment of a Free Trade Area in Europe.

Summit Conference. "The Chancellor and the Prime Minister agreed on the desirability of holding a summit conference, in order to provide the opportunity for discussing major international problems and to enable agreement to be reached on significant subjects. To this end they believed that the more effective this preparation, the better the prospect of a successful outcome. They therefore looked forward to speedy progress in the diplomatic discussions . . . to pave the way for the holding of a successful summit conference.

Disarmament. "The two Heads of Government considered that one of the most important and urgent subjects to be dealt with at a summit conference would certainly be controlled disarmament. They agreed that, if there could be successful negotiations on this subject leading to balanced reductions of the forces and armaments of both sides, this would do more than anything else to facilitate progress on other subjects of dispute between East and West.

German Reunification. "The two Heads of Government recalled the obligation, recognized by the Soviet Union at Geneva in 1955, to work for the reunification of Germany on the basis of free elections. The Prime Minister shared the Chancellor's view that, in the course of a summit conference, renewed efforts should be made to draw the attention of the Soviet Government to their obligation to put an end to the division of Germany. In this connexion the Chancellor stressed the human side of the problem and the Prime Minister expressed the sympathy of the British people for the population of the Soviet zone. The two Heads of Government agreed that a lasting settlement in Europe was not possible without the ending of the tension which results from the participation of Germany.

The Support Costs Question. "The Chancellor and the Prime Minister expressed their gratification that agreement had been reached between the two Governments on a basis for settlement of the problems of British forces in Germany, and that this agreement had been submitted for the approval of the North Atlantic Council, under whose auspices the negotiations on this subject had taken place [see pages 16239-40].

Economic Problems. "In discussing economic problems the Chancellor and the Prime Minister agreed upon the importance of a high and expanding level of international trade. They affirmed their intention to follow policies designed to achieve this end. They declared that they would work closely together in pursuit of this objective, and would continue to give full support to the international institutions concerned.

European Free Trade Area. "The Chancellor and the Prime Minister agreed upon the cardinal political and economic importance, in the interest of European unity, of complementing the European Economic Community of the six States by the European Free Trade Area. They therefore attached great significance to the negotiations for the establishment of a Free Trade Area which were at present taking place under the chairmanship of Mr. Maudling. The Chancellor expressed his hope that the current negotiations between the six Governments of the European Economic Community would lead to solutions to which all partners in the negotiations for the Free Trade Area could agree. The Ministers agreed that these negotiations ought to be brought as quickly as possible to a successful conclusion.

Anglo-German Cultural Convention. "During the course of the visit the two Foreign Ministers took the occasion to sign an Anglo-German cultural convention [see below], which will make a further important contribution to Anglo-German friendship.

Conclusion. "A full and constructive discussion on all these subjects took place in a frank and friendly spirit and on a basis of mutual confidence. The two Heads of Government agreed upon the value of the close personal contacts which they renewed in their meetings last year, and resolved on the regular maintenance of these contacts."

As stated in the communiqué, an Anglo-German cultural convention was signed by Mr. Selwyn Lloyd and Dr. von Brentano. Similar to other cultural conventions in force between Britain and other countries, its main provisions covered :

(1) The spread of knowledge of the language, life, and institutions of either country in the other.

(2) The mutual establishment of cultural institutes and Anglo-German associations, and the granting of facilities for the import of books, newspapers, films, etc.

(3) Interchange of university teachers, students, youth groups, research workers, etc., and reciprocal provision of scholarships for study, training or research.

(4) Mutual co-operation between cultural organizations and between municipal and local authorities of the two countries.

(5) The creation of an Anglo-German mixed commission (consisting of five British and five German representatives) meeting alternately in each country at least every 18 months. The commission would be presided over by an 11th member appointed by the country in which the meeting took place.

(6) The convention would also apply to West Berlin, provided no declaration to the contrary was made within three months of its entry into force.

During their three-day visit Dr. Adenauer and the other German Ministers were received at Windsor by the Queen, attended a Government reception at Lancaster House and a dinner given in their honour by Mr. Macmillan at 10, Downing Street, and visited Westminster Abbey to lay a wreath on the Tomb of the Unknown Warrior. Dr. Adenauer also addressed a joint meeting of both Houses of Parliament.

Dr. von Brentano had previously visited London in December for discussions on international problems and the support costs question. As stated in the communiqué, this question was subsequently settled after further Anglo-German discussions under NATO auspices - see also pages 16239-40. (Times - Daily Telegraph - Frankfurter Allgemeine Zeitung) **(Prev. rep. 15580 A.)**

B. TUNISIA. — Discovery of Alleged "Youssefist" Conspiracy against President Bourguiba. - Tunisian Protest to United Arab Republic.

President Bourguiba announced on March 6 that the Tunisian Ambassador in Cairo had asked the Government of the United Arab Republic to explain why a Tunisian terrorist had been issued with Egyptian travel documents ; he added that Tunisia would break off diplomatic relations with the U.A.R. if a satisfactory explanation were not forthcoming. M. Mehiri, State Secretary for the Interior, had told a press conference on the previous day that the terrorist was carrying letters from Salah Ben Youssef (the former general secretary of the Néo-Destour, who has lived in Cairo since his expulsion from Libya in January 1957) urging his supporters to assassinate President Bourguiba.

M. Mehiri stated that a young Tunisian had been arrested on Feb. 16 near the Libyan frontier but had succeeded in escaping, leaving his papers in the hands of the Tunisian authorities. These included an Egyptian safe-conduct stamped with a visa from the Libyan Embassy in Cairo, and letters signed by M. Ben Youssef calling for the assassination of President Bourguiba as a "traitor to the Arab cause, an ally of the West, and a creature of the infidels." M. Mehiri said that the discovery of the letters had led to the arrest of 41 people on conspiracy charges. M. Taha Amira, head of the mining department in the Ministry of Commerce and Industry, was subsequently arrested on March 17.

It was reported on April 19 that, following talks between President Nasser and Dr. Mokkadem (the Tunisian State Secretary for Foreign Affairs), the U.A.R. Government had agreed to close the "Bureau of the Arab Maghreb" established by M. Ben Youssef in Cairo, and to ask him to leave Egypt.—(Le Monde, Paris) **(Prev. rep. 15412 D.)**

C. UNITED STATES. — Merger of News Agencies.

The United Press Association and the International News Service announced on May 24 that they had signed an agreement for the merger of the two organizations under the name of United Press International. The U.P. was formed in 1907 by E. W. Scripps and is now operated by the Scripps-Howard newspaper group. The International News Service was formed in 1909 by the William Randolph Hearst newspaper organization.—(New York Times - New York Herald Tribune)

D. JAPAN - BELGIUM. — Payments Agreement.

A new payments agreement between Belgium and Japan, providing for the settlement of any trade balances either in transferable pounds sterling or in Belgian francs, was signed in Brussels on April 30. It came into effect on May 10 and replaced a previous agreement of Aug. 29, 1950, under which any balance was to be settled in U.S. dollars.

(Japanese Embassy Press Office, London)

JUNE 21—28, 1958

A. UNITED KINGDOM - UNITED STATES - CANADA. — Mr. Macmillan's Visits to Washington and Ottawa.

The British Prime Minister, Mr. Harold Macmillan, arrived in Washington on June 7 for informal discussions with President Eisenhower at the latter's invitation. During his three-day visit he had a number of meetings with the President and Mr. Dulles at the White House, addressed the U.S. Senate and the National Press Club, and visited DePauw University (Greencastle, Indiana) and Johns Hopkins University (Baltimore) to speak at graduation ceremonies and receive honorary degrees.

No communiqué was issued on the White House talks, which, Mr. Dulles stated, had dealt with "every subject under the sun." It was understood that the discussions covered *inter alia* all aspects of the international situation, the "summit" negotiations, disarmament and the question of suspending nuclear tests, the expansion of world trade, investment by the free-world countries in the under-developed countries, and the need for close collaboration, both political and economic, between the countries of the free world in general and between Britain and the United States in particular.

The theme of "inter-dependence" was particularly stressed by Mr. Macmillan in his speeches at DePauw University and Johns Hopkins University. His DePauw speech aroused much interest in the United States, where it was extensively reported in the newspapers and televised throughout the country. Mr. Macmillan spoke as follows :

"I have chosen as the theme of my address the word 'inter-dependence.' In my belief this word must be the keynote of the second half of the 20th century if the progress of humanity is to continue . . . It is a trite observation to say that we are 'in a period of transition.' Many people have said this at many times ; Adam may well have made the remark to Eve on leaving the Garden of Eden. But there can never have been a time in our history when it has been so true—when all the material forms of progress have advanced with such breathtaking rapidity.

"Are we sure we have made sufficient adaptations in our outlook on political and economic questions to keep pace ? In a word, are the statesmen running behind the scientists ? Of course, in a sense the statesmen have the more difficult task. For science, whether pure or applied, is, of its nature, international. It has no boundaries and, except to truth, no responsibilities The scientist and the technician devise new methods of locomotion, new sources of power, new methods of destruction on an ever-increasing scale. It is no part of their duty to say what use mankind will make of these novel and often terrifying instruments. . . . Nevertheless, all these processes may revolutionize the whole life of man on earth.

"After the First World War . . . the appalling destruction and misery caused by that conflict made many statesmen and people begin to think in terms outside the old pattern of national States, and to make a move along the path to world unity. But the League of Nations broke down in practice for two reasons. First, it was not comprehensive. Secondly, it was armed with no sufficient cohesion or power. It was a bold and noble effort to produce, in Pascal's words, 'a world in which force is just and justice has force at its disposal.' But, alas, this dream could not be realized, and when the test came the League broke under the strain.

"After the Second World War . . . a new attempt was made. In the first flush of enthusiasm the founders of the United Nations Organization believed that they had found the answer. In the Security Council, mainly dominated by the great Powers, was to be found the germ of a world administration or cabinet, and in the Assembly the beginning of a world congress or parliament. But once again events have proved too strong for us. To make anything like a world community all at once has been too big a step, and this time the attempt has foundered on the deep division in the world between two different concepts of society. . .

"So there has grown between two great blocks of nations the division between what we call the free world and the Communist world. There are some who feel that this struggle is necessarily fated to end either in war or the triumph of revolutionary Communism. I believe that to be too pessimistic a judgment. Of course, the free world must be firm as well as fair. We must not lower our guard. We must not fall victim to propaganda or to mere exhaustion. Nor must we delude ourselves by wishful thinking. We must not conceive of peace as a state of inactivity, something that can be just enjoyed : it is something that has to be won by struggle and effort. Nevertheless, in the long view, I cannot believe that a country like Soviet Russia, developing so rapidly in all the technical, scientific, and material improvements of life, will not in due course be subjected to the normal development of all civilized peoples . . .

"These two great forces do not always face each other directly across an empty arena. On the contrary, the so-called uncommitted countries, neither for us nor against, comprise enormous numbers. Their role may well be vital. In the countries of Asia and Africa new forces are at work. At first these are apt to take crude and dangerous shapes. But nationalism and national pride is in itself a healthy thing. It is only wrong when it is twisted into aggression. We in Britain have considerable experience of these changes and we have not been unresponsive to this new challenge.

"For over 100 years it has been the policy of Great Britain to develop colonies and dependencies into free and independent nations. Since the end of the war this process has been extended to peoples not of British stock. Thus we have transformed Empire into Commonwealth. Of our own will and design we have set up in freedom great countries like India, Pakistan, Ceylon, and recently Ghana and Malaya. Other new nations, like the West Indies, will in time join these ranks I call them ranks, but it is no military discipline which keeps the Commonwealth together. It is not even in all cases the tie of the Crown. It is certainly not unity of creed or race or colour. Nevertheless, it is a real unity based upon old traditions common to our country and yours. It is the sense of government by debate and discussion, the independence of the judiciary, the freedom of the individual, the universality of law. The ultimate success of the free world will perhaps depend on the degree to which we can spread these ideals to the hesitating and uncommitted countries.

"When I last had the privilege of meeting President Eisenhower in Washington we drew up together a Declaration of Common Purpose ; you might call it a blueprint for inter-dependence. This was not a visionary project but a practical advance to bring the reality of our alliance up to date. It was not meant to establish an exclusive club but to set a pattern for a wider group ; to show why it is that the Soviet Union has satellites while in the free world we have allies. . . .

"No-one who has studied the Marxist writers can fail to be impressed by the emphasis placed on destructive criticism of the capitalist system. Our world, which we see as prosperous and free, is represented as a jungle filled with ravening beasts seeking to devour each other, a jungle in which there is bound to be starvation for the many and plenty for the few. Violent trade cycles and war are said to be inevitable products of our system. Of course, we know that this is an utterly false view. Nevertheless, two things are true, which we have not yet all learnt. First, prosperity, like peace, is indivisible. Secondly, there are still too many artificial barriers to the free flow of money and trade in the free world. These barriers have grown up historically when modern civilization and material progress were in their infancy. Indeed, when the political aims of the different countries in the free world were different, when the great alliances had not been forged, it was natural that Governments should pursue separate and conflicting economic policies.

"But now our political aims are the same. We differ, if at all, on tactics and not on strategy. We all face a common danger. Just as the economies of the States of the Union grew together 200 years ago, so, in some measure at least, must the economies of the free world to-day. Since the war the United States has, with unexampled generosity, poured out its treasure all over the world ; first to help its allies who were impoverished by the joint defence of freedom, then to protect the young economies of the newly independent States. All too little credit has been given for this, and often you have found ingratitude. We too in Britain, with our far smaller resources, have played our full part—and we have learnt by now not to expect gratitude. . . .

"What is it then that the United States and Britain stand for ? We stand to defend and spread by all legitimate means what we call the free way of life—or, if you like, the democratic way of life . . . Sometimes we wonder why any countries outside the Soviet control can hesitate. In fact there is, perhaps, less doubt and hesitation than we sometimes think, for many of them are subjected to great pressures externally and internally. All the same, these people want to be sure that our claims are really justified. How are we to convince them ? The free world cannot defend itself or win allies to itself only by rockets and bombers and all the rest. These are necessary, but they are not enough. In the long run the free world will defend itself and win adherence to itself because our way of life gives a better way of living, a fuller life to the individual, security and hope."

Mr. Macmillan left Washington on June 11 for a two-day visit to Ottawa, where he had informal talks with the Canadian Prime Minister, Mr. Diefenbaker, and the Ministers of External Affairs, Finance, and Trade—respectively Dr. Sidney Smith, Mr. Donald Fleming, and Mr. Gordon Churchill. As in Washington, no communiqué was issued on these discussions, which were understood to have dealt *inter alia* with the expansion of Anglo-Canadian trade, the forthcoming conference of Commonwealth Finance Ministers (to be held in Quebec in September), and international questions. In an address to a joint session of the Canadian Senate and House of Commons (June 13) Mr. Macmillan expressed his conviction that the Quebec conference would mark "a great advance in Commonwealth co-operation in trade and commerce."

In a statement to the U.K. House of Commons on June 17, after his return to London, Mr. Macmillan said that he had discussed "most of the major problems of the world" with President Eisenhower and Mr. Dulles and had found the views of the British and U.S. Governments to be "closely in accord." In Ottawa, "matters of mutual concern" had been discussed with Mr. Diefenbaker and his Cabinet colleagues ; in particular, the forthcoming Commonwealth trade and economic conference.—(Times - Daily Telegraph - New York Times - Montreal Star) **(Prev. rep. 15823 A.)**

A. SOUTHERN RHODESIA. — General Elections won by United Federal Party. - New Cabinet formed by Sir Edgar Whitehead.

General elections for the Southern Rhodesian Territorial Assembly were held on June 5. The three parties contesting the elections were the United Federal Party, led by Sir Edgar Whitehead (the Prime Minister); the Dominion Party, led by Mr. R. O. Stockil; and the United Rhodesia Party under Mr. Garfield Todd (the former Prime Minister), who had seceded from the United Federal Party in January last following the repudiation of his African policies by the U.F.P. caucus. Both the United Federal and Dominion parties contested all the 30 seats, while the United Rhodesia Party put up 23 candidates; there were also two Independents. The Confederate Party had previously announced that it would not take part in the Territorial elections.

The elections were fought on the basis of the new electoral law enacted in 1957 (see 15879 A; 15781 A).

On May 18 the Dominion Party petitioned the Governor of Southern Rhodesia (Vice-Admiral Sir Peveril William-Powlett) to suspend the Southern Rhodesian Constitution because of an alleged flaw in the Electoral Amendment Act, which provides for the use of the second preference vote instead of the previous "straight vote" system. The petition asserted that there was "uncertainty" over the preferential voting system, inasmuch as (*a*) it was not known how many votes cast in the election were to be counted; and (*b*) it was therefore not certain how the Returning Officer would decide which candidate should be declared elected in certain cases, or how the question of forfeiture of deposits would be decided. It was argued that in some cases, according to certain interpretations of the law, the only result of the elections might be a "no result" verdict, and that no machinery existed for calling another election in such circumstances.

The Governor rejected the Dominion Party's petition on May 21. Sir Edgar Whitehead, announcing the Governor's decision, said that its acceptance would have meant "the end of responsible government" in the Colony for as long as the Constitution remained suspended. The Dominion Party had set an "extremely dangerous precedent," as it had, in effect, asked for the intervention of the British Government in Southern Rhodesia's internal affairs on a matter of interpretation of an Act passed by the Colony's Parliament.

Regulations governing the operation of the preferential vote were published on May 21.

It was provided that in the case of a straight fight between two candidates, the result would be decided by a simple count of first preference votes. Where there were more than two candidates, voters might if they wished indicate a first, second, or third preference up to the number of candidates standing. In the case of three candidates, if no one candidate succeeded in gaining an outright majority of all first preference votes, then the candidate gaining the lowest number would be eliminated and any second preference votes cast in favour of the other two would be added to their first preference votes to decide the issue of the contest. In the case of four or more candidates, second and even third preference votes might be used if necessary in order to ensure that the winning candidate received an absolute majority.

The elections resulted in a victory for the United Federal Party, which won 17 seats, while the Dominion Party gained 13 seats, thus strongly improving its position. The United Rhodesia Party suffered a complete defeat, failing to win a single seat.

The voting figures showed that the Dominion Party actually polled more votes than the United Federal Party, the final figures being:

Dominion Party	18,314
United Federal Party ..	17,516
United Rhodesia Party ..	3,991
Independents	67

The electorate numbered 55,148, of whom nearly 52,000 were Europeans, about 2,000 were Africans, and some 1,500 were Asians and members of mixed races. About 8,000 Africans would have been eligible for registration under the new electoral legislation, but some 6,000 of them failed to register in time because of the suddenness of the elections.

The total number of first preference votes was 39,712, divided as follows: Dominion Party 18,142; United Federal Party 16,840; United Rhodesia Party 4,663; Independents 67.

In 10 constituencies candidates did not receive an absolute majority on the first count, and second preference votes on the ballot-papers of eliminated candidates had to be counted. These second-preference votes were distributed as follows: United Federal Party 1,224; United Rhodesia Party 199; Dominion Party 172.

Sir Edgar Whitehead had a majority of 403 at Salisbury North, while Mr. Stockil had a majority of 575 at Victoria. Mr. Cyril Hatty, Minister of the Treasury and Native Education, was re-elected for Bulawayo Central; Mr. Reginald Knight, Minister of Justice and Internal Affairs, for Salisbury City; and Mr. A. R. W. Stumbles, a former Minister of Internal Affairs and Education, for Avondale. Among notable political figures defeated—in addition to Mr. Garfield Todd—was Mr. Ellman-Brown, who served under both Mr. Todd and Sir Edgar Whitehead, and who held the portfolios of Roads, Local Government, Housing and Irrigation in Sir Edgar's Cabinet.

Commenting on the election results, Sir Roy Welensky (Federal Prime Minister), said that it proved that Rhodesians could be "trusted to do the sensible thing." He added: "It is true the Dominion Party made progress, and I believe it will be a great benefit for the people to see them in a position where they cannot make excuses that there are not enough of them to put up proper opposition. It is now quite clear that Rhodesians are determined to follow a moderate pace in racial matters, and this should be recognized by all concerned in this country and out of it."

Sir Edgar Whitehead's Cabinet was reconstructed on June 11 as follows:

Sir Edgar Whitehead	Prime Minister and Native Affairs.
Mr. Cyril J. Hatty	Treasury and Mines.
Mr. Reginald Knight, Q.C. ..	Justice and Internal Affairs.
Mr. A. E. Abrahamson	Labour, Social Welfare, and Housing.
Mr. R. M. Cleveland	Local Government and Native Education.
Mr. A. R. W. Stumbles ..	Roads, Irrigation and Lands.

Mr. H. J. Quinton was appointed Parliamentary Secretary to the Minister for Native Affairs, an office he had held for a few months in Mr. Garfield Todd's Cabinet. Both Mr. Stumbles (M.P. for Avondale) and Mr. Abrahamson (M.P. for Bulawayo East) had previously held Cabinet office, the only newcomer being Mr. Cleveland (M.P. for Salisbury Central). Sir George Davenport the outgoing Minister of Mines, Lands, and Surveys—did not seek re-election.

The new Cabinet included three of the five "rebels" whose resignation from Mr. Garfield Todd's Cabinet in January led to Sir Edgar Whitehead's recall from Washington Mr. Hatty, Mr. Stumbles, and Mr. Quinton. (Federal Information Office)

(Prev. rep. 16165 A.)

B. UNITED KINGDOM. — Opposition rejects Joint Talks with Government on Defence.

In a statement to the House of Commons on April 24, Mr. Macmillan announced that no private and confidential talks on defence would take place between the Government and the Opposition, as Mr. Gaitskell was of the opinion that such talks would not be compatible with the fulfilment of the Opposition's constitutional functions. The Prime Minister explained that his statement was made in agreement with Mr. Gaitskell.

After recalling that proposals had been made from time to time that the Government should discuss defence matters with the Opposition, Mr. Macmillan continued: "At my suggestion, the Leader of the Opposition came to see me before the Easter recess to talk over the possibilities of such discussions. We considered a plan put forward by some Members that there should be a committee of this House to which secret information should be given by Ministers. We were agreed that such a committee would not be appropriate to our Parliamentary system and would entail great difficulties."

The Prime Minister explained that Mr. Gaitskell, in rejecting the idea of regular meetings of a confidential nature which would be attended by Privy Councillors from both sides, had pointed out that Sir Winston Churchill, after three meetings of this kind, had decided in 1949 to discontinue them. [Sir—then Mr. Winston Churchill was Leader of the Opposition at the time.] Mr. Macmillan continued: "Doubtless he [Sir Winston] felt that they hampered unduly his freedom of public criticism in the House of Commons. I am sorry that Mr. Gaitskell felt that the same difficulties would necessarily arise to-day, for I think that an experiment of this kind might well be repeated. However, I must accept his decision."

Mr. Macmillan mentioned the custom whereby Ministers occasionally consulted with the Opposition, informally and privately, on specific points. He said in this connexion: "This is a long tradition of Parliament, and such talks have taken place on the initiative sometimes of the Opposition, sometimes of the Government. I fully accept that this system is a good one, but that of course both the Government and the Opposition must hold themselves free to make, accept, or reject invitations of this kind. To be of any value, such meetings must be confidential and private. While, therefore, I am sorry that Mr. Gaitskell has not thought it right to agree to a more formal arrangement for discussion of the many defence problems which confront us, I am glad that the possibility of occasional consultation in the traditional manner remains open."

A suggestion that the Government and the Opposition should consult from time to time on defence matters was made by Mr. Shinwell (the former Labour Minister of Defence) in the defence debate of Feb. 26-27 [see page 16005, second column]. Mr. Bellenger, a former Labour Secretary of State for War, had also proposed the setting-up of a House of Commons committee to which secret defence information could be given by Ministers.—(Times - Daily Telegraph)

A. ALGERIA. — Political Activities of Right-wing Settlers' Organizations. - General Faure's Conspiracy. - Attempted Murder of General Salan. - Anti-Moslem Riots in Algiers. - Terrorist Activities.

Political agitation by extreme right-wing elements among the European population in Algeria was increasingly in evidence from 1956 onwards, continuing intermittently throughout 1957 and into the early months of 1958. Two conspiracies against the Administration were discovered at the end of 1956 and the beginning of 1957, one being led by General Jacques Faure (second-in-command of the Algiers military region), and the other being the work of an extremist organization which made an unsuccessful attempt on the life of General Salan, the French C.-in-C. in Algeria. Violent anti-Moslem riots occurred in Algiers on Dec. 29, 1956, and June 11, 1957, after terrorist acts by Algerian rebels, and a number of assassinations and bomb explosions were carried out during the same period by European counter-terrorist organizations.

The organizations responsible for these activities fell into three main groups :

(1) The mass organizations of ex-servicemen, students, and Poujadists which had been responsible for the riots following M. Mollet's arrival in Algiers on Feb. 6, 1956 [see page 14684].

(2) Political bodies such as the French North African Union, which was dissolved by order of M. Lacoste (the Resident Minister in Algeria) on July 4, 1956, for conducting activities " tending to turn the Army against the civil authorities." The president of the Union, M. Boyer-Banse, had previously been expelled from Algeria in May 1956.

(3) Extremist secret societies such as the *Comité de la renaissance française* or " Committee for the Rebirth of France " (C.R.F.) and the " Resistance Organization of French Africa " (O.R.A.F.), which conducted a violent propaganda against the French Government's policy and carried out terrorist activities against Moslems and liberal elements among the French settlers. Both these organizations were dissolved by M. Lacoste on Dec. 11, 1956.

Details of the activities of these and similar organizations are given below under cross-headings.

General Faure's Conspiracy.

It was disclosed in the French Press on Jan. 7, 1957, that General Faure had been placed under close arrest for 30 days by order of M. Bourgès-Maunoury (then Minister of Defence), and that General Dumesnil de Maricourt (commander of the Air Force in Algeria) had been summoned to Paris and reprimanded. The Resident Minister's office, in a statement issued on Jan. 8, said that General Faure had " contacted certain civilians in Algiers with a view to forming a plan of subversion "; that a declaration had been drawn up, bearing the signature of an officer who knew nothing of the affair ; that the discussions carried on by General Faure had led M. Lacoste to ask for his recall ; and that " the Algerian side of the affair " was now considered at an end. M. Lacoste subsequently told the Council of the Republic on April 5, 1957, that General Faure had " formed mad plans which would have plunged Algeria into grave disorders," and that his conduct had been " contrary to discipline and dangerous to public order and the institutions of the Republic."

According to reports in the French press, General Faure had been in touch with a committee of European extremists, headed by a general on the reserve list, which had planned to kidnap M. Lacoste and set up a military Government in Algeria. In preparation for the proposed coup, General Faure drew up a proclamation to which he added the names of General Salan and General Frandon (commander of the French air forces in North Africa) without consulting either. He also sought to enlist the support of M. Teitgen (secretary-general of the prefecture of Algiers), who, however, informed his superiors, and at a second meeting between them their conversation was secretly recorded by means of a tape-recorder. In consequence General Faure was recalled to Paris on Dec. 28, 1956, and on the following day was sentenced to 30 days' close arrest. General de Maricourt, who was reported to have made statements incompatible with military discipline but not to have been involved in the conspiracy, was summoned to Paris at the beginning of January 1957 and reprimanded ; he subsequently returned to his post.

Attempted Murder of General Salan.

An attempt to murder General Salan was made on Jan. 16, 1957, by firing two anti-tank rockets into his headquarters in Algiers from the roof of a house opposite. General Salan was absent at the time, but an officer of his staff was killed and two soldiers wounded by one of the rockets, which exploded in the general's office. Ange Salicetti (an employee of the arsenal in Algiers who was believed to have fired the rockets), René Kovacs (a well-known swimmer), his wife, and nine other Europeans were arrested and charged on Feb. 6, 1957, with murder, attempted murder, and conspiracy against the security of the State. A Government spokesman said that the accused belonged to an organization to the right of the C.R.F. and the O.R.A.F., which had been engaged in terrorist activities since the previous summer.

The *cour de cassation* ordered on Feb. 20, 1958, that for reasons of public security the case should be transferred from the military tribunal in Algiers to the permanent tribunal of the armed forces in Paris.

Anti-Moslem Riots in Algiers.

Serious disorders, in which six Moslems were murdered, occurred in Algiers on Dec. 29, 1956, during and after the funeral of M. Froger, the mayor of Boufarik, who had been assassinated by Moslem terrorists on the previous day [see page 16187]. Several thousand Europeans accompanied the funeral procession to the church, shouting such slogans as " put the Army in power," " shoot Guy Mollet," and " shoot Lacoste " ; while the service was in progress some of the demonstrators attacked the U.S. Consulate-General, shouting anti-American slogans and tearing down the consular shield. When the procession left the church they assaulted M. Lacoste's representative, tried to overturn his car, and forced him to walk to the cemetery. Bands of youths then began assaulting Moslems, attacking and looting Moslem shops, and overturning and setting fire to cars. The number of casualties was officially given as six Moslems killed and at least 58 injured.

Following an explosion in a dance-hall on June 9, 1957, in which 10 Europeans were killed and about 80 injured by bombs planted by Algerian terrorists, a general strike was called by ex-servicemen's and students' organizations for June 11, when most of the victims were buried. Both before and after the funeral bands of students and schoolboys assaulted individual Moslems, looted and burned down Moslem shops, and attacked and set fire to buses and cars containing Moslems. The rioters, who shouted " put Massu in power " [i.e. General Massu, commander of the parachute troops in Algiers], were cheered by large crowds. About 200 of the rioters were arrested, all but two being subsequently released. An official statement said that five Moslems and a European woman had been killed and eight Europeans injured.

Terrorist Activities.

European organizations retaliated to the outburst of nationalist terrorism in Algiers in the summer of 1956 [see page 16187] by various acts of counter-terrorism. Bomb explosions occurred on June 30, 1956, at the headquarters of the *Union générale des travailleurs algériens* (the nationalist trade union federation), and on July 17, 1956, at the editorial office and the printing works of the Communist daily *Alger Républicain* ; responsibility for the latter attack was subsequently claimed by the O.R.A.F. In the Moslem quarter of Algiers 15 people were killed and about 40 injured on Aug. 10, 1956, by an explosion which was attributed to the group responsible for the attack on General Salan ; the same group was held responsible for a bomb explosion on Nov. 9, 1956, at a printing office owned by the moderate nationalist " Democratic Union of the Algerian Manifesto." During the last week of August, 1956, grenade attacks were made on five Arab cafés in the Algiers area, three Moslems being killed and 16 wounded ; these incidents were believed to be reprisals for the murder by nationalists of two Europeans of extremist views.

It was announced on March 4, 1957, that 22 members of the C.R.F., including Robert Martel, the former general secretary of the French North African Union, had been arrested on charges of distributing subversive pamphlets, kidnapping, and murder. Police inquiries revealed that Martel had discussed plans for seizing power with an organization in Paris led by a Dr. Martin, who before the war was a prominent member of the Fascist *Cagoulard* organization. The police also stated that the accused had kidnapped a Moslem shopkeeper in Algiers and tortured him to death ; that they had been responsible for a number of grenade explosions ; and that arms, ammunition, explosives, and instruments of torture for the " interrogation " of kidnapped Moslems had been found at a villa used as their headquarters. The pamphlets issued by the group were couched in extremely violent terms, calling for an uprising and for the execution of " traitors " such as M. Mollet (then Prime Minister), M. Lacoste, and prominent French and Moslem liberals.

A grenade explosion occurred on April 17, 1958, in the building of the U.S. Consulate-General in Algiers, injuring a Moslem charwoman. Responsibility for the explosion was admitted by an organization calling itself the " Movement for French Independence " (*Mouvement pour l'indépendance française*), which declared that it wished " international and metropolitan opinion to know that a certain number of Frenchmen are not prepared to allow their soil to be sold to anyone." (Le Monde, Paris) (Prev. rep. 14913 A ; 14681 A.)

A. UNITED KINGDOM. — Ending of Fuel Rationing and Price Control. - Report of Robson Committee on Coal Distribution Costs.

Lord Mills, the Minister of Power, announced in the House of Lords on June 10 that the Government had decided that rationing and price control of coal, coke, and manufactured fuel would end about mid-July and be replaced by free competition in the retailing of these fuels. The "gentlemen's agreement" under which the National Coal Board undertook to consult the Government before making any changes in their price structure would remain in effect, and there was at present no question of the Board submitting a new price structure to the Government. Mr. Maudling (the Paymaster-General) made a similar announcement in the House of Commons.

Lord Mills explained (*a*) that the Government considered that "the restoration of free competition and freedom for the householder to buy from any merchant should encourage producers and distributors to offer the public the qualities of coal they need at the most competitive prices"; and (*b*) that in reviewing the question of decontrol it had been "materially helped" by the report of the Robson Committee on Coal Distribution Costs [see below]. He added that the ending of control would save nearly £1,000,000 a year in administrative expenses, and that he proposed to have immediate consultations with the National Coal Board, the merchants, the Domestic Coal Consumers' Council, and local authorities to ensure that the transfer from control to free competition was effected smoothly.

The report of the Robson Committee, referred to by Lord Mills, was published on the same day (June 10). The committee found (1) that the return of price competition in the coal-distributing trade would benefit both the public and the more efficient merchants; (2) that charges for wholesale services in the coal trade were "not open to serious criticism."

The report stated that the coal-distributing trade supplied 660,000 non-domestic consumers and 16,500,000 householders, and employed 135,000 workers, 55,000 road vehicles, and many ships and lighters. The general methods of distribution and structure did not appear to have undergone large changes since the 1930's, but the former multiplicity of prices and names of coals had disappeared and had been replaced by standards, qualities, and zone prices.

At present the maximum retail price for domestic coal was made up of the zone-delivered price to the merchant and his gross margin to cover his own costs and profit. The report explained that although the composition of the national average price could not be stated precisely, a fair approximation per ton for the 30,500,000 tons of coal consumed by domestic consumers in 1957 and retailed at an average price of 153s. 2d. a ton would be: pit receipts, 96s. 3d. (63 per cent); transport charges to merchants, 26s. 4d. (17 per cent); average gross retail margin, 30s. 7d. (20 per cent). Wholesalers' charges, averaging 2s. a ton (of which 5d. represented the wholesalers' profit), were in the main met out of gross retail margins.

For coal used by electricity undertakings (46,800,000 tons at 85s. 2d. a ton) the breakdown would be: pit receipts, 68s. 4d.; transport, 16s. 8d.; distributors (i.e. factors or contractors), 2d. For gas undertakings (using 25,800,000 tons at 95s. 2d. a ton) the breakdown would be: pit receipts, 95s. 2d.; transport, 20s.; distributors, 3d. The report added that the Central Electricity Board and some larger Gas Boards together transported nearly 10,000,000 tons a year in their own ships.

The committee pointed out that the original intention when rationing and price control were introduced was that distributors' margins should include 2s. 9d. a ton for retailers' profits, but that in many cases the margins had fallen short of this by 1s. a ton or more. Pending the ultimate replacement of the national flat-rate profit allowance by a regional allowance, it recommended that merchants should be allowed increases of 6d. a ton where the ration was 50 cwt. of coal a year and 1s. 6d. a ton in other areas. [This recommendation was outdated by the Government's decision to abolish controls.]

The report also recommended (*a*) a reduction in the number of coal depots (at present about 8,500) and their concentration into a smaller number of larger depots; (*b*) the introduction of mechanical handling plant wherever possible.

The Government's decision was welcomed by Sir James Bowman, chairman of the National Coal Board, and by Sir John Charrington, chairman of the Chamber of Coal Traders, which represents about 18,000 coal merchants throughout Britain.

Sir John Charrington said that "some small increase in prices" seemed "inevitable" when rationing ended, in view of the present insufficiency of merchants' profit margins, which yielded an average net profit of two per cent. He added, however: "Even if price control had continued, prices would have gone up a small amount—1s. to 1s. 6d. a ton. My guess is that prices will not rise more than they would have done under control."

When fuel control ends in July, the last of the major economic controls introduced in September 1939 will have been abolished.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 3648 E; Robson Committee, 14882 A.)**

B. UNITED STATES. — Foreign Economic Aid.

The following table, prepared by the International Co-operation Administration, was issued in Washington on May 23 showing economic aid provided to foreign countries by the United States in the financial years ended June 30, 1956 and June 30, 1957, together with estimated aid in the year ending June 30, 1958. An announced but unsigned $75,000,000 development loan for India is included in the 1957-58 figures.

	Year Ended June 30, 1956 (actual)	Year Ended June 30, 1957 (actual)	Year Ending June 30, 1958 (estimated)
Afghanistan	$18,300,000	$14,391,000	$5,800,000
Argentina	84,000	—	350,000
Bolivia	25,400,000	23,300,000	20,100,000

*i.e. not disclosed.

Figures of U.S. military and defence-support aid are not included in the table.—(New York Times) **(14742 A; 14442 B.)**

C. ISRAEL. — Nuclear Research Institute.

A Nuclear Research Institute, one of the most modern of its kind in the world, was opened on May 21 at Rehovoth in the presence of European and American scientists. Forming part of the Weizmann Institute, it contains 71 laboratories, lecture halls, an extensive library, workshops, and a proton accelerator, which is housed in a specially-designed tower. There are departments of nuclear physics, isotopes, and electronics, and laboratories for spectroscopy and nuclear magnetic resonance.—(Times - Israel Government Press Office)

D. MALAYA. — Membership of I.C.A.O.

The Federation of Malaya became a member of the International Civil Aviation Organization on May 7, bringing the membership of I.C.A.O. to 73. Costa Rica, which joined on May 31, was therefore the 74th member and not the 73rd as stated in 16198 E.—(I.C.A.O., Montreal) **(Prev. rep. 16198 E.)**

E. NETHERLANDS. — Bank Rate reduced.

The Netherlands Bank reduced its discount rate on June 13 from 4 to 3½ per cent—the third reduction since January. (Netherlands News Agency) **(Prev. rep. 16099 C.)**

A. PAKISTAN. — Central Cabinet Changes. - New Ministry in West Pakistan. - Political Crises in East Pakistan. - Imposition of Governor's Rule. - Party Developments. - The Gurmani Case.

The following changes in the Government of Pakistan were announced in recent months :

(1) Sardar Abdur Rashid (a former Chief Minister of West Pakistan) was appointed Minister of Commerce and Industries, and sworn in on March 29, in succession to Mr. M. A. Qizilbash, following the latter's appointment as Chief Minister of West Pakistan [see below].

(2) Sardar Amir Azam Khan was also sworn in on March 29 as Minister for Parliamentary Affairs and Economic Affairs ; he had been Minister for Refugees and Rehabilitation and for Parliamentary Affairs in the Central Government until his resignation in September 1957, and had been responsible for piloting the West Pakistan One-Unit Bill and the Constitution Bill through the Constituent Assembly.

(3) Mr. M. A. Khuhro (a former Chief Minister of Sind) was sworn in on April 8 as Minister of Defence—a portfolio hitherto held by the Prime Minister, Mr. Firoz Khan Noon. Mr. Khuhro had formerly been one of the leaders of the Moslem League, from which he had recently defected in protest against the executive's decision to defer consideration of his motion that a referendum should be held in West Pakistan on the one-unit scheme and the possible re-division of the province on a linguistic basis.

(4) Mir Ghulam Ali Khan Talpur, who had resigned as Minister of the Interior on March 18 because of internal disagreements, rejoined the Cabinet on April 18 as Minister of Power, Irrigation, and Planning (portfolios which were previously incorporated in the Ministry of Works) as well as Minister of Supply (a new department).

(5) Khan Mohammad Jalaluddin Khan was sworn in on April 7 as Minister of State in the Ministry of the Interior, while Syed Ahmad Nawaz Shah Gardezi became Minister of State in the Ministry of Food and Agriculture.

New Ministry in West Pakistan.

Sardar Abdur Rashid Khan, the Chief Minister of West Pakistan, resigned both the premiership and the leadership of the Republican Party in the Provincial Assembly on March 18, after the National Awami Party had on the previous day withdrawn its support for the Republicans in favour of the Opposition Moslem League, while five Republican members of the Assembly also crossed the floor to join the Moslem League. The reasons for the National Awami Party's move was that it had entered into an agreement with the Moslem League for the joint formation of a coalition government in West Pakistan on the basis of a 16-point programme which, however, was confined to agrarian and administrative problems.

Muzaffar Ali Khan Qizilbash (Minister of Commerce and Industries in the Government of Pakistan) was elected leader of the Republican Assembly Party on March 18 and asked by the Governor of West Pakistan to form a new Ministry. This was completed on March 25 with the following membership :

Nawab Muzaffar Ali Khan Qizilbash—Chief Minister, Services and General Administration, Tribal Affairs, Home Affairs, Industries and Commerce; Khan Iftikhar Husain Khan of Mamdot—Revenue; Mr. Abdus Sattar Pirzada—Law, Finance, and Indus Basin Waters Dispute; Syed Abid Husain—Communications and Works; Qazi Fazlullah—Power Development and Irrigation, and Construction of New Barrages; Sardar Abdul Hamid Khan Dasti—Education; Makhdoomzada Syed Hasan Mahmoud—Social Welfare and Local Government; Mirza Mumtaz Hasan Qizilbash—Food and Agriculture and Civil Supplies ; Mir Ali Ahmad Khan Talpur—Co-operatives; Khan Khudadad Khan—Health ; Sheikh Masood Sadiq—Rehabilitation; Arbab Noor Mohammad Khan—Excise and Taxation; Jam Mir Ghulam Qadir Khan—Prisons; Mr. Ghulam Nabi Dur Mohammad Khan Pathan—Forests and Game; Mir Ali Nawaz Khan Talpur—Information and Fisheries; Col. Nawabzada Mohammad Amir Khan of Hoti—Supplies and Village Aid.

Political Crises in East Pakistan.

A serious crisis occurred in East Pakistan on March 31 when the Governor, Mr. Fazlul Huq, dismissed the Ministry of Mr. Ataur Rahman Khan, leader of the East Pakistan Awami League. Mr. Fazlul Huq took this decision after Mr. A. R. Khan had requested him to prorogue the Provincial Assembly because the Cabinet had obtained a majority of only 15 votes in a debate on the Budget estimates—a request which Mr. Fazlul Huq refused. Following Mr. Khan's dismissal the Governor called on the Leader of the Opposition, Mr. Abu Hussain Sarkar, who was immediately sworn in as Chief Minister. Later in the night of March 31 - April 1, however, Mr. Fazlul Huq himself was dismissed by President Mirza, and the Chief Secretary of West Pakistan (Mr. Hamid Ali) was appointed Acting Governor. Within 12 hours of Mr. Khan's dismissal by Mr. Fazlul Huq, Mr. Sarkar, in turn, was dismissed by Mr. Hamid Ali, who reinstated Mr. Khan and his entire Cabinet. Later on April 1 it was announced that the Pakistani Ambassador to Switzerland, Dr. A. M. Malik, had been recalled from Berne and would be sworn in as Governor of East Pakistan upon his arrival, in succession to Mr. Hamid Ali. On April 26, however, it was announced that Mr. Sultanuddin Ahmed, the Ambassador in Peking, had been appointed Governor of East Pakistan instead of Dr. Malik.

The Provincial Assembly passed a vote of confidence in Mr. Khan's Ministry on April 3 ; 27 members of the Opposition (23 from the National Awami Party and four Independents) supported the Government, other Opposition members refusing to take part in the vote.

An application for a writ of *quo warranto* was filed by Mr. Sarkar in the Dacca High Court on April 3. The application was made against Mr. Ataur Rahman Khan and the members of his Cabinet, who were called upon to give information on the authority under which they were holding office. In making the petition Mr. Sarkar contended that Mr. Hamid Ali's action in dismissing the Sarkar Ministry had been *ultra vires* and illegal. The Dacca High Court dismissed Mr. Sarkar's petition on June 9 but gave both sides leave to appeal to the Supreme Court.

When the Provincial Assembly (which had been adjourned on April 5) reassembled on June 12 a fresh crisis broke out, the National Awami Party ordering its 30 members in the Assembly " not to lend any further support " to the Awami League coalition ministry headed by Mr. Khan unless the League was willing to sign the National Awami Party's five-point programme. Mr. Khan was accordingly defeated in the Assembly on June 19 by 138 votes to 126, the National Awami members abstaining. On the following day Mr. Sarkar (*Krishak Sramik* party) was sworn in as Chief Minister, but shortly before the swearing-in ceremony the Awami League and the National Awami Party announced that they had concluded a coalition agreement, and later the same day both parties decided to move a no-confidence motion against Mr. Sarkar. This motion was adopted by the Assembly on June 23 by 156 votes to 142.

In this situation the Central Government decided on June 24 to ask President Mirza to impose Governor's rule in East Pakistan. On the following day the President accordingly issued a proclamation assuming all the functions of the East Pakistan Government under Section 193 of the Federal Constitution ; it was also laid down that the powers of the Provincial Assembly (which was prorogued) were to be exercised by the National Assembly.

Developments in Political Parties.

The following developments took place within the major political parties in recent months :

Republican Party. Mr. Firoz Khan Noon, the Prime Minister, was elected leader of the Republican Party on May 30 in succession to the late Dr. Khan Sahib, who had been assassinated on May 9 [see 16198 D]. Mr. Noor Mohammad Khan, the Minister of Excise and Taxation in the West Pakistan Government (see above), was elected general secretary in place of Syed Abid Hussain, who had resigned because of internal disagreements.

Moslem League. Khan Abdul Qaiyum Khan, the former Chief Minister of the North-West Frontier Province, was elected President of the Moslem League on March 30 in place of Sardar Abdur Rab Nishtar, who had died on Feb. 14.

The Moslem League Working Committee decided on May 5 to expel for seven years Mr. Khuhro—who, as stated above, had left the League. The Sind Provincial Moslem League (a branch of the Pakistan Moslem League), of which Mr. Khuhro is president, had previously decided on April 27 to leave the parent body and become an independent organization.

Nizam-i-Islam. A new political party was formed in Lahore on Nov. 24, 1957, under the name of *Tehrike Istahaq-i-Pakistan*, sponsored by Chaudhri Mohammad Ali, the former Prime Minister of Pakistan. The party's aims were described as a welfare State based on the fundamentals of Islamic democracy—social justice, equality of opportunity, aid for the under-privileged, and " a fair deal for the common man."

On May 1, however, the *Tehrike Istahaq-i-Pakistan* merged with the *Nizam-i-Islam* party of East Pakistan into a new group known as the *Pakistan Nizam-i-Islam* party. Chaudhri Mohammad Ali, who was elected leader of the new party, said at a meeting in Lahore on May 1 that war with India was " inevitable," adding that " an open clash with India may occur in one, two, or at the most three years, but occur it must." He expressed the view that such a war would start over the Kashmir and Canal Waters disputes.

The Gurmani Defamation Case.

The Chief Editor of the *Times of Karachi*, Mr. Z. A. Suleri, and the paper's Resident Editor, Mr. Omar Qureshi, were sentenced by the West Pakistan High Court on May 17 to two years' imprisonment each, and fines of 6,000 rupees and 1,000 rupees respectively, for criminal libel of Mr. M. A. Gurmani, the former Governor of Punjab and subsequently of West Pakistan. The case arose out of the publication in the *Times of Karachi* on Sept. 3, 1957, of a photostat copy of a letter, alleged to have been written by Mr. Gurmani while he was Prime Minister of the former princely State of Bahawalpur to the late Sardar Patel, Deputy Prime Minister of India, offering the accession of Bahawalpur to India.

During the lengthy hearings Mr. Gurmani strongly denied having written the incriminating letter, and the former Emir of Bahawalpur testified that there had never been any question of his State's accession to India and that Mr. Gurmani had never urged such action on him. Sardar Amanullah (Information Officer to Mr. Firoz Khan Noon, who was Foreign Minister at the time of the letter's publication) testified that he had been directed by Mr. Noon to make a photographic reproduction of the letter and issue it to the Press. This testimony was supported by the deposition of Hakim Saif Ali, who claimed to possess the original of the letter.

The court found it established "beyond all doubt" (1) that the "original" produced by Hakim Said Ali was not the original of the photostat copy published in the *Times of Karachi*; (2) that the photostat copy itself proved that the alleged "original" had been forged for presentation in court; and (3) that Hakim Saif Ali should be tried for perjury and for producing forged documents. The Judge accepted Mr. Gurmani's testimony that the letter was not in his handwriting. He added, however, that although Mr. Gurmani had won the case, it was his duty to take proceedings against Mr. Firoz Khan Noon—either in a criminal court or a civil court – in order (*a*) to establish Mr. Noon's involvement in the matter; or (*b*) if Mr. Noon had taken no part in the publication of the letter, to give him an opportunity to prove publicly that his name had been brought into the case without justification.

On Mr. Firoz Khan Noon's petition, the Supreme Court of Pakistan granted him special leave on May 27 to appeal against the judgment of the West Pakistan High Court and for the expunging of certain references to him in the High Court's judgment. The court also directed that the relevant passages of the judgment should not be published.

The West Pakistan High Court granted bail to the two *Times of Karachi* editors on May 19, and suspended payment of the fines imposed on them pending the filing of an appeal. (Pakistan High Commissioner's Office, London - Times - Manchester Guardian) **(Prev. rep. 16013 A; 15936 A; East Pakistan, 15143 A; West Pakistan, 15688 B; Mr. Gurmani, 15775 A; Mr. Fazlul Huq, 14738 C.)**

A. SOVIET UNION. — Expansion of Chemical Industry. - Abolition of Chemical Industry Ministry.

Plans for a big expansion of the Soviet chemical industry were outlined in a report presented by M. Khrushchev on May 6-7 to the central committee of the Soviet Communist Party. The meeting was convened to consider measures to speed up the expansion of the chemical industry and, in particular, the production of synthetic materials.

M. Khrushchev stated that over 100,000,000 roubles had been allocated for chemical industry development during the next few years, with the aim of doubling the production of staple chemicals and motor-tyres by 1965, and increasing the output of synthetic rubber by over 150 per cent, as compared with 1958. It was also aimed to increase the facilities for producing artificial and synthetic fibre by 360 per cent, and those for producing plastics and synthetic resins by 700 per cent, by the same year. To this end 257 chemical works would be built or reconstructed, 14 chemical industry equipment plants would be put into service, and 42 other plants would be modernized. These establishments would be located in the Russian Soviet Republic, the Ukraine, Azerbaijan, and Uzbekistan.

Though claiming that the U.S.S.R. was the world's second biggest chemical producer after the United States, M. Khrushchev admitted that "we are only sixth in the production of artificial fibres and fifth in plastics, and in the production of synthetic rubber we are lagging behind the United States, although the Soviet Union has far outstripped all other capitalist countries put together." M. Khrushchev mentioned the advisability of placing orders in certain Western countries—notably the U.S.A., Britain, and Western Germany—for some of the plant needed for the Soviet chemical industry's expansion programme.

It was announced in Moscow on June 9 that the presidium of the Supreme Soviet had decided to abolish the Ministry for the Chemical Industry (at present headed by M. Sergei Tikhomirov) and to reorganize it into a State Commission. (Soviet Embassy Press Department, London)

B. WEST INDIES. — The Federal Capital Dispute.

The British Colonial Office announced on May 14 that H.M. Government had decided that they could not ask the U.S. Government to move their naval base at Chaguaramas (Trinidad) in order that the capital of the West Indies Federation might be established on the site. It was stated that the Government had taken this decision after considering the report of the joint commission, under the chairmanship of Sir Charles Arden-Clarke, which had been considering the question.

The commission's report was published in London on the same day. Its principal findings were: (1) the present base at Chaguaramas fulfilled the strategic and military requirements for a naval base in the eastern Caribbean; (2) the construction of an alternative base on the only other available sites (all on the west coast of Trinidad) would cost between £47,000,000 and £88,000,000 and might take from five to 10 years to complete; (3) there was no significant portion of the usable area at Chaguaramas that was not essential to the base's mission; (4) the release of any portion of the Chaguaramas base as a prelude to its total release was impracticable, nor was the partition of the base a practicable proposition.

The Colonial Office issued the following statement of the British Government's views on the report:

"Although the U.S. Government is legally entitled to retain the use of the base area until 2040, H.M. Government would have been prepared to consider inviting them voluntarily to surrender their rights as an act of generosity if the joint commission had reported that all or part of the base could be given up without adversely affecting defence, or that the necessary facilities could be replaced at any reasonable cost without loss of strategic efficiency. But the commission have found unanimously otherwise.

"In view of their report, and bearing in mind the overriding importance of the base to the defence of the Western hemisphere, which is also of vital concern to the West Indies, H.M. Government could not reasonably ask the U.S. Government either to relinquish part of the base or to meet the very considerable cost of moving the whole of it to a less satisfactory site. Nor could H.M. Government entertain the possibility of themselves contributing towards the cost of such an operation.

"H.M. Government realize that the commission's findings will cause disappointment, but they hope that the Governments of the West Indies and of Trinidad will recognize that they make H.M. Government's decision inevitable."

The West Indies Federal Government issued a statement on June 3 announcing (1) that it could not accept the views of the British and U.S. Governments; (2) that it would request a conference of all the parties concerned; and (3) that the Federal Government had meanwhile "decided to remain in its temporary headquarters provided by the Government of Trinidad and Tobago until the matter has been settled."

The statement said that it had been the understanding of the Federal Government that no final decision would be taken by the commission for the following reasons: (*a*) the views of the United States and the West Indies were "irreconcilable at that stage"; (*b*) each side (the U.S.A. on the one hand and the West Indies representatives on the other) was "trying to persuade the other to change its attitude"; (*c*) there were not enough facts before them to justify either side accepting the view of the other; (*d*) it had been understood that the results of the commission's survey would have been considered by the parties concerned before arriving at any decision.

The statement added: "The Federal Government is well aware of the U.S. contention that military necessity makes its imperative that the base should exist in the eastern Caribbean . . . It cannot, however, agree that at this time a final decision should be taken which accepts the perpetuation of a lease for 99 years, even though during that time present world tensions may disappear."

The Federal Prime Minister (Sir Grantley Adams) indicated on June 16 that the U.S. Government was willing to give an assurance that it would review the whole question of the Chaguaramas site after ten years, in the light of changes in methods of warfare which by then might make the retention of the base unnecessary. A similar statement was made in the British House of Commons on June 17 by the Colonial Secretary, Mr. Lennox-Boyd.—(Times - Daily Telegraph)

C. UNITED KINGDOM. — Territorial Army Jubilee.

The golden jubilee of the Territorial Army was celebrated on June 23 by a march-past of some 8,000 Territorials in Hyde Park, London, at which the salute was taken by the Queen. Her Majesty was accompanied by the Duke of Edinburgh and other members of the Royal family, the Chief of the Imperial General Staff (Field-Marshal Sir Gerald Templer), and the Secretary of State for War, Mr. Soames. Similar ceremonies took place in other parts of the country. The Territorial Army has produced over 100 winners of the Victoria Cross in the fifty years of its existence.—(Times - Daily Telegraph)

A. UNITED KINGDOM. — House of Lords Reform. - Life Peerages Bill passed by House of Commons. - Swinton Committee's Report on Leave of Absence for Peers. - Approval by House of Lords.

The Life Peerages Bill, which had already been passed by the House of Lords, was given a second reading in the House of Commons on Feb. 12-13. The Bill was opposed by the Labour Party, which tabled the following amendment: "That this House declines to give a second reading to a Bill which leaves the House of Lords overwhelmingly hereditary in character and with unimpaired powers to frustrate and obstruct the will of the elected representatives of the people."

Mr. R. A. Butler (Home Secretary), who introduced the Bill, said that the Government were convinced that in a highly complex society there must be a Second Chamber, and that the work of the Commons, however properly done, was better if it could be revised by another complementary chamber. It was not true that the House of Lords was a body of persons all of whom owed their seats to the accident of birth, or that it ever had been such a body. Before the dissolution of the monasteries the bishops and abbots normally outnumbered hereditary peers, and in the past 500 years there had been continual reinforcement of the House by the creation of new peerages. There were now some 170 peers of the first creation, many of whom were prominent in the work of the House. Peerages had been conferred on grounds of public service, and almost all interests in the life of the nation had spokesmen in the Lords. The "somewhat hysterical" terms of the amendment were not justified by the conduct of the Lords under the Labour Government, when they had passed no fewer than six nationalization Bills.

Mr. Butler stressed that many people were reluctant to accept hereditary peerages because they did not want their sons to be peers or because they wished to remain ordinary people. Moreover, the creation of hereditary peerages could not alone provide an adequate field of recruitment to the working of the House of Lords. The Government wanted to enlarge that field by making it possible to offer life peerages to people of distinction who could represent some aspect of the nation's life with authority, and who could take an adequate part in parliamentary life.

Life peers, Mr. Butler explained, would be appointed by the Crown on the recommendation of the Prime Minister. Some would be recommended primarily on political grounds, and before making such recommendations among members of an Opposition party it would be natural for the Prime Minister to consult the Opposition. The Government had taken the view that it was unnecessary to limit the number of life peers, and that the number to be recommended from time to time should be left to the good sense of the Prime Minister of the day.

Mr. Hugh Gaitskell, moving the Opposition amendment, said that the Conservative Party had never had to face any frustration or obstruction from the House of Lords. There was much to commend the two principles of life peerages as against hereditary peerages, and of non-discrimination between men and women for membership of the House of Lords, but the Government's "sudden enthusiasm" for non-discrimination did not extend to hereditary peerages.

It was not easy to take seriously the Government's argument that the Bill would assist the Labour Party. If this was put forward as a serious proposition, it was odd that the Labour Party had not even been consulted on whether they wanted it. If there were difficulties in manning the Opposition benches in the Lords, it was because the Opposition found difficulty in having enough people who could give up their jobs and devote their whole time to the work of the Upper House on the basis of the allowances recently introduced. The major problem was in fact the problem of pay in the House of Lords, about which the Bill proposed to do nothing.

"We have had a good deal of trouble over a long period of time over the House of Lords," Mr. Gaitskell went on. "We know there are proposals for reform being bandied about on the Conservative side, and we know the main motive behind them. It is to preserve the authority and enhance the prestige of the House of Lords . . . The British Constitution is an organic and dynamic thing, and when we have made this change in the composition of the House . . . the Government must consider the effect of the change and whether and when the time has come for further change. Coming from that quarter, it is very difficult for us to draw any other conclusion than that the kind of further change in contemplation is by no means in the direction of reducing the powers of the House of Lords. It is far more likely to be in the direction of increasing their prestige and authority."

In the Opposition's opinion, the present powers of the House of Lords were excessive, and if the Lords' powers and prestige were enhanced they might seek to use their existing powers far more extensively and frequently. It was still possible for them to delay a short Bill by something like nine months and a longer Bill by something like five months. A Labour Government might wish to pass immediately a short Bill of great importance for which it had a mandate, and find itself faced with obstruction of this kind; if this happened towards the end of a period of office, it would prevent the Government from carrying through the Bill at all. He saw no reason why, if the Lords revised any measure, it should not be immediately considered by the Commons. If the revision took the form of a rejection, the Commons should be entitled to pass the Bill on a fourth reading, after which it would become law.

The "hollowness" of the case for the present Bill became even more apparent owing to the Government's refusal to make one small change on which there could have been agreement—to make it possible for the sons of peers to renounce their right to sit in the Lords and retain their right to sit in the Commons. Rejecting such amendments during the Lords' debate, the Lord Chancellor had said that this was a matter for the Commons, and he [Mr. Gaitskell] would like to know if the Government were prepared to put forward an amendment covering this point.

Dealing with the question of what reform the Opposition would like to see, Mr. Gaitskell said that first of all there was the question of whether there should be a Second Chamber at all. In 1909 Sir Winston Churchill had said: "As democracy becomes more numerous, more educated, more authoritative, more complex, and more powerful, it is necessary that the House of Lords should recede and retire . . . should pass peacefully and painlessly away." Assuming, however, that there was to be a Second Chamber, the first condition of any adequate reform was to get rid of the situation in which there was a permanent Tory majority which could obstruct the will of the House of Commons. There were three broad principles on which the House of Lords could be reformed: (1) it should not be separately elected parallel with the Commons; (2) it should not be hereditary in character; (3) it should not have the power to overrule or obstruct the Commons. The Bill, however, while giving the House of Lords "a slightly more respectable appearance," left unchanged both the overwhelming Conservative majority and the present power of the Upper House.

Mr. Clement Davies (Liberal) said that while the Bill pretended to reform the Second Chamber, it merely proposed to add an unknown number of men and women to the 875 hereditary peers already existing there. Its real purpose, he asserted, was to bolster up some kind of case for maintaining the hereditary principle as a qualification for membership, although it was a complete anachronism and existed in no other Parliament in the world. The House of Lords needed a true reform and not a "mere sham."

Mr. Enoch Powell (C.), in his first speech since his resignation from the Government [see 15939 A], opposed the Bill as "a serious interference with a prescriptive institution," representing a substantial and basic alteration in the character of the House of Lords. It was a great mistake to assume that the Lords was a kind of replica of the Commons, for it was not at its most useful or effective when dividing or debating on party lines. Mr. Powell said that the Bill was not desired by the Opposition parties or by many Government supporters, nor, he suspected, was it greatly welcomed by many members of the Government.

Viscount Hinchingbrooke (Ind. C.) criticized the Bill as having been conceived entirely on *a priori* grounds, without any careful examination of the sort of people who would be willing to sit in the Lords. There was no guarantee that when somebody was selected for a life peerage he would sit on the Opposition benches day in and day out and do his duty. The time would come when the horizontal division between parties on class grounds would give way to a vertical division on grounds of political belief, and when the House of Lords would divide naturally on grounds of ideology. He thought the Bill was "futile, inconvenient, and inadequate," and might have to be repealed in 10 years' time.

Mr. Wedgwood Benn (Lab.) said that he did not believe that peers should be allowed to sit in the Commons, even if they renounced the right to a writ of summons, but that arrangements should be made whereby a peer could become a commoner for himself and his descendants and enjoy the rights of a commoner. [Mr. Benn, who is the heir of Lord Stansgate, had made repeated but unsuccessful attempts in former years to introduce legislation to this effect]. Commenting on the powers of patronage which the Bill gave the Government, he pointed out that whereas about one in 20 of the Labour members who entered the Commons in 1945 had received honours, about one in three of the Conservative members who entered it in 1951 had since been given an honour.

Sir Reginald Manningham-Buller (Attorney-General) maintained that the Bill would not of itself tend to increase either the power or the authority of the House of Lords, although it would enhance respect and confidence in that House. After rejecting the proposal that it should be amended to allow the sons of peers to renounce their titles, he said that whether the House of Lords remained hereditary depended on the use that was made of the Bill. He was not suggesting that it would lead to the House being swamped with life peers, but every creation of a life peerage would reduce its hereditary character.

Sir Frank Soskice (Lab.) said that "no amount of wooing" would reconcile the Opposition to the maintenance of the hereditary principle, far less to its enhancement. He doubted whether the Government intended to appoint more than about 20 life peers, in which case the objection that the Bill did nothing to alter the hereditary character of the House must stand unchallenged.

It was common ground that it would be impossible to recruit people to the Lords unless they were guaranteed some adequate salary for full-time membership. If these were to be life salaries or salaries for a term of years, had the Government considered that a vast new field of patronage was being created? The Government were placing on the Prime Minister the disagreeable and invidious necessity of recommending "the dispensation of largesse on an immense scale."

After asserting that the House of Lords was "overwhelmingly, traditionally, and passionately hostile" to the Labour Party's point of view, Sir Frank continued: "A Labour Government which may have a vast majority of public opinion behind it knows that it will

govern in the face of constant and bitter hostility, suppressed for the most part, but exercising unremitting pressure on Ministers and from time to time finding active and indeed virulent expression. A Labour Government in office must, to a substantial extent, govern by sufferance of the House of Lords. The only sanction against interference is the fear of their lordships of what public resentment would do, if interference goes beyond a certain point." The Government were asking them to exchange for a comparatively quiescent Conservative majority in that House, "which was bad enough," an active Conservative majority which would be there when the Labour Party came into office. It was "preposterous" to expect the Opposition to view this proposal without contempt.

Mr. Geoffrey Lloyd (Minister of Education) said that the Government was prepared to enter into informal talks with the Opposition on this subject, provided that they did not call into question the existence of the House of Lords. He went on to point out that two classes of expanding importance had emerged in recent years. Firstly, the professional, scientific, and managerial class, which had been expanding at a tremendous rate and was likely to continue to do so in future. Whereas some of them were in the House of Lords already, there was no doubt that life peerages would make it easier for a wider representation of this class. The second class of expanding importance comprised the highly paid workers in modern industry, people with middle-class incomes and working-class traditions, many of whom would be able to make a real contribution in the Lords as life peers. The Opposition's attitude, that an improved House of Lords might become a rival of the Commons, was "unrealistic," as it was against the public interest to keep one of the Houses of Parliament in a less efficient condition than it could reasonably reach. The problems in dealing with payment of peers were so great that they would be better dealt with when there was agreement over the whole issue.

Vice-Admiral Hughes-Hallett (C.) said that he was opposed to the hereditary principle as applied to the House of Lords. The House of Commons would not do the Upper House a good service by trying to tie it permanently to what was a lost cause. If life peers were chosen wisely for independence of outlook, integrity, experience, and their record of achievement, their advice would not lightly be set aside.

Viscount Lambton (C.) said that the Government could either have left the House of Lords as it was, hoping it would continue to function half-heartedly, or have reformed it radically, cut down its numbers, and tried to make it an effective Second Chamber. Instead they had produced "a sad compromise" and made "the worst of both worlds." They had tampered with the Constitution and divided the Conservative Party to produce a Bill that did no good to anyone, that the Government benches did not like, and that the Opposition did not intend to use.

Mr. Aneurin Bevan (Lab.) said that the functions and powers of the House of Lords had suffered attrition, but its membership had remained virtually unchanged. It still had powers which could be used "in a most dangerous way," and he had seen it in moods in which he would not trust it not to use those powers. It might be necessary in an emergency for legislation to go through quickly in the national interest, and it did not always follow that their lordships' views and the national interest coincided. The present Bill left those powers untouched, and was therefore offensive to the Opposition. He had been a Minister for 6½ years, and had probably had more dealings with the Lords on contentious legislation than any man in the Commons. Any Labour Minister framing legislation always had to take the Lords into account, and to consider what concessions he would have to make to get the Bill through. He had known Civil Servants suggest, in framing legislation, that something should be put in so that it could be taken out in the Lords.

Mr. Bevan continued: "The proposal to make life peers is unimportant. It is a façade. The important thing is that it is now intended, because of the acceptance of this relationship between the two Houses, that there must be remuneration for the peers. Pelf for the peers! It is being said that it is fair and honourable that we should now confer an honorarium on the peers . . . They are now paid three guineas a day expenses. It will go up. The Leader of the House of Lords asked the members there not to press him at this delicate moment for an increase in pay. It is a big step to pay 867 peers. An ingenious method is being devised by which some of them should be given leave of absence by the Crown. That will leave perhaps 200 to 300—we do not know how many—who will attend. Some life peers will be made—we do not know how many—and they will go there and an honorarium will be allowed to all of them." It was now proposed that the House of Commons should confer upon their lordships not only influence, but pensions for life. It was true that not very much interest was taken in this outside; but Milton had warned about it when he said, "Consider liberty, and do not bind her when she sleeps."

Mr. Maclay (Secretary of State for Scotland), replying to the debate, said that if there was a general feeling that some radical alteration in the composition of the Lords was called for, such reform should be undertaken only with a large measure of agreement between the main political parties. The absence of such agreement was no reason for failing to attempt to meet some of the obvious problems with which the Lords were faced. He asked whether they were now dealing with a Labour Party which was completely split on the issue of a Second Chamber, or a Labour Party which believed that a Second Chamber was desirable? If Mr. Bevan was advocating single-chamber government, he was running British democracy into the most appalling dangers.

The Bill was given a second reading after the Opposition amendment had been defeated by 305 votes to 251, the Liberals voting with the Opposition. Two Conservative members (Mr. Powell and Mr. Howard Johnson) abstained from voting. Of the Independent Conservative group, Viscount Hinchingbrooke, Mr. Fell, Mr. Biggs-Davison, Mr. Paul Williams, and Mr. Maude also abstained, while Mr. Laurence Turner voted with the Government.

The Bill was given a third reading in the House of Commons on April 2 by 292 votes to 241.

On the third reading, **Mr. Butler** said that the Government rejected the view that the House of Lords should be abolished, since such a step would not be in the interests of the Constitution, the preservation of British liberties, or the efficiency of the laws produced by the Commons. He did not claim that the present House of Lords was an ideal Second Chamber, but in its influence, its work, and the manner it exercised its power, it added to the dignity and efficiency of public life. The Government did not think there should be any limitation on the number of life peers, or that their selection should be confined to one party. The Bill would enable life peerages to be offered to people of distinction widely representative of the nation's life, and thus enrich the quality of debates in the House of Lords. There was no intention to enlarge the powers of that House, but only to make its revising powers more efficient and more effective.

Sir Frank Soskice reaffirmed the Opposition's objection that the Bill left the hereditary principle in the House of Lords unchanged, and the powers of that House intact.

The Bill received the Royal Assent on April 30.

The Swinton Committee's Report.

The House of Lords debated on Dec. 10, 1957, the report (published in January 1956) of a Select Committee headed by the Earl of Swinton, which had considered the powers of the House in relation to the attendance of members.

The report stated that the House had no power to exclude a member from its sittings; that every peer had the right to receive a writ of summons; that the right to be summoned entailed a duty to attend unless excused by the House; and that a peer who was unable or unwilling to attend was under an obligation to apply for leave of absence. The Committee therefore recommended that a writ of summons should be sent to every peer at the beginning of a Parliament; that those desiring to be relieved of the obligation to attend should apply for leave of absence; that every member who failed to reply should be regarded as having applied for leave of absence, unless he attended and took the oath within a month of the beginning of Parliament; and that members granted leave of absence should not attend unless their leave had been terminated by giving such notice as might be prescribed.

Introducing the report, the **Earl of Swinton** said that some peers were unfamiliar with the mandatory terms of the writ, and many more were unaware of the obligation to apply for leave of absence. Until early in the 19th century writs had been delivered personally to peers, but they now remained in the Crown Office of the Palace of Westminster for peers to collect. The House had the power to compel attendance and grant leave of absence, and could use these powers to meet the present situation in which numbers of peers did not or could not attend. There were peers who could not attend regularly but were most valuable when they could do so. No-one would wish to stop them attending when they could, and the House should be able to make provision for their attendance. The Committee had considered whether Standing Orders should contain a sanction, but had rejected the idea as unnecessary and repugnant to the spirit of the House.

At the end of the debate the House instructed the Select Committee to draw up new Standing Orders implementing its proposals. The provisions of these draft Orders were published on April 11, 1958, as follows:

(1) A committee should be appointed to supervise arrangements for leave of absence.

(2) Peers should either attend the sittings of the House or obtain leave of absence, but a peer who was unable to attend regularly need not apply for leave if he proposed to attend "as often as he reasonably can."

(3) Applications for leave of absence might be made at any time during a Parliament, either for the whole session, the remainder of the current session, or the remainder of the Parliament.

(4) On the issue of writs for a new Parliament, the Lord Chancellor would write to each peer to whom he issued a writ requesting him to say whether he wished to apply for leave. He would do the same at the beginning of each session in respect of every peer who had been granted leave ending with the preceding session, or who had not attended during the session.

(5) Peers should reply to this communication after 28 days' notice. Those who failed to do so within seven days from the expiry of this period would be considered to have applied for leave of absence during the remainder of the Parliament.

(6) A peer granted leave of absence should not attend sittings until the period had expired, but he might give notice in writing to terminate it earlier, in which case the leave would expire three months later, or sooner if the House so directed.

The Committee stated that the definition of "regular attendance" must be a matter for individual interpretation, and that in framing the Order they had "taken account of the position of peers engaged whole-time in the professions and in industry, and of others who have extensive commitments in local government or in other voluntary work." They felt that the House would be reluctant to lose the services of such peers, who had in the past made valuable contributions, based on their own knowledge and experience, to the work of the House, and that peers in this position "need not feel under any obligation, in consequence of inability to attend regularly, to apply for leave of absence."

The report was formally approved by the House of Lords on April 24, the voting being 52 in favour and 20 against.

The **Earl of Home,** moving its acceptance, said that there had been much criticism because a substantial number of peers never or hardly ever attended the House. The possibility that on some particular issue which aroused the dormant political enthusiasm in these peers they might descend upon the House and undo its will, arrived at by reasoned debate, was more theoretical than real, but it was a possibility. It was not intended to discourage any peer from attending if he felt he had any contribution to make to the proceedings. Several members, although unable to attend regularly, spoke with great authority on their subjects when they were able to attend. He could not say whether the suggestion that a peer granted leave of absence should give three months' notice if he wished to return would work or not, as if a sufficient number broke this rule the whole thing would break down. He thought, however, that there was a good chance that a convention would grow up that the rule should be observed, and that they would eventually have a reasonable and workable House.

Lord Silkin thought that if 200 or 300 peers applied for leave of absence it would reflect more discredit on the House than merely leaving things alone. In recent years there had been a number of peers created for past services who had never set foot in the House or even taken the oath. By accepting the principle of leave of absence, the House would be condoning that situation. Leave of absence would make a mockery of the House and be utterly incompatible with the maintenance of the hereditary system.

Lord Teynham pointed out that about 259 peers had not taken the oath, 114 had taken it once only, 188 had attended fewer than 10 times, of whom 142 were first creations, and 253 had attended more than 10 times. Even if 300 peers applied for leave of absence, it would not be more derogatory to the House than those figures.

Viscount Simonds (a Lord of Appeal and a former Lord Chancellor) maintained that the proposed Standing Orders were wholly contrary to the law and custom of the Constitution. The absolute right of a peer to receive a writ of summons had been decided centuries ago by the House in a battle with a Sovereign who sought to withdraw the writ. A peer was not only entitled to receive the writ, but was bound to obey it as the Sovereign's command. For 600 years there had been no suggestion that a peer who had been granted leave of absence should not return to the House before it expired if he found he was able to resume his duties. There was no justification for depriving a member of his right to sit, speak, and vote.

Lord Elton expressed concern at the lack of consideration shown in the report for the position of the peer who would be able to enlighten the House on a subject on which he was an acknowledged authority. Such a man could not be expected to "clock in" regularly for debates in which he had no concern. **Lord Saltoun** pointed out that many peers who never came into the Chamber gave good service, such as the Lords Lieutenant, who sometimes gave advice on matters affecting their counties.

The **Marquess of Salisbury** said that the proposals were not to be regarded as a reform of the House, but as an attempt to remedy an abuse which did not redound greatly to its credit. If the proposals did not add to the prestige of the House, they did add a measure of respectability. What worried him was the constitutional aspect of the proviso allowing a peer to end his leave of absence at three months' notice. Peers who did not normally attend at all would attend only on a matter of strong conscience, and he believed it would be entirely wrong to exclude them.

Earl Attlee said that no reform of the House would be of any use unless it dealt with its excessive membership. He thought the proposals were "a kind of camouflage" put up to pretend that the House had not as many members as it had. People outside would say that if peers did not want to attend, the right should be taken away from them. Any change of this kind should be made by Act of Parliament and not by Standing Orders.

It was said that the "backwoodsmen" had never descended on the House, but they had done so in 1910 (i.e. during the crisis over the Parliament Bill) and they might do so again—not simply about a particular legislative proposal, but on a general objection to a Government of whose colour they disapproved. They remained "a potential menace" and these proposals would not dispel it, because leave of absence could be revoked. The three months' notice to end leave of absence assumed far greater regularity in national affairs than was his experience. Things blew up suddenly, as the abdication crisis had done. "There might be a number of peers who do not attend regularly but who might have been rather stirred if that crisis had gone a particular way," Lord Attlee observed. "Suppose they found themselves debarred by three months. I think they would feel they had bartered away their rights." He concluded by urging the House to reject the report.

In reply to the debate, **Viscount Kilmuir** emphasized that the proposals would not deprive a peer of his right to vote, but would merely lay down the manner in which he should exercise it. Nothing would be done without the consent of the peer concerned, and in the vast majority of cases the action taken would be on his own initiative. The fallacy inherent in Lord Silkin's and Earl Attlee's arguments was that it would be possible to have a Second Chamber that would work without drawing on those members who were willing and able to attend it. The Labour Party opposed the principles of both election and selection in the composition of the Second Chamber, on the grounds that an elected House would compete with the Commons and that a selected House would increase the status and influence of the Lords at the expense of the Commons. It was therefore common sense to draw upon the reservoir of the members in order to obtain a compact and workable House.

The House of Lords adopted the new Standing Orders on June 16 without a division, after a debate marked by sharp differences of opinion on various aspects of the scheme to grant peers leave of absence.

Viscount Stansgate moved three amendments: (1) that the new rules should apply equally to the Bishops as well as to the Lords temporal; (2) that peers applying for leave of absence should be asked to state their reasons; (3) that the terms of the Lord Chancellor's letter to peers, requesting every peer to whom he issued a writ to answer whether or not he wished to apply for leave of absence, should be reported to the House. The first and second amendments were rejected, while the third was accepted by the Lord Chancellor.

Lord Home pointed out, with regard to (1), that the word "lords" included both the Lords spiritual and the Lords temporal, and that the same procedure applied to both. As regards (2), he agreed that this had been done in times past, but pointed out that the Merthyr Committee were of opinion that this procedure was no longer necessary at the present day.

Viscount Simonds strongly criticized the provision that a peer who had been granted leave of absence should not be allowed to attend the House until the period of leave had expired. In moving the deletion of the relevant paragraph, he declared that a peer who had applied for leave of absence, and then found himself able to attend during this period, should not be prevented from doing so. The amendment was rejected by 52 votes to 36.

Viscount Samuel asked what the position would be if some crisis suddenly burst upon the country. There might be 100 peers who had signed a declaration of non-attendance; would the Standing Committee which was to be appointed be empowered to act in such a case? "Are we to leave it to this supervisory committee, consisting of the Whips of the three parties, to decide on releasing or not releasing 100 votes on an imminent party division?"

Lord Home commented: "There are 300 or more peers whom no crisis, external or internal, has ever induced to come near the place." In an emergency, he pointed out, there would inevitably be consultations between the leaders of the three parties in the House; and the House would, he suggested, suspend the Standing Orders in such an eventuality.

The House of Lords also accepted a Government motion to appoint a select committee of the Chief Whips of the three parties for the general supervision of arrangements relating to leave of absence. It was agreed that this committee should report to the House from time to time.—(Times - Daily Telegraph - Manchester Guardian)

A. CAMBODIA. — General Elections.

King Norodom Suramarit dissolved the Cambodian National Assembly on Jan. 8 on the recommendation of the Cabinet, which had accused the Assembly of attempting to undermine its authority and encroach on its executive powers. In accordance with the Constitution, the Prime Minister (M. Sim Var) resigned in favour of the Speaker of the Assembly, M. Ek Yi Oun, who was called on to head a caretaker Government pending elections; as M. Sim Var's Ministers refused to serve under him, however, M. Penn Outh assumed the Premiership on Jan. 17.

In the elections, held on March 23, all 61 seats in the Assembly were won by the Popular Socialist Community, led by Prince Norodom Sihanouk. The only Opposition candidates were five put forward by the Communist Party, four of whom withdrew at the last minute; the remaining Communist polled 396 votes against 13,542 for the Popular Socialist candidate.

A new Cabinet headed by M. Sim Var was given a vote of confidence on April 24 by 36 votes to two, with 15 abstentions. M. Sim Var resigned on June 22, however, after the National Assembly had adopted a censure motion against his economic policy, by 30 votes to 8 with 5 abstentions.—(Le Monde, Paris)

(Prev. rep. 15706 A.)

Corrigendum. Prince Norodom Sihanouk resigned the Premiership on June 12, 1957, not in July as stated on page 15707. (Ed. K.C.A.)

A. JAPAN. — Government Victory in General Elections. - New Cabinet formed by Mr. Kishi.

General elections were held in Japan on May 22 following the dissolution of the House of Representatives on April 25. The principal contestants were the Liberal Democrats, led by Mr. Kishi (the Prime Minister), and the Socialists, led by Mr. Suzuki Mosaburo. Their programmes are summarized below, based on a compilation published by the Tokio newspaper *Asahi Shimbun*.

Liberal Democratic Programme. The Liberal Democrats advocated (1) general disarmament and the prohibition of atomic and hydrogen weapons, as well as the ending of nuclear tests by the Great Powers; (2) an independent, peaceful foreign policy based on support for the United Nations, close co-operation with the U.S.A. and the other Western democracies, and the maintenance of Japan's position as an Asian country; (3) the building-up of the Defence Force to the minimum level required, but without nuclear weapons; (4) consideration of the future withdrawal of U.S. security forces, and efforts to ensure Japan's national security through a collective security system; (5) the retrocession by the Soviet Union of the islands of Kunashiri and Etorofu [see 15195 A], and the restoration of Japanese sovereignty over Okinawa and the Bonin Islands, which are at present under U.S. administration; (6) a decision by the States concerned on the question of Japan's title to the Northern Kuriles and South Sakhalin; (7) increased trade with Communist China, without, however, recognition of the Communist regime under present circumstances; (8) co-operation in the economic development of South-East Asia, with increased technical and financial assistance and the creation of a development fund and training centres; (9) an increase of Japanese exports to $5,000,000,000 annually by 1962, based on improved technology and productivity, stable export prices, and the development of overseas markets; and (10) a review of the present Constitution on the basis of the freely expressed will of the people.

The Socialist Programme. The Socialists advocated (1) the immediate and unconditional prohibition of nuclear tests by the U.S.A., Britain, and the Soviet Union; (2) efforts to set up a collective security system including Japan, the U.S.A., Communist China, and the U.S.S.R., together with the simultaneous abrogation of the Japanese-U.S. security treaty and the Sino-Soviet treaty of alliance; (3) establishment in Asia of a zone free from nuclear armaments; (4) a reduction in the strength of the Japanese Self-Defence Force, and its conversion into a national land development corps and a police organization for internal security; (5) a "rational" settlement of territorial questions with the Soviet Union through closer friendly relations by means of increased economic, cultural, and personal exchanges; (6) the return of Okinawa and the Bonin Islands to Japanese sovereignty; (7) a peace treaty with Communist China, support for its representation in the United Nations, and the treatment of the question of the Nationalist Government in Formosa as a Chinese domestic question; (8) friendly relations with other Asian and African countries on the basis of the "Five Principles," and co-operation with them in economic development, technology, and cultural exchanges; (9) removal of Japan's present trade dependence on the U.S.A., and the abolition of controls on trade with the Communist-bloc countries; (10) maintenance of the present Japanese Constitution.

The elections resulted in the return to power of the ruling Liberal Democrats, who retained their substantial overall majority in the House, though with a slightly reduced representation. The final distribution of the 467 seats was as follows, comparison being shown with party strengths at the dissolution of the former House of Representatives:

	Seats	
	New House	Old House*
Liberal Democrats ..	287	290
Socialists	166	158
Communists	1	2
Independents	12	4
Minor parties	1	4

*There were nine vacancies at the dissolution.

Voting figures for the principal parties were as follows, showing comparison with the previous (1955) elections:

	Total Votes	Increase or decrease	Percentage of votes
Liberal Democrats	22,976,330	—3,800,000	57.8
Socialists	13,093,984	+2,200,000	32.9
Communists ..	1,012,036	+ 370,000	2.6

The electorate numbered about 52,000,000, of whom 76.9 per cent went to the polls. Nearly 3,000,000 were new voters who exercised the franchise for the first time.

Although women voters outnumbered men by 1,800,000, only 11 women were elected to the new House (three for the Liberal Democrats and eight for the Socialists), compared with 39 elected in 1946.

All the principal Cabinet Ministers sitting in the Lower House were re-elected except Mr. Karasawa, the Minister of Justice. Mr. Yoshida and Mr. Hatoyama—both former Prime Ministers—narrowly escaped defeat.

Although the Liberal Democrats lost only three seats, the Socialists, holding over one-third of the total seats, will be able to prevent any amendment of the Japanese Constitution as had been sought by Mr. Kishi - to permit an open policy of rearmament and change the present clause prohibiting the maintenance of an Army, Navy, or Air Force. The Socialists, though increasing their representation by eight, did not achieve the anticipated increase in representation for which they had hoped through the support of new voters. Of the 114 Communist candidates, all but one forfeited their deposits. The Independents, who gained some ground, mostly belonged to the *Sokay Gakkai* a Right-wing politico-ethical-religious society based on militant Buddhism.

Subsequent to the elections, 11 of the 12 Independents joined the Liberal Democrats and the remaining Independent joined the Socialists, thus making party strengths as follows:

Liberal Democrats ..	298
Socialists	167
Communists	1
Minor parties	1

Mr. Kishi was re-elected Prime Minister on June 12, receiving 290 votes in the House of Representatives against 162 for the Socialist candidate, Mr. Suzuki. He also obtained a large majority in the House of Councillors. Mr. Kishi announced his new Cabinet later the same day, as follows:

Mr. Nobusuke Kishi	Prime Minister.
*Mr. Aiichiro Fujiyama ..	Foreign Affairs.
Mr. Eisaku Sato	Finance.
Mr. Kiichi Aichi	Justice.
Mr. Hirokichi Nadao ..	Education.
Mr. Ryugo Hashimoto ..	Welfare.
Mr. Kunio Miura	Agriculture and Fisheries.
Mr. Tatsunosuke Takasaki ..	International Trade.
Mr. Manoru Nagano ..	Transport.
Mr. Yutaka Terao	Communications.
Mr. Tadao Kuraishi ..	Labour.
Mr. Saburo Endo	Construction.
Mr. Gizen Sato	Defence.
Mr. Takeo Miki	Economic Planning.
Mr. Tadashi Aoki	Local Autonomy.
Mr. Kikuichiro Yamaguchi ..	Hokkaido Development.
Mr. Hayato Ikeda	Minister without portfolio.
*Mr. Muneori Akaji	Chief Cabinet Secretary.

*Member of previous Kishi Cabinet.

Mr. Kishi greatly enhanced his personal position in the new Cabinet, which was virtually a new administration and in which nine of his closest supporters (including his younger brother, Mr. Eisaku Sato) held leading posts. Mr. Kono - a prominent party leader who had been Director of the Economic Planning Board in the previous Cabinet - was excluded from the new administration and appointed chairman of the executive board of the Liberal Democratic Party in succession to Mr. Eisaku Sato. (Japanese Embassy Press Office, London - Asahi Shimbun, Tokio - New York Times)

(Prev. rep. Elections, 14133 A; Cabinet, 15683 B.)

B. UNITED KINGDOM. — Committee on European Free Trade Area.

The formation was announced on June 24 of a committee of leading personalities in industry, the trade unions, banking, and transport to stimulate interest in British participation in the proposed European Free Trade Area. The committee, known as the "Britain in Europe Committee," is under the chairmanship of Sir David Kelly, a former Ambassador to Argentina, Turkey, and the Soviet Union.

The executive committee of the Britain in Europe Committee includes Mr. Lawrence Robson (an industrialist) as chairman; Mr. Ernest Jones (president of the National Union of Mineworkers) as vice-chairman; Lord Cornwallis, chairman of Albert E. Reed & Co.; Sir Harry Jephcott, chairman of Glaxo Laboratories Ltd.; Sir Andrew McCance, chairman of Colvilles Ltd.; Mr. Alex Abel Smith, chairman of Pressed Steel; Mr. Frank Cousins, general secretary of the Transport and General Workers' Union; Sir Tom Williamson, general secretary of the National Union of General and Municipal Workers; Mr. Tom Yates, general secretary of the National Union of Seamen, and chairman of the T.U.C.; Lord Douglas of Kirtleside, chairman of B.E.A.; Sir Ernest Murrant, chairman of Furness, Withy, the shipping group; and Lord Pakenham.

The committee's main function will be "to undertake or sponsor original research on European economic integration," especially with regard to the proposed Free Trade Area, and "to make known the results." It will also undertake "initiatives in the political sphere" which may be necessary to ensure ratification of a treaty embodying the Free Trade Area plan. In particular, it will inform industrial organizations and trade unions on European developments. (Times)

A. INDIA. — Political Developments in Indian States. - New Ministries in Assam and Mysore. - Supreme Court's Ruling on Kerala Education Bill.

Important political developments in the Indian States since the general elections of March 1957 are described below under cross-headings.

Andhra Pradesh. - Formation of Telengana Regional Committee.

The Regional Committee for Telengana of the Andhra Pradesh State Assembly (see 15037 A) was established by Presidential order on Feb. 1, 1958.

Assam. - New Ministry formed by Mr. Chaliha.

The Chief Minister of Assam, Mr. Medhi, resigned for health reasons on Dec. 20, 1957, and was subsequently appointed Governor of Madras (see 15994 C). A new Ministry headed by Mr. B. P. Chaliha took office on Dec. 28, portfolios being allocated as follows :

Mr. Chaliha—Chief Minister, Political Department, Tribal Areas, Community Projects, Local Government, Relief and Rehabilitation, Information, and Transport; Mr. D. Sarma—Finance, Roads and Buildings, and Gaols; Mr. R Brahma—Public Health; Mr. K. P. Tripathu—Planning and Development, Education, Town and Community Planning, Industries and Power, and Trade and Commerce; Mr. H. Das—Revenue, Forests, Excise, and Judicial and Legislative; Mr. M. N. Hazarika—Rural Development and Cottage Industries; Mr. M. H. Chaudhuri—Agriculture, Parliamentary Affairs, Flood Control and Irrigation.

Bombay. - Municipal Elections.

Municipal elections held in Bombay City during May 1957 resulted in a victory for the *Samyukta Maharashtra Samiti* (the alliance of left- and right-wing parties advocating a separate Marathi-speaking State with Bombay as its capital), which won 71 of the 131 seats on the city council. A Communist (Mr. S. S. Mirajkar, president of the All-India Trade Union Congress) was elected Mayor of Bombay for the first time on April 3, 1958, receiving 68 votes against 62 for the Congress candidate.

Kerala. - The Education and Agrarian Relations Bills.

Intense controversy was aroused in Kerala (the only Indian State with a Communist Government) by an Education Bill which was passed by the State Assembly on Sept. 2, 1957, without a division.

The Bill provided (1) that the Government might take over (*a*) any category of aided schools in any specified area, and (*b*) the management of any aided school for up to five years (on payment of compensation) if the managers had neglected to perform their duties; (2) that all teachers in aided schools should be appointed by the management from a State register of persons eligible as teachers, prepared by the Public Service Commission; (3) that teachers in aided schools should be paid directly by the State and should be eligible for retirement pensions; (4) that the Government might regulate the curricula in schools.

Supporters of the Bill maintained that its primary object was to protect teachers in private schools against exploitation by corrupt managers who demanded a proportion of the teachers' salaries in return for granting appointments, or who dismissed teachers before the holidays and re-engaged them immediately afterwards. The Bill encountered strong opposition, however, from the Roman Catholic Church, which alleged that it was aimed at establishing totalitarian State control of education, and also from the Anglo-Indian community. [Of more than 7,000 private schools in Kerala, over 2,100 are managed by Christians, including 1,250 managed by the Roman Catholics. Kerala has the largest Christian population (about 3,000,000) of any Indian State, about 1,000,000 being Roman Catholics].

Because of complaints that certain controversial clauses of the Bill violated guaranteed constitutional rights, President Prasad referred it on Dec. 27 to the Supreme Court for its advice (under Article 143 of the Indian Constitution) before giving his assent to the Bill. This was the first time that the President had taken such action.

Article 143 says : "If at any time it appears to the President that a question of law or fact has arisen, or is likely to arise, which is of such a nature and of such public importance that it is expedient to obtain the opinion of the Supreme Court upon it, he may refer the question to that Court for consideration and the Court may, after such hearing as it thinks fit, report to the President its opinion thereon."

The Supreme Court ruled on May 22, 1958, that certain clauses of the Bill violated Article 30 (i) of the Constitution, which guaranteed to all religious or linguistic minorities "the right to establish and administer educational institutions of their choice." The infringement was seen in the fact that the Bill subjected minority education institutions to the power of the Government to take over their management, or to acquire them, or to direct them not to charge fees for primary classes. The validity of the other clauses of the Bill was upheld by the Supreme Court.

Other measures introduced by the Communist Government of Kerala during its first year of office included the Agrarian Relations Bill (still under consideration by the State Assembly) and the Kerala Forests (Assumption of Management) Bill, which was passed in July 1957. Their provisions were as follows :

Agrarian Relations Bill. (1) On an appointed day every permanent tenant would be deemed to have purchased from his landlord the land held by him. A "permanent tenant" was defined as one who on April 11, 1957 (on which date the State Government promulgated an Ordinance staying all eviction proceedings) had continuously cultivated his holding for five years in the Malabar area or for 10 years in other parts of Kerala.

(2) The Bill fixed a "ceiling" for land holdings at 15 acres of double crop land, plus one acre for each member of the owner's family in excess of five, subject to a maximum of 25 acres. All land in excess of this ceiling would have to be surrendered to the Government for redistribution, in return for compensation, or sold directly to the tenant for a fair price. Compensation would range from 16 times the "maximum fair rent" for the first five acres to five times for over 100 acres.

(3) Maximum and minimum fair rents, estimated as a fraction of the total crop, were laid down. Land tribunals would be appointed to fix the rents payable for individual holdings.

(4) Eviction of tenants would be permitted only in exceptional circumstances, e.g. for personal cultivation of the land by the owner, or for the extension of places of worship.

(5) Religious trusts and plantation companies were exempted from the provisions of the Bill.

Forests Bill The Kerala Forests (Assumption of Management) Bill authorized the State Government to take over the management of private forest lands for a period of five years, as a safeguard against excessive and indiscriminate felling of trees. The income derived from the forests would be paid to the owners, to whom the forests would be returned at the end of the period of management, or earlier if the Government considered it advisable.

Mr. Nambudiripad, on assuming office as Chief Minister, had announced in his first press statement (April 6, 1957) that—in accordance with one of the principal items in its election programme—his Government would take the first available opportunity to initiate discussions with the Government of India on the nationalization of foreign-owned plantations in Kerala. The Law Minister (Mr. Iyer) admitted on Sept. 10, 1957, however, that the proposal had been abandoned, "at least for the time being." It was stated in the Indian Press that the reasons for this change in the State Government's attitude were (i) the Central Government's refusal to agree to such a measure, which would be detrimental to the national economy ; (ii) lack of funds to carry out such a scheme ; and (iii) the fact that the State Government now realized the complexity of running rubber and tea plantations, which made them unsuitable for management by the public sector, at least for many years to come.

Allegations that law and order had greatly deteriorated in Kerala since the Communist Government took power were put forward repeatedly by the Congress and Praja Socialist parties, and also by the United Planters' Association of Southern India.

The president of the U.P.A. alleged on Aug. 27, 1957, that the police had been forbidden to intervene to prevent violence by strikers, and that the managements and staffs of tea and rubber plantations were being terrorized. Congress members of the State Assembly similarly alleged that the Government was rendering the police ineffective by depriving it of its powers. These allegations were denied by the Kerala Government, which stated on Sept. 9, 1957, that whilst it would not allow the police to be used as strike-breakers, managements would be given full protection during strikes. Charges of mob violence on estates were nevertheless renewed by the United Planters' Association in October, and several estates were said to have closed down permanently in January 1958 because of labour unrest. Subsequently, however, the situation was reported to have improved, and it was stated that agitation was now mainly sponsored by non-Communist unions, especially those controlled by the Revolutionary Socialist Party.

The Kerala Government, on the other hand, alleged that the "Christophers"—a uniformed Roman Catholic organization which took a prominent part in demonstrations against the Education Bill—had been causing disorders. Mr. Iyer stated on Dec. 21, 1957, that the Government was carefully watching the activities of the "Christophers," whose members, he alleged, were receiving military training.

At a by-election at Devicolam on May 19, 1958, the Congress candidate, who was supported by the Praja Socialists, the Moslem League, and the Roman Catholics, was defeated by a Communist,

Mrs. Rosamma Punnose, who secured a 7,000 majority. [Mrs. Punnose had been the sitting member in the State Assembly, but her previous election was declared invalid by the Supreme Court on technical grounds.] As Devicolam had been considered a Congress stronghold before the last general elections, the result was regarded as greatly strengthening the State Government's position.

Madras. - Anti-Brahmin Agitation.

A violent anti-Brahmin agitation was launched in Madras State during October 1957 by the *Dravida Kazhagam*, an extremist low-caste organization led by Mr. Ramaswami Naicker, who in a series of public speeches incited his followers to assault and kill Brahmins, set fire to *agraharams* (streets populated by Brahmins), burn the national flag, and destroy busts of Mahatma Gandhi. A party convention decided on Nov. 3 to burn copies of the Indian Constitution in public, beginning on Nov. 26, if the Government did not give a favourable reply to its demand for the abolition of the caste system. As a reply to this agitation, the State Assembly passed on Nov. 11, 1957, the Prevention of Insults to National Honour Bill, which made any attempt to destroy or insult the Constitution, the Indian flag, or any bust or portrait of Mahatma Gandhi an offence punishable by three years' imprisonment, a fine, or both. Over 2,000 members of the *Dravida Kazhagam* were arrested under this Act between Nov. 26 and Dec. 1 for burning copies of the Constitution.

[Note.—The *Dravida Kazhagam* should not be confused with the *Dravida Munnetra Kazhagam* (see page 15536), which is a distinct organization. Both parties, however, advocate the separation of Southern from Northern India, and the formation of an independent "Republic of Dravidastan."]

Mysore. - New Ministry formed by Mr. Jatti.

The Chief Minister of Mysore, Mr. Nijalingappa, resigned on May 8, 1958, after many members of the State Legislature Congress Party had signed a declaration of no-confidence in his Government. Mr. B. D. Jatti, who succeeded him as the party leader, was sworn in as Chief Minister on May 16, his Cabinet being announced a week later as follows :

Mr. Jatti—Chief Minister, Home Affairs, Commerce and Industry, and Planning and Development; Mr. T. Mariappa—Finance; Mr. K. Manjappa—Revenue; Mr. T. Subramanya—Law, Labour, Local Government, Housing, and Rural Water Supply; Mr. A. R. Ganamuk—Education; Mr. H. M. Channabasappa—Public Works and Electricity; Mr. N. Rachiah—Social Welfare, Excise, Prohibition, and Scheduled Castes and Tribes; Dr. K. K. Hedge—Public Health; Mr. M. Mariappa—Co-operation, Marketing, and Rural Industries; Mr. K. F. Patil—Agriculture, Food, and Forests.

Orissa. - Cabinet Crisis.

During April 1958 four Congress members of the Orissa State Assembly joined the Opposition, thereby reducing the Government's supporters to 69 in a House of 135 members (excluding the Speaker and four vacant seats). The Chief Minister, Dr. Mahatab, accordingly resigned on May 9, and the leader of the *Ganatantra Parishad*, Mr. Singh Deo, claimed in a letter to the Governor that he was in a position to form a Ministry. Three by-elections during the first three weeks of May, however, were all won by Congress candidates, thus giving the Government a stable majority. Dr. Mahatab accordingly withdrew his resignation on May 24.

Punjab. - Dissensions inside Congress Party.

Serious internal dissensions developed inside the Punjab State Congress Party during the spring of 1958. Mr. Devilal was elected president of the State party on March 23 by 116 votes to 31, with the support of the Chief Minister, Sardar Pratap Singh Kairon ; as the national leadership had refused to endorse Mr. Devilal as a Congress candidate for either the Central or the State Legislature, his election was regarded as an insult to the leadership, and nearly half the members of the State party executive resigned in protest. Mr. Devilal himself announced his resignation on April 14.

Allegations of corruption, misuse of power, and administrative irregularities had meanwhile been brought against Sardar Kairon by a dissident group in the Legislature Congress Party. After investigating these allegations, the Congress Central Parliamentary Board announced on May 19 that none of the charges of corruption had been substantiated, and that some had been completely disproved ; it considered, however, that some of the charges of misuse of the Chief Minister's powers in the interests of his family or friends had been established, in the sense that Sardar Kairon had committed certain improprieties. The Board stated that Sardar Kairon had offered to resign, and recommended that he should seek a vote of confidence from the Legislature Congress Party. He received this in a secret ballot on June 5, when a resolution expressing confidence in his leadership was adopted by 102 votes against 54.

In a by-election (June 3) at Gurgaon to fill the *Lok Sabha* seat formerly held by the late Dr. Azad, an Independent (Mr. P. V. Shastri), standing with *Jan Sangh* support, defeated the Congress candidate by a majority of nearly 38,000 votes. Dr. Azad had been returned in 1957 with a 95,000 majority over a *Jan Sangh* candidate, the constituency having been regarded as a traditionally safe Congress seat.

Uttar Pradesh. - Socialist Civil Disobedience Campaign.

The Socialist Party launched a civil disobedience campaign in Uttar Pradesh on May 10, 1957 (the centenary of the outbreak of the Indian Mutiny), in support of its political and economic programme. The party leader, Dr. Lohia, had offered to postpone the campaign if English were replaced by Hindi for all official purposes, and if all statues of "British imperialists" were removed from public places ; Dr. Sampurnanand (the Chief Minister) rejected the former demand as impracticable, and stated that the statues would not be removed until a museum was ready for the purpose. During the campaign which went on for some weeks about 2,000 people were arrested, including all the principal leaders of the State Socialist Party.

In a by-election (April 10, 1958) for the Maudaha seat in the State Assembly, previously held by a Congress member, a Praja Socialist candidate defeated Mr. C. B. Gupta (the former Health and Planning Minister) by a 7,000 majority.

West Bengal. - Resignation of Mr. Ray.

Mr. S. S. Ray, the Minister for Law and Tribal Welfare, resigned from the West Bengal Government on March 10, 1958, the Law portfolio being subsequently given to Mr. Jalan (Minister for Local Government) and that of Tribal Welfare to Mr. Mazumdar (Minister of Industry and Commerce). Giving the reasons for his resignation in a three-hour speech in the State Assembly on March 24, Mr. Ray asserted that the West Bengal Congress Party was controlled by "an unscrupulous section of rich industrialists, traders, and businessmen, the privileged class of modern India," and that the party leadership consisted of "mediocrities and reactionaries" who were "not interested in the eradication of corruption from our national life."

Dr. Roy (the Chief Minister), speaking at a press conference on March 28, refuted in detail various allegations made by Mr. Ray against the Government's food policy, and claimed that the measures taken by the Food Minister (Mr. Sen) had effectively averted at least two famines in West Bengal. Referring to the anti-corruption work of the Government, the Chief Minister stated that reports on such matters had been handled by a special sub-committee of the State Government, and that Mr. Ray himself had been fully aware of its activities. (Hindustan Times, Delhi - The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. 15533 A.)

A. UNITED STATES. — Rear-Admiral Strauss retires from Atomic Energy Commission. - Appointment of Mr. McCone.

It was announced from the White House on June 5 that Rear-Admiral Lewis Strauss would retire from the chairmanship of the U.S. Atomic Energy Commission on June 30, at the expiration of his five-year term on the commission. He would continue, however, to serve as Special Assistant to President Eisenhower in promoting the atoms-for-peace programme.

The appointment of Mr. John A. McCone to the Atomic Energy Commission in place of Rear-Admiral Strauss was announced on the following day. It was not stated whether Mr. McCone would succeed Admiral Strauss in the chairmanship, and it was indicated at the White House that President Eisenhower would not designate the new chairman until the Senate had acted on Mr. McCone's nomination. It was nevertheless assumed in the U.S. Press that Mr. McCone would become the new chairman.

Mr. John Alex McCone (56), an engineer, was born at San Francisco and served as Under-Secretary of the Air Force in 1950-51. He has been an unofficial adviser to the President on missile and earth-satellite policy. During the Second World War he headed the California Shipbuilding Corporation at Los Angeles, and subsequently became head of the Joshua Hendy Corporation, a large ironworks.—(New York Times)

(Prev. rep. 13120 A.)

JUNE 28—JULY 5, 1958

A. FRANCE - ALGERIA. — Formation of Pflimlin Government. - The Algerian and Corsican Insurrections. - Creation of Committees of Public Safety.- State of Emergency in France. - Declarations by General de Gaulle on Readiness to assume Premiership.

The resignation of M. Gaillard as a result of the Franco-Tunisian crisis following the Sakhiet incident (see pages 16027-8) was followed by a sequence of dramatic events, spread over several weeks, of which the principal stages were, in brief :

(1) The formation of a new French Government by M. Pierre Pflimlin.

(2) An insurrectionary movement by military and civilian leaders in Algiers, who set up a Committee of Public Safety exercising powers independently of the Pflimlin Government in Paris.

(3) A similar insurrectionary movement in Corsica, where Committees of Public Safety were also set up.

(4) A declaration by General de Gaulle that he was willing " to assume the powers of the Republic " in view of the serious situation in metropolitan France and Algeria.

(5) A declaration by President Coty to the National Assembly giving a warning that France was in danger of " fratricidal strife," and announcing that he had asked General de Gaulle to form a Government " within the framework of republican legality."

(6) The subsequent resignation of M. Pflimlin, followed by General de Gaulle's investiture as Prime Minister by the National Assembly.

(7) The adoption of a Bill conferring full powers on General de Gaulle to govern by decree for six months.

(8) The simultaneous adoption of a Bill authorizing General de Gaulle's Government to prepare constitutional reforms (in consultation with a committee of parliamentarians) which would be submitted to a national referendum.

(9) The adjournment of the French Parliament until October.

(10) A three-day visit to Algeria by General de Gaulle after his installation as Prime Minister.

Formation of Pflimlin Government.

Following M. Gaillard's resignation, M. Georges Bidault (M.R.P.) accepted an invitation by President Coty to form a government, but abandoned the attempt on April 22 after he had failed to obtain support either from the Socialists or from his own party. The President then called on M. René Pleven (leader of the left-centre U.D.S.R. group), who agreed to form a government on condition that an agreed statement could be obtained from all " national " parties (i.e. excluding the Communists) on the policy to be pursued in Algeria. The National Council of the Socialist Party, however, decided on May 2 (*a*) to support M. Pleven on a *vote d'investiture*, but (*b*) not to participate in a government headed by him.

Despite the Socialist refusal, M. Pleven succeeded in enlisting the support of the M.R.P., the right-wing Independents, the Radical Socialists, and the Dissident (anti-Mendesian) Radicals, and accordingly formed a government drawn from these parties and from the U.D.S.R. On May 8, however, three of the Ministers (M. Billères and Senator Berthoin, both Radical Socialists, and M. Edgar Faure, of the radical R.G.R. group) withdrew from M. Pleven's Cabinet in protest at the appointment of M. André Morice as Minister of National Defence. [M. Morice, a Dissident Radical, is known for his opposition to any policy of " softness " or " surrender " in North Africa ; his appointment as Defence Minister— a post he held in the Bourgès-Maunoury Government—had been strongly urged by the Independents, but was opposed by the Radical Socialists.] The Radical Socialist Party issued a statement explaining that they could " not approve a Government whose composition would exclude the evolution of an African policy along liberal lines." M. Pleven accordingly informed President Coty on the same day (May 8) of his inability to form an administration.

After M. Billères, Senator Berthoin, and M. Edgar Faure had all declined requests by the President to form a Cabinet, M. Pflimlin accepted the task and succeeded in enlisting the support of all the " national " parties with the exception of the Social Republicans (Gaullists). The membership of M. Pflimlin's Cabinet was announced on May 12 as follows :

†M. Pierre Pflimlin (M.R.P.) ..	Prime Minister.
†M. Félix Houphouet-Boigny (UDSR-RDA)	Minister of State.
M. René Pleven (UDSR)	Foreign Affairs.
*M. Robert Lecourt (M.R.P.) ..	Justice.
†M. Maurice Faure (Radical Socialist)	Interior.
M. Edgar Faure (R.G.R.)	Finance and Economic Affairs
M. André Mutter (Independent) .	Algeria.
General Corniglion-Molinier (R.G.R.)	Sahara.
M. Pierre de Chevigné (M.R.P.) ..	National Defence.
Senator Jacques Bordenave (Radical Socialist)	Education.
M. André Colin (M.R.P.)	*France d'outre-mer.*
M. Paul Ribeyre (Independent) ..	Industry and Commerce.
*M. Edouard Bonnefous (UDSR) ..	Public Works.
M. Paul Bacon (M.R.P.) .. .	Labour.
*M. Pierre Garet (Independent) ..	Housing.
*M. Boscary-Monservin (Independent)	Agriculture.
M. André Maroselli (Dissident Radical)	Public Health.
M. Vincent Badie (*Gauche Democratique*)	War Veterans.

*Held same post in Gaillard Cabinet.
†Held different post in Gaillard Cabinet.

M. Pierre Pflimlin, national president of the M.R.P., had served in 15 post-war Cabinets—in eight of them as Minister of Agriculture—and held the portfolio of Finance and Economic Affairs under M. Gaillard. He had never before been Prime Minister, although he had made two unsuccessful attempts to form a government in previous Cabinet crises. Born in Roubaix, he is of Alsatian parentage and sits in the National Assembly as a deputy for Strasbourg. He is a lawyer by profession.

The Algerian Coup of May 13.

On May 12 a manifesto was issued in Algiers by a vigilance committee (*comité de vigilance*), representing 17 patriotic associations, calling for a general strike throughout Algeria on the following day to coincide with the French National Assembly's debate on the investiture of M. Pflimlin as Prime Minister. The manifesto accused M. Pflimlin of wishing to " liquidate French Algeria " ; described his Cabinet as " a government of surrender " (*gouvernement d'abandon*) ; and called on the European population of Algeria to consider themselves " in a state of mobilization in the service of Algeria." At the same time the population of Algiers was asked to demonstrate " at the hour the National Assembly meets, in order to show its opposition to an unacceptable investiture."

The *comité de vigilance* also sent a telegram to President Coty saying that it was " absolutely essential " that the Head of State should " end the quarrels between individuals and parties " by taking steps to form " a government of public safety " (*un gouvernement de salut public*). In addition, a telegram was sent to M. Pflimlin expressing the committee's " astonishment " that " an Alsatian representative " [i.e. M. Pflimlin] should " attempt to solve the Algerian problem by formulas which will inevitably lead to a rupture of relations with the mother-country." After warning M. Pflimlin that " all steps will be taken to prevent the arrival on Algerian soil " of any Minister who might be sent to implement his policy, the committee called upon him to " abandon the idea of forming a government . . . and thus make possible the rapid formation of a *gouvernement de salut public.*"

On May 13, and during the early hours of May 14, the military authorities in Algiers carried out a *coup* involving the occupation of the Ministry of Algeria and other public buildings by parachute troops ; the formation of a Committee of Public Safety for Algeria and the Sahara, under the chairmanship of General Massu ; and a declaration by General Salan that the Army had " provisionally taken over responsibility for the destinies of French Algeria." The dramatic and fast-moving events of these few hours were described by *Le Monde* in the following hour-by-hour account :

5.30 p.m. (May 13)—Large-scale demonstrations against M. Pflimlin, as called for by the *comité de vigilance*, took place at the *Monument des Morts* (War Memorial) in the centre of Algiers. The crowds were addressed by M. Lagaillarde, president of the *Association générale des étudiants d'Alger*, who called on the demonstrators to march to the Forum (the square in which the Ministry for Algeria is situated). M. Lagaillarde, wearing the uniform of a paratrooper, himself led a section of the crowd to the Ministry, and clashes occurred with security forces who used tear-gas to prevent demonstrators from breaking into the building.

6.30 p.m.—Generals Salan, Massu and Jouhaud, Admiral Auboyneau, and M. Baret (the Prefect of Algiers) arrived at the *Monument des Morts*—where demonstrations were still in progress—and laid

wreaths on the memorial. They received an overwhelming ovation from great crowds demanding the resignation of M. Pflimlin and the formation of a "Government of Public Safety" in Paris.

7.15 p.m.—The Ministry for Algeria was occupied by paratroops, tricolour flags were flown from the balcony of the building, and an Army officer appeared with a banner bearing the words *L'armée est la garantie de l'Algérie française* (The Army is the guarantee of French Algeria). General Massu then entered the building to the accompaniment of frenzied cheering from vast crowds in the Forum—estimated at tens of thousands—who broke into the *Marseillaise*.

7.30-8 p.m.—General Salan arrived at the Ministry, followed by detachments of paratroops who surrounded the building and replaced the *gardes mobiles* previously on duty.

9.10 p.m.—General Massu appeared on the balcony and announced that he had sent the following telegram to President Coty: "A Civil and Military Committee of Public Safety (*comité de salut public civil et militaire*) has been formed under my chairmanship in view of the gravity of the situation and the absolute necessity of maintaining order and avoiding bloodshed. We ask for the creation in Paris of a Government of Public Safety capable of maintaining Algeria as an integral part of the metropolitan territory."

The announcement was greeted with tremendous enthusiasm by the crowds in the Forum, who were addressed by General Massu as follows: "The Army is with you heart and soul . . . You can best serve the cause of *Algérie française* by preserving calm and discipline . . . The members of the Committee of Public Safety are meeting at this moment, and they will not abandon their task until a Government of Public Safety has been formed in Paris . . ." He was followed by Colonel Thomazo, a leading paratroop commander, who declared: "People of Algiers, the Army and its chief—General Salan—has given you this victory. General Salan has been under strong pressure from the [French] Government to ban your demonstration. He has told Paris that he will not do so because the Army feels as you feel . . ."

The speeches were greeted with wild cheering, the singing of the *Marseillaise*, and cries of "*L'Armée au pouvoir!*"

11.15 p.m.—General Salan issued a declaration saying that he had "provisionally taken over responsibility for the destinies of French Algeria."

Midnight (May 13-14)—The studios of Radio Algiers were occupied by paratroops in the name of the Committee of Public Safety, and all Algerian newspapers were placed under the surveillance of a *commission de surcté* comprising civil and military representatives.

[Radio Algiers had been broadcasting statements and communiqués on behalf of the Committee of Public Safety for some hours previously; it had already broadcast the declarations of Generals Salan and Massu, and had declared that "the battle is won" and that "Algeria will definitely remain French."]

1.10 a.m. (May 14)—A broadcast from Radio Algiers announced that the Committee of Public Safety had appealed to General de Gaulle to form a Government "free from the regime of parties" and capable of "maintaining Algeria as an integral part of France." It was added that copies of the message had been sent to President Coty, the party leaders, and the president of the Council of the Republic.

3 a.m.—It was announced that military garrisons throughout Algeria and the Sahara—at Fort Polignac, In-Salah, Edjelé, Hassi-Messaoud, Tamanrasset, and many other places—had rallied to the *Comité de salut public* and were solidly behind it.

5 a.m.—The following statement was issued by General Massu on behalf of the Committee of Public Safety, which had been in session throughout the night: "We learn that M. Pflimlin's government of surrender has been approved [by the National Assembly] with the help of Communist votes . . . M. Jacques Soustelle [the former Governor-General of Algeria] has twice been prevented from joining us. A third attempt has been successful, and we await his arrival today. The Committee of Public Safety begs General de Gaulle to break his silence and form a *gouvernement de salut public* which alone can save Algeria from surrender . . . In any event, the Committee which I represent will remain in being, ensure liaison between the people and the Army, and retain power until final victory.

"While awaiting M. Soustelle, I have formed a directing committee (*comité de bureau*) of which M. Delbecque, representing M. Soustelle, M. Madhani, and M. Lagaillarde are members. We have called for the mobilization of all French energies in the service of the *patrie*, and we ask you to respond to this first appeal by the Committee of Public Safety. We are proud that we have shown the whole world a demonstration of total fraternity between the French European and Moslem populations, united under one flag."

11.30 a.m.—General Salan announced that he had provisionally assumed "civil and military powers," and called upon the population to "have confidence in the Army and its chiefs" and to preserve order and discipline.

The Committee of Public Safety was in full control throughout Algeria and the Sahara within a few hours of the *coup*. All shipping and air services to metropolitan France were suspended; all telegraphic and telephonic communications were cut off except for official messages; and all key points in Algiers—airfields, railway stations, public buildings and installations, etc.—were guarded by paratroops or armoured formations.

The Committee of Public Safety.

The Committee of Public Safety formed in Algiers during the night of May 13-14 consisted of four military members, seven French civilian members, and four Moslem members, as follows: (*a*) Military members General Massu and Colonels Ducasse, Trinquier, and Thomazo; (*b*) Civilian members MM. Delbecque, Lagaillarde, Martel, Montigny, Baufier, Moreau, and Paracchini; (*c*) Moslem members Commandant Mahdi (vice-president of the *commission administrative*) and MM. Berkani, Shikh, and Madhani.

All the military members of the Committee, and many of the civilian members, were high-ranking parachute officers or ex-paratroopers who had fought against the Algerian rebels, and also in Indo-China. [The parachute troops enjoy a high reputation both in France and Algeria and are regarded as a *corps d'élite* of the French Army.] Biographies of leading members of the Committee are given below, and also of General Salan, the Commander-in-Chief in Algeria.

General Raoul Salan (59), formerly a commander of Moroccan *tirailleurs*, served for nine years in Indo-China after the Second World War, holding the successive posts of Commandant of French Forces in Tongking, *Commissaire de la République* in North Vietnam, and C.-in-C. of all French land, air, and naval forces in Indo-China. In 1954 he was replaced in the latter post by General Navarre, and returned to France to become Inspector-General of Defence for the metropolitan territory. In the same year he was appointed member of the commission which inquired into the fall of Dien Bien Phu. General Salan succeeded General Lorillot as C.-in-C. in Algeria in November 1956 (see page 16185, first column).

General Massu (50) commands the 10th Parachute Division, one of the crack formations in the French Army. Born at Châlons, he rallied to General de Gaulle in 1940 (at which time he was a lieutenant in the Chad territory), fought in the Fezzan campaign, and served with General Leclerc from North Africa to the Rhine. In September 1945 he went out to Indo-China as a paratroop commander, and played an important role in restoring order in Saigon. On his return from Indo-China he was stationed in North Africa and subsequently commanded many paratroop operations against the Algerian rebels. In 1955 he became Inspector of Airborne Forces in North Africa, and in the following year was placed in command of the 10th Parachute Division, in which capacity he directed the French airborne operations at Port Said in November 1956. One of the most highly decorated officers in the French Army, he holds—among many other honours the *Croix de la Libération* and the rank of *Grand Officier de la Légion d'Honneur*. General Massu is regarded almost as a legendary figure by the French paratroops, to whom he is known as the *père des paras*.

Colonels Thomazo, Trinquier, and Ducasse have all commanded parachute units in Indo-China and North Africa, and are all closely associated with General Massu. Colonel Thomazo is familiarly known as "leathernose" (*nez de cuir*) from a facial wound received in the Italian campaign, during which he fought with great bravery in the Free French forces. He is Chief of Staff to General Allard, commanding the French Army corps in the Algiers region. Colonel Ducasse was a prisoner of the Vietminh for several months after his encircled paratroops had held out for eight weeks at Nam-Dinh against greatly superior forces. Colonel Trinquier, who served in Indo-China for many years, is Chief of Staff to General Massu.

M. Léon Delbecque (38), one of the principal leaders of the *coup*, was described by *The Times* Correspondent in Algiers as "the brain behind the movement." The son of a textile worker, he owns a big textile factory at Tourcoing and has been a fervent Gaullist since the war, when he fought in the underground Resistance movement. He served as an Army reservist in Algeria in 1956-58 and was recently private secretary to M. Chaban-Delmas, the Social Republican (Gaullist) Defence Minister in M. Gaillard's Cabinet. M. Delbecque is understood to favour a reform of the French Constitution on American lines, and an Algerian policy of full political and economic integration between Europeans and Moslems. *The Times* Correspondent wrote: "M. Delbecque has gained a reputation for liberalism in such matters as the release of Moslems detained as terrorist suspects. Like many men of his type, he combines a taste for authoritarianism with progressive ideas on such matters as race relations and economic and social policy."

M. Pierre Lagaillarde (29) is a lawyer practising at Blida, an ex-parachute officer, and, as stated above, president of the *Association générale des étudiants d'Alger*. The Algerian insurgents (the F.L.N.) have put a price on his head.

Committees of Public Safety, similar to that in Algiers, were also formed in Oran, Constantine, Bône, Philippeville, Mostaganem, Tlemçen, Orléansville, and other Algerian cities. In some cases the committees were formed with the support of the local prefects, while in other cases the prefects handed over their functions to two senior officers whom General Salan had designated to exercise civil and military powers in eastern and western Algeria respectively—General Réthoré in western Algeria and General Gilles in eastern Algeria. The Prefect of Oran (M. Pierre Lambert) at first refused to recognize the local committee of public safety, but eventually transferred his powers to General Réthoré after widespread demonstrations against him by the local population.

M. Lambert subsequently fled to France, while the Prefect of Bône (M. Andrieu) resigned because he was "no longer in a position to exercise his powers"; M. Andrieu was replaced by General Vanuxem, who was recognized by the local Committee of Public Safety.

M. Pflimlin receives Investiture Vote. - Speech to National Assembly.

After a day of intense political activity in Paris, caused by the news from Algeria, M. Pflimlin was given a *vote d'investiture* by the National Assembly in the early hours of May 14. The voting was 274 in favour, 129 against, and 137 abstentions, with 54 deputies absent. The vote was taken after the sitting had been suspended three times, and after all-night consultations between M. Pflimlin and the party leaders at the Hôtel Matignon—the official residence of the Prime Minister. As in Algiers, the events of these hours were extremely confused, the following chronology being given by *Le Monde* :

3 p.m. (May 13)—opening of National Assembly's debate; 4.10 p.m.—sitting suspended, followed by inter-party discussions; 6 p.m.—debate resumed; 7.10 p.m.—sitting again suspended; 9 p.m.—debate resumed; 9.45 p.m.—three Independent Ministers (MM. Ribeyre, Garet and Boscary-Monservin) announce their withdrawal from M. Pflimlin's Cabinet [the three Ministers subsequently withdrew their resignations after an urgent appeal by M. Pflimlin]; 10.40 p.m.—sitting suspended for the third time; 10.45 p.m.—M. Pflimlin goes to the Hôtel Matignon, where he is visited by MM. Pinay, Duchet, de Chevigné, and Maurice Faure, and later by General Ely, the Chief of Staff of the Armed Forces; 11.20 p.m.—M. Guy Mollet calls on M. Pflimlin at the Hôtel Matignon after a meeting of the Socialist Party's parliamentary group; 11.30 p.m. to midnight—M. Pflimlin receives a number of leading politicians, including M. Mitterrand, M. Edgar Faure, M. Daladier, M. Garet, M. Boscary-Monservin, M. Bonnefous, M. Teitgen, and M. Robert Schuman; midnight—M. Deixonne arrives at the Matignon to inform M. Pflimlin that the Socialists will support him on the *vote d'investiture*; 1.10 a.m (May 14)—the Independents decide to vote against M Pflimlin on the *vote d'investiture*; 1.15 a.m.—National Assembly resumes its debate; 1.40 a.m.—the Communists announce that they will abstain from voting; 1.45 a.m —MM. Pinay, Bourgès-Maunoury, Lacoste, and Chaban-Delmas leave the Matignon after discussions with M. Pflimlin; 2.35 a.m —MM. Gaillard and Chaban-Delmas re-visit the Matignon; 3 a.m.—M. Pflimlin addresses the National Assembly; 3.20 p.m.—M. Pflimlin receives a *vote d'investiture* and the session ends; 3.30 p.m.—M. Pflimlin's Cabinet holds its first meeting; 3.50 p.m.—M. Pflimlin calls on President Coty at the Elysée, while the Cabinet is still in session. 5.25 a.m.—Cabinet meeting ends; 6.15 a.m.—President Coty sends an appeal to the Army in Algeria.

M. Pflimlin's speech to the National Assembly dealt with four main subjects: (1) the vital need for constitutional reform; (2) financial and economic policy; (3) Algeria, in which connexion he emphasized his Government's determination that Algeria should remain French; and (4) relations with Tunisia and Morocco. M. Pflimlin spoke as follows :

Constitutional Reform. "Three times in less than a year the nation has been paralysed by ministerial crises. In three out of the past 12 months the Republic has been without any direction . . . The degradation of our institutions is threatening the very existence of our country. It is clear that our liberties can only be saved if authority, strength, and prestige can be re-discovered—and also stability, the attribute of strength.

"I am under no illusion that the Government I present to you will be able to escape the precarious existence of its predecessors. In the present state of our institutions, no Government can hope to remain in power for any length of time. This Government, then, does not seek to remain long in power; it seeks to create the conditions of future governmental stability by reforming our institutions.

"A first step has already been taken in this direction. The National Assembly has voted to revise a number of Articles of the Constitution [see 16163 A]. But this reform, important though it is, is not sufficient. The Government will ask for the reform of other constitutional Articles so that the executive power can be reinforced. It will make proposals to this effect and will demand their adoption with the least possible delay . . .

"One of the principal causes of ministerial instability arises from the fact that a Government can be overthrown by a transient coalition of minority groups, opposed to one another and incapable of uniting to form a positive majority. To remedy this state of affairs, the Government will introduce a constitutional amendment whereby the authors of a censure motion will be obliged to submit a constructive governmental programme, and to designate a prospective Prime Minister for a *vote d'investiture*. This reform will permit Parliamentary government to function properly, and will restore true meaning to the idea of majority rule—the basis of all democracy . . . The Government will ask the Assembly to begin debating these reforms in October [i.e. after the summer recess] . . . It will not tolerate dilatory tactics. It will resign if the reforms are not passed by December 1, 1958 . . ."

Economic and Financial Reforms. In that part of his speech dealing with economic matters, M. Pflimlin said that his Government would (1) raise new taxes to cover military requirements in Algeria; (2) promulgate by decree those sections of the 1958 Budget which had not yet been adopted; (3) if necessary, take measures to restrict the consumption of raw materials and foodstuffs; (4) introduce "sweeping administrative reforms"; (5) "strive to reduce the burden on the nation's economy in preparation for the effective participation of France in the European Common Market."

Algeria. "In North Africa," M. Pflimlin continued, "France is fighting single-handed against an aggression which threatens the whole Western world . . . Whatever happens, even if we remain alone in our struggle, it must be made known that France will not abandon Algeria. Nor will she retreat in the face of violence . . . No-one, whether inside or outside Algeria, can base their hopes on any weakening of our will.

"The Government has only one objective in Algeria—to re-establish peace. But that objective can only be attained by effort. For this reason the Government will consider it its duty to demand fresh sacrifices from the nation. The forces at the disposal of the military authorities will be increased by keeping the necessary number of men with the colours . . .

"The rebels would have no hope but for the external aid they are receiving, the sources of which we know very well. We must carry forward and complete the measures, already successfully begun, to prevent the flow of arms across the Algerian-Tunisian frontier; if necessary, we must do the same with regard to the Algerian-Moroccan frontier . . .

"But if the use of force is essential, we know that it is not by itself sufficient. The conflict in Africa, like similar conflicts in other parts of the world, is a psychological one. We shall not succeed unless we also conquer, or re-conquer, hearts and souls. We do not seek a fragile truce, which may be broken in a few months or years, but a real peace freely supported by the men and women living in Algeria.

"For this reason we will apply the [Algerian] *loi-cadre* both widely and liberally. New institutions have already been created which have enabled a certain number of French Moslems to show their desire to work with us in building the new Algeria . . . I hope their example will be followed by many other Moslems, even by some of those who are today our adversaries . . .

"The day it becomes apparent that the rebels, having lost all hope of success, are ready to lay down their arms—on that day the Government will choose the most favourable moment to negotiate for a cease-fire. The principles and objectives of these negotiations have been frequently stated, and have been approved on many occasions by Parliament. They will be subject to no political preconditions whatever. Their sole objective will be to lay down the conditions for a cease-fire, followed by elections. France will invite representatives of the free democracies to observe the elections and verify that they are carried out in complete democratic freedom."

After recalling that F.L.N. spokesmen had declared their opposition to international control of Algerian elections, and saying that it had become obvious that the rebels sought to establish a totalitarian regime in Algeria, M. Pflimlin continued: "It goes without saying that elections can only be held when calm has been sufficiently re-established and the population can vote in freedom and security . . . It would be absurd and dangerous to try and lay down a time-table for this. We shall continue the struggle as long as necessary. But I must stress my conviction that negotiations for a cease-fire are only conceivable under the sign of a French victory . . . I also declare that the Government will not permit the ties between France and Algeria to be broken."

Relations with Morocco and Tunisia. "Despite the legitimate irritation felt by our people and by Parliament at the attitude of Tunisia and of certain Moroccan leaders toward the Algerian rebels, the Government will try to establish with Tunisia and Morocco relations based on mutual respect for sovereignty and the inviolability of frontiers . . . The difficulties of the present time must not lead us to sacrifice the heritage of the past, of which those Frenchmen who live and work in Tunisia and Morocco are living witnesses. Nor must they cause us to renounce the hope of building a union of France and the Maghreb (*une union franco-maghrébine*) ordained by geography and justified by history, one of whose principal objects would be the joint exploitation of the riches of the Sahara . . .

"If we cannot permit any interference in Algeria by our neighbours; if we hold ourselves ready on the frontiers to repel any aggression; if we seek to end the fighting in Algeria—we shall thereby do no injury to Tunisia or Morocco, for whom the continuance of the conflict is a source of trouble and uncertainty. For these reasons we do not reject *a priori* the idea that our neighbours may one day help us to persuade our opponents to enter into cease-fire negotiations . . . If, by mentioning this possibility, I have provoked anger and suspicion, it is because the Government, while firmly determined to carry on the fight until final victory, must not neglect any chance of shortening the period of conflict and suffering."

M. Pflimlin's speech—in which he made no mention of the military *coup* in Algeria—was followed by a brief debate in which several right-wing deputies expressed their support for the Army in Algeria. Demonstrations for *Algérie française* from some of the right-wing benches were met by counter-demonstrations and cries of *le fascisme ne passera pas* from the Communist benches.

Immediately before the *vote d'investiture*, however, M. Pflimlin made a statement in which he said that the military leaders in Algiers had adopted "an insurrectionary attitude towards republican legality," and in which he gave warning that France was "perhaps on the verge of civil war."

"I have made a clear statement of the Government's programme," said M. Pflimlin. "The question is to preserve Algeria . . . Patriots may hold different views on how this is to be done. I respect their opinions, but I beg them to believe that I and my colleagues are incapable of harbouring any intention to abandon Algeria. Frenchmen in Algeria—whose anguish I understand—have let themselves become involved in serious actions, and the military leaders—I regret to say it—have adopted an insurrectionary attitude in defiance of republican legality (*contre la loi républicaine*) . . ." [Tumultuous applause broke out at this point from the Communist, Socialist, and Radical benches, and also from some of the Centre and moderate right-wing benches; on the other hand the Social Republicans, Poujadists, and some right-wing deputies remained silent].

M. Pflimlin added: "It would be tragic if a wedge were driven between Frenchmen in Algeria and Frenchmen in metropolitan France. To preserve Algeria we must preserve national unity—and we can only do that by preserving the Republic . . . We are perhaps on the verge of civil war, of which the only beneficiaries would be those [M. Pflimlin pointed at the Communist benches] with whom nothing would induce us to band together."

As stated above, the Socialists supported M. Pflimlin on the investiture vote and the Communists abstained. Detailed voting figures were:

For M. Pflimlin's Investiture: 89 Socialists, 71 M.R.P., 40 Radicals, 25 Independents (including the four Independent Ministers in M. Pflimlin's Cabinet, i.e. MM. Ribeyre, Garet, Boscary-Monservin, and Mutter), 15 U.D.S.R.-R.D.A., 13 R.G.R., 7 *Gauche Démocratique*, 7 *Regroupement Africain*, 4 *progressistes* (pro-Communists), 3 *paysans d'action sociale*—total 274.

Against M. Pflimlin's Investiture: 58 Independents, 29 Poujadists, 13 Social Republicans, 9 *paysans*, 7 *Gauche Démocratique*, 4 *paysans d'action sociale*, 5 *non-inscrits* (including the extreme right-wing deputies M. Le Pen and M. Tixier-Vignancour), 1 Radical, 1 U.D.S.R., 1 M.R.P. (M. Bidault), 1 R.G.R.—total 129.

Voluntary Abstentions: 135 Communists, 1 *progressiste*, 1 *non-inscrit*—total 137.

Not participating in Vote: 7 Communists, 7 Socialists, 6 *Regroupement Africain*, 4 Independents, 4 U.D.S.R.-R.D.A., 3 Social Republicans, 2 M.R.P., 1 Radical, 1 Poujadist, 1 *progressiste*, 1 *paysan*, 1 *paysan d'action sociale*, 4 *non-inscrits*—total 42. Another 11 deputies were absent on leave.

As shown by the voting figures, 25 of the 91 Independents supported M. Pflimlin's investiture as Prime Minister, despite the party's decision to oppose him on the *vote d'investiture*.

General Salan entrusted with Maintenance of Order in Algeria. - President Coty's Appeal to French Army in Algeria.

After the first meeting of M. Pflimlin's Cabinet, held between 3.30 and 5.30 a.m. on May 14, it was announced that General Salan had been entrusted with the task of maintaining order in Algeria and ensuring the protection of lives and property; it was added that General Salan had "assumed this task as from May 14."

The Cabinet statement said that "the normal functioning of authority" had only been interrupted in Algiers, and that "no other notable incident" had occurred in Algeria. At the time of the Cabinet meeting it was believed in Paris that the *coup* was confined to Algiers; not until some hours later did it become known that the Committee of Public Safety was in control of the whole of Algeria and the Sahara.

[As stated by M. Pflimlin in his speech to the National Assembly on May 16 (see below), General Salan had already been entrusted by M. Gaillard with maintaining order in Algeria. As explained by M. Pflimlin, M. Gaillard took this action in the evening of May 13—i.e. before M. Pflimlin received a *vote d'investiture* from the Assembly, and while M. Gaillard was still nominally Prime Minister. It therefore appeared from the Cabinet communiqué that M. Pflimlin's Government had confirmed M. Gaillard's action.]

M. Pflimlin made the following broadcast immediately after the Cabinet meeting:

"The Government invested by the National Assembly last night is confronted with the situation created by the happenings in Algeria . . . It appears that the Government's intentions have been systematically distorted in the eyes of Frenchmen in Algeria. We are falsely accused of intending to pursue a 'surrender policy.' In fact, the Government's programme—approved by the Assembly—calls for new sacrifices from the nation in order that the efforts of the Army may be crowned by a victorious peace. Once more I solemnly declare that the Government will never permit the links between Algeria and France to be broken. But Algeria can only be preserved by a united and disciplined national effort directed by the legal authority. The Government will not falter in its task. It will ensure respect for the laws of the Republic. It calls on those who represent the Government on Algerian territory to do their duty. It asks for the confidence of Frenchmen both in Algeria and in the metropolitan territory."

President Coty sent the following message to all ranks of the Army in Algeria in the early hours of May 14: "As guardian of the national unity, I appeal to your patriotism and your good sense not to add to France's trials by dividing Frenchmen in the face of the enemy. As Head of the Armies under the Constitution, I call upon you to remain at your posts under the authority of the French Republic." The appeal was broadcast to Algeria many times during the day.

Right-wing Demonstrations in Paris.

While M. Pflimlin was making his investiture speech in the National Assembly, some 6,000 ex-servicemen and right-wing demonstrators marched down the Champs Elysées towards the Palais Bourbon (the National Assembly building) after a ceremony at the Arc de Triomphe in honour of three French soldiers who had been executed by the Algerian rebels.

The demonstrators, led by two extremist right-wing deputies - M. Le Pen and M. Demarquet, both wearing paratroopers' berets - clashed with the police in the Place de la Concorde, a few hundred yards from the Palais Bourbon. Stones and thunder-flashes were thrown at the police cordons, scuffles occurred, and a number of demonstrators were injured when police riot squads went into action. The crowds eventually dispersed after demonstrations in favour of *Algérie française* and a "government of public safety."

Some 50 members of extremist right-wing organizations were arrested in Paris during the night of May 13-14, including 36 members of the *Parti patriote révolutionnaire* headed by M. Jean-Baptiste Biaggi [see 15903 C]. The Ministry of the Interior also announced that six Army officers had been placed under arrest, adding that none of them were parachutists. In the morning of May 14 the Government banned all public demonstrations throughout the country.

General de Gaulle's Declaration.

On May 15 General Charles de Gaulle issued a declaration saying that he was ready "to assume the powers of the Republic," but making no direct reference to the events in Algeria. The declaration was worded as follows:

"The degradation of the State is leading inevitably to the estrangement of the associated peoples [i.e. the oversea territories], to trouble in the Army, to national dislocation, to the loss of independence. For the past 12 years France, at grips with problems too difficult for the regime of parties, has been involved in a disastrous sequence of events. Once before the country, when at its lowest ebb, gave me its confidence to lead it in its entirety towards salvation. To-day, faced with new trials which are once more looming up, it should know that I hold myself in readiness to assume the powers of the Republic."

Socialist, Communist and Trade Union Reactions to General de Gaulle's Declaration.

General de Gaulle's declaration provoked an immediate and uniformly hostile reaction from the left-wing parties and the trade unions.

Communist Party. The Communist Party issued a declaration saying that General de Gaulle had "thrown off the mask," and accusing him of "demanding personal power in order to set up a military dictatorship in defiance of Parliament, the Republican Constitution, and the Chief of State." After alleging that he was supported by "the Algiers dissidents" (*les factieux d'Alger*), the Communists went on to accuse General de Gaulle of wishing "to extend to France the *coup d'état* perpetrated in Algeria" and to "instal fascism in France, aggravate the misery of the workers, destroy democratic liberties, and jeopardize the independence and unity of the nation." All "workers and democrats" were called upon to unite in "barring the road to de Gaulle, fascism, and military dictatorship" by mass demonstrations throughout the country, "multiplying protests to the President of the Republic," and taking action to "prevent any attempt at a *coup d'état*."

[The Communist Party had previously explained its abstention on M. Pflimlin's *vote d'investiture* on the ground that it would not prevent the formation of a Government in the situation caused by "the rioters of Algiers and generals who are in rebellion against the Republic." At the same time it strongly criticized M. Pflimlin for continuing a "war policy" in Algiers.]

Socialist Party. The Socialist declaration ran: "The Republic is threatened. The civil and military insurrection and the manifesto by General de Gaulle show that the assault on the republican regime has begun. General de Gaulle . . . has not rebuked the grave acts of indiscipline committed by certain military chiefs against their constitutional chief, the President of the Republic. In face of this peril, the Socialist Party has decided to participate in the Government of the Republic . . . But the Republic cannot be defended by Parliament and the Government only. All democrats must unite voluntarily in defence of their liberties. The Socialist Party will make

immediate contact with all free trade union organizations [i.e. the non-Communist unions] and with all republican organizations opposed to dictatorship. It calls on all its members to take immediate measures . . . to ensure the greatest measure of unity among the workers and all who wish to prevent our country falling into disorder and dictatorship."

Trade Unions. The Communist-dominated C.G.T. called upon all workers to "oppose personal power and military dictatorship" and to affirm their "indissoluble attachment to republican liberties and institutions." The working-classes were also asked to "give a vigorous rebuff" to any attempt to "seize personal power," if necessary by means of a general strike.

The Socialist *Force Ouvrière* issued a declaration condemning "the seizure of power by certain factious elements in Algeria, supported by part of the Army." It stated that the F.O. unions would "defend democratic liberties by all means against any attempt at personal power," if necessary by a general strike.

The Christian trade union organization (C.F.T.C.) similarly affirmed its "unshakeable attachment to French democratic institutions" and its opposition to "any regime of personal power." It offered "total support" to the Government in any measures necessary to "defend democracy and liberty."

The *Force Ouvrière* and the C.F.T.C. (each of which rejected any form of collaboration with the Communists) also issued a joint appeal to all workers to "defend democratic liberties" and "bar the road to fascism" wherever it might show itself.

On the initiative of the Paris branch of the Socialist Party, a *Comité de liaison pour la défense de la République et des libertés démocratiques* was formed by a number of left-wing and left-centre non-Communist parties and organizations.

In addition to the Socialist Party, the *comité* included the Radical Socialist Party, the R.G.R., the U.D.S.R., the Paris branches of the *Force Ouvrière* and the C.F.T.C., the *Ligue des droits de l'homme*, the *Fédération ouvrière et paysanne des anciens combattants*, and the Anarchist Federation.

The Paris branch of the Communist Party strongly protested at its exclusion from the committee.

Algerian Reactions. - Franco-Moslem Demonstrations for General de Gaulle. - General Salan's Order of the Day.

In Algiers, a spokesman for the Committee of Public Safety issued a statement on May 15 expressing the Committee's "deep pleasure" at General de Gaulle's declaration, and its hope that it would lead to "the success of our efforts." On the following day the Committee sent a message to President Coty worded as follows :

"The patriotic upsurge sweeping Algeria has won enthusiastic support from the Moslem population, expressed through their own committees of public safety created *en masse* at their own request. France will risk losing her best chance unless you respond to this popular fervour, which unites Frenchmen and Moslems, by accepting the arbitration of the liberator of the fatherland, thus enabling a Government of Public Safety to be formed under General de Gaulle. Any other solution can only lead to sorrow, misery and despair. The patriotic upsurge in Algeria is not a factious movement. All Algeria wishes to submit itself to the authority of a strong, central Republican power capable of building French unity . . . You should know that our resolve is unshakable and that all the vital forces of French Algeria will remain firmly united until final victory."

About 100,000 people, of whom at least 50,000 were Moslems, demonstrated in front of Government House in Algiers on the same day (May 16) in favour of General de Gaulle, *Algérie française*, and Franco-Moslem unity. Numerous delegations were present from Moslem and Arab committees of public safety created in all parts of Algeria, including a delegation representing the 60,000 inhabitants of the Casbah (the Arab quarter of Algiers). Many Moslem leaders made speeches praising General de Gaulle, calling for unity between the French, Moslem, and Jewish communities in Algeria, and denouncing the Algerian terrorists—one of the speakers declaring that "the rebels paid by the foreigner must be destroyed at all costs." Foreign press correspondents in Algiers commented on the high regard in which General de Gaulle seemed to be held by the Moslem population, the apparent spontaneity of the demonstrations, and the apparently genuine desire for Franco-Moslem amity expressed by numerous Moslem delegations and individuals.

The demonstrators were addressed from the balcony of Government House by General Massu and M. Delbecque, both of whom received an overwhelming ovation. General Massu stressed the unity between the Army and the European and Moslem populations, while M. Delbecque said that the "three glorious days" in Algeria [since the *coup* of May 13] marked "the starting-point of the renaissance of France and the restoration of her greatness." M. Delbecque also announced that all the committees of public safety in Algeria had been united on an all-Algerian basis under the direction of the Algiers Committee. After strongly denying that the Committee was acting against the Republic, M. Delbecque affirmed that the Algerian movement was in fact "saving the fatherland and delivering it from the disgrace of past years."

General Salan issued the following Order of the Day on May 16 to all French forces in Algeria :

"France is passing through grave hours. In a time of great difficulty the European and Moslem populations of all parts of Algeria have affirmed their unity and their will to remain French . . .

"I have been charged provisionally [by M. Pflimlin's Government] with exercising civil and military powers. I will comply with these instructions by maintaining order and continuing the fight against the rebels.

"I alone am informed of the exact situation, and I alone am qualified to take the necessary decisions arising out of the duties entrusted to me I will keep you on the road of honour, loyalty, and fidelity to the institutions of the fatherland."

On the same day General Salan appointed Colonel Godard (an officer on General Massu's staff) as director of internal security for Algeria ; M. Dumont (a member of the Algiers Committee of Public Safety) as director of security for the city of Algiers ; and M. Regard (a leading member of the European community) as secretary-general of the Ministry for Algeria. It was understood that General Salan had made these appointments without consulting Paris.

It was pointed out by foreign press correspondents that General Salan was in an equivocal position *vis-à-vis* the Committee of Public Safety, since he was in the position of wielding powers delegated to him by a Government which was not recognized in Algiers Although there was apparently no question of any overt friction between General Salan and the Committee, it was regarded as significant that the general had declared (in his Order of the Day) that he alone was "informed of the exact situation" and "qualified to take decisions."

M. Soustelle's Escape to Algeria.

A dramatic turn of events occurred on May 17 with the arrival in Algeria of M. Jacques Soustelle, who had been placed under police surveillance in Paris but succeeded in escaping to Switzerland, whence he flew to Algiers. A leading supporter of General de Gaulle, M. Soustelle was Governor-General of Algeria from January 1956 to January 1957, when he was superseded by M. Lacoste as Resident Minister. M. Soustelle is an ethnologist of international reputation and an authority on the pre-Columbian civilizations of America (for biography of M. Soustelle see 14021 E).

M. Soustelle had been placed under police surveillance in Paris on May 14, his flat being kept under observation. According to an account published in the *Echo d'Alger*, after his arrival in Algeria, he escaped from his Paris residence at 2.30 a.m. by smuggling himself into the boot of a car driven by a friend. After driving across France, with three changes of car *en route*, M. Soustelle crossed the Swiss frontier under an assumed name and arrived at Geneva, where he boarded a Viking airliner of the Swiss *Balair* company. He was met at Geneva by several friends who flew with him to Algiers—among them M. Geoffroy de la Tour du Pin, formerly *directeur du cabinet* to M. Bidault, General Guillain de Benouville, a former deputy and M. Charles Bérandier, deputy mayor of Lyons. The Swiss plane arrived at Algiers airport (Maison-Blanche) in the early afternoon of May 17.

The news of M. Soustelle's arrival was greeted with the wildest enthusiasm in Algiers, flags being flown throughout the city and great crowds—estimated at over 100,000—congregating in the Forum. M. Soustelle was given a tremendous ovation when he appeared on the balcony of Government House shortly after his arrival, accompanied by General Salan, General Massu, and members of the Committee of Public Safety. He said in a brief speech :

"When I left you in 1956 I promised to devote all my strength to the well-being of Algeria. I have done so. Only three days ago I was occupying my seat in Parliament. But I was subjected to an incessant police watch, and a check was kept on all my movements. Thus I could no longer accomplish my duty. I therefore decided to return to Algeria, to be among the people and at the side of the Army. I have chosen both liberty and the Fatherland. I have come to place myself at the service of French Algeria, which has set a magnificent example. Together with our Moslem brothers, I have no other ambition but to restore national unity on both sides of the Mediterranean. *Vive la République! Vive l'Algérie française! Vive la France! Vive de Gaulle!*"

Enthusiastic demonstrations of support for M. Soustelle, in which great numbers of Europeans and Moslems participated, also took place at many other towns throughout Algeria, including Bône, Oran, Constantine, and Sidi-bel-Abbès (headquarters of the Foreign Legion). In Algiers itself, M. Soustelle addressed a great Moslem demonstration which included large numbers of Moslem women.

"Never in the history of Algeria," M. Soustelle declared, "has there been such a great and fraternal gathering of Europeans and Moslems. If, *inshallah* [Arabic : 'By the will of God'], the story of these days comes to be written, the historians will say that the presence—for the first time—of such great numbers of Moslem women showed that there were no longer any barriers, either of race

or religion, between those living in Algeria. Here there are only nine million Frenchmen, sons and daughters of the same mother, our common *patrie*. A great human and French emancipation is in progress . . ." In an earlier speech at the *Monument des Morts*, M. Soustelle declared that "it will one day be written in the history-books that Algeria saved France."

Pflimlin Government receives Emergency Powers from French Parliament. - Socialists join Pflimlin Government. - Dissolution of Extremist Organizations.

Meanwhile, the National Assembly in Paris had met on May 16 to hear a further statement by M. Pflimlin on the developments in Algeria. After a six-hour debate it passed an Emergency Powers Bill (by 462 votes to 112) granting sweeping powers to the Government to deal with what M. Pflimlin described as "a plot against the Republic" in both metropolitan France and Algeria. The Bill was approved by the Council of the Republic during the night of May 16-17 (by 211 votes to 94) and came into immediate effect.

M. Pflimlin spoke as follows: "The National Assembly is aware of the events that have taken place in Algeria in the past three days . . . On May 13 a demonstration in Algiers degenerated into a riot. The *Gouvernement-Général* (Government House) was ransacked. A little later, a body calling itself the Committee of Public Safety was set up by persons who apparently took a leading part in these events. General Massu accepted the chairmanship of this body. One would have thought that he would have tried to prevent further excesses and maintain liaison with the legal authorities. I lack sufficient information about his inner convictions to enable me to read his motives. In the evening of May 13, M. Gaillard, who was still at the head of affairs, entrusted General Salan with the task of maintaining order and protecting lives and property. General Massu was placed under the orders of General Salan."

After describing the events in Algeria during the past three days, M. Pflimlin continued: "Today there is a new development. General Salan has dismissed certain officials from their posts and appointed substitutes without consulting the Government. This seriously raises the problem of the Army's place in the nation. For years the Army has fought valiantly in the service of the nation, and it is a great unifying factor. But it seems that certain Army chiefs have overstepped their duty.

"The Government must do its duty in the situation with which it is confronted. The emotions whipped up among the Frenchmen of Algeria originate in a campaign of calumny by people who aim at creating a state of insurrection on the metropolitan territory parallel to that in Algeria. Some of them are now in metropolitan territory. They have prepared their *coup* in greatest detail for political ends."

After recalling that a number of arrests had already been made during the night of May 13-14 [see above] M. Pflimlin continued: "The Government has decided to dissolve the following associations: the *Parti patriote révolutionnaire*, the *Phalange française*, the *Jeune Nation* movement, and the *Front d'action nationale*. [All are extreme right-wing or pseudo-fascist organizations]. All persons arrested will be brought rapidly to trial. These proceedings should succeed in uncovering all the ramifications of what can well be called a plot against the Republic and the established order.

"In addition, the Government asks the Assembly to approve the Bill establishing a state of emergency [see below] so that order and republican legality can be preserved and defended. By doing so, Parliament will affirm its will to maintain national unity and the republican regime.

"In my ministerial declaration I alluded to the defects in our institutions and the need for constitutional reforms. But this reform must be solely the work of Parliament; it must be carried through freely and not under the pressure of threats or menaces. I call upon all republican and national parties to unite behind the Government in this hour of danger." [M. Pflimlin's declaration was loudly applauded from all benches except those on the extreme Right.]

The ensuing debate was largely dominated by the position of General de Gaulle, to whom M. Pflimlin had made no direct reference. Among numerous speakers, M. Guy Mollet (Socialist) called on the general to clarify his declaration, adding that everyone would be relieved if General de Gaulle, "for whom we cherish the greatest respect," could confirm that he had no intention of overthrowing republican institutions. M. Bidault (M.R.P.), who called for a Government of National Union, dwelt on General de Gaulle's distinguished war record and his great services to France; he declared that it was a contradiction in terms to describe the man who had restored the Republic as an "enemy of the Republic," or to bring allegations of "anti-republicanism" and "fascism" against him. M. Daladier (Radical) denounced any attempt to impose "personal power"; M. Paul Reynaud (Independent) stressed the urgency of consitutional reforms and declared that the legal Government of the Republic must be obeyed; and M. Duclos (Communist) made an impassioned speech calling for the "defence of the Republic" against "military dictatorship and fascism." The only overt support for the Algerian insurrection came from M. Tixier-Vignancour (*non-inscrit*), whose peroration - "Long live the Algiers revolution which will save France and Algeria" evoked angry protests from the left-wing benches.

In a subsequent statement in the lobbies, M. Mollet said that he wished General de Gaulle to make his attitude clear on three questions: (1) Whether he recognized the Government as the only legal Government of the Republic; (2) whether he disavowed the leaders of the Committee of Public Safety in Algiers; (3) whether, if he should eventually be asked to form a Government, he would present it to the National Assembly with a definite programme; (4) whether he would withdraw if he failed to obtain a *vote d'investiture*.

The Emergency Powers Bill presented by M. Pflimlin was worded as follows: "The present serious situation in which the country finds itself demands that the Government of the Republic should have the means to maintain public order and safeguard republican legality. Consequently, the Government ask for the application of the law of April 3, 1955, to enable it to impose a state of emergency for three months in the metropolitan territory." [The 1955 law was that under which a state of emergency had been imposed in Algeria at the time.]

Before the vote was taken, M. Pflimlin announced that he would not count the Communist votes as part of the Government majority, even if they should be cast for the Government. The Communists nevertheless voted for the Emergency Powers Bill, which was adopted by 462 votes to 112 as stated above. Detailed voting figures were:

For: 148 Communists and *progressistes*, 96 Socialists, 73 M.R.P., 41 Radical Socialists, 38 Independents (including the Independent Ministers in M. Pflimlin's Government, and also M. Paul Reynaud), 18 U.D.S.R.-R.D.A., 14 *Gauche Démocratique*, 14 *Regroupement Africain*, 12 R.G.R., 5 *paysans d'action sociale*, 2 *paysans*, 1 *non-inscrit*—total 462. As shown by the voting figures, the Government would have had a large majority for its Emergency Powers Bill even if the Communist votes were excluded.

Against: 48 Independents, 29 Poujadists, 16 Social Republicans, 8 *paysans*, 4 *non-inscrits*, 2 R.G.R., 2 *paysans d'action sociale*, 1 M.R.P. (M. Bidault), 1 Radical Socialist, 1 U.D.S.R.—total 112.

[Seven deputies did not take part in the vote and 12 others were absent on leave.]

Three leading Socialists joined M. Pflimlin's Government on the same day - M. Guy Mollet as a Minister of State; M. Jules Moch as Minister of the Interior; and M. Albert Gazier as Minister of Information. Otherwise the membership of M. Pflimlin's Cabinet remained unchanged, except that M. Maurice Faure (M. Moch's predecessor as Minister of the Interior) became Minister for European Institutions.

Particular significance was attached to the appointment of M. Moch as Minister of the Interior, in which capacity he was responsible for implementing the Emergency Powers Act. Regarded as the "strong man" of the Socialist Party, M. Moch held the same post in 1947-49 and displayed great energy in suppressing the widespread Communist strike movements of 1947 and 1948.

Application of Emergency Powers. - Military Precautions. - Resignation of General Ely.

The first decrees issued under the Emergency Powers Act gave the Minister of the Interior powers to forbid the movement of persons and vehicles; to establish "security zones"; to order persons regarded as subversive to leave any department; to institute house searches by day or night; to impose censorship of the Press, radio, cinema, and theatre; to ban public assemblies; to order the closing of cafés and places of entertainment; to impose a curfew in any area; and to authorize military courts to try cases normally dealt with by the civil courts. In addition, all French nationals leaving the country were required to obtain an exit visa, including diplomatic personnel.

The *Journal Officiel* announced on May 17 that the state of emergency (*état d'urgence*) would remain in force throughout metropolitan France for three months. It enumerated a list of crimes which would be dealt with by military courts under the Emergency Powers Act, including all forms of treason, sedition, or subversion; attempts against the internal security of the State; armed rebellion; incitement to, or participation in, criminal assaults against individuals; the kidnapping of individuals; and acts of arson, looting, etc.

Representatives of the French Press and of journalists' associations were summoned to the Ministry of Information and informed by M. Gazier that the Press would be subject to a "pre-censorship" (*censure préalable*). M. Gazier asked all newspapers, magazines, and periodicals to exercise responsibility and moderation in commenting on events in France and Algeria, and to avoid inflammatory, irresponsible, or incitatory statements which might have the effect of aggravating the situation.

As announced by M. Pflimlin in the National Assembly, the *Parti patriote révolutionnaire*, the *Phalange française*, the *Mouvement Jeune Nation* and the *Front d'action nationale* were all dissolved on May 16 and many of their leaders arrested. On the following day 26 armed men—all members of extreme right-wing organizations—were arrested by the police at Saint-Etienne, and another 31 at Lyons and elsewhere in the Rhône department. In a broadcast on May 18 (see below) M. Pflimlin disclosed that the men apprehended at Saint-Etienne had intended to attack the Prefecture in that city.

Two unexploded plastic bombs, both of considerable power, were discovered on May 16 in two Ministries (those of the Interior and Economic Affairs) and rendered harmless. A third unexploded bomb was also discovered at the Château de La Celle-St. Cloud, which is partly occupied by the Foreign Ministry. On the same day a bomb was thrown at M. Pflimlin's unoccupied villa at Hendaye (near the Spanish frontier) without causing any casualties. In Marseilles, some damage was caused by a bomb explosion at the local Communist Party headquarters.

All leave for the French Army was cancelled on May 16; soldiers already on leave from North Africa were required to report to their nearest military centre; and *gendarmerie* reservists were recalled to the colours and ordered to form mobile units throughout the country. Special precautions were taken in Paris, where large numbers of troops and police were deployed round the Palais Bourbon and the Ministries; in addition, strong forces of *gardes mobiles* were moved into the Paris area from outside, and armoured units patrolled main roads on the outskirts of the city and in the suburbs.

It was announced on May 17 that the Government had accepted the resignation of General Ely as Chief of Staff of the Armed Forces and had appointed General Lorillot as his successor. [General Lorillot was General Salan's predecessor as C.-in-C. in Algeria; for the past two years he had been Chief of Army Staff.] The circumstances of General Ely's resignation were obscure, but it was understood to be connected with the fact that two of his staff officers—Lieut.-General Challe and Brigadier-General Martin—had been placed under house arrest.

In a broadcast on May 18, M. Pflimlin said that France was "passing through difficult times which may have a decisive influence on her destiny."

"The troubles that have broken out in Algiers and other cities," said M. Pflimlin, "can be explained by the uneasiness of our fellow-Frenchmen in Algeria, who have been deceived by tendentious reports. Their reactions were justifiable insofar as they expressed their passionate determination to remain French. But it is necessary to be much more severe against those who led them deliberately into error, and who have sought to transform the demonstrations into an insurrection . . .

"Those who are responsible for the disturbances have accomplices in metropolitan France. Certain misguided Frenchmen want to unleash violence in France. Last night 26 armed men were arrested as they were about to attack the Prefecture at Saint-Etienne. It is because we were informed of the evil designs of these rebels that we asked Parliament to declare a state of emergency . . . We shall use these powers against all who attempt to rise up against the law. I am not thinking only of Right-wing extremists. I do not forget that there is an extreme Left; nor do I forget that on the extreme Left there is also a peril to our liberties.

"But it is Algeria that remains our constant preoccupation. The Government will do everything in its power to safeguard national unity by preventing a breach between Algeria and France . . . We are determined—I repeat it—to make the necessary effort to establish in Algeria a just and humane peace which will be the fruit of the victory and courage of our soldiers. But this national effort presupposes that all Frenchmen—those in Algeria as well as in metropolitan France—should be grouped around the Government of the Republic . . ."

General de Gaulle's Press Conference.

Since his declaration of May 15, General de Gaulle had remained quietly at his home in the village of Colombey-les-Deux Eglises and had issued no further statement during the events described above. [General de Gaulle has lived for many years at Colombey, a village in eastern France about half-way between Paris and Metz.] On May 18, however, widespread expectation was aroused at the news that the general intended to hold an important press conference on the following day at the Palais d'Orsay Hotel, in Paris.

General de Gaulle accordingly motored to Paris on May 19 for his press conference. The security forces took the strictest precautions to prevent possible disturbances, all the approaches to the Palais d'Orsay Hotel being cordoned off and no unauthorized persons being allowed through the police barriers without a permit. At his press conference—one of the largest held in the French capital for many years, and attended by some 1,200 press representatives who packed the hotel to the doors—General de Gaulle replied without notes to a number of questions. His initial statement, and his subsequent replies to questions, were as follows:

"It is three years since I had the pleasure of seeing you. My last meeting with you showed what I foresaw, and my anxiety concerning the probable development of events. I was determined to maintain silence until the moment came when I could serve the country by breaking it.

"Indeed, since then events have become more and more serious. What has been happening in North Africa for the past four years has been a very heavy burden for the country. What is going on at this moment in Algeria in relation to metropolitan France, and in metropolitan France in relation to Algeria, may lead to an extremely grave national crisis. But it also may be the beginning of a kind of resurrection. That is why I think the moment has come when it might be possible for me to be once again directly useful to France.

"Why might I be useful? Because not long ago certain things were accomplished—which the French people well know. They were such that the peoples associated with our people have not forgotten them, and they are remembered abroad. Perhaps this sort of moral capital might be of value in face of the difficulties which assail us, and the misfortunes that threaten us at a moment of dangerous confusion.

"Useful also because it is a fact—of which we must all take note, whoever we may be—that the party régime has not settled, is not settling, and will not settle the enormous problems with which we are at present confronted; notably those of the association of France with the countries of Africa, the common life of the diverse communities living in Algeria, and the question of harmony within each of these communities.

"The fact is there. I repeat that everyone must take account of it. The battles being fought in Algeria, and the fever boiling over there, are only the consequences of this inability to deal with present problems. And if things continue in the way they are going, we all know perfectly well that the régime, as at present constituted, will find no solution . . . I repeat that there will be no solution from this régime, and that in such a case there is a risk that a solution might one day be imposed from outside. That would be, without any doubt, the most disastrous outcome possible.

"Useful, finally, because I am one man alone; because I am not associated with any party or organization; because for six years I have taken no political action; because for three years I have made no statement. In short, because I am a man who belongs to nobody—and belongs to everybody.

"How might I be useful? Well, if the people wish it, as in the preceding national crisis, I am ready to take the leadership of the Government of the French Republic. With that said, I am ready to answer the questions you may wish to put to me."

General de Gaulle then gave the following answers to questions put to him (questions in italics):

"*General, you have told us that you were ready to assume the powers of the Republic. What exactly did you mean by that?*"

"The powers of the Republic, when one assumes them, can only be those which the Republic itself has delegated. That is perfectly clear.

"The Republic? There was a time when it was denied, when it was betrayed by the parties themselves. I restored its arms, its laws, its name. I fought the war to win victory for France. But I did it in such a way that it was also the victory of the Republic. I did it with all those, without a single exception, who willingly came to join me. And at their head I restored the Republic to its rightful place.

"In its name, on its behalf, in conformity with its spirit, my Government accomplished an enormous task of renovation. There was political renovation: the granting of the franchise to women; citizenship given to the Moslems of Algeria; the beginning of an association within the French Union of peoples who formerly depended on us.

"There was economic and social renovation—the nationalization of the mines, gas, electricity, the Bank of France, the principal credit institutions, the State-owned Renault car works; the establishment of works committees; a social insurance organization safeguarding the workers against century-old scourges; the introduction of family allowances; the creation of organizations for the development, modernization, and prosperity of the country; the Oil Research Board to facilitate prospecting in metropolitan France and oversea territories for sources of energy of which we had an absolute need and which, in fact, we discovered; and there was the beginning of the development of atomic energy through the creation of the Commissariat designed for that purpose.

"When all that was done I let the people speak, as I had promised. And when it had elected its representatives, I handed over to them, without reserve and without conditions, the powers which were in my hands. When I saw that the parties had reappeared like the *émigrés* of other days, that they had forgotten nothing and learned nothing, and that, in consequence, it had become impossible for me to govern properly—I withdrew. I did not try to force their hand in any way. Afterwards they made a bad Constitution. I did not seek to violate it in any way whatsoever.

"In an attempt to put an end to confusion and to create a just and strong State, I instituted the Rally of the French People, calling on everyone without distinction of origin, ideas, feelings or even labels, so as to obtain by legal means the institutions which seemed to me to be necessary. It transpired that the régime was able to absorb, little by little, the elected representatives of the Rally, so that within the framework of legality I no longer had any means of action. Then I went home.

"That is how I served—and, it seems, 'threatened'—the Republic. Now I hear the professional saviours of the Republic—who, incidentally, would have been hard put to it to save it at the time—impute to me dark designs of violating public liberties, of destroying Republican institutions, of demolishing trade union rights. It is not the first time they have done so—it has been going on for 18 years. I shall drop the subject. But that does not prevent me, together with many other people, from asking these saviours what they have done with liberated France and the restored Republic."

"How do you judge present events in Algeria, the popular uprising and the attitude of the Army?"

"In Algeria there is a population which for years has been in the midst of war, murders, and violence. That population has seen that the present system established in Paris cannot solve its problems. More than that, it has recently seen that system turn towards [good] offices from abroad. It has heard the man, who is incidentally my friend and who at that time was Minister for Algeria [M. Lacoste], declare publicly 'We are heading for a diplomatic Dien Bien Phu.' In Paris it sees crisis follow crisis, powerlessness follow powerlessness, the same representatives of the same parties follow each other indefinitely in the same Ministerial posts without anything clear, precise, and effective ever coming out of it.

"How can you expect this population not to rise up at last? How could it not seek a recourse for its misfortunes elsewhere than in Parliamentary procedure? This is inevitably what has happened.

"And then the Algerians cry *Vive de Gaulle*, as Frenchmen do instinctively when they are in the depths of anguish or on the heights of hope. They present then the magnificent spectacle of an immense fraternization, which affords a psychological basis for the agreements and arrangements of to-morrow, a basis infinitely better than fighting and ambushes. Finally, they give the best proof that the French of Algeria do not want at any price to break away from metropolitan France. For one does not shout *Vive de Gaulle* if one is not on the side of the nation.

"In these conditions the Army, seeing this immense popular emotion, judged it its duty to prevent disorder. This it did, and it was right to do so. Moreover, the Army itself is deeply affected by the dramatic situation created in the country which it serves with much merit and many sacrifices; by the disability of the public authorities, which I have just stressed. Add to this that the Army is in close contact with the population, and shares its feeling about the immense desire to see Paris capable of assuming and carrying out its responsibilities. I well understand, therefore, the attitude and action of the military command in Algeria. And it is my wish in the national interest that the Army should remain coherent and united, and an exemplary factor at a time when such things are rare.

"It would be absurd and lamentable to destroy the bonds between France and Algeria now. This would be directly detrimental to the Frenchmen who are there, whether they are French by origin or Moslems, civilians or soldiers, and also detrimental to many Frenchmen on this side of the Mediterranean. It would mean gravely compromising, perhaps for ever, the position of France. It would mean the creation of a state of affairs the nature of which I cannot know, but which would certainly end in violence.

"The best—in fact, the only—thing to be done is that which will prevent Algeria from moving away from France; a development she herself certainly does not want, and which France does not want either. As for the Army, which is normally the instrument of the State, it is proper that it should remain so. But for that, it is first necessary that there should be a State."

"M. Guy Mollet, after his recent speech in the National Assembly, set out questions concerning the procedure of your possible return to power. Would you say what you think of them?"

"I have much esteem for Guy Mollet. During the war he risked everything to fight for France and for freedom. He was therefore my companion. I remember that after the liberation I went to Arras on my way back from a visit to the mines . . . From a balcony of the Arras Town Hall I spoke to the people gathered in the Grand-Place. Guy Mollet was at my side. These are things which one never forgets. Afterwards I did not see him again. Why? I have no idea. But I have followed his political career from afar.

"I will not say that I have always been in agreement with all he has said and done or tried to do. Besides, in the régime in its present form, no man of value can succeed. But what he has said or done has not diminished my esteem for him.

"Now there are the questions which Guy Mollet asked—firstly, secondly, thirdly, fourthly. I reply that if de Gaulle should find himself delegated with exceptional powers for an exceptional task at an exceptional time, that could obviously not be done according to the usual procedure and with the customary rites of which everyone is now so tired. It would be necessary to adopt a procedure which would also be exceptional; for the investiture by the National Assembly for example. But, as you know, when events speak loudly and there is agreement on substance, procedures can have considerable flexibility. All my public actions are there to prove this. If the need arose, I would tell the competent authorities what procedures would in my opinion be the best."

"Do you not believe that at the precise moment when you launched your appeal, the rebellion in Algeria was crumbling away? You have given new courage to the sedition-mongers. Your Press conference will strengthen them."

"I wish to give courage and vigour to those Frenchmen who wish for national unity, whether they are on one side or the other of the Mediterranean. That is the question. All the rest are the affairs of a universe which is not mine.

"Responsibilities will be studied later. To-day there is a fact. Some people call 'sedition-mongers' those leaders who have not been the object of any sanction on the part of the public authorities—to whom the public authorities have even delegated full powers. And I, who am not at present the public authority, why would you have me call them sedition-mongers?"

"Particularly concerning Algeria, what do you propose other than an exceptional procedure and your own return to public life?"

"I envisage a case in which the French people would ask me to carry out arbitration. This is sufficient reason for me not to indicate at present what the conclusions of my arbitration would be, because before giving it, it would be necessary to hear the parties involved. When the judgment was given, it would be necessary to have the means of imposing it. These are all conditions which, as far as I am concerned, are obviously not fulfilled. What would a judge be who gave his judgment before the hearing, and who would be certain, besides, that this judgment would remain a dead letter?"

"Some people fear that if you return to power you would attack public liberties?"

"Have I ever done so? On the contrary, I restored them when they had disappeared. Is it credible that I am going to begin a career as a dictator at the age of 67?

"We are weakened, struggling in a terrible world with extreme difficulties and great threats. But in France's hand there are good cards for the future—the birth-rate; the economy which has gone beyond the stage of routine; French technique which is continually developing; the oil which has been discovered in the Sahara. These things in our hand can permit to-morrow a genuine French resurgence and great prosperity for France. It will be necessary for all Frenchmen to have their share of it, and to associate with it the peoples who need it and who ask for our assistance. But it is true that for the moment the position is bad. If the task should fall on me to lead the State and the nation out of crisis, I would approach it without presumptuousness, for it would be hard and fearsome.

"I have said what I had to say. Now I shall return to my village, and I shall remain there at the disposal of the country."

Renewal of Government's Special Powers in Algeria.

A request by M. Pflimlin for the renewal of the special powers exercised in Algeria by the previous Government (i.e. that of M. Gaillard) was approved by the National Assembly on May 20 by 420 votes to 100, and also by the Council of the Republic. As in the debate on the Emergency Powers Bill, the Communists voted for the Government despite M. Pflimlin's declaration that he would not count Communist votes as part of the Government majority.

As the Pflimlin Government exercised no *de facto* control in Algeria, and as the Minister for Algeria (M. André Mutter) was unable to visit the territory, the special powers voted by Parliament could, in effect, only be exercised by General Salan as the Government's official representative in Algeria. During the debate, the Independent deputies made it plain that they would support the Government in its demand for special powers only if those powers were delegated to General Salan; the Socialists, on the other hand, insisted that these powers appertained solely to the Government.

On the previous day (May 19) the *Journal Officiel de l'Algérie* had published the names of a number of officials appointed by General Salan to advise him on civilian and military matters in a consultative capacity. The officials concerned (all members of the Algerian administration) were described as *conseillers techniques* for such matters as economic affairs, labour questions, security, etc.

Formation of Single Committee of Public Safety for Algeria and the Sahara.

A single Committee of Public Safety for the whole of Algeria and the Sahara was formed in Algiers on May 23, consisting of some 70 European and Moslem members. Its membership was as follows:

(1) General Massu and Dr. Sid Cara—joint presidents. Dr. Sid Cara, one of the leading personalities among the Algerian Moslems, was a Secretary of State in M. Gaillard's Government.

(2) General Jouhaud, M. Delbecque, and M. Azem Ouali (*president des maires de Grande-Kabylie*)—vice-presidents.

(3) M. Réne Denis, Captain Renault and Dr. Lefèbvre—secretaries.

(4) Six *attachés de liaison*, including M. Abdessalam, private secretary to Dr. Sid Cara when the latter was a Secretary of State.

(5) Colonel Ducasse as *directeur du secretariat*; Colonel Trinquier as *directeur des liaisons*; Lieutenant Lucien Neuwirth (official spokesman of the Committee) in charge of Information; Mlle. Antona in charge of Social Affairs.

[All the above formed the *bureau* (executive committee) of the Committee of Public Safety for Algeria and the Sahara.]

(6) Some 55 other members, comprising (*a*) all the original members of the Committee of Public Safety formed in Algiers on May 13, including Colonel Thomazo, M. Lagaillarde, and Commandant Mahdi; (*b*) six representatives of the Oran region, including four Army colonels; (*c*) nine representatives of the Constantine region, of whom several were Moslems; and (*d*) five representatives of the Saharan territories—General Mirambeau, and four Moslem notabilities from Ouargla, Touggourt, Ghardaïa, and the Oases department.

A "statutory declaration" (*décision statutaire*) defining the objectives of the new Committee—which included the formation in Paris of a "Government of Public Safety headed by General de Gaulle"—was issued on the same day by General Salan after a meeting with General Massu, Dr. Sid Cara, M. Delbecque, and other leading members of the Committee, in addition to M. Soustelle.

This declaration was regarded in Paris as indicating General Salan's definite decision to co-operate fully with the Committee and to give public support to its demands for a Government headed by General de Gaulle; hitherto General Salan, as the repository of the powers delegated to him by the Pflimlin Government, had refrained from expressing open support for the Committee of Public Safety, though co-operating with it and ending some of his public speeches with the cry *Vive de Gaulle*!

The *décision statutaire* issued under General Salan's signature was worded as follows:

"The *mouvement de salut public* launched in Algeria by the will of the people on May 13, 1958, is an expression of the indestructible union between the Army and the nation. The Committee of Public Safety formed on the same date is an expression of that union. This movement has spread to the whole of Algeria and the Sahara and has led to the formation of local Committees of Public Safety . . . These Committees are an expression of the will of the people, who are firmly determined to remain French. They are thus based on the people's sovereignty . . .

"The *comité de salut public de l'Algérie et du Sahara* directs the movement throughout the whole of Algeria and the Sahara. Its aims are: the restoration of the nation's greatness and independence; the preservation of the national patrimony intact; the creation [in Paris] of a Government of Public Safety, presided over by General de Gaulle, to carry out far-reaching changes in the institutions of the Republic; and the maintenance of the existing unity between the peoples of the French Republic and the French union, without distinction of race or religion.

"The tasks of the Committees of Public Safety are: to ensure liaison between the local population and the Military Command, which is the depository of civil and military powers; to participate actively in decisions affecting the national life, by making known the will of the people; to help the Army in its fight to defend the supreme interests of France and the French Union; and to help it in combating all subversive activities . . ."

The new Committee of Public Safety issued the following declaration addressed "to Frenchmen in the metropolitan territory, the French Union, and throughout the whole world":

"The *mouvement de salut public* unleashed by the people's will in Algiers on May 13 has accomplished in three days what no Government has been able to do in three years. The 10,000,000 Frenchmen of Algeria and the Sahara have achieved complete union. They have sworn that this province [Algeria] shall remain indissolubly linked with the mother country. They are firmly resolved to bring to power a Government of Public Safety, headed by General de Gaulle, which will promote and defend a far-reaching reform of Republican institutions."

Although M. Soustelle was not officially a member of the Committee, it was understood that he was acting in the capacity of political adviser both to the joint presidents (General Massu and Dr. Sid Cara) and to General Salan. During the last week of May M. Soustelle made a "whistle-stop" tour of a number of Algerian towns—including Bône, Oran, Constantine, Biskra, and Tizi-Ouzou—where he addressed large and enthusiastic gatherings which included many Moslems. He was accompanied by Generals Salan and Massu on some of his visits to these centres.

The Corsican Insurrection.

The Algerian insurrection spread on May 24 to Corsica, where, with the help of parachute troops stationed in the island, a 12-member Committee of Public Safety was set up in Ajaccio (the capital) under the chairmanship of M. Henri Maillot. Similar committees were also set up in Corte and Calvi, and subsequently in Bastia (the principal port) and Bonifacio. As in Algeria, the *coup* encountered no resistance and was carried out in a few hours without bloodshed.

The Corsican *coup*, like that in Algeria, was obviously carried out to a pre-arranged plan worked out in careful detail. It began when M. Pascal Arrighi (a Radical deputy for Corsica with a distinguished war record in the Resistance) arrived at Calvi at 5 a.m. in a plane from Algiers, accompanied by a parachute officer. Contact was immediately made with a paratroop unit garrisoned in the town, and within a short time some 250 lorry-borne troops were on their way to Ajaccio, where a crowd of 10,000 was already demonstrating in front of the Préfecture and singing the *Marseillaise*. By 7.30 a.m. the Préfecture had been taken over by paratroops and demonstrators without resistance, the Prefect (M. Savreux) had resigned, and a Committee of Public Safety was set up on the Algerian model under the presidency of M. Henri Maillot, a member of the Ajaccio Municipal Council and, like M. Arrighi, the possessor of a distinguished record in the wartime Resistance movement. M. Maillot, M. Serafini (a member of the committee) and M. Arrighi subsequently appeared on the balcony of the Préfecture and addressed cheering crowds demonstrating in favour of General de Gaulle and General Massu; M. Maillot said that the Ajaccio Committee of Public Safety had been "planned and prepared for a long time" in Algiers, and that all its members had been "approved there."

Enthusiastic demonstrations of support for General de Gaulle and for the Algiers Committee took place in Ajaccio and other Corsican towns on May 24-25; many thousands of people attended ceremonies at the War Memorials at Ajaccio and elsewhere, and the Cross of Lorraine (the wartime symbol of Free France under General de Gaulle's leadership) was prominently displayed. Colonel Thomazo and M. Delbecque flew from Algiers to Ajaccio on May 26 and were given a great welcome when they addressed large crowds.

All sea, air, telephone and telegraphic communications between Corsica and metropolitan France were cut off as a result of the *coup*, the news of which aroused consternation in Paris—particularly when it became known that a detachment of 160 security police, flown to the island from Nice to maintain order, had joined the revolt immediately on their arrival. On the other hand the news from Corsica was acclaimed by great crowds in Algiers.—(Le Monde - Le Figaro - Le Populaire - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 16245 A; 16183 A.)**

Note. Subsequent developments in the French crisis will be described in a later issue. (Ed. K.C.A.)

A. UNITED KINGDOM. — Junior Ministerial Appointments.

The following Government appointments were announced from 10, Downing Street on June 27: (*a*) Earl St. Aldwyn (45) as Captain of the Gentlemen-at-Arms and Government Chief Whip in the House of Lords in succession to the late Earl Fortescue, who died on June 14; (*b*) Earl Waldegrave (52) as Joint Parliamentary Secretary to the Ministry of Agriculture in place of Lord St. Aldwyn.

Lord St. Aldwyn is a member of a Gloucestershire family which has been prominent in politics since the 16th century, when his ancestor, Sir Michael Hicks, was secretary to Queen Elizabeth I's minister, Lord Burghley; his grandfather (the first earl, formerly Sir Michael Hicks Beach), was twice Chancellor of the Exchequer. Lord Waldegrave is Vice-Lieutenant of Somerset, and a well-known farmer and landowner in that county.—(Times) **(Prev. rep. 16127 C.)**

B. POLAND. — First Atomic Reactor.

The first Polish atomic reactor, built at Swierk (near Warsaw), was inaugurated on June 14. The reactor, known as *Ewa*, was supplied by the Soviet Union but was largely assembled by Polish engineers and scientists. With a capacity of 2,000 kilowatts, it was said to be similar to the Soviet-built reactors in Eastern Germany, Czechoslovakia, and Rumania.

Polish plans in the field of atomic energy include the operation of a cyclotron at Swierk (also to be supplied by the Soviet Union), as well as an institute for atomic physics, laboratories for reactor engineering, a central electronics workshop, and a radio-chemistry centre. It is also planned to construct a power-generating reactor within the next three or four years. (Polish Embassy Press Office, London) **(16106 D; 14220 B.)**

C. NEPAL. — Renewal of Agreement with Britain on Gurkha Recruiting Depot.

It was announced in Khatmandu on April 17 that the Anglo-Nepalese agreement of 1953, under which Britain maintains a Gurkha recruiting depot in Nepal, had been renewed for a further 10 years from July 1958, when it was due to expire. Under the agreement, Britain has built a depot at Dharan Bagar (south-east Nepal), at a cost of £1,000,000, at which some 500 Gurkha recruits are enlisted for the British Army every year. The 1947 tripartite agreement between Nepal, India, and Britain, governing the recruitment of Gurkha soldiers to the British and Indian armies for an unstipulated period, is still in force.—(Times - Daily Telegraph) **(Prev. rep. 13102 C; 8778 A.)**

A. UNITED KINGDOM.—New Zealand Complaint of Butter-dumping by Foreign Countries in U.K. Market. - Request for Imposition of Anti-dumping Duties. - British-N.Z. Discussions. - U.K. Restrictions on Belgian, Finnish, Irish, Polish, and Swedish Butter Imports.

The New Zealand Deputy Premier and Minister of Agriculture, Mr. Skinner, announced on Feb. 17 that the New Zealand Government was making an application to the Board of Trade in London for the imposition of anti-dumping or countervailing duties on butter imports into the United Kingdom from certain countries.

Mr. Skinner said that for some time past the N.Z. Government had been "very disturbed" at the effects on the butter market of supplies from a number of countries which were not regular suppliers of butter to the U.K., and in some of which the dairy industry was heavily subsidized. Finland, for example, had exported 20,218 tons of butter to the U.K. in 1957, compared with 9,389 tons in 1956 and practically nothing in 1955; the Irish Republic had supplied 14,473 tons in 1957, against 283 tons in 1956 and 1,035 tons in 1955; Swedish supplies of 14,082 tons in 1957 compared with 1,417 tons in 1956 and none in 1955; while Argentina had supplied 12,344 tons in the first 11 months of 1957, compared with 10,316 tons in 1956 and 7,306 tons in 1955. Supplies of butter from these four countries in 1957 had aggregated over 60,000 tons; with total U.K. butter imports at just over 300,000 tons, and British home production at about 30,000 tons, the quantities in question "must be one of the principal causes of the serious fall in prices" which had occurred in recent months.

"We feel that we have a strong case," Mr. Skinner declared, "as the level of wholesale prices in these European countries is far above the prices they receive on the U.K. market—e.g. the wholesale price of butter in the Irish Republic is approximately 430s. a cwt., in Finland 600s., and in Sweden 515s. This produce is placed on the U.K. market at 240s."

The Minister went on to explain that under the U.K. Customs Duties (Dumping and Subsidies) Act of 1957 [see 16189 A] special Customs duties might be imposed if goods were being dumped in the U.K. market, i.e. sold at less than domestic prices in the country of origin, or if they were being subsidized by the exporting country. In the former case an anti-dumping duty could be imposed, and in the latter a countervailing duty equivalent to the extent of the subsidy. The Act also allowed a third country, e.g. New Zealand, to apply for relief. In such a case the approval of the contracting parties to the General Agreement on Tariffs and Trade was necessary, where the countries concerned were GATT members, before anti-dumping or countervailing duties could be imposed; but there was provision for the immediate imposition of countervailing duties in an emergency, in anticipation of subsequent GATT approval.

Mr. Skinner pointed out that under the U.K. legislation the Board of Trade had to consider whether the imposition of anti-dumping or countervailing duties was "in the national interest of the United Kingdom." While there was little doubt that the greater part of the 60,000 tons of butter from marginal suppliers in 1957 had been dumped in terms of the Act, it remained necessary to convince the U.K. authorities that it was "in their national interest to invoke this legislation."

In conclusion, Mr. Skinner expressed the view (i) that "the catastrophic fall in butter and cheese prices over the past six to nine months" was one of the main causes of the present serious position of New Zealand's balance of payments; (ii) that there was "not much doubt that our ability to buy from the U.K. was gravely impaired" by this fall; and (iii) that "a contraction of our mutual trade is certainly contrary to the national interests of both countries."

[In a subsequent statement after his arrival in London—see below—Mr. Skinner said that the London price for New Zealand butter "ex store" had fallen from 350s. per cwt. to 206s. per cwt. in 18 months.]

It was announced in Wellington on March 27 that New Zealand had asked Britain to agree to immediate emergency talks on her complaint that foreign butter was being dumped in the U.K.; it was stated in London on the same day that the British Government would accept this request. [The agreement signed between Britain and New Zealand in May 1957—see 15994 A—provides for regular annual meetings in November of each year to discuss questions in connexion with their mutual trade, and also for additional meetings at any time at either Government's request.]

Meanwhile, a strong appeal to British trade unionists to stand by New Zealand in her present economic crisis by supporting her case against the dumping of low-priced dairy produce in the British market had been made on March 19 by the president of the New Zealand Federation of Labour, Mr. F. P. Walsh.

In a letter to Sir Vincent Tewson (secretary of the British T.U.C.) Mr. Walsh recalled New Zealand's help when Britain herself had encountered a balance-of-payments crisis immediately after the war. At that time New Zealand had introduced home rationing of meat and dairy produce to make possible larger exports of these products to Britain; a great popular movement had been inaugurated under the Aid-to-Britain campaign involving the voluntary despatch of millions of food parcels; New Zealand had made a gift to the U.K. of £12,500,000 in cash, together with £1,000,000 worth of food; and she had declined to sell her dairy produce at much higher prices to other European countries.

"We ask you," the letter went on, "to remember our response and to understand that Commonwealth ties have not been regarded by our people as hollow slogans . . . New Zealand is facing at present an economic crisis of which the improvement or otherwise will be closely affected by attitudes in the U.K. attitudes not only of Government leaders and of city businessmen, but of the people generally and of trade unionists in particular. As president of the N.Z. Federation of Labour . . . I am seeking the sympathetic understanding and help of the working people of Britain, trade union members, farmers, manufacturers, and other friends of New Zealand."

After pointing out that New Zealand's sterling reserves had fallen to £45,500,000 "well below the safety margin of £135,000,000 which was specified by a Royal Commission two years ago"—the letter went on to say that the rapid decline was due to the high level of imports and a continuing fall in the prices of dairy, meat, and wool exports. This was "the most menacing economic crisis in New Zealand since the depression of the early 'thirties," and it threatened "the welfare and living standards of our people." The British people could help "by understanding that one of the largest contributory factors of our difficulties is the dumping of dairy produce in the United Kingdom by such countries as Finland, Hungary, Sweden, Poland and Argentina"—countries which were "deliberately selling large quantities of butter and cheese at prices far below domestic selling prices."

"New Zealand can face fair competition," the letter said, "but this unfair trading is substantial enough to be a real threat to our welfare—and not only our welfare but that of British farmers who, like ourselves, have applied to the Board of Trade for the imposition of anti-dumping duties. Moreover, our reduced ability to buy British goods affects many workers in British industry. To N.Z. trade unionists this dumping, this deliberate under-selling, looks like 'scabbing' . . . We feel that we are not asking too much. We want your active interest and support in protecting New Zealand from a form of economic warfare being directed against us by countries to whom Britain has not the same obligations as she has to New Zealand. If unrestricted dumping is allowed to continue and we cannot obtain a reasonable price in the U.K., we have only one remedy. We will be driven into the position of having to make bilateral agreements with countries that will be prepared to pay us a reasonable price for our products . . ."

The Economic Committee of the T.U.C. decided on April 9 to recommend the General Council to support the N.Z. Government's case for measures to prevent the dumping of dairy produce in the United Kingdom.

A month earlier (March 11) the Danish Ambassador in Stockholm had informed the Swedish Government that Denmark officially supported New Zealand's protest against the dumping of Swedish butter in the British market. During April, leaders of the Australian dairy industry expressed grave concern over the collapse of Australian butter prices in the U.K. market as a result of dumping by other European countries; it was stated that Australian butter had recently been sold in British shops at 2s. 2d. a lb. and even at 1s. 11d. a lb., and that the Australian producers fully supported the New Zealand protest.

Meanwhile Mr. Skinner had arrived in London and opened discussions on April 14 with U.K. Ministers the British side being represented by Sir David Eccles (President of the Board of Trade), Mr. John Hare (Minister of Agriculture, Food, and Fisheries) and Mr. Alport (Parliamentary Under-Secretary of State for Commonwealth Relations). Further talks took place on May 5 and 13 between Mr. Skinner, Lord Home (Secretary of State for Commonwealth Relations), Sir David Eccles, and Mr. Vaughan-Morgan, Minister of State at the Board of Trade.

As a result of these discussions, Sir David Eccles informed the House of Commons on May 20 that the British Government had agreed to take action on the New Zealand complaint against butter-dumping in the United Kingdom.

Sir David said that the Government had considered the applications made by the N.Z. Government and the English Milk Marketing Board under the Customs Duties (Dumping and Subsidies) Act so far as they related to Finland, Sweden, and the Irish Republic, and that they were satisfied that the exports from these countries had been promoted by subsidies. The Government were still considering the application relating to Argentina. He continued:

"Subsidized imports have caused material injury to the New Zealand dairy industry. We have not found any such material injury to the dairy industry in this country. It is in the national interest to take action on the N.Z. application. Sweden and Finland, which are traditional suppliers of butter, have been asked either to eliminate the practices complained of or to keep their exports within agreed limits, which would begin to operate as from to-day.

"If they are unwilling to take either course, the Government will impose countervailing duties. As regards the Republic of Ireland, also a traditional supplier, we have requested the Government . . . to enter into consultations on a similar basis. I will make a further statement to the House as soon as we know what the three Governments concerned propose to do."

"Since the N.Z. application was made, imports of butter from Poland have increased sharply. It has therefore been decided that imports of Polish butter should also be limited. In addition, the open licence for imports of butter from Eastern Europe generally is being withdrawn.

"We estimate that, over a year, supplies of butter from the countries mentioned will be reduced by some 10 per cent on 1957, or about 40,000 tons. A reduction of this order will strengthen the market and be of substantial assistance to New Zealand."

Negotiations accordingly took place with the Governments of Sweden, Finland, and the Irish Republic—the last-named culminating in a ministerial meeting in London on June 13 in which Mr. Lemass (*Tanaiste* and Minister for Industry and Commerce), and Mr. Smith (Minister for Agriculture) took part on the Irish side and Lord Home and Sir David Eccles on the British side. Agreement was reached in all these talks, resulting in a voluntary limitation by the three countries of their butter exports to Britain. In consequence, Sir David Eccles announced on June 19 that the British Government had decided that in the circumstances it was not necessary to impose countervailing duties. His statement was as follows :

"The Governments of Finland and Sweden have agreed to limit their exports of butter to the U.K. in the 12 months commencing May 20 to 75 per cent of their average exports in 1936-1938 or 1955-1957, whichever is the higher.

"The Government of the Irish Republic estimated that the export of butter to the U.K. will be less than it has been recently. We agreed that the two Governments will consult together if it appears likely that actual exports in the 12 months from May 20 may exceed the total exported in 1957.

"I have also considered the application by the New Zealand Government relating to Argentine butter, and decided that a case of subsidization has been made. As, however, the quantity of butter imports from Argentina this year is expected to be substantially less than 75 per cent of shipments in 1955-1957, there is no need at present for any further action. Should the position change, the matter would have to be reconsidered.

"In these circumstances the Government have decided that it is not necessary to impose countervailing duties."

Sir David added that the Government had gone a good way to meet the New Zealand case, and he thought that the N.Z. Government on the whole appreciated what had been done. None of the exporting Governments concerned appeared willing to give up its subsidy practices but had preferred, as they were given the alternative, to restrict the amount of exports. H.M. Government would watch the butter market and, if necessary, would take further action.

It was stated in Dublin, Helsinki, and Stockholm respectively that under the new arrangements butter exports to the U.K. in the year ending May 20, 1959, would amount to 14,000 tons from the Irish Republic, 7,620 tons from Finland, and 8,000 tons from Sweden.

Mr. Skinner, in a statement on June 20, said that it was expected (i) that the countries concerned in New Zealand's complaint would under the new arrangements export 65,000 tons of butter to the U.K. during the year ending May 20, 1959 ; (ii) that the total of individual import quotas would be 34,500 tons, reducing by 30,500 tons the amount that would have been shipped otherwise ; and (iii) that an estimated drop in Argentine butter exports of 8,000 tons, and a fall in Belgian exports, would bring the total reduction to about 40,000 tons—the figure mentioned by Sir David Eccles.

Prior to these developments, the Board of Trade had announced on May 16 that the open general licence for butter imports from other O.E.E.C. countries had been temporarily withdrawn so far as Belgium was concerned, pending discussions with the Belgian Government.

The statement said that H.M. Government had received reports that 1,000 tons of butter from Belgian surplus stocks was being offered on the U.K. market, although Belgium was not a normal supplier of butter to the United Kingdom. The Government's action was based on information received by the National Farmers' Union. The Belgian butter was to be sent to Britain at 1s. 3d. to 1s. 4½d. a lb.—a price far lower than the current market rate, and also far below the domestic price in Belgium itself.

Although both Mr. Skinner and Mr. Nash (the N.Z. Prime Minister) had initially expressed "disappointment" at the U.K. Government's decision not to impose countervailing or anti-dumping duties immediately on imports of dumped butter, as requested by New Zealand, the arrangements eventually made with Finland, Sweden, and the Irish Republic, as well as the measures taken in the case of Belgium and Poland, were received with satisfaction in Wellington.

On returning to Wellington from London, Mr. Skinner said in a broadcast on June 11 that New Zealand could "not under-estimate the value of what the British Government proposes to do." In his opinion, "four very important principles" had been established which would "in the long term be a very considerable advantage to New Zealand." First, there was the application of quotas to butter-dumping countries and the U.K.'s willingness to use its anti-dumping legislation to force those countries to accept such quotas. Secondly, there was the withdrawal of open general licences covering Belgium and all the Eastern European countries—"again a very great advantage to us." The third principle was the U.K. Government's agreement that, by their action, the price of butter on the U.K. market should rise to 2s. 9d. or 3s. 0d. a lb. by November 1958, "thus implying that such a price would be a reasonable one to accept under the circumstances." The fourth point was the right to review the position in November, "or indeed at any time that we wish."

Mr. Skinner added : "Though it is not all we expected to achieve, I nevertheless feel that when the effects of the British Government's proposals can be fully experienced it will result in a far greater advantage to us than we first thought. I believe we have gone a long way in establishing principles which will be a guide in future years to the marketing of our dairy products in the United Kingdom."

British Butter Imports.

The following table, published by *The Times* on May 21 and based on figures supplied by the Ministry of Agriculture, shows the changing pattern of U.K. butter supplies :

From :	Jan.-March 1958 '000 tons	Jan.-March 1958 per cent	Jan.-March 1957 '000 tons	Jan.-March 1957 per cent	1956 per cent	1934-38 per cent
New Zealand .	50	40	54	44½	41	28
Australia . .	17	14	27	22	20	18
Eire . .	5	4	2	1½	—	4
Argentina . .	3	2½	7	6	3	1
Denmark . .	20	16	19	16	23	23
Finland . .	4	3	4	3	3	1½
Netherlands . .	5	4	3	2½	2	6
Sweden . .	3	2½	2	1½	—	2
Poland . .	6	5	—	—	—	1
Home output, etc.	11	9	4	3	8	15½
Total . .	124	100	122	100	100	100

New Zealand now has a larger share of the U.K. butter market than in 1934-38, though its share declined between 1956 and 1957. Finland, Sweden, and the Irish Republic together have a larger share of U.K. supplies than in 1934-38, but the effect of the new proposals will be to reduce their share to below the pre-war level. Home production of butter has been rising steadily, reaching 34,000 tons (9 per cent of total supplies) in 1957 against 20,000 tons (4 per cent of total supplies) in 1934-38.

Trends of World Butter Production and Consumption.

Following a meeting of the European regional committee of the International Federation of Agricultural Producers, which ended in London on April 12, a resolution was published which had been unanimously adopted by the representatives of the following butter-producing countries : Australia, New Zealand, Denmark, Finland, France, Luxemburg, the Netherlands, Norway, Sweden, and the United Kingdom.

The resolution said that after an examination of recent trends, it had been agreed that present difficulties experienced by producers arising from falling butter prices and heavy stocks were attributable to (*a*) the increase in world butter production, due partly to higher milk yields per cow, partly to a higher natural butter-fat content, and partly to the fact that certain countries had standardized the butter-fat content of milk for liquid consumption at a low level, resulting in an increased quantity of butter-fat available for manufacture ; (*b*) the reduction in domestic butter consumption in certain countries, which caused some exporting countries to seek expanded sales abroad and some importing countries to reduce or restrict imports ; (*c*) the rise in butter output in some traditionally importing countries ; (*d*) the fact that the U.K. was virtually the only country to allow butter to enter without restriction of quantity and with a low import duty ; (*e*) an increase in margarine consumption in most countries in relation to that of butter.

The meeting agreed to recommend to Governments and marketing associations that immediate steps should be taken to :

"(1) Secure a significant increase in butter consumption in all producing countries by effectively narrowing the gap between prices of butter and margarine in countries where this is excessive, and to extend publicity campaigns and other effective means ;

"(2) Raise the fat content of milk sold for liquid consumption in countries where standardization, especially at a low level, is now practised to as near the natural level as possible, and to take all possible steps to increase the consumption of liquid milk ; and

"(3) Promote the use of milk and milk products for welfare purposes, e.g. for school programmes."

As a result of the measures taken by the U.K. Government, Finland and Sweden approached the Soviet Union with a view to diverting some of their butter exports to that country. (Times - Daily Telegraph - Financial Times - Directorate of Information, Wellington - N.Z. Department of External Affairs - Irish Times, Dublin - Svenska Dagbladet, Stockholm - Australian News and Information Bureau) **(Prev. rep. U.K.-N.Z. Trade Agreement, 15594 A ; New Zealand Import Restrictions, 15985 A ; U.K. Customs Duties (Dumping and Subsidies) Act, 16189 A.)**

A. JAPAN. — Atomic Energy Agreements with Britain and United States. - Purchase of Atomic Reactor from Britain.

Agreements on co-operation in the peaceful uses of atomic energy were signed by the Japanese Government on June 16 with Great Britain and the United States.

Anglo-Japanese Agreement. This agreement, which will enable Japan to buy a British atomic reactor and the nuclear fuel to operate it, covers the exchange of unclassified technical information, the possibility of British assistance in building Japanese plants for manufacturing fuel elements and processing used fuel, and the provision of training facilities in the United Kingdom for Japanese scientists and technicians. Safeguards are provided to ensure that material and equipment are not used for military purposes. Fissionable materials recovered from or produced through the use of material or equipment supplied will be at the disposal of the Japanese Government. When not immediately required by Japan they will be held in stores designated by the U.K. Atomic Energy Authority, either in Japan or the United Kingdom.

The Authority will have the first option on any such material which the Japanese Government does not need for its own peaceful programme, but any material not taken up by the Authority may be transferred to a third country or to an international organization by agreement between the two Governments.

In case of accidents the Japanese Government will indemnify the Atomic Energy Authority against liability to any third party for damage attributable to the production and manufacture of nuclear fuel which might occur after delivery to the Japanese Government. The agreement will remain in force for 10 years.

U.S.-Japanese Agreement. Under this agreement the U.S. Government undertook to make available to Japan, as needed over a 10-year period, a net amount of 2,700 kilograms of Uranium-235 for use in research, experimental power, and power reactors. The uranium will be either sold or leased to Japan.

Prior to the signing of the Anglo-Japanese agreement, the head of a mission sent to Britain by the Japanese Atomic Power Generation Company (Mr. D. Yasukawa) had announced in London on Feb. 19 that his mission had issued official specifications for the purchase of a British-type nuclear power plant with an output of 150 megawatts. He stated that tenders would be invited from the General Electric—Simon-Carves Atomic Energy Group, the A.E.I.—John Thompson Nuclear Energy Company, and the English Electric, Babcock and Wilcox, and Taylor Woodrow consortium. It was expected that the construction of Japan's first nuclear power station, to be sited at Tokai (68 miles north-east of Tokio), would begin in October next and be completed in 1963.

The Japanese decision to buy a reactor of the British "Calder Hall" type was based on a recommendation by a mission which visited Britain in the autumn of 1957; this recommendation ended a prolonged controversy in Tokio as to whether Japan should buy its first reactor for a power station from Britain or the United States. An important Japanese requirement was that the reactor should be "earthquake-resistant."

Creation of Japanese Atomic Power Company. - Opening of First Experimental Reactor.

The Japanese Government decided on Sept. 3, 1957, to establish a new company, in which both the Government and private enterprise would participate, for the import and operation of nuclear power reactors. The company—known as the Atomic Power Generation Company—would have an initial capital of 1,000,000,000 yen (£1,000,000), of which 20 per cent would be contributed by the Government-owned Electric Power Resources Development Corporation, 40 per cent by the nine major power companies in Japan, and the remaining 40 per cent by the principal manufacturers of electric appliances and by private subscribers. Despite its relatively small capital investment, the Government reserved the right of final control over the company's policies, including the right to approve appointments to executive positions.

Japan's first experimental atomic reactor, supplied by the U.S.A., was opened at Tokai in September 1957.—(Times - Manchester Guardian - Financial Times - New York Times)

B. NETHERLANDS - SOVIET UNION. — Direct Air Service between Amsterdam and Moscow.

A civil aviation agreement between the Netherlands and the Soviet Union was signed in The Hague on June 17, providing for the opening of a weekly air service between Amsterdam and Moscow. The service will be operated by Royal Dutch Airlines (K.L.M.) using Douglas DC-6B aircraft and by the Soviet *Aeroflot* line using TU-104 planes.—(Netherlands News Agency - Soviet Embassy Press Department, London)

C. AUSTRALIA - NEW ZEALAND. — Prime Ministers' Meeting. - Australian Aid for New Zealand. - £10,000,000 Credit for N.Z. Imports. - Agreement on Standardization of Defence Equipment.

The Prime Minister of New Zealand, Mr. Nash, visited Sydney on June 14-15 for discussions with the Australian Federal Prime Minister, Mr. Menzies. Mr. Nash was accompanied by the N.Z. Minister for Industries and Commerce, Mr. McIntosh. A communiqué issued on June 15 announced:

(1) The two Prime Ministers had agreed "in principle on certain proposals" whereby Australia would be able to give immediate financial aid to New Zealand to help her in her economic difficulties; these proposals would be worked out "in more detail" and a further statement issued as soon as possible.

(2) It had also been agreed "to modify some of New Zealand's financial commitments in relation to forces stationed with the Commonwealth Strategic Reserve in Malaya.

(3) Officials of both countries would meet in Wellington early in July to consider the renewal of the present trade agreement with a view to increasing their mutual trade, and to discuss means of easing the pressure on New Zealand's balance of payments.

In a press statement on his arrival in Sydney Mr. Nash had said that New Zealand would have to borrow more money than ever before from oversea countries to counter the problems of falling export income and rising import costs. He advocated a joint approach by Australia and New Zealand to open new markets in South-East Asia, and pleaded for Australian assistance in backing New Zealand's moves to bring about a modification of the list of strategic goods embargoed for trade with China.

After the meeting Mr. Nash pointed out that New Zealand purchases from Australia in 1957 had totalled £A44,000,000, whilst her exports to Australia had been only £A12,000,000; there was thus an adverse trade balance of £A32,000,000, compared with one of £A21,000,000 in 1954.

Mr. Menzies announced on July 1 that as a result of his discussions with Mr. Nash the Commonwealth Bank, at the request of the Australian Government, would grant the Reserve Bank of New Zealand a credit of £A10,000,000. The credit would be used during the year 1958-59 to finance N.Z. payments in Australia, and would be repayable in instalments over a number of years.

In a statement on June 17 Mr. Nash announced that an agreement to standardize defence equipment had been informally reached during his talks with Mr. Menzies. Mr. Nash pointed out that such a standardization would be "good economy for both countries"; it would not mean, however, that New Zealand must buy all her equipment from Australia, and she could still buy "where the market is most favourable." He added that Australia would make most of the equipment, but New Zealand would also manufacture some items for Australia, including radio equipment and heavy vehicles. (Australian News and Information Bureau - Directorate of Information, Wellington) **(Prev. rep. New Zealand Exchange Position, 15985 A; Defence Talks, 15815 A.)**

D. INDIA. — Gradual Introduction of Metric System.

The Indian Minister of Commerce (Mr. Kanungo) announced on June 26 that the metric system of weights would be introduced on July 1 in the jute industry and from Oct. 1 in trade generally in certain selected areas, and also for certain limited purposes in Government departments and in the major industries. During a transitional period of two years, however, the use of existing weights would be allowed in these sectors: for the jute industry until July 1, 1960, and for other industries until Sept. 30, 1960. Mr. Kanungo added that the second stage of the change-over would be the introduction of metric linear and capacity measures, which was likely to take place during 1959.

The Government's decision to introduce the metric system of weights in certain industries was based on the Weights and Measures Act, which had been passed by the Indian Parliament in 1956 after it had been considered by a joint committee of both Houses. The Act provides for the completion of the change-over within 10 years of its adoption by Parliament, and for the use of international terms for the new metric units.

Prior to Mr. Kanungo's statement it had been announced in Delhi on Nov. 21, 1957, that the metric system of weights and measures would be adopted in marketing chemical products as from April 1, 1958.—(The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. 15588 B.)

JULY 5—12, 1958

A. ITALY.—General Election. - Signor Fanfani forms New Coalition Government.

General elections for a new Chamber of Deputies and a new Senate were held in Italy on May 25-26, following the dissolution of both Houses of the Italian Parliament in March (see 16091 E).

Voting took place under the electoral reform legislation of 1956 (see 14879 A) which restored the system of "straight" proportional representation in the Chamber of Deputies, without the possibility of presenting joint party lists or of special allocations of seats to parties or coalitions polling more than one-half of the total vote.

All men and women over 21 were entitled to vote in the elections for the Chamber, each elector choosing a party list as a whole but being entitled to show preferences for candidates within the local list. There were 32 electoral districts, each returning one deputy for every 80,000 inhabitants. Whereas the former Chamber had 590 deputies, the membership of the new Chamber was increased to 596 because of the rise in population. The electorate totalled 32,506,417, including 16,897,158 women (52.1 per cent). There were 5,980 candidates presented by 86 parties, of whom, however, only 10 parties were on a national level.

In the elections for the Senate all men and women over 25 were entitled to vote, electors casting their vote for a candidate in the first instance and not for a party list. There were 19 electoral districts, each returning one senator for every 200,000 inhabitants. Because of the larger population, the membership of the new Senate was 246, compared with 237 in the former Senate. The electorate for the Senate numbered 29,224,134, including 15,253,015 women (52.3 per cent). There were 1,945 candidates.

Party strengths in the former Chamber were as follows at the dissolution: *Centre parties*—Christian Democrats 263; Social Democrats 19; Liberals 13; Republicans 5; South Tirol People's Party 3. *Left-wing parties*—Communists 143; Left-wing Socialists 75. *Right-wing parties*—Monarchists 40; Italian Social Movement (neo-Fascists) 29.

The Christian Democrats fought the elections for the first time without being in coalition with the other Centre parties—the Social Democrats, Liberals, and Republicans—although they stressed that they were aiming at a "new solidarity" with all "homogeneous" parties after the elections. The Communists and Nenni (Left-wing) Socialists likewise fought the elections independently, the Socialists having previously rejected an appeal by the Communists for the restoration of their former alliance. The Republicans contested the elections jointly with the new Radical Party, which had been formed in December 1955 after the secession of certain left-wing members from the Liberal Party. The Monarchists were divided between the Popular Monarchists (led by Signor Lauro, the ex-Mayor of Naples) and the National Monarchists (led by Signor Covelli), from whom the Popular Monarchists seceded in 1954—see 13633 B.

The *Communità* Movement, founded and led by Signor Adriano Olivetti (head of the typewriter concern at Ivrea, near Turin), contested the elections for the first time. The Movement—officially the "Community of Culture of the Workers and the Peasants"—is a left-centre group advocating a "non-Marxist Christian Socialism" and an intensified campaign against unemployment and poverty in Southern Italy on a largely co-operative basis. Another small group, the Independent Left (*Sinistra Independente*)—an offshoot of the Nenni Socialists—also participated in general elections for the first time.

The Christian Democrats were strongly supported by the Roman Catholic Church, which exhorted its members to give their votes solely to Christian Democratic candidates. The Communists, on the other hand, waged their campaign on opposition to "clerical totalitarianism."

The new deputies were elected for a five-year term and the Senators for six years. In addition to the 246 elected Senators there were another six Senators appointed for life, making the total membership of the Senate 252.

Voting was extremely heavy throughout the country, the number of voters going to the polls being given as over 93 per cent. The final election results were announced on May 27 as follows, comparison being given with the results of the last (1953) general elections:

Chamber of Deputies.

Parties	1958 Votes	1958 Per-centage	1958 Seats	1953 Votes	1953 Per-centage	1953 Seats
Christian Democrats	12,508,674	42.2	273	10,836,675	40.0	262
Communists	6,700,812	22.7	140	6,121,922	22.6	143

†See footnote to Chamber of Deputies results above.

Voting results for the Chamber of Deputies election in the six principal cities were as follows:

Rome—C.D. 377,546; Com. 256,459; Soc. 145,200; S.D. 37,391; Lib. 51,709; Nat. Mon. 47,589; Pop. Mon. 54,352; Rad. 28,619; M.S.I. 146,959.

Milan—C.D. 284,456; Com. 191,177; Soc. 169,056; S.D. 86,116; Lib. 88,839; Nat. Mon. 20,447; Pop. Mon. 26,010; Rad. 16,254; M.S.I. 48,446.

Naples—C.D. 192,103; Com. 147,092; Soc. 40,713; S.D. 8,129; Lib. 11,912; Nat. Mon. 7,140; Pop. Mon. 156,728; Rad. 3,070; M.S.I. 20,336.

Turin—C.D. 201,394; Com. 189,236; Soc. 84,252; S.D. 56,666; Lib. 39,276; Nat. Mon. 18,811; Pop. Mon. 8,401; Rad. 9,467; M.S.I. 19,531.

Genoa—C.D. 169,622; Com. 124,539; Soc. 105,076; S.D. 32,867; Lib. 24,546; Nat. Mon. 6,252; Pop. Mon. 2,986; Rad. 9,214; M.S.I. 24,708.

Bologna—C.D. 82,135; Com. 107,757; Soc. 37,423; S.D. 27,643; Lib. 16,880; Nat. Mon. 2,012; Pop. Mon. 1,971; Rad. 4,680; M.S.I. 11,023.

The results were interpreted in the Italian Press as a slight overall movement from the Right to the Centre and from the Centre to the Left, with the Christian Democrats appreciably strengthening and the two left-wing parties fully maintaining their positions.

On the Right, the neo-Fascist vote fell by 1.1 per cent of the total vote as compared with the 1953 elections, the regression being particularly notable in the South. Both Monarchist parties suffered a serious setback, which was all the more unexpected in view of the success of Signor Lauro's Popular Monarchists in the Sardinian regional elections of 1957 [see below].

The lost Monarchist and neo-Fascist votes were believed to have gone either to the Christian Democrats or to the Liberals. The latter increased their poll by 0.5 per cent of the total vote, or one-seventh of their total voting strength in 1953—thereby halting the steady regression which they had suffered in previous elections. Liberal gains were particularly notable in Milan.

The Christian Democrats secured an absolute majority in the Senate, though failing to do so in the Chamber. In spite of having been in office uninterruptedly since the war, they nevertheless increased their percentage of the overall vote for the Chamber from 40 to 42.2—the largest percentage increase of any party.

Of the other Centre parties, the Social Democrats showed a very slight advance, but the Republicans, despite their alliance with the Radicals, suffered a reverse, especially in south-central Italy. It was believed that a number of their former followers had voted for the Nenni Socialists.

Of the Left-wing parties, the Nenni Socialists, though losing votes to the Communists, were believed to have gained votes from the Republicans. Their voting percentage in the Chamber elections rose from 12.7 to 14.2, but it was pointed out that they had been supported by two small left-wing groups—the *Unione Socialisti Indipendenti* and *Unità Popolare*—which in 1953 had put up candidates of their own and together polled 1.4 per cent of the total vote; making allowance for this, the actual percentage increase of the Nenni Socialists was only 0.1.

The Communists fully maintained their position in spite of the serious loss of members since the 20th Congress of the Soviet Communist Party and M. Khrushchev's attacks on Stalinist policy. [At a congress of the Italian Communist Party in April, it was stated that the party's membership in 1957 had declined by 200,000 to 1,820,000, compared with a membership of over 2,000,000 in 1956.] The Communists were nevertheless believed to have gained considerable additional support from left-wing Socialists who were dissatisfied with Signor Nenni's policy.

Chamber of Deputies.

Leading political personalities re-elected to the Chamber of Deputies and the Senate included the following.

Prominent Christian Democrats re-elected included Signor Fanfani, the party's secretary-general; Signor Pella, Deputy Premier and Foreign Minister in the Zoli Government, and a former Prime Minister; Signori Scelba and Segni, both former Prime Ministers; Signor Leone, president of the former Chamber; Signor Tambroni, the Minister of the Interior; Signori Andreotti, the Finance Minister; Signor Taviani, the Defence Minister; Signor Gonella, the Minister of Justice; Signor Togni, the Minister of Public Works; Signor Rinaldo, Minister without portfolio; and Signor La Pira, the mayor of Florence.

Signor Palmiro Togliatti and Signor Pietro Nenni, the respective secretaries-general of the Communist and Socialist parties, were both re-elected. Among the re-elected Social Democrats were Signori Saragat and Romita, as well as Signori Simonini and Tremelloni, both former Ministers.

Among prominent Liberals re-elected to the Chamber were Signor Malagodi, the party's secretary-general; Dr. Gaetano Martino, the former Foreign Minister; and Signor De Caro, also a former Minister. Signor Achille Lauro (formerly a senator) was elected to the Chamber for the Popular Monarchists, while Signor Covelli (secretary-general) was re-elected for the National Monarchists. The most prominent Radicals re-elected were Signori Pacciardi and Ugo La Malfa, both former Ministers. The neo-Fascist deputies re-elected included Signor De Marsanich, the party's secretary-general. Signor Olivetti was the only candidate of the *Communità* movement elected to the Chamber of Deputies.

Senate.

Prominent Christian Democrats re-elected included Signor Merzagora, president of the former Senate, who obtained the highest number of votes in the Senate elections; Signor Zoli, the outgoing Prime Minister; Signor Attilio Piccioni, a former Foreign Minister; Signor Medici, the Treasury Minister; and Signor Crespellani, president of the Sardinian Region, who entered the Senate for the first time. Among prominent Communists elected to the Senate was Signor Pietro Secchia, and among Socialists Signor Ferruccio Parri, a member of several post-war Cabinets and a former member of the Republican Party.

The new Senate will only have three women members. Signora Angelina Merlin (Socialist), sponsor of the anti-brothel legislation [see 16061 E], was not re-elected.

Following the resignation of Signor Zoli's Cabinet on June 19, Signor Fanfani (the secretary-general of the Christian Democratic Party) was asked by President Gronchi on June 25 to form a new Government. After discussions with the leaders of all "democratic centre" parties he obtained the support of the Social Democrats, and on July 1 submitted the following Cabinet list to the President (abbreviations: C.D.—Christian Democrat; S.D.—Social Democrat):

Signor Amintore Fanfani (C.D.) ..	Prime Minister and Foreign Affairs.
Signor Antonio Segni (C.D.)	Deputy Premier and Defence.
Signor Giulio Pastore (C.D.)	Minister without portfolio for the Economic Development of Southern Italy and Depressed Areas.
Signor Camillo Giardina (C.D.) ..	Minister without portfolio for Administrative Reform.
*Signor Rinaldo Del Bo (C.D.) ..	Minister without portfolio for Relations with Parliament.
*Signor Fernando Tambroni (C.D.) ..	Interior.
*Signor Guido Gonella (C.D.)	Justice.
†Senator Giuseppe Medici (C.D.) ..	Budget.
Signor Luigi Preti (S.D.)	Finance.
†Signor Giulio Andreotti (C.D.) ..	Treasury.
*Signor Aldo Moro (C.D.)	Education.
*Signor Giuseppe Togni (C.D.) ..	Public Works.
Signor Mario Ferrari Aggradi (C.D.) ..	Agriculture and Forests.
*Senator Armando Angelini (C.D.) ..	Transport.
Signor Alberto Simonini (S.D.) ..	Posts and Telecommunications.
†Senator Giorgio Bo (C.D.)	Industry and Commerce.
Signor Ezio Vigorelli (S.D.)	Labour and Social Welfare.
†Signor Emilio Colombo (C.D.) ..	Foreign Trade.
Signor Giuseppe Spataro (C.D.) ..	Merchant Marine.
Senator Edgardo Lami Starnuti (S.D.)	State Investments in Industry.

*No change.
†Held different portfolio in Zoli Cabinet.

The new Government, which was sworn in on July 2, thus consists of 16 Christian Democrats and four Social Democrats. It was stated that Signor Fanfani also intended to appoint a Minister of Health. Five of the Cabinet members held ministerial office for the first time.

Signor Fanfani, leader of the left wing of the Christian Democrats (the *Iniziativa Democratica*), has been secretary-general of the party since July 1954, when he succeeded the late Signor De Gasperi [see 13687 B]. The electoral success of the Christian Democrats in the present elections was largely attributed to his leadership of the party organization. [For biographical details of Signor Fanfani, including his 11-day premiership in 1954, see 13421 A.]

Signor Segni was Prime Minister of the Christian Democratic-Liberal-Social Democratic coalition government which held office from July 1955 to May 1957; a Sardinian, he is regarded as one of the "elder statesmen" of the Christian Democratic Party. [For biographical details see 14320 A].

Signor Pastore is secretary-general of the *Confederazione Italiana dei Sindicati dei Lavoratori* (CISL), the largest non-Communist trade union federation [see 10706 B]. A former textile worker, he is the first prominent trade unionist to enter the Government in Republican Italy, and his inclusion in Signor Fanfani's Cabinet was therefore regarded as an important development.

Signor Andreotti, one of the younger Christian Democratic leaders, was Minister of Finance in the Zoli Cabinet, while **Senator Medici** was in charge of the Treasury.

Prior to the general elections, regional elections had been held in Sardinia in June 1957 and in the Trentino-Upper Adige region in 1956.

Sardinia. In the Sardinian elections, which took place on June 17, 1957, the Christian Democrats obtained 31 seats, the Communists 13, the Nenni Socialists 6, the Popular Monarchists 6, the Sardinian Action Party (affiliated to the Nenni Socialists) 5, the National Monarchists 4, the M.S.I. 3, the Liberals 1, and the Social Democrats 1.

In the previous regional Parliament (which had 65 seats against 70 in the new one) the distribution of seats was: Christian Democrats 30, Communists 15, Nenni Socialists 5, Monarchists 5, M.S.I. 4, Sardinian Action Party 4, Liberals 1, and Social Democrats 1.

The Communist vote dropped from 22.3 to 17.5 per cent of the total, while the Nenni Socialist vote increased from 8.8. to 9.5 per cent. The Christian Democrats' percentage was 41.7, against 41 in 1953. The biggest gains were registered by the Monarchists - especially the Popular Monarchists headed by Signor Lauro, who secured over 60,000 votes, or about 9 per cent of the total.

Trentino-Upper Adige. These elections, held on Nov. 11, 1956, resulted in the following distribution of seats (former party strengths in parantheses): *Trentino Province*—Christian Democrats 18 (17); Nenni Socialists and Social Democrats 4 (4); Tirol People's Party 1 (2); Communists 1 (1); Liberals 1 (0); M.S.I. 1 (1). *Bolzano Province*—South Tirol People's Party 15 (15); Christian Democrats 3 (3); Nenni Socialists 1 (1); Social Democrats 1 (1); Communists 1 (1); M.S.I. 1 (1).

The Regional Council for the whole region—consisting of the deputies of both provincial Diets—therefore consists of 21 Christian Democrats, 15 South Tirol People's Party, 6 Nenni Socialists and Social Democrats, 2 Communists, 2 M.S.I., and one member each from the Tirol People's Party and the Liberals.

Under the post-war Republican Constitution, four regions were created enjoying autonomy in certain internal matters and possessing their own regional parliaments—Sardinia, Sicily, Trentino and Upper Adige (South Tirol), and the Val d'Aosta.—(Giornale d'Italia, Rome - Corriere della Sera and Corriere d'Informazione, Milan) **(Prev. rep. General Elections, 13017 A; Electoral Reform, 14879 A; Regional Elections, 14251 A; Cabinet, 15671 A.)**

A. UNITED KINGDOM. — Relaxation of "Credit Squeeze." - Control of Bank Advances ended. - Introduction of "Special Deposit" System when Necessary. - Changes in Capital Issues Control. - Increase in Initial Allowances for Industry.

The Chancellor of the Exchequer, Mr. Heathcoat Amory, announced in the House of Commons on July 3 important relaxations of the existing credit restrictions, notably :

(1) The ending as from July 31 of the obligation by banks to restrict the total level of their advances to any given figure. Control over total advances by the banks will in future be retained by normal monetary measures, reinforced by a new arrangement whereby the Bank of England will, if necessary, restrict the liquidity ratio of the banking system by calling for "special deposits."

(2) Modification of capital issues control by the Capital Issues Committee, including (i) the restoration of the exemption limit from the present level of £10,000 to the former level of £50,000 ; (ii) the removal from the purview of the Capital Issues Committee of the appropriateness of bank finance for capital purposes ; (iii) the exemption from the Committee's control of bonus issues for the capitalization of reserves, although—to avoid tax evasion—Treasury consent will still be needed where the issue of redeemable securities is involved ; (iv) the application of a broader view by the Committee in examining capital issue proposals still needing its consent.

Mr. Heathcoat Amory began by recalling a statement he had made during the Committee stage of the Finance Bill [see below] that the Government's economic objectives—"to put the strength of sterling, the soundness of our international position, and price stability first"—were "fundamental and unchanging."

He went on : "I said at the time that we would keep the policies by which we intend to reach those objectives flexible. We must in particular make sure that we go ahead as fast as conditions allow in those activities which concern our export trade and in industrial investment. That was in relation to initial allowances. I consider that the time has come when, with the same objectives and without modifying these basic aims of policy, we can safely make some limited relaxations in the control of borrowing.

"As regards bank credit, I have decided that I need not ask the banks to restrict the total level of their advances to any given figure after the end of July. For the future I hope to dispense with official requests to restrict total advances and to retain control over bank credit by normal monetary measures, reinforced by a new arrangement under which the Bank of England will, if need be, restrict the liquidity of the banking system by calling for special deposits.

"This will be a temporary arrangement pending the recommendations of the Radcliffe Committee, to which we look for advice about any permanent changes. But it will be available in the meantime if existing monetary instruments are not sufficient to secure the necessary control over the credit system. These arrangements are recorded in more detail in correspondence between the Governor of the Bank of England and myself [see below].

"In the second place I have decided to make adjustments in the scope of the capital issues control, they are set out in a letter to the chairman of the Capital Issues Committee. At the same time the Treasury has made an Order, operating tomorrow, amending the Control of Borrowing Order. Briefly summarized, the new provisions are :

(1) The Committee may take a longer view in examining proposals which come before them. Instead of limiting their contents to proposals which are currently urgent, they may assent to applications which anticipate future needs.

(2) In view of the new arrangements for securing the necessary control of bank credit, the Credit Issues Committee will no longer be concerned with the appropriateness of bank finance for capital purposes.

(3) The exemption limit will be restored from the present level of £10,000 to the former level of £50,000.

(4) Bonus issues or capitalization of reserves will no longer come before the Capital Issues Committee. But where the issue of redeemable securities is involved, the consent of the Treasury will be needed.

(5) The amending Order contains provisions to prevent the raising of new money outside the control.

"I need only add that we are determined not to return to inflationary conditions," the Chancellor concluded. "But it is clearly right to encourage such sound development as we judge to be within our capacity. That is the main purpose of these measures."

The documents detailing the new arrangements to which the Chancellor referred were published on the same day, as follows :

Chancellor's Letter to Governor of Bank of England (July 1).

"On Sept. 19 last my predecessor stated that the situation required that the average level of bank advances during the coming 12 months should be held at the average level for the preceding 12 months. He informed the clearing bankers of this requirement, and they gave their assurance that, in spite of the difficulties, they would intensify the restriction of credit and do their best to achieve this result. Similar support was given by the British Bankers' Association and other banking associations and committees concerned.

"In my Budget statement on April 15 I thanked the banks for the co-operation which they have shown in keeping down the level of advances fully in accordance with the undertakings which they gave to my predecessor : and I asked them to continue that policy.

"After reviewing the developments of the past few months, I have now concluded that the situation does not require that I should renew Mr. Thorneycroft's request in September and that some gradual relaxation between now and then is justified. I have therefore decided that I need not ask the banks to restrict the total level of bank advances to any given figure after the end of July.

"At the same time, I trust that the banks, in framing their advances policy, will have regard to the revised guidance that I have given to the Capital Issues Committee in my letter of to-day . . . regarding the treatment of applications for which the consent of the Treasury is required.

"I should like to stress the importance which I attach in present circumstances to the provision of credit for export business, whether in the ordinary course of business or through medium-term financing under E.C.G.D. guarantee.

"I also wish to re-emphasize the hope which I expressed in my Budget statement that projects for sound development in areas where unemployment is substantially above the average should not be held back by lack of credit or finance.

"As to the future, it would be clearly wise to await the recommendations of the Radcliffe Committee before considering any permanent changes in the methods of influencing the volume of bank lending. I regard it as essential, however, that in the interim period some provisional method should be at hand to reinforce the existing machinery of interest rates, and open market operations if it should again prove necessary to restrain an increase of total bank advances.

"Both the Bank of England and the banking organizations have repeatedly impressed upon H.M. Government that the method of 'official request' made to the banks several times in recent years to restrict total advances, although it had proved efficacious for short periods, hampers the efficient working of the banking system and is thus damaging both to the banks and to the public interest if carried on for too long or too frequently renewed.

"I accept this view and I should therefore be grateful if the Bank of England would between how and the end of July prepare an alternative scheme which could if necessary be introduced as a temporary measure pending the Radcliffe Committee's report . . ."

Governor's Reply to the Chancellor (July 3).

"I have informed the banking associations and committees concerned of the terms of your letter of July 1.

"You ask that an alternative scheme should be prepared for use to reinforce the existing machinery of interest rates and open market operations if it should again prove necessary to restrain an increase of total bank advances. The Bank of England have now drawn up the heads of a scheme for 'special deposits' which could be available for introduction as a temporary measure pending any recommendations which may be made by the Radcliffe Committee. I have already discussed this scheme in general terms with representatives of the principal banking organizations concerned, and details are now being settled.

"The broad outline of the scheme is as follows :

"When it appeared necessary, in support of other monetary measures, to restrict the liquidity of the banking system and thus the ability of the banks to extend credit, the Bank of England would call for special deposits to be made with them by the banks. Such deposits would carry interest based on the current Treasury Bill rate. They would not qualify for inclusion in the banks' liquid assets. There would be provision for partial release by agreement with the Bank of England when justified by special considerations.

"The banks would continue to maintain their usual minimum ratios between liquid assets and total deposits.

"Calls would be made on each group of banks separately, the amount being related to the total gross deposits of each group at a specified date, with monthly adjustments to take account of variations in the deposits of each bank. The ratio of a call to total deposits would not necessarily be the same for each group.

"Initially the scheme is being discussed with the clearing and Scottish banks, but it might later be more widely applied in the light of experience.

"The scheme would serve to reinforce the existing monetary instruments and would be employed as a general control of credit in the same way and after the same sort of consideration as Bank rate.

"I understand that this scheme meets with your approval in principle . . ."

Chancellor's Letter to Lord Kennet, Chairman of Capital Issues Committee (July 1).

"I have now completed my review of credit policy, and the results as they affect the control of borrowing are set out in this letter for the guidance of yourself and your colleagues on the Capital Issues Committee. This letter is intended to supersede the memoranda and letters previously sent to the committee.

PURPOSES.

"First, as to the purposes for which consent should be given or withheld. Hitherto the basic guidance to the Committee has been the statement of principles in the letter written to you by Mr. Butler as Chancellor on Dec. 4, 1951 That guidance has since been modified from time to time by statements and requests which successive Chancellors have sent you on specific points reflecting developments in economic and financial policy.

"The practical effect of these successive statements and requests may be summarized as follows ·

(i) The Committee are asked to recommend consent only when they are satisfied that the purpose of an application has definite urgency under current requirements

(ii) In exercising their judgment on the merits of individual applications the Committee are asked :

(*a*) To recommend in favour of investment designed to maintain or increase the production of goods or services for essential purposes, with particular regard to the production of exports, the saving of imports, and the earning of foreign exchange ; and

(*b*) To recommend against investment for production or distribution or provision of services in the home market which in the judgment of the Committee can be postponed.

"I have decided that this statement of principles . . . should stand with one modification as regards the criterion of urgency. I now consider that the Committee can justifiably take a longer view and regard as eligible for consent an application for a purpose which may not be immediately urgent but which anticipates the future growth of requirements, bearing in mind that a primary objective is to stimulate production of exports, saving of imports, and earning of foreign exchange. For the time being I do not consider that the criterion of immediate urgency should be relaxed where one of those elements is not present.

"The Committee are asked to continue the practice of referring applications to the Government departments concerned with the purposes for which the finance is required. The Committee will no doubt take full account of any advice, favourable or unfavourable, that may be offered by departments. But I emphasize that the Committee are not bound by such advice and that I shall continue to rely on their personal judgment of the merits of each case that is referred to them.

"The Committee should also continue the practice—where they think it appropriate—of discriminating between the several parts of an application and, where they think fit, recommending consent to the raising of finance only for part of a project.

SPECIAL OBJECTS.

"I do not suggest any general change in the list of special purposes which the Committee have hitherto been asked either to discourage or to encourage. But some modification of emphasis is required, and I think it will be useful to restate these items as follows :

Speculation. Recommendations for consent for borrowing intended to finance the speculative buying or holding of shares, materials or real property (including the development of land) should continue to be withheld.

Investment Trusts. The Committee may feel free to recommend consent to applications from investment trusts and unit trusts ; but when considering cases in which the finance is proposed to be applied in making significant purchases of foreign securities, the Committee are asked to bear in mind that the principal benefit which these trusts bring to the economy is that they encourage savings and supply risk-bearing capital for British industry.

Hire-purchase Finance. Such applications should be critically scrutinized, but the Treasury will be prepared to act on a recommendation in favour of an issue where the Committee consider that the raising of finance is desirable as a means of improving the stability of the hire-purchase financial system.

Commonwealth Projects. The Committee are asked to continue to give sympathetic consideration to projects which appear to them to be likely to contribute materially to strengthening the sterling area's balance of payments with the non-sterling world.

Investment in Areas of Persistent Unemployment. Consent may be recommended to any proposal for sound development which is likely to reduce unemployment in an area of Great Britain where there is a high rate of unemployment which would otherwise be likely to persist, or to any proposal for financing investment in Northern Ireland which, though desirable, might not qualify for consent if the investment were made elsewhere in the United Kingdom.

BANK ADVANCES FOR CAPITAL PURPOSES.

"The time has come for the banks to resume full responsibility for the terms of bank advances.

"Applications for bank finance for capital purposes, being outside the normal course of the applicant's business, require Treasury consent under the Control of Borrowing Order and therefore will continue to be referred to the Capital Issues Committee for their advice. The Committee, in dealing with such cases, should consider the purpose of the proposals on the same principles as they apply to proposals financed from non-bank sources, but they should leave the appropriateness of bank finance and the terms as to period and repayment of advances to the discretion of the banks themselves."

CONTROL OF BORROWING ORDER.

The letter then set out the proposed amendments to the Control of Borrowing Order as described below. With regard to the imposition of control for the purpose of preventing new money from being raised outside the control by artificial devices, the Chancellor wrote :

"In April, 1955, the Treasury amended the Order to exempt from control certain classes of capital operations which for the most part did not involve raising new money in order to free normal commercial transactions from restrictions Unfortunately, this relaxation has been abused and the exempt operations have been adapted to raise large sums of new money for undertakings which have been refused, or would have been refused, permission to borrow. As long as the control of borrowing is retained it must be made effective, and I see no alternative but to restore statutory control over the classes of transactions that were exempted three years ago. I regret the inconvenience to legitimate business transactions. But I know I can rely on the Capital Issues Committee to recommend consent to such transactions with the minimum of inquiry and delay, and to concentrate their critical attention on the transactions that are really devices for raising new money . . ."

The Control of Borrowing (Amendment) Order, 1958, which came into force on July 4, implemented the changes announced in the control of capital issues, viz. :

(1) The restoration of the exemption limit of £50,000, which had been in force under the original Order of 1947 until it was reduced to £10,000 in March 1956.

(2) The exemption of bonus issues made to capitalize profits or reserves, unless they take the form of issues of redeemable securities ; in this case it will still be necessary to apply for Treasury consent to enable the Treasury to prevent operations designed to reduce tax liabilities, but there will no longer be any reference to the Capital Issues Committee.

(3) The imposition of capital issues control for certain transactions which had previously been exempted by the amending Order of April 1955.

The purpose of the 1955 Order was to free those transactions which did not involve the raising of new money. By the combination of transactions each exempt from control, however, companies have been able to raise capital in three main ways : - (*a*) by carrying out operations which have the same effect as if property were charged by way of mortgage ; (*b*) by acquiring, through the issue of shares, the shares, undertaking, or assets of another company whose assets consist largely of cash or of securities that can be easily realized ; (*c*) by borrowing money temporarily without security and then converting those borrowings into permanent capital by the issue of shares or other securities as consideration for the existing indebtedness.

The classes of transactions that will now be restricted are :— (*a*) transactions between associated companies ; (*b*) transactions by which the price of property or of an undertaking is left unpaid ; (*c*) issues of shares as consideration for shares, undertakings or assets ; (*d*) issues of shares in settlement of existing indebtedness ; (*e*) issues of securities except for securing a bank overdraft or for re-financing a maturing loan.

In order not to delay legitimate commercial operations, the Order still leaves a wide range of normal transactions exempt from control, of which some of the more important are : borrowing from a bank in the ordinary course of the borrower's business ; borrowing temporarily without a security ; issues of shares as consideration for the acquisition of property on the incorporation of a private company ; issues of securities for conversion or redemption of existing issues.

Increase in Initial Allowances.

The relaxation of the "credit squeeze" had been preceded by the Chancellor's announcement on June 17 (during the Committee stage of the Finance Bill) that he intended to move an amendment to increase the scale of initial allowances for plant and machinery by one-half, instead of by one-quarter as originally proposed in his Budget. The initial allowances would therefore be, with retrospective effect from Budget Day (April 15) : (*a*) 30 per cent for plant and machinery, instead of 25 per cent as originally proposed ; (*b*) 15 per cent for industrial buildings, instead of 25 per cent as originally proposed. The special rate of 40 per cent for mining works would remain unchanged.

The Chancellor explained that, weighing the various factors since his Budget speech, he had come to the conclusion that "it would be well to give some practical encouragement to industrial investment by an improvement in initial allowances." While one could not suppose that such allowances by themselves were likely to be a determining factor in investment plans, he believed that they nevertheless exerted a positive influence. He stressed that the main aim of the Government's economic policy remained the strengthening of sterling, and that price stability remained its first objective.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. Credit Restrictions, 16113 A ; 15770 A ; 15790 D ; Bank Rate, 16236 A ; Initial Allowances, 16113 A.)

A. IRISH REPUBLIC. — By-elections. - Creation of National Progressive Democratic Party.

Two by-elections to the *Dail Eireann* took place in the Irish Republic in recent weeks, the first in South Galway on May 31 and the second in Dublin South-Central on June 25. Results were as follows :

South Galway.

Millar, Anthony (Fianna Fail) ..	11,552
Clarke, F. (Fine Gael)	6,268
McWalter, M. (Sinn Fein)	3,758
No change. Fianna Fail majority	5,284

Mr. Millar, a 23-year-old farmer, was elected on the first count ; he will be the youngest member of the Dail. Polling was 75 per cent of the electorate. The by-election was caused by the death of Mr. Beegan, the former Fianna Fail member.

Dublin South-Central.

This by-election resulted in a Fianna Fail gain from an Independent, the seat being won by Mr. Patrick J. Cummins.

The other candidates were Mr. Sean MacBride (*Clann na Poblachta*), the former Minister of Foreign Affairs ; Mr. Frank Cluskey (Labour) ; Mr. John Hegarty (Fine Gael), and Mr. Noel Hartnett, candidate of the new National Progressive Democratic Party [see below], which was contesting a by-election for the first time.

The first count resulted as follows . Cummins, 6,014 ; Hegarty, 3,089 ; MacBride, 3,030 ; Cluskey, 2,762 ; Hartnett, 2,600. After the successive elimination of Mr. Hartnett (who forfeited his deposit), Mr. Cluskey, and Mr. Hegarty, and transferring second preference votes, Mr. Cummins was declared elected on the fourth count by 7,988 votes against 7,083 for Mr. McBride. Polling was 35 per cent of the electorate.

The by-election was caused by the resignation of Mr. John Murphy, who was returned at the 1957 general election as an Independent representing the unemployed. Mr Murphy (who was himself unemployed at the time of his election) resigned his seat on May 10 as a protest against what he described as the Government's failure to deal with the unemployment situation.

The Dublin South-Central by-election brought the strength of Fianna Fail in the Dail to 78.

Formation of National Progressive Democratic Party.

The formation of a new political party, known as the National Progressive Democrats, was announced on May 16 by two Independent members of the Dail, Dr. Noel Browne and Mr. Jack McQuillan.

A statement on the new party's policy said that 30 years of Irish independence had resulted "not in economic advancement and political maturity but in the growth and spread of despair and disillusionment among the vast majority of our people." There was no possibility of "any fundamental or realistic assessment of our economic potentialities, nor of any alteration in the unjust and ramshackle social and educational system," until the Civil War leaders "left the political arena to younger men, free of their hatreds and obsessions." With emigration at a high level and a "constant high rate of unemployment," it had been "nothing short of political insanity to try to force our youth to learn a language [i.e. Irish] which gave them no advantage in the lands where so many of them were destined to live and work." Many of these young persons, "in order to find an outlet for their latent idealism," were now turning to organizations "which advocate a resort to physical force to achieve the abolition of our territorial partition." It was "ironic to hear them condemned by those who were themselves the fathers of undemocratic force in this country in 1922."

The statement went on to say that the sums at present spent on the presidential establishment, on costly embassies abroad, and on the Army—"a museum-piece in the present epoch of atomic terror"—could be used to create a fund for implementing a national development policy. Considering the achievements already made in harnessing rivers, developing bogs, and establishing a sugar industry, developments "along similar lines" would "show a like success." In this connexion the statement advocated the development of fisheries, afforestation, and land reclamation, rather than the fostering of "petty artificial industries which create little employment but enrich an already wealthy minority."

Dr. Noel Browne was originally a member of the *Clann na Poblachta* and became Minister for Health at the age of 33. In 1951 he resigned after a conflict with the Roman Catholic Church over his "mother and child" scheme for a limited national health service, his resignation being followed by the fall of Mr. Costello's coalition government. In the subsequent general election he was returned as an Independent, but later joined Fianna Fail. He lost his seat at the following general election (1954), left Fianna Fail in 1957, and was returned at the general election later that year as an Independent for Dublin South-East.

Mr. McQuillan, member for Roscommon, has shown marked sympathy for the I.R.A. and has criticized the Government for using the army and police against it.—(Irish Times, Dublin)

(By-elections, 15857 A ; Dr. Noel Browne, 15429 A.)

B. LITERATURE.—Book Selections, May - June 1958.

Selected books published in Great Britain and the United States are given below :

Great Britain. Barkeley, Richard—"The Road to Mayerling : Life and Death of Crown Prince Rudolph of Austria." Volume I. (Macmillan, 25s.)

Birkenhead, Sheila—"Peace in Piccadilly : The Story of Albany." (Hamish Hamilton, 25s.)

Clark, Colin—"Australian Hopes and Fears" (Hollis & Carter, 30s.)

Cowles, Virginia—"The Phantom Major : The Story of David Stirling and the S.A.S. Regiment." (Collins, 16s)

Grinnell-Milne, Duncan—"The Silent Victory : September 1940." (Bodley Head, 21s.)

Henderson, Ian (with Philip Goodhart)—"The Hunt for Kimathi." (Hamish Hamilton, 21s)

Henrey, Mrs. Robert—"The Virgin of Aldermanbury . Rebirth of the City of London" (Dent, 20s.)

Huizinga, J. H.—"Confessions of a European in England." Translated from the Dutch. (Heinemann, 25s.)

Jungk, Robert—"Brighter than a Thousand Suns . The Moral and Political History of the Atomic Scientists" Translated from the German. (Victor Gollancz and Rupert Hart-Davis, 21s.)

Lapp, Ralph E.—"The Voyage of the Lucky Dragon." The Story of the *Fukuryu Maru* and the Nuclear Test at Bikini, March 1954. (Frederick Muller, 18s.)

Rowse, A. L.—"The Later Churchills." An English Family, Volume II. (Macmillan, 35s.)

Swarthout, Glendon—"They Came to Cordura." A Novel of the American Military Expedition in Mexico, 1916. (Heinemann, 15s)

"The Diaries of Theodor Herzl." Edited and translated by Marvin Lowenthal. (Victor Gollancz, 42s.)

"The Mist Procession : The Autobiography of Lord Vansittart." Published posthumously. (Hutchinson, 35s)

Urquhart, Major-General R E.—"Arnhem." The Story of the Battle of Arnhem. (Cassell, 21s.)

Warner, Rex—"The Young Caesar." An Historical Novel. (Collins, 16s.)

C. GREECE - SPAIN. — Ministerial Discussions.

The Spanish Foreign Minister, Dr. Mario Castiella, paid a three-day visit to Athens on June 21-23 for discussions with the Greek Prime Minister (M. Karamanlis) and the Foreign Minister (M. Averoff). A joint communiqué said that the two countries would co-ordinate their efforts for the consolidation of world peace, adding that "the traditional friendship which links both Greece and Spain with the Arab countries constitutes an important factor of equilibrium which it would be desirable to reinforce." It was also stated that trade exchanges between Greece and Spain would be increased. The communiqué made no reference to Cyprus, though it was understood that this question had been discussed.

(Hellenic News Agency, Athens)

D. CHANNEL ISLANDS. — New Lieutenant-Governors of Jersey and Guernsey.

It was announced on June 18 that the Queen had approved the appointment of General Sir George Erskine as Lieutenant-Governor of Jersey in succession to Admiral Sir Randolph Nicholson, whose term of office expires in the autumn. General Erskine (59) commanded the Seventh Armoured Division (the "Desert Rats") in Tunisia, Italy and Normandy during the war.

The appointment of Vice-Admiral Sir William Robson as Lieutenant-Governor of Guernsey *vice* Air Marshal Sir Thomas Elmhurst (term of office expiring in the autumn) was announced on July 11. Vice-Admiral Robson (56) was lately C.-in-C., South Atlantic.—(Times - Manchester Guardian)

Note. In the previous report cited, reference should be made to the last paragraph of the section dealing with the recent by-election at Ealing South.

A. UNITED KINGDOM. — The London Bus Strike.

A strike which resulted in the temporary withdrawal of all bus and trolley-bus services, both country and metropolitan, within the London Transport area, as well as of the Green Line coach services operated by the London Transport Executive, began on May 5 and only ended on June 21 after protracted negotiations. An account of the seven-week strike, and of the wage dispute which occasioned it, is given below under cross headings.

The History of the Dispute.

The dispute dated back to November 1957, when the London Transport Executive rejected a claim by the Transport and General Workers' Union (to which most busmen belong) for an overall increase of 25s. a week for all LTE bus and trolley-bus staff, including the crews of "country" buses and Green Line coaches and garage and maintenance men. A busmen's delegate conference thereupon decided on Dec. 9, by 105 votes to 25: (*a*) to ask the LTE to renew negotiations; (*b*) if it refused, to seek from the TGWU "plenary powers" including the right to strike if necessary—to enforce their demand. The conference rejected the TGWU's advice to submit the claim to arbitration.

The LTE, however, again turned down the claim on Dec. 23, saying that it would cost £4,000,000 a year and mean a further increase in fares. The Executive suggested the submission of the claim to an independent Court of Inquiry, and intimated that it might consider an increase for Central Area staff but not for other employees, who had already improved on their pre-war position more than busmen in the Central Area. At a meeting between LTE and TGWU representatives at the Ministry of Labour on Jan. 10, 1958, the Executive informed Sir Wilfrid Neden (the Minister's Chief Industrial Commissioner) that it could not make a counter-offer. The meeting then discussed the possibility of referring the dispute to a conciliation committee, Sir Wilfrid pointing out that such a committee could only be set up if the Minister of Labour (Mr. Macleod) approved.

The Proposed Conciliation Committee.

On Jan. 14 the busmen's negotiating committee recommended that discussions with the LTE should be continued with the assistance of a conciliation committee appointed by the Minister of Labour. This recommendation was approved on Jan. 17 by a busmen's delegate conference by 110 votes to 20, the conference voting decisively against strike action. On Jan. 25, however, Mr. Macleod refused to set up a conciliation committee, though intimating that he would consider a general inquiry into wages throughout the whole road passenger transport industry.

Mr. Macleod repeated his refusal to appoint a conciliation committee at a meeting on Jan. 28 with Mr. Frank Cousins and Mr. Nicholas, respectively general secretary and assistant general secretary of the TGWU. He emphasized that the claim could still be submitted to arbitration, and again suggested a thorough inquiry into the whole wages structure of the road transport industry throughout the country, so as to eliminate "leap-frog" demands from London and provincial busmen respectively. Mr. Cousins and Mr. Nicholas, however, asked Mr. Macleod to reconsider his decision and stressed (*a*) that he had given no indication of his unwillingness to appoint a conciliation committee until Jan. 25; (*b*) that the TGWU had meanwhile with great difficulty persuaded the busmen to agree to submit the claim to such a committee; (*c*) that the TGWU did not consider that a wider inquiry, as suggested by the Minister, would solve the immediate problem of the London busmen's claim; (*d*) that busmen had already refused to submit the claim to arbitration. Mr. Macleod nevertheless reiterated his position in the House of Commons on Jan. 29.

The Industrial Court's Award.

The *impasse* appeared to have been broken on Feb. 3, when, after a 12-hour discussion, a busmen's delegate conference approved (by 92 votes to 40) a proposal by Mr. Cousins that the claim should be referred to the Industrial Court for arbitration, on the understanding that the court's decision should not bind the busmen unless they considered it "fair." The conference rejected proposals for (*a*) a national conference to review busmen's wages throughout Britain; (*b*) a strike by all LTE road transport employees.

The Industrial Court (whose chairman is Sir John Forster) announced its award on March 18, as follows: (1) an immediate increase of 8s. 6d. a week to bus and trolley-bus crews in the Central Area (numbering about 36,000 persons); (2) no increase for "country" busmen, Green Line crews, or maintenance and garage men. The award, which represented increases of 4.4 per cent and 4.5 per cent in the basic minima of drivers and conductors (then £9 13s. 6d. and £9 9s. 6d. respectively), was expected to cost London Transport about £1,000,000 a year.

The Busmen's Decision to Strike.

The Industrial Court's award was immediately accepted by the LTE, but at a meeting on March 17 between LTE and TGWU representatives the latter demanded that it should be "substantially increased" and applied to all LTE road transport employees, numbering nearly 50,000. The LTE, however, replied that it could not agree to this, whereupon the busmen's negotiating committee recommended on March 24 that the TGWU should be asked to sanction "industrial action" in support of an overall increase of "at least 10s. 6d. weekly."

After the TGWU had considered the position, Mr. Cousins gave formal notice on April 2 that all London bus, trolley-bus, and Green Line coach staff would cease work on May 5 unless a settlement had been reached in the meantime. [The union's agreement with London Transport stipulated three month's notice of an intended strike, but only one month's notice was given at the time of the last London bus strike in 1937.]

To prevent as far as possible the diversion of traffic to the London Underground and British suburban lines, the TGWU on April 15 concluded a "mutual aid pact" with the railway unions, under which the latter agreed not to allow additional trains to be run should the bus strike take place; the TGWU, for its part, undertook to prevent the manning of extra buses should the current railway wages dispute (see 16209 A) meanwhile culminate in a rail stoppage.

At Sir John Elliot's initiative a meeting between LTE and TGWU representatives led by Mr. Cousins took place on April 28. At this meeting Mr. Cousins made the unexpected proposal that the £1,000,000 which the 8s. 6d. increase to Central Area busmen was estimated to cost should be spread evenly over the whole of the workers covered by the original demand i.e. over "country" and Green Line crews, garage and maintenance staff, etc. This suggestion, which would have reduced the increase to Central Area staff to 6s. 6d. a week in order to benefit other staff, was rejected by Sir John Elliot on the ground that it would not be in line with the award, which expressly limited the increase to Central Area staff. Instead he undertook, provided that the award was accepted as it stood and the strike notices were withdrawn, that London Transport would examine with the union in the autumn the wage-rates of men covered by the original application but excluded from the award, "such review to include a joint examination of means of securing the most economical operation and maintenance of London Transport services." This offer was rejected by the TGWU and the talks again broke down. On April 30 Mr. Cousins appealed to Mr. Macleod to induce London Transport to agree to the TGWU proposals, but Mr. Macleod refused to do so, saying that "the effect of the union's suggestion would be to alter completely the basis of the Industrial Court's award."

Sir John Elliot's Warning to Busmen.

On May 1 Sir John Elliot wrote to Mr. Cousins repeating his offer (*a*) to carry out the Industrial Court's award and back-date the 8s. 6d. increase to Central Area staff to March 12, 1958; (*b*) to review the wages of country-bus crews and maintenance and garage men in the autumn, with an earlier review in the case of Green Line coach crews. Mr. Cousins, however, did not reply to Sir John, but instead urged the busmen to "stand firm whether the strike is long or short." Sir John thereupon sent a "personal message" to all LTE road passenger staff, warning them that a strike would only result in a further serious decline in the number of passengers carried by London Transport road services, which in 1957 had averaged 2,000,000 fewer each day than in 1950. Sir John's message was worded as follows:

"A strike does not, and cannot, alter facts. Here are some inescapable facts . . . The bus business is declining, not only in London and in Britain but all over the world, and it will continue to do so. Why?

"Firstly, because of the enormous increase in the number of motor-cars, 'bubble' cars, motor-bicycles, scooters, etc. Once a man has bought one of these, he uses public transport as little as possible. Another striking change in people's lives is the rapid spread of television, particularly in the Greater London area. This keeps whole families at home in the evenings and at week-ends; formerly they came out and used our buses freely.

"Lastly, there is the day-long congestion in the London streets caused by parked motor-cars and vans, which I am always complaining about on behalf of our nine million bus passengers, because it makes the bus services irregular and unreliable.

"Here is the biggest fact of the lot. As a result of all this, London Transport road services are to-day carrying just under two million fewer passengers every day than they were in 1950, and the numbers are still falling . . .

"That is why I wish to tell you straight that, in my belief, the disappearance of the buses, trolleybuses, and coaches from the streets and roads of Greater London at this time, quite apart from its tremendous hardship to the public who rely on them to get to and from their work, will be disastrous to us.

"It can only result in turning away from our road services tens of thousands of passengers more, and all experience shows that many of these will leave us permanently. Thus the inevitable result of a strike will be that when the buses do come back on to the streets there will be less work for fewer busmen, and eventually less money with which to pay wages.

"I am convinced that with a substantial wage increase awarded to the majority of London busmen, it is the height of folly to go on strike at a time when the public are in any case using our services less and less. Indeed, I can think of nothing that could deal a worse blow at your real interests than this.

"Our only job is to serve the public, and it is the public in the end who settle everything, by their willingness or refusal to use our services."

Mr. Macleod's Non-Intervention. - Beginning of Bus Strike.

In the House of Commons, Mr. Gaitskell (Leader of the Opposition) called on the Minister of Labour on May 2 to "show initiative" and summon the two sides to an immediate meeting under his chairmanship. Mr. Macleod, however, declined to intervene at this stage, saying that it would be "improper" for him to agree to vary an Industrial Court's award. Despite a declaration by Mr. Cousins that "London busmen will be very pleased if we can get out of this situation with honour and dignity," a mass meeting of busmen at Earl's Court on the same day confirmed the decision to proceed with the strike.

The stoppage accordingly began at midnight of May 4-5, when all buses, trolley-buses, and Green Line coaches in the London Transport area—a total of 8,320 vehicles—went off the roads. The 605 routes affected covered a total mileage of about 2,000, and served an area of approximately 3,000 square miles within a radius of about 30 miles from Charing Cross, stretching from Baldock (Herts.) in the north to Horsham (Sussex) in the south, and from Wendover and West Wycombe (Bucks.) in the west to Gravesend (Kent) in the east. About 10,000,000 people live in the area.

The strike caused less disturbance to business activity than had been expected, both London Underground and British Railways suburban lines dealing without much difficulty with the abnormal number of passengers using them. Although an estimated 10,000 more private cars than usual—many bearing "free lift" signs issued by the motoring associations—were brought into the City and the West End, there was little abnormal congestion except at certain "black spots"—e.g. the Thames bridges, Ludgate Circus, and Victoria. On the other hand many motorists found that the absence of the slow-moving buses greatly relieved congestion and enabled cars to move with unwonted freedom. Although on May 5 and subsequent days thousands of City workers were forced to travel from their homes by unaccustomed and circuitous routes, most reached their destinations on time; a census of leading firms on May 5 showed that 90 per cent or more of their employees had reported at the usual hour. Some large employers provided coaches to bring in their staffs from special "picking-up" points and return them to these points after work. On subsequent days the congestion and delay grew gradually less as the public became more accustomed to the situation.

Opposition Motion of Censure on Minister of Labour.

In the House of Commons on May 5, Mr. Robens (Lab.) urged the Minister of Labour, now that the strike had actually begun, to reverse his decision and call the two sides together in an attempt to bring about a settlement. Mr. Macleod, however, again declined to do this, saying that he did not consider the time ripe.

Mr. Robens thereupon moved the adjournment of the House to permit an immediate debate on the matter, but this motion was disallowed by the Speaker on the ground that the matter did not come within the appropriate Standing Order. Mr. Gaitskell then gave notice that the Opposition would table a motion of censure. This motion, which "deplored the Minister of Labour's refusal, in pursuance of the economic and industrial policy of the Government, to attempt to bring about a settlement of the bus dispute," was debated in the House on May 8. It was defeated by 320 votes to 253 after Mr. Macleod had stressed the need to choose the right time for ministerial intervention, and had pointed out that neither side had as yet given any sign of departing from its original position.

Further Abortive Negotiations. - TGWU Appeals to Railway Unions.

Following a promise by Mr. Macleod on May 16 that he would intervene in the dispute as soon as he "saw a single chink of light," Mr. Cousins on May 21 outlined to Sir Wilfrid Neden a suggested basis for discussions. Sir John Elliot thereupon suggested to Mr. Cousins a meeting for an "exchange of views," but Mr. Cousins declined to meet him without his negotiating committee. After consulting his colleagues, Sir John Elliot replied that such a meeting was "not appropriate at this stage."

Mr. Cousins announced on May 25 that the TGWU executive would notify the NUR and ASLEF that the "continued excess use" of the London Underground by habitual bus passengers was "minimizing the consequences of the strike," and would ask them for their "considered opinions as to whether they could help the busmen further." On May 27 he announced that the TGWU would ask its members employed in petrol distribution in London and South-East England to be prepared to strike in sympathy, and might also ask TGWU members at London Transport power stations to "take sympathetic action." On May 28 the NUR and ASLEF leaders replied that their unions could not help the busmen further than they were already doing under the "mutual aid pact" (see above).

T.U.C. Intervention. - Government Statement on Oil Supplies.

The General Council of the T.U.C. met on May 28 to "review the general position in regard to the bus strike"; it received an assurance from Mr. Cousins that the TGWU had not yet asked oil distribution or power station workers to stop work, but had merely asked them to consider what help they would give, if required. The General Council thereupon appealed to Mr. Macleod to bring both sides together for negotiations. The Minister, however, replied that he "could see no way in which he could usefully intervene."

A T.U.C. delegation led by Mr. Tom Yates (chairman of the General Council) saw the Prime Minister and the Minister of Transport and Civil Aviation (Mr. Harold Watkinson) later on May 28, but were informed by Mr. Macmillan that he could "hold out no hope of Government intervention to improve the pay offer."

On the same day the Minister of Power (Lord Mills) issued a statement to the effect that if labour were withdrawn from oil distribution in London and the Home Counties, the Government would "take immediate steps to ensure supplies of petrol and oil." Simultaneously the War Office announced that week-end leave had been stopped for "certain categories of soldiers," numbering about 6,000.

T.U.C.'s Advice against Extension of Strike.

Talks between the two sides were resumed at Mr. Cousins' request (and on the T.U.C.'s advice) on May 31.

Sir John Elliot, while stressing that London Transport could not depart from the Industrial Court's award, offered either (*a*) to begin a review of the pay of employees outside the award as soon as work was resumed, and to complete it within a month; or (*b*) to refer the whole issue back to the Industrial Court. Both alternatives were declined by Mr. Cousins, who proposed instead that London Transport should grant employees outside the award a "token increase" of 4s. a week pending the completion of the review. Sir John refused to agree to this, and the meeting broke down.

Sir John subsequently announced that the Executive were planning a further reduction of 10 per cent in bus services (in addition to a 4 per cent cut made in 1957). He added that it was hoped that some of the traffic now being carried on the Underground would "stay there and help to cure street congestion," and that at least 500 buses would be taken off in October, thus saving 2,500 staff and about £2,000,000 in costs.

Mr. Cousins' rejection of Sir John's offer was unanimously approved by a busmen's delegate conference on June 2, on which day the T.U.C. General Council asked the Prime Minister for a second interview. This meeting took place on June 4, when Mr. Macmillan explained, however, that he could only advise the resumption of negotiations on the basis of Sir John Elliot's latest offer.

After the T.U.C. General Council had heard a report on the position from Mr. Cousins later on June 4, it advised him "not to attempt to extend the strike to workers in other industries," but promised to try to arrange a new meeting with Sir John Elliot. At this meeting (June 5) Sir John proposed that a joint review of "country" busmen's pay should begin as soon as work was resumed, and should be concluded by July 1, any agreed increase to date from July 2. Mr. Cousins, however, rejected this new offer and demanded (1) that the 8s. 6d. increase to Central Area busmen should be back-dated to March 12, the date of the award; (2) that Green Line coach drivers should also receive 8s. 6d., back-dated to March 12; (3) that "country" bus workers should be assured of some increase, which should be back-dated to the start of the review. As these demands were unacceptable to London Transport, this meeting also ended in failure.

The rejection of Sir John's new offer was unanimously approved by a busmen's delegate conference on June 6, but the conference decided (by 71 votes to 60) against seeking to extend the strike to other workers.

Following criticisms by Mr. Cousins of the T.U.C.'s attitude towards extending the strike, a group of NUR men employed on the London Underground decided to call one-day "token" strikes in support of the busmen each week until the bus dispute was settled. This decision was strongly opposed by the NUR executive, and when the first stoppage was called on June 9 only about 230 employees (mostly motormen) of the 18,000 on the Underground system stopped work. About 50 of the 500 trains normally operated at the peak rush-hours had to be cancelled.

On June 11 Mr. Cousins asked Mr. Macleod whether he thought he could now "usefully intervene," whereupon the Minister and Sir Wilfrid Neden saw Sir John Elliot later the same day. A Ministry

spokesman subsequently stated, however, that it had been made clear that the LTE was "not able to depart from the position reached on May 31." As the strike seemed likely to continue, Mr. Cousins asked the T.U.C. on June 12 to assist the TGWU financially so as to relieve it from any necessity of placing its securities (totalling about £10,000,000) on the market. The T.U.C. General Council agreed to assist the TGWU and to ask all affiliated unions to lend it money. The Boilermakers' Society subsequently agreed to lend £50,000 to the TGWU at 2 per cent interest per annum.

Ending of the Strike.

On June 13, however, the busmen's negotiating committee decided by eight votes to four to recommend a resumption of talks with the LTE on the basis of Sir John Elliot's offer of May 31; a proposal to try to extend the strike had been previously defeated by seven votes to six—a bare majority of one. Later the same day a busmen's delegate conference decided by 94 votes to 32 that meetings should be held at all London Transport garages to decide on further action, an amendment to extend the strike being defeated by a large majority. After a meeting on June 18 between Mr. Cousins and his negotiating committee on the one side, and Sir John Elliot and other LTE members on the other, it was announced that a new formula for ending the strike had been agreed upon and would be submitted to a busmen's delegate conference on June 19. This conference recommended (by 113 votes to 15) that work should be resumed on the basis of the new formula—a recommendation approved on June 20 by 94 of the 118 London Transport garages. The first buses to return to service began running the same night, and there was a complete resumption of work throughout the London Transport area on June 21.

The formula agreed between the two sides on June 18, provided (1) that Central Area drivers and conductors should receive a weekly increase of 8s. 6d. with effect from the resumption of work; (2) that Green Line coach workers should receive an agreed increase from the same date; (3) that a joint review of the wages of staff excluded from the Industrial Court's award should be carried out "on the merits of the case," and be concluded by July 1, any agreed increase being payable from July 2; (4) that the intention of the review should be to "provide an upward trend of wage levels"; (5) that it was not intended that any decision resulting from the review should "leave the wages of country services staff in an unfavourable position compared with other LTE road service staffs of comparable grade"; (6) that increases to maintenance staff resulting from the review should not be less than increases to LTE and railway workshops staff which might result from negotiations then in progress.

The strike, which lasted nearly seven weeks, was estimated to have cost the LTE over £2,000,000 and the union more than £1,500,000 in strike pay. Mr. Watkinson, speaking on June 20 of the consequences of the strike, said: "The fact is that nobody has gained anything at all. The London travelling public have been put to great inconvenience; the finances of London Transport and of the trade union have suffered a heavy blow. The only concrete result of the strike is that there will probably never again be the same number of buses on the London streets."—(Times - Daily Telegraph)

(Prev. rep. Provincial Bus Strike, 16004 A.)

A. INDIA. — Re-finance Corporation for Industry.

A company to advance loans through the agency of banks to medium-sized industrial units in the private sector was set up in Bombay on June 5 with official support, under the name of Re-finance Corporation for Industry (Private) Ltd. The new corporation has an authorized capital of 250,000,000 rupees and an initial issued capital of half that amount contributed jointly by the Reserve Bank of India, the Life Insurance Corporation, and 15 of the larger scheduled banks, both Indian and foreign. As its name implies, the corporation will not itself lend to industry but will assist the banks to do so. In addition to its own capital, funds will be made available to the corporation by the Government of India from a sum of about 260,000,000 rupees which had been reserved from U.S. aid counterpart funds under the agricultural commodities agreement signed by India and the U.S.A. in August 1956.

The corporation's board of directors will comprise the Governor of the Reserve Bank of India (as chairman), a Deputy Governor of the Reserve Bank, the chairmen of the State Bank of India and the Life Insurance Corporation, and three representatives of the participating banks.—(The Statesman, Calcutta - Indian High Commissioner's Office, London)

B. LONDON. — Coffee Futures Market.

Dealings on London's new coffee futures market opened on July 1 at the Commodity Exchange, Plantation House, E.C.3. (Times - Daily Telegraph)

C. UNITED NATIONS. — Special Report on World Population Trends.

A special U.N. report, published on June 29, pointed out that the world's population had increased since the beginning of the 20th century at a rate unprecedented in human history, and that this trend, if continued at its present pace, would cause serious problems for the future of mankind. "While it took 200,000 years for the world's population to reach 2,500 million," said the report, "it will now take a mere 30 years to add another 2,000 million . . . Never in the history of mankind have members of the human species multiplied so rapidly as in the present century, nor can it be easily conceived that the peopling of the earth will continue at a similar pace in the century to follow."

After pointing out that the world's population might have risen to 6,000 or 7,000 million by the turn of the century, the report stated: "The year 2000 is no farther in the future than the year 1914 is in the past. Not only technical achievement, but progress in international co-operation and organization, will have to be more effective than during the past 43 years if the expected numbers of mankind are to be organizationally and technologically accommodated to the minimum conditions required for human dignity . . . Forecasts for a still more distant future are hazardous. Yet given a continuation of the present rate of increase . . . and looking further ahead to an age some 600 years from now, the population on this globe might have expanded so much that in a world crowded with human beings, only about one square metre of soil might be left for each of them to live on. It goes without saying that this can never take place. Something will happen to prevent it."

Apart from the total increase in world population, the ensuing changes in distribution over the globe also received close attention in the report. It was anticipated that a continuous decline in the relative importance (from the point of view of population) of Europe, including the Soviet Union, would be paralleled by a great corresponding increase in the population of Asia; thus, whereas there was one European for every two Asians at the beginning of the 20th century, the ratio might have become one to four at the end of the century. For Latin America, a tenfold population increase was forecast between 1900 and 2000; by contrast, Europe would have slightly more than doubled its population over the century, while for the remaining continents a fourfold increase was forecast for the century as a whole.

"Fully one-half of the world's people live in monsoon Asia," the report pointed out. "Within this general region the concentration in particular areas is already outstandingly great. Current economic and social conditions even now present the greatest challenge to human ingenuity in seeking effective remedies to existing poverty. The problem is all the more baffling because of the large increase in population which must be expected." After recommending close attention in the rest of the world to the policies designed to slow down population increase in India and China, the report gave the warning: "Where population threatens to outstrip resources, the only alternative to fertility decline would seem to be an eventual return to permanent high mortality; emigration, at the most, can be only a temporary relief."

The growth of world population in the past century was indicated by the following figures: (*a*) in 1850 it was estimated at 1,094 million, and in 1900 at 1,550 million—an increase of 42 per cent in 50 years; (*b*) by 1925 it had risen to 1,907 million, an increase of 23 per cent in 25 years; (*c*) by 1950 the figure stood at 2,500 million, an increase of 31 per cent in 25 years; (*d*) a further 1,250 million would "almost certainly" be added by 1975; (*e*) between 1975 and 2000 the world's population would increase by another 1,250 million at a "very improbable low assumption," by 2,500 million at a "more plausible" assumption, and by 3,000 million at a "high assumption." Thus the growth of world population over the next 25 years "has an importance which transcends economic and social considerations" and "is at the very heart of the problem of our existence."

The report was prepared as part of a wider U.N. programme devoted to the study and analytical appraisal of world population trends. Entitled *The Future Growth of World Population*, it was compiled by the U.N. Department of Economic and Social Affairs and is available in London from H.M. Stationery Office.—(U.N. Information Centre, London)

D. CHILE. — New U.S. Credits.

The Chilean Finance Minister announced in June that the Chilean Government had obtained further loans in the U.S.A. in addition to the various "stand-by" loans renewed in April last [see 16150 B]. Of the new loans, $15,000,000 had been granted by the Import-Export Bank and $10,000,000 by the Economic Development Fund. The Minister explained that after effecting economies in expenditure, it was estimated that Chile would need only $40,000,000 to meet her foreign exchange requirements, and that this sum could be met by drawing on the new loans and utilizing only $15,000,000 of the "stand-by" loans.—(Bank of London and South America) **(16150 B.)**

A. UNITED KINGDOM. — The Lewisham and Dagenham Rail Disasters.

The third worst disaster in British railway history, exceeded in the number of casualties only by the Gretna troop-train disaster of 1915 and the Harrow and Wealdstone collision of 1952 (see 12626 A), occurred during the evening "rush hour" on Dec. 4, 1957, near St. John's Station, Lewisham, on the mid-Kent line of the Southern Region. At about 6.20 p.m. on that date a fast steam train from London to Ramsgate crashed in thick fog into the rear of a stationary electric train from Charing Cross to Hayes, which had been halted by a signal near St. John's Station, close to a fly-over railway bridge carrying the line from Charing Cross to Dartford and Gravesend. Under the force of the impact the middle coaches of the steam train reared almost vertically into the air and tore into the steel structure of the fly-over bridge, which fell on the rear coach of the steam train, causing very heavy casualties. Both trains were crowded with West End and City workers and Christmas shoppers. A third train, from Holborn Viaduct to Dartford, was slowly approaching the fly-over bridge at the time, but the driver was able to stop it on the edge of the gap left by the collapsed bridge; although the train was derailed, there were no casualties.

Rescue work was hampered by dense fog, but doctors and nurses were rushed to the scene as quickly as possible from hospitals in the area; together with firemen, police, and people from neighbouring houses, they worked under the light of floodlamps throughout the night.

Owing to the mutilation of the bodies recovered, the number of dead was not definitely known until Dec. 7, when it was stated by Scotland Yard to be 88. Previously (on Dec. 5) a Southern Region spokesman had given the number of casualties as: dead, 92; seriously injured, 110; slightly injured, 67. An appeal for persons in need of assistance as a result of the disaster was launched by the Mayor of Lewisham.

Mr. Harold Watkinson (Minister of Transport and Civil Aviation) announced in the House of Commons on Dec. 5 that he had appointed the Chief Inspector of Railways (then Lieut.-Col. G. R. Wilson) to hold an inquiry into the Lewisham disaster. On the same day British Railways (Southern Region) issued the following statement explaining why no fog service was in operation in the area of the disaster and why there were no fog-men on the lines:

"Fog signalmen are not provided in the area of the accident because the colour-light system of signalling is in operation. Multiple-aspect colour light signals are situated as near as possible to a driver's eye level and, in view of the intensity of light and focusing of such signals, it is not the practice to provide fog signalmen at such signals.

"The colour light signalling system, with its powerful multiple-aspect lights, not only clearly tells the driver the indication of the signal which is his immediate concern, but also tells him what indication he may expect to find at the next signal ahead. In areas where colour light signalling is not provided, fog signalmen are provided whenever possible, or block sections lengthened by the introduction of what is known technically as 'double block' working."

A Southern Region spokesman stated that the signalling system in use in the area had been installed in 1929, since when well over 1,000 trains a day had "gone through in perfect safety." He added that if the system was working satisfactorily, the driver of the steam train must have passed three signals giving warning of danger.

The trial of William John Trew, the driver of the steam train, charged with the manslaughter of the guard of the electric train into which the steam train crashed, opened at the Central Criminal Court in London on April 21, 1958. Trew pleaded "not guilty." After hearing evidence from the fireman of the steam train, the driver of the electric train, and other railway employees and officials, the jury announced that they were unable to agree, whereupon the judge discharged them and ordered a new trial. When this opened on May 7, however, no evidence was offered by the Crown against Trew, who was accordingly discharged after the jury had returned a formal verdict of "not guilty." The prosecuting counsel (Mr. Christmas Humphreys) pointed out that the proceedings had had a grave effect upon Driver Trew's mind and to some extent on his physical health; in these circumstances it was felt that further proceedings might prove a serious danger to his mental condition.

The Dagenham Disaster.

A further collision in dense fog, in which 10 people were killed and 87 injured, occurred at about 7.30 p.m. on Jan. 30, 1958, at Dagenham (Essex) on the London, Tilbury, and Southend line, when a steam train from Fenchurch Street to Shoeburyness ran into a Fenchurch Street-Southend steam train which was halted at a stop signal near Dagenham East station. Both trains were crowded at the time.

As in the Lewisham disaster, dense fog made rescue work extremely difficult, but doctors and nurses from neighbouring hospitals were brought to the spot in police cars, and together with firemen, police, and ambulance drivers worked under acetylene flares and arc-lamps to free the dead and injured. Help was also given by uninjured passengers in the two trains and by local residents.

Whereas there is no system of automatic train control on the mid-Kent line of the Southern Region, on which the Lewisham accident occurred, the London, Tilbury and Southend line has for 20 years used its own a system of A.T.C., which warns the driver when he is approaching a "distant" signal and automatically applies the brakes if the signal is at danger. The Tilbury system differs from that in use for about 50 years on the Western Region in that it is electro-magnetic, whereas the W.R. system is purely mechanical, operated by means of physical contact between a ramp between the rails and a trip-lever on the engine.

Mr. Watkinson announced on Jan. 31 that he had appointed Brigadier C. A. Langley, an inspecting officer of railways, to inquire into the Dagenham accident. He added: "The previous serious accident at Lewisham undoubtedly had a grave element of human error in it, and I have taken steps to see that Sir Brian Robertson [chairman of the British Transport Commission] reminds all concerned of the very heavy burden which falls upon them in conditions of acute fog." In reply to Mr. John Parker (Labour M.P. for Dagenham) Mr. Watkinson stated that the signalling system at Dagenham was "perfectly in order and adequate," and that preparatory work in connexion with the electrification of the line had had no effect on the accident.

Mr. J. W. Watkins, a member of the British Transport Commission and chairman of the railways sub-commission, stated on Jan. 31 that the British railway system, with over 23,000 passenger trains and 17,000 freight trains a day, was "the most intensively used in the world." The railways carried over 1,000,000,000 passengers a year—more than double the number carried on the "class one" railroads of the U.S.A.—and the risk of death to a passenger in the past 10 years had been "about one in 24,000,000 journeys—or, in terms of deaths to miles travelled from 1943 to 1955, 734,000,000 miles travelled to each fatality." Under the railway modernization plan about £150,000,000 would be spent on signalling and communications, including the extension of track circuiting, and the new type of automatic train control adopted as a standard for British Railways would be extended to all main-line routes. Contracts for initial supplies of the equipment to the value of £500,000 had already been placed, and most of this—enough for 2,000 sets of track gear and for 2,000 locomotives—was expected to be delivered during 1958.—(Times - Daily Telegraph)

B. MALAYA. — British Aid for Expansion of Royal Malayan Navy. - Naval Base at Port Swettenham.

The U.K. Commonwealth Relations Office announced on July 1 that, under the financial agreement of 1957, Britain would (*a*) make a cash grant of £145,000 for the purchase of naval stores and equipment for the Royal Malayan Navy; (*b*) contribute £787,000 towards the cost of constructing a naval base at Port Swettenham; (*c*) transfer ships from the Royal Navy to the Royal Malayan Navy of an estimated value of £2,300,000.

The announcement recalled that the U.K. Government had agreed in January 1957 to contribute some £13,300,000 towards the expansion of Malaya's naval, military, and air forces. As part of that expansion it had now been agreed that the Royal Malayan Navy—hitherto based on Singapore, and administered and paid for by the Singapore Government since its creation in 1952—should be transferred to the Federation of Malaya. Officers and ratings from the Royal Navy at present on loan to the Royal Malayan Navy would continue to serve after its transfer to the Federation. (Times)

C. SWITZERLAND. — National Defence Council.

The Swiss Government decided on June 16 to set up a National Defence Council to advise the Government on all questions of national defence which were not of a purely military nature, and to co-ordinate civil and military defence measures. The Council will be under the chairmanship of the head of the Federal Military Department (i.e. the member of the Federal Council in charge of defence) and will have 21 other members, of whom 12 will represent industry, trade, and science. It was stated that the work of the Council would not affect the tasks of the existing Military Defence Commission. (Neue Zürcher Zeitung)

A. VIETNAM. — Implementation of Geneva Agreements on Regrouping of Armed Forces, Exchange of Prisoners-of-War, and Evacuation of Civilian Refugees. - South Vietnam rejects North Vietnamese Proposals for Discussions on Elections and Reunification.

In accordance with the terms of the Geneva Agreements on Vietnam, the regrouping of the French Union and Vietminh forces and the exchange of prisoners-of-war were completed by May 1955, whilst the period for the evacuation of civilian refugees, which was to have ended at the same time, was extended by agreement until July 20, 1955. The clauses providing for the holding of general elections in July 1956, with a view to the reunification of the two zones, could not be implemented, however, as the South Vietnamese Government consistently refused to regard itself as bound by the Agreements and rejected a series of proposals put forward by the North Vietnamese Government during 1955-58 for discussions on the organization of elections.

The last Vietminh forces in South Vietnam were withdrawn on May 3, 1955, whilst the evacuation of French Union forces from North Vietnam was completed 10 days later, when the French garrison left Haiphong. The completion of the exchange of prisoners-of-war had previously been announced by the International Control Commission on March 29, 1955.

During the period of 300 days from the cease-fire laid down in the Geneva Agreements for the evacuation of civilian refugees (i.e. up to May 18, 1955), about 700,000 people, 95 per cent of whom were Roman Catholics, left North for South Vietnam; about three-quarters were civilians, the remainder being military personnel and their dependants. Following a series of clashes between Vietminh troops and Roman Catholics in northern Annam during January 1955, in which people intending to leave for South Vietnam were prevented by force from doing so, demands for the extension of the 300-day period were put forward by the South Vietnamese Government and were supported by the British Government in a Note to the Soviet Government on May 7, 1955. [This procedure was adopted because the British and Soviet Foreign Ministers had acted as joint chairmen of the Geneva Conference.] The International Commission announced on May 31, 1955, that the North Vietnamese Government had agreed to extend the period until July 20, 1955, and that 3,000 more refugees had left North Vietnam since May 18.

No statistics were published of the total number of refugees leaving South for North Vietnam. The South Vietnamese Government stated on May 20, 1955, however, that about 3,500 refugees from the North had asked to be repatriated in the previous fortnight, whilst the International Commission reported on May 31 that 1,700 refugees had moved to North Vietnam since May 18. In a report published on Dec. 19, 1955, the Commission stated that about 2,500 people who had been granted permits to leave South Vietnam had not yet been able to do so.

The Foreign Minister of North Vietnam (M. Pham Van-Dong) stated on June 6, 1955, that his Government was prepared to open consultations with South Vietnam in preparation for the holding of elections in July 1956; at the same time he gave an assurance that North Vietnam desired free elections in which "all political parties, organizations, and individuals" would be able to take part. He recalled that the final declaration of the Geneva Conference (see 13689 A) provided for such consultations, and for the supervision of elections by an international body comprising representatives of the member States of the International Commission (India, Canada, and Poland). M. Ngo Dinh-Diem (then Prime Minister of South Vietnam) declared in a broadcast on July 6, 1955, however, that as South Vietnam had not signed the Geneva Agreements it was in no way bound by them; although it did not reject "the principle of elections" as a means of unifying the country, there could be no question of considering any proposals from the Vietminh "if proof is not given us that they put the higher interests of the national community above those of Communism."

Serious rioting occurred in Saigon on July 20, 1955—the anniversary of the conclusion of the Geneva Agreements, which by the Government's orders was observed as a "day of national shame." Disorders had already taken place for some days beforehand, and on July 13 the International Commission had drawn the attention of the South Vietnam authorities to the need for maintaining order. On July 19, however, members of the Government handed to M. Ngo Dinh-Diem a resolution demanding the "elimination of Polish and Indian pro-Communist elements from the International Commission," and loudspeaker vans toured the city inciting the population against the Commission. On July 20 armed mobs attacked hotels where members of the Commission were staying, assaulted members of the Commission and foreign tourists, ransacked their rooms, and set fire to furniture and cars, the total damage being estimated at £150,000. The police made no attempt to intervene until the looting and arson had been in progress for over an hour. M. Ngo Dinh-Diem described the riots as "striking proof of the determination of the Vietnamese people to fight Communism," but gave an assurance that compensation would be paid for all damage done after strong protests had been lodged by the British and U.S. Ambassadors.

In a Note of July 19, 1955, M. Pham Van-Dong had asked M. Ngo Dinh-Diem to nominate delegates to a pre-elections conference. The British, French, and U.S. diplomatic representatives in Saigon subsequently handed identical Notes to M. Ngo Dinh-Diem on July 26 emphasizing their interest in seeing the Geneva Agreements respected, and urging him to open discussions with North Vietnam. M. Ngo Dinh-Diem, however, rejected any such talks, declaring on Aug. 10 that South Vietnam was "the only legal State," and reaffirming the policy laid down in his broadcast of July 6. On Sept. 21, 1955, he issued a second statement declaring that "there can be no question of a conference, even less of negotiations."

The situation thereafter remained deadlocked until Jan. 30, 1956, when the Premier of the Chinese People's Republic, Mr. Chou En-lai, proposed in a public speech that the Geneva Conference should be reconvened to ensure the implementation of its agreements on Vietnam, and that the countries represented on the International Commission should be invited to take part. The British Foreign Office confirmed on the same day that it had already received such a proposal from China, support for which was subsequently announced by Poland, North Vietnam, and the Soviet Union. The British Government, however, suggested in a Note to the Soviet Government on March 9 that discussions on the Vietnamese situation should first take place between them as co-chairmen of the Geneva Conference.

Discussions were accordingly held in London from April 10 to May 8, 1956, between Lord Reading (then Minister of State at the Foreign Office) and M. Gromyko (then Soviet Deputy Foreign Minister). At the conclusion of the talks, the two Governments which had agreed not to convene a second conference for the present - communicated their decisions to the North and South Vietnamese Governments, to the French Government, and to the International Commission.

The letter to the two Vietnamese Governments expressed concern that the provision of the Geneva Agreements for discussions between them had not been carried out, and appealed to them to agree on a date for such discussions. It also stated that the co-chairmen would continue to consult together, and if necessary would discuss the measures which should be taken to ensure the fulfilment of the Agreements, including the proposal to convene a new conference.

The South Vietnamese Government, in its reply on May 25, 1956, reiterated its refusal to recognize the Geneva Agreements but promised not to "have recourse to solutions of violence," and to respect the demarcation line and the demilitarized zone. It declared that South Vietnam was in favour of free elections, but stated that "the absence of all liberties in North Vietnam makes impracticable at the moment any approach to the problem of electoral and pre-electoral operations." The North Vietnamese Government, on the other hand, offered on June 4 to open discussions with South Vietnam, and stated that it would ask for a new Geneva Conference if South Vietnam maintained its "negative attitude."

M. Pham Van-Dong had previously suggested to the South Vietnamese Government (on May 11, 1956) that a consultative conference should meet to make arrangements for elections to a single National Assembly, which would appoint a coalition Government for the whole of Vietnam. He subsequently addressed Notes to the British and Soviet Foreign Ministers on July 13, and again on Aug. 10, 1956, complaining that the South Vietnamese Government had failed to respond to North Vietnam's overtures; asking them to urge South Vietnam to agree on a date for a consultative conference; and suggesting that if the South persisted in its attitude, the co-chairmen should convene a new Geneva Conference.

After an interval of nearly a year, the North Vietnamese Government renewed its demand for the implementation of the Geneva Agreements in the summer of 1957. In a letter to President Diem (July 18) M. Pham Van-Dong suggested that discussions should take place on the organization of elections, and that postal services between the two zones should be restored as a step towards reunification. The South Vietnamese Government replied (in a communiqué issued on July 26) that it could "examine no proposal of the Vietminh Communists without proof and guarantee that they place the supreme interests of the nation above the interests of Communist imperialism," and that the subjection of the North to the Communist system was a fundamental obstacle to reunification. The Northern Government nevertheless proposed on Sept. 25, 1957, the holding of a conference to consider the re-establishment and development of economic relations between the two zones—a proposal which met with no response.

In a letter to President Diem on March 7, 1958, M. Pham Van-Dong repeated his proposal for a conference, which, he suggested, should meet at an early date to discuss a reduction in the number of troops on both sides and the establishment of trade relations with a view to promoting reunification; the letter strongly criticized "American interference in the internal affairs of South-East Asian countries," particularly Vietnam. In Saigon, the Northern offer was officially described as "phoney" and "a propaganda trick," and on April 26 the South Vietnamese Government issued a declaration rejecting it.

After stressing the "contradictions between the declarations and actions of the authorities in Hanoi," the statement said that the South Vietnamese Government also aimed at the country's reunification, general elections, free circulation between North and South, reduction of military forces, commercial exchanges, and loyal relations. Before any negotiations could be considered, however, "authorities in Hanoi must prove their good faith" by meeting the following six conditions: (1) they should allow the 92,319 people who, it was claimed, wished to leave the Northern territory for South Vietnam to do so; (2) they should reduce their military forces to the level of those in the South; (3) they should renounce the use of "methods of terrorism and sabotage"; (4) they should allow the population of the North to "work in freedom and raise their living standards"; (5) they should cease "to force the population to conduct propaganda in their favour in letters sent to the South"; and (6) they should "establish democratic liberties similar to those existing in the South."

Charges of increasing their armed forces were brought against each other by the two Vietnamese Governments on numerous occasions.

The Northern Government claimed on May 15, 1957, to have demobilized 80,000 men, and alleged that over 2,000 U.S. military personnel were in South Vietnam contrary to the terms of the Geneva Agreements, which limited the strength of the U.S. Military Advisory Group to 300 men; this was denied by the U.S. Defence Department, which, however, admitted that the strength of the Group was 692 officers and men. The Southern Government claimed in March 1958 to have reduced its own military manpower, despite the withdrawal of 200,000 troops of the French Expeditionary Corps, but alleged that the size of the Northern Army had been increased to 350,000 regulars and 250,000 militiamen.

The International Control Commission transferred its headquarters from Hanoi to Saigon in March 1958. Announcing its consent to the move, the South Vietnamese Government reaffirmed that it did not consider itself bound by the Geneva Agreements, but said that it would continue to regard the Commission as "an organization working for peace" and would extend to it "*de facto* co-operation."

A North Vietnamese liaison mission with the International Control Commission, which had been established in Saigon for several years, left for Hanoi on May 17, 1958. The South Vietnamese Government had previously announced that it had ordered the Communist mission to close down by May 15 and that "adequate measures" would be taken "to make the Government's decision effective." The statement said that the presence of the mission in Saigon had resulted from an agreement concluded between the Vietminh and the former French High Command in Indo-China, against the wishes of the South Vietnamese Government, and that this agreement had lost its meaning after the withdrawal of the French forces from Vietnam since 1956. It was alleged that the Northern liaison mission had committed "a number of espionage and subversive propaganda activities" during its stay in South Vietnam.

[Although the International Control Commission had its headquarters in Hanoi before March 1958, it also maintained a branch office in Saigon; the North Vietnamese liaison mission was accredited to this branch before its expulsion from South Vietnam.]

Mr. Triloki Nath Kaul, a joint secretary in the Indian Ministry of External Affairs, assumed the chairmanship of the International Control Commission in Vietnam in February 1957, in succession to Mr. Gopalaswami Parthasarathi, who had been appointed Indian Ambassador to Indonesia. (Le Monde, Paris - Times - New York Times - Vietnam Press Agency, Saigon - Indian High Commissioner's Office, London) **(Prev. rep. 13816 A; 14253 A.)**

A. SOUTH AFRICA. — United Party Leaders elected to Parliament. - Rondebosch and Yeoville By-elections.

Sir de Villiers Graaff (the leader of the United Party), who was defeated at Hottentots-Holland in the recent general elections, was returned unopposed for Rondebosch on June 3 after Colonel Pilkington Jordan had resigned the seat in his favour. Colonel Jordan had previously been nominated for one of the Senate seats held by the United Party.

Mr. S. J. Marais Steyn (chairman of the U.P. in the Transvaal), who had been defeated at Vereeniging at the general election, was returned unopposed on the same date for the Yeoville constituency, where Mr. A. L. Kowarsky had resigned the seat in his favour.—(Cape Times) **(Prev. rep. 16169 A.)**

B. CEYLON. — Nationalization of Cargo Handling at Port of Colombo. - Bus Services nationalized.

In view of repeated and lengthy strikes in the port of Colombo, which had disrupted Ceylon's import and export trade and made ships increasingly reluctant to use the port, the Ceylonese Government appointed a commission on Aug. 23, 1956, under the chairmanship of Mr. E. F. N. Gratiaen (the Attorney-General), to inquire into the working of the port. The commission's report, published in January 1957, recommended that the Port authority should be reorganized to enable it to control the working of private contractors more effectively, and that the number of contractors operating in the port should be reduced. After considering the report the Government decided, however, to nationalize cargo handling at the port of Colombo, and a Bill for that purpose was subsequently introduced in the House of Representatives and received its third reading on April 11, 1958.

Moving the second reading on April 10, Mr. M. Senanayake (Minister of Transport and Works) said that since the war imports of general cargo into Colombo had increased by 50 per cent, food cargo had increased by over 2,000,000 tons, and passenger traffic had also increased, with the result that Colombo harbour had become busier than any other Eastern port. Haphazard and unco-ordinated measures adopted in the handling of cargo had had "disastrous" effects, however, worsened by labour unrest and lack of discipline among the port workers. The limitations of the available mechanical equipment, and the current labour potential, made it essential that the number of private operators should be reduced and all cargo operations controlled by a single authority, and nationalization was considered the only possible measure to meet the situation adequately. A single agency, the Port (Cargo) Corporation, would therefore be set up to direct, control, co-ordinate and supervise all cargo-handling operations, and to take full responsibility for the conditions of labour and welfare of the port workers.

The Port (Cargo) Corporation, which was established under a second Bill passed on May 2, became solely responsible for the stevedoring, landing, and warehousing of cargo from June 30, 1958, when all licences issued to private operators expired.

The Motor Transport Bill, providing for the nationalization of all bus services in Ceylon, was given a unanimous third reading on Oct. 17, 1957 and came into operation on Jan. 2, 1958. It transferred the property and equipment of all private bus companies, in return for compensation, to a Transport Board, which received the exclusive right to operate bus services in Ceylon.—(Ceylon Government Information Dept.)

C. NEW ZEALAND.—Ending of Compulsory Military Training. - Creation of Ministry of Civil Defence.

It was announced in Wellington on June 27 that the N.Z. Government had decided to end compulsory military training for all men over 18 as from March 31, 1959. It would, however, remain obligatory for all males to register and to have a medical examination on reaching the age of 18.

A White Paper on Defence, issued on the same date, said that an operational army would be established to meet New Zealand's defence commitments, because the Labour Government considered that the present organization of the Army did not provide sufficient flexibility or mobility. The new Army would have an establishment force of 2,510; an operational regular brigade group (including an armoured regiment) with a strength of approximately 5,600; and a volunteer territorial force with an estimated strength of 7,000.

The White Paper pointed out that as regards compulsory military training the N.Z. Government had come to the same conclusions as those expressed in the British White Paper on Defence of 1957, in which emphasis was laid on highly trained mobile forces and the concentration of military effort on a fully equipped regular force capable of meeting the requirements of modern warfare speedily and effectively in an emergency.

It was also stated that the plans for the Royal New Zealand Navy and Air Force [which are already on a regular basis and in process of re-equipment] would remain unchanged, and that a Ministry of Civil Defence would be established to prepare for the possibility of nuclear attack against New Zealand. Referring to the country's Commonwealth obligations, the White Paper stated that New Zealand would continue to contribute to the Commonwealth Strategic Reserve in the Far East an infantry battalion, a cruiser or frigate, a squadron of *Canberra* aircraft, and transport and naval aircraft.

The re-equipment of the new force with modern weapons and transport was estimated to cost NZ.£8,000,000, while the total cost of the N.Z. Defence Budget (now standing at NZ.£9,000,000) would be increased to NZ.£12,000,000. (Directorate of Information, Wellington) **(Prev. rep. 15612 B.)**

A. ARGENTINA. — Law on Governmental Organization. - New Ministerial Appointments. - Amnesty Law.

A Bill regulating the organization of the Argentine Government was passed by the Chamber of Deputies at the end of May and by the Senate during the first fortnight of June. It provided that the Government would consist of eight Cabinet Ministers and 12 State Secretaries. The latter would be in charge of self-contained departments, would have ministerial status, and would take part at Cabinet meetings, but might not constitutionally speak for the Administration in Congress. Decrees referring to their departments would not be signed by the State Secretary but by the Minister to whom they were subordinated.

The restriction of the principal Ministries to eight was necessitated by a provision of the 1853 Constitution; the formation of State Secretariats, to deal with the vastly increased functions of government, represented a compromise between the constitutional position and practical necessities pending a reform of the Constitution. The eight Ministries are (1) Interior; (2) Foreign Affairs and Religious Affairs; (3) Economic Affairs; (4) Public Works and Services; (5) Education and Justice; (6) Social Assistance and Public Health; (7) Labour and Social Security; (8) National Defence.

The Bill was opposed by the Moderate Radicals, who criticized it on the ground that it practically restored the governmental set-up which was in force under the Perón regime. In reply to these criticisms, Dr. Vitolo (the Minister of the Interior) gave an assurance that the Government had no "totalitarian intentions" whatever in proposing the new organization.

[The fact that the three State Secretaries for the armed forces will be under a civilian Minister of Defence constituted an important innovation, since it was expected to lead to a restriction of the influence of the armed forces on political matters.]

On the basis of the new law the eight Cabinet Ministers and 12 State Secretaries were sworn in on June 18 as follows:

Interior:
Minister .. Dr. Alfredo Roque Vitolo.
Foreign Affairs and Religion:
Minister .. Dr. Carlos Alberto Florit.
Economic Affairs:
Minister .. Dr. Emilio Donato del Carril.
Secretaries Dr. Bernardino C. Horne (Agriculture).
Dr. Ricardo Lumi (Treasury).
Dr. Antonio López (Finance).
Dr. José Carlos Orfila (Trade).
Dr. Alberto V. Tedin (Industry and Mines).
Dr. Gregorio Meira (Energy and Fuels).
Public Works and Services:
Minister .. Señor Justo Villar.
Secretaries Señor Alberto R. Constantini (Works).
Sr. Adolfo T. Cosentino (Communications).
Dr. Alberto López Abuin (Transport).
Education and Justice:
Minister .. Dr. Luis Rafael MacKay.
Social Assistance and Public Health:
Minister .. Dr. Héctor Virgilio Noblia.
Labour and Social Security:
Minister .. Señor Alfredo Allende.
National Defence:
Minister .. Señor Gabriel del Mazo.
Secretaries Brig. Gen. Héctor Solanas Pacheco (War).
Rear-Admiral Adolfo Estévez (Navy).
Commodore Roberto Huerta (Air).

Drs. Vitolo, Florit, del Carril, MacKay, and Noblia were members of the Frondizi Cabinet as originally constituted, while Señores Villar, Allende, and del Mazo were new appointments. Of the State Secretaries, all were new appointments except General Solanas Pacheco, Admiral Estévez, and Commodore Huerta, who had had full ministerial status before the enactment of the organizational law.

Amnesty for Political Offences.

President Frondizi had previously (May 22) signed an amnesty Bill which had been passed by the Chamber of Deputies on the same day after prior adoption by the Senate.

The Bill, which was adopted by an overwhelming majority, provided (1) that "ample and general amnesty" would be granted "for all political offences, including common or military crimes committed for political or trade union ends"; (2) that no-one could be "questioned, investigated, summoned to appear, or interfered with in any way" on suspicion of having committed political offences; (3) that all Orders imposing disqualifications on political or trade union offenders would be revoked. [Dr. Vitolo explained that previous legislation had disqualified 6,000 people, while 6,400 others had been accused of political or trade union offences]; (4) the decision whether a crime had been committed on purely political or on trade union grounds would be left to the Federal Courts.

The Bill, which implemented a pledge given by President Frondizi during his election campaign, was supported by 130 of the 131 Intransigent Radical deputies (the Government party); parts of it, however, were opposed by the Opposition on the ground that it might open the way to General Perón's return to Argentina.

As a result of the amnesty law, Rear-Admiral Teisaire (Vice-President under the Perón regime), was released from prison on May 30, a Federal judge ruling that his offences had been committed for political ends. Three other leading *Peronistas* – Señor Angel Borlenghi (Minister of the Interior under Perón), Señor Eduardo Vuletich, and Señor José Espejo - were similarly cleared of non-political charges. The judge, however, upheld charges of a "non-political character" against ex-President Perón himself, who was accused of treason, "illegal association," and offences connected with the burning of an Argentine flag in June 1955, when he was alleged to have ordered the flag to be burned in such a way as to make it appear that Roman Catholic demonstrators were responsible – see 14277 A. (Bank of London and South America, Fortnightly Review - New York Times - Neue Zürcher Zeitung)

(Prev. rep. 16218 C.)

B. UNITED KINGDOM - UNITED STATES. — American Investments in Britain.

A recent book by Dr. J. H. Dunning, *American Investment in British Manufacturing Industry* (published by Allen & Unwin, London), gave the first comprehensive survey of American investment in the United Kingdom, especially since the end of the Second World War. Dr. Dunning stated that American firms had invested some £250,000,000 of new capital in British manufacturing industry between 1950 and 1955, and that there were now probably about 250 U.S. industrial concerns in Britain with an annual sales turnover of around £900,000,000, and employing about 350,000 people.

The following table, based on Dr. Dunning's book, was published by *The Times* showing the distribution of American investment in the United Kingdom:

	1955	1950	1943	1936	1929
	(million dollars)				
Mining and smelting ..	3.0	3.2	14.2	....	....
Petroleum	216.0	123.0	74.5	61.0	21.0
Manufacturing	941.0	541.8	306.6	271.0	268.0
Public Utilities . ..	16.0	10.6	-13.2*	....	....
Trade	141.0	102.2	84.9	81.0	68.0
Miscellaneous	103.0	66.2	53.2	61.0	128.0
Total	1,420.0	847.0	518.8	474.0	485.0

*Net amount owing by United States to British interests.

Dr. Dunning pointed out that one reason for this large rise in U.S. investment was the world shortage of dollars. A second one was the general demand for American-type goods in Britain, both among consumers and in industry, U.S.-controlled firms having played a major part in the development of the office equipment, earth-moving, and industrial instrument industries. A third reason was the development by Britain of certain specific industries, such as petroleum refining, which necessarily involved U.S. participation.

The principal advantages of the growing U.S. investment in the British economy had been in balance-of-payments savings and in a general acceleration of industrial development. On the former there had been a two-fold effect: (i) American investments had reduced Britain's import bill, especially the dollar import bill - the Fawley refinery of the Esso Petroleum Company alone being estimated to have saved $300,000,000 between 1952 and 1955; (ii) U.S.-controlled companies had played a major part in developing exports to the U.S.A. itself (notably motor cars) and to other markets. As regards the general acceleration of industrial development, this had been due to the fact that British firms had seen American management, research, and marketing techniques in action, thus making them more receptive to new ideas and more readily adaptable to a changing economic climate.

It was stated by Dr. Dunning that among "new" industrial products (i.e. those produced commercially since the 1930's) U.S.-financed firms now accounted for about one-third of all British exports; or, if motor cars were included, for about two-fifths. ("American Investment in British Manufacturing Industry" - Times)

C. PAKISTAN. — Destroyers acquired from Britain.

The former British destroyers H.M.S. *Crispin* and H.M.S. *Creole*, which had been bought by Pakistan, were formally handed over to the Pakistani Government on March 18 and June 20 respectively after extensive refitting and modernization. Both ships were completed in 1944-46, and have a displacement of 2,500 tons and a speed of 36 knots. The *Crispin* was renamed *Jehangir* and the *Creole* became the *Alamgir*.

JULY 12—19, 1958

A. FRANCE. — Resignation of M. Pflimlin. - General de Gaulle forms National Coalition Government. - Investiture by National Assembly. - Adoption of Special Powers Bill and Constitutional Reform Bill. - Adjournment of National Assembly. - General de Gaulle's Cabinet.

The Corsican revolt of May 24, following the Algerian insurrection of May 13, resulted within three days in the resignation of M. Pflimlin and in the subsequent formation of a Government by General de Gaulle. The further stages in the French crisis are described below, in continuation of 16255 A :

Pflimlin Government's Reactions to Corsican Revolt. - Press Censorship. - Jamming of Algiers Broadcasts.

After a three-hour meeting of M. Pflimlin's Cabinet, held at the Elysée under the chairmanship of President Coty, it was announced in the early hours of May 25 (*a*) that " disciplinary and penal action " would be taken against all servants of the State, whether civil or military, who had committed acts of subversion in Corsica ; (*b*) that the Government would introduce a Bill for the unseating of any deputy who sought to remove any part of the national territory from the sovereignty of the Republic ; (*c*) that sea and air communications between the metropolitan territory and Corsica had been suspended for reasons of security ; and (*d*) that full censorship would be imposed on all newspapers, periodicals, press agencies, and broadcasting stations in metropolitan France.

The threat to take " disciplinary and penal action " against officials in Corsica was, in fact, a dead letter because the Pflimlin Government exercised no control in Corsica. The action under (*b*) was aimed specifically at M. Pascal Arrighi, the Corsican deputy whose arrival in the island from Algiers precipitated the revolt.

In a broadcast at 2 a.m. (May 25), immediately after the Cabinet meeting, M. Pflimlin said that legal proceedings would be taken against all members of the Corsican committees of public safety and those who had " taken part in the *coup de force*." He repeated his earlier warning that certain " factious persons " (*factieux*) in the metropolitan territory were threatening to drag France " down the slope that leads to civil war."

M. Pflimlin said that while the Algerian uprising could be largely explained by the public sentiment which wished to ensure that Algeria remained French, there was no such justification for the action carried out in Corsica by " a handful of *factieux*." He again appealed to all Frenchmen to rally in support of the Government, which was determined " to defend public order, civil peace, and national unity against all extremists and enemies of liberty."

In addition to imposing a press censorship, the Government ordered the jamming of all broadcasts from Radio Algiers on the ground that some of these broadcasts had taken the form of seditious exhortations to the population of metropolitan France. Among other security measures, the Minister of the Interior (M. Moch) sent five companies of Republican security guards to Marseilles as a precaution against possible disorders in that city.

On May 25, and for several days thereafter, many French newspapers appeared with blank spaces where certain offending articles, passages or photographs had been struck out by the censors ; e.g. *Le Parisien* appeared on May 27 with a large white square on the front page with the words " censored photo from Algeria " printed across it. On May 26 the Paris police seized all available copies of several British and U.S. papers—*The Times, Daily Telegraph, Daily Mail*, and *New York Herald Tribune*—on the ground (as explained at the Ministry of Information) that the Government had taken exception to certain headlines implying that France was on the brink of civil war. [*The Times* Paris Correspondent nevertheless cabled that " through some inexplicable oversight, a large number of these newspapers found their way to the Paris kiosks, where . . . they were soon sold out."] All copies of the *Manchester Guardian, Daily Telegraph, Daily Express*, and *Daily Mirror* were similarly impounded by the police on May 27.

For some days previously Radio Algiers had been broadcasting a number of messages in code—many of which, it was believed, contained instructions to clandestine " committees of public safety " in various parts of France. Certain code messages—e.g. " the chapel will be lit up tonight " and " the bottle of Muscadet has arrived "—were broadcast at frequent intervals. [It subsequently became known that the " bottle of Muscadet " was M. Soustelle, and that the code message referred to his arrival in Algiers after escaping from police supervision in Paris.] Other broadcasts from Algiers described M. Pflimlin as a " French Kerensky " and called upon him to " choose between the Star of Moscow and the Cross of Lorraine."

Political Negotiations in Paris. - M. Pflimlin's Meeting with General de Gaulle.

The Algerian and Corsican revolts, the possibility of disorders spreading to the metropolitan territory, and the ambiguous position of the armed forces *vis-à-vis* the Government, all combined to produce a situation in which the leaders of the major " national " (i.e. non-Communist) parties became increasingly convinced that the only way out of the *impasse* was the formation of a Government headed by General de Gaulle.

The " appeal to General de Gaulle " had already begun on May 22, when M. Pinay (leader of the Independents) visited Colombey for a long discussion with the general ; no statement was issued on these talks, but it was understood that M. Pinay had subsequently urged M. Pflimlin to open direct negotiations with General de Gaulle. On May 26, a day of rapid and complicated political developments in Paris, the Independent group in the National Assembly asked M. Pinay to suggest that General de Gaulle should call a conference of all " national " political parties ; the Socialist leader (M. Guy Mollet) sent a six-page letter to the general, the contents of which were not published ; a telegram was also sent to General de Gaulle by M. Lacoste, a prominent Socialist and formerly Resident Minister in Algeria ; M. Pflimlin made a statement on the Corsican situation to the National Assembly ; and the Assembly subsequently passed a Bill to lift parliamentary immunity from M. Arrighi. Finally, during the night of May 26-27, M. Pflimlin and General de Gaulle had a secret meeting at St.-Cloud, on the outskirts of Paris.

In his telegram to General de Gaulle, M. Lacoste appealed to the general " to use your high authority to dispel public uncertainty by speaking out against irresponsible elements." He said that General Salan and the " non-political patriots of Algeria " had been " outflanked by adventurers and certain hot-headed officers," adding that the " Corsican affair " was a direct consequence of " the anterior action in Algeria."

When the National Assembly met in the morning of May 26, M. Pflimlin made a short statement in which he stressed the difference between the Algerian and Corsican *coups de force*, declaring that " no justification or excuse " could be invoked for the happenings in Corsica. He repeated his warnings that similar events could happen in the metropolitan territory ; declared that the danger now facing France was " that of civil war " ; and once more called on all Republicans to unite against " factious elements."

Under Standing Orders, only one speaker was allowed to reply to this speech ; M. Deixonne (Socialist), like M. Pflimlin, dwelt on the distinction between the Algerian and Corsican uprisings, and asked for energetic action against the leaders of the Corsican revolt. The Assembly then spent the day discussing various constitutional reforms, before proceeding to adopt a Bill depriving M. Arrighi of his parliamentary immunity.

The Bill lifting parliamentary immunity from M. Arrighi was adopted in the late evening of May 26 by 393 votes to 169, with 6 voluntary abstentions, 13 deputies not participating in the vote, and another 10 absent on leave.

The 393 majority votes comprised 148 Communists and *progressistes*, 96 Socialists, 70 M.R.P., 39 Radicals, 14 *Regroupement Africain*, 13 U.D.S.R., 5 Independents, 4 R.G.R., 2 *paysans d'action sociale*, 1 *Gauche Démocratique*, and 1 *non-inscrit*.

The 169 opposing votes were cast by 79 Independents, 29 Poujadists, 17 Social Republicans, 12 *Gauche Démocratique*, 10 *paysans*, 7 R.G.R., 5 *non-inscrits*, 3 Radicals, 3 *paysans d'action sociale*, 2 U.D.S.R., and 2 M.R.P. deputies, including M. Bidault.

Meanwhile, correspondence had passed during the day between General de Gaulle and M. Pflimlin through the intermediary of M. Diebold, an official on the Prime Minister's staff. Late at night on May 26 the general motored from Colombey for a secret meeting with M. Pflimlin at St.-Cloud, of which nothing was known at the time ; the talks went on for the greater part of the night and General de Gaulle did not return to Colombey until 5 a.m. on May 27.

General de Gaulle announces Preparations to form Government. - Independents leave Pflimlin Cabinet. - M. Pflimlin tenders Resignation to President Coty.

At 12.30 p.m. on May 27, General de Gaulle issued a statement announcing that he had " begun yesterday the normal process needed to establish a Republican Government capable of restoring the unity and independence of the country." The statement went on :

" I am convinced that the process will continue and that the nation will show by its calm and dignity that it hopes to see it end successfully.

" In these conditions any action endangering public order, from whatever side it originates, may have grave consequences. Even though I understand the circumstances, I could not approve.

" I expect the land, sea and air forces in Algeria to maintain exemplary behaviour under the orders of their commanders, General Salan, Admiral Auboyneau, and General Jouhaud. To these leaders I express my confidence and my intention to make contact with them soon."

General de Gaulle's statement led to a series of hurried and confused ministerial and party meetings at the Palais Bourbon, where the National Assembly was continuing its debate on M. Pflimlin's proposed constitutional reforms. The Socialist Party's parliamentary group, meeting in the afternoon of May 27, passed by an overwhelming majority (112 votes to 3) a resolution declaring (1) that it was "the duty of the legal Government to remain at its post as long as it possesses the confidence of the Assembly"; and (2) that the Socialist Party would "under no circumstances rally to the candidature of General de Gaulle, which, in the form in which it is presented, and the conditions accompanying it, is . . . a challenge to republican legality."

It was understood that the Independents were of opinion that the Government should resign immediately, and that they had threatened to withdraw the Independent Ministers from M. Pflimlin's Cabinet unless it did so. The M.R.P., on the other hand, were believed to share the Socialist view that the Government should remain in office unless deprived of its mandate by the Assembly.

The National Assembly twice suspended its sittings during the day—at 11.45 a.m. and 3 p.m.—to enable M. Pflimlin to make a statement on the situation. M. Duclos (the Communist leader) attempted to raise the matter in advance of the Prime Minister's statement, denouncing General de Gaulle as a "dictator-usurper" and declaring that "a new Vichy" was being prepared. At 7.30 p.m. the same evening the Assembly met for the third time during the day to hear the following statement by M. Pflimlin:

"Yesterday I received a message from General de Gaulle proposing an interview, and suggesting that such a meeting was necessary in view of the very serious situation confronting the country. I accepted this invitation, and we had a meeting last night. If I did so, it was because I considered it my duty to neglect no effort to spare the country from the possibility of civil war. I asked General de Gaulle to use his moral authority to recall to a sense of duty those who have taken the road of insurrection against the republican order, or who think of doing so. I obtained no assurance from the general that he would take an immediate stand for the maintenance of public order. I knew nothing of his declaration until it was published.

"I am bound to say, however, that General de Gaulle has now formally declared that he would in no circumstances approve of any action which might threaten public order, from whatever source it might come. I am grateful to him for making this clear.

"Our interview last night dealt with different aspects of the national crisis. Confirming his recent public declarations, General de Gaulle told me that he could not envisage taking over responsibility except by legal means. He said that he was ready to enter into discussions with the political leaders to examine the conditions in which a government could be formed under his leadership."

Referring to himself in the third person, M. Pflimlin continued: "The Prime Minister has not for a moment forgotten that he has been invested by the National Assembly. The mandate you gave him can only be returned into your own hands. The moment has come for each one of us to face our responsibilities . . . As for the Government, its path of duty is clear—we will not create a power vacuum . . ."

In conclusion, M. Pflimlin said that the Assembly would be asked later in the evening to vote on his Government's proposals for constitutional reform; that he would regard the vote as one of confidence; and that he would ask for a "republican and national majority" (i.e. excluding any Communist votes which might be cast for the Government).

M. Pflimlin's statement was followed by a confused debate marked by violent altercations between the extreme left- and right-wing benches.

Among the various speakers, **M. Duclos** asked if the Republic was "already dead" and accused General de Gaulle of "talking as if he were already the Head of State and the Head of Government", **M. Mitterrand** (U.D.S.R.) called on the Government to stand firm against any *fait accompli* and accused it of "shaking at the first puff of wind from Colombey-les-Deux-Eglises"; and **M. Ramadier** (the veteran Socialist) appealed to all democratic parties to unite "for the safety of the Republic."

M. Lecoeur (a young Radical deputy) expressed his "disgust" and disillusionment with the working of the National Assembly, which he compared to "acrobatics on the flying trapeze"; after saying that "the whole of France wants a change," he declared: "This irresistible demand will take place without us unless we channel it. If we do not introduce something new, if we continue our ridiculous struggles, I will not remain in this House, which is stagnant and rotting."

At 1.15 a.m. on May 28 the National Assembly voted on the proposed amendment of 13 Articles of the Constitution, the various amendments having previously been approved by the Assembly's Universal Suffrage Commission. [The Articles in question were 9, 12, 13, 16, 17, 45, 48, 49, 50, 51, 52, 90 and 92]. There were 408 votes in favour of the constitutional reform proposals and 165 against, with 4 voluntary abstentions, 6 deputies not taking part in the vote, and 8 absent on leave.

The 408 votes cast for the Government comprised 148 Communists and *progressistes*, 96 Socialists, 73 M.R.P., 39 Radicals, 17 U.D.S.R., 15 *Regroupement Africain*, 7 Independents, 6 R.G.R., 6 *Gauche Démocratique*, and 1 *non-inscrit*.

The 165 opposing votes were cast by 76 Independents, 29 Poujadists, 17 Social Republicans, 17 *paysans* and *paysans d'action sociale*, 8 R.G.R., 7 *Gauche Démocratique*, 5 *non-inscrits*, 3 Radicals, 2 U.D.S.R. and 1 *Regroupement Africain*.

Although M. Pflimlin received a large "national" majority (i.e. excluding the 148 Communist votes) he was nevertheless faced by two immediate complications: (1) the resignation of the four Independent Ministers from his Government, which had been announced in the evening of May 27 prior to the Assembly's debate; and (2) the fact that the Government had failed to obtain the required absolute majority for its constitutional reform proposals, without counting the Communist votes.

Under the Constitution, an absolute majority of the Assembly's membership is necessary for the adoption of a constitutional amendment, and M. Pflimlin would have had to obtain 296 votes to secure such a majority. As he had previously declared that he would take no account of Communist votes cast for the Government, his majority—excluding the 148 Communist votes - was in fact 266, or 30 fewer than the number required for an absolute majority.

The vote in the Assembly was followed by a prolonged Cabinet meeting at which the major issue was whether the Government should resign because of the withdrawal of the Independent Ministers, or because it had failed to get an absolute majority after discounting Communist votes. The former course was eventually decided on, and M. Pflimlin accordingly visited the Elysée shortly before dawn on May 28 to tender his resignation to President Coty.

The President refused to accept M. Pflimlin's resignation until a new Government had been formed, and requested him to remain in office in a "caretaker" capacity until this had been done. M. Pflimlin, who agreed to this course, issued the following statement on leaving the Elysée:

"I gave an account to the President of the Republic of the situation as it appeared after the debate in the National Assembly. The Government obtained a majority after deducting the Communist votes, but an important group [the Independents] left the coalition.

"Thus the Government found itself weakened at a moment when it had to face more and more formidable tasks. Consequently I handed my resignation to the President of the Republic. He told me that he could not accept it until it was possible to form a new Government. In the meantime, to avert a power vacuum, I have resolved to keep my full governmental responsibilities."

President Coty's Consultations with Political Leaders. - Message to French Parliament. - General de Gaulle accepts Invitation to form Government.

On May 28 President Coty had discussions at the Elysée with MM. Le Troquer and Gaston Monnerville, the respective presidents of the National Assembly and the Council of the Republic; with MM. Mollet, Pinay and Teitgen (respective leaders of the Socialist Party, the Independents, and the M.R.P.), who had a joint meeting with the President; and with M. Vincent Auriol, the Socialist "elder statesman" and M. Coty's predecessor as President of the Republic. At the President's request, MM. Le Troquer and Monnerville saw General de Gaulle the same night (i.e. May 28-29).

It was understood that President Coty had informed MM. Mollet, Pinay and Teitgen of his intention to ask General de Gaulle to form a Government. The general, meanwhile, had been visited at Colombey by Marshal Juin (the retired Inspector-General of the Forces) and by a "high personage" who was believed to be General Catroux.

After receiving a report from MM. Le Troquer and Monnerville on their meeting with General de Gaulle, President Coty announced in the early hours of May 29 that he intended to send a message to both Houses of Parliament later in the day. The announcement added: "In the grave hours to come, the Head of State relies on the patriotism of all who live under the protection of the Tricolor to await with calm, and without disturbing public order, the decisions which are shortly to be taken."

President Coty's message was read to the National Assembly the same afternoon by M. Le Troquer, and to the Council of the Republic by M. Monnerville. In it, President Coty gave a warning that France was "on the brink of civil war"; announced that he had asked "the most illustrious of Frenchmen" to form a "government of national safety"; and said that he (the President) would have no other course but to resign if General de Gaulle were unable to form an administration. The presidential message was worded as follows:

"On the day when Parliament called me to be the Chief Magistrate of the Republic, I gave an undertaking—which I shall keep to the end—scrupulously to obey the Constitution. But I also felt bound to add that we should not be able to defend our free institutions unless we were capable of reforming them.

"I repeated this to you in my inaugural message. Since then, in most of my public speeches, I have reiterated that among all true democracies, the French Republic is the one which is not only faced with the most difficult problems but which has the most fragile Governments, and consequently the weakest. If I thus exceeded the limits that my predecessors set themselves, I believed myself authorized to do so, not only by the assent of successive Heads of Government, but also by the great majority among you.

"Four years and a half will soon have passed, but my increasingly urgent appeals have had no effect. Whatever may have been the courage and patriotism of the men who have followed one another in power, the State has not ceased to disintegrate. Now we are on the brink of civil war.

"After having for 40 years fought so hard against the enemy, are Frenchmen tomorrow going to fight against Frenchmen? On both sides men are deeply convinced that they are serving the country; on both sides many of them have defended it at the cost of great sacrifices. On both sides they now seem to be approaching a fratricidal conflict. Whoever might be the temporary victors, what would remain after such an unforgivable conflict? What would remain of our France?

"Right through our history, after the most violent internal conflicts, great days of French reconciliation and of renewals of national unity have occurred. This national unity cannot be achieved in anarchy, but only by respect for the law.

"When it comes to forming a Government under our present Constitution, the President of the Republic proposes but the National Assembly disposes. Obviously there can be no question this time of my multiplying my nominations [i.e. of sending successively for party leaders and asking them to undertake the task of forming a Cabinet]. The choice that falls on me is therefore heavy with consequences. It imposes on me an exceptional responsibility.

"That is why I must explain things frankly to you. In the peril in which the nation and the Republic find themselves, I have turned to the most illustrious of Frenchmen—to him who, in the darkest years of our history, was our leader for the re-conquest of liberty and who, having achieved national unity around himself, nevertheless rejected dictatorship and re-established the Republic.

"In what conditions would he now agree to assume the crushing burden of power? Would the necessary majority be forthcoming for his investiture under these conditions? I asked the President of the National Assembly and the President of the Senate, whom I thank for their valuable assistance, to be good enough to meet General de Gaulle urgently. This meeting showed me that at present there are still considerable difficulties to be overcome.

"Should I then abandon my appeal to him whose incomparable moral authority would assure the safety of the country and the Republic? On such a day, sacred union (*l'union sacrée*) is the supreme duty. It demands that we should all sacrifice, if necessary, some part of our preferences, and even of our convictions. To you, the representatives of the nation, I say there can be no more question of deciding the nation's destiny at party meetings behind closed doors. It is only when the President of the Republic has taken the initiative reserved to him by the Constitution [i.e. of addressing Parliament directly] that your sovereign and free vote will decide.

"I ask General de Gaulle to be good enough to confer with the Head of the State and examine with him what, in the context of Republican legality, is immediately necessary for a Government of National Safety, and what could then be quickly done to bring about a radical reform of our institutions.

"I shall therefore take, in my soul and conscience, the decision that devolves upon me. If the failure of my attempt should show that I have been wrong at such a critical moment, I should not fail to draw the ineluctable consequences. Being unable to maintain the moral authority that would more than ever be necessary to him who is generally regarded as the supreme arbiter, I could only transmit immediately my full powers to the President of the National Assembly in accordance with Article 41 of the Constitution . . ."

The reading of the presidential message was followed by uproar in the National Assembly, where the Communist deputies shouted *le fascisme ne passera pas* and started to sing the *Marseillaise*—in which they were joined by the Socialists and some of the Radicals. The Poujadists and a number of right-wing deputies also broke into the *Marseillaise*, whereupon the Communists began to sing the *Chant du départ*—a famous revolutionary song commemorating the fall of the Bastille. The sitting broke up in disorder amidst angry recriminations and much banging of desks.

Thereafter, events moved very rapidly during the afternoon and evening of May 29, as follows: 4 p.m.—General de Gaulle left Colombey for Paris; 5 p.m.—the text was published of correspondence exchanged between M. Vincent Auriol and General de Gaulle; 6 p.m.—the Socialist Party's parliamentary group decided by 62 votes to 29 to approve M. Auriol's letter to the general (thus, by inference, rescinding its previous decision not to recognize General de Gaulle's candidature for the Premiership); 7.30 p.m.—General de Gaulle arrived at the Elysée; 8.45 p.m.—General de Gaulle left Paris for Colombey; 9.30 p.m.—President Coty announced that General de Gaulle had accepted the task of forming a government, and the general issued a confirmatory statement setting out the "indispensable conditions" in which he would be prepared to "undertake the task of leading the State and the nation."

The text of M. Vincent Auriol's letter to General de Gaulle, and of the general's reply, is given below:

M. Vincent Auriol to General de Gaulle.

"It is your Minister of State of 1945 who makes this approach to you. There was a time when we clashed, when my constitutional duty made me oppose your revisionist activity But I am confident that you have retained your esteem for me in the same way as I have remained faithful to our friendship. Moreover, what do such personal differences matter in the drama which is now tearing the mother-country asunder?

"I know you are anxious to maintain national unity, without which France would be no more. I know you are determined to re-establish without delay in Algeria, with respect for equality and human dignity, the necessary Franco-Moslem friendship without which a free Algeria would be no more.

"But your direct reply to the men in revolt in Algiers against the national sovereignty has aggravated the sickness already weighing upon the nation The events in Ajaccio, and the creation of committees of public safety throughout France, have thrown a full light on the aims and actions of some of those who have set themselves against the national sovereignty, pushed the military chiefs to a point beyond their duty, thwarted the authority of the Head of State, and gathered larger and larger crowds in order to promote violently and directly your claim to power.

"It is no longer a question of a national agitation or of a surge of brotherhood such as once moved you. It is a rebellion against the institutions and the laws which France has freely given to herself.

"Surely you will not permit the Republic to capitulate before the violence of a faction, or hold by force an authority which would be illegal. Surely you will not agree to be the representative of your former enemies, of those who insulted you after your speeches in Constantine and Brazzaville and refused to abandon their privileges, thus provoking the Moslem rebellion. Surely you will not oppose your former comrades, who, with you, want to create in national unity a great Franco-African friendship.

"It is not in an atmosphere of lies or of civil war—for civil war is at our gates—that one can achieve so great a work which demands above all the union of all Frenchmen It is not against the working class, whose courage and patriotic loyalty supported you in the long night of oppression and in the effort for national liberation, that you will restore the Republican State and exercise power usefully.

"It is thus urgently necessary to restore the unity that has been compromised—and that depends now on you. I am convinced that . . . you will do your utmost to recall to their sense of duty those generals or senior officers who have disobeyed their Supreme Chief, and that you will call on all citizens to respect the common law. If you break all solidarity with those who have created a seditious movement, you will regain the confidence of the entire nation. With confidence thus restored between the Republican people and yourself, you could obtain from the responsible men of the Republic a swift agreement and loyal co-operation in achieving, with full powers, a limited programme within a limited time. The nation could then be asked to give its decision in a free and sovereign manner on the constitutional reform which is required in the supreme interests of democracy.

"I do not believe that you will be indifferent to this message. It has been motivated solely by my friendship and my respect for the great Frenchman whose collaborator I had the honour to be, and by my duty, as an ordinary citizen, to serve the Republic and France."

General de Gaulle to M. Vincent Auriol.

"The events in Algeria, as you well know, have been provoked by the chronic impotence of the authorities, which in the past I did everything possible to remedy. They broke out and developed with the use of my name, without my being involved in any way.

"Things being as they are, I proposed the formation, by legal means, of a Government which I think would be able to rebuild unity, re-establish discipline in the State, particularly on the military side, and promote the adoption by the country of a reformed Constitution.

"However, I have run into determined opposition from the national representatives. Furthermore, I know that in Algeria and in the Army, whatever I have said and whatever I can say today, the state of mind is such that this setback to my proposal threatens to break through the barriers and even to submerge the commanders themselves.

"Since I could not consent to receive power from any other source than the people, or at least its representatives (as I did in 1944 and 1945), I am afraid we are going towards anarchy and civil war. In that case those who, through party considerations which are incomprehensible to me, prevent me from once again saving the Republic while there is still time, will bear a heavy responsibility. As for myself, there would be nothing left for me but to live in sorrow until my death.

"Please believe that the sentiments which I feel for you have remained, throughout the years and throughout all difficulties, most cordial."

As stated above, the Socialist Party's parliamentary group approved M. Vincent Auriol's letter to General de Gaulle by a large majority. The same afternoon, M. Pflimlin told his party (the M.R.P.) that he was "convinced that in the present circumstances, of which I know all the facts, civil peace can only be preserved by the formation of a Government under General de Gaulle."

Statements by President Coty and General de Gaulle.

After his meeting with General de Gaulle, President Coty issued a brief statement saying (1) that he had asked General de Gaulle to form a Government; (2) that the general had accepted the task; and (3) that he (the President) would consult the parliamentary leaders on the following day.

The following press statement was issued by General de Gaulle after his meeting with the President:

"I have had the honour of conferring with M. René Coty. At the request of the President of the Republic, I indicated to him the conditions in which I could take charge of the Government in this decisive moment for the destiny of the country.

"Once the Government has been invested by the National Assembly, it would receive, for a period of time to be determined, the full powers necessary to act in the present very grave situation.

"Furthermore, a mandate would be given to the Government, following a procedure provided for under the present Constitution, to prepare and submit to the country, by means of a referendum, the changes which must be made [in the Constitution], particularly as regards the separation and the balance of powers, as well as the relations between the French Republic and the peoples associated with it.

"I cannot undertake the task of leading the State and the nation unless these indispensable conditions are agreed to with the great and wide confidence that the salvation of France, of the State, and of the Republic demands. To accomplish such a national mission I shall be able to count, I am sure, on the ardent and resolute support of the whole French people.

"The events which press upon us can, from one day to the next, become tragic. It is extremely urgent to restore national unity, to re-establish order in the State, and to make the public powers equal to their duty."

Anti-Gaullist and Pro-Gaullist Demonstrations. - Negligible Response to C.G.T. Call for General Strike.

Prior to the events described above, and before General de Gaulle had made it clear that he would only assume power by legal means, the left-wing and left-centre parties had organized large demonstrations in Paris for the "defence of the Republic," and as a protest against the possibility of a *coup d'état* by the general or his supporters. In addition, the Communist trade union federation (the C.G.T.) issued a call for a general strike, which, however, met with a negligible response in Paris and in the provinces, except in the northern mining areas.

The C.G.T. called on May 26 for a general strike on the following day "as a powerful demonstration of the union of working-class forces for anti-fascist action and the defence of the Republic." On the other hand, the Socialist *Force Ouvrière* and the Christian T.U. federation (C.F.T.C.) issued a joint statement saying that a general strike was "not at present the best way to defend the Republic, especially if the public services are affected"; instead, they called on their members to observe May 28 as a "day of demonstration" in the factories "for the defence of republican liberties," adding that such demonstrations should "stop just short of strike action."

In the Paris area the effects of the general strike were negligible, though electricity was cut off in some districts for several hours and suburban train services were affected. Of the 33,000 workers at the Renault works, only 2,000 came out on strike, and there was virtually no response to the strike call at such large metallurgical and automobile factories as Citroën, Hotchkiss, and Hispano-Suiza. In Marseilles, on the other hand, over 50 per cent of the metallurgical workers came out, while between 20 and 40 per cent of factory workers stopped work at Bordeaux, Lyons, Rouen, Le Havre and Clermont-Ferrand. The biggest response to the C.G.T.'s strike call was in the industrial areas of the Nord and Pas-de-Calais departments, where over 70 per cent of the miners came out, in addition to 2,000 dockers at Dunkirk.

All parties represented in M. Pflimlin's Government, with the exception of the Independents, took part in a mass procession in Paris on May 28 to "demonstrate their indestructible attachment to the Republic"; the march was organized by the "Committee for the Defence of the Republic and Democratic Liberties" (see page 16259, first column) and was fully supported by the Communist Party, although it had been excluded from the committee. Over 200,000 demonstrators marched in orderly procession from the Cours de Vincennes (on the eastern outskirts of Paris) to the Place de la Nation and thence to the Place de la République, a total distance of nearly four miles; among those walking at the head of the procession were M. Daladier, M. Pineau (the former Foreign Minister), M. Mendès-France, M. Ramadier, M. Mitterrand, M. Duclos, and Professor Perrin, head of the French Atomic Energy Commission. As requested by the organizers of the march, no political banners or slogans were carried, but only placards bearing the words *Vive la République!*

On May 30, after the announcement that General de Gaulle had been asked to form a Government, the Communist Party urged the workers to "strengthen their united action by stopping up strikes, stoppages, and demonstrations." Neither the party nor the C.G.T., however, called for a general strike or for any form of mass action; largely, it was believed, because of the failure of the general strike called for May 27. Apart from a small number of workers who struck for a few hours at Bordeaux, Grenoble, and a few other centres, the only "direct action" was taken by the teachers' unions, who staged a one-day strike on May 30 as a demonstration of their will to "defend democratic liberties"; this strike was observed by 200,000 teachers throughout the country, with the result that many schools closed for the day.

On the other hand, enthusiastic demonstrations of support for General de Gaulle took place in Paris on May 30, when great crowds—largely of young men and women—surged up and down the *grands boulevards* until daybreak. Parties of demonstrators, each several thousand strong, marched to and fro between the Palais Bourbon, the Madeleine, the Elysée palace, and the Etoile bearing Tricolors superimposed with the Cross of Lorraine and chanting *De Gaulle au pouvoir!* The most remarkable feature of the demonstrations was the long line of cars that formed behind the marching crowds, sounding their horns for hours on end—to the rhythm of *De Gaulle au pouvoir* or *Algérie française*—in defiance of police regulations. [A ban on the use of motor-horns in the Paris area has been in force since 1954—see 13948 D.]

Clashes between Gaullist and left-wing demonstrators occurred in Paris during the night of May 30-31—notably at the Rond-Point des Champs-Elysées, where several people were injured and 66 arrests made. Strong police reinforcements were called out on June 1 to prevent disturbances while General de Gaulle was addressing the National Assembly (see below); there were several clashes on the outer boulevards, where police prevented groups of Communists from converging on the centre of the city. Similar Communist demonstrations took place on May 31 at Bordeaux, Marseilles, Rouen, Saint-Etienne, Grenoble, and Limoges, involving several clashes with the police.

Among the security measures taken by the Pflimlin Government on May 27-28 were (*a*) a decree establishing the "right of requisition" throughout the country—i.e. giving the Government powers to mobilize strikers under military control and to compel them to remain at work; and (*b*) the closing of all private and secondary airfields in the Paris region. In addition, the Prefect of the Hautes-Pyrénées department imposed a curfew at Tarbes, the principal training-centre for parachute troops in France.

The closing of airfields in the Paris region—which were guarded by strong forces of police, and at some of which barriers were set up across the landing-strips—was believed to be a precaution against a possible military *coup* in the Paris area supported by paratroops. The curfew at Tarbes was also thought to be a preventive measure against a possible *coup* in south-western France.

Owing to the press censorship, it was impossible to confirm or deny reports of the widespread formation of "committees of public safety" in different parts of France during the last fortnight of May; reports in foreign newspapers spoke of the formation of such committees at Pau and other places in south-western France, but there was no official confirmation.

On May 30 the French Government expelled Mr. Michael Foot (the former British Labour M.P., and special correspondent of the *Daily Herald*) for having insulted the President of the Republic—a penal offence under a law of 1881. At the same time the police seized all copies of the *Daily Herald* containing a despatch in which Mr. Foot had described President Coty as "the great nothing of the Fourth Republic."

General de Gaulle becomes Prime Minister. - Investiture Vote by National Assembly.

President Coty had a number of meetings with party leaders on May 30, including MM. Mollet and Deixonne (Socialists), Teitgen and Moisan (M.R.P.), Pinay and Duchet (Independents), and Thorez and Duclos (Communists); in addition he saw M. Vincent Auriol, M. Daladier, and MM. Le Troquer and Monnerville. MM. Mollet and Deixonne visited Colombey on the same day for discussions with General de Gaulle, who also received a separate visit from M. Auriol.

On May 31 General de Gaulle had a round-table meeting in Paris with 26 political leaders, representing all parties in the National Assembly except the Communists. He replied to a number of questions, outlined the policies which he would pursue if invested by the National Assembly, and announced his intention of forming a National Coalition Government drawn from all parties except the Communists on the extreme left and the Poujadists on the extreme right. It was understood that the general had emphasized that he was not com-

mitted to any party or faction, and that he would not allow himself to be influenced in any way by the Committee of Public Safety in Algeria. Later in the day General de Gaulle saw President Coty, who a few hours earlier had accepted M. Pflimlin's formal resignation from the Premiership.

At a joint meeting of Socialist deputies and senators on May 31, it was decided that each Socialist member would be free to vote for or against General de Gaulle's investiture as Prime Minister, according to his own conscience. A joint vote of all Socialist parliamentarians showed 77 votes in favour of General de Gaulle and 74 against; a vote of Socialist deputies alone, however, showed a majority of 51 to 44 against General de Gaulle. M. Mollet, the party's secretary-general, strongly urged support for General de Gaulle as the only way to avoid a possible civil war. [It was understood that both M. Mollet and M. Vincent Auriol had been greatly impressed by their meetings with General de Gaulle, and with the general's policy statement at the round-table meeting with political leaders.]

The other parliamentary groups (except the Communists) also met on the same day to define their attitude towards General de Gaulle's investiture. The general was supported by all the Social Republican (Gaullist) deputies; by all but one of the Independents; by a large majority of the M.R.P. deputies (79 in favour, 7 against, 11 abstentions); by almost all the Poujadists; and by about two-thirds of the Radicals.

In the evening of June 1 General de Gaulle appeared before a crowded National Assembly to make his investiture speech; according to custom, the president of the Assembly read the names of the new Ministers (see below) before General de Gaulle addressed the Chamber. In a short declaration, the general announced his intention—if invested as Prime Minister—to ask for full powers for a period of six months, at the end of which time it was hoped that "the public powers would be able to resume the normal course of their functioning." He then left the Chamber, applauded by all the deputies except the Communists and some of the Socialists and Radicals. After debate, General de Gaulle was given a *vote d'investiture* by 329 votes to 224, with 32 deputies not participating in the vote and four absent on leave.

The fact that General de Gaulle was not a member of Parliament did not preclude him from investiture as Prime Minister, since the French Constitution does not stipulate that the Premier must necessarily be a parliamentarian. [Article 45 states that the President of the Republic, after the customary consultations, "designates the Prime Minister."] Moreover, the Constitution states that the Prime Minister "chooses the members of his Cabinet and makes known the list to the National Assembly" before the *vote d'investiture*—implying that a Prime Minister could, if he wished, choose his Ministers from outside the Assembly.

General de Gaulle addressed the National Assembly as follows:

"The State going downhill at an increasing rate; French unity directly threatened; Algeria plunged into a storm of trials and emotions; Corsica suffering from a contagious fever; conflicting movements on the mainland growing in passion and intensity every hour; an Army long proved by bloody and meritorious tasks, but shocked by the bankruptcy of power; our international position breached in the very heart of our alliances. Such is the situation of our country. At this moment, when so many possibilities and opportunities are offered to France, she finds herself threatened with dismemberment and perhaps with civil war.

"It is in these conditions that I propose to try once more, for the salvation of the country, to lead the State and the Republic. Called by the Head of the State, I find myself led to ask the National Assembly to invest me with a heavy duty.

"It is necessary to have the means for fulfilling this duty. The Government, if you desire to invest it, will ask you to grant these means at once. It will ask you for full powers in order to be able to act with the efficacy, rapidity, and responsibility which the circumstances demand. It will ask you for these powers for a duration of six months in the hope that, at the end of this period, order will have been re-established in the State, hope found again in Algeria, and union restored in the nation, thus permitting the public powers to resume their normal functioning.

"But there would be no use in applying a provisional and shiftless remedy to a disastrous state of affairs unless we decided to end once and for all the basic cause of our ordeals. This cause—the Assembly knows it, and the nation is convinced of it—is the confusion and, by the same token, the impotence of authority.

"The Government that I am going to form, provided I have your confidence, will put before you without delay a plan for reforming Article 90 of the Constitution [i.e. the procedure for constitutional revision] so that the Assembly may authorize the Government to work out, and then to submit to the country in a referendum, the changes that are indispensable.

"In the statement of the Government's motives, which will be submitted to you together with the text of the Bill, the Government will specify the three principles which must form the basis of the Republican régime and to which it undertakes to make its plan conform:

(1) Universal suffrage is the source of all authority.

(2) The executive power and the legislative power must be effectively separated so that both Government and Parliament can assume, each on their own account and under their own responsibility, the fullness of their powers.

(3) The Government must be responsible to Parliament.

"The solemn opportunity of putting in order the relations of the French Republic with the peoples who are associated with it will be offered to the country in the same project for constitutional reform. The Government will undertake to include these new arrangements in the plan to be submitted to the vote of the French people.

"Starting with this double mandate conferred on it by the National Assembly, the Government will be able to undertake the immense task defined for it. As for myself, I shall need your confidence in full measure.

"It will be necessary for Parliament without delay—for events will brook none—to pass the Bills laid before it. As soon as this is done, Parliament will go into recess until the date fixed for the normal opening of its next session. Thus the Government of the Republic, invested by the representatives of the nation and granted in extreme urgency the necessary means for action, will be enabled to assume responsibility for the unity, integrity, and independence of France."

In the ensuing debate, the principal opposition to General de Gaulle's investiture as Prime Minister was expressed by M. Mendès-France (Radical), M. Mitterrand (U.D.S.R.), and M. Duclos (Communist). Among deputies who spoke in support of General de Gaulle were M. Deixonne (Socialist) and M. Pierre Clostermann (Radical), the famous Free French air "ace" of World War II, and holder of many French and British decorations.

M. Mendès-France spoke as follows: "We think of the past because we have come to the end of a period in our history. We think of the future because an illustrious man is taking over the leadership of France . . . The Fourth Republic is perishing because of its faults, it has squandered its moral capital in a very few years But it is not democracy and the party system that has failed; it is the bad use which we have made of the parliamentary regime. We have not been sufficiently faithful to the will of the nation. We have seen feeble Government after feeble Government follow each other, each at the mercy of intriguing groups . . .

"Whatever my sentiments for General de Gaulle, I cannot vote for his investiture. I cannot agree to give my vote under the threat of insurrection and a military *coup de force*. To-day's vote is not free; it is dictated . . . Among those who will vote 'for' [General de Gaulle] are sincere men whose convictions I respect. Others will vote 'for' to avoid civil war . . . In invoking the name of General de Gaulle, the enemies of the Republic have seriously altered the character of his arbitration . . . For the sake of France, and for the glory of General de Gaulle, I hope his Government will lead the nation towards liberty and association. But will those who brought it to power allow it to do so? . . ."

M. Duclos, whose speech was moderately worded compared with his earlier attacks on General de Gaulle, commented ironically on the fact that—for the first time—a Prime Minister-designate was not present during the Assembly's debate on a *vote d'investiture*. He asserted that Parliament was being subjected to "blackmail" and that a "dictatorship" was being brought into being by the *factieux* of Algeria.

M. Mitterrand, like M. Mendès-France, expressed his personal esteem for General de Gaulle, but declared that the Assembly had been faced with an "ultimatum." After a bitter attack on the "insurrectionists" in Algeria, he added: "Although the most illustrious of Frenchmen is asking for our support, I cannot forget that he has been put forward and supported by an undisciplined Army." M. Mitterrand added that while General de Gaulle had two companions in 1944, *honneur et patrie*, he had today two other companions, *coup de force et sédition*.

M. Deixonne paid tribute to General de Gaulle for putting his "immense prestige" at the service of the Republic "to prevent the secession of Algeria and to proceed, with full respect for democracy, to the indispensable reform of our institutions." **M. Clostermann** said that he had "waited 12 years for the return to power, in full legality, of the man whose great voice we have just heard."

Detailed voting figures on the *vote d'investiture* were as follows:

For General de Gaulle—86 Independents, 70 M.R.P., 44 Socialists (including MM. Mollet, Moch, Lacoste, Ramadier, Lejeune, and Deixonne), 30 Poujadists, 24 Radicals (including MM. Gaillard, Maurice Faure, Billères, and Clostermann), 17 *paysans* and *paysans d'action sociale*, 15 Social Republicans, 14 R.G.R., 12 *Gauche Démocratique*, 10 U.D.S.R.-R.D.A. (including MM. Pleven, Bonnefous and Houphouet-Boigny), 4 *Regroupement Africain*, and 3 *non-inscrits*—total 329.

Against General de Gaulle—147 Communists and *progressistes*, 49 Socialists (including MM. Gazier, Montel, Pineau, and Tanguy-Prigent), 18 Radicals (including MM. Bourgès-Maunoury, Daladier, and Mendès-France), 4 U.D.S.R. (including M. Mitterrand), 3 M.R.P. (including M. de Menthon), 1 *Gauche Démocratique*, 1 Independent (Maître Isorni, defence counsel for Marshal Pétain at the latter's trial), and 1 *non-inscrit*—total 224.

Not participating in Vote—Of the 32 non-participants in the vote, about three-quarters were African deputies of various parties, mainly of the *Regroupement Africain* and the U.D.S.R.-R.D.A., the remainder included three Socialists and one Communist.

The debate and the voting took place in an orderly atmosphere except for an attempt by a Communist woman deputy (Mme. Vaillant-Couturier) to make a personal assault on M. Dronne, a Social Republican deputy who had just returned from Algiers; she was prevented from doing so by ushers.

De Gaulle Government given Full Powers for Six Months. - Constitutional Reforms to be submitted to National Referendum. - Adjournment of French Parliament.

Both Houses of the French Parliament adjourned on June 3 to an unspecified date after passing three Bills which had been submitted by General de Gaulle's Government immediately after the general's investiture as Prime Minister. These measures were :

(1) A Bill for the renewal of the Government's special powers in Algeria, as required whenever a new Government takes office.

(2) A Bill conferring special powers on the Government for a period of six months, except in certain specified fields.

(3) A Bill (*projet de loi constitutionelle*) empowering the Government to make constitutional reforms by revising Article 90 of the Constitution, and thereafter to submit the revised draft to a national referendum. In the form finally adopted, the Bill provided that the Government, in working out the reforms, would be assisted by a consultative committee of whom two-thirds of the members would be parliamentarians.

The Algerian Special Powers Bill (1) was adopted on June 2 with little debate, the voting being 337 to 197 in the National Assembly and 269 to 28 in the Council of the Republic. Bills (2) and (3), however, were amended in a number of respects by the Assembly's Universal Suffrage Commission. The Commission's amendments in connexion with Bill (2) were largely accepted by the Government as a clarification of its own proposals, the Bill being subsequently passed by the Assembly. The Government also conceded an important amendment to the third Bill, but refused to accept the more far-reaching amendments put forward by the Commission. In consequence, General de Gaulle appeared before the National Assembly in the evening of June 2 and, in a five-minute speech, gave a solemn warning that his Government would "not continue in existence beyond tonight" unless the Assembly provided it with "the mandate and the means for reforming the country's institutions" so as to enable the Government to fulfil the task for which it had been formed in the "very grave situation" confronting the country. After rejecting several amendments, the Assembly finally passed the Bill in the form accepted by the Government, with the necessary two-thirds majority.

As originally tabled in the Assembly, Bill (2) conferred special powers on the Government for six months to carry out by decree "the necessary legislative measures for the rehabilitation of the nation," while respecting fundamental public liberties. The Universal Suffrage Commission, through its *rapporteur* (M. Teitgen, M.R.P.), asked for certain assurances, notably (*a*) that the full powers would be granted only to General de Gaulle's Government and to no other, (*b*) that their field of action should be precisely defined [in this connexion the Commission had criticized the original draft as too vague]. To meet these objections, the Government produced an amended version which was adopted by the Universal Suffrage Commission by 27 votes to 15.

As regards the third Bill, the Universal Suffrage Commission at first introduced sweeping amendments which would have had the effect of (*a*) requiring that any constitutional reform proposals should be submitted to Parliament within three months; (*b*) stipulating that such proposals would need an absolute majority in each House for their adoption; and (*c*) authorizing a national referendum only if the proposals were rejected by Parliament. All these amendments were rejected outright by General de Gaulle. To enable Parliament to be associated with the constitutional reform, however, the Government introduced an amended Bill providing for the setting-up of a consultative committee, two-thirds of whose members would be drawn from both Houses of Parliament, and stating that the Government would "seek the advice" of this committee in preparing its constitutional reform proposals. In this form the Bill was accepted by the Universal Suffrage Commission by 21 votes to 11, with 9 abstentions.

The texts of the two Bills in their final form (i.e. as passed by the National Assembly and the Council of the Republic) were as set out below :

Special Powers Bill.

This consisted of a single Article worded as follows :

"For a period of six months from the promulgation of this law, the Government of the Republic will take, by decrees, the necessary legislative measures for the rehabilitation of the nation."

"These decrees must not include in their scope the following matters reserved to the courts by law and by Republican constitutional tradition, deriving particularly from the preamble to the Constitution of 1946 and from the Declaration of the Rights of Man of 1789 :

(1) The exercise of public and trade union liberties.

(2) The definition of crimes and offences and the imposition of penalties applicable thereto.

(3) Criminal procedure.

(4) Fundamental guarantees of the rights of citizens.

(5) Electoral legislation.

"Except in cases of special urgency, decrees will be issued by the Cabinet after consulting the Council of State (*Conseil d'Etat*). They will come into force on publication in the *Journal Officiel*.

"At the expiration of the period envisaged [i.e. at the end of six months] they will be presented to the National Assembly for ratification."

The Bill was accompanied by an *exposé des motifs* worded as follows :

"The crisis affecting France threatens the unity of the nation, the authority of the State, the life of the Republic, the liberties of the citizens. It threatens to lead to civil war. Normal powers are insufficient to meet this threat, and the Government must therefore have recourse to special powers.

"In the past, Parliament has authorized the Government to take by decree important measures that are normally passed by law. To-day, at the beginning of a period of special emergency and danger, it is indispensable to confer on the Government the means of carrying out all necessary legislative measures for the rehabilitation of the national life.

"Nevertheless, such an extension of the Government's powers should not exceed a time-limit which must be restricted by the determination to re-establish with all speed the normal functioning of the country's institutions. This limit should be fixed at six months.

"With a view to clarity, and to emphasizing the exceptional and transitory character of the legislative acts the Government will take, these [decrees] will be known as ordinances (*ordonnances*). They will have the force of law and take effect on publication. They will be tabled in the National Assembly within six months of the publication of the present law."

The Special Powers Bill was passed in the National Assembly by 322 votes to 232, and in the Council of the Republic by 260 votes to 48; both votes were taken on June 2. During the final debate in the Assembly, M. Pflimlin - who, as stated below, became a Minister of State in General de Gaulle's Cabinet—gave an assurance that the Government had neither the intention to set up special courts under the special powers legislation, nor to modify the principles of social legislation or those relating to collective labour conventions, social security, or family allowances.

Constitutional Reform Bill.

The text and provisions of this Bill were as follows :

"By virtue of the provisions of Article 90 [of the 1946 Constitution], the Constitution will be revised in the following manner.

"The Government of the Republic will present a *projet de loi constitutionelle* incorporating the following principles :

(1) Universal suffrage is the only source of power. It is from universal suffrage, or from the bodies elected by it, that the legislative and executive powers are derived.

(2) The legislative and executive powers must be effectively separated in such a manner that the Government and Parliament can assume their full authority, each on their own account and under their own responsibility.

(3) The Government must be responsible to Parliament.

(4) The judiciary must remain independent in order to ensure respect for basic liberties as defined in the Constitution of 1946 and in the Declaration of the Rights of Man.

(5) The Constitution must allow the relationship of the Republic with the associated peoples to be placed on a proper footing.

"In carrying out these reforms, the Government will seek the advice of a consultative committee which will include members of Parliament designated by the competent commissions of the National Assembly and the Council of the Republic. The number of members of the consultative committee nominated by each of these commissions shall be equal to at least one-third of the number of members of these commissions. The total number of members of the consultative committee nominated by the parliamentary commissions will be equal to two-thirds of the membership of the committee.

"The *projet de loi* drawn up by the Cabinet, after consultation with the Council of State, will be submitted to a referendum. It will be promulgated by the President of the Republic within eight days of its adoption."

The Bill was passed in the National Assembly by 350 votes to 161 (with 3 voluntary abstentions, 70 deputies not participating in the vote, and 5 absent on leave) and in the Council of the Republic by 265 votes to 30. It thus received the two-thirds

majority required for the adoption of constitutional reform legislation without the need to submit it to a referendum. The National Assembly passed the Bill at midnight on June 2-3, and the Council of the Republic later on June 3. Both Houses then adjourned *sine die*.

Detailed voting figures in the National Assembly were as follows :

For the Constitutional Reform Bill : 87 Independents, 69 M.R.P., 48 Socialists (including MM. Mollet, Moch, Lacoste, Lejeune, Ramadier, and Deixonne), 30 Poujadists, 23 Radicals (including MM. Billères, Clostermann, and Maurice Faure), 18 Social Republicans, 17 *paysans* and *paysans d'action sociale*, 15 U.D.S.R.-R.D.A., 15 *Regroupement Africain*, 13 R.G.R., 12 *Gauche Démocratique*, 3 *non-inscrits*—total 350.

Against the Constitutional Reform Bill : 148 Communists and *progressistes*, 4 U.S.D.R. (including M. Mitterrand), 3 Socialists, 2 M.R.P., 2 *non-inscrits*, 1 Independent (Maître Isorni) and 1 *paysan d'action sociale*—total 161.

Voluntary Abstentions. The three deputies voluntarily abstaining from the vote were all from the M.R.P.—MM. de Menthon, Coste-Floret, and Lacaze.

Not participating in the Vote : 45 Socialists (including MM. Defferre, Depreux, Gazier, Lussy, Métayer, Pineau, and Tanguy-Prigent), 19 Radicals (including MM. Bourgès-Maunoury, Daladier, Gaillard, Galy-Gasparrou, Maroselli, and Mendès-France), 1 U.D.S.R. (M. Bonnefous), 1 *Gauche Démocratique* (M. Vincent Badie), 1 *Regroupement Africain*, and 3 *non-inscrits*—total 70.

General de Gaulle's Cabinet.

As stated above, the members of General de Gaulle's Cabinet were announced on June 2, immediately before his investiture speech to the National Assembly. Further Cabinet appointments were made by General de Gaulle on June 5, June 9 and July 7, the membership of the Government on the latter date being as follows :

*General Charles de Gaulle ..	Prime Minister and Minister of National Defence.
M. Guy Mollet (Socialist) ..	Ministers of State.
M. Pierre Pflimlin (M.R.P.) ..	
M. Félix Houphouet-Boigny (UDSR-RDA)	
M. Louis Jacquinot (Independent)	
Senator Michel Debré (Social Republican) . .	Justice.
*M. Maurice Couve de Murville	Foreign Affairs.
*M. Emile Pelletier	Interior.
*M. Pierre Guillaumat	Armed Forces.
M. Antoine Pinay (Independent)	Finance.
Senator Jean Berthoin (Radical)	Education.
M. Paul Bacon (M.R.P.) ..	Labour.
*M. Bernard Cornut-Gentille ..	*France d'outre-mer.*
M. Max Lejeune (Socialist) ..	Sahara.
M. Robert Buron (M.R.P.) ..	Public Works, Transport and Tourism.
M. Edouard Ramonet (Dissident Radical)	Industry and Commerce.
Senator Roger Houdet (Independent)	Agriculture.
*M. Pierre Sudreau	Construction.
Senator Edmond Michelet (Social Republican)	Ex-Servicemen and War Victims.
M. Eugène Thomas (Socialist)	Posts and Telegraphs.
M. Jacques Soustelle (Social Republican)	Information.
*M. Bernard Chenot	Public Health.
*M. André Malraux	Ministers-delegate to the *Présidence du Conseil.*
*M. André Boulloche	

*Non-parliamentarians.

General de Gaulle's Cabinet was thus a national coalition embracing all parties with the exception of the Communists on the extreme left and the Poujadists on the extreme right ; as shown, it included the leaders of the Socialist Party (M. Mollet), the M.R.P. (M. Pflimlin), and the Independents (M. Pinay). Nine of the 24 Ministers were non-parliamentarians, including General de Gaulle himself.

General Charles de Gaulle (67) was born at Lille in 1890 and was educated at a Roman Catholic college in Paris and the *Ecole Militaire* at St-Cyr. He served with distinction as a junior officer in the First World War, being wounded several times and mentioned in despatches ; captured at Verdun, he was a prisoner of war in Germany from 1916-18. After holding the post of Professor of Military History at St.-Cyr (1921-22) he served successively in the Middle East, as commander of a *chasseurs-à-pied* battalion, and on the secretariat-general of the Council of National Defence in Paris. At the outbreak of the Second World War he was in command of a tank regiment at Metz.

During the 'twenties and 'thirties General de Gaulle wrote several books (among them *The Army of the Future*) in which he propounded military theories which have today gained universal acceptance, but which at the time were considered unorthodox. A strong opponent of the "Maginot" mentality, he advocated *inter alia* a mechanized and professional army to replace conscripts, fast-moving tank warfare, emphasis on mobility and flexibility of operations, and close liaison between ground and air forces. He attempted, but with little success, to persuade French army chiefs and politicians to accept his views, which—as late as January 1940—were embodied in a memorandum to military and political leaders. In the German *blitzkrieg* of May 1940, General de Gaulle—then commander of an armoured division—personally fought one of the few successful French counter-offensives, being promoted general on the battlefield after a victory over the Germans at Laon.

Leaving France at the time of the Bordeaux armistice, he came to London and set up the French Committee of National Liberation after issuing his famous rallying-cry *La France a perdu une bataille ; elle n'a pas perdu la guerre*. Throughout the Second World War he was the undisputed leader of Free France, head of the Free French forces, and the rallying-point for French resistance overseas and in occupied France itself. Joined by political leaders of all parties who succeeded in escaping from France, he set up the Committee of National Liberation at Algiers in 1943 (at first jointly with General Giraud), and made a triumphal entry into Paris in August 1944.

General de Gaulle was Head of the French Provisional Government and Chief of Armed Forces in 1944-45, and Prime Minister, Minister of National Defence, and Commander-in-Chief in 1945-46. He resigned suddenly in January 1946 after difficulties with the political parties, campaigned vigorously for a Constitution characterized by a strong executive, and in 1947 founded his own political movement, the Rally of the French People (R.P.F.). After dissensions and defections, however, he resigned in 1953 from the leadership of the R.P.F., and since that year had remained aloof from politics, apart from occasional pronouncements at rare intervals.

Biographies of the members of General de Gaulle's Cabinet are given below, other than those for whom biographical details are given in earlier articles :

M. Guy Mollet (52) has been secretary-general of the Socialist Party for many years. He was Prime Minister for 16 months in 1956-57, his tenure of office being the longest of any Premier of the Fourth Republic. For biography see page 14682, second column.

M. Pierre Pflimlin (51) is national president of the M.R.P. and was General de Gaulle's predecessor in the Premiership ; for biography see page 16255, second column.

M. Houphouet-Boigny (53), an African, was born in the Ivory Coast and was formerly Governor of that territory. He is leader of the African Democratic Rally (R.D.A.), which is affiliated to the U.D.S.R., and has held ministerial office in the last four Governments. For biography see page 14683, first column.

M. Louis Jacquinot (59), a lawyer with a distinguished war record, escaped from occupied France during the war and joined General de Gaulle ; he played an important part in organizing the Free French Navy, and was *Commissaire à la marine* in the Committee of National Liberation. He has held ministerial posts in several post-war Governments.

Senator Michel Debré (46) is a long-standing supporter of General de Gaulle, to whom he was legal adviser when the general was head of the post-liberation Provisional Government. He had a distinguished record in the Resistance movement, became *Commissaire de la République* for the Angers region in 1944, and was subsequently head of the *Commissariat général des affaires allemandes et autrichiennes*. A leading member of the R.P.F., and subsequently of the Social Republican party, he has been a senator for Indre-et-Loire since 1948. He is a well-known lawyer, and author of several books on political questions.

M. Couve de Murville (51) was a senior Civil servant at the outbreak of war in 1939, holding the post of *Inspecteur des finances* at the Finance Ministry. He escaped to North Africa in 1942, was deprived of his nationality by the Vichy Government, and subsequently became Finance Commissioner in General de Gaulle's Committee of National Liberation. Joining the Foreign Ministry after the war, he became *Directeur général des affaires politiques* at the Quai d'Orsay and took part in several important post-war conferences. Since 1950 he has served as Ambassador in Cairo, Washington, and Bonn, and also as French representative on the U.N. Security Council and the North Atlantic Council. He was Ambassador to Western Germany at the time of joining General de Gaulle's Cabinet.

M. Emile Pelletier (60), the senior member of the Prefectoral corps, has had a distinguished Civil service career and has served as Prefect of the Somme, Aisne, Seine-et-Marne, and Seine departments, holding the latter post at the time of joining the Cabinet. He escaped from occupied France during the war, joined General de Gaulle in North Africa, and after the liberation was appointed "super-prefect" for the whole of south-western France, with responsibility for public order and economic development. Of strong pro-British sympathies, he has given much encouragement to the expansion of British cultural activities in south-western France.

M. Pierre Guillaumat (50), a well-known mining engineer, has held the post of *Chef de service des mines* in Indo-China and Tunisia. He is head of the Petroleum Research Board (*Bureau de recherches du pétrole*) and a member of the French Atomic Energy Commission, the High Commission of the Joint Organization for the Sahara (O.C.R.S.), and the *conseil d'administration* of the nationalized electricity industry (*Electricité de France*). The son of a famous general of World War I, M. Guillaumat will have responsibility for the Army, Navy, and Air Force as Minister for the Armed Forces, as shown in the Cabinet list, General de Gaulle himself has overall responsibility in these fields as Minister of National Defence.

M. Antoine Pinay (67) is leader of the Independent (conservative) party and has been a member of many post-war Cabinets. He was Prime Minister for ten months in 1952, and took important measures to stabilize the franc in the economic crisis of that year. For biography see page 12155, second column.

Senator Jean Berthoin (63) was head of the national security police (the *sûreté nationale*) in the 'thirties, and subsequently inspector-general of administrative services in Algeria. He has been a senator for Isère since 1948, and held the portfolio of Education in Cabinets headed by M. Mendès-France and M. Edgar Faure. Like nearly all other members of General de Gaulle's Government, he had a distinguished record in the Resistance.

M. Paul Bacon (50) is a trade unionist of long standing and a former Resistance fighter. A prominent member of the M.R.P., he is the author of a book on working-class problems and has held the portfolio of Labour and Social Security in several Cabinets.

M. Cornut-Gentille (50) was formerly a prominent member of the Prefectoral corps, having served as Prefect of the Ille-et-Vilaine, Somme, and Bhas-Rhin departments. He joined the Resistance movement, became *Commissaire de la République* at Rennes after the liberation, and was subsequently appointed High Commissioner for French Equatorial Africa (1948) and for French West Africa (1951). After serving as French permanent representative at the United Nations in 1956-57, he became Ambassador to Argentina in the latter year and held that post at the time of joining General de Gaulle's Cabinet.

M. Max Lejeune (51) is a prominent member of the Socialist Party and has held many Government posts since 1947, including that of Army Minister in the Mollet Cabinet. An advocate of a "firm" policy in Algeria, he was reappointed to the post (that of Minister for the Sahara) which he held in the Gaillard Cabinet. He is mayor of Abbeville.

M. Robert Buron (48) edited clandestine newspapers during the occupation, helped to found the journal *Carrefour* after the liberation, and was for a time administrator-general of *Radiodiffusion Française*. A lawyer by profession, he has held various portfolios in post-war Governments. In 1954 he became chairman of the National Productivity Committee.

M. Edouard Ramonet (50), a former university professor, was head of the *Institut Français* at Oporto (Portugal) at the outbreak of World War II, and was active in the Free French movement during the war years. First elected to the Constituent Assembly in 1945, he has been chairman of the National Assembly's Economic Affairs Commission. He is mayor of Châteauroux.

Senator Roger Houdet (59), an agricultural engineer, held the portfolio of Agriculture in the Laniel and Mendès-France Governments. He is a senator for the Seine-Maritime department.

M. Pierre Sudreau (39), who played an outstanding role in the Resistance during the war, was arrested by the Gestapo in 1944 and deported to the Buchenwald concentration camp. After the liberation he became head of counter-espionage in the *sûreté nationale*, and subsequently Prefect of the Loir-et-Cher department. Since 1955 he has been Commissioner of Housing for the Paris region, in which capacity he has been responsible for large-scale housing and construction projects. He is a lawyer by profession.

Senator Edmond Michelet (58) also distinguished himself in the Resistance movement as a founder of the *Combat* organization; he was arrested by the Gestapo and deported to the Dachau concentration camp, where he became leader of the French deportees. He was Minister for the Armed Forces under General de Gaulle in 1945-46, and held the same post in the Gouin and Bidault Cabinets. Since 1952 he has been a senator for the Seine department.

M. Eugène Thomas (54) has been Minister of Posts and Telegraphs in several previous Cabinets. Like the other Socialist Ministers in General de Gaulle's Cabinet, he supported the general on the *vote d'investiture* and also on the special powers and constitutional reform Bills.

M. Jacques Soustelle (46) was M. Lacoste's predecessor as Governor-General of Algeria; his dramatic escape to Algiers after the insurrection of May 13 is described on page 16259. He had been political adviser to the Committee of Public Safety and the Army authorities until summoned to Paris by General de Gaulle on June 14 to report on the Algerian situation. For biography of M. Soustelle see 14021 E.

M. Bernard Chenot (49) has been secretary-general of the Economic Council (*Conseil économique*) since 1951, and was previously secretary-general of the *Houillères nationales du Nord et du Pas-de-Calais*. A former professor at the *Institut d'études politiques* in Paris, he is the author of many books on economic organization and the nationalized industries.

M. André Boulloche (43) was Chief Engineer for Roads and Bridges at the time of his appointment to General de Gaulle's Cabinet. He has held State Secretaryships in several Cabinets and has also been Director of Public Works in Morocco. A prominent member of the Resistance movement, he was deported to Germany during the war.

M. André Malraux (56), famous as novelist, art critic, and Orientalist, travelled widely in Asia and Africa during the 'twenties and 'thirties and took part in archaeological expeditions in Indo-China and elsewhere. For several years before the war he evinced strong pro-Communist sympathies, and fought on the Republican side in the Spanish Civil War. Joining the French Army on the outbreak of World War II, he was captured by the Germans in 1940, escaped from a prison camp, and became a leading *Maquis* commander under the pseudonym of "Colonel Berger." After the Allied landings in the South of France he organized and commanded the Free French "Alsace-Lorraine" Brigade which advanced to the Rhine. An outstanding orator and propagandist, he gave full support to General de Gaulle and was Minister of Information in the general's Government from November 1945 to January 1946. He helped General de Gaulle to found the R.P.F., but subsequently retired from political life to devote himself to his literary work and art studies. Among his best-known works are his novel *La condition humaine* (awarded the *Prix Goncourt* in 1931) and his monumental three-volume history of art published under the title *Les voix du silence*.

Of the two Ministers-delegate to the *Présidence du Conseil*, M. Malraux was placed in charge of matters relating to youth, cultural questions, and scientific research, while M. Boulloche was given responsibility for technical matters. M. Malraux was originally appointed Minister of Information in General de Gaulle's Cabinet, but became a Minister-delegate when the Information portfolio was subsequently allotted to M. Soustelle on July 7.

Post-crisis Developments in France.

Among the first measures taken by General de Gaulle's Government were the abolition of the press censorship (June 1); the restoration of normal sea and air communications with Algeria and Corsica; and the reappointment of General Ely as Chief of Staff of the Armed Forces *vice* General Lorillot, who reverted to his former post of Chief of Army Staff. [On June 28, however, it was announced that the Government had accepted the resignation of General Lorillot and had appointed General Zeller as Chief of Army Staff, a post he had held two years earlier.] After a Cabinet meeting on June 8 it was announced:

(1) That the referendum on the new Constitution would be held on Oct. 5, 1958, or within a few days of that date.

(2) That General Salan had been appointed "Delegate-General of the Government" in Algeria, but that General de Gaulle himself would retain overall responsibility for Algerian affairs.

(3) That municipal elections would be held in Algeria in about a month.

After a further Cabinet meeting on June 17, it was announced that the four Ministers of State would visit a number of countries in the coming weeks to "explain the general policy" of the new Government. Thus, M. Guy Mollet would go to the English-speaking countries, including the United States; M. Jacquinot to Latin America, South Africa, Ethiopia, and Liberia; and MM. Pflimlin and Houphouet-Bougny would visit the French overseas territories.

In his first radio and television broadcast as Prime Minister, made on June 13, General de Gaulle outlined his Government's tasks as: to pacify Algeria and "make her one with France for ever"; to "organize on a federal basis" the relations between France and the associated peoples in Africa and Madagascar; to "establish on a co-operative basis" France's relations with Tunisia, Morocco, and the States of Indo-China; "to take our proper place in the Western world to which we belong, without confining ourselves to it"; to draw up, and submit to the people, proposals for constitutional reform which would give the Republic political institutions "strong, stable, and effective enough to enable us to realize our destiny"; and to restore equilibrium in the French economy. He ended: "The road ahead is hard but splendid; the goal is difficult but noble. *Allons!*"

In the course of his speech General de Gaulle appealed to the nation to support a 3½ per cent national loan which would be issued at par, based on gold, and redeemable in 54 years. This loan, issued on June 17, took the form of tax-free bonds pegged to the price of the gold *napoléon*, fixed at 3,600 francs. Investors were guaranteed against any depreciation of the franc in terms of gold; and those who repatriated and surrendered foreign exchange, foreign securities or gold held illegally abroad, and used the proceeds for subscriptions to the loan, were guaranteed complete freedom from prosecution and penalties.

The loan remained open for 3½ weeks (until July 12) and was outstandingly successful. The Finance Ministry announced on July 10 that it had so far brought in 230 milliards of francs in cash and 131 tons of gold (equivalent to about $150,000,000), thereby

greatly exceeding the results of the "Pinay loan" issued in 1952 for a similar 3½-week period. [As compared with the results of the "de Gaulle loan" of 1958, the "Pinay loan" of 1952 produced 180 milliards of francs in cash and 35 tons of gold.]

Post-crisis Developments in Algeria and Corsica.

The formation of General de Gaulle's Government was enthusiastically welcomed in Algeria and Corsica, although some of the more extreme right-wing settlers in Algeria were reported to be angered at the inclusion of MM. Pflimlin and Mollet in the Government, and particularly at the exclusion of M. Soustelle. [As stated above, M. Soustelle was not appointed Minister of Information until July 7, or more than a month after the new Government had taken office.]

General Salan, General Dulac (one of his principal assistants) and General Jouhaud (Air Force Commander in Algeria, and a vice-chairman of the Committee of Public Safety) visited Paris on June 3 for consultations with General de Gaulle; the Prime Minister also had a meeting on the same day with M. Léon Delbecque [see page 16256], who had flown to Paris from Algiers and returned there on the following day. On June 9 it was announced (*a*) that M. René Brouillet had been appointed Secretary-General for Algerian Affairs at the *Présidence du Conseil*, in which capacity he would work closely with General de Gaulle (who, as stated above, retained responsibility for Algeria); (*b*) that M. Lamassoure had been appointed Prefect of Corsica in succession to M. Savreux, who had been forced to give up his post after the insurrection in the island. Prior to the appointment of M. Lamassoure, Colonel Thomazo had acted as civil and military Governor of Corsica—a post to which he had been appointed by General Salan; he left Ajaccio for Algiers on July 10.

On June 16 General Salan formally assumed the duties of Delegate-General of the Government in Algeria, his powers being broadly similar to those previously exercised by M. Lacoste as Resident-Minister. Immediately after taking office General Salan announced the following appointments: (1) General Jouhaud as his military deputy, with operational command of all land, sea and air forces in Algeria [this appointment was necessitated by the fact that much of General Salan's time would be taken up with political and civil problems]; (2) M. Serge Baret as secretary-general to General Salan [M. Baret was Super-Prefect of the Algiers region at the outbreak of the insurrection, to which he gave full support]; (3) General Allard as Super-Prefect for the Algiers region in succession to M. Baret; (4) General Jacques Massu (co-chairman with Dr. Sid Cara of the Committee of Public Safety) as Prefect of Algiers

Three decrees were published on June 29 in the *Journal Officiel* (Paris) defining in detail (1) the powers and functions of the *Secretariat générale pour les affaires Algériennes* (i.e. the department headed by M. Brouillet in Paris); (2) the powers and functions of the *Organisation de la Délégation générale du Gouvernement en Algérie* (i.e. the organization headed by General Salan in Algiers in his capacity of Delegate-General), including such matters as defence and security, information, finance and economics, transport, industry and agriculture, communications, postal and telegraphic services, public works, education, reconstruction, and administrative affairs; and (3) the conditions in which the military authorities in Algeria could provisionally exercise powers normally appertaining to the civil authorities.

A number of military appointments and promotions in the Algerian Command were approved by the French Cabinet on July 11, including the following:

(*a*) The promotion of Generals Jouhaud and Challe to the rank of *généraux d'armée aérienne* (both generals gave full support to the insurrection of May 13, General Jouhaud being one of the three vice-chairmen of the Committee of Public Safety); (*b*) the promotion of General Massu to the rank of *général de division*; (*c*) the appointment of General Dulac as *adjoint* (chief assistant) to General Salan; (*d*) the appointment of General Faure as Commander of the 27th Infantry Division stationed at Tizi-Ouzou. [General Faure was placed under arrest for a short time at the end of 1956 in connexion with an alleged conspiracy to set up a military government in Algiers—see 16245 A; more recently he had held a command with the French forces stationed in Western Germany.]

It was also announced that the *Médaille militaire*—one of the highest French decorations—had been conferred on General Salan by the French Government.

General de Gaulle paid a three-day visit to Algeria on June 4-6, shortly after taking office as Prime Minister, and a further visit on July 1-3. They will be described in later issues. (Le Monde - Le Figaro - Le Populaire - Times - Daily Telegraph - Manchester Guardian - New York Herald Tribune)

(Prev. rep. 16255 A.)

Post-war French Cabinets. The Cabinet formed by General de Gaulle was the 26th since the liberation of Paris in 1944. The French post-war administrations have been as follows:

General de Gaulle	Sept. 26, 1944	Oct. 21, 1945
General de Gaulle	Nov. 13, 1945	Jan. 20, 1946
Félix Gouin	Jan. 26, 1946	June 12, 1946
Georges Bidault	June 23, 1946	Nov. 28, 1946
Léon Blum	Dec. 12, 1946	Jan. 20, 1947
Paul Ramadier	Jan. 21, 1947	Nov. 19, 1947
Robert Schuman	Nov. 22, 1947	July 19, 1948
André Marie	July 24, 1948	Aug. 27, 1948
Robert Schuman	Aug. 31, 1948	Sept. 7, 1948
Henri Queuille	Sept. 10, 1948	Oct. 6, 1949
Georges Bidault	Oct. 28, 1949	June 24, 1950
Henri Queuille	July 1, 1950	July 4, 1950
René Pleven	July 11, 1950	Feb. 28, 1951
Henri Queuille	March 9, 1951	July 10, 1951
René Pleven	Aug. 11, 1951	Jan. 7, 1952
Edgar Faure	Jan. 17, 1952	Feb. 29, 1952
Antoine Pinay	March 6, 1952	Dec. 23, 1952
René Mayer	Jan. 7, 1953	May 21, 1953
Joseph Laniel	June 26, 1953	June 12, 1954
Pierre Mendès-France	June 18, 1954	Feb. 5, 1955
Edgar Faure	Feb. 23, 1955	Jan. 24, 1956
Guy Mollet	Feb. 1, 1956	May 21, 1957
Maurice Bourgès-Maunoury	June 13, 1957	Sept. 30, 1957
Félix Gaillard	Nov. 6, 1957	April 16, 1958
Pierre Pflimlin	May 13, 1958	May 28, 1958
General de Gaulle	June 1, 1958	

The longest-lived post-war Government was that of M. Mollet, which remained in office for 16 months in 1956-57; the shortest-lived was the three-day Government of M. Queuille in 1950. The average life of French Governments since the war has been about five and a half months.

A. SOUTH AFRICA. — Reorganization of Defence Services. - Defence Appointments.

A reorganization of the Union's armed forces was announced on June 9 by the Minister of Defence, Mr. F. C. Erasmus.

Mr. Erasmus said that the changes—intended to bring South Africa into line with "the new policy of a number of Western countries"—would result in a reduction of manpower but would involve more intensive training and produce greater striking power. In the Army, there would be reductions in the number of recruits joining the Active Citizens Force, the Commandos, and the School Cadet Corps. In the S.A.A.F., the Air Force and Active Citizens Force squadrons would be combined and distributed according to tactical and strategic requirements. Active Citizens Force appointments to the Navy had already been suspended, though the training bases would be retained.

With the abolition of supplementary units, more attention would be concentrated on the training and building up of fighting units: servicing and administrative units would be reduced because technical and administrative manpower would be immediately available from civilian sources in an emergency. The Air Force would in future have three groups—the Inland Group, the Maritime Group, and the Maintenance Group

Defence Appointments.

It was announced in Pretoria on Dec. 23, 1957, that Brigadier J. N. Bierman would succeed Major-General P. H. Grobbellar as Army Chief of Staff in September 1958. It had previously been announced that Major-General S. A. Melville would become Commandant-General of the Union Defence Forces on the retirement in September of Commandant-General H. B. Klopper, and that Major-General Grobbellar would succeed Major-General Melville as Inspector-General.

Defence Planning Facilities in High Commission Territories.

Details were announced in London and Pretoria on July 17 of the defence planning facilities to be granted to the South African Government in Basutoland, the Bechuanaland Protectorate, and Swaziland, following discussions between Mr. Erasmus and Sir Percivale Liesching, the High Commissioner for the three territories.

The facilities were for (*a*) overflying rights on a reciprocal basis; (*b*) arrangements for search and rescue operations; (*c*) inspection of airstrips in Bechuanaland for use by South African aircraft in case of emergency landings; (*d*) a short access route through Basutoland to a proposed radar site in the Drakensberg Mountains on Union territory; (*e*) permission for a South African Defence Force party to carry out a reconnaissance of an emergency route to South-West Africa across south-western Bechuanaland.

The discussions in Pretoria followed talks in London between Mr. Erasmus and Lord Mancroft (British Minister without portfolio), in which certain overflying rights in the High Commission Territories had been accepted in principle by the British Government The U.K. also undertook to give consideration to further South African proposals for facilities in the Territories in connexion with South African defence planning. (State Information Dept., Pretoria - Cape Times - Times)

(Prev. rep. 15112 C; 14144 C.)

A. AVIATION. — The Munich Disaster. - Report of West German Commission of Inquiry.

Twenty-one people were killed, including seven players of Manchester United Football Club and eight British sports journalists, when an *Elizabethan* airliner of British European Airways crashed at Munich Airport on Feb. 6 when taking off for England. Two others on board - an eighth Manchester United player and the first officer of the plane, Captain K. G. Rayment—died in hospital a fortnight later, bringing the number of victims to 23 out of a total of 38 passengers and six aircrew.

The plane was flying from Belgrade - where Manchester United had been playing Red Star F.C. (the Yugoslav champions) in the European Cup—to England, and had landed at Munich for a stop of an hour and 45 minutes. It took off from Munich in a snowstorm after two unsuccessful attempts ; on the third attempt it crashed into a building on the edge of the airfield and burst into flames within a few seconds of the take-off.

The eight Manchester United players who lost their lives included a number of well-known international footballers, among them R. Byrne (the captain), D. Edwards, T. Taylor, and D. Pegg (all English internationals) and W. Whelan, an Irish international. Among the journalists killed in the disaster was Mr. Frank Swift (of the *News of the World*), the former England and Manchester City goalkeeper. Other victims included the trainer, coach, and team secretary of Manchester United F.C., as well as a director of the club.

The injured were cared for in the Rechts der Isar hospital in Munich, where some of them remained for many weeks before they were sufficiently recovered to make the journey to England. One of the most severely injured was Mr. Matthew Busby - manager of Manchester United, and one of the leading personalities in British football—who was not able to leave hospital until mid-April. Professor Georg Maurer (chief surgeon of the hospital), together with some of his doctors and nurses, visited Manchester in March and was warmly thanked for the care and devotion extended to the survivors of the crash ; he was given a great ovation at Old Trafford (the Manchester United ground), where a crowd of 60,000 heard a recorded message from Mr. Busby—who was still in hospital at Munich—paying tribute to the "wonderful treatment" that he and other survivors had received from Professor Maurer and his staff. The Lord Mayor of Manchester (Alderman Leslie Lever, M.P.) subsequently visited Munich to thank the Chief Burgomaster of the city and the staff of the Rechts der Isar hospital.

It was announced on April 11 that the Queen had appointed Professor Maurer as a Commander of the Order of the British Empire in recognition of his efficiency and devotion in caring for the survivors of the disaster. The citation said that "no praise could be too high for the skill and selflessness" with which Professor Maurer and the hospital staff had looked after their patients. Professor Maurer subsequently visited London to receive the C.B.E. from H.M. the Queen at Buckingham Palace.

The disaster was the worst of its kind in the history of British sport and was comparable only to the Turin disaster of May 4, 1949, when 18 players of the Torino F.C. (Italy) were killed in an air crash on returning from a match in Portugal—see 9992 E. On the Saturday after the Munich disaster a two-minutes' silence was observed at all football grounds in Britain, flags were flown at half-mast, and all players wore black arm-bands. Similar ceremonies were observed at grounds in Yugoslavia, Western Germany, and many other European countries.

Manchester United, under Mr. Busby's leadership, were the best-known and most successful club in English post-war football, having won the League championship three times (for the past two years in succession—see 16107 A) in addition to the F.A. Cup. Despite the loss of so many of their best players, the club succeeded in reaching the Cup Final of 1958 with a side consisting largely of reserves ; they were beaten 2-0 by Bolton Wanderers in the final at Wembley on May 3.

An inquiry into the causes of the disaster was instituted by the German Federal Government, which appointed a commission of aviation experts headed by Judge Walter Stimpel, a former regular *Luftwaffe* officer. [Under international air regulations, such inquiries are carried out in the country where the disaster occurs.] Hearings opened in Munich on April 29, the proceedings being *in camera*. The British Ministry of Civil Aviation, B.E.A., and the Guild of Air Pilots were represented by observers.

The commission's findings, published on June 26, stated that a layer of ice on the airliner's wings had "contributed at least in a large degree towards the accident" by impairing the plane's "aerodynamic qualities." It was impossible to ascertain all the facts, and it was not excluded that other circumstances, the details of which could not be established, might have contributed to the crash. When the plane landed at Munich from Belgrade, however, its external surface was already strongly "refrigerated" from flying at great heights ; wet snow had continued to fall while the plane was on the airfield and this precipitation, in the commission's opinion, had turned into a firm layer of ice which was not removed from the plane's wings before the third take-off. (Times - Daily Telegraph - Manchester Guardian - Die Welt, Hamburg)

B. UNITED KINGDOM. — Social Security Agreements with France, Belgium, and Yugoslavia.

Reciprocal U.K. social security agreements with France and Belgium came into operation as from May 1 and June 1 respectively, whilst a social security convention with Yugoslavia was signed on May 24, to come into effect upon ratification.

Anglo-French Convention. This agreement (which consolidated and revised the previous Anglo-French convention of June 11, 1948 [see 10312 D], an agreement of 1950 relating to Northern Ireland, and various supplementary agreements) covered benefits for sickness, maternity, industrial injury, old age, widowhood, and death. It also extended French old-age allowances (broadly comparable to non-contributory old-age pensions in Britain) to all U.K. nationals with at least five years' continuous residence in France, instead of their being confined as hitherto to those U.K. nationals employed in France. Medical benefits under the French insurance scheme, hitherto available only to families of U.K. nationals insured under that scheme, were extended to British retirement and industrial injury pensioners, and also to persons receiving long-term sickness benefit.

Anglo-Belgian Convention. This agreement, concluded on May 20, covered cash benefits provided in either country for unemployment, sickness, maternity, old age, widowhood, orphanhood, industrial accidents and diseases, and death, and also family allowances. In addition, it enabled nationals of either country to add together insurance contributions paid in both countries to determine the right to receive benefit, and made medical benefits under the Belgian health insurance scheme available to U.K. citizens employed in Belgium or normally resident in Belgium.

Anglo-Yugoslav Convention. Reciprocal arrangements under this agreement covered the benefits under the National Insurance, Industrial Injuries Insurance, and Family Allowances schemes in the U.K. and the corresponding benefits in Yugoslavia. Nationals of either country will be able to add together contributions paid in both countries to determine the right to receive benefit. Medical treatment provided under the Yugoslav scheme of health insurance will be available in Yugoslavia in people covered by the U.K. National Insurance scheme and to their dependants, whether working in the country or on holiday.

Reciprocal social security agreements have also been concluded with a number of other countries (see references), including Australia, the German Federal Republic, Israel, the Netherlands, Norway and Sweden. (Ministry of Labour Gazette) **(Prev. rep. 16062 B ; 15715 D ; 15560 C ; 15510 C ; 15398 C ; 13815 A.)**

C. CANADA. — Manitoba Provincial Elections.

Elections for the Manitoba Provincial Legislature were held in Manitoba on June 16 with the following results (party strengths in the former Legislature shown for comparison) :

	1958	1953
Progressive Conservatives ..	26	12
Liberal Progressives ..	19	32
C.C.F. (Labour)	11	5
Social Credit	—	2
Independents	1	4
Independent Conservative	—	1
Labour Progressive ..	—	1

The Progressive Conservatives thus became the strongest party, both they and the C.C.F. more than doubling their representation. The Liberals lost the majority which they had held in the province for 43 years (since 1915), when the last Conservative Government was superseded by a Liberal administration.

Neither the Social Credit Party nor the Labour Progressives (Communists) will be represented in the new Assembly—the Labour Progressives thus losing their last seat in any Canadian legislature.

The Manitoba elections left only two Canadian provinces with a Liberal Government—Prince Edward Island and Newfoundland. The Conservatives are in power in Nova Scotia, New Brunswick, Ontario, and Manitoba ; the Social Credit party in Alberta and British Columbia ; the *Union Nationale* in Quebec ; and the C.C.F. in Saskatchewan. (Department of External Affairs, Ottawa - Montreal Star) **(Prev. rep. 13489 A ; Provincial Elections, 15263 D.)**

D. UNITED KINGDOM. — Stonehenge Restoration.

The restoration work at Stonehenge was completed on July 9 with the re-erection of the 30-ft. trilithon and the replacement of its 18-ton lintel-stone.—(Daily Telegraph) **(Prev. rep. 16066 C.)**

A. UNITED KINGDOM. — The Birthday Honours.

The Birthday Honours List was published on June 12, the principal awards being set out below :

Order of Merit. Sir Frank Macfarlane Burnet, F.R.S., the eminent Australian virologist.

[Sir Macfarlane Burnet (58) is internationally known for his researches into virus diseases such as influenza, poliomyelitis and cholera, and has written many important works on these subjects—notably his *Virus and Man* and his *Natural History of Infectious Diseases*. He is Professor of Experimental Medicine at Melbourne University.]

Barons. Mr. Oliver Poole, deputy chairman of the Conservative Party Organization, for political and public services ; Sir Thomas Ellis Robins, for public services in Rhodesia.

[Mr. Poole was chairman of the Conservative Party Organization from 1955 to 1957, when he was succeeded by Lord Hailsham ; he was M.P. for Oswestry from 1945-50. Sir Ellis Robins, an American by birth, is a prominent figure in Rhodesian public life, and president of the British South Africa Company.]

Baronets. Mr. Henry Benyon, Lord-Lieutenant of Berkshire ; Mr. D. M. Evans Bevan, the South Wales industrialist and philanthropist ; Sir John Dunnington-Jefferson, chairman of East Riding County Council.

Privy Councillors. Mr. William Grant, Q.C., M.P. (Glasgow, Woodside), Solicitor-General for Scotland ; Sir Godfrey Thomas, lately Private Secretary to the Duke of Gloucester.

Companion of Honour. Sir Osbert Sitwell, the writer and poet.

Knights Bachelor. Dr. Thomas Armstrong, Principal of the Royal Academy of Music ; Mr. J. C. Baker, lately president, British Trawlers Federation ; Mr. A. E. Baldwin, M.P. (C., Leominster), for political and public services ; Lieut.-Colonel R. L. Benson, hon. treasurer, English-Speaking Union ; Mr. W. R. Black, chairman, National Research and Development Corporation ; Brigadier J. S. K. Boyd, president of the Royal Society of Tropical Medicine and Hygiene ; Mr. W. S. Carrington, member of Council, Institute of Chartered Accountants of England and Wales ; Mr. William Cash, chairman, Girls' Public Day School Trust ; Mr. W. A. Edmenson, for public services in Northern Ireland ; Alderman J. W. Emberton, for political and public services in Cheshire ; Mr. D. L. Evans, Deputy Keeper of the Records, Public Record Office ; Professor Keith Feiling, the historian ; Mr. W. H. Garrett, for services to industrial relations ; Alderman R. S. Harper, for political and public services in Manchester ; Mr. J. W. F. Hall, for services to the Association of Municipal Corporations ; Mr. F. C. How, secretary, Atomic Energy Office ; Mr. Willis Jackson, Director of Research and Education, Metropolitan-Vickers Electrical Co. Ltd. ; Mr. K. I. Julian, chairman, South-East Metropolitan Regional Hospital Board ; Alderman R. B. Keefe, for political and public services in Norfolk ; Colonel J. B. Mills, for political and public services in Hampshire ; Colonel F. A. Neill, for public services in the West Riding ; Mr. A. H. K. W. Northey, for political and public services in Wiltshire ; Mr. J. S. Pickles, chairman, South of Scotland Electricity Board ; Mr. Robert Rae, director, National Agricultural Advisory Service ; Mr. Eric Riches, Surgeon and Urologist to Middlesex Hospital ; Mr. J. E. Robinson, for political and public services in Cheshire ; Mr. W. C. Russon, president of the Festival of Wales ; Mr. J. W. Senter, for political services ; Mr. C. A. P. Southwell, managing director, Kuwait Oil Company ; Mr. John Summerson, Curator of Sir John Soane's Museum, for services to the history of architecture ; Professor T. H. Parry-Williams, sometime Professor of Welsh Language and Literature at Aberystwyth, for services to learning and literature in Wales ; Mr. Gerald Wills, M.P. (C., Bridgwater), Comptroller of H.M. Household ; Mr. Ian David Yeaman, president of the Law Society.

Other recipients of knighthoods and of other awards included the following :

Prime Minister's List. Mr. R. J. Ayres, Deputy Secretary, Ministry of Power ; Colonel P. J. Blair, for political services in Scotland ; Colonel R. J. Cash, lately chairman, Territorial and Auxiliary Forces Association in Warwickshire ; Mr. J. Beresford Clark, Director of External Broadcasting, B.B.C. ; Mr. J. H. Evans, deputy chairman, Board of Inland Revenue.

Foreign Office List. Mr. W. F. Crawford, Head of Middle East Development Division, Lebanon ; Mr. E. T. Lambert, H.M. Consul-General in Paris ; Mr. Richard Whittington, H.M. Ambassador in Bangkok.

Commonwealth Relations Office List. Mr. C. R. Cudmore, member of the Legislative Council, South Australia ; Brigadier K. B. Fraser, a leading Brisbane surgeon ; Mr. W. J. F. McDonald, Speaker of the Legislative Assembly, Victoria, Australia ; Mr. W. H. S. Micholmore, a member of the U.K. business community in India ; the Hon. John Murray, Chief Justice of Southern Rhodesia ; Mr. Justice Norman O'Bryan, of the Supreme Court of Victoria ; Mr. Norman de Winton Robinson, chairman of the Amateur Turf Club, Victoria.

Colonial Office List. Mr. R. S. Bacon, lately Justice of Appeal, East African Court of Appeal ; Mr. C. H. Bird, Minister of Commerce and Works, Uganda ; Colonel A. G. Curphey, for public services in Jamaica ; Mr. E. J. Davies, Q.C., Chief Justice of Tanganyika ; the Hon. Olumuyiwa Jibowu, Chief Justice of the High Courts of Lagos and Southern Cameroons, Nigeria ; Mr. Kenneth Maddocks, Governor-designate of Fiji ; Mr. Arthur Mooring, Deputy-Governor, Western Region, Nigeria ; Mr. George Oehlers, for public services in Singapore ; Mr. R. O. Ramage, chairman, Public Service Commission, Uganda ; Mr. R. W. Taylor, Engineer-in-Chief, Office of the Crown Agents for Oversea Governments and Administrations ; Mr. E. H. Windley, Governor-designate of the Gambia.

The Armed Forces. Recipients of knighthoods in the Services included Vice-Admirals H. W. Biggs, W. T. Couchman, and M. L. Power, Rear-Admiral K. H. T. Peard, Lieutenant-Generals J. C. Cowley and R. W. McLeod, and Major-General L. E. Cutforth.

Commonwealth of Australia List. Professor K. H. Bailey, the Federal Solicitor-General ; Dr. J. C. Eccles, Professor of Physiology in the Australian National University (Canberra) ; Mr. B. T. Edye, a prominent Sydney surgeon ; Mr. A. J. Reid, Chancellor of the University of Western Australia ; Air Marshal F. R. W. Scherger, Chief of Air Staff, R.A.A.F.

New Zealand List. Dr. C. R. Burns, of Wellington, for services to medicine ; Dr. F. H. Smirk, Professor of Medicine, Otago University ; Major-General W. G. Gentry (retd.), N.Z. Army ; Major-General K. I. Stewart (retd.), N.Z. Army.

Rhodesia and Nyasaland List. Judge H. J. Clayden, of the Federal Supreme Court.

D.B.E. Awards. The D.B.E. was conferred on Air Commandant Mary Henrietta Barnett, Women's Royal Air Force ; Mrs. Katharine Elliot (widow of the late Colonel Walter Elliot, M.P.), for political and public services ; Ivy, Duchess of Portland, chairman of the council of the National Association for the Prevention of Tuberculosis ; Miss Maggie Teyte (Mrs. Margaret Cottingham), the operatic singer, for services to music ; and Air Commandant Alice Mary Williamson, Princess Mary's R.A.F. Nursing Service.

C.B.E. Awards. Recipients of the C.B.E. included Mr. Norman Allin, the operatic bass, Professor of Singing at the Royal Academy of Music ; Mr. Matt Busby, manager of Manchester United F.C., for services to association football (Mr. Busby was badly injured in the Munich air disaster—see 16288 A) ; Mr. Val Gielgud, Head of Drama (Sound) at the B.B.C. ; Mr. Jack Hawkins, the actor ; Mr. Ivon Hichens, the artist ; Miss Celia Johnson (Mrs. C. E. Fleming), the actress ; Dr. Rudolph Lessing, president of the National Society for Clean Air ; Mr. Nugent Monck, lately director of the Maddermarket Theatre, Norwich ; Mr. George Murray, chief leader writer of the *Daily Mail* ; Mr. Terence Rattigan, the playwright ; Colonel Robin Smart, who led the Royal Society's expedition at Halley Bay (Antarctica) during the International Geophysical Year ; and Mr. Alexander Trotter, editor of the *Scottish Daily Express*.

Of the two recipients of peerages in the New Year Honours (see 15937 A), Sir Norman Birkett took the title of Baron Birkett of Ulverston, in the County Palatine of Lancaster ; and Field-Marshal Sir John Harding took the title of Baron Harding of Petherton, of Nether Compton in the County of Dorset.—(Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau)

(Prev. rep. 15937 A.)

B. IRISH REPUBLIC. — Civil Aviation. - New Transatlantic Service by Aerlinte Eireann. - American Capital Participation in Aerlinte Company.

A new Dublin - New York service *via* Shannon was opened on April 28 by *Aerlinte Eireann*, using Super-Constellations leased from Seaboard and Western Airlines—a U.S. charter and cargo carrier. It is also planned to operate a service to Boston from the autumn.

Aerlinte Eireann was set up in 1947 by *Aer Rianta*, the Irish Government-owned parent company of *Aer Lingus*. A fleet of Lockheed Constellations was bought, but on the eve of the commencement of the service to the U.S.A. in 1948 Mr. de Valera's Government, which had sponsored the undertaking, lost the general elections and the Coalition Government which succeeded it abandoned the scheme for financial reasons. With the return of Mr. de Valera to power in 1953 the *Aerlinte* project was revived, the company signing an agreement with Seaboard and Western for the charter of aircraft and crews. The matter was again dropped, however, when the U.S. Civil Aeronautics Board decided to limit this charter agreement to two years, which was not considered long enough by *Aerlinte* ; moreover, Mr. de Valera was again defeated at the general elections held in that year. After Mr. de Valera's return to power in 1957, Mr. Sean Lemass (*Tanaiste*), who from the start had been chiefly responsible for the project, revived it again, with the result that the new service was inaugurated in April as stated above.

It was announced in Dublin on May 14 that Seaboard and Western Airlines would purchase 500,000 shares of £1 in *Aerlinte* at par on the basis of $2.80 per £1, and would thus acquire a 26 per cent interest in the company. It would also be represented on *Aerlinte's* board of directors.
(Irish Times, Dublin) **(Prev. rep. 9248 B ; 8497 B.)**

C. UNITED KINGDOM. — Reduction in Interest Rates on Local Authority Loans.

Interest rates on new loans to local authorities from the Local Loans Fund were reduced from July 12 as follows (existing rates in parentheses) : up to five years, 5¾ per cent (6½ p.c.) ; five to 15 years, 6¼ per cent (6½ p.c.) ; over 15 years, 6¼ per cent (6¼ p.c.).—(Treasury Press Office, London)

(Prev. rep. 16032 B.)

A. POLAND. — Gomulka - Cyrankiewicz Visit to Bulgaria, Hungary, and Rumania. - M. Cyrankiewicz's Asian Tour. - Polish-Czechoslovak Agreement on Economic Co-operation.

A Polish delegation led by M. Gomulka (first secretary of the United Workers' Party) and M. Cyrankiewicz (the Prime Minister) visited Sofia from May 5-9, Budapest from May 9-12, and Bucharest from May 12-15, 1958, for talks with the leaders of the Governments and Communist parties of Bulgaria, Hungary, and Rumania. While in Budapest, M. Gomulka for the first time publicly expressed approval of the suppression of the Hungarian uprising of 1956 by the Soviet Army.

Addressing members of the Hungarian Socialist Workers' Party on May 10, M. Gomulka said that the Polish Communists had been aware of the danger which the "counter-revolution" in Hungary represented to Poland and to peace in Europe. "We could clearly see that suppression of the counter-revolution, irrespective of its causes, was necessary," he continued. "Therefore we recognized the Soviet Union's decision to come to the rescue of the Socialist forces in Hungary as justified and necessary. In the actual conditions then created in your country, that was the carrying-out by the Soviet Union of its internationalist duty in the interests of the Hungarian people, of peace, and of all Socialist countries. For the same reason we have given our support to the forces in Hungary which resolutely defended Socialism. The leadership of these forces has been taken up by your reborn party, the Hungarian Socialist Workers' Party, and by experienced activists led by Janos Kadar."

A communiqué issued in Bucharest on May 15 stated that the Polish and Rumanian Governments had decided to appoint a joint commission to draw up a trade agreement for 1959-60 and long-term plans for exchanges of goods during the five-year period 1961-65.

M. Cyrankiewicz's Asian Tour.

M. Cyrankiewicz had previously headed a Polish delegation which made a tour of seven Asian countries in March and April 1957. The delegation arrived in Delhi on March 17, and flew to Rangoon on the following day. A joint statement issued on March 21 by M. Cyrankiewicz and U Nu (the Burmese Premier) reaffirmed their support for the "five principles" of peaceful co-existence, and called for the replacement of military blocs by a collective security system, the admission of the Chinese People's Republic to the U.N., prohibition of the production, testing and use of nuclear weapons, and reduction of conventional armaments.

M. Cyrankiewicz visited Pnom-Penh from March 21-23 for talks with M. San Yun, then Prime Minister of Cambodia. A communiqué expressed the view that "the policy of neutrality conducted by an ever-increasing number of Asian States represents an essential element of world peace"; it also paid tribute to the "constructive role" in the consolidation of peace played by the International Control Commission in Cambodia, on which Poland is represented.

After returning to Delhi on March 24 for a 10-day visit to India, M. Cyrankiewicz signed on March 27 an Indo-Polish cultural co-operation agreement providing *inter alia* for the exchange of scientists, lecturers, and artists and the training of experts of either country in scientific and industrial centres in the other. At a press conference on the same day M. Cyrankiewicz expressed full support for India's claims to Kashmir and Goa. Before leaving India on April 3 he paid visits to Chandigarh, Agra, Bangalore, Bombay, and Calcutta.

The Polish delegation visited Hanoi from April 3-6 for talks with President Ho Chi-Minh and M. Pham Van-Dong, (the North Vietnamese Premier), and proceeded on April 7 to Peking. After discussions between M. Cyrankiewicz and Mr. Chou En-lai, a joint statement on international problems was issued on April 11.

The Polish-Chinese statement called for "the replacement of antagonistic military blocs by collective security systems"; emphasized the need for "continuous efforts . . . to facilitate a *rapprochement* between nations regardless of differences in political, economic, and social systems"; and condemned "all attempts of the colonialists to obstruct the national liberation movements." Emphasizing the importance of strict implementation of the Geneva Agreements on Indo-China, the statement welcomed "the faithful execution of the agreements by the Cambodian Government" but expressed "regret" at "the obstruction of the implementation of the agreements by the Government of South Vietnam, supported by external forces." As regards Hungary, the statement reaffirmed the support of the Polish and Chinese Communist parties for the Kadar Government "in its struggle to consolidate the Socialist system and eliminate the consequences of past mistakes."

M. Cyrankiewicz concluded his Asian tour by visiting North Korea and Mongolia, and returned to Poland *via* Moscow. In a speech to the Polish Seym on April 27, in which he summed up the results of the tour, he spoke of the "vast field" in the various countries of Asia in which the Polish economy could develop trading activities, particularly through "technical co-operation in its broadest aspects, such as the export of machinery, the construction and expansion of industrial establishments, co-operation in the expansion of shipping, construction of seaports, geological research, and the construction of mines." These possibilities had so far only been utilized to a a very small extent, and the future development of economic relations with Asian countries would depend on "organizational efficiency, energy, and diligence."

Polish-Czechoslovak Economic Agreement.

M. Cyrankiewicz also headed a Government delegation which visited Czechoslovakia from May 2-7, 1957. An agreement was signed in Prague for the establishment of a Polish-Czechoslovak Economic Co-operation Committee, which would be responsible for co-ordinating the development of the two countries' economies, expanding mutual exchanges of goods and services, and strengthening scientific and technical co-operation. (Polish Embassy Press Office, London - Indian High Commissioner's Office, London - Times)

B. PAKISTAN. — Construction of Steel Plant and Natural Gas Power Station at Multan.

The Government of Pakistan approved on June 23 a plan for the building of a steel plant at Multan, with an annual production capacity of 60,000 tons. The project is based on the use of the iron-ore deposits at Kalabagh and of coal from the Makerwal collieries, as well as on natural gas from the Sui field; it was estimated to cost 170,000,000 rupees (£12,750,000), including the equivalent of 120,000,000 rupees in foreign exchange. The Government agreed that the Krupp-Renn process should be used for the steel mill unless a better and cheaper process could be determined after tests with Pakistan ore at present being conducted in the U.S.A.; the Krupp-Renn process had been recommended by the Pakistan Industrial Development Corporation.

The plan for a steel-works in the Punjab had been submitted by the Pakistan Industrial Development Corporation as long ago as 1955, after the Corporation had signed an agreement with Krupps of Essen for the construction of the plant; the agreement was for a period of 10 years and gave Krupps a 10 per cent share both in investment and profits.

Pakistan at present imports 100,000,000 rupees worth of steel products annually on private account, in addition to imports for defence requirements; the establishment of a steel plant will therefore considerably help in conserving foreign exchange. It was stated that the plant was expected to go into production within 2½ years, and that 40 per cent of the share capital would be open to public subscription.

The foundation-stone of a natural gas power station at Multan—a project likewise sponsored by the Pakistan Industrial Development Corporation - was laid on April 24 by the Prime Minister, Mr. Firoz Khan Noon. When completed, the station will have a capacity of over 140,000 kilowatts and will be the largest thermal electric station in Pakistan.
(Pakistan High Commissioner's Office, London)
(Prev. rep. Sui Gas Project, 13442 A.)

C. NORWAY. — Church Blessing for King Olav V.

King Olav V of Norway received the Blessing of the Church equivalent to a coronation ceremony, which was abolished in 1908—at the ancient Cathedral of Nidaros (Trondheim) on June 22. The ceremony was conducted by Bishop Fjellbu of Trondheim and Bishop Smemo of Oslo, and took place in the presence of Crown Prince Harald, Princess Astrid, Princess Ragnhild, the Norwegian Prime Minister and Foreign Minister, members of the *Storting*, military and civic leaders, and the Diplomatic Corps.

Nidaros Cathedral is the principal sanctuary of the Norwegian people, being dedicated to St. Olav—the king who brought Christianity to Norway from England nearly 1,000 years ago, and who is buried in the Cathedral. (Aftenposten, Oslo)
(Prev. rep. 15769 A.)

D. GUATEMALA - HONDURAS. — Agreements on Closer Economic Integration.

The Presidents of Guatemala and Honduras, respectively General Ydigoras Fuentes and Dr. Ramón Villeda Morales, met on April 28 at San Pedro Sula (Honduras) and signed an agreement between the two countries, known as the Charter of San Pedro Sula. It provided for the integration of the Guatemalan and Honduran transport systems, the exchange of raw materials, the abolition of double taxation, and guarantees for the investment of Guatemalan capital in Honduras and of Honduran capital in Guatemala.
(Bank of London and South America) **(Prev. rep. 15468 A.)**

A. BRITISH COLONIAL TERRITORIES.—Colonial Development Corporation. - Report for 1957. - The Overseas Resources Development Act.

The report of the Colonial Development Corporation for 1957, published on April 29, 1958, showed a net profit of £732,868 (after payment of interest amounting to £553,920), as compared with a net profit of £572,809 in 1956; it included a net operating profit of £227,908 on direct projects and subsidiary undertakings. The Corporation's activities in 1957 are summarized below.

Projects in Operation. During 1957 ten new projects were started, whilst all the 66 schemes in operation at Dec. 31, 1956 were continued. The capital approved for the 76 schemes in operation at Dec. 31, 1957, amounted to £80,468,000, of which £51,877,000 had actually been spent. A further 42 projects were under investigation.

Location of Projects. The projects in operation at Dec. 31, 1957 were located as follows (capital approved for each area shown in parentheses): *Caribbean Region*, 17 (£8,667,000); *Far East*, 13 (£18,109,000, including £12,763,000 for eight projects in the Federation of Malaya); *East Africa*, 16 (£15,644,000); *Central Africa*, seven (£22,108,000); *High Commission Territories*, 13 (£12,338,000); *West Africa*, 10 (£3,601,000, including £350,000 for a project in Ghana).

Functional Distribution of Capital. Of the total approved capital expenditure up to the end of 1957, public utilities (including power, transport, and housing) accounted for 51.5 per cent, compared with 53.6 per cent at the end of 1956; primary production, including agriculture, minerals, and forestry, for 38 per cent (35.9 per cent at the end of 1956); and processing and manufacture for 10.5 per cent (unchanged). The report explained that the 1954-56 trend towards basic development of public utilities and away from agriculture had been reversed in 1957, partly because Government policy had restricted C.D.C. lending to public corporations, and partly because of rising expenditure in the normal course of the Corporation's own primary projects.

Losses on Projects. Although 1957 was a successful year on the whole, the fall in commodity prices, adverse weather conditions in many areas, and a serious outbreak of foot and mouth disease in Bechuanaland (where the Corporation has large cattle ranches—see 11015 B) resulted in serious losses being incurred on several projects. In particular, the fall in the price of copper involved the Corporation's subsidiary, Macalder-Nyanza Mines Ltd., in a loss of £207,505; £400,000 had been set aside from 1957 profits to cover this and to take care of investments in other mining projects. Four other projects just coming into production or operation—British Honduras Fruit Co., Kasungi Tobacco Estates, Vipya Tung Estates, and Nigeria Housing Development Society Ltd—had also shown losses, but were expected to do better on full-scale working.

Suggested Capital Reorganization. The report pointed out that under the Overseas Resources and Development Act of 1958 (see below) the Corporation's borrowing powers had been increased from £100,000,000 to £150,000,000, but that the amount which might be borrowed from the U.K. Exchequer was limited to £130,000,000. The Corporation was thus authorized to borrow £20,000,000 from non-Government sources, but before this could be done it would have to show that it was "credit-worthy by ordinary commercial standards." The report made proposals for capital reorganization, including (*a*) the writing-off of about £8,000,000 for special losses incurred on unsuccessful projects started before 1951; (*b*) the provision of quasi-equity capital with no pre-determined interest or amortization but with "an obligation on the Corporation to pay a share of annual revenue surpluses as dividends."

Co-operation in Promoting Development. In many projects the C.D.C. was associated with other organizations and companies providing development finance, including the Commonwealth Finance Company, Barclays Overseas Development Corporation, the International Bank for Reconstruction and Development, and Canadian, Danish, Dutch, and Italian capital, as well as with local capital in the areas concerned. The Corporation proposed to "bring in more capital from sources other than the United Kingdom" to share in development opportunities in Commonwealth territories, and to encourage local association in its own projects "wherever this can be done without disproportionate commercial and efficiency risk." Producer co-operatives and smallholder schemes were being established in connexion with estate projects and central processing plants, and qualified local people were being appointed as directors of subsidiary and associated companies. The C.D.C. welcomed the establishment of territorial development corporations, and already worked in partnership with the Industrial Development Corporation in Kenya, the Uganda Development Corporation, the Singapore Improvement Trust, and regional development boards in Nigeria.

The Overseas Resources and Development Bill, referred to in the report, had been given an unopposed second reading in the House of Commons on Jan. 28 1958, and was enacted on March 13. In addition to raising the Corporation's borrowing ceiling (excluding temporary finance) as stated above, it extended its possible scope of activities (hitherto restricted to Colonial territories) to former dependent territories which had meanwhile achieved independence. Thus the Corporation was authorized (*a*) to continue existing projects and provide additional capital for them in newly independent countries (e.g. Ghana and Malaya) if the Colonial Secretary thought fit; (*b*) to act in these countries (subject to Government agreement) as managing agents or to perform advisory functions, but without committing C.D.C. funds.

Grants made to British colonies under the Colonial Development and Welfare Acts during the year ended March 31, 1958, totalled £18,604,413, or about £7,000,000 less than in the year ended March 31, 1957. Expenditure during 1957-58 reached the record figure of over £19,000,000, the main items being: over £5,000,000 for communications, mainly on roads and civil aviation; £4,000,000 for education, including £451,000 for the University College of East Africa, £305,093 for Eastern Nigeria, and £200,000 for the University of Hongkong; and over £3,000,000 for agricultural and veterinary schemes, including £1,000,000 for intensification of African agriculture in Kenya and £750,000 for farm development in Jamaica. Grants made since the Acts were passed in 1946 have totalled over £194,000,000, of which over £156,000,000 has already been spent.—(Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey) **(Prev. rep. 15583 C; 13623 C.)**

B. UNITED STATES. — Pulitzer Prize Awards.

The recipients of the annual Pulitzer Prizes were announced on May 5 by the trustees of Columbia University, the awards being for the year 1957:

Drama. Awarded to Ketti Frings, the Hollywood scenario writer, for her dramatization of Thomas Wolfe's novel *Look Homeward, Angel*. Mrs. Frings is the author of a novel and of a number of screen stories.

Literature. Awarded posthumously to the late James Agee for his novel *A Death in the Family*, which appeared in 1955 shortly after his death. Mr. Agee (45) did much writing for motion pictures and television and was the author of a considerable amount of poetry and art criticism.

Biography. Awarded posthumously to the late Dr. Douglas Southall Freeman for his multi-volume *George Washington*, the seventh volume of which was completed after his death in 1953 by Professor J. A. Carroll and Mary Wells Ashworth. Dr. Freeman was one of America's leading historians and was formerly Rector of the University of Richmond, Virginia.

History. Awarded to Bray Hammond for his *Banks and Politics in America: From the Revolution to the Civil War*. Mr. Hammond (71), an authority on banking, retired in 1950 from the Federal Reserve Board in Washington, of which he was assistant secretary.

Poetry. Awarded to Robert Penn Warren for his volume of lyric poems entitled *Promises: Poems 1954-1956*. Mr. Penn Warren (53) is one of America's leading poets and novelists.

Music. Awarded to Samuel Barber for his score for the new American opera *Vanessa*, which had its première in January last. Mr. Barber (48) is one of the best-known of American contemporary composers, *Vanessa* being his first opera.

National Reporting. Two awards were made—to Mr. Relman Morin, an Associated Press reporter, for his "dramatic and incisive" eye-witness report of mob violence on Sept. 23, 1957, during the integration crisis in Little Rock; and to Mr. Clark Mollenhoff, of the *Des Moines Register and Tribune*, for a lengthy inquiry into labour union racketeering which was credited with assisting Congressional investigations.

International Reporting. Awarded to the *New York Times* for "its distinguished coverage of foreign news, which was characterized by admirable initiative, continuity, and high quality during the year." This was the first time that the award had been given to a newspaper staff collectively.

Special Citation. A special citation was given to Mr. Walter Lippmann, of the *New York Herald Tribune*, for "the wisdom, perception, and high sense of responsibility with which he has commented for many years on national and international affairs."

The prize for disinterested and meritorious service by a newspaper was awarded to the *Arkansas Gazette*, of Little Rock, for "demonstrating the highest qualities of civic leadership, journalistic responsibility, and moral courage" during the Little Rock integration crisis; the citation said that the newspaper's "fearless and completely objective news coverage, plus its reasoned and moderate policy, did much to restore calmness and order to an overwrought community."

The award for editorial writing went to Mr. Harry S. Ashmore, executive editor of the *Arkansas Gazette*, for "the forcefulness, dispassionate analysis, and clarity of his editorials" during the Little Rock crisis.—(New York Times - New York Herald Tribune) **(Prev. rep. Pultizer Awards, 15579 A.)**

C. UNITED KINGDOM. — Capital Issues.

New capital issues during the first half of 1958 totalled £205,557,000, compared with £211,527,000 for the first six months of 1957 and £383,857,000 for the whole of that year. Of the six-monthly total, £169,896,000 were issues for the U.K., £35,661,000 for British overseas countries, and nil for foreign countries.—(Midland Bank Ltd.) **(16032 C.)**

A. UNITED STATES. — Alaska becomes the 49th State of the Union.

An Administration Bill making Alaska the 49th State of the Union was signed by President Eisenhower on July 7 after it had been passed by the House of Representatives on May 28 by 208 votes to 166, and by the Senate on June 30 by 64 votes to 20. In signing the Bill, the President expressed his pleasure at the Congressional action but also his regret that no similar action had been taken to admit Hawaii to the Union.

The 208 affirmative votes in the House of Representatives comprised 117 Democrats and 91 Republicans, while the 166 opposing votes comprised 81 Democrats and 85 Republicans—among them Mr. Joseph W. Martin, jr., the minority leader in the House.

In the Senate, the 64 affirmative votes were cast by 33 Republicans and 31 Democrats, and the 20 opposing votes by 13 Democrats and 7 Republicans. Supporters of Alaskan statehood included, on the Democratic side, Senators Anderson, Chavez, Clark, Douglas, Green, Humphrey, Jackson, Kefauver, Kennedy, Long, Magnuson, Mansfield, Sparkman, and Symington; and on the Republican side, Senators Bricker, Capehart, Carlson, Dirksen, Hickenlooper, Javits, Knowland, Langer, Mundt, and Wiley. Democratic senators opposing statehood for Alaska included Senators Byrd, Ellender, Fulbright, McClellan, Russell, and Thurmond; the Republican opponents of statehood included Senators Bridges and Saltonstall.

The Alaskan Statehood Bill contained the following principal provisions :

(1) An affirmation that the Constitution of the State of Alaska, approved by the territorial Legislature and adopted by public vote on April 24, 1956, was republican in form and in conformity with the Constitution of the United States and the principles set out in the Declaration of Independence.

(2) A definition of the boundaries of the State, together with the following provisions (*a*) the new State would be permitted to select 103,550,000 acres of vacant and unappropriated public lands so as to establish a "tax base"; (*b*) it could open these lands to prospectors for minerals; (*c*) the State would derive the principal advantage in all gains resulting from the discovery of minerals; (*d*) certain Federally-administered areas at present reserved for conservation of fisheries and wild-life would be transferred to the State; (*e*) Alaska would receive from the Federal Government 70 per cent of the proceeds derived from the sale of fur seal-skins and sea-otter skins.

(3) The Governor of Alaska [Mr. Michael Stepovich] would issue, not later than Aug. 1, 1958, a proclamation fixing dates for the holding of elections in Alaska, including the election of two Senators for the State and one member of the House of Representatives. These elections would be held not later than Dec. 1, 1958.

(4) Before Dec. 1, 1958, the people of Alaska would be asked, by referendum, whether they desired immediate Statehood under the conditions specified in the Congressional legislation. If negative votes were in a majority, the Statehood Act would be non-effective.

(5) The State of Alaska would have two Senators and one member of the House of Representatives.

[Each State of the Union has two senators, irrespective of population. The House of Representatives is recruited on a population basis by Congressional districts, each of which comprises at present about 600,000 people. As the population of Alaska (excluding military personnel) is only about 160,000, it would be eligible for only one member.]

(6) Special provision would be made for Federal control of land for defence needs in areas of high strategic importance.

Alaska—the first new State of the Union since the admission of New Mexico and Arizona in 1912—has an area of 586,400 square miles, making it by far the biggest of the 49 States. It is more than twice the size of Texas (which, with 267,000 square miles, had been the biggest State since 1845) and one-fifth the size of the United States—i.e. of the U.S.A. prior to Alaska's entry into the Union.

In addition to being the biggest State of the U.S.A., Alaska is the only State extending into the Eastern Hemisphere; the Aleutian Islands, which are part of Alaska, extend beyond the 180th meridian (the International Date Line) to 172 degrees E. longitude, thus bringing the continental United States to within three miles of the Soviet Union. Moreover, the continental United States now extends well beyond the Arctic Circle, the northernmost point of Alaska (Point Barrow) lying in 71 degrees N. latitude. With the admission of Alaska to the Union, the United States now has a total area of 3,608,787 square miles.

Although the biggest State of the Union in point of view of area, Alaska has a smaller population than any other State except Nevada. The Census of 1956 showed a population of about 161,000, of whom 35,000 were Eskimos, Aleuts, and Indians of the Tlingit, Haida, and Athabascan tribes. Including military personnel, the new State has a total population of about 215,000—approximately 2.8 square miles to every Alaskan.

The great natural resources of Alaska—still largely unexploited—include timber and other forest products, fisheries (particularly salmon-fishing), minerals (including gold, silver, copper, lead, coal, iron, nickel, molybdenum, chrome, tin, platinum, and mercury), oil (considerable deposits were discovered in 1957 on the Kenai peninsula, south of Anchorage), agriculture, and furs. Production figures for Alaska's leading natural resources in 1957 were: fisheries $79,000,000, timber $39,000,000, mining $25,000,000, furs $6,800,000, agriculture $4,500,000. The Eskimo, Aleut and Indian populations are mostly engaged in hunting and fishing.

Alaska was discovered in 1741 by a Russian expedition organized by Peter the Great and led by the Danish navigator Vitus Bering, who gave his name to the Bering Straits. Formerly known as Russian America, it was purchased by the United States from Russia in 1867 for the sum of $7,200,000, during the presidency of Andrew Johnson. In 1912 Alaska was given the status of a territory of the United States, with its own territorial legislature at Juneau. The first attempt to achieve Statehood for Alaska was made in 1916, but without success. During the 42 years since that time many further attempts had been made, but no legislation had succeeded in passing through both Houses of Congress until the Bill signed by President Eisenhower on July 7.

The capital of Alaska is Juneau (6,000), while the largest town is Anchorage (12,000); other centres of population are Fairbanks (6,000) and Sitka, the former capital.

The entry of Alaska into the Union gave rise to great rejoicings in the new State, where there were torchlight processions and other ceremonies in Juneau, Anchorage, and elsewhere. (New York Times - New York Herald Tribune)

The States of the Union. The original 13 States of the Union—symbolized by the 13 red and white stripes on the American flag—were Connecticut, Delaware, Georgia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, and Virginia. Subsequent admissions were as follows :

Vermont	1791	Minnesota	1858
Kentucky	1792	Oregon	1859
Tennessee	1796	Kansas	1861
Ohio	1803	West Virginia	1863
Louisiana	1812	Nevada	1864
Indiana	1816	Nebraska	1867
Mississippi	1817	Colorado	1876
Illinois	1818	North Dakota	1889
Alabama	1819	South Dakota	1889
Maine	1820	Montana	1889
Missouri	1821	Washington	1889
Arkansas	1836	Idaho	1890
Michigan	1837	Wyoming	1890
Florida	1845	Utah	1896
Texas	1845	Oklahoma	1907
Iowa	1846	New Mexico	1912
Wisconsin	1848	Arizona	1912
California	1850	Alaska	1958

The admission of Alaska as the 49th State will involve a change in the design of the American flag, in which each State is symbolized by a white star—of which there were hitherto 48. Corresponding changes will be necessary if Hawaii becomes the 50th State of the Union.—(New York Times)

B. FRANCE. — Liberation Cross conferred on Sir Winston Churchill.

General de Gaulle announced on June 17 that the French Government had decided to confer the Liberation Cross (*Croix de la Libération*) on Sir Winston Churchill to mark the 18th anniversary of June 18, 1940—the date on which General de Gaulle issued his call to Frenchmen to continue the struggle against Nazi Germany.

The *Croix de la Libération* is awarded for "distinguished service in the liberation of France and her empire"; no award had been made since General de Gaulle relinquished the post of Head of Government in 1946. The decoration has been conferred on 780 French nationals, of whom about 460 are living. Prior to its conferment on Sir Winston Churchill, there were only two foreign holders of the Liberation Cross—President Eisenhower and King Mohammed V of Morocco.

(Le Monde, Paris)

C. CANADA. — Approval of "Norad" Agreement.

The air defence agreement between Canada and the United States, signed in Washington on May 19 and setting out the principles governing the operation of the North American Air Defence Command (NORAD), was approved on June 19 by the Canadian House of Commons and on June 26 by the Senate. It was announced in Ottawa on July 3 that the nine R.C.A.F. jet interceptor squadrons had been placed under the operational control of NORAD, together with the radar stations comprised in the Pinetree Line and the Mid-Canada Chain.

JULY 19—26, 1958

A. LEBANON. — Complaint to Security Council against alleged Interference by United Arab Republic. - Creation of U.N. Observation Group in the Lebanon. - Lebanese Criticisms of Observation Group's Report.

The insurrection which broke out in the Lebanon in May (see 16181 A) continued throughout June and July, the country being in a state of virtual civil war by the latter month. The anti-Government forces, led by prominent Opposition leaders, remained throughout this period in control of parts of Beirut, Tripoli, and Sidon, entrenched behind barricades and from time to time fighting back against attempts by Government forces to dislodge them. Outside the principal towns, the insurgents were also in control of much of the Bekaa Valley, of large areas of mountainous country in the northern and southern Lebanon, and of almost all areas adjoining the Syrian frontier.

The Lebanese revolt was led by three prominent Opposition leaders : (1) M. Saeb Salam, commanding the rebel forces holding out in the predominantly Moslem quarter of Beirut under insurgent control ; (2) M. Rashid Karame, commanding the insurgent forces holding the Moslem quarter of Tripoli ; and (3) M. Kemal Jumblatt, a Druse leader operating in the hills south-east of Beirut. M. Salam and M. Karame are both former Prime Ministers, while M. Jumblatt is leader of the Progressive Socialist party.

Internal and international developments in the Lebanese crisis (in continuation of 16181 A) are described below under cross-headings :

Military Operations. - Bomb Explosions.

Owing to the press censorship, little factual information was available of the military operations carried out by the Lebanese Army. It appeared, however, that these operations were largely sporadic in character, occasional sharp outbreaks of fighting alternating with long periods of relative quiescence. From time to time attempts were made to " mop up " the rebel-held areas of Beirut, Tripoli, and Sidon, but with little success. Outside the cities, Government forces claimed some successes in south-eastern Lebanon against Kamil Jumblatt's Druse tribesmen, and claims were also made to have recaptured Baalbek and the northern border town of Halba. On the frontiers, occasional skirmishes were reported from time to time with rebel units who, according to the Government's communiqués, were assisted by large numbers of infiltrators from Syria.

Some of the heaviest fighting in this period occurred in Beirut on June 14-16 and in Tripoli on June 26-27. In the capital, rebel units holding out in the Basta quarter attacked a police post and the central prison, while a mob broke into the official residence of the Prime Minister (M. Sami Solh) and pillaged rugs and tapestries ; street fighting and rooftop sniping went on for many hours in the vicinity of the Presidential palace and elsewhere in the city. After two days, however, conditions reverted to the previous position of stalemate. Total casualties in the street fighting and sniping were about eight killed and some 20 wounded, several of the victims being civilians. On the rebel side, operations were directed by M. Salam from his house in the Basta quarter, which had been spasmodically shelled and fired on by Government forces, its upper stories being in ruins. According to foreign press correspondents, however, M. Salam's residence continued to be supplied with water and electric power under an " agreement " with the besieging Government forces, and also remained in continuous telephonic communication with other parts of the city.

In Tripoli, rebel units under M. Karame attacked Government forces on June 26-27 with machine-guns and grenades, the Army retaliating with artillery fire. Rebel sources put their own losses at about 140 killed ; they also stated that about 100 houses in the *Medina* (the Moslem walled city in which the insurgents were barricaded) had been demolished by the Government's artillery. Fighting on a minor scale occurred in Sidon from time to time.

Druse forces under M. Jumblatt attacked the village of Shemlan (about 15 miles from Beirut) during June 30, apparently with the intention of opening the road to the capital and capturing Beirut airport, which lies in a direct line 10 miles from the village. They were halted by Government ground and air forces on July 2 three miles beyond Shemlan, and ultimately driven back into the hills after suffering a number of casualties. The British Middle East Centre for Arabic Studies (situated at Shemlan) was evacuated during the fighting. Although the Druse forces were unsuccessful in their attempt to advance on Beirut, they remained in control of the hilly country (the Chouf) south-east of the capital.

Apart from the intermittent fighting in Beirut, Tripoli, and the countryside, a number of bomb explosions occurred in the Government-held areas of Beirut, involving heavy civilian casualties. The most serious incidents were on May 25, when three people were killed and 26 badly injured when a bomb exploded in a crowded tram ; on June 23, when four people were killed and many injured by an explosion in the vegetable market of Beirut ; and on July 8, when six people were killed and at least 45 injured by a bomb explosion in one of Beirut's largest department stores. The five-storey building was destroyed by fire, the damage being estimated at £250,000. The Opposition leaders disclaimed any responsibility for these outrages.

The Lebanese Political Situation.

Various attempts to bring about a *modus vivendi* between the Government and the Opposition were made during the period under review, but without success. In a broadcast on May 27, the Prime Minister (M. Sami Solh) gave an assurance—the first of its kind—that President Chamoun had no intention of submitting a constitutional amendment Bill to enable him (the President) to seek re-election for a second term in September. In a statement on the same day, however, M. Saeb Salam declared that the Opposition would insist on the immediate resignation of President Chamoun, adding that this was " the only issue " between the Government and the Opposition.

A suggestion that the crisis could best be resolved by the resignation of President Chamoun was also made on May 30 by the Maronite Christian Patriarch of the Lebanon (Mgr. Paul Meouchi), who had been regarded as a possible mediator between the Government and the Opposition.

In a press statement, the Patriarch strongly criticized the Government for having allegedly " falsified " the elections of 1957 ; suggested that the President should be asked to take " a little trip abroad " ; and gave it as his personal opinion that the only solution to the crisis was the assumption of power by General Chehab, the Commander-in-Chief of the Lebanese Army.

After pointing out that the Lebanon was a " melting-pot " [of Christians and Moslems], and saying that the country was " in real danger of a civil and religious war," the Patriarch expressed the view that the Lebanon's troubles were fundamentally due to internal and not to external causes. He recalled that President Nasser had more than once made " solemn declarations " that he had no wish to annex Lebanon to the United Arab Republic, adding that " it is not in the interests of the [Lebanese] Opposition, who are intelligent men, to join the U.A.R." Whilst regretting that the Government had brought complaints against the U.A.R. before the Security Council and the Arab League (see below), the Patriarch also emphasized that the Lebanon had many natural affinities with the West. He added that the Government's acceptance of the " Eisenhower doctrine " for the Middle East was not, in his view, a valid reason for the present political crisis.

In an interview on July 8, President Chamoun gave an assurance that he definitely intended to relinquish the Presidency when his term of office ended in September. At a previous news conference (June 25) he had declared his intention of completing his presidential term " unless I am dead " ; in addition, he had reiterated the charges of " massive interference " by the United Arab Republic in Lebanese affairs, asserting that it had taken the following forms :

(1) " Venomous press and radio campaigns of hatred and incitation " by the Government-controlled newspapers and radio stations in Egypt and Syria.

(2) " Massive smuggling " of military equipment into the Lebanon, accompanied by infiltrations of " volunteers " trained in Syria.

(3) Financial assistance to the Lebanese rebels.

(4) The issue of Egyptian passports by the U.A.R. Embassy in Beirut to Lebanese citizens belonging to the Opposition, so as to help them or their families to escape from the Lebanon.

" The situation now developing in the Lebanon," said President Chamoun, " is far from being a domestic issue. It involves the stability and peace of the Middle East. Interference by the U.A.R. is but one mile-stone of its desire to dominate the Arab world. An earlier mile-stone was in April 1957, when an attempt was made to overthrow the legal authority in Jordan. We knew then that the Lebanon would be the next victim of a similar attempt. As a matter of fact, the smuggling of military equipment on a large scale and the infiltration of ' volunteers ' and terrorists—Syrians, Egyptians, Palestinians—began at that time. Three or four months ago the smuggling of arms and men began to accelerate to the extent that the present armed rebellion became possible. . . . "

M. Saeb Salam gave an interview on July 10 to the Beirut Correspondent of *The Times* in which he emphasized that the Opposition was " not prepared to live with M. Chamoun as President for another day." If the President " resigned tomorrow " a compromise would be possible ; otherwise the Opposition would " resist to the end." The interview was given in M. Salam's house in the besieged Basta quarter, which the Correspondent was allowed to enter by arrangement.

Meanwhile, the Speaker of the Lebanese Parliament (M. Osseiran) had asked all deputies to attend a special parliamentary session on July 24 in order to elect a new President. [Under the Lebanese Constitution, a new President must be elected two full months before the expiry of the incumbent's term of office—in the case of President Chamoun, on Sept. 23.]

M. Salam, in his interview to *The Times* mentioned above, said that the Opposition would not attend the parliamentary session called for July 24, although it would not try to prevent it. On July 22, however, M. Osseiran stated that the proposed session had been suspended indefinitely, no reason being given.

The possible consequences of the political deadlock were described in the following despatch from *The Times* Beirut Correspondent dated July 6 (i.e. after the arrival of a U.N. Observation Group in the Lebanon– see below) :

". . . Two possibilities remain compromise or a fight to the death. At present the former simply does not appear to be on the cards. The Opposition insists that the President must resign ; the President insists that he will not ; and there in obdurate deadlock the argument begins and ends. . . . In a fight to the death [the Government's] only weapon now is the Army, and that has never shown much inclination for the battle. Although it has sometimes been vigorous in its reprisals, notably against the rebels in Tripoli, it has never yet undertaken offensive action and there is little expectation that it will ever do so. Without the Army's support there may be nothing for it but to strike a bargain. . . .

" Even if the Army will not attack, it is evidently still capable of adequate defence against such unco-ordinated and relatively ill-equipped forces as the rebels can muster. For the Opposition, therefore, a fight to the death offers the prospect of a war of attrition in which, now that the [U.N.] observers are in operation, their supplies of arms and ammunition may be curtailed. Moreover, recent reports of outbreaks of typhoid and dysentery in Beirut and Tripoli suggest a new threat to their enclaves, which must grow more dangerous as the summer advances and the garbage is piled higher in the streets. . . . "

Lebanese Complaint to Security Council against U.A.R. – Creation of U.N. Observation Group for the Lebanon.

On May 22 the Lebanese Government asked for an urgent meeting of the U.N. Security Council to consider its charges of intervention by the United Arab Republic in Lebanese internal affairs. These charges were specified as " infiltration of armed bands from Syria ; the destruction of Lebanese life and property by such bands ; participation by U.A.R. nationals in acts of terrorism and rebellion against the established authorities in the Lebanon ; and the waging of a violent press and radio campaign in the U.A.R. calling for . . . the overthrow of the established authorities in the Lebanon."

The Security Council agreed on May 27 to put the Lebanese complaint on its agenda ; however, at the request of the Lebanese Foreign Minister (Dr. Malik) it agreed to postpone its debate pending attempts to settle the dispute within the framework of the Arab League. After the breakdown of these attempts, the Security Council began its debate on the Lebanese complaint on June 6.

The Council of the Arab League had met in Benghazi (Libya) on June 1 to consider the Lebanon's complaint against the United Arab Republic. Six days of discussions failed to produce any agreed resolution, and the Benghazi meeting ended on June 6 without result. Few details were made known of the proceedings, but it was understood that Libya and the Sudan had unsuccessfully tried to mediate between the U.A.R. and the Lebanon.

After debating the Lebanese complaint on June 6, 10, and 11, the Security Council approved a Swedish resolution which (1) called for the urgent despatch to the Lebanon of a U.N. Observation Group " so as to ensure that there is no illegal infiltration of personnel, or supply of arms or other *matériel*, across the Lebanese border " ; (2) authorized the U.N. Secretary-General (Dr. Hammarskjold) to " take the necessary steps to that end " ; and (3) requested the Observation Group to keep the Security Council " currently informed through the Secretary-General."

Dr. Malik, presenting his country's complaint, declared that the Lebanon's security was menaced by the " unprovoked massive intervention " of the U.A.R., which constituted " a threat to international peace and security." He introduced extensive evidence in support of his charges that the U.A R. had encouraged and participated in " subversive and terrorist activities " in Lebanon ; had supplied arms on a large scale to subversive elements ; and had conducted " violent and unprecedented " press and radio campaigns aimed at overthrowing the Government of President Chamoun.

" The unmistakable aim," Dr. Malik declared, " is to overthrow the present regime in the Lebanon and to replace it with one that would be more subservient to the will of the United Arab Republic. . . . The only sin of the Lebanon, in the eyes of the U.A.R., is that it is independent and follows a policy of friendship towards and co-operation with the Western world. We plead guilty on both these counts." Dr. Malik emphasized that the Lebanese crisis confronted the United Nations with two tests : (1) " can the U.N save the small States ? " ; (2) " can the machinery of the U.N. deal with subversion and indirect aggression ? "

Mr. Omar Loutfi (U.A.R.) completely rejected Dr. Malik's charges as containing " inaccuracies, allegations, and accusations which cannot be proved." Maintaining that the Lebanon was seeking to create an " international diversion," Mr. Loutfi asserted that the disturbances in the country were " mainly due to the fact that President Chamoun wishes to renew his candidacy for the presidency, in contradiction to the provisions of the Constitution." Mr. Loutfi added that the U.A.R. could have presented a case against the Lebanon had it wished to do so. For some time past, the Lebanon had conducted large-scale and " arbitrary " expulsions of U.A.R. citizens ; it had also been the scene of " plots hatched against the United Arab Republic," principally by " members of a terrorist group known as Syrian nationalists." However, the U.A.R. felt that disputes " between two sister peoples " should be settled by other methods than bringing them to the Security Council. Mr. Loutfi also emphasized that his Government hoped that the Lebanon would " continue to be independent," and that it desired " the prosperity, well-being, and peace of the Lebanese people."

In the course of his speech Mr. Loutfi said that the U.A.R. had attempted to solve the problem within the framework of the Arab League but had encountered " systematic opposition " from the Lebanese Government at the Benghazi conference. The Lebanon, he alleged, was " intent on getting this problem discussed in the Security Council for purposes of submitting tendentious propaganda against the U.A.R." and had not taken the presentation of its complaint to the Arab League " seriously." Mr. Loutfi read to the Council the text of a draft resolution which, he said, had been submitted at Benghazi by six Arab States but had been rejected by the Lebanon. [Under the text read by Mr. Loutfi, the Lebanon would have withdrawn its complaint to the Security Council, and the Arab League would have used all means at its disposal " to put an end to everything that might disturb the atmosphere of serenity " among its member-States.]

Dr. Malik strongly denied Mr. Loutfi's allegations, declaring that the Lebanon had submitted its complaint " in both places in absolutely good faith." The draft resolution read by Mr. Loutfi had been " simply a trail to find out whether the Lebanon would accept that kind of wording," and at least three of its sponsors had withdrawn their support as soon as the Lebanese Government had expressed its opposition.

Mr. Cabot Lodge (U.S.A.) said that " the conclusion is clear that there has been outside interference in the affairs of the Lebanon, that this interference has been designed to promote civil strife and to impede the efforts of the constituted authorities to restore order and tranquillity, and that the interference has occurred from the territory and *via* the facilities of the United Arab Republic." He added : " If the idea is ever sanctioned that large States, simply because they are large, can interfere with impunity in the affairs of small States, simply because they are small, we shall have to give our blessing to the doctrine that might makes right, and the U.N. will have ceased to be a respectable organization."

Sir Pierson Dixon (U.K.) **and M. de Vaucelles** (France) both maintained that Dr. Malik had given convincing proofs of external interference in the Lebanon, while **Mr. Ritchie** (Canada) said that it was " axiomatic " that the U.N.'s response should be " particularly sympathetic towards appeals from the smaller countries."

M. Sobolev (U.S.S.R.) said that the threat to the Lebanon came not from the U.A.R. but from " certain Western Powers which are engaged in overt preparations for armed intervention in the Lebanon." Describing the Lebanese charges as " fabricated," he declared that the events in the Lebanon represented " the organized struggle of the Lebanese people for their constitutional rights." After asserting that Dr. Malik's charges were not borne out by the statements of Lebanese Opposition leaders or of the Maronite Patriarch, M. Sobolev alleged that Dr. Malik did not have the support of " responsible Lebanese political leaders " but was speaking with " the voice of the ruling circles of the United Kingdom and the United States." He called on the Security Council to reject the Lebanese complaint as " unfounded and unjustified."

Hr. Jarring (Sweden), in announcing his intention to submit a resolution, said that the Lebanon had presented " strong and precise allegations tending to show that foreign interference has in fact taken place." Noting, however, that the Lebanese charges had been " categorically repudiated " by the United Arab Republic, he declared that the Security Council should " keep a close watch on the situation and its further development."

Dr. Jamali (Iraq) strongly supported the Lebanese complaint, declaring that the matter affected not only the Lebanon but also the whole of the Middle East. He added : " Other Arab countries – Libya, the Sudan, Saudi Arabia, Tunisia, and Morocco—have all had a taste of Nasserism to a greater or lesser degree. The Lebanon is the victim today. . . . The trouble in the Lebanon is essentially an international problem. It reflects the influence of the Soviet Union and its attempts, through the United Arab Republic, to gain a foothold in the Middle East. It is the Soviet Union that is inspiring President Nasser's domination over the Arab world."

Mr. Loutfi said that he did not intend to reply to Dr. Jamali's " insults, flagrant inaccuracies, and lying allegations." **Dr. Jamali** retorted that he had " material proofs " to support his assertions.

The above-mentioned Swedish resolution was adopted on June 11 by ten votes to nil, with the U.S.S.R. abstaining. M. Sobolev explained that although his Government considered the Lebanese charges " unfounded," he had abstained from voting because neither the Lebanon nor the United Arab Republic had opposed Hr. Jarring's resolution.

The U.N. Observation Group in the Lebanon. - Dr. Hammarskjold's Visit to Middle East.

Immediately after the Security Council's vote, Dr. Hammarskjold said that he envisaged an operation " on two levels " : (1) an " observation group proper . . . composed of highly qualified and experienced men who have to be collected from various corners of the globe " ; (2) a " servicing group " which would be recruited from the staff of the U.N. Truce Supervision Organization in Palestine. At a subsequent press conference, the Secretary-General emphasized that the Observation Group in the Lebanon would be in no way a " police force " such as the U.N. Emergency Force stationed at Gaza.

Dr. Hammarskjold announced on June 14 that he had appointed the following three persons to serve as members of the Observation Group, all of whom had accepted invitations to serve in that capacity : Señor Galo Plaza (a former President of Ecuador), as chairman ; Major-General Odd Bull (Commander of the Royal Norwegian Air Force) as executive member in charge of the military observers ; and Mr. Rajeshwar Dayal, an Indian diplomat.

It was also announced at the U.N. that Dr. Hammarskjold had appointed Mr. David Blickenstaff (Director of the U.N. Information Centre in Paris) as secretary of the Observation Group, and Mr. S. K. Shastri (India), of the U.N. Secretariat, as assistant secretary. Mr. Blickenstaff, a U.S. national, served with Quaker relief units in the Spanish Civil War.

An advance echelon from the U.N. Truce Supervision Organization in Palestine arrived in the Lebanon on June 12, consisting of Lieut.-Colonel Maurice Brown (the New Zealand chairman of the Egypt-Israel mixed armistice commission) and four other officers, two Italian and two Swedish. During the next three weeks a number of Governments seconded officers to serve as military observers in the Lebanon, in response to appeals from the U.N. Secretary-General. By July 12 there were 135 observers in the Lebanon, drawn from 14 countries—Burma, Canada, Chile, Denmark, Finland, India, the Irish Republic, Italy, the Netherlands, New Zealand, Nepal, Norway, Peru, and Sweden ; the biggest contingents were from Canada (10), Denmark (14), Italy (15), the Netherlands (10) and Norway (14), followed by nine from India and eight each from Sweden and Finland.

The observers were stationed at various points throughout the Lebanon, mainly in the border areas and in the mountains. Apart from ground observation, aerial reconnaissance was carried out by day and (as from July 6) by night with eight light reconnaissance planes—four provided by the U.S. authorities in Europe and manned by U.N. personnel, and four by the Swedish Government and manned by Swedish crews. There were also two American helicopters, manned by Norwegian and Swedish airmen.

Dr. Hammarskjold left New York for the Middle East on June 18, breaking his outward journey in London for a short meeting with the British Foreign Secretary, Mr. Selwyn Lloyd. During a two-day visit to Beirut (June 19-20) he had discussions with Señor Galo Plaza and the other members of the U.N. Observation Group, and also with President Chamoun and M. Sami Solh. On June 21-22 he had discussions in Amman with Jordanian Government leaders ; in Jerusalem with the Israeli Government ; in Gaza with General Burns, Commander of the U.N. Emergency Force, and General von Horn, Chief of Staff of the U.N. Truce Supervision Organization ; and in Cairo with President Nasser and the U.A.R. Foreign Minister, Dr. Fawzi. The Secretary-General returned to Beirut on June 24 and left two days later for New York, where he stated that the work of the U.N. Observation Group had " got off to a very good start indeed."

Report of U.N. Observation Group.

The U.N. Observation Group in the Lebanon (Unogil) issued its first report to the Security Council on July 4. It is summarized below (cross-headings inserted) :

Preliminary Observations. " The Group had necessarily to take into account the particular circumstances under which its task was to be carried out, and careful study was given to a variety of factors relating to the situation. It was learned that, of a total land frontier with Syria of some 278 kilometres [172 miles], only 18 kilometres, lying on either side of the main Beirut-Damascus road, remained under the control of Government forces. The Observation Group has been assured by the Lebanese Government that it would be accorded free access to the areas under Government control. No formal assurances from any quarter were offered to the Group with regard to access to territory not under Government control, nor were such assurances sought."

After pointing out that physical accessibility to the border was restricted in certain areas by the nature of the terrain and the lack of roads—for example, the northern border could only be reached " through an area north of Tripoli, now under the control of the Opposition forces "—the report continued : " The remaining frontier of concern to the Observation Group is the sea-coast of some 220 kilometres [137 miles], along the full length of which runs a main highway. It will be seen, therefore, that the areas of primary concern to the Observation Group are those where the problems of accessibility are the greatest, both from the standpoint of topography and of obtaining freedom and security of movement. . . "

The report continued : " It would be relevant briefly to outline the situation in regard to the present state of the conflict, in so far as it concerns the functions of observation with which the Group is charged. In Beirut, Tripoli, and Sidon, sections of the city lie behind barricades and are normally inaccessible to observation, except under previously negotiated arrangements. In all these towns, intermittent clashes have been occurring. The area to the north of Tripoli, stretching to the border, has been the scene of some hostilities, and a similar situation prevails in the region north of Baalbek. In the south and south-east, armed clashes are taking place, while the Chouf area, to the south-east of Beirut, is under the complete control of Opposition elements."

Methods employed by Observation Group. The methods employed by the Observation Group in carrying out the duties for which it had been formed were summarized as follows .

" (*a*) Regular and frequent patrols of all accessible roads are carried out from dawn to dusk, primarily in the border districts and in the areas adjacent to the zones held by Opposition forces. The patrolling is done by observers travelling in white jeeps with U.N. markings, equipped with two-way radio sets.

" (*b*) A system of permanent observation posts has been set up where groups of military observers are stationed. These posts are in radio communication with headquarters in Beirut, with each other, and with the patrolling jeeps. There are now 10 such observation posts placed at strategic positions all over the country. Their location has been determined by the need for stations to be as close as possible to the dividing line between the opposing forces, as near the frontier as possible, or at points commanding supposed infiltration routes or distribution centres. The observers manning these stations attempt to check all reported infiltration in their areas, and to keep track of any suspicious development.

" (*c*) An emergency reserve of experienced military observers has been formed at headquarters and at the main observation posts , they are available at short notice for the purpose of making inquiries, or they may be detailed to places where particular instances of arms smuggling may be reported.

" (*d*) An evaluation team has been set up at headquarters, whose task is to analyse, evaluate and co-ordinate all information received from observers and other sources.

" (*e*) Recently a new form of observation has been added—namely, aerial reconnaissance.

" (*f*) A special procedure has been established in order to utilize the information which the Lebanese Government possesses about suspected infiltration. The Government sends frequent reports about such alleged infiltration to the Group, which immediately deals with each case as conditions require. The majority of these communications contain statements regarding alleged infiltration incidents, routes and methods. Instructions have, wherever appropriate, been issued to the observers for the maintenance of special vigilance within the areas in question. In other cases the Group has requested, through its Executive Member [General Odd Bull], that the military observers inquire into the matter. . . . In some cases the Observation Group has requested further clarification by the Government in order to determine whether useful action may be taken. . . . "

Access to Opposition-held Areas. " Where the frontier is controlled by Opposition forces, the obtaining of free passage and safe conduct throughout the area in question is a pre-requisite for effective observation in that area. Such passage can only be granted by the particular Opposition leader in that district, and has so far not been forthcoming. Steps have been taken to assure regular access to such areas, and it is to be hoped that the Opposition leaders will grant the necessary safe-conducts for the observer patrols.

" In spite of the attitude of Opposition leaders, the military observers have repeatedly entered Opposition zones without these assurances and in some cases penetrated right up to the eastern border. . . . But their successes have been sporadic and the dangers involved in these expeditions are considerable. Efforts have been made by the Opposition leaders to ward them off, and observers have repeatedly been stopped altogether. However, in the Chouf area limited free passage has been obtained, and as of July 2 full freedom of access to the area north of Tripoli has been offered to the military observers by the local Opposition leader."

Present and Future Observation Plans. " The immediate plans of the Observation Group include the following :

" (*a*) The network of observation posts will be considerably strengthened by the addition of several new stations. These will be placed as close as possible to the border-line between the Government-held area and the Opposition zones in the north and east, and hence as close as possible to the frontier.

" (*b*) Further efforts will be made to gain assured access to the Opposition zones ; wherever such access is granted, the outposts in that area will immediately be pushed toward the frontier.

" (*c*) Aerial photographic reconnaissance will be employed in an increasing measure, and the border areas will be patrolled by aircraft.

" (*d*) Steps to increase observation at night are under study."

Contacts with Opposition Leaders. "The Group has received a large number of daily reports from its observer patrols, which it has examined most carefully. Its patrols have reported substantial movements of armed men within the country, and concentrations at various places. For example, they have penetrated deep into the headquarters of one of the Opposition leaders right up to the village of Deir el-Aachayar, close to the eastern border. They were escorted by armed men, established contact with the Opposition leader, and met his followers.

"In the area of Rachaya, its patrols have frequently come across armed groups. In Baalbek and to the north, groups of armed men have been seen. South of Baalbek, land-mines have been found in territory not held by the Opposition.

"North of Baalbek, observers have established contact with the local Opposition leader and seen some 200 of his men. Still further north, at Zghorta, observers have been on the fringe of Opposition-held territory and seen some arms and other material in use. In the Chouf region, one observation group has visited the headquarters of the Opposition leader and established contact with him. In this region, again, large groupings amounting to several hundred armed men were seen.

"The arms seen consisted mostly of a varied assortment of rifles of British, French, and Italian makes. Some hand-grenades were also seen. Occasionally, Opposition elements have been found armed with machine-guns. Mines seen near the Baalbek area were of British and French makes. It has not been possible to establish from where these arms were acquired. Nor was it possible to establish if any of the armed men observed has infiltrated from outside; there is little doubt, however, that the vast majority was in any case composed of Lebanese.

"There has been considerable mortar firing in the Marjayoun area. From observations, the firing came from the vicinity of Halba, 2½ kilometres inside the Lebanese border near the border of Syria. The mortars are of a French type used by the Lebanese Army."

Difficulties in penetrating Opposition-held Territory. "Observer teams have on occasion experienced difficulty in penetrating Opposition-held territory, and there are cases where the local inhabitants have made it obvious that they do not welcome observers in the area. The teams have by perseverance managed to allay fears and to gain the confidence of the local population by a strictly independent display of impartiality. However, two leaders, Mr. Jumblatt of the Chouf and Mr. Haidar of the Central Bekaa, have so far both politely indicated that they do not want observers acting in their official capacity. Both men stated that this was a matter of principle, since they were involved in an internal conflict with which the United Nations had no concern.

"The observer teams have experienced difficulty in the following areas:

(*a*) North of Tripoli and south-west of Tripoli adjacent to Zghorta.

(*b*) The Bekaa Valley.

(*c*) Baalbek and areas to the east.

(*d*) The Rachaya and Saghbine areas in the south Bekaa.

"In all these instances the observer teams appear to have touched upon sensitive spots which are in areas claimed by Government sources to be supply and infiltration routes."

Obstructive Tactics. "Obstructive tactics have taken the following forms:

Firing. Firing in the vicinity of patrols of military observers has occurred in several instances at Zghorta, Rachaya, and Saghbine. There have been several instances of armed persuasive methods being used in a mild way.

Mining of roads. The mining of roads is a recent innovation and has occurred primarily in the Bekaa Valley, where observers could be astride of routes which could lend themselves to infiltration. On June 25 many mines of old British types were found by the Lebanese Army and were seen *in situ* by observers on the roadside between Rayak and Baalbek. The most serious incident took place on June 26, when a U.N. jeep struck a mine and an observer was injured [an Indian officer].

Destroyed bridges. There are many destroyed bridges and culverts in the Bekaa area. . . . Bridges to the north and south of Saghbine have been blown up, thus precluding the possibility of effective patrol."

Interrogation of alleged Syrian Infiltrators. "In a letter dated June 18, the Lebanese Government communicated to the Group 'a preliminary report about the arrest of two Syrian subjects belonging to the Syrian armed forces.' They were accused of having participated in terrorist activities in Beirut. They were further alleged to have acted on behalf of a supposed terrorist organization, to have thrown bombs, and to have participated in an attack on a prison.

"The Group immediately made a verbal request for the production of the prisoners. They were produced on June 23 and interrogation took place on that day and the following day. The first prisoner, a 21-year-old illiterate, described himself as a deserter from the Syrian Army who had come to the Lebanon to earn his living as a fisherman. He added that he had been coming to the Lebanon since 1952 for the same purpose. He denied having visited Beirut after the troubles started in May 1958, and claimed that while he was returning to Syria on June 16 he was apprehended by the gendarmerie near Tripoli and forced under pressure to make a statement admitting his participation in terrorist activities in Beirut.

"The second youth, aged 17, admitted that he was a Syrian and a friend of the first prisoner. He stated that he had accompanied his friend to the Lebanon about three months ago and was earning his living as a fisherman about 20 miles from Beirut. When the trouble started, he alleged, he was brought under pressure to Beirut and kept under surveillance at the house of a local Opposition leader. He said that he was given two bombs which he placed as directed by a Lebanese organizer, but he denied operating the firing mechanism out of fear. He admitted to collaborating with his friend in the attack on the prison, when he had to carry a box of ammunition. He complained of having been beaten by the gendarmerie after his apprehension.

"The Group has carefully considered the testimony of the two youths which, it is evident, is contradictory in material particulars. . . . In the circumstances, the Group must conclude that the complicity of these two persons in terrorist activities, or their participation in acts of rebellion as members of an organized foreign terrorist group, has not been established beyond reasonable doubt."

In a press statement on July 3, Dr. Hammarskjöld said that there was no evidence to warrant the charge of "mass infiltration" of U.A.R. nationals or arms into the Lebanon, adding that "to my knowledge we have no foundation for such a judgment now."

Lebanese Criticisms of U.N. Report.

The report of the U.N. Observation Group, and the above-mentioned comment by Dr. Hammarskjöld, were strongly criticized by the Lebanese Government, although Opposition spokesmen welcomed the report as a vindication of their claim that the crisis was essentially an internal one.

In an official statement on July 4, the Lebanese Minister of Information claimed categorically that "3,000 armed Egyptians, Syrians and Palestinians are fighting in the ranks of the rebels at this moment" and that the U.A.R. had supplied the rebel forces with 36,000 guns, including light and heavy artillery and mortars. M. Sami Solh, in a statement on the same day, attacked Dr. Hammarskjöld for his assertion that there was no mass infiltration of arms or men into the Lebanon, and demanded that the U.N. should set up a police force to seal off the border with Syria. "Even we Lebanese," he added, "can only tell a Syrian from a Lebanese by his dialect; how then can a Norwegian or Swede or Italian tell an infiltrator from a Lebanese?"

At the U.N., Dr. Malik said that his Government took "strong exception" to the U.N. report, and reiterated that the U.A.R. was continuing its "massive, illegal, and unprovoked aggression in the affairs of the Lebanon." On the other hand, a spokesman of the United Arab Republic said that his Government considered that the "objective" U.N. report had "absolved" the U.A.R. from the allegation of interference in Lebanese affairs, and had borne out its view that the Lebanon was embroiled in a civil war caused by popular dissatisfaction with the Government of President Chamoun.

The Lebanese Government's official reply to the U.N. report was published at the United Nations on July 8 and circulated to all member-States. It asserted that the report "in no way impaired or invalidated" the Lebanese Government's claim at the Security Council concerning "the massive intervention in the internal affairs of the Lebanon by the United Arab Republic," adding that this intervention "aims at undermining and in fact threatens the independence of the Lebanon."

After criticizing the "inconclusive, misleading, and unwarranted" conclusions in the U.N. report, the Lebanese statement claimed *inter alia* that illegal smuggling of arms had not ceased; that the rebels had over 30,000 pieces of arms of all types, including "heavy types that can only be supplied by Governments"; and that training and assembly camps had been set up at Damascus, Homs, and elsewhere in Syria for the training of "volunteers."

Particular exception was taken to two "misleading" conclusions in the U.N. report: (1) that it had not been possible to establish the sources of arms supplies reaching the rebels; and (2) that it was not possible to establish whether any of the armed men seen by the U.N. observers had infiltrated from outside. As regards (1), the Lebanese Government alleged that the U.N. Observation Group had made no attempt to determine the origin of the arms. With regard to (2), it was suggested that the rebel leaders had either moved the infiltrators back into Syria, or moved them away from the areas to which U.N. observers were admitted. In addition, strong exception was taken to the U.N. statement that the "vast majority" of the armed rebels observed "was in any case composed of Lebanese"; it was asked in this connexion whether the U.N. observers had investigated each rebel seen, and it was also pointed out that the rebel leaders would only have shown Lebanese nationals to the observers.

In a separate statement at the U.N., the Lebanese permanent representative (Dr. Azkoul) estimated the total number of rebels in the Lebanon at 10,000 to 12,000, of whom at least 25 to 30 per cent were infiltrators from outside. By contrast, the Lebanese Army numbered 9,000 to 10,000 men, plus a gendarmerie of 2,000 to 3,000. The U.N., he declared, had a mandate not only to "observe" but to "ensure against illegal infiltration," and the second part of this mandate was not being carried out.

Six members of the U.A.R. Embassy staff in Beirut, together with an Egyptian teacher, were expelled from the Lebanon on July 4 on charges of having contacts with the rebels, inciting Lebanese citizens to revolt, and activities " prejudicial to the Lebanon." The allegations were denied by the U.A.R. Ambassador, Brigadier-General Ghaleb.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Le Monde, Paris - U.N. Information Centre, London)

(Prev. rep. Lebanon, 16181 A.)

Historical and Demographic Note. Formerly part of the Ottoman Empire, the Lebanon was mandated to France by the League of Nations after the First World War, together with Syria. It achieved its independence in 1941 and became a member of the United Nations in 1946. About 4,000 square miles in area, and at no point more than 35 miles wide, it is bordered entirely by Syria except in the extreme south, where there is a short frontier with Israel. The last (1946) census showed a population of just over 1,000,000, of whom 613,000 were Christians and 461,000 Moselm ; the latest population estimate is 1,450,000, of whom 400,000 live in Beirut and 80,000 in Tripoli. As the Moslems have increased more rapidly than the Christians during the past decade, it is believed that a new census might show the former to be in a majority.

The largest Christian community is the Maronite (338,000), which is in communion with Rome, followed by the Greek Orthodox (113,000) and the Armenian Orthodox (62,000). The Moslems are almost equally divided between the Sunni and Shia (244,000 and 218,000), while there is a strong Druse community of 77,000. Under the Constitution, the President is a Maronite Christian and the Prime Minister a Sunni Moslem, and there is a corresponding balance of faiths in the Cabinet and in Parliament—see 16108 A, 15696 A.

A. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on July 2 that the sterling area's gold and dollar reserves had risen during June by $37,000,000 after taking into account (*a*) the payment of $26,000,000 to the E.P.U. in respect of the U.K.'s deficit in May, and (*b*) the payment of $2,500,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $3,076,000,000 on June 30.

The increase in the reserves was the ninth successive monthly rise since the crisis of September 1957. Compared with the larger rate of increase in previous months, the slowing-down in the expansion of the reserves was regarded in official quarters as the start of the seasonal trend which normally operates during the third quarter, when dollar payments for tobacco, grain, sugar and other commodities begin to rise, while earnings from sales of sterling area materials such as wool and cocoa tend to decline ; in addition, a certain number of oil payments also fell due towards the end of June. Dollar outgoings during the month included the half-yearly loan payments of $13,500,000 to the U.S.A. and Canada and an interest payment of $1,000,000 on the I.M.F. loan.

Provisional figures for the E.P.U. June settlement showed that Britain had a deficit of £25,000,000, three-quarters of which would be settled during July in gold or dollars and one-quarter by an increase in the U.K.'s debt to the Union.

The higher E.P.U. deficit was attributed (i) to spending by British tourists on the Continent and elsewhere during the holiday season ; (ii) to certain special currency movements in connexion with the outflow of dollars from the U.S.A., the purchase of transferable sterling against such dollars, and the re-sale of transferable sterling against European currencies, especially Deutschemarks.

The sterling-dollar rate weakened from 2.81¾ on June 2 to 2.81 on June 18-19 ; after a brief rise above the 2.81 mark it declined further from 2.80 11/16 to 2.80 ⅛ between June 24 and June 30. The chief factors in the decline were the labour situation (bus and dock strikes), and the normal seasonal demand for dollars to pay for the purchase of oil and dollar commodities. Transferable sterling in Zürich similarly declined from 2.79425 at the beginning of June to 2.7830 at the end of the month. (Treasury Press Office - Financial Times) **(Prev. rep. 16225 B.)**

B. NETHERLANDS. — Civil Defence Conscription.

The introduction of conscription for certain civil defence services was announced by the Netherlands Government on July 9. It was stated that the 160,000 volunteers at present constituting the Civil Defence Corps were insufficient ; that 60,000 men between the ages of 24 and 60 would be called up at the beginning of 1959 for training in rescue, ambulance, and fire-fighting duties ; and that the initial training would be spread over 60 days. (Algemeen Handelsblad, Amsterdam)

C. UNITED STATES. — Mr. McCone appointed Chairman of Atomic Energy Commission.

Mr. John J. McCone was sworn in on July 14 as chairman of the Atomic Energy Commission in succession to Rear-Admiral Lewis Strauss. His appointment to the Commission had been confirmed by the Senate on July 9.
(New York Times) **(Prev. rep. 16254 A.)**

D. YUGOSLAVIA - GREECE - UNITED ARAB REPUBLIC. — Tito-Nasser Discussions at Brioni. - Joint Communiqué. - Meetings between Yugoslav, Greek, and U.A.R. Foreign Ministers.

President Nasser arrived at Dubrovnik on July 2 for a ten-day visit to Yugoslavia—his third visit to that country in three years. During his stay in Yugoslavia he had discussions with President Tito, both on Brioni Island and during a yachting cruise off the Istrian coast, and also visited a number of places in Croatia and Slovenia. Participants in the Brioni talks included the Yugoslav and U.A.R. Foreign Ministers (M. Koca Popovich and Dr. Fawzi) and M. Kardelj, vice-president of the Yugoslav Federal Executive Council.

A joint communiqué was issued by Presidents Tito and Nasser on July 10 stating that they were agreed on :

(1) The importance of " taking necessary measures to terminate the cold war, the armaments race, the division of a great part of the world into two antagonistic blocs, foreign domination, interference in the affairs of certain countries by other countries, and the use of pressure, force and threats against one country by others."

(2) The " urgent necessity " of ending the manufacture of nuclear and thermo-nuclear weapons and of halting all tests of such weapons, " whether in the ocean, the African Sahara, or elsewhere."

(3) The need to hold a summit conference.

(4) The importance of the United Nations " in serving the objectives of peace, security, and prosperity in the whole world " ; of observing the U.N. Charter " in letter and spirit " ; and of basing relations between all nations, great and small, " on the principles of the Charter and of peaceful co-operation and co-existence based on independence and equality."

(5) The " imperative need of peace for the survival and prosperity of the human race."

In addition, the communiqué stated (*a*) that the two Presidents had examined " with great pleasure " the results of co-operation between their two countries since their last meeting at Brioni in 1956 ; (*b*) that the progress already made would " serve as a firm foundation for further progress and consolidation of their mutual relations and friendship " ; (*c*) that the further strengthening of political, economic, and cultural co-operation between Yugoslavia and the United Arab Republic would be discussed at ministerial level during the coming months ; (*d*) that both countries would hold periodical consultations " on matters of common interest which are of significance for the consolidation of world peace and the development of international co-operation " ; and (*e*) that President Tito had accepted an invitation to visit the United Arab Republic.

The preamble to the communiqué stated : " In evaluating international developments [since the last meeting between the two Presidents] it was noted that after a certain period of favourable development toward a relaxation of international tension, there has reappeared a tendency in the opposite direction, chiefly as the effect of the continued arms race and of a tendency to exert pressure on other countries by interfering in their internal affairs. Such negative manifestations have taken place of late in various parts of the world, including Indonesia and the Lebanon."

Apart from the meetings between Presidents Tito and Nasser, separate discussions were held at Brioni between M. Popovich and Dr. Fawzi ; at the former's invitation, the Greek Foreign Minister (M. Averoff) arrived at Brioni on July 8 to join in the talks. The three Foreign Ministers issued a joint statement on July 9 saying that they had had " a detailed exchange of views " on the international situation, with " mutual regard to the particular international position of each of their countries and taking account of their positions." The statement acknowledged the " stabilizing effect " resulting from the friendly relations between Yugoslavia, Greece, and the U.A.R., and its beneficial results both for their respective regions and for the cause of peace in general. No mention was made of the specific subjects discussed, but it was understood that they included Cyprus and the Lebanon.

Before leaving Athens for Brioni, M. Averoff had emphasized that Greece remained firmly on the side of the West and would continue her full co-operation with NATO ; he pointed out, however, that this did not prevent Greece from enjoying friendly relations with other countries which did not belong to any bloc. (Tanjug Agency, Belgrade - Hellenic News Agency, Athens - Times - Le Monde, Paris - New York Times) **(Prev. rep. 15008 A.)**

E. UNITED KINGDOM.—Lynmouth Reconstruction.

The reconstruction of Lynmouth was completed on July 12 with the opening of a Flood Memorial Hall, built as a memorial to the victims of the North Devon flood disaster of 1952.
(Daily Telegraph) **(Prev. rep. 15088 A.)**

F. SOUTH AFRICA. — Corrigendum.

The new Inspector-General of the Union Defence Forces mentioned in 16287 A is Major-General Grobbelaar, not Grobbellar as inadvertently mis-spelt in that article. **(Ed. K.C.A.)**

A. UNITED STATES. — Amending Legislation to Atomic Energy Act. - Exchanges of Military Information with Britain and other Allies. - Anglo-American Agreement for Co-operation in Uses of Atomic Energy for Mutual Defence Purposes. - Supply of Submarine Reactors to Britain.

In accordance with the "declaration of interdependence" issued by President Eisenhower and Mr. Macmillan on Oct. 25, 1957, after their meeting in Washington (see 15823 A), the President submitted to Congress proposals for amending the Atomic Energy Act (the so-called McMahon Act) to permit of greater nuclear co-operation in the military field with America's allies. The Atomic Energy Commission supported the Administration's request when hearings on the proposals opened on March 26, 1958, before the Congressional Joint Atomic Energy Committee.

Mr. Harold S. Vance (then acting chairman of the Atomic Energy Commission) testified that the time had arrived for a substantially greater degree of co-operation in the military atomic energy field; "to assure proper training and planning for nuclear weapon use and for defence against nuclear war," he declared, "added information must flow to many of our allies." In addition to a broad interchange of atomic information with the allies, it was also necessary to furnish under certain conditions, and to specific allies—certain nuclear materials, non-nuclear parts of atomic weapons, and utilization facilities. Mr. Vance declared that greater nuclear co-operation with America's allies had become necessary "in view of the degree of advancement achieved by the Soviets."

The House of Representatives approved on June 19, by 345 votes to 12, an amending Bill to the McMahon Act which in general followed the Administration's proposals. Its principal provisions were:

(1) The U.S. Administration could supply the designs for nuclear weapons, and the fissionable material to make them, to an allied country which had already made "substantial progress" in the development of such weapons. It was made clear in the debates that only Britain at present fulfilled this condition. [The provision limiting the supply of nuclear-weapon designs and materials to countries already advanced in atomic-weapons technology had been inserted in the Administration's proposals by the Congressional Joint Atomic Energy Committee; this was done to meet widespread objections that the Administration's original proposals might have the effect of creating new "atomic Powers."]

(2) To other allied countries, the Administration would be permitted (i) to supply detailed information on the size and effects of atomic weapons and "other military applications of atomic energy"; (ii) to transfer non-nuclear parts of atomic weapons, while retaining nuclear warheads in American custody; and (iii) to furnish nuclear material for purposes of research, development, and production of facilities for "military applications." [Items (ii) and (iii) were described as "do-it-yourself-kits" for nuclear warfare.]

(3) In addition, the Administration was authorized to supply allied countries with reactor designs and atomic fuels for nuclear-powered submarines and other types of military power plants.

(4) Congress was given a veto power over any exchange agreement entered into by the Administration. Such a veto would have to be declared in the form of a concurrent resolution, passed by a simple majority of both Houses, within 60 sitting days after the proposed agreement had been laid before Congress; as an exception, only a 30-day period would be required for any agreement between the U.S.A. and Britain concluded during the current year (1958) [This provision had likewise been inserted in the Administration's proposals by the Congressional Joint Atomic Energy Committee.]

The Senate approved the Bill in a somewhat different form on June 23, by voice vote.

On the suggestion of Senator Clinton Anderson (Dem.), chairman of the Joint Congressional Atomic Energy Committee, the Senate made two amendments to the version adopted by the House of Representatives: (i) it specified that even non-nuclear parts of atomic weapons could only be supplied to countries which had themselves made "substantial progress" in the development of atomic weapons, thus preventing non-nuclear Powers from receiving "do-it-yourself-kits"; (ii) it deleted the provision permitting the Administration to give friendly countries information on "other military applications of atomic energy."

With the agreement of the Joint Congressional Atomic Energy Committee, the House-Senate Conference Committee reached a compromise over the two versions on June 26.

The compromise clause made a distinction between non-nuclear parts of atomic weapons which would disclose "significant knowledge" about the design of the warhead, and parts which would not convey such "significant" information; the former could only be supplied to an allied country which had itself achieved "substantial progress" in atomic-weapons technology, whilst the latter could also be supplied to other allies. [Therefore, while such allies cannot receive all the complex parts of a nuclear warhead, such as the fusing mechanism, they may nevertheless be supplied with less vital parts such as are used to attach a nuclear warhead to a missile or aircraft.]

The Bill in its compromise version was passed by the House of Representatives without debate on June 27 and by the Senate on June 30, and was signed by President Eisenhower on July 2.

On July 3 the President sent to Congress a new atomic energy agreement which had been concluded with Britain earlier the same day on the basis of the new U.S. legislation. The agreement, which was published in London and Washington on July 8, covered (*a*) the transfer of nuclear materials and equipment by the U.S.A. to Britain, including a submarine nuclear propulsion plant and the communication of classified information necessary for its design, manufacture, and operation, as well as the sale of enriched uranium for the plant; (*b*) the exchange or communication of classified information necessary for (i) the development of defence plans; (ii) the training of personnel in the use of and defence against atomic weapons, (iii) the evaluation of the capabilities of potential enemies in the atomic field, (iv) the development of delivery systems for atomic weapons, and (v) research, development, and design of military reactors.

The agreement was signed in Washington by Mr. Dulles and Viscount Hood, the British Chargé d'Affaires. Its text is summarized below.

Article 1. Each party would communicate to and exchange information with the other party, and would also transfer materials and equipment, "provided that the communicating party determines that this co-operation will promote and not constitute an unreasonable risk to its defence and security."

"Equipment" was defined as any instrument, apparatus, or facility (except an atomic weapon) capable of making use of, or producing, special nuclear material and component parts. It included submarine nuclear propulsion plant, reactors, and military reactors.

Art. 2. Each party would communicate to or exchange with the other party such classified [confidential] information as was jointly determined as necessary to:

(1) Develop defence plans;

(2) Train personnel in the use of atomic weapons and military applications;

(3) Evaluate capabilities of potential enemies in the atomic field;

(4) Develop delivery systems compatible with the atomic weapons carried; and

(5) Develop and design military reactors as agreed.

Each party would also exchange other classified information concerning atomic weapons when the communicating party considered that this was necessary to improve the recipient's design, development and manufacturing capability.

Art. 3. The United States would authorize (subject to acceptable terms) the sale to Britain of a complete submarine nuclear propulsion plant and agreed spare parts. Classified safety information, and information necessary for design, manufacture and operation, would also be communicated.

For 10 years after the agreement came into force, replacement cores or fuel elements for the plant would be transferred, subject to acceptable terms. In the same period the U.S.A. would sell agreed amounts of U-235 for use in the plant. If Britain desired, the U.S.A. would reprocess this, and the enriched uranium recovered might be bought by the U.S.A. on terms to be agreed. Special nuclear material recovered in reprocessing, and not bought by the U.S.A., could be returned to or kept by Britain, and U-235 not bought by the U.S.A. would be credited to the amounts originally sold by the United States. The U.S. Government would be compensated for the enriched uranium originally sold, and any purchase would be at the U.S. Atomic Energy Commission's applicable prices.

The parties would exchange classified information on methods of reprocessing fuel elements of the type utilized in the propulsion plant. Britain would indemnify the U.S.A. against all liabilities for damage or injury after the plant and parts had left the United States.

Art. 4. The use of information exchanged or transferred under the agreement would be the responsibility of the recipient, and the other party would not provide any indemnity or warranty of accuracy, completeness, or suitability.

Art. 5. Under the agreement there would be no transfer by either party of atomic weapons. Information would be used exclusively for mutual defence interests, but nothing in the agreement would preclude the communication of information transmissible under other agreements.

Art. 6. Classified information, materials and equipment would be accorded full security protection and could not be communicated to unauthorized persons. Each party might stipulate the degree to which any of the information, materials, or equipment might be disseminated, and impose any restrictions deemed necessary.

Art. 7. There would be no bar to defence co-operation with other nations, but neither party could make accessible to others material which had become available under the agreement, unless authorized by the other party.

Art. 8. Agreed classification policies would be maintained.

Art. 9. If any invention or discovery was made following the transfer of information, the recipient party would have to transfer and assign to the other party all rights in the country of the other party, subject to the retention of a royalty-free licence for Governmental and mutual defence purposes. The other party would also be granted free licence for Governmental and mutual defence purposes in the recipient and third countries

In the case of discoveries with civil uses, the recipient party would be obliged to assign all rights in the country of the other party, subject to the retention of a royalty-free licence with the right to grant sub-licences for all purposes.

Art. 10. Previous agreements would be carried out in accordance with the provisions of the new agreement.

Art. 11. The agreement would remain in force until terminated by mutual consent. Article 2, however, might be ended at one year's notice after a period of 10 years, or at one year's notice after a further five years.

In a statement to the House of Commons on July 3, Mr. Macmillan pointed out that, in accordance with U.S. procedure, the agreement had been laid before the U.S. Congress but could not be effective until it had lain before Congress for 30 sitting days. He added : " In these circumstances I would prefer not to say anything at the moment about the practical results which may be expected after the agreement comes into effect."

It was pointed out in the Press that if Congress remained in session until mid-August, it was expected that the agreement would then come into force ; but that if Congress rose before the 30 sitting days were completed, the agreement would not become effective until it had lain for 60 sitting days in the next (1959) session.

It was pointed out in London that no formal ratification by the U.K. Parliament was necessary, the Government having made it clear that the " Ponsonby rule " did not apply. [This rule applies to certain treaties or agreements which require ratification and must " lie on the table " for 21 parliamentary days so as to give Parliament an opportunity for debate if it wishes. Treaties and agreements coming within this rule include those involving the cession of territory or the voting of money from public funds.]

The texts of a joint letter to President Eisenhower by Mr. McElroy (U.S. Secretary of Defence) and Dr. Libby (acting chairman of the Atomic Energy Commission), together with a Presidential memorandum sent in reply, were published in Washington on the same date (July 3).

Mr. McElroy's and Dr. Libby's letter emphasized that Britain had suspended her own atomic energy programme in 1943 in the interests of mutual defence and had sent to the U.S.A. and Canada leading scientists who had participated in the development of the atomic bomb. In the decade after the Second World War Britain had developed her own atomic weapons, and the new agreement renewed the existing Anglo-U.S. collaboration and fulfilled the President's and Mr. Macmillan's joint declaration of Oct. 25, 1957. As regards the supply of a submarine reactor to Britain, the joint letter said that it was " intended to develop a nuclear submarine capability in the British fleet at the earliest possible time with no interference to the U.S. naval reactors programme," and that it would " promote the acquisition by the U.K. of the technological know-how essential to the maintenance and growth of this capability."

The President replied in his memorandum : " I note from your joint recommendation that the U.K. is participating with the U.S.A. in international arrangements pursuant to which it is making substantial and material contributions to mutual defence and security, and that the U.K. has made substantial progress in the development of atomic weapons. I note also that the proposed agreement will permit co-operation necessary to improve capabilities of the United States and the United Kingdom in the application of atomic energy for mutual defence purposes, subject to provisions, conditions, guarantees, terms, and special determinations which are most appropriate in this important area of mutual assistance."

In consequence, the President declared that he had :

(*a*) approved " the programme for the transfer of one submarine nuclear propulsion plant, and special nuclear material required for operation of this plant during the 10-year period following the date upon which the agreement enters into force " ;

(*b*) determined " that the performance of this agreement will promote, and will not constitute an unreasonable risk to, the common defence and security of the United States " ;

(*c*) approved " the proposed agreement for co-operation " ;

(*d*) authorized " the execution of the agreement for the U.S. Government by the Secretary of State."

It was pointed out that the agreement was somewhat less liberal than would have been permitted under the amended U.S. Atomic Energy Act, as it explicitly precluded the transfer by either party of atomic weapons. It was also explained that neither the new agreement nor previous ones allowed the transfer of fissile material of weapons grade (e.g. plutonium) from one country to another.—(New York Times - New York Herald Tribune - Times - Daily Telegraph) **(Prev. rep. Atomic Energy, Anglo-U.S. Co-operation, 15906 A ; 15596 A ; 15133 A ; 14360 A ; McMahon Act, 13756 A.)**

A. SOUTH AFRICA. — Resumption of Full U.N. Membership. - U.N. Good Offices Committee visits South Africa. - Discussions with Union Government.

The Union Minister of External Affairs (Mr. Louw) announced on July 15 that South Africa would resume full participation in the United Nations, in which she had maintained only token membership since November 1956. In a statement to the Union Parliament, Mr. Louw said that he intended to take part in the next session of the U.N. General Assembly, and that a permanent South African representative would be appointed to the U.N. with the status of Minister-plenipotentiary.

Mr. Louw recalled that South Africa had withdrawn from the U.N. in 1956, except for token representation, in protest at the continued discussion by the General Assembly of South African internal affairs [i.e. the *apartheid* policy and the status of South-West Africa.] Recently, however, there had been a more friendly attitude at the U.N. towards South Africa, culminating in the appointment of a Good Offices Committee charged with improving relations between the Union and the United Nations At the Union Government's invitation, this Committee had recently visited South Africa (see below) and would present a report to the General Assembly ; pending the publication of that report, he would say no more than that the talks had been conducted in a friendly spirit. Mr. Louw emphasized that although South Africa was returning to the U.N., she would continue to withdraw from all discussions of her domestic policies, basing her stand on Article II (7) of the Charter. [This Article precludes U N. interference in the domestic affairs of member-States.]

The three-man Good Offices Committee referred to by Mr. Louw was set up at the 12th session of the General Assembly in September 1957 (see page 16052, second column). It was asked to discuss the question of South-West Africa with the Union Government ; to find, if possible, " a basis for an agreement which would continue to accord to the territory an international status " ; and to report to the 1958 Assembly session. The members of the Committee were Sir Charles Arden-Clarke, the first Governor-General of Ghana and formerly Governor of the Gold Coast ; Mr. Walter N. Walmsley, of the U.S. State Department ; and Senhor V. T. Leitao da Cunha, the Brazilian Ambassador to Cuba.

The status of South-West Africa has been an issue between the Union and the U.N. since the dissolution of the League of Nations in 1946. The General Assembly has consistently refused to recognize the territory's incorporation in the Union of South Africa, on the grounds (*a*) that South-West Africa had been mandated to the Union by the League of Nations after the First World War ; and (*b*) that the U.N., as the successor of the League, had similar jurisdiction in respect of the territory.

In November, 1953, a nine-man body was set up by the U.N. Trusteeship Committee to investigate and report on South-West Africa ; in the following year South Africa told the U.N. that she would take no part in debates on the report of the South-West Africa Committee. After continued arguments, charges and counter-charges, and after a second ruling had been sought from the International Court of Justice, South Africa withdrew from the General Assembly session for 1955—this withdrawal being on the *apartheid* issue and not on South-West Africa [see page 14669]. In 1956 the dispute led to the final withdrawal of South Africa from all but token representation at the United Nations [see page 15507.]

At the invitation of the Union Government, the Good Offices Committee visited Pretoria from June 12-22 for private discussions with Mr. Louw and Mr. Joost, the Secretary for External Affairs. A joint communiqué said that the discussions had " covered a wide field " ; that consideration had been given " to possible ways and means for arriving at a satisfactory arrangement in regard to the South-West Africa issue " ; and that " certain aspects " of the matter would require further study. It was agreed that the exchange of views should remain confidential pending the presentation of the Committee's report to the General Assembly.—(Cape Times - State Information Department, Pretoria - U.N. Information Centre, London) **(Prev. rep. 16047 A ; 15505 A.)**

B. BELGIUM - WESTERN GERMANY. — German Ratification of Agreement on Frontier Changes.

The Belgo-German frontier treaty signed on Sept. 24, 1956 [see 15168 A] was ratified by the *Bundestag* on July 1, 1958, and by the *Bundesrat* on July 4. In addition to its territorial and financial provisions, the treaty also provides (1) for investigations into the fate of missing Belgians deported to Germany during the war ; (2) for facilities for the location and return to Belgium of the bodies of Belgian deportees who had died during their deportation. It was also laid down that Belgium and the German Federal Republic would conclude double taxation conventions and social security agreements.
(Frankfurter Allgemeine Zeitung) **(Prev. rep. 15168 A.)**

A. UNITED KINGDOM. — Changes in Central Defence Organization. - White Paper.

Important changes in the central defence organization were announced by the Prime Minister in the House of Commons on July 15: (1) an adjustment in the composition and operation of the Cabinet's Defence Committee; (2) the creation of a Defence Board to assist the Minister of Defence; (3) greater powers for the chairman of the Chiefs of Staff Committee, who would in future have the title of Chief of the Defence Staff. The increased powers which had been conferred on the Minister of Defence in connexion with the reorganization of the armed forces would essentially continue.

Mr. Macmillan's statement was as follows:

"When the present Government was formed, the Minister of Defence was entrusted with the task of reshaping and reorganizing the armed forces in accordance with current strategic needs and in the light of the economic capacity of the country. For this purpose I redefined the Minister's functions in relation to the Service Departments and the Ministry of Supply, and gave him increased authority to take decisions on matters of general defence policy affecting the size, shape, organization, and equipment of the armed forces. I announced this in this House on Jan. 24, 1957 [see 15344 A].

"These arrangements have now been in operation for 18 months. As a result of a recent careful review the Government has concluded that they have been justified by practical experience, and that, subject to certain minor alterations, they should now be formally confirmed.

"In addition, three new features are being introduced. First, the composition and operation of the Defence Committee of the Cabinet is being adjusted in order to secure greater flexibility and efficiency. Secondly, a Defence Board is being set up to assist the Minister of Defence in formulating defence policy and for dealing with inter-Service problems. Thirdly, certain adjustments are being made in the staff organization, including the assumption by the chairman of the Chiefs of Staff Committee of the title of Chief of the Defence Staff. The Queen has been graciously pleased to approve that Marshal of the R.A.F. Sir William Dickson be appointed to this new office."

When Mr. Shinwell (Lab.) asked whether the status of the three Service Ministers was in any way affected, Mr. Macmillan replied: "The responsibility to Parliament of the Service Ministers and the Minister of Supply for the efficient administration of the armed forces and their supply remains unchanged."

A White Paper issued on the same day (Cmnd. 476) gave the following details of the three principal changes:

Cabinet Defence Committee. "The supreme responsibility for national defence rests with the Prime Minister and the Cabinet. Subject to this, defence problems which engage the collective responsibility of the Government—especially those which are related to the Commonwealth and to foreign and Colonial policy—are normally handled on the Cabinet's behalf by the Defence Committee, which meets under the chairmanship of the Prime Minister. Experience has shown that, in view of their wide range and variety, these problems cannot conveniently be handled by a Committee of fixed membership. Therefore, in order to gain greater flexibility, the Committee is now being so constituted as to allow the various types of problem which arise to be considered by the Ministers most directly concerned with them. The following Ministers will be members of the Committee: the Prime Minister (chairman), Home Secretary, Foreign Secretary, Chancellor of the Exchequer, Commonwealth Relations Secretary, Colonial Secretary, Minister of Defence, Minister of Labour and National Service, First Lord of the Admiralty Secretary of State for War, Secretary of State for Air, and Minister of Supply.

"The Prime Minister will determine which of these members should attend particular meetings of the Committee, according to the subjects to be discussed and with full regard to the ministerial responsibilities involved. In addition, other Ministers will on occasion be invited to attend meetings at which matters affecting the special interests of their Departments are discussed.

"The Chiefs of Staff will be in attendance ... [They] may [also] be invited to attend meetings of the full Cabinet. The Chiefs of Staff are thus in a position to fulfil their traditional duty to tender to the Government professional military advice."

[It was pointed out that this new elasticity of invitation to attend meetings of the Defence Committee existed in the Committee of Imperial Defence created in 1923.]

Defence Board. After recalling that under the Ministry of Defence Act, 1946, the Minister of Defence was "in charge of the formulation and general application of a unified policy relating to the Armed Forces of the Crown as a whole and their requirements," the White Paper pointed out (*a*) that in discharge of that responsibility the Minister had authority to decide all major matters of defence policy; and (*b*) that within the limits of the policy determined by him, and in conformity with it, the Service Ministers were responsible for the efficiency and administration of the three Services, and the Minister of Supply for the efficient execution of approved programmes of defence research, development, and production. The White Paper continued:

"In deciding major matters of policy ... the Minister of Defence consults with the Service Ministers and the Minister of Supply. For the purposes of such consultation, and for the discussion of inter-Service problems, a Defence Board is being established with the following membership: Minister of Defence (chairman); First Lord of the Admiralty; Secretary of State for War; Secretary of State for Air; Minister of Supply; Chief of the Defence Staff; Chief of the Naval Staff; Chief of the Imperial General Staff; Chief of the Air Staff; Permanent Secretary, Ministry of Defence; Chief Scientist, Ministry of Defence. Other officers and officials of the Departments concerned will be invited to attend meetings of the Board as required.

"The Minister of Defence is ministerially responsible to the Prime Minister for the execution of military operations approved by the Cabinet or the Defence Committee.

"When the Service Ministers or the Minister of Supply wish to make proposals on any matter affecting defence policy, they will normally submit them to the Minister of Defence. This arrangement does not, however, prejudice their constitutional right to make submissions to the Cabinet and its Committees. Recommendations for the more important Service appointments are submitted by the Service Ministers and the Minister of Supply for the approval of the Minister of Defence, who in appropriate cases seeks the covering approval of the Prime Minister.

"The Minister of Defence has the duty to take, after consultation with the Service Ministers concerned, all practicable steps to secure the most efficient and economical performance of functions common to two or more of the Services e.g. by arranging for one Service to act on behalf of the others on the principle of 'most efficient user,' or by transferring responsibility to the Minister of Defence."

Chiefs of Staff Organization. "A new post of 'Chief of the Defence Staff' has been created. The holder of this post will be responsible to the Minister of Defence and will be his principal military adviser. The existing combined posts of Chairman of the Chiefs of Staff Committee and Chief of Staff to the Minister of Defence have been abolished.

"The Chief of the Defence Staff, together with the Chief of Naval Staff, the Chief of the Imperial General Staff, and the Chief of the Air Staff, form the Chiefs of Staff Committee. The Chief of the Defence Staff acts as chairman of this Committee. The Chiefs of Staff Committee are collectively responsible to the Government for professional advice on strategy and military operations, and on the military implications of defence policy generally. The agreed collective advice of the Chiefs of Staff Committee will be tendered to the Minister of Defence by the Chief of the Defence Staff. Where it is not possible for him to tender agreed collective advice, he will report to the Minister the views of the other members of the Chiefs of Staff Committee and will be responsible, as the principal military adviser of the Minister, for tendering his own advice to the Minister in the light of those views. The Chiefs of Staff meet under the chairmanship of the Minister of Defence whenever he or they may so desire.

"The Chiefs of Staff are responsible through the Chief of the Defence Staff to the Minister of Defence for the conduct of military operations. Operational orders hitherto issued jointly in the name of the Chiefs of Staff Committee will now be issued by the Chief of the Defence Staff as Chairman of the Chiefs of Staff Committee. The Chiefs of Staff of the three Services have at all times a right of access to the Minister of Defence, and when necessary to the Prime Minister, whether on operational or other military matters.

"In addition to the responsibilities stated above, the Chief of the Defence Staff: (*a*) is responsible for ensuring that military matters affecting the responsibilities of the Chiefs of Staff are referred to them for consideration; (*b*) is responsible for keeping the Chiefs of Staff informed of the views of the Minister of Defence and for keeping the Minister informed of the views of the Chiefs of Staff; (*c*) is responsible for seeking from the Minister such decisions as are required; (*d*) represents H.M. Government, where appropriate, at international conferences.

"The Joint Planning Staff, in their collective capacity, are directly responsible to the Chief of the Defence Staff as Chairman of the Chiefs of Staff Committee. He is entitled to call on the respective Chiefs of Staff to make available ... the services of the Naval, General, and Air Staffs, who are together regarded as forming a Joint Defence Staff. For the study of inter-Service problems these Staffs are responsible, through the Chiefs of Staff of their respective Services, to the Chiefs of Staff Committee and through its Chairman to the Minister of Defence."

The Minister of Defence was given one additional power by making him responsible to the Prime Minister for the execution of military operations approved by the Cabinet or the Defence Committee; on the other hand, his former authority to give decisions on Service pay and conditions was transferred to the Service Ministers.

It was pointed out in the Press that one of the most significant changes was the arrangement whereby, in the event of differences between the Chiefs of Staff, the Chief of the Defence Staff would not merely report the differences but would tender his own advice. This change was intended to prevent what had been described as the "glossing over" of differences and the "watering down" of advice to the least common denominator. (Cmnd. 476 - Times - Daily Telegraph) **(Prev. rep. 15344 A.)**

A. EASTERN EUROPE. — Meetings of Warsaw Treaty Organization and East European Council of Mutual Economic Assistance. - Cuts in Armed Forces of East European Communist Countries. - Soviet Troops to be withdrawn from Rumania.

Government and Communist party leaders from the Soviet Union, all the Soviet-bloc countries, and China met in Moscow from May 20-24 within the framework of the East European Council of Mutual Economic Assistance and the Political Consultative Committee of the Warsaw Treaty Organization. The most important decisions were :

(1) A reduction in the armed forces of Albania, Bulgaria, Czechoslovakia, Poland, and Rumania of 119,000 men in all, additional to the cut of 300,000 in the Soviet armed forces previously announced.

(2) The withdrawal "in the near future" of all Soviet forces stationed in Rumania.

(3) The reduction during the current year of the Soviet troops stationed in Hungary.

(4) A proposal for the conclusion of a non-aggression pact between the Warsaw Treaty Organization and NATO.

It was also announced that China, North Korea, North Vietnam, and Mongolia had decided to co-ordinate their economic planning and to strengthen their mutual economic co-operation with the Soviet bloc.

Communiqués and a special declaration were issued at the end of the talks, as summarized below :

Meeting of Council of Mutual Economic Assistance.

The communiqué said that this conference, held from May 20-23, had been attended by representatives of the Communist and Workers' parties of the member-countries represented on the Council—the Albanian Party of Labour, the Bulgarian Communist Party, the Hungarian Socialist Workers' Party, the East German Socialist Unity Party, the Polish United Workers' Party, the Rumanian Workers' Party, the Soviet Communist Party, and the Czechoslovak Communist Party. Representatives of the North Vietnamese Party of Labour, the Chinese Communist Party, the Korean Party of Labour, and the Mongolian People's Revolutionary Party had also taken part.

It was stated that the conference had considered "the further promotion of economic co-operation between the socialist countries on the basis of the principle of international socialist division of labour and rational industrial specialization and co-ordination." It had "heard reports on the work of the government planning agencies of the socialist countries in drawing up long-term plans for the basic sections of their national economy," and had noted that "economic contacts between them were steadily being consolidated and were acquiring an increasingly many-sided character." Considerable progress had been made in recent years in the specialization and co-ordination of production, notably in machine-building.

The conference had stressed "the need for further specialization and co-ordination of production in the inter-related branches of the national economies of the member-countries"; for "the utmost development of their raw material resources and power industries"; and for the "introduction of new machinery and techniques." Particular attention had been given to the need for further co-ordination and specialization in machine-building to bring about mass and serial production. Emphasis had also been placed on "an expansion of mutually advantageous forms of co-operation with a view to raising the level of industrialization in the less-developed countries."

It had also been decided to enhance the role of the Economic Mutual Assistance Council and its agencies in organizing economic co-operation; recommendations had been approved on the co-ordination and specialization of production and the preparation of long-term national economic development plans. Representatives of those countries which were not members of the Economic Mutual Assistance Council had expressed willingness "to take an active part in the economic co-operation of the Socialist countries and to take measures accordingly, conforming to the specific conditions in their countries."

No further details were given of the decisions taken.

Political Consultative Committee of Warsaw Treaty Organization.

The meeting of this committee, which was held on May 24 under the chairmanship of the Bulgarian Prime Minister (M. Yugov), was attended by the following governmental and party leaders of the participating countries :

Albania—Lieut.-General Mehmet Shehu, Prime Minister, M. Enver Hodja, First Secretary of the Albanian Party of Labour; M. Shtylla, Foreign Minister; General Hasko, Chief of the General Staff.

Bulgaria—M. Yugov, chairman of the Council of Ministers; M. Zhivkov, First Secretary of the Bulgarian Communist Party; M. Lukanov, Foreign Minister; and General Panchewski, Minister of National Defence.

Hungary—M. Kadar, Minister of State and First Secretary of the Hungarian Socialist Workers' Party; M. Sik, Foreign Minister; Colonel-General Revesz, Minister of Defence.

German Democratic Republic—Herr Otto Grotewohl, Prime Minister; Herr Walter Ulbricht, First Secretary of the Socialist Unity Party; Colonel-General Willi Stoph, Minister of National Defence; Herr Leuschner, Deputy Premier.

Poland—M. Cyrankiewicz, Prime Minister; M. Gomulka, First Secretary of the Polish United Workers' Party; M. Rapacki, Foreign Minister; General Spychalski, Minister of National Defence.

Rumania—M. Stoica, Prime Minister; M. Ghcorghiu-Dej, First Secretary of the Rumanian Workers' Party; M. Emil Bodnaras, Deputy Premier; M. Bunaciu, Foreign Minister; Colonel-General Salajan, Minister of the Armed Forces.

Soviet Union—M. Khrushchev, Prime Minister and First Secretary of the Soviet Communist Party; M. Gromyko, Foreign Minister; Marshal Malinovsky, Minister of Defence.

Czechoslovakia—M. Siroky, Prime Minister; M. Vaclav David, Foreign Minister; Colonel-General Lomsky, Minister of National Defence.

China (as observers)—Chen Yun and Li Fu-chun, both Deputy Premiers.

The communiqué was worded as follows :

"In conformity with Article 3 of the Warsaw Treaty, envisaging consultations between the member-States on major international questions affecting their interests, an exchange of views on the present international situation took place at the meeting of the Political Consultative Committee. The Committee noted with satisfaction the complete unanimity of the participating countries, both in assessing the international situation and in their common tasks in the struggle for peace and the security of the peoples. The Committee unanimously adopted a declaration, which is published herewith [see below].

"The Committee heard a report by Marshal Koniev, C.-in-C. of the Joint Armed Forces of the member-States of the Warsaw Treaty, on a further reduction in the armed forces of the Warsaw Treaty countries and on the withdrawal of Soviet forces from the Rumanian People's Republic.

"Besides the further cut in the armed forces of the Soviet Union in 1958 by 300,000 men, previously announced, the member-countries resolved to carry out in 1958, in addition to the earlier substantial reduction in their armed forces, further cuts of a total of 119,000 men, viz.—the Rumanian People's Republic by 55,000 men, the Bulgarian People's Republic by 23,000 men, the Polish People's Republic by 20,000 men, the Czechoslovak Republic by 20,000 men, and the Albanian People's Republic by 1,000 men. Thus the member-countries will have reduced their armed forces in 1958 by 419,000 men in all.

"The Committee approved a proposal by the Soviet Government, agreed to by the Rumanian Government, on the withdrawal in the near future of the Soviet troops stationed in Rumania in conformity with the Warsaw Treaty.

"The Soviet Government, in agreement with the Hungarian Government, decided to reduce the Soviet troops stationed in Hungary during 1958 by one division. The Committee approved this decision.

"Decisions were also taken on certain organizational matters relating to the activities of the Joint Armed Forces of the member-States.

"The Committee resolved to address to the member-States of NATO a proposal for a non-aggression pact between the Warsaw Treaty Organization and NATO. The draft text of this pact is published separately."

Declaration of Warsaw Treaty Countries.

The declaration, which was signed by Lieut.-General Shehu, M. Yugov, M. Kadar, Herr Grotewohl, M. Cyriankiewicz, M. Stoica, M. Khrushchev, and M. Siroky, said that the Political Consultative Committee of the Warsaw Treaty countries had been convened "to examine the existing international situation and work out new joint measures to ease international tension." After speaking of the "unanimity of the Governments represented," it continued :

"The state of affairs in the world is being influenced to an ever greater extent by the unceasing struggle of the countries of the socialist camp for the development of international co-operation on the basis of the peaceful co-existence of States with different social structures; for the settlement of disputed questions by negotiations between States; for the ending of the arms race, and for the removal of the threat of atomic war. The participants in the conference note with satisfaction that it is not only the socialist countries that are directing their efforts towards strengthening peace, but also most of the countries of Asia and Africa that have freed themselves from colonial dependence. Peace is also supported by ... people of different political outlooks in the countries of Western Europe, America, and other continents. States pursuing a policy of neutrality are also making a positive contribution to the struggle for peace."

After describing the Warsaw Pact as "a mighty deterrent to the activities of the military groupings of the Western Powers, and first and foremost of the North Atlantic bloc, which are hostile to the cause of peace," the statement went on to accuse the Western Powers,

"and in the first place the United States," of seeking to pursue a "positions-of-strength policy." It continued: "They bear the responsibility for the arms race, which is acquiring an especially dangerous nature in connexion with the expanding production and stockpiling of nuclear means of mass destruction. . . . NATO military bodies are working out now plans to increase the armed forces and military expenditure of those countries, while the NATO War Ministers' conference in April this year discussed the question of doubling the size of the armed forces placed at the disposal of the American Supreme Commander of NATO. On May 1 the Permanent Council of NATO took a decision providing for the atomic arming of those participants in the North Atlantic bloc who do not at present possess such weapons. The Governments of a number of NATO countries—Britain, France, Italy, Turkey, and others—have submitted their territories for use as American launching sites for rockets bearing nuclear warheads, and as storehouses for atomic weapons.

"The war preparations in the German Federal Republic, whose *Bundestag* has decided to arm the West German forces with nuclear and rocket weapons, are assuming a particularly dangerous character. The most dangerous types of weapons are falling into the hands of militarist and revenge-seeking circles who raise territorial claims against other States. The U.S. Government, in lending its support to the policy of arming the German Federal Republic, and taking upon itself the task of supplying Western Germany with nuclear and rocket weapons, . . . is encouraging these circles to pursue a policy fraught with danger to peace.

"The situation is dangerously worsened by . . . the flights of U.S. planes with atomic and hydrogen bombs over the Arctic areas towards the Soviet Union. Flights by American bombers with atomic and hydrogen bombs are also carried out over many West European countries . . . These actions by the U.S. Government border on direct provocation. . . .

"One cannot but note with satisfaction that certain NATO member-States . . . are adopting a saner attitude—a circumstance which cannot fail to make a positive contribution to the relaxation of international tension, particularly in Europe. . . ."

After condemning the recent nuclear test explosions carried out by the U.S.A. and Britain in the Pacific, the declaration expressed "serious concern" at what it described as "the unceasing attempts of the United States, Britain, France, and other colonial powers to interfere in the internal affairs of Asian and African countries" and to "impose upon them regimes and governments that are alien to the peoples." It went on to denounce the NATO, SEATO, and Baghdad Pact Organizations, and, in particular, the "Eisenhower doctrine" in the Middle East. In the latter connexion it stated:

"Just as last summer the clouds gathered over Syria, so today dangerous schemes are being carried out against the Lebanon. The United States, falling back on the notorious 'Dulles-Eisenhower doctrine' which has been rejected by the Arab peoples, is making ready to set its armed forces in action against a State which wants nothing more than to be master in its own house and to be free from foreign dictation. . . . All this is taking place before the eyes of the United Nations, which, . . . owing to the position of certain Western Powers, remains paralysed and is taking no steps to safeguard the independence of Lebanon or other States which are being subjected to the schemes of imperialist circles. . . . The Warsaw Treaty countries . . . will continue to direct their actions towards enabling the U.N. to accomplish successfully the tasks entrusted to it by the Charter."

The declaration reiterated the demand for the admission of Communist China to the United Nations; condemned what it described as "the bloody war which France has been waging for years against the people of Algeria"; and continued: "The sponsors of NATO and the other blocs associated with it are striving to conceal their war preparations and their interference in the internal affairs of other countries by false references to the 'danger of international Communism.' . . . Can anyone have forgotten that the preparations of Hitler Germany for the Second World War were also carried out under the banner of the struggle against the 'danger of Communism'? . . . The States united by the Warsaw Treaty, and also the Socialist States of Asia, do not have and cannot have any motives for attacking other countries. The Soviet Union, the Chinese People's Republic, and the socialist camp as a whole possess immense expanses of land and untold natural resources. . . . Their peoples are devoting all their efforts to the creation of a new social system which will guarantee general prosperity. . . . For this they need, first and foremost, firm and lasting peace. That is why nothing can be more remote from the truth than the allegation that the socialist countries threaten anyone or want to force their way of life on others. . . ."

After referring to the fact that the armed forces of the Warsaw Treaty countries had been reduced by 2,477,000 men since 1955, whereas the NATO countries were "increasing the number of their troops, augmenting their military budgets, and building up their armaments," the declaration referred to the suspension of Soviet nuclear tests, which it described as a "noble step of historic significance"; to the decision of the Chinese People's Republic to withdraw its "volunteers" from Korea; to the Polish "Rapacki plan" for an atom-free zone in Central Europe, which it called "a valuable initiative aimed at removing the danger of an atomic war in Europe"; and to the East German proposal for a Confederation of the two German States, for which "whole-hearted support" was expressed.

The declaration then went on to recapitulate, at great length, the proposals for a summit conference made by Marshal Bulganin and M. Khrushchev in their correspondence with Western Heads of Government during the past few years. It stated that the objectives of such a conference should be "the immediate ending of tests of atomic and hydrogen weapons; renunciation by the U.S.S.R., the U.S.A. and Great Britain of the use of nuclear weapons; the establishment in Central Europe of a zone free from atomic, hydrogen and rocket weapons; the conclusion of a non aggression treaty between NATO and the Warsaw Treaty Organization; the reduction of the number of foreign troops on the territory of Germany and in other European States; an agreement on questions connected with the prevention of a surprise attack; measures to extend international trade; the ending of war propaganda; ways of easing tension in the Middle East area; prohibition of the use of outer space for military purposes; liquidation of foreign military bases on the territories of other States, and international co-operation in exploring outer space; the conclusion of a German peace treaty; and the development of contacts between countries."

After stressing that the ending of atomic and hydrogen weapon tests should be given first priority at a summit conference, and saying that the "refusal of the U.S.A. and Britain to follow the example set by the Soviet Union" could only have the effect of "throwing mankind back to the starting-point on this question," the declaration went on to express full support for the Polish proposal for an atom-free zone in Central Europe comprising the two German States, Poland, and Czechoslovakia. It said in this connexion:

"A comparison between the States to be included in an atom-free zone shows that the territory of the German Democratic Republic, Czechoslovakia, and Poland is more than double that of the fourth state in this zone—Western Germany. Furthermore, the population of the Warsaw Treaty States in this zone exceeds the population of the member of the North Atlantic Alliance [i.e. Western Germany] in this zone. Neither the German Democratic Republic, Czechoslovakia, Poland, nor the German Federal Republic manufactures nuclear weapons. Moreover, the German Federal Government at one time assumed an international obligation not to manufacture such weapons in the future. All this is evidence of the absence of any grounds for supposing that the establishment of an atom-free zone will offer any one-sided military advantage to the Warsaw Treaty countries to the detriment of the interests of NATO States. . . ."

As regards German reunification, the declaration said that "attempts to bring the question of German unity before a summit conference can only serve the purposes of those who want to prevent the convening of a summit conference and do not want to see it brought to a successful conclusion." It continued: "The member-States of the Warsaw Treaty fully understand the desire of the German people to eliminate the division of their country, and are in favour of the restoration of German unity and the establishment of a peaceful, democratic German State. But they believe that this problem can only be solved by the German people themselves as represented by the two German States now in existence, and only through agreement between them. There is no other way of solving the German question. . . ."

In view of the fact that "the Western Governments are not inclined to hold a [summit] conference with broad representation," it was suggested that the North Atlantic Alliance and the Warsaw Treaty Organization should each be represented by three or four countries; in this connexion "full powers" were given to the Soviet Union, Poland, and Czechoslovakia (or alternatively, Rumania) to take part in a summit conference "on behalf of the countries that are signatories to the Warsaw Treaty." In addition, "great importance" was attached to the participation in a summit conference of "neutral States which are not bound to either of the opposing military groupings and have proved their adherence to the cause of peace and international co-operation."

On the question of disarmament, the Western Powers were accused of having put forward [in the London sub-committee of the U.N. Disarmament Commission] proposals which "not only failed to provide for the prohibition of atomic and hydrogen weapons and the reduction of armed forces, but also flung the door wide open for a further arms race." By "imposing" these proposals on the U.N. General Assembly, and "taking steps to maintain in the U.N. Disarmament Commission the predominance of members of the military blocs organized by them," the Western Powers had "created in the Disarmament Commission a situation that precludes all hope of a positive solution to the question of disarmament within that body." In these conditions "the best prospects for a solution to urgent questions of disarmament, on which there already exists the possibility of coming to mutually acceptable agreements, are opened up by a summit conference with the participation of Heads of Governments."

In conclusion, the declaration proposed that NATO and the Warsaw Treaty Organization should conclude a non-aggression pact, the draft of which was published separately.

Proposed Non-Aggression Pact between Warsaw Treaty and NATO.

The proposed draft treaty consisted of five Articles worded as follows:

"**Article 1.** Noting that the use or threat of force in international relations is prohibited by international law, and in particular by the U.N. Charter, the States parties to the Warsaw Treaty and the States parties to the North Atlantic Treaty solemnly undertake to observe strictly this prohibition and not to resort to the use or threat of force against one another, jointly or separately.

"**Article 2.** All disputes that may arise between one or more parties to the Warsaw Treaty, on the one hand, and one or more parties to the North Atlantic Treaty, on the other hand, shall be resolved by peaceful means only, on the basis of the invariable observance of the principle of non-interference in the internal affairs of States; in a spirit of mutual understanding; and through negotiations between the parties concerned, or by using other means of peaceful settlement of international disputes as provided for by the U.N. Charter.

"**Article 3.** Should a situation arise which might endanger the preservation of peace or security in Europe, the States parties to the present pact shall consult together with a view to taking and implementing such joint measures as, in conformity with the U.N. Charter, may be considered appropriate for a peaceful settlement.

"**Article 4.** The pact shall be concluded for a period of 25 years and shall come into force on the day of its signature. In the event of the North Atlantic Treaty of April 4, 1949, and the Warsaw Treaty of May 14, 1955, being terminated, the pact will become invalid.

"**Article 5.** The pact, of which the Russian, English, and French texts will be regarded as authentic, shall be deposited for safe-keeping with the U.N. Secretary-General. Copies shall be transmitted by the Secretary-General to the Governments of States which are parties to the Pact."

Bucharest Radio announced on July 4 that the withdrawal of Soviet garrisons from the Constanza and Dobrudja areas had been completed on the previous day.—(Press Departments, Soviet and Polish Embassies and Bulgarian Legation, London) **(Prev. rep. Warsaw Treaty, 14704 A; Council of Mutual Economic Assistance, 14900 A.)**

A. UNITED KINGDOM. — Illegal Landing of Russian Fishermen in Shetlands. - Political Asylum for Estonian Refugee. - British Protest to Soviet Government.

Some 30 Russian fishermen, members of a Soviet herring fleet operating in Shetland waters, landed illegally in the Shetland Islands on June 25 in search of one of their number, a 32-year-old Estonian named Erich Teayn, who had fled ashore near the village of Walls (25 miles north-west of Lerwick). The Russians combed the moorland for several hours in search of Teayn, who had meanwhile been given refuge in the cottage of a crofter. Three of the Russian skippers subsequently called at Lerwick police-station and sought access to Teayn, which was refused; the Russian fishing fleet thereupon sailed off, while Teayn was taken to Edinburgh for interrogation by immigration officers. It was announced on July 17 that Teayn had been released and would be allowed to remain in the United Kingdom as a political refugee.

A strong British protest was sent to the Soviet Government on June 28 stating that H.M. Government "take a grave view of the action of these seamen in landing on British territory and of their subsequent conduct there." After pointing out that a flagrant violation of the law would have occurred if the seamen had apprehended Teayn by force, the Soviet Government were asked "to issue strict instructions to the captains of all Soviet vessels which may have occasion to enter British waters, in order to ensure that there is no recurrence of any incident of this kind." —(Times - Daily Telegraph)

B. SWITZERLAND. — Nuclear Weapons for Army.

The Swiss Federal Council announced on July 11 that it had come to the conclusion that the Swiss Army "must receive the most effective weapons to maintain our independence and protect our neutrality," and that this included nuclear weapons. The Federal Military Department had therefore been asked to study all questions connected with the introduction of such weapons, and to submit its report and recommendations in due course.

The statement pointed out that the use of nuclear weapons in future wars could "unfortunately not be excluded," and that developments showed that such weapons would become standard weapons of tactical forces without losing their importance as strategic weapons. Nuclear weapons would not only serve an aggressor but would also strengthen the defensive power of the defender to a high degree, and it was obvious than an army equipped with nuclear weapons could fulfil its defensive functions much better than forces not possessing such weapons. To renounce the equipment of her forces with such weapons would therefore place Switzerland in a state of relative weakness and expose her to the danger of becoming involved in a future conflict.

In conclusion, the statement declared that while this decision had been taken to give Switzerland the most effective means of defence against any attack, the Federal Council would welcome all efforts aimed at bringing about a general reduction of armaments, including nuclear weapons.
(Neue Zürcher Zeitung) **(Prev. rep. Defence, 16275 C.)**

C. FRANCE. — General de Gaulle's Meetings with Mr. Macmillan and Mr. Dulles.

The British Prime Minister, accompanied by the Foreign Secretary (Mr. Selwyn Lloyd), visited Paris on June 29 for discussions with General de Gaulle and M. Couve de Murville, the French Foreign Minister. A joint communiqué stated (1) that General de Gaulle and Mr. Macmillan had "renewed the bonds of friendship and esteem forged 15 years ago"; (2) that they had "reviewed the great problems confronting the Western world"; (3) that they were "in complete agreement on the paramount necessity of the defence of the free world"; and (4) that they had had "a frank exchange of views on the whole range of problems facing them" and had established "a common attitude for that close co-operation which the two Governments are determined to maintain." No mention was made of the specific subjects discussed, but they were understood to have included East-West relations, the prospects of a "summit" conference, NATO problems, and the Middle East.

Mr. Macmillan had previously sent a message to General de Gaulle (June 2) congratulating him on his investiture as Prime Minister and saying that it would be "a great happiness to me to be able to renew our wartime friendship founded in the days when, as President of the Committee of National Liberation, you were leading France to victory." [Mr. Macmillan was Minister-Resident at Allied H.Q., North Africa, when General de Gaulle set up the Committee of National Liberation in Algiers.]

Mr. Dulles had informal discussions with General de Gaulle and M. Couve de Murville on July 5, during a visit to the French capital in which he also saw General Norstad (Supreme Allied Commander, Europe). A brief communiqué stated (1) that there had been "an examination of important international problems in the spirit of mutual understanding and friendship which characterizes the relations between the two countries," and (2) that General de Gaulle and Mr. Dulles had stressed the importance of still closer Franco-American co-operation "in the interests not only of France and the United States but of the whole free world." According to *Le Monde*, the subjects discussed included "atomic questions," East-West relations, the situation in the Middle East, North Africa, and South-East Asia, and "global strategy."

A French spokesman said that General de Gaulle, in his talks with Mr. Dulles, had "let no doubts remain as to the intention of his Government to raise France to the rank of the nuclear Powers," adding that General de Gaulle had "underlined the primary importance of this question." The Paris Correspondent of the *New York Times* said that Mr. Dulles "was reported to have told General de Gaulle in reply that the present form of the Atomic Energy Act did not give the Administration the right to aid France directly in this objective. According to French sources, the Secretary informed the Premier of the U.S. position on 'nuclear collaboration' and offered help and know-how in the construction of a French nuclear-powered submarine, but no information on weapons."

In a statement on July 9 to the Foreign Affairs Commission of the National Assembly, M. Maurice Schumann (the Commission's president) stated that two forms of U.S. aid were possible to enable France to enter the "atomic club": the sharing of secret information, and deliveries of fissile material and atomic arms. The talks between General de Gaulle and Mr. Dulles had shown the U.S. Government's desire to help France in any way compatible with existing U.S. legislation, and the offer relating to atomic submarines was an "important sign of the [U.S.] Administration's goodwill."

President Eisenhower, like Mr. Macmillan, had previously sent a message to General de Gaulle recalling their war-time comradeship, and saying that the American people would be glad to welcome General de Gaulle in Washington.
(Le Monde - Times - New York Times)
(Prev. rep. General de Gaulle, 16279 A.)

D. AUSTRIA. — Recovery of Nazi-pillaged Gold.

It was announced in Vienna on July 8 that Austria had received a further 6,150 kilograms of gold from the Inter-Allied Reparations Agency, which administers all the monetary gold pillaged by the Nazis in foreign countries and recovered by the Allied Forces in Germany or from third countries after the Second World War (see 7776 A). Austria had previously been allotted over 44,000 kilograms by the I.A.R.A., and with the latest allocation she recovered roughly two-thirds of her gold reserves as existing before the *Anschluss* of 1938.
(Wiener Zeitung) **(Prev. rep. 8910 D; 8887 B; 7766 A.)**

E. BELGIUM. — Bank Rate Movements.

The Belgian Bank Rate was reduced from 4½ per cent to 4¼ per cent from March 27, from 4¼ to 4 per cent from June 7, and from 4 to 3¾ per cent from July 3, 1958. It had previously been raised from 3 per cent to 3½ per cent on Dec. 6, 1956, and from 3½ per cent to 4½ per cent on July 24, 1957.
(La Nation Belge, Brussels) **(Prev. rep. 14368 A.)**

A. SWEDEN. — Defeat of Government's Compulsory Superannuation Scheme. - Dissolution of Lower House. - General Elections.

The Swedish Parliament was dissolved on April 28 (after the lapse of only half its normal four-year term) following the defeat in the Lower House on April 25 of the Government's Bill for a compulsory State superannuation scheme to supplement the existing old-age pensions. The adverse vote was 117 to 111, the scheme being supported by all 106 Social Democrats and the five Communists, while the opposition consisted of the Liberals, the Conservatives, and the Agrarians. The Bill had been passed on April 24 by the Upper House (where the Social Democrats have an absolute majority) by 82 votes to 68.

The Bill was based on the proposals sponsored by the Social Democrats, which had received 46.4 per cent of the votes in the referendum held on Oct. 13, 1957, when three separate schemes were submitted by the Social Democrats, the Agrarians, and the Liberals and Conservatives respectively [see 15961 A.] It provided that there should be, in addition to the present old-age pensions, a compulsory "people's pension" payable to everyone of 67 or over, and amounting to 65 per cent of a person's average annual wage or salary during the best 15 working years prior to retirement. These pensions would have been tied to the cost-of-living index, rising automatically if prices rose; they would have been financed by compulsory levies on salaries and wages, payable by the employers.

The Opposition parties, whilst agreeing to an increase of the present old-age pensions in stages, objected to the compulsory character of the Government's supplementary pensions scheme and advocated voluntary arrangements. Although the Government had tried after the referendum to reach agreement with the Opposition on a mutually satisfactory scheme, no common solution was found; the Government therefore decided to put the Social Democratic scheme before Parliament.

Elections for the Lower House of Parliament were accordingly held on June 1. The final results (after the counting of postal votes) were announced on June 10-11 as follows, comparison being given with the last (1956) elections:

	Seats		Votes		Percentage	
	1958	1956	1958*	1956†	1958*	1956†
Social Democrats	112	106	1,738,765	1,729,463	46.9	44.6
Conservatives	45	42	693,747	663,693	18.7	17.1
Liberals	38	58	669,763	923,564	18.0	23.8
Agrarians	32	19	480,892	366,612	13.0	9.5
Communists	4	6	127,675	194,016	3.4	5.0

* Excluding postal votes. † Including postal votes.

The final results for Stockholm, including postal votes, were as follows:

	Seats		Votes	
	1958	1956	1958	1956
Social Democrats	11	9	180,656	160,496
Conservatives	7	5	113,868	92,001
Liberals	6	9	101,063	156,694
Agrarians	—	—	7,517	342
Communists	1	2	25,735	30,575

Before the counting of postal votes the Conservatives had been credited with 44 seats and the Communists with five, but when the postal votes were added the Communists lost to the Conservatives one of the two seats they were originally believed to have gained in Stockholm—thus increasing Conservative representation to 45. This had a far-reaching effect on the general party set-up, since the Social Democrats (led by the Prime Minister, Hr. Tage Erlander) thereby failed to get an overall majority with the support of the Communists, which they were at first believed to have obtained. As the Speaker will be drawn from the Social Democrats, they will, even if supported by the Communists, only command 115 votes at most; since the three non-socialist parties also have 115 seats in all, the socialist and anti-socialist parties are thus of exactly equal strength in the new House.

Among the non-Socialist parties, the outstanding feature of the elections was the severe defeat of the Liberals (led by Professor Bertil Ohlin), who lost 20 seats, or about one-third of their total poll in 1956. On the other hand, the Agrarians (led by Hr. Gunnar Hedlund) gained 13 seats and the Conservatives (led by Hr. Jarl Hjalmarson) gained three, making the lattter the largest Opposition party instead of the Liberals.

The Agrarians were thought to have benefited from the determined opposition which they put up from the first to the Social Democrats' compulsory superannuation scheme; from the break-up of the Social Democrat-Agrarian coalition in October 1957; and from the present difficulties of Swedish agriculture—especially the butter crisis, which had recently been worsened by Britain's decision to prevent the dumping of Swedish butter in the U.K. (see 16264 A). The Conservatives continued the upward trend shown in the 1956 elections.

The Communists (led by Hr. Hilding Hagberg) decided not to put up candidates in 11 of the 28 multi-member constituencies, where they instructed their followers to vote for the Social Democrats; their poll was accordingly reduced by about one-sixth.

After the initial election results were announced on June 2, Hr. Erlander stated that he intended to press on with the Government's pensions Bill in the new Parliament as soon as possible. On June 10, however, after the postal voting had become known, he announced that he would not present the Bill formally until the spring session of the *Riksdag*.

Although the First (Upper) Chamber was not affected by the dissolution, local elections in the autumn will influence its composition, as some of its members are elected by the local councils.—(Svenska Dagbladet - Stockholms-Tidningen) **(Prev. rep. 15961 A.)**

B. BRAZIL. — Cabinet Reorganization.

The Brazilian Finance Minister, Senhor Alkmim, resigned at the end of June to stand as a candidate for the Chamber of Deputies at the forthcoming general elections. His resignation was followed by that of four other Ministers—those of Justice and the Interior (Dr. de Aguiar Salles), Foreign Affairs (Sr. de Macedo Soares), Labour (Sr Barroso), and Health (Professor Medeiros)—so as to give President Kubitschek a free hand to reorganize the Cabinet. The Ministers of Agriculture (Senhor Dornelles) and Air (Brigadier Alves Seeco) had tendered their resignations previously.

With the new appointments made by President Kubitschek at the end of June and during the first week of July, the membership of the Brazilian Cabinet became:

Dr. Lucas Lopes	Finance.
Senhor Francisco Negrão de Lima	Foreign Affairs.
Senhor Carlos Cirilo	Justice and Interior.
Dr. Mario Pinotti	Public Health.
Dr. Romulo de Almeida	Labour.
Commander Lucio Meira	Transport and Public Works.
Senhor Mario Meneghetti	Agriculture.
Dr. Clovis Salgado	Education.
Lieut.-General Henrique Teixeira Lott	War.
Vice-Admiral Antonio Alves Câmara	Navy.
Brigadier Francisco Corrêa de Mello	Air.

Among the new Ministers, Senhor Negrao de Lima (55) is a former ambassador to Venezuela and Paraguay; Dr. Pinotti is a well-known medical expert who has organized a successful anti-malaria campaign; Senhor Lucas Lopes has been president of the *Banco Nacional do Desenvolvimento Economico* and is an economic adviser to President Kubitschek; and Senhor Cirilo is a former president of the Chamber of Deputies.—(Brazilian Government Bulletin - Bank of London and South America, Fortnightly Review - New York Times) **(Prev. rep. 14704 B.)**

C. FRANCE - NORTH AFRICA.—General de Gaulle's Messages to King of Morocco and President of Tunisia.

Two personal messages—one to President Bourguiba of Tunisia and the other to King Mohammed V of Morocco—were sent by General de Gaulle on June 2, both in very cordial terms.

In his message to President Bourguiba, General de Gaulle announced his intention of "settling with you, if you agree, the present difficulties between our two countries and the conditions of their good relations in the future." While awaiting the moment until this could be done (the message continued), "I consider that our two Governments should avoid anything that might involve the risk of aggravating the situation." General de Gaulle added that corresponding instructions had been issued to all French authorities.

General de Gaulle's message to King Mohammed expressed the "firm intention" to maintain and develop with Morocco "such relationships as may correspond to the friendship between our peoples." In sending his personal good wishes to the King, General de Gaulle spoke of the "most friendly feelings which I have borne towards you since the time when Moroccans and Frenchmen fought side by side for their freedom and for the freedom of the world."

In a cordially-worded reply to General de Gaulle, President Bourguiba wished him "every success in the heavy task" he had undertaken, and said that he fully shared the general's anxiety "to avoid anything that could aggravate the situation." M. Bourguiba added:

"The Tunisian authorities are observing in this respect the instructions consistently laid down by my Government. I should add, however, that to create the necessary conditions for a settlement of the present difficulties between our two countries, and for the restoration of good relations between them, it will be necessary to define clearly our respective intentions. For my part, I am always animated by the desire to remove the major obstacles which have hitherto impaired our relations. I should be happy if my anxieties on this fundamental matter were to be shared by your Government."

It was stated in Rabat that the "great cordiality" of General de Gaulle's message had been highly appreciated, and that King Mohammed was sending a personal reply.—(Le Monde, Paris)

JULY 26—AUGUST 2, 1958

A. MIDDLE EAST. — Army Revolt in Iraq. - Assassination of King Faisal, Prince Abdul Ilah, and General Nuri es-Said. - Iraqi Republican Government formed by Brigadier Kassem. - Lebanese and Jordanian Appeals to U.S.A. and Britain. - U.S. Marines land in the Lebanon. - British Paratroops despatched to Jordan.

A major international crisis broke out in the Middle East in the week beginning July 14 as a result of the following developments :

(1) An Army revolt in Iraq in which King Faisal, the Crown Prince Abdul Ilah, and General Nuri es-Said (Prime Minister of the Arab Federation of Iraq and Jordan) were assassinated and a Republican regime was proclaimed.

(2) The landing of American marines in the Lebanon in response to an appeal by President Chamoun.

(3) The despatch of British paratroops to Jordan in response to a similar appeal by King Hussein.

The Iraqi Revolution.

The first news of the Iraqi revolution was given in a broadcast from Baghdad Radio in the early morning of July 14. This declared that, "with the aid of God Almighty and the support of the people and the armed forces," Iraq had been "liberated from the domination of a corrupt group installed by imperialism." After saying that there was complete unity between the Army and the people, and calling upon the population to maintain order and discipline, the broadcast announced the creation of an "Iraqi Republic which will preserve the nation's unity, maintain brotherly ties with other Arab countries, and fulfil all treaties and obligations which are in the interests of Iraq and which comply with the principles of the Bandung Conference and the U.N. Charter." It was also announced that a three-man Council of Sovereignty would carry out presidential duties pending the holding of general elections in Iraq.

As the new Republican Government (see below) imposed martial law throughout the country and closed the frontiers, and as all aerial, telephonic, and telegraphic communications with Iraq were temporarily suspended, it was not until some days later that fuller details of the *coup d'état* became available. For about 48 hours the only source of information was Baghdad Radio, which broadcast a succession of statements, communiqués, and declarations announcing that the monarchy had been overthrown ; that King Faisal, Crown Prince Abdul Ilah, and General Nuri es-Said had been killed ; that a Republican Cabinet had been formed under the Premiership of Brigadier Abdul Karim Kassem ; that the new Government was in complete control of the country ; and that all Iraqi troops in Jordan (said to number 12,000) had been withdrawn. Frequent assurances were given that foreign nationals would be protected, that the new Government would honour Iraq's obligations towards foreign oil interests, and that oil installations and pipelines would be safeguarded.

Declarations of friendship for President Nasser and the United Arab Republic were interspersed with bitter radio attacks on the former Iraqi regime, and on Crown Prince Abdul Ilah and General Nuri in particular. In a broadcast on July 16, Baghdad Radio called on the Jordanian people to revolt against King Hussein and his Prime Minister (Mr. Samir Rifai), who were described as "traitors and agents of imperialism."

Assassination of King Faisal, Prince Abdul Ilah and General Nuri.

The exact circumstances of the murder of King Faisal, Prince Abdul Ilah, and other members of the Royal household were not definitely known. According to an official statement, broadcast on July 16 by Baghdad Radio, the King and the Crown Prince were killed when their bodyguard tried to resist Army units which had gone to the Royal palace to place them under arrest. As regards General Nuri, it was announced on July 15 that he had been killed after trying to escape disguised as a woman.

During the first few hours of the revolution Baghdad Radio announced that Prince Abdul Ilah had been killed and that his body was hanging outside the Ministry of Defence after having been dragged through the streets of Baghdad ; the population of the capital were invited to see it "being spat upon by the people and kicked by their feet." General Nuri, after first being reported killed, was later said to have escaped from custody, a reward of £10,000 being offered for his apprehension ; on July 15, however, it was announced that he had been discovered in disguise and shot while trying to resist arrest. Finally, the above-mentioned official statement was issued on July 16 describing the purported circumstances in which King Faisal and Prince Abdul Ilah had met their deaths.

Differing versions of the assassinations were given by foreign nationals who were in Baghdad at the time and who subsequently left the country, but nearly all accounts agreed on two points : firstly, that 19 members of the Royal household were massacred, including several ladies of the Iraqi Court ; and secondly, that Prince Abdul Ilah's mutilated body had been dragged through the streets and hung outside the Ministry of Defence. According to some accounts, the entire Royal household were mown down by machine-guns and their bodies burned in the gardens of the palace ; other accounts said that the members of the Royal household had been taken to the cells below the palace and shot one by one.

King Faisal II (23) belonged to the 41st generation of the Hashemite family, which claims direct descent from the Prophet Mohammed. The only son of King Ghazi and Queen Aliyah, he was the great-grandson of Hussein ibn-Ali (the Sherif of Mecca, who became King of the Hedjaz after the First World War), grandson of King Faisal I (the first ruler of modern Iraq), and cousin of King Hussein of Jordan. Faisal II became King of Iraq in 1939, when only three years of age, after King Ghazi's death in a motor accident. During his long minority he was educated in England (at a preparatory school and at Harrow) while his uncle, Prince Abdul Ilah, acted as Regent of Iraq. He ascended the Iraqi throne in 1953 on reaching the age of 18, and in February last became Head of State of the Arab Federation of Iraq and Jordan, with King Hussein as Deputy Head of State. In September 1957 he became engaged to Princess Fazilet, the daughter of an Egyptian prince and an Ottoman princess, and grand-daughter of Mohammed Ali the Great, Khedive of Egypt under the Ottoman Empire.

Crown Prince Abdul Ilah (44) was the maternal uncle of King Faisal and, as stated above, Regent of Iraq for 14 years during the King's minority. A friend of Britain, he supported the Allied cause during the Second World War and narrowly escaped death at the time of Rashid Ali's pro-Nazi coup in 1941. He became the recognized head of the Hashemite family after the assassination of King Abdullah of Jordan, and was the legal heir to the Iraqi throne in the event of King Faisal dying without male issue. He was a close advisor of King Faisal during the latter's reign, and a strong supporter of Iraqi friendship with the West.

General Nuri es-Said (70) was the leading personality in Iraqi political life since the foundation of the modern Kingdom of Iraq in 1921. Born at Kirkuk, he became an officer in the Turkish Army, played a prominent role in the early days of the Pan-Arab nationalist movement, and joined the Arab revolt under the Sherif of Mecca during the First World War. The first C.-in-C. of the Iraqi Army, he was Minister of Defence in three Cabinets before becoming Prime Minister in 1930. During the next 28 years he held the Premiership for seven terms of office, relinquishing it in March 1958 to become the first Prime Minister of the Arab Federation of Iraq and Jordan. A lifelong friend of Britain and the West, he played a leading part in founding the Baghdad Pact and frequently criticized the Middle East policy of the U.S.S.R., with which he broke off relations in 1955. General Nuri was responsible *inter alia* for negotiating the 25-year Anglo-Iraqi Treaty of Alliance signed in 1930 ; for bringing Iraq into the Second World War on the side of the Allies, in face of considerable nationalist opposition ; and for helping to create the Arab League after the war. Despite his strong opposition to President Nasser, he supported Egypt at the time of the Suez crisis. For the last ten years of his life he wielded virtually unchallenged authority in Iraq as head of the Constitutional Union Party, which he founded in 1949 and which became the only legal party in 1953 after the banning of all Opposition groups. His rule was of a personal and "paternalistic" character, and was marked by the inauguration of large irrigation and hydro-electric schemes financed out of the country's oil royalties.

Sacking of British Embassy. - Murder of Foreign Nationals.

The *coup d'état* was carefully planned by Army units stationed near Baghdad, and achieved success within a few hours ; no opposition was encountered from any section of the population nor from Army units stationed in the provinces. Essential services were maintained throughout, all railway and telecommunications services were operating normally on the day after the coup, and there was no disruption of normal commercial life.

In the first hours of the coup, however, the British Embassy in Baghdad was ransacked and burned down by rioting mobs and the Ambassador (Sir Michael Wright) and his staff were forced to take refuge in an hotel, together with their families—some 50 persons in all. One member of the embassy staff—Lieut.-Colonel Patrick Wright, master of the household—was killed by a stray bullet during the attack on the embassy, but there were otherwise no British casualties. The mobs were dispersed by armoured cars and the new Republican Premier (Brigadier Kassem) subsequently assured Sir Michael Wright that all steps would be taken to protect British nationals ; Brigadier Kassem also expressed deep regret at the attack on the embassy and promised that compensation would be paid for the damage done. Anxiety had also been felt in London about the fate of the 800 British airmen and 800

members of their families stationed at the R.A.F. base at Habbaniyah, but on July 20 it was announced that all were safe and well and that there had been no incidents with Iraqi forces in the vicinity.

Apart from the attack on the British Embassy, several foreign nationals were brutally murdered in Baghdad by the mob before the military authorities had re-established order. A Jordanian general who was in Baghdad at the time (Major-General Sadek Sharch), and who subsequently escaped to Amman, described on July 25 how an Army lorry with a military escort had called at his hotel on the morning of the coup to take 23 foreign nationals to the Ministry of Defence—members of the Jordanian military mission, two Jordanian Ministers, an American, a German, a Swiss, two Egyptians and a Syrian. Outside the Ministry a mob had attacked the lorry, overpowered the small military escort, and pulled down everyone they could lay their hands on. General Sharch—who was himself badly manhandled and narrowly escaped with his life—described how he had seen the American and the Swiss (both believed to be businessmen) beaten, trampled upon and torn to pieces by the mob; the two Jordanian Ministers were also killed [it subsequently became known that they were Mr. Ibrahim Hashem and Mr. Sulaiman Toukan], and the two Egyptians and the Syrian were seriously injured and taken to hospital.

General Sharch was Deputy Chief of Staff of the Arab Army (the joint Iraqi-Jordanian forces) and in that capacity was stationed in Baghdad at the time of the revolution.

By arrangement with the Republican Government, British and U.S. airliners evacuated nationals of the two countries from Baghdad on July 21-23; the first party of British nationals, consisting of 41 adults and 69 children, were flown to Nicosia and thence to England, while 39 American adults and 54 children were flown to Italy.

The Republican Government.

As stated above, the monarchical government was succeeded by a three-man Council of Sovereignty exercising presidential powers, and a Cabinet headed by Brigadier Kassem. Both the right and left wings of the nationalist movement were represented in the Republican Government, which included military and civilian personalities known for their past opposition to General Nuri's policies.

The Council of Sovereignty consisted of General Najim Rubai (chairman), Mohammed Mahdi Kubba, and Khalid Nakhshabandi.

General Rubai (60) was Ambassador to Saudi Arabia before the coup, and is believed to hold right-wing views. A member of one of Baghdad's oldest families, he is known as an Arabic scholar, a soldier of "academic" type, and a devout Moslem. He received part of his military training in England.

Mohammed Mahdi Kubba (52) was president of the Istiqlal (left-wing nationalist) party, which was dissolved by General Nuri in 1954; he is a Shia Moslem, and a member of a well-known Baghdad family.

Khalid Nakhshabandi, a Kurd, is one of the younger generation of Army officers, and Military Commandant of Baghdad; he was lately Governor of Erbil Province, in Kurdistan.

The membership of the Iraqi Republican Cabinet was as follows:

Brigadier Abdul Karim Kassem	Prime Minister, Minister of the Interior, and Minister of Defence.
Colonel Abdul Salam Aref ..	Deputy Premier.
Dr. Abdel Jumar	Foreign Affairs.
Mohammed Hadid	Finance.
Dr. Mustafa Ali	Justice.
Dr. Ibrahim Kubba	Economics.
Dr. Jabir Omar	Education.
Baba Ali	Works and Communications.
Brigadier Naguib Taleb ..	Social Affairs.
Rashid Mahmoud	Agriculture and Health.
Fuad Rikabi	Development.
Siddiq Shanshal	Information and Press.

Brigadier Kassem (44) was born in Baghdad, the son of a small landowner. A career officer, he graduated from the Iraq Military Academy in 1934, fought in the Palestine War as a battalion commander, and had been in command of an infantry brigade since 1955. A devout Sunni Moslem, he is regarded as one of the most competent of the younger Iraqi officers.

Colonel Aref has held administrative and training appointments at the Defence Ministry, **Brigadier Taleb** was military attaché in London in 1954-55, and **Dr. Jumar** (a lawyer educated in France) was formerly a leader of the Opposition Nationalist Front. **Mr. Hadid**—a Socialist, and a graduate of the London School of Economics—is a wealthy business man; he was Minister of Supply in 1946. **Mr. Shanshal,** a lawyer, is known as a strong supporter of President Nasser and the United Arab Republic; in recent years he had been imprisoned and banished to northern Iraq, but was subsequently allowed to return to Baghdad. **Mr. Baba Ali** is a graduate of Columbia University (New York) and a former Minister of Agriculture.

Many senior officers were placed on the retired list after the revolution; they included General Aref, the Chief of Staff, and General Abbadi, Chief of the Iraqi Air Force. General Aref (not to be confused with Colonel Aref, Deputy Premier in the new Government) had been appointed Chief of Staff of the combined Iraqi and Jordanian forces by King Faisal.

Brigadier Kassem's Statement on Causes of the Revolution. - Policy of the Republican Government.

In an interview on July 22 to the Baghdad Correspondent of *The Times*, Brigadier Kassem emphasized that the Iraqi national movement was not directed against the West; that Iraq desired friendship with all countries on the basis of equality; and that oil production would be not only fully maintained but expanded. He also spoke of the causes and nature of the Iraqi revolution, his statement being as follows:

"Our revolution did not happen as a spontaneous event or fortuitous accident, but was the outcome of detailed planning by the responsible people in the revolutionary movement. This planning took carefully into account Iraq's position in the Middle East specifically and in the world pattern politically generally, and also the situation in Iraq itself.

"It was fundamental to the thought of the architects of the revolution that Iraq would not oppose the Western Powers out of a feeling of resentment, but, on the contrary, would co-operate with them, particularly in the oil question. We believe that oil production and distribution should be fully maintained, and we shall do our best to expand both.

"One of the charges falsely made by the old régime was that the Opposition and the Iraq national movement generally was directed against the West, and that they would do everything possible to harm the West for the sheer pleasure of harming those countries. The truth is the very opposite. As long as the interests of the West are good for both parties, Iraq will not only endeavour to maintain things that are good for both but will increase the extent of her co-operation, especially in oil production. Oil is as important to us as it is to the West and to the world economy.

"The revolution has taken place to free the people of Iraq from tyranny and corruption in its domestic affairs. The form of corruption practised by the late régime in Iraq was not unknown to political circles in the West. At least one prominent British visitor to Iraq perceived it and uttered powerful private warnings against it. The revolution sprang from internal causes. Responsible people in the West know what sort of régime Iraq had. Now we are free from that clique we will do our best to improve the lot of the Iraqi people and to raise their living standards and human dignity. Above all, we intend to establish the rule of law.

"Under the old régime there was no law or justice in Iraq. Only the interests of the governing classes were served by the administration of the law under that régime. Those who have now come to power will place the interests of the people first and last, and will never seek to place themselves above the law nor to corrupt justice in any way.

"Iraq has many sources of wealth besides oil and other minerals. She has five rivers—not two, as is commonly thought—near all of which lies fertile land. The Government will do its utmost to develop all these natural resources and to increase the productivity of agriculture and industry for the good of the nation.

"Iraq does not want to cause strife in the Middle East or in the world generally. On the contrary, this country desires to be a positive factor in maintaining peace and furthering progress and prosperity in the world. Friendship between Iraq and any State anywhere must be based on mutual interest and mutual esteem, not on any form of dependence. Our friendship with the West, therefore, must enjoy this character.

"Unfortunately, in the past a limited few claimed Iraq's friendships with foreign countries for themselves and [their own] benefit, considering that it gave them the power and privilege of ignoring the Iraqi people's wishes. But since our Government expresses the will of the people, who have full confidence in it, the path is now open to genuine friendship with any Government which has good will towards Iraq. It is for the West to make up their minds to accept friendship based on mutual interest and felt by both sides, for on this basis it will endure."

Brigadier Kassem spoke of his own part in the *coup* at a press conference given to foreign correspondents in Baghdad on July 24.

The Prime Minister said that he had been convinced of the need for a revolution in Iraq ever since he graduated from the Military College, although he was only a subaltern at the time and had little influence. He had never had any political affiliations and had never taken part in any revolutionary movement until three years ago, when he and his friend Colonel Abdul Salam Aref [the new Deputy Premier] had decided that the only hope of drastic change in Iraq lay in military action. With other like-minded officers, and with popular support, the revolution had been prepared in careful detail and contained an important element of surprise. "The first stage of the revolution was planned to be completed at 6 a.m. on July 14, and in fact by that time we were in command of the situation . . . Perhaps we should thank the foolishness of those who decided to send part of the Army to Jordan, for they facilitated the revolution and destroyed themselves."

Brigadier Kassem expressed his gratitude to " my brother President Nasser " for the fact that the United Arab Republic was the first State to recognize the Iraqi Republic. After thanking other States which had taken similar action, he said that there could be no excuse for non-recognition on the part of any State once the situation in Iraq had become clarified. The Iraqi Republic was " a solid reality " and it desired " the friendship of all who desire friendship with it " In the course of his statement Brigadier Kassem recalled that he had taken a service course at Aldershot in 1950 ; " I have many friends in England," he said, " and really like the English very much." He also insisted that he was a "peace-loving man " and that he and his associates had resorted to revolution because it was the only way in which essential reforms could be brought about. " If there had been any other way," he said, " we would have taken it ; I do not like violence. But we had no choice . . . It had to happen to free the country of tyranny and corruption."

The new Foreign Minister (Dr. Jubar) and the Minister of Information (Mr. Shanshal) also gave assurances that there would be no nationalization of foreign property ; that the Iraqi Republic would honour all agreements and treaties concluded before the revolution ; and that the new Government intended not only to maintain the flow of oil but to increase it. Dr. Jubar said that the resumption of diplomatic relations with the Soviet Union (see below) did not imply any bias towards the Soviet bloc, but only the desire to establish normal relations with the East such as those already existing with the West.

Provisional Constitution.

The Republican Government proclaimed a provisional Constitution on July 27, pending the drawing-up of a permament Constitution which would be submitted for popular approval in a referendum.

The provisional Constitution declared Iraq to be part of the " Arab nation " ; proclaimed Islam as the State religion , and said that the Council of Ministers would be the supreme legislative and executive body pending general elections to be held in the near future. Guarantees were given of freedom of thought and expression; no discrimination was permitted against any citizen on grounds of race, religion, or language ; the independence of the judiciary was recognized ; and private military and para-military groups were banned. Other Articles stated that ownership of land would be restricted as a first step towards social and agrarian reform ; that ownership of property would be respected ; and that there would be no confiscation " except in the general interest " and against payment of equitable compensation.

Brigadier Kassem announced on the same day that the first elections for the Republican Parliament and a freely-chosen Government " would not be a long way off " ; he added that the " revolutionary phase " of the Republic had been succeeded by " a new phase of law and order."

Recognition of Republican Government.

The first country to extend diplomatic recognition to the Iraqi Republic was the United Arab Republic, which did so immediately after the revolution. By the end of July the Iraqi Republic had also been recognized by all the Communist countries, including the Soviet Union, the Soviet-bloc countries of Eastern Europe, Yugoslavia, and the Chinese People's Republic ; by a number of " uncommitted " countries, including India, Burma, Ceylon, Indonesia, Malaya, and the Sudan ; by the three Moslem members of the Baghdad Pact (Turkey, Pakistan and Persia) ; by four NATO countries (Belgium, Greece, the German Federal Republic, and Italy) ; and by Japan.

The Republican Government announced that diplomatic relations would be established with the Soviet Union and the Chinese People's Republic.

President Chamoun's Appeal to President Eisenhower for U.S. Reinforcements. - U.S. Troops land in the Lebanon. - President Eisenhower's Congress Message.

The following statement was issued by President Eisenhower on July 15 announcing that U.S. marines were being landed in the Lebanon in response to an urgent appeal from President Chamoun :

" Yesterday morning [i.e. July 14] I received from President Chamoun an urgent plea that some U.S. forces be stationed in Lebanon to help maintain security and to evidence the concern of the United States for the integrity and independence of Lebanon. President Chamoun's appeal was made with the concurrence of all the members of the Lebanese Cabinet.

" President Chamoun made clear that he considered an immediate U.S. response imperative if Lebanon's independence, already menaced from without, were to be preserved in the face of the grave developments which occurred yesterday in Baghdad, whereby the lawful Government was violently overthrown and many of its members martyred.

" In response to this appeal from the Government of Lebanon, the United States has dispatched a contingent of U.S. forces to Lebanon to protect American lives and by their presence there to encourage the Lebanese Government in defence of Lebanese sovereignty and integrity. These forces have not been sent as any act of war. They will demonstrate the concern of the United States for the independence and integrity of Lebanon, which we deem vital to the national interest and world peace. Our concern will also be shown by economic assistance. We shall act in accordance with these legitimate concerns

" The United States, this morning, will report its action to an emergency meeting of the U.N. Security Council. As the U.N. Charter recognizes, there is an inherent right of collective self-defence. In conformity with the spirit of the Charter, the United States is reporting the measures taken by it to the Security Council, making clear that these measures will be terminated as soon as the Security Council has itself taken the measures necessary to maintain international peace and security.

" The United States believes that the U.N. can and should take measures which are adequate to preserve the independence and integrity of Lebanon. It is apparent, however, that in the face of the tragic and shocking events that are occurring nearby, more will be required than the team of U.N. observers now in Lebanon. Therefore the United States will support in the U.N measures which seem to be adequate to meet the new situation and which will enable the U.S. forces promptly to be withdrawn.

" Lebanon is a small peace-loving State with which the United States has traditionally had the most friendly relations. There are in Lebanon about 2,500 Americans and we cannot, consistently with our historic relations and with the principles of the United Nations, stand idly by when Lebanon appeals for evidence of our concern, and when Lebanon may not be able to preserve internal order and defend itself against indirect aggression."

In addition, President Eisenhower sent a special message to the U.S. Congress on the same day, worded as follows :

" On July 14 I received an urgent request from the President of the Lebanon that some U.S. forces be stationed in Lebanon President Chamoun stated that without an immediate showing of U.S. support, the Government of Lebanon would be unable to survive. This request was made with the concurrence of all the members of the Lebanese Cabinet. I have replied that we would do this, and a contingent of U.S. Marines has now arrived in Lebanon. This initial dispatch of troops will be augmented as required. United States forces will be withdrawn as rapidly as circumstances permit.

" Simultaneously, I requested that an urgent meeting of the U.N. Security Council be held on July 15. At that meeting, the permanent representative of the United States reported to the Council the action which this Government has taken. He also expressed the hope that the United Nations could soon take further effective measures to meet more fully the situation in Lebanon. We will continue to support the United Nations to this end.

" U.S. forces are being sent to the Lebanon to protect American lives and by their presence to assist the Government of Lebanon in the preservation of Lebanon's territorial integrity and independence, which have been deemed vital to U.S. national interests and world peace.

"About two months ago a violent insurrection broke out in Lebanon, particularly along the border with Syria, which, with Egypt, forms the United Arab Republic. This revolt was encouraged and strongly backed by the official Cairo, Damascus, and Soviet radios, which broadcast to Lebanon in the Arabic language. The insurrection was further supported by sizeable amounts of arms, ammunition, and money and by personnel infiltrated from Syria to fight against the lawful authorities. The avowed purpose of these activities was to overthrow the legally constituted Government of Lebanon and to instal by violence a government which would subordinate the independence of Lebanon to the policies of the United Arab Republic.

" Lebanon referred this situation to the Security Council. In view of the international implications of what was occurring in Lebanon, the Security Council . . . decided to send observers into Lebanon for the purpose of ensuring that further outside assistance to the insurrection would cease. The U.N. Secretary-General subsequently undertook a mission to the area to reinforce the work of the observers.

" It was our belief that the efforts of the Secretary-General and of the U.N. observers were helpful in reducing further aid in terms of personnel and military equipment from across the frontiers of Lebanon. There was a basis for hope that the situation might be moving towards a peaceful solution, consonant with the continuing integrity of Lebanon, and that the aspect of indirect aggression from without was being brought under control.

" The situation was radically changed, however, on July 14, when there was a violent outbreak in Baghdad, in nearby Iraq. Elements of Iraq strongly sympathetic to the United Arab Republic seem to have murdered or driven from office individuals comprising the lawful Government of that country . . . We have reliable information that important Iraqi leaders have been murdered.

" We share with the Government of Lebanon the view that these events in Iraq demonstrate a ruthlessness of aggressive purpose which tiny Lebanon cannot combat without further evidence of support from other friendly nations.

"After the most detailed consideration, I have concluded that, given the developments in Iraq, the measures thus far taken by the Security Council are not sufficient to preserve the independence and integrity of Lebanon. I have considered, furthermore, the question of our responsibility to protect and safeguard American citizens in Lebanon, of whom there are about 2,500. Pending the taking of adequate measures by the United Nations, the United States will be acting pursuant to what the U.N. Charter recognizes as an inherent right—the right of all nations to work together and to seek help where necessary to preserve their independence. I repeat that we wish to withdraw our forces as soon as the U.N. has taken further effective steps designed to safeguard Lebanese independence.

"It is clear that the events which have been occurring in Lebanon represent indirect aggression from without, and that such aggression endangers the independence and integrity of Lebanon.

"It is recognized that the step now being taken may have serious consequences. I have, however, come to the considered and sober conclusion that, despite the risks involved, this action is required to support the principles of justice and international law upon which peace and a stable international order depend.

"Our Government has acted in response to an appeal for help from a small and peaceful nation which has long had ties of closest friendship with the United States. Readiness to help a friend in need is an admirable characteristic of the American people, and I am, in this message, informing Congress of the reasons why I believe that the United States could not in honour stand idly by in this hour of Lebanon's grave peril. As we act at the request of a friendly Government to help it to preserve its independence, and to preserve law and order which will protect American lives, we are acting to reaffirm and strengthen principles upon which the safety and security of the United States depend."

Landings of U.S. Marines.

In response to President Chamoun's appeal, 1,500 marines went ashore at Beirut on July 15 from warships and amphibious craft of the U.S. Sixth Fleet. Strong reinforcements followed during the next few days, and by July 20 over 10,000 American troops were stationed in the Lebanese capital and its environs. In co-operation with the Lebanese Army, detachments of U.S. marines were detailed to guard the port area of Beirut, the airfield, and other strategic points, while other units took over guard and patrol duties at the American Embassy and the residence of President Chamoun.

The landings were supported by the entire U.S. Sixth Fleet, most of whose 70 ships were concentrated in the Eastern Mediterranean; they included the 60,000-ton super-carrier *Saratoga*, the 27,000-ton carrier *Wasp*, the heavy cruiser *Des Moines* (17,000 tons), the guided-missile ship *Boston*, and 28 destroyers. About 50 of the warships were concentrated off the Lebanese coast under the overall command of Vice-Admiral James L. Holloway, who was in charge of operations.

Apart from the seaborne landings, troops and equipment were flown to the Lebanon from North Carolina, Fürstenfeldbrück (Bavaria) and Capodichino (Italy); *Lockheed, Globemaster*, and other large transport planes were used in these operations. In addition, some 5,000 American troops—including part of a "pentomic" division from Western Germany—were flown to the NATO base at Adana (southern Turkey) and placed under the command of Vice-Admiral Holloway for use in an emergency.

The U.S. landings were carried out without incident and the troops received a generally friendly reception from the population; large crowds of holiday-makers and others thronged the beaches to witness the disembarkations and there was no disturbance to the normal life of the capital. Strong protests at the landings, however, were made by the Speaker of the Lebanese Parliament (M. Adel Osseiran), by several deputies, and by M. Saeb Salam, the Opposition leader holding out in the besieged Basta quarter of Beirut (see 16293 A). M. Osseiran announced his intention of sending telegrams to President Eisenhower and Dr. Hammarskjold appealing for the immediate withdrawal of U.S. forces from the Lebanon, while M. Salam described the landings as a "crying violation" of Lebanese sovereignty and said that the Opposition would do all in its power to "repulse this aggression."

Copies of a leaflet signed by President Eisenhower were dropped in all parts of the Lebanon on July 21 by U.S. planes. The leaflet pointed out that U.S. troops had been sent to the Lebanon at the request of the established Government and to maintain the country's independence, and would be withdrawn as soon as the United Nations had taken measures to assure the independence of the Lebanon.

Mr. Murphy's Mission to the Lebanon.

It was announced in Washington on July 16 that Mr. Robert Murphy (the State Department's expert on Middle East questions) had left for the Lebanon as President Eisenhower's representative, with the task of doing everything possible "to restore peace and tranquillity to the Lebanese Government and assist President Chamoun in so doing." Mr. Murphy arrived in Beirut on July 17 and had conversations during the next few days with President Chamoun, M. Sami Solh (the Prime Minister), General Chehab (the Lebanese C.-in-C.), M. Osseiran, and Opposition leaders.

Attitude of U.N. Observation Group.

The U.N. Observation Group in the Lebanon issued a communiqué on July 16 drawing a distinction between its own functions and authority and those of the American forces which had been landed at the request of President Chamoun. It stated that as "the Observation Group alone is in the Lebanon in pursuance of the mandate contained in the Security Council's resolution of June 11, there is therefore no basis for establishing any contact or working relationship, formal or informal, between the Group and any non-Lebanese forces in the Lebanon..." It was added that the Observation Group's mandate "cannot be altered without further action by the Security Council."

King Hussein's Denunciation of Iraqi Revolt. - Appeal for Military Aid. - British Paratroops despatched to Jordan. - Jordan breaks off Relations with United Arab Republic.

In a broadcast from Amman on July 14, King Hussein of Jordan expressed deep sorrow at the "insurrection" in Baghdad, which he described as being the work of "hired elements" who were "scheming to injure the interests of the Arab nation, expose its independence and safety to danger, and spread blasphemy throughout the country"; he added that Jordan would "face this insurrection with all the means in our power."

Several meetings were held at the Royal palace during the morning, under the presidency of King Hussein; they were attended by the Prime Minister (Mr. Samir Rifai), the president of the Legislative Council of the Arab Federation (Mr. Said el-Mufti), two former Prime Ministers (Mr. Majjali and Mr. Fawzi el-Mulki), and the Jordanian Chief of Staff. It was announced after these meetings (1) that King Hussein had assumed the powers of Head of the Arab Federation in the "absence" of King Faisal, in accordance with the provisions of the Federal Constitution; and (2) that he had also assumed the duties of Commander-in-Chief of the Arab Army (i.e. the joint forces of Jordan and Iraq). On the following day it was announced that King Hussein had appointed Mr. Samir Rifai as Foreign and Defence Minister in the Jordanian Cabinet, in addition to his duties as Prime Minister.

At the time King Hussein assumed the leadership of the Arab Federation there was no definite confirmation of the assassination of King Faisal, nor was it known that the Iraqi revolution had been completely successful. The appointment of Mr. Samir Rifai as Foreign and Defence Minister was necessitated by the fact that Foreign Relations and Defence were in charge of Federal Ministers before the revolution in Iraq (see 16230 A).

In a further broadcast in the morning of July 17, King Hussein announced that he had decided to ask friendly States to send "effective military aid" to Jordan "as a temporary measure to protect our borders from surrounding enemies"; he emphasized that his decision had been taken in accordance with Article 51 of the U.N. Charter and with the unanimous approval of the Jordanian Cabinet, members of the Arab Federation in Amman, leading political personalities, and members of the Jordanian Parliament. King Hussein said that such aid would enable "this small and poor country" to strengthen its economy and permit the Jordanian Army to safeguard internal security; when this had been done, Jordan would be able to "discharge her responsibilities towards our nation and countries [an apparent reference to the Arab Federation] and, God willing, to save the Middle East from the talons of international Communism, nihilism and atheism."

An Iraqi radio station directed several broadcasts to Jordan during the day (July 17) calling on the Jordanian people to "rise in a great revolution and break their chains" as the Iraqi people had done and to "wipe out the rotten monarchy as it was wiped out in Iraq." After denouncing King Hussein for "calling in the imperialists in agreement with criminal Israel," the broadcasts said that "a revolution has started in Iraq and the Lebanon and another will start tomorrow in Jordan."

The Jordanian request for military aid had been made on the previous evening (July 16) to the British and U.S. Chargés d'Affaires in Amman, who were summoned to the Royal palace by King Hussein. In response to King Hussein's appeal, a detachment of 300 British paratroops landed at Amman in the morning of July 17, having flown from Cyprus in aircraft of R.A.F. Transport Command. The airlift was completed without incident in the afternoon of July 18, by which time 2,000 men of the 16th Independent Parachute Brigade had arrived in the Jordanian capital from Cyprus. The British troops were cordially welcomed by the population of Amman and received full co-operation from the Jordanian Army authorities.

The British airlift from Cyprus took a direct course over Israel to avoid flying over Syria or taking the lengthy route *via* Turkey and Iraq. The first phase of the airlift took nearly 18 hours longer than was planned, owing to a seven-hour gap in operations caused by an Israeli protest to Britain at the arbitrary decision to fly over Israeli territory, subsequently, however, the Government of Israel gave permission for overflying by British planes, and the airlift was completed on July 18 as stated. It was reported in British newspapers on July 31—though not officially confirmed—that the British forces in Jordan were being supplied through the port of Akaba to avoid flying over Israeli territory.

More than 50 U.S. jet fighters flew over Jordan on July 17 as a gesture of support for the British action and to cover the landings of British paratroops. On the following day U.S. *Globemasters* began a "massive airlift" of petroleum products from Bahrain to Jordan, whose oil shipments had been cut off owing to the closing of the Iraqi and Lebanese frontiers. A U.S. gift of $7,500,000 (about £2,600,000) to Jordan was announced on July 20, additional to the considerable sums previously made available by the U.S. Government for economic aid.

In a statement on July 17 to the British House of Commons, Mr. Macmillan emphasized that the Jordanian request for British military aid was made under Article 51 of the U.N. Charter, covering the right of collective self-defence, and had been approved by King Hussein and the Jordanian Government. Both the King and his Prime Minister (Mr. Rifai) had stated that Jordan's territorial integrity was threatened by the movement of Syrian forces across her northern frontier and by infiltration of arms, and the British action was intended to help Jordan to maintain her independence. [The debates in the House of Commons on the despatch of British troops to Jordan and the Middle East crisis generally will be reported in later issues—Ed. *K.C.A.*].

The U.S. State Department expressed full support for Britain's action in Jordan, emphasizing that it had been taken under Article 51 of the U.N. Charter and in response to an appeal by King Hussein and his Government.

Jordanian Complaint to Security Council against United Arab Republic. - Relations broken with U.A.R.

The Jordanian Government complained to the Security Council on July 17 of interference by the United Arab Republic in Jordan's internal affairs, and asked that the complaint should be dealt with as a matter of urgency. On July 20 Jordan severed diplomatic relations with the U.A.R. in protest at the latter's recognition of the Republican Government in Iraq.

At a press conference on the same day (July 20) King Hussein said that it was now known that the entire Hashemite Royal family in Iraq had been murdered, including his cousin King Faisal and the Crown Prince Abdul Ilah. Speaking with emotion, he expressed his determination to do all in his power to "restore order, peace, and lawful conditions in the Iraqi part of the [Arab] Union" and to continue the task of "liberating Arab nationalism from foreign domination." He expressed his conviction that the events in Iraq had been instigated and engineered by "subversive elements of certain Arab States which are dominated by international Communism"; these elements had also threatened the independence and integrity of Jordan during the past few days, and to defeat them he had appealed for aid from friendly countries. The despatch of British forces in response to his appeal had added greatly to Jordan's self-confidence and would help her to maintain her independence against external subversion.

Murder of Jordanian Ministers in Baghdad.

It was announced in Amman on July 23 that two of the three Jordanian Ministers in the Cabinet of the Arab Union—Mr. Ibrahim Hashem and Mr. Suleiman Toukan—had been murdered by the Baghdad mob on July 14; the third Jordanian Minister (Mr. Khaloussi el-Khairy) had received serious injuries and was in a Baghdad hospital.

Mr. Ibrahim Hashem (80) was a leading political figure in Jordan for many years, and Prime Minister on several occasions; he was a signatory of the 1946 treaty between Britain and Transjordan which created the independent Kingdom of Jordan. On the creation of the Arab Federation he became Deputy Premier of the Union Cabinet headed by General Nuri es-Said.

Mr. Suleiman Toukan (a former mayor of Nablus) was also a prominent personality in Jordanian political life, and became Military Governor of Jordan in April, 1957, when King Hussein imposed martial law after the Zerqa incident (see 15561 A). He was Defence Minister in the Union Cabinet.

[As stated above, the killing of Mr. Hashem and Mr. Toukan had been witnessed by General Shareh, who himself narrowly escaped death at the hands of the mob.]

Infiltrations into Jordan from Syria.

Some 15 persons, alleged to be infiltrators from Syria, were arrested on the Jordanian-Syrian border during the last few days of July and held for interrogation; the Jordanian authorities seized a number of rifles, automatic weapons, and explosives in the possession of the persons apprehended. A military spokesman in Amman said that preliminary investigations had disclosed "clear intervention by the authorities of the Syrian Army . . . with the intention of creating disorders in the Hashemite Kingdom of Jordan."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - U.S. Information Service)

(Prev. rep. Lebanese Crisis, 16239 A.)

Note. Further developments in the Middle East crisis will be given in later issues. They will include international reactions to the despatch of American troops to the Lebanon and of British troops to Jordan; the debates in the U.N. Security Council on the Middle East situation; the proposals for a "summit" conference on the Middle East between President Eisenhower, Mr. Macmillan, M. Khrushchev, General de Gaulle, and Mr. Nehru; and the debates in the British House of Commons on the Middle East crisis.

A. CEYLON. — Policy on Private Foreign Investment. - No Nationalization for next Ten Years.

The Government of Ceylon issued a statement on May 21 announcing that, in order to encourage new foreign private investment in the country, it had been decided to give an assurance (i) that any such investment would not be nationalized for the next 10 years; (ii) that the eventual repatriation of capital (including appreciation) and the remittance of dividends would be permitted.

The statement said that it was the Government's policy to welcome private foreign investment in fields which would strengthen the country's economy, and that it would approve such investment where: (1) local capital had not already effectively established itself or was not likely to do so in the near future; (2) there was collaboration with local private enterprise, although such collaboration could be dispensed with if local enterprise was not forthcoming or if a foreign private enterprise undertook the manufacture of products for export under a trade-name of wide range, (3) there would be progressive domestic manufacture designed ultimately to eliminate all imports to the utmost practicable extent.

It was the Government's policy (the statement added) to provide incentives and concessions for new industries and expansion of existing ones, such as "tax holidays," tariff protection, and depreciation allowances. In addition, any approved foreign investment would be accorded the same treatment with regard to concessions and protection as was given to domestic private enterprise by the Customs tariffs and under the Industrial Products Act, which protects indigenous industries. (Ceylon Government Information Department)

B. PAKISTAN. — Election Date fixed for 1959.

At a conference in Karachi on July 19, called by the Prime Minister (Mr. Firoz Khan Noon) and attended by leaders of all political parties except the Moslem League, it was decided that November 1958, which had previously been envisaged as the date for the first general elections in Pakistan, would be an inconvenient month for the people of East Pakistan to go to the polls because it was harvesting-time. It was accordingly decided that the elections should be completed by Feb. 15, 1959. The Moslem League, after first accepting the Prime Minister's invitation, withdrew at the last moment and boycotted the conference on the ground that it would not be party to a meeting which had accepted the system of joint electorates.

It was announced in May that nearly 40,000,000 voters—approximately 50 per cent of the total population—had been registered on the draft electoral rolls for the general elections to the National and Provincial Assemblies; about 20,000,000 of the voters were in East Pakistan, 700,000 in Karachi, and the remainder in West Pakistan.

Mr. Noon had previously informed the National Assembly on Jan. 5 that all steps had been taken to hold the elections throughout the country under the joint electorate system. Replying to a question, he said that the electoral registers would not show the religion of individual electors.

C. MOROCCO. — Creation of Motor Industry.

It was announced in Rabat on July 3 that the Moroccan Government had concluded an agreement with the Simca (French) and Fiat (Italian) companies for the setting-up of a motor industry in Morocco. Under the agreement, the building of a factory will start before Oct. 1, 1958, and the undertaking will be run by a company in which the Moroccan Government will take up 40 per cent of the shares and Simca and Fiat another 40 per cent; the remaining 20 per cent will be open to subscription by private Moroccan interests.
(Le Monde, Paris)

A. AUSTRIA - SOVIET UNION. — Dr. Raab's Visit to Moscow. - Soviet Government concedes Halving of Austrian Oil Supplies to U.S.S.R.

The Austrian Federal Chancellor (Dr. Raab), accompanied by the Vice-Chancellor (Herr Bruno Pittermann) and the Minister of Foreign Affairs (Dr. Figl), arrived in Moscow on an official visit to the Soviet Union on July 21. During their visit the Austrian delegation had a series of discussions with M. Khrushchev, M. Mikoyan (First Deputy Premier), and M. Kosygin (Deputy Premier); they also visited industrial undertakings and scientific and cultural establishments, inspected the Soviet Nuclear Research Institute at Dubna, and attended a reception at the Kremlin. They also paid a visit to Leningrad before leaving Moscow for Vienna on July 28.

A joint communiqué issued on July 24 stated that the talks had been held in "a spirit of friendship and cordiality" and that the leaders of both countries had noted "with satisfaction" that "good relations" had developed between the U.S.S.R. and Austria since the conclusion of the Austrian State Treaty in 1955. The communiqué went on to announce the following results of the talks:

Austrian Oil Deliveries to U.S.S.R. At the request of the Austrian delegation and "in view of the existing amicable relations between the two countries," the Soviet Government had agreed to a 50 per cent reduction of the Austrian oil deliveries of 7,000,000 tons still outstanding under the State Treaty of 1955. [The Treaty provided for the delivery of 10,000,000 tons of Austrian oil to the U.S.S.R., at the rate of 1,000,000 tons a year, in compensation for the handing back to Austria of the Austrian oilfields and refineries seized by the Soviet Union after the liberation of Austria.] "Bearing in mind, however, the long-term commitments of the Soviet Union regarding deliveries of Austrian oil to third countries," both sides had agreed that the U.S.S.R. would deliver 3,500,000 tons of Soviet oil to Austria from Jan. 1, 1959, at a rate of 500,000 tons a year, to compensate for half the annual delivery of 1,000,000 tons of oil by Austria to the Soviet Union. The communiqué added that the oil to be delivered by the Soviet Union would be of standard specifications, that deliveries would be either free to the Austrian frontier or c.i.f. to Austrian Danube ports, and that they would be distributed uniformly over the year. The appropriate agencies in both countries had been instructed to reach an agreement not later than Oct. 1 on the practical implementation of this arrangement.

Austrian Compensatory Deliveries to U.S.S.R. After stating that the agreement on Austrian deliveries of goods to the U.S.S.R. in compensation for the former German industrial property handed over to Austria had been "scrupulously carried out by both sides," the communiqué said that, "in accordance with the Austrian delegation's wishes," the Soviet Government had expressed its readiness to accept other commodities instead of the annual 200,000 tons of oil provided for in that agreement for delivery in the fifth and sixth years. Detailed arrangements on the items to be substituted would be concluded between the two countries.

Trade Relations. Both sides agreed that Austrian-Soviet economic relations could be regarded as "satisfactory," but that "efforts to expand the volume of goods within the framework of the existing agreement should be extended." The Soviet Union had expressed its willingness to increase its imports from Austria of semi-finished and finished industrial goods, while Austria would make efforts to increase her imports of raw materials and other goods from the U.S.S.R. Furthermore, Austria would take "the necessary organizational and technical measures within the framework of her existing legislation to facilitate higher sales of finished and semi-finished products imported from the Soviet Union."

Danube Regime. The Austrian delegation had stated that Austria intended to join the Danube Convention concluded in Belgrade in 1948.

Consular Convention. - Property and Financial Claims. A consular convention between the U.S.S.R. and Austria would be signed later in the year. It had also been agreed that final negotiations should be held in Moscow in November on the question of property and financial claims.

Austrian Prisoners in the U.S.S.R. In reply to Austrian inquiries about the repatriation from the U.S.S.R. of Austrian or former Austrian subjects, the Soviet Ministers had declared that "the repatriation of Austrian nationals from the U.S.S.R. had been concluded." As regards former Austrian subjects and members of their families living in the U.S.S.R., as well as individual Austrians on whom additional information might be supplied by the Austrian authorities, the Soviet Government would "favourably consider" any voluntary request for the repatriation of these persons. Conversely, the Austrian authorities would facilitate the voluntary return to the U.S.S.R. of Soviet citizens (or former Soviet citizens) and members of their families now living in Austria.

International Relations. (1) The Austrian Ministers had stated "that the Austrian Government would, as hitherto, develop friendly relations with all countries and would co-operate to the best of its ability in efforts to consolidate peace." (2) The Soviet Ministers had expressed "the Soviet Union's determination to promote the relaxation of tension in the Middle East," whilst the Austrian delegation, in turn, had expressed its "deep interest" in such a relaxation of tension. (3) Both sides had "expressed confidence that the principles of peaceful co-existence among States" accepted by the 12th Session of the U.N. General Assembly represented "a solid foundation for the development of friendly relations between States and the consolidation of international peace and security." (4) The Austrian Ministers had "expressed concern for the maintenance of good relations with Austria's neighbours." (5) The Soviet leaders had informed the Austrian Ministers about Soviet steps to ease international tension and to eliminate the danger of a nuclear war, and the Austrian Ministers had welcomed such steps.

In conclusion, it was announced that President Voroshilov would invite President Schärf to pay an official visit to the Soviet Union, and that M. Khrushchev had accepted an invitation to visit Austria.

It had previously been announced in Vienna that the whole quota for the third year of the compensation agreement, to a value of $25,000,000, would be fulfilled in the form of deliveries of goods by July 26 - thus completing one-half of the total amount of $150,000,000 which Austria had undertaken to supply to the Soviet Union under this agreement. The third annual quota of oil deliveries (1,000,000 tons) would also be completed in time.

In a press statement before leaving Vienna, Dr. Raab explained that the annual deliveries of goods and oil to the Soviet Union, totalling some 1,100,000,000 schillings, were "obviously a burden on the Austrian budget." He announced that the Soviet Government would be asked whether, "in view of the punctuality with which the deliveries have been made during the past three years, it might not be possible to alter the reparations agreement in the sense of substantially reducing it." Dr. Raab also pointed out that crude oil production in Austria had shown a tendency to fall, and recalled that it had been agreed in 1955 that in such a case the question of oil deliveries could be reviewed. Whereas Austrian crude oil production was 3,660,000 tons in 1955, it had fallen to 3,186,000 tons in 1957 and was expected to fall below the 3,000,000-ton mark in 1958. (Soviet Embassy Press Department, London - Wiener Zeitung - Times) **(Prev. rep. Compensation and Oil Agreements, 14532 A; M. Mikoyan's Visit to Austria, 15552 A; Austro-Soviet Trade Agreement, 15963 A.)**

B. BRAZIL - COLOMBIA. — "Coffee Declaration." - Economic, Cultural, and Air Agreements.

The Brazilian Minister of Foreign Affairs, Dr. de Macedo Soares, visited Bogotá on May 25-28 for discussions with the Colombian Foreign Minister, Dr. de Santamaria. The two Ministers signed a joint declaration on coffee policy the *Declaración de Bogotá* - as well as an economic and technical agreement, a cultural agreement, an air traffic convention, and an agreement covering an aerial photographic survey of large inaccessible areas on the Brazilian-Colombian frontier.

The *Declaración de Bogotá* stated that Brazil and Colombia had ratified all their international obligations in connexion with the policy of maintaining stable coffee prices and controlling coffee exports; that both countries had agreed on mutual assistance in matters relating to coffee; and that, following an international coffee conference held in Rio de Janeiro in January 1958, the two countries would fully support the International Coffee Organization set up at that conference.

The economic and technical agreement provided for a joint commission to develop commercial relations between the two countries and to study development possibilities for their frontier regions, taking into account their joint interest in the Amazon Basin and the possibility of developing river transport in that area.

Under the cultural agreement Brazil and Colombia undertook to promote the study of each other's language, literature, history, and geography in their schools. The air agreement authorized the establishment of air services between the two countries.—(Bank of London and South America)

(Prev. rep. Coffee Prices and Exports, 15881 C.)

C. YEMEN. — Soviet Arms Supplies.

The Crown Prince of the Yemen (Prince Seif el-Islam el-Badr), in a speech to the armed forces on July 2, announced that the Yemen had received and was still receiving arms from the Soviet Union. This was the first time that the purchase of Soviet arms had been officially announced in the Yemen; no details of the arms supplies were given.

It had previously been reported from Aden on April 16 that Soviet engineers would shortly begin the construction of a commercial port for the Yemen at Mina el-Hamadani, and that new installations were planned at Hodeida to make that port suitable as a naval and submarine base. (Le Monde - Times)

A. CANADA - UNITED STATES. — St. Lawrence Seaway and Power Project. - Inauguration of Barnhart Island Power Station and Wiley-Dondero Ship Channel.

A major stage in the construction of the St. Lawrence Seaway and Power Project was reached on July 1 with the blowing-up of a temporary coffer dam which had been erected to divert the northern channel of the river during the building of a hydro-electric station on Barnhart Island, in the International Rapids section of the St. Lawrence River. The demolition of the coffer dam allowed the river to resume its former course down to a new permanent control dam at the power station ; by means of this control dam an area about 35 miles long and from one to four miles wide was inundated to form an artificial lake to serve as a headpool for the hydro-electric plant.

The new power station on Barnhart Island (through which the International Boundary line runs) will ultimately have a capacity of 1,640,000 kilowatts, or 2,100,000 horse-power, and will be exceeded in output only by the power station at Grand Coulee, U.S.A. It will be equipped with 32 generators, 16 owned by the Hydro-Electric Power Commission of Ontario and 16 by the New York State Power Authority. Power generated by the station will be distributed throughout the Province of Ontario and the State of New York ; it was expected that four generators—two Canadian and two U.S.—would be operating before the end of July, and full generating capacity reached by late 1960.

The creation of an artificial lake—by allowing the St. Lawrence to inundate about 28,000 acres on the Canadian side of the International Boundary line and 10,000 on the U.S. side—involved the re-location of seven small towns and villages, the diversion of a short section of the Canadian National Railway main line from Montreal to Toronto, and the construction of a new length of highway. The total cost of the Barnhart Island power scheme, including the hydro-electric plant itself, the coffer and permanent control dams, and the re-location of townships, railway, and roads, was expected to reach $660,000,000 (£230,000,000) by the time full output was achieved. Half of this amount will be borne by the Hydro-Electric Power Commission of Ontario and half by the New York State Power Authority.

A few hours after the demolition of the coffer dam on July 1 the first water was admitted to the newly-built Eisenhower and Snell locks, standing respectively at the eastern and western ends of the new Wiley-Dondero Ship Channel. This channel—on the American side of the International Boundary line, and dredged in the river to the south of Barnhart Island—will allow ships to by-pass the power station and its dam and to navigate in smooth water from one part of the International Rapids section to the other. Previously, a large lock had also been constructed on the Canadian side at Iroquois, at the eastern end of the International Rapids section ; four other locks are at present under construction by the Canadian Seaway Authority. These seven locks will replace a series of 21 smaller locks between Montreal and Lake Ontario, and will be able to handle ships 730 ft. in length, 75 ft. in breadth, and drawing up to 27 ft.

Other major works already carried out in connexion with the Seaway project include (*a*) the raising of the central span of the Jacques Cartier Bridge, Montreal—a major highway between the city and the South Shore—so as to give a clearance of 120 ft. for ships using the Seaway ; (*b*) the construction of a highway tunnel under the Seaway at Melocheville, Quebec.

All the seven new locks are expected to be in operation and the river channel deepened before the opening of navigation for the 1959 season, thus providing access to the heart of the North American continent for ocean-going and other ships with a draught of up to 27 ft. It is intended that the Seaway shall be formally opened by H.M. the Queen in April 1959.
(Montreal Star - New York Times - Department of External Affairs, Ottawa - Lloyd's List and Shipping Gazette)
(Prev. rep. 13740 B.)

Note. Navigation from Lake Ontario to Montreal has for many years been possible for smaller ships (the so-called "canallers," of 250 ft. maximum length), into which large "lakers" trans-ship grain and other bulk cargoes at Prescott (Ontario) for re-trans-shipment into ocean-going ships at Montreal. In addition, a considerable trade between Europe and Great Lakes ports is carried in small ocean-going ships without trans-shipment ; this trade, pioneered by the Norwegian *Fjell* line in 1933, and shared by Dutch, Swedish, French, German, and other interests since 1945, exceeded 800,000 tons in 1957. (Ed. K.C.A.).

B. BELGIUM - SOVIET UNION. — Direct Air Service between Brussels and Moscow.

A civil aviation agreement between Belgium and the Soviet Union was signed in Moscow on June 5, providing for the immediate opening of a direct air service between Moscow and Brussels. (Soviet Embassy Press Department, London)
(Prev. rep. 16266 B.)

C. SOVIET UNION - UNITED STATES. — U.S. Transport Plane shot down over Armenia. - Release of American Airmen.

The Soviet Government presented a Note to the U.S. Ambassador in Moscow on June 28 protesting at what was described as "a premeditated violation of the State frontiers of the U.S.S.R. by an American military plane" on the previous day, and stating that the crew of nine had been taken into custody.

It was stated that a U.S. aircraft had penetrated Soviet airspace south of Erevan (Armenia) to a depth of 105 miles ; that it had disregarded signals by two Soviet fighters to land ; and that the machine had accordingly been "compelled to land" about 150 miles inside Soviet territory, where it had "burned up."

The U.S. Government sent a Note to the Soviet Government on the following day demanding the immediate return of the U.S. airmen, and pointing out that the aircraft had lost its way on a routine flight from Turkey to Persia.

The U.S. Defence Department explained that the machine, an unarmed transport plane, was on a regular bi-monthly flight carrying cargo destined for U.S. diplomatic and military missions in Persia and Pakistan. Owing to bad weather and the high mountains along the route, the plane had presumably gone off course and there was thus "no basis whatsoever for the Soviet charge of deliberate violation of airspace."

The nine airmen were released by the Soviet authorities on July 7, when they were handed over to U.S. Army representatives at Astara, on the Soviet-Persian border. They were flown to Wiesbaden (Germany), where U.S. Air Force H.Q. announced that the plane had been shot down by Soviet fighters after inadvertently crossing the Soviet frontier owing to "a combination of extensive thunderstorms, instrument-flying conditions, and high winds."

In a press statement at Wiesbaden, two of the repatriated airmen stated that their machine had been attacked and set on fire by two Soviet Mig fighters while flying at 15,000 feet. Five of the crew had baled out and landed without serious injury, while the others had crash-landed on an airstrip ; the burning plane had exploded on the ground shortly after its crew reached safety. The airmen had been manhandled and beaten by Armenian peasants, and one of them had actually been threatened with hanging. Once in the hands of Soviet troops, however, they had been well treated.

A U.S. demand for the punishment of the Russian airmen responsible for shooting down the transport plane was rejected by the Soviet Government on July 21 as "groundless and irrelevant" ; the allegation that the airmen had been ill-treated by the local population was described as "devoid of all foundation."—(New York Times - New York Herald Tribune - Soviet Embassy Press Department, London)

D. AUSTRALIA. — Increase in Basic Wage.

After hearings which had opened on Feb. 17, the Australian Arbitration Commission decided on May 12, by a two-to-one majority, to increase the weekly basic wage for male workers (at present averaging £A12. 16s.) by 5s., and for female workers by 3s. 9d.

The trade unions had applied for (*a*) an overall wage increase of 10s. a week for male workers, and (*b*) a restoration of the automatic cost-of-living increases, which would have meant roughly another 10s. The Commission rejected the latter claim, but found that a general increase in the basic wage was justified by the state of the Australian economy. The two judges who delivered the majority decision considered that the wage increase should be limited to 5s. because of serious losses through drought, the fall in the price of wool and other exports, and the need to give rural industries a respite from significant rises in costs. The third member believed that a substantially higher increase might have been safely granted.

The decision brought the Federal weekly basic wage for each capital city to £A13. 8s. in Sydney ; £A13 in Melbourne ; £A12. 3s. in Brisbane ; £A12. 16s. in Adelaide ; £A13. 1s. in Perth ; and £A13. 7s. in Hobart.

About 1,350,000 workers will benefit from the award. (Australian News and Information Bureau) **(14891 B.)**

E. NORTH KOREA. — Trade and Economic Aid Agreements with Soviet Union.

An agreement on trade exchanges and economic co-operation during the years 1959-65 was concluded on May 15 between the Soviet Union and the Korean Democratic People's Republic, following talks in Moscow between Soviet and North Korean delegations. It was agreed (1) that the Soviet Union would supply North Korea with ferrous and non-ferrous metals, machinery, cables, oil products, cotton, and various manufactured goods ; (2) that North Korea would export to the Soviet Union non-ferrous metals, graded steel, pig iron, silks, etc. ; and (3) that the U.S.S.R. would extend technical aid to North Korea for the construction and enlargement of industrial enterprises. (Soviet Embassy Press Dept., London)

A. FINLAND - SOVIET UNION. — President Kekkonen's Visit to the U.S.S.R. - Preliminary Agreement on Soviet Loan to Finland. - Negotiations on Finnish Use of Saimaa Canal. - Proposal for Joint Industrial Projects.

President Kekkonen of Finland arrived in Moscow on May 22 on an official visit to the Soviet Union. He was accompanied by M. Hynninen (the Finnish Foreign Minister), M. Kivekäs (Minister of Commerce and Industry), M. Antikainen (Minister of Communications and Public Works), and several members of the Finnish Parliament representing the principal political parties except the Conservatives.

During their stay in Moscow (May 22-23 and May 29-30) President Kekkonen and his Ministers had a series of discussions with President Voroshilov, M. Khrushchev, M. Mikoyan and M. Kozlov (First Deputy Premiers), M. Gromyko (Foreign Minister), M. Kabanov (Minister of Foreign Trade), and M. Kirichenko, a member of the Presidium of the Supreme Soviet. They also attended a State banquet given by President Voroshilov and a Soviet-Finnish friendship meeting in the Kremlin, while President Kekkonen received the honorary degree of doctor of laws at Moscow University. From May 24-28 the Finnish President and Ministers visited Leningrad, Sverdlovsk, and Tashkent (Uzbekistan), returning to Moscow on May 29 for the final discussions.

A joint communiqué was issued in Moscow on May 30 stating that the talks had been held in "an atmosphere of friendship and sincerity," and that "the heads of the two States had recorded to their mutual satisfaction that exceptionally good and genuine neighbourly relations exist between the Soviet Union and Finland." The communiqué added :

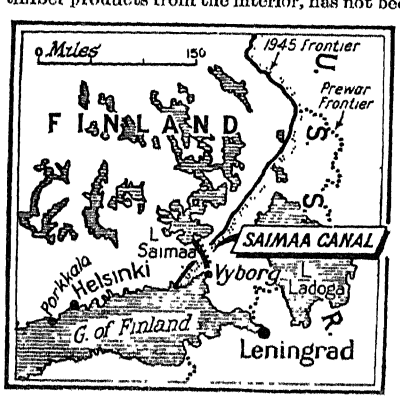
"From the favourable experience they have acquired, the two countries have reached the conclusion that the Soviet Union and Finland, in spite of differing political, economic, and social systems, can live very well side by side in conditions of businesslike and mutually beneficial co-operation and good understanding, based on mutual respect" Recalling the Soviet-Finnish friendship treaty of 1948 and its extension for a further 20 years in 1955, it said : "This treaty is of considerable importance for strengthening peace in Northern Europe, and is an important factor ensuring Finland's security and the inviolability of the Soviet Union's north-western frontiers."

After referring to the Soviet-Finnish communiqués of Feb. 2 and June 12, 1957, as the continued basis of Soviet-Finnish relations, the communiqué dealt with the following questions :

Economic Relations. In view of the "positive experience" resulting from the Soviet-Finnish trade agreements for 1951-55 and 1956-60, both sides had agreed to conclude a new agreement for the years 1961-65 and to start preliminary talks on this matter.

The Finnish representatives had asked for a long-term loan of 400,000,000 to 500,000,000 roubles, to be used "for the further increase of the productivity of the Finnish economy and for ensuring employment," and to be given in the form of goods necessary for achieving this aim. The Soviet representatives had agreed to this in principle, and talks on the subject would be started after the Finnish Government had drawn up concrete proposals. [There had been a growing imbalance in Soviet-Finnish trade in the U.S.S.R.'s favour, resulting in the accumulation of large rouble balances by Finland.]

The Saimaa Canal. Finland had raised the question of her use of the Saimaa Canal, which links Lake Saimaa with the Gulf of Finland. [This canal, formerly an outlet for Finnish timber and timber products from the interior, has not been used since the U.S.S.R. annexed the Vyborg area, including half the length of the canal, after the Finnish-Soviet War.] The communiqué declared that "taking into consideration the friendly and good-neighbourly relations between the two countries, and also the economic importance of this canal to Finland," the U.S.S.R. had expressed its readiness to conclude a 50-year agreement on the Finnish use of the canal for transit shipping, "on advantageous terms for Finland." Each side would put into good repair at its own expense, and keep in proper order, that part of the canal running through its territory. Talks would begin as soon as possible on (1) an agreement granting Finland the right of free transit through the Saimaa Canal; (2) another agreement between a Soviet economic organization and the appropriate Finnish body on the leasing to the Finnish agency of land for the trans-shipment and storage of cargoes in the port of Vysotsk (Uuras).



(*Economist*)

International Relations. Soviet-Finnish relations, "based on mutual respect, confidence, and understanding," were implementing the principles of peaceful and good neighbourly relations among States laid down in the resolution approved by the 12th Session of the U.N. General Assembly. Both countries were convinced that the peaceful co-existence of States, irrespective of their social systems, constituted a sound foundation for the general development of friendly international relations in the interests of international peace and security. Both sides, moreover, were agreed that Finland had made a "valuable contribution to the improvement of international mutual understanding" by its policy of neutrality.

Disarmament. It was recalled that Finland had given "positive support" to the Soviet Union's suspension of nuclear tests, both sides being agreed on the need for the immediate and universal ending of such tests. They had also recorded their support for the creation in Central Europe of a zone free from nuclear and rocket weapons.

United Nations. The communiqué called for the admission of the Chinese People's Republic to the U.N. "in implementation of the principle of universality of this organization."

Northern Europe. In accordance with her policy of neutrality, Finland was "consistently seeking to help in eliminating antagonisms in international life, and supported everything conducive to concord and *rapprochement*." She was observing these principles in her co-operation with other Nordic countries.

"The Soviet side" [the communiqué added] "declared that it, too, was seeking to promote friendly relations and mutual understanding with the other Nordic countries, and . . . expressed its readiness to consider in a most favourable spirit any proposals aimed at strengthening peace in Northern Europe." The Finnish side had expressed appreciation of this statement.

Cultural and Sports Relations. Both sides had expressed satisfaction at the "positive results" achieved in these spheres.

A number of other matters of mutual interest were discussed between the two countries, both during President Kekkonen's visit and after his return to Helsinki.

Employment of Finnish Workers on Soviet Building Schemes.

During the Moscow discussions President Kekkonen had suggested the employment of Finnish workers on building schemes in the Soviet Union in order to help relieve the growing unemployment problem in Finland. It was announced in Helsinki on July 3 that the Soviet Ambassador had informed President Kekkonen of the Soviet Government's willingness to entrust to Finnish firms the building, under contract, of a new electric power station in the Murmansk area near the Soviet-Finnish frontier. The project would employ about 2,200 Finnish workers and a corresponding technical staff.

Soviet Proposal for Construction of Finnish Metallurgical Plant with Soviet Equipment.

At a luncheon given by M. Khrushchev to President Kekkonen on May 23, the Soviet Prime Minister suggested that the U.S.S.R. could supply Finland with equipment to build an iron and steel plant and to develop other industries as a contribution towards easing Finnish unemployment. M. Khrushchev added : "We are prepared to examine concrete proposals in order to do everything possible in this respect, in conformity with your conditions. . . . In order to solve the Finnish unemployment problem an agreement could be concluded, for example, on the construction in Finland of a metallurgical plant by Finnish labour, according to Soviet blueprints and with our equipment."

Finnish Prisoners of War in the U.S.S.R.

The Finnish Foreign Ministry announced on June 6 that during the visit of President Kekkonen and the Finnish Ministers to the U.S.S.R., M. Hynninen had informed M. Gromyko that many people in Finland hoped that the Soviet authorities would carry out further investigations into the fate of Finnish citizens who had disappeared during the war. The Soviet representatives had stated, however, that all Finnish prisoners-of-war had already been repatriated, and that the Soviet Government therefore considered the question as closed. Nevertheless, the Soviet authorities would be willing to repatriate any Finnish nationals who, on the basis of information supplied by the Finnish Government, were found to be still in Soviet territory.

Soviet Purchases of Finnish Butter.

Following the restrictions applied by Britain to Finnish butter exports (see 16264 A), the Soviet Government announced during the Moscow talks that it was willing in principle to buy 12,000 tons of Finnish butter, subject to further negotiations on price. As a result of subsequent talks, agreement was reached on June 27 under which Finland would supply to the Soviet Union 6,000 metric tons of butter in 1958 and another 6,000 tons in 1959, and would receive in exchange some 100,000 tons of wheat, equivalent to about one-quarter of all foreign grain imported into Finland annually. The rate of exchange was fixed at one kilogram of butter for eight kilograms of wheat, making the butter price about 160 Finmarks per kilogram

—roughly the same as Britain is paying for Finnish butter. The Soviet Union agreed that Finland might re-sell part of the wheat supplies to third countries.

Trade Agreements between Finnish and Soviet Industries.

It was announced in Helsinki on June 25 that negotiations in Leningrad between Finnish industrialists and representatives of Leningrad enterprises had resulted in an agreement whereby the Finnish firms would export sewing machines, furniture, textiles, and plastic goods to Leningrad, whilst the Soviet enterprises would send motor bicycles, skates, cameras, microscopes, and medical instruments to the Finnish firms concerned. The total value of these exchanges would be about 20,000,000 Finnish marks.—(Ministry of External Affairs, Helsinki - Soviet Embassy Press Department, London)

(Prev. rep. 15116 A ; 15385 A.)

A. UNITED KINGDOM. — Life Peerages.

The first list of life peers created under the Life Peerages Act was issued in the *London Gazette* on July 24, comprising four baronesses—the first women members of the House of Lords—and ten barons, as follows :

Baronesses.

Dame Katharine Elliot (54). Widow of Mr. Walter Elliot, lately Conservative M.P. for Kelvingrove (Glasgow) and a former Minister of Health, Minister of Agriculture, and Secretary of State for Scotland. Dame Katharine is a leading figure in the Conservative Party and was chairman of the National Union of Conservative Associations in 1957. She unsuccessfully fought Kelvingrove after her husband's death (see 16068 E)

Mary Irene, Baroness Ravensdale (62). Elder daughter of the late Lord Curzon and a baroness in her own right. Vice-president of the National Association of Girls' Clubs and Mixed Clubs, and chairman of the Highway Clubs of East London.

Stella, Marchioness of Reading. Chairman and founder of the Women's Voluntary Services for Civil Defence. Widow of the first Lord Reading.

Mrs. Barbara Wootton (60) Lately Professor of Social Studies, University of London, and Nuffield Research Fellow, Bedford College. A former Governor of the B.B.C. Author of works on economics, and a well-known broadcaster.

Barons.

Sir Robert Boothby (57). Conservative M.P. for East Aberdeenshire since 1924. P.P.S. to Sir Winston Churchill, 1926-29, and Parliamentary Secretary, Ministry of Food, 1940-41. Lately delegate to the Consultative Assembly of the Council of Europe. One of the best-known Conservative broadcasters.

Mr. Victor Collins (55). Labour M.P. for Taunton, 1945-50, and for Shoreditch and Finsbury since 1954. President of the Employers' Federation of Cane and Willow-Workers' Associations since 1932.

Sir Ian Fraser (60). Conservative M.P. for Morecambe and Lonsdale since 1950, and for Lonsdale from 1940-50. President of the British Legion for 11 years, and chairman of St. Dunstan's since 1921. He was blinded in the First World War, and was called to the Bar in 1932

Sir Charles Geddes (61). Lately general secretary, Union of Post Office Workers, now part-time member of the London Transport Executive and the Electricity Generating Board. Member of the General Council of the T.U.C., and former president. Began life as a messenger-boy in the Post Office.

Mr. Victor Ferrier Noel-Paton (58). A prominent member of the Church of Scotland, a member of committees of the General Assembly of the Church of Scotland, and chairman of the Layman's Appeal to Industry for Church Extension.

Mr. Edward Shackleton (47). Son of the famous Antarctic explorer. Formerly Labour M.P. for Preston (1946-50) and for Preston South (1950-55) Has been a member of Oxford University expeditions to Sarawak and Ellesmere Land.

Sir John Stopford (70) Lately Vice-Chancellor of Manchester University, and Emeritus Professor of Experimental Neurology.

Dr. Stephen Taylor (47). Labour M.P. for Barnet, 1945-50. Member of Harlow New Town Corporation, and medical director of the Harlow Industrial Health Service.

Sir Edward Twining (58). Lately Governor of Tanganyika.

Mr. Daniel Granville West (54). Labour M.P. for Pontypool since 1946. A solicitor.

The conferment of life peerages on Mrs. Barbara Wootton, Mr. Victor Collins, Sir Charles Geddes, Mr. Edward Shackleton, Dr. Stephen Taylor, and Mr. Granville West (all members of the Labour Party) was recommended by the Prime Minister after consultation with the Leader of the Opposition, Mr Gaitskell. The new life peers will not take their seats until the opening of the new session of Parliament in November.

Four by-elections will be caused by the elevation to the peerage of Sir Robert Boothby, Mr. Collins, Sir Ian Fraser, and Mr. West at East Aberdeenshire, Morecambe and Lonsdale, Shoreditch and Finsbury, and Pontypool respectively.
(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Life Peerages Act, 16249 A ; 15999 A.)**

B. SOVIET UNION. — Agricultural Reforms. - Compulsory Deliveries replaced by State Purchases.

Important agricultural reforms were approved at a plenary session of the central committee of the Soviet Communist Party held on June 17-18, after an extensive speech by M. Khrushchev on the present position and future prospects of Soviet agriculture. The reforms in question were recommended by M. Khrushchev, the most important being summarized below :

(1) Beginning in 1958, compulsory deliveries of agricultural produce to the State from the collective farms would be abolished. Instead, the State would purchase agricultural produce and raw materials from the collective farms as described in (3) below.

(2) From July 1, 1958, payment in kind for work carried out on the collective farms by machine and tractor stations would be abolished, and all such work would be paid for in cash. Work already carried out between Jan. 1 and July 1, 1958, would be paid for in cash or kind at the discretion of the collective farm concerned.

(3) Plans would be laid down for State purchases of grain, potatoes, meat, milk, eggs, wool, and other agricultural and livestock produce from the collective and State farms, spread over periods of five to seven years and divided into annual procurements. If necessary, these procurements could be adjusted in view of the conditions in particular areas and the yields of different crops. It was stated that this system would enable State and collective farms to improve their productive organization; guarantee that the State would receive the necessary quantity of agricultural products; and enable collective and State farms to provide for their own needs more fully.

(4) Purchasing prices, differentiated between the various Union Republics, would be laid down for agricultural and livestock products sold to the State by the collective farms, based on average prices for the U.S.S.R. as a whole. [Such prices were laid down for grain crops, sunflower seeds, potatoes, sugar beet, raw cotton, flax fibres, hemp, livestock (cattle, sheep, pigs), poultry (chickens, ducks, geese), eggs, and wool.].

The Governments of the Union Republics were given power to revise prices of crop and livestock products from year to year, in accordance with the anticipated harvest and production estimates.—(Soviet Embassy Press Department, London)

(Prev. rep. 16038 A.)

C. PHILIPPINES. — American Economic Aid.

A joint communiqué was issued in Washington on June 20 at the conclusion of talks between President Eisenhower and President Garcia of the Philippines, who was on a visit to the United States. It stated (1) that the two Presidents had examined "the current economic problems with which the Philippine Republic is faced" ; (2) that Philippine officials had outlined a long-term programme for economic development ; and (3) that the U.S. Government would make $125,000,000 available to the Philippines to meet "the initial requirements of the Philippine programme" during the next 12 months. Of this sum, $75,000,000 would be extended by the Export-Import Bank as "a new line of credit for financing private and public development projects in the Philippines," while the Development Loan Fund would examine specific projects "to determine whether they would merit financing to the extent of an amount not exceeding $50,000,000."

The communiqué also expressed the full support of both countries for the U.N. Charter, the SEATO pact, and the U.S.-Philippine mutual defence pact. It said *inter alia* that President Eisenhower had "made it clear that . . . any armed attack against the Philippines would involve an attack . . . against the United States and would be instantly repelled."
(New York Times) **(Prev. rep. 15935 B ; 14987 A.)**

D. UNITED ARAB REPUBLIC. — Nationality Law.

A nationality law promulgated by President Nasser was issued in Cairo on July 8, with the following principal provisions : (1) all persons possessing Egyptian or Syrian nationality on Feb. 22, 1958, would be regarded as possessing Arab nationality (i.e. as nationals of the United Arab Republic) ; (2) foreign-born wives of Arab nationals would not automatically acquire Arab nationality but would have to make application for naturalization ; (3) the President of the Republic could confer Arab nationality on any foreigner who had rendered service to the cause of Arab nationalism.—(Le Monde, Paris)

E. ITALY - UNITED KINGDOM. — Atomic Co-operation Agreement in Force.

President Gronchi signed a decree on March 29 bringing into full and immediate effect the bilateral 10-year agreement with Britain for co-operation in the peaceful uses of atomic energy. The agreement could not be formally approved by the Italian Parliament because of the latter's dissolution prior to the recent general elections.—(Times) **(15950 A ; 16162 A.)**

A. CANADA - UNITED STATES. — President Eisenhower's Visit to Ottawa. - U.S.-Canadian Discussions. - President's Speech to Canadian Parliament on U.S.-Canadian Differences on Economic Policy. - Creation of Joint Defence Committee.

President Eisenhower, accompanied by Mr. Dulles, visited Ottawa on July 8-11 for discussions with the Canadian Government. The talks, in which Mr. Diefenbaker (Prime Minister) and Dr. Sidney Smith (Secretary of External Affairs) took part on the Canadian side, covered a wide range of problems, including the international situation, with particular reference to Soviet policy, the Middle East, and disarmament; defence questions; and trade and economic problems. The joint statements, issued on July 9-10, covered only some of the subjects discussed, including the following:

Creation of U.S.-Canadian Defence Committee. President Eisenhower and Mr. Diefenbaker announced on July 10 that, having "taken note of the intimate co-operation which exists between their two Governments in matters relating to Continental defence," and "in furtherance of the policies of both Governments that such matters shall be subject to civil decision and guidance," they had agreed to establish a Cabinet committee to be known as the Canadian-United States Committee on Joint Defence. This committee would consist of the Canadian Secretary of State for External Affairs (Dr. Smith), the Minister of Defence (Mr. Pearkes), and the Minister of Finance (Mr. Donald Fleming), and the U.S. Secretary of State (Mr. Dulles), the Secretary of Defence (Mr. Neil McElroy), and the Secretary of the Treasury (Mr. Robert B. Anderson). Other Ministers might participate on an *ad hoc* basis as requested.

The Committee would "consult on matters bearing upon the common defence of the North American Continent which lies within the NATO area"; would "in a supervisory capacity supplement, but not supplant, existing joint boards and committees" [i.e. (i) the Joint Defence Committee established in the early days of the last war, and (ii) a military study group and a military co-operation committee within the Defence departments of the two countries]; and would meet alternately in Washington and Ottawa. Each meeting would be presided over by the Secretary of State of the country in whose capital the meeting took place.

Safeguards against Surprise Attack. A statement issued on July 10 read as follows: "The President and the Prime Minister discussed questions concerning disarmament and, in particular, proposals for safeguards against surprise attack. This discussion reaffirmed the closeness of the views of the two Governments on a suitable approach to these questions. In particular they emphasized the great importance which both countries attach to a system of control which would cover the Arctic and related areas.

"The President and the Prime Minister exchanged views on the recent letter from Mr. Khrushchev to President Eisenhower with reference to expert examination of possible systems of supervision of control to prevent surprise attack. Although they recognized that certain aspects of Mr. Khrushchev's letter were unacceptable, they were nevertheless encouraged by certain elements of responsiveness to the earlier Western proposals on these matters.

"Mr. Diefenbaker indicated Canadian willingness to make a constructive contribution to the study of control methods, and it was agreed that experts of both countries would work together... in studying this problem."

Canadian Subsidiaries of U.S. Companies. With regard to widespread Canadian complaints that U.S. parent companies were dictating to their subsidiaries in Canada as to where to buy raw materials and to sell in foreign markets, a joint statement (July 9) said that the President and Mr. Diefenbaker had agreed that where "the laws of the two countries are not in complete harmony," final decisions on the actions of subsidiaries in Canada would in future be settled after consultation by the two Governments, rather than by the parent company alone. [Particular exception had been taken in Canada to the case of the Ford Motor Company, which was said to have refused to allow its Canadian subsidiary to consider the sale of 1,000 motor-cars to Communist China on the ground that this would not be in accordance with U.S. policies, although the sale would have been perfectly legal under Canadian regulations.]

Mr. Fleming said afterwards that it was Canada's intention that "Canadian law and Canadian law alone is to prevail over persons or corporations carrying on business in Canada."

In a speech on July 9 to a joint session of both Houses of the Canadian Parliament, President Eisenhower made an important statement on the U.S. viewpoint concerning trade and economic questions affecting the two countries.

The President started by saying in French: "Here in Canada you have demonstrated that differences in speech and manners of expression need not impair communications among a free people. So it must be among all nations of the free world. Though we may speak in different tongues and accents, that fact does not weaken our determination to work for a just and lasting peace..." After referring to Canadian-U.S. co-operation in the St. Lawrence Seaway project, to the establisment of a combined Air Defence Command for the North American Continent, and to the joint support of both countries for an inspection system to safeguard against surprise attack across the Arctic, the President continued:

"Both these developments, the Seaway and the strengthening of our common defence of the Continent, strikingly illustrate two things. The first is that change is the law of life and of relations between nations. When two great peoples such as ours, energetic and optimistic, live side by side in all the diversity that freedom offers, change is rapid and brings in its wake problems, sometimes frictions. The second lesson that I see in these common achievements in diverse fields is that by mutual respect, understanding, and good will we can find acceptable solutions to any problems which exist or may arise between us. It is important that we should remember this. Such differences as are from time to time expressed never affect the similarity of purpose which binds our two countries together...

"We share the basic belief that only under free institutions, with Government the servant and not the master, can the individual secure life, liberty, and the pursuit of happiness. We are both determined to frame and follow policies which safeguard the lives and homes of our people, their peace of mind, their material well-being, and above all their ideals. True to these ideals, both our countries are determined that the great decisions of peace and war will remain always under civilian control.

"Moreover, we both recognize a design of aggressive Communist imperialism which threatens every free nation. Both of us face a military threat and political attacks. Our system of free enterprise is challenged throughout the world by a State-directed, State-controlled economic system. Indeed, this could well be the area in which the competition will be most bitter and decisive between the free world and Communist imperialism. We must never allow ourselves to become so preoccupied with the differences between our two nations that we lose sight of the transcendant importance of free world co-operation in the winning of the global struggle."

President Eisenhower referred in this connexion to the collective security arrangements, notably in NATO, in which both countries were taking part on a basis of equality; to their determination "to maintain our institutions in good repair and to ensure that our economies function well"; to their desire "to set an example of free men's accomplishments which will encourage and attract those less fortunate"; and to their agreement never to cease "striving for a just and lasting peace, to be achieved by negotiation with those who challenge us." He went on:

"Against this background of similarity in basic factors, let me now point to some of the matters which it seems to me are troublesome between us. Among these are the surplus wheat disposal policies of the U.S.A., the imbalance in our mutual trade, certain aspects of U.S. private investment in Canada, and Canadian fears of a trend in the United States away from forward-looking policies in the field of trade. I am sure you will agree that we should talk frankly to each other. Frankness, in good spirit, is a measure of friendship... In mentioning specific problems on which we do not see eye to eye, I am doing so as an American, expressing an American viewpoint. I can assure you that your Prime Minister, in discussing these problems with my associates and me, most loyally and eloquently expresses the viewpoint of Canada. It is my conviction that for all our present problems and all our future ones, we will find acceptable solutions. It will take understanding, common sense, and a willingness to give and take on both our parts...

"First, then, I would like to comment on our surplus wheat disposal policies. I do not think anyone can quarrel with our purpose, though some of our methods may seem unorthodox by traditional standards. Simply stated, our wheat disposal programme has three aspects. In times of local famine or disaster we give wheat away. We have also bartered it for strategic materials. Finally, we sell wheat for local currency to countries which cannot afford to purchase it commercially. In these cases our policy is to lend back to the Government in question most of the proceeds for local economic development. Our intent is not to damage normal commercial markets, and in this I think we have been generally successful.

"I know that in the past there was criticism of certain aspects of these programmes, and particularly of our barter arrangements. I believe that the basis for these objections has been largely removed. Increasingly close consultation between our two Governments has ironed out many misunderstandings... Your Government knows in detail what we are planning. I assure you that it is our desire and intention to keep the doors of consultation fully open...

"In several respects, despite inconvenience and even occasional damage in the past, Canada stands to benefit from our moving some surplus agricultural commodities into consumption overseas. First and most evident of all, many hungry people around the world have had food which they otherwise would not have had. Secondly, had these products remained in storage they would have had a depressing influence on the world market and world prices. Finally, the funds which we have been enabled to make available to recipient countries should in the long run help to raise standards of living and create enlarged markets for all of us.

"I come now to the question of the imbalance of trade between our two countries. You buy more from the United States than you sell to us, and this fact is of concern to many thoughtful Canadians. There are a few basic points which should be noted in this connexion. First of all, the U.S.A. and Canada are not State traders. All the products of industry manufactured in the United States and sold to customers abroad are sold through the enterprise of the private seller. These articles come to you here in Canada only because of the desire of the individual Canadian consumer to buy a particular

piece of merchandise. The U.S. Government does not place goods in Canada as part of a State-directed programme. This aspect of our trade is the natural consequence of two private-enterprise economies working side by side and trading with each other.

"Then, we should also remember that the free world represents a multilateral trading community. To try to balance our books once a month or once a year with every nation with which we trade would stifle rather than expand trade. I assume that Canada is as interested as we are in the expansion of world trade rather than in its artificial re-direction. [This remark was generally regarded as indicating U.S. criticism of Mr. Diefenbaker's plan to divert 15 per cent of Canada's imports to the British market.] Both our peoples want to buy and sell in a climate of economic vigour and expansion. An imbalance in trade with one country, in such a climate, is usually balanced or largely offset by the state of the accounts with other trading nations. This is the case with Canadian trade. Your export deficit to the U.S.A. is offset by export surpluses to other countries and by the flow of investments to Canada. The promotion of healthy multilateral trade, as opposed to artificial bilateral balancing, is an important objective of the I.M.F. and GATT, to which both Canada and the U.S.A. belong.

"I want to address myself as well to the other side of the trade equation—namely, your exports to the United States. Here you can rightly say that, through quotas and tariffs, our governmental policies can either expand or restrict your opportunities to sell to us. The same is, of course, true of actions taken by your Government which can affect the volume of our exports to Canada.

"Neither of our countries is a 'free trader' in the classical economic sense. Each of us feels a responsibility to provide some protection to particular sectors of our economies which may be in distress or are for other reasons deserving of governmental assistance. We have taken some actions of this sort. So has Canada.

"Oil imports into our country contribute a case in point. We believe that to ensure adequate supplies of oil in an emergency, it is necessary that exploration to develop oil reserves be carried forward with vigour. A healthy domestic oil production industry is vital to our national security. We recognize that our security and yours are inseparable. We have been keenly sensitive to that fact in considering the nature of the voluntary restrictions on oil imports that have been put into effect by U.S. oil companies, and have minimized their impact on your economy.

"Our restrictive action with respect to oil is not in any sense reflective of a change in the fundamental trade policy of the United States. Such actions must be viewed in perspective. For example, since the so-called 'escape clause' was incorporated in our trade agreements legislation in 1951, there have come from U.S. industry a number of requests for the imposition of quotas or higher tariffs. In about a dozen cases Presidential approval for some relief has been granted. In only one of these cases was Canada directly affected by an exporter. We have always conscientiously sought to take account of your interests as well as our own in seeking the best remedy to these problems. I am sure that a study of the record will bear this out.

"The flow of investment funds from the United States into Canada has led to expressions of concern on your part. These funds have been attracted to your country by the business opportunities which Canada offers. Though they may raise questions in specific cases respecting control of an industry by American citizens, these industries are of course subject to Canadian law. Moreover, these investments have helped you to develop your resources and to expand your industrial plant at a far faster rate than would have been possible had you relied wholly on your own savings. They have thereby helped to provide employment, tax revenues, and other direct benefits. These funds have also helped Canada to finance with ease its recent surplus of imports from the U.S.A., a fact that is testified to by the premium of the Canadian dollar over the U.S. dollar. I am confident that if there are some defects in this investment process, ways will be found to correct them. That is in the interests of both our countries.

"One final word on the foreign trade policy of the United States. In 1934 the U.S.A. took an historic decision to embark on a positive policy of fostering trade with the launching of the Reciprocal Trade Agreements Programme. This policy we continue to support and practise. The U.S. Government, after a public searching of soul at times of renewal of the Trade Agreements Act, has consistently reaffirmed this policy. Have no fear that the United States will abandon so well-established a policy . . .

"Our Governments have a responsibility to compose difficulties, but we must not forget that thousands of individual citizens of Canada and the United States must themselves find in their diversified activities the answers to many of these problems. Finally, there is no cause to be surprised or disturbed to discover that occasionally differences arise between us. The distinguishing character of the peoples of the free world lies in the fact that differences between them can develop, be expressed, and be amicably resolved. We in the United States have no more desire than you to seek in our relations with others the silent, sullen unity that elsewhere has been purchased or imposed. The hallmark of freedom is the right to differ as well as the right to agree . . ."

A brief resumé of his talks with President Eisenhower was given to the Canadian House of Commons on July 11 by Mr. Diefenbaker.

He said that there had been "full and frank" discussions ranging over the following matters: (1) progress towards disarmament; (2) the changing nature of Soviet policy, particularly as regards the economic challenge in the Middle East and in other under-developed areas; (3) mutual defence problems; (4) trade and economic questions; (5) the question of boundary waters affecting both countries. On trade questions, he (Mr. Diefenbaker) had raised the question of Canadian subsidiaries which might have been prevented from accepting orders from Communist China because of U.S. regulations, even if the acceptance of such orders would have been permitted by the Canadian Government. The President, in reply, had expressed the view that the U.S. Foreign Assets Control Regulations" should not in any way work to the disadvantage of the Canadian economy," and had stated that he would "consider favourably" exempting U.S. parent companies of subsidiaries in Canada from the application of these regulations as far as exports of the subsidiaries were concerned. Canada (Mr. Diefenbaker added) had also stressed the need of revising the list of strategic materials exportable to Communist countries—a question which would be considered at a conference in Paris of all the countries concerned.

President Eisenhower and Mr. Dulles inspected the newly completed section of the St. Lawrence Seaway at Massena (New York State) before returning to Washington on July 11. (Montreal Star - Department of External Affairs, Ottawa - New York Times - New York Herald Tribune) **(Prev. rep. Defence, 16230 B; Canadian Economic Complaints, 15987 B; 15825 A; St. Lawrence Seaway, 16311 A.)**

A. UNITED KINGDOM. — Steel Industry. - Quarterly Production Figures. - New Steel Mill for Lanarkshire.

Production of steel in Britain in the second quarter of 1958 was more than eight per cent less than in the first quarter and over 10 per cent less than in the second quarter of 1957. The Iron and Steel Board attributed the fall in output mainly to reduced export demand and to a fall in the quantity required for the home market, particularly for the building and allied trades. Production of pig-iron also showed substantial reductions on the first quarter of 1958 and the second quarter of 1957. Detailed figures are given below:

	1958		1957	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings.				
April	407,800	22,228,000	432,100	22,470,000
May	379,000	22,480,000	431,000	22,411,000
June	373,600	19,427,000	418,700	21,772,000
First Quarter	386,800	21,378,000	427,300	22,218,000
Pig-Iron.				
April	246,900	13,358,000	277,400	14,425,000
May	249,600	12,978,000	283,500	14,472,000
June	243,200	12,646,400	274,600	14,282,000
First Quarter	249,900	12,994,000	278,500	14,483,000

Colville's Ltd. (the Scottish steel group) announced on July 6 that an immediate start would be made on the construction of a £7,000,000 slabbing mill at their Ravenscraig steel mills at Motherwell (Lanarkshire), as part of the £32,000,000 development plan announced in June 1957 (see 15820 A). The mill would eventually have a capacity of 1,500,000 tons a year, and would be completed within three years.—(Times - Daily Telegraph) **(16200 A; 15820 A.)**

B. TURKEY. — Cabinet Changes.

The following changes in the Turkish Cabinet were announced on July 9: (*a*) a new Ministry of Co-ordination was established under M. Sebati Ataman; (*b*) M. Sidki Yircali (Minister for Press, Broadcasting and Tourism) became Minister of Industry *vice* M. Abdullah Aker (the Minister of Commerce), who had taken over the Industry portfolio *ad interim* after its former holder, M. Samet Agaoglu, had been appointed a Minister of State last February; (*c*) M. Server Somunjoglu succeeded M. Yircali as Minister of the Press, Broadcasting and Tourism. (Turkish Embassy Press Department, London)

(Prev. rep. 15983 A.)

C. NEW ZEALAND.—Terms of Loan from Australia.

The N.Z. Prime Minister (Mr. Nash) announced on July 11 that New Zealand would pay 4⅝ per cent interest on the £A10,000,000 loan from Australia, and that the credit would be repaid in eight equal quarterly instalments between Sept. 30, 1960, and Sept. 30, 1962; the N.Z. Reserve Bank had the right, however, to pay any instalment in advance. Mr. Nash said that there were no "strings" attached to the loan agreement, and that the credit could be used by New Zealand in any way she considered most useful.
(Directorate of Information, Wellington) **(Prev. rep. 16266 C.)**

A. BELGIUM. — General Elections. - Resignation of M. Van Acker. - Formation of Eyskens Government.

General elections were held in Belgium on June 1 following the dissolution of the previous Parliament on completing its four-year term of office. The elections were for the 212 seats in the Chamber of Representatives and for 106 seats in the Senate filled by direct voting; an additional 46 senators are elected by the Provincial Councils and another 23 are co-opted by the directly-elected and provincially-elected senators, making a total Senate membership of 175.

The elections for both Chambers were conducted by proportional representation with party lists, voters being permitted to cast their vote either for a list or for the particular candidate they preferred.

The election campaign revolved chiefly around two questions — the period of military service, and education. As regards the former, the Christian Social (Catholic) party declared themselves in favour of reducing the present 15-month conscription period to 12 months, with a corresponding extension of voluntary recruitment. The Socialists, on the other hand, declined to commit themselves to a further reduction of the present period of military service [which had already been reduced from 18 to 15 months.] The Socialists also opposed the construction of any NATO rocket-launching sites on Belgian territory.

As regards education, the Socialists and Liberals advocated priority for the official "free" schools accessible to pupils of any denomination, whereas the Christian Socials demanded increased subsidies for the Roman Catholic schools to ensure equal treatment of both categories. All parties promised higher old-age pensions and increased subsidies to farmers.

The final results of the elections were announced on June 3 as follows, comparative figures for the last (1954) elections being also shown:

	Chamber of Representatives		Senate	
	1958	1954	1958	1954
Christian Socials	104	96	54	49
Socialists	84	86	39	42
Liberals	21	25	12*	13*
Communists	2	4	1	2
Flemish People's Party ..	1	1	-	—

* Including two senators elected on a joint Socialist-Liberal list.

The Senate was subsequently brought up to its full strength of 175 members as described above, its final composition being:

Christian Socials	91
Socialists	65
Liberals	18*
Communists	1

* Including two senators elected on a joint Socialist-Liberal list.

Party strengths at the dissolution of the former Chamber were: Christian Socials 96, Socialists 86, Liberals 25, Communists 4, Flemish People's Party 1. In the former Senate the membership at the dissolution was: Christian Socials 79, Socialists 72, Liberals 22, Communists 2.

The elections thus gave the Christian Socials a majority in the Senate, though they narrowly failed to obtain an overall majority in the Chamber.

M. Van Acker, head of the Socialist-Liberal coalition government which had been in office since 1954, resigned on June 2 in view of the electoral victory of the Christian Social Party. On June 9, on the advice of M. de Schrijver (a Christian Social Minister of State and a former Deputy Premier), King Baudouin asked M. Eyskens (the leader of the Christian Social Party) to form a new Government. M. Eyskens' attempts to obtain the support of the Socialists or the Liberals failed, however, and on June 25 he announced the formation of a Government drawn solely from the Christian Social Party. The new Cabinet's membership was announced on the same day as follows:

M. Gaston Eyskens	Prime Minister.
M. Pierre Wigny	Foreign Affairs.
M. Jean Van Houtte	Finance.
M. André de Quae	Foreign Trade.
M. Pierre Harmel	Justice.
M. Léon Servais	Labour.
M. Arthur Gilson	Defence.
M. Charles Heger	Interior.
M. Maurice Van Hemelryck	Education.
M. Paul Segers	Communications.
M. Raymond Scheyven	Economic Affairs.
M. Paul Meyers	Public Works.
Baron Albert de Vleeschauwer	Agriculture.
M. Robert Houben	Public Health.
M. Paul van den Boeynants	Middle Classes.
*M. Louis Pétillon	Colonies.

* M. Pétillon's appointment was announced on July 13; prior to joining the Cabinet he was Governor-General of the Belgian Congo, a post in which he was succeeded by M. Cornelis, the former Deputy Governor-General.

M. Eyskens (53) was the leader of the Christian Social Opposition in the former Chamber. A Fleming, he is Professor of Political Economy at Louvain University and has been a deputy for Louvain since 1939. He was Finance Minister in the post-war coalition governments of M. Van Acker and M. Spaak, and headed a Christian Social-Liberal coalition government in 1949-50.

M. Eyskens made a policy statement in the new Chamber of Representatives on July 1.

He announced that his Government would take measures to restore a sound financial position, and would guarantee the stability of the Belgian franc. Other measures would include free education until the age of 18, and an increase in scholarships; steps to bring about a 40 per cent increase in the national income within the next 10 years; the building of 100,000 new houses; increases in workers' pensions, reorganization of pensions schemes for employees and the self-employed; tax reliefs; complete tax exemption for exports; reorganization of the Army by increasing voluntary recruitment, with the aim of reducing the compulsory service period to 12 months; and an adaptation of parliamentary seats to the latest population figures. M. Eyskens repeated his willingness to co-operate with the Socialists or the Liberals.

In the ensuing debate two Liberals announced that they would vote for the Government to give it a chance of survival; they were M. Van Glabbeke, the mayor of Ostend, and M. Lahaye, deputy for Ypres. Both criticized the Liberal leadership for having declined to negotiate with M. Eyskens on the formation of a coalition government.

When the vote was taken on a Christian Social resolution expressing confidence in the Government, 106 votes were cast for it and 104 against. The Government was supported by all the Christian Social members present, by MM. Van Glabbeke and Lahaye, and by the one deputy of the Flemish People's Party; the other Liberals, the Socialists, and the Communists voted against. In view of his precarious majority, M. Eyskens informed King Baudouin on July 4 that he would make a decision on the future of his Cabinet dependent on the debate in the Senate. In the latter Chamber he received a vote of confidence on July 9 by 90 votes to 83, all the Liberals and Socialists and the one Communist senator voting against.

B. VATICAN. — Death of Cardinal Stritch. - Cardinal Agagianian becomes Pro-Prefect of Propaganda Fide.

Cardinal Stritch (70), Roman Catholic Archbishop of Chicago, died in Rome on May 27 only two months after his appointment to the new post of Pro-Prefect of the *Propaganda Fide* organization.

Samuel Alphonsus Stritch was born at Nashville (Tennessee) of Irish parents, and studied at the American College in Rome. He was Bishop of Toledo (1921) and Archbishop of Milwaukee (1930) before succeeding the late Cardinal Mundelein in 1939 as Archbishop of Chicago. Elevated to the Sacred College in 1946, Cardinal Stritch was well known in the U.S.A. for his interest in educational and social questions, and for his outspoken denunciations of Nazism during the Hitler regime in Germany.

Cardinal Gregory Peter Agagianian (62), Patriarch of Cilicia of the Armenians, was nominated by Pope Pius XII on June 18 as Pro-Prefect of *Propaganda Fide* in succession to the late Cardinal Stritch. Born in what is now Soviet Georgia, he is one of the Church's foremost experts on the Soviet Union and on Communism generally. He was raised to the Sacred College in 1946.

Cardinal Agagianian was a parish priest in Tiflis during the Russian Revolution and for some years thereafter. Called to Rome in 1921, he served as Vice-Rector of the Pontifical Armenian College, and subsequently as Rector, until his consecration in 1937 as Patriarch of the Uniate Armenians (the official designation is Patriarch of Cilicia of the Armenians), with the title of Gregory Peter XV. Since that time he has exercised jurisdiction over more than 50,000 Armenian Catholics in the Lebanon and other parts of the Middle East, as well as in France, the U.S.A., and South America. His headquarters were in Beirut.

The Uniate Armenians are Catholics of the Armenian Rite, holding the same doctrines as those of the Roman Catholic Church and hence united with Rome. As Pro-Prefect of *Propaganda Fide*, Cardinal Agagianian will be a member of the Roman Curia and will exercise virtual control of all Roman Catholic missions throughout the world. As explained in 16090 B, the nominal head of *Propaganda Fide* (Cardinal Fumasoni-Biondi) is incapacitated by age and ill-health.

C. FINLAND. — American Loan.

An agreement was signed in Washington on Feb. 17 under which the U.S. Export-Import Bank extended to Finland a 40-year loan of $14,000,000, with interest payments at 3 per cent per annum starting in 1961. The major part of the loan will be used for the construction of a new power plant.
(Ministry of External Affairs, Helsinki)

AUGUST 2—9, 1958

A. UNITED NATIONS. — Security Council Meetings on Middle East Crisis. - Soviet Veto of American and Japanese Resolutions.

The U.N. Security Council met in emergency session during the week July 15 - 22 to consider the situation in the Middle East arising out of the revolution in Iraq, the despatch of American troops to the Lebanon at the request of President Chamoun, and the despatch of British troops to Jordan at the request of King Hussein. The principal developments at the U.N. during this period were, in brief :

(1) A U.S. resolution asking the U.N. Secretary-General to make appropriate arrangements, " including the contribution and use of contingents," to protect the independence and territorial integrity of Lebanon and to ensure that there was no illegal infiltration of men or *matériel* across her borders.

(2) A Soviet resolution calling for the immediate withdrawal of American forces from Lebanon and of British forces from Jordan.

(3) A Swedish resolution calling for the suspension " until further notice " of the U.N. Observation Group in Lebanon.

(4) The defeat of the U.S., Soviet, and Swedish resolutions, the American resolution failing to secure adoption because of the Soviet veto.

(5) A Japanese compromise resolution calling on the U.N. Secretary-General to expand U.N. activities in Lebanon in such a way as to make possible the withdrawal of American forces.

(6) The defeat of the Japanese resolution by the Soviet veto.

(7) The adjournment of the Security Council *sine die* after all the above-mentioned resolutions had been defeated.

The U.S. Resolution. - Mr. Cabot Lodge's Statement.

As stated by President Eisenhower on July 15 (see page 16307), the Security Council was officially informed of the despatch of American troops to the Lebanon by Mr. Cabot Lodge, the U.S. permanent representative. The above-mentioned U.S. resolution was presented by Mr. Lodge on that date, containing the following principal provisions :

(1) A call for " the immediate cessation of all illegal infiltration of personnel or supply of arms or other *matériel* across the Lebanese borders, as well as attacks upon the Government of Lebanon by government-controlled radio and other information media calculated to stimulate disorders."

(2) An invitation to the U.N. Observation Group in Lebanon " to continue and develop its activities pursuant to the Security Council's resolution of June 11, 1958 " (see page 16294, first column).

(3) A request to the U.N. Secretary-General (Dr. Hammarskjold) " immediately to consult the Government of Lebanon and other member-States as appropriate with a view to making such additional arrangements, including the contribution and use of contingents, as may be necessary to protect the territorial integrity and independence of Lebanon and to ensure that there is no illegal infiltration of personnel or supply of arms . . across the Lebanese borders."

Mr. Cabot Lodge made the following statement to the Security Council before presenting this resolution :

" The Council meets today to confront difficulties as serious as any in its history. The territorial integrity of Lebanon is increasingly threatened by insurrection, stimulated and assisted from outside. Plots against the Kingdom of Jordan, which have become evident over the past few months, are another sign of serious instability in the relations between nations in the Middle East. And now comes the overthrow—in an exceptionally brutal and revolting manner—of the legally-established Government of Iraq. I have just heard this morning, before coming here, of the murder of our colleague in the United Nations from Iraq—Mr. Fadil Jamali. Only a few weeks ago he was here with us . . . Now we learn that he was not only murdered, but that his body was dragged through the streets of Baghdad. [On July 17, however, Baghdad Radio denied that Mr. Jamali had been killed and stated that he was being held in custody and would shortly be brought to trial.]

" In all these circumstances, the President of Lebanon has asked, with the unanimous authorization of the Lebanese Government, for the help of friendly governments so as to preserve Lebanon's integrity and independence. The United States has responded positively and affirmatively to this request . . . We wish the Security Council to be hereby officially advised of this fact. In addition, the U.S. Government has under active consideration economic assistance to help Lebanon revive its economy.

" Our purpose in coming to the assistance of Lebanon is perfectly clear. As President Eisenhower explained, our forces are not there to engage in hostilities of any kind—much less to fight a war. Their presence is designed for the sole purpose of helping the Government of Lebanon in its efforts to stabilize the situation, brought on by the threats from outside, until such time as the U.N. can take the steps necessary to protect the independence and political integrity of Lebanon. They will also afford security to the several thousand Americans who reside in that country. That is the total scope and objective of the U.S. assistance.

" I need scarcely say that we are the first to admit that the despatch of U.S. forces to Lebanon is not an ideal way to solve present problems, and they will be withdrawn as soon as the United Nations can take over. The U.S. Government hopes that the U.N. will soon be able to assume these responsibilities . . . Until then, the presence of U.S. troops in Lebanon will be a constructive contribution to the objectives the Security Council had in mind when it passed the June 11 resolution dealing with this problem.

" A little over a month ago the Government of Lebanon presented a complaint to the Security Council involving ' a situation arising from the intervention of the United Arab Republic in the internal affairs of Lebanon, the continuance of which was likely to endanger international peace and security.' At that time various members of the Council drew special attention to Article 2 (4) of the Charter, which enjoins all members ' to refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any State.' This was one of the fundamental considerations behind the resolution which was adopted on June 11 . . .

" The U.N. Observation Group has thus far been able to achieve limited success. We hope that it will pursue its work in the most effective and energetic way possible Our forces are being instructed to co-operate with it and to establish liaison immediately upon arrival. This U.N. Group has helped to reduce interference from across the border.

" We learn now, however, that with the outbreak of the revolt in Iraq, the infiltration of arms and personnel into Lebanon from the United Arab Republic in an effort to subvert the legally constituted Government have suddenly become much more alarming. This development, coupled with persistent efforts over the past months to subvert the Government of Jordan, must be a cause of grave concern to us all. They place in jeopardy both the independence of Lebanon and that of any Middle Eastern State which seeks to maintain its national integrity free from outside influence and pressures. It is too early to tell what the outcome of the revolt in Iraq may be. But one thing is clear : the events in both Lebanon and Iraq present grave threats to the integrity of free and independent countries. They demonstrate ruthlessness of aggressive purpose which tiny Lebanon cannot combat without support from friendly nations.

" Observing the course of events in Lebanon and Iraq, one is constrained to conclude that there are powers at work in the Middle East seeking, in total disregard for national sovereignty and independence, to substitute force or the threat of force for law. If these powers are left unchecked, free to pursue their lawless course, the people of the Middle East will have been denied the solemn guarantees written into the U.N. Charter. . .

" Now we confront a situation involving outside involvement in an internal revolt against the legitimate Government of Lebanon. Under these conditions a request from the Government of Lebanon to another member of the United Nations to come to its assistance is entirely consistent with the provisions and purposes of the U.N. Charter. In this situation, therefore, we are proceeding in accordance with the traditional rules of international law, none of which in any way inhibit action of the character which the U.S.A. is undertaking in Lebanon. The United States is acting pursuant to what the Charter regards as an inherent right—the right of all nations to work together to preserve their independence. The Council should take note that U.S. forces went to Lebanon at the specific request of the duly constituted Government of Lebanon. Let me emphasize again . . . that these forces will remain there only until the United Nations itself is able to assume the necessary responsibilities to ensure the continued independence of Lebanon.

" There is one further fact which must be recognized. If the United Nations is to succeed in its efforts to maintain international peace and security, it should support the efforts of a legitimate and democratically elected government to protect itself from aggression from without, even if that aggression is indirect. The U.N. must be particularly alert in protecting the security of small States from interference by those whose resources and power are larger This is a principle which has been supported here in the past and which should be supported today, regardless of who the offender may be . . .

" There can be no hope for peace in the world unless the United Nations shows this dedication to the Charter's basic principles. All nations, large and small alike, are entitled to have their political independence and territorial integrity respected and maintained. If we vacillate with regard to this proposition, we will open the flood-gates to direct and indirect aggression all over the world.

" The overthrow of another State by subversion and the fomenting of internal strife is more difficult for the world to combat than is direct military aggression, because the fomenting of internal strife is harder to see with your eyes. But this is not the first time that the United Nations has faced such a problem. The U.N. faced such a problem successfully in Greece in 1946, when Soviet-sponsored insurrection threatened to overwhelm the Greek Government. It did so unsuccessfully in 1948 when the Communist coup was perpetrated in Czechoslovakia. The U.N. sought to provide means for dealing with such aggressive developments in the future when in 1949 and 1950 it adopted the ' Essentials of Peace ' and the ' Peace through Deeds ' resolutions of the General Assembly . . ." After

quoting the provisions of these resolutions, Mr. Cabot Lodge added: "In solemnly affirming that any aggression which foments civil strife in the interest of a foreign power was one of the gravest of all crimes against peace and security, the General Assembly had clearly in mind just such a situation as that which we face. The integrity and independence of a nation is as precious when it is attacked from outside by subversion and erosion as when it is attacked in the field of military action."

Mr. Lodge said in conclusion: "The League of Nations tolerated direct and indirect aggression in Europe, Asia, and Africa during the 1930's. The tragic result was to strengthen and stimulate aggressive force in such a way that World War II became inevitable. The United States is determined that history shall not be repeated. We hope and believe that the action which we are taking will bring stability, and that the U.S. forces now being sent into Lebanon at the request of its Government can be promptly withdrawn. We must, however, be prepared to meet the situation whatever the consequences may be. We strive for a world in which nations, great and small, can preserve their independence . . . We believe that the action which the United States is taking is consistent with the principles and purposes of the United Nations and will promote the cause of world peace."

The Soviet Resolution. - M. Sobolev's Statement.

On the same day (July 15) M. Arkady Sobolev presented a Soviet resolution in the Security Council calling upon the United States to "cease armed intervention in the domestic affairs of the Arab States" and to withdraw its forces immediately from the Lebanon. On July 17, after Sir Pierson Dixon (U.K.) had informed the Council of the despatch of British troops to Jordan at King Hussein's request, the Soviet resolution was expanded to include a demand for an immediate British withdrawal from Jordan as well as an American withdrawal from Lebanon.

M. Sobolev addressed the Security Council as follows on July 15:

"The facts show that a civil war is taking place in Lebanon. Indignant at the reactionary and anti-popular policy of the Chamoun Government, the people of Lebanon have risen in defence of their constitutional rights and the independence of their country.

"It is common knowledge that certain Western Powers have long been trying to use the events in Lebanon for armed intervention against the Lebanese people. U.S. and British leaders have openly spoken of the readiness of their Governments to send their armed forces to Lebanon under any pretext . . . Thus the facts irrefutably show that Lebanon is being threatened not by the United Arab Republic's non-existent interference in its affairs, but by the direct military intervention of the United States and its Western partners, who are trying by force of arms to retain a government in power in Lebanon whose policy is rejected by the entire people there."

After saying that the U.N. Observation Group in Lebanon had "taken an objective stand" and had" justly assessed the events taking place in Lebanon as a purely internal affair of the Lebanese people," M. Sobolev continued: "Yesterday the events in Iraq, where the power of King Faisal has been overthrown and the Iraqi Republic proclaimed, were added to the events in Lebanon. The Iraqi events are a purely internal affair of the Iraqi people, who have risen against foreign oppression and have liberated their country from King Feisal's reactionary power . . . All these facts show that the peoples of the Arab world, who have taken the road of national liberation . . . are pursuing a policy conforming to their national interests, without looking either to London or Washington . . . But this is exactly what is not reckoned with by the colonialists, who would like to tie the peoples of the Arab East hand and foot, politically and economically . . .

"The United States has decided to intervene openly with its armed forces in the internal affairs of the Arab countries and bring to their knees the peoples not only of Lebanon but also of the other Arab States who have risen in defence of their freedom and independence. In justification of these aggressive actions, the U.S. delegate refers to a 'request' of the present rulers of Lebanon, but it is perfectly clear to all that these rulers are merely political puppets of the United States, and that these requests, moreover, are inspired by the U.S. State Department.

"In these conditions the despatch of U.S. troops to Lebanon is an act of aggression against the peoples of the Arab world; a gross intervention in the domestic affairs of the States of this area; and a flagrant violation of the U.N. Charter, which prohibits the use of force as an instrument of foreign policy . . . No references to requests from Chamoun can justify this act of armed aggression, for those requests were inspired precisely to cover up U.S. intervention in the domestic affairs of the States of the Arab world.

"In 'substantiation' of its intervention, the U.S.A. refers to the U.N. Charter. The Charter provides for the right of individual or collective defence if an armed attack occurs against a member of the U.N., until the Security Council has taken measures necessary to maintain international peace and security. But this has no bearing on the matter, and is merely a manoeuvre to cover up the aggressive nature of armed intervention against the Arab peoples. Lebanon is threatened by no-one except those who carry out military intervention designed to crush the peoples who have risen up. The Soviet Union holds that the U.S. attempt to cover up armed intervention against the peoples of the Middle East by reference to 'self-defence' is a mockery of the U.N. Charter and of the noble principles and purposes which underlie our Organization.

"The settlement of questions pertaining to the Lebanese State, just as to the Iraqi State, is the inalienable right of the peoples of those countries. Some domestic event or other in these countries cannot serve as a pretext for outside intervention in their domestic affairs, and any armed intervention by the Western Powers is fraught with the gravest consequences, as it sharply exacerbates the international situation and is capable of plunging the world into the abyss of another war. Full responsibility for these consequences rests with the organizers and participants of the armed intervention against the peoples of the Arab East, and with the United States first and foremost.

"The Soviet Union, as has been repeatedly stated, wants peace to prevail in the Middle East area, situated as it is near the frontiers of the U.S.S.R. That is why the Soviet Union cannot regard with indifference foreign intervention in the countries of this area, no matter how this intervention is disguised.

"It is the duty of every Government really concerned over the preservation of peace to do everything possible to cut short the aggression against the peoples of this area. The Security Council . . . must take resolute measures to stop the aggression against the Arab countries and to ensure peace and tranquillity in this area of the world."

Security Council Debate.

In addition to Mr. Cabot Lodge and M. Sobolev, speakers in the Security Council's debate on July 15-16 included Sir Pierson Dixon (Great Britain), M. Pierre de Vaucelles (France), Mr. John C. Holmes (Canada), Dr. Karim Azkoul (Lebanon), M. Omar Loutfi (United Arab Republic), Hr. Gunnar Jarring (Sweden), and Dr. Hammarskjöld, the U.N. Secretary-General.

Sir Pierson Dixon said that the U.S. Government's action in responding to the Lebanese appeal was "fully consistent with the provisions and purposes of the U.N. Charter and the established rules of international law," and had the full support of H.M. Government. He continued:

"It has been the consistent view of H.M. Government that there has been interference from the United Arab Republic in the affairs of Lebanon, and our information is that this interference is continuing despite the efforts of the [U.N.] Observation Group . . . It has long been our view . . . that States must eradicate from their national policies the methods of subversion and indirect aggression that have been so distressingly current in recent years. We believe profoundly that it is for the U.N. to identify, to condemn, and, so far as it can, to arrest these highly dangerous tendencies which have so gravely complicated international relations . . ."

M. de Vaucelles reserved the French Government's right to take any necessary measures, consistent with the U.N. Charter, to protect the interests and security of the numerous French nationals living in Lebanon. In a brief statement, he said that the Lebanese Government was fighting a rebellion "which would doubtless have come to an end if it had not enjoyed support from outside."

Mr. Holmes said: "The principles of international law to which the Soviet representative somewhat inconsistently appealed must be applied to actual situations, not appealed to in abstraction. It is clear to all that the rights of States are threatened by the violent disturbances which are shaking the area. We do not presume to judge the causes of this violence. But we cannot allow violence to spread dangerously. If the intervention of the United States at the request of the established Government of Lebanon can hold the rein, check the violent disorders, and enable us to help the Lebanese people to find political rather than military solutions to their troubles, I believe that it will serve our purposes."

Mr. Cabot Lodge, speaking on July 16, emphasized that the U.S. resolution was "an attempt in good faith to give effect to President Eisenhower's statement that 'the United States will support in the United Nations measures which seem to be adequate to meet the new situation and which will enable the U.S. forces promptly to be withdrawn.'"

M. Sobolev commented that the U.S. resolution made no mention of the fact that the Observation Group [in its report to the Security Council] had failed to discover any infiltration of men or arms into the Lebanon from outside. After accusing the U.S.A. of resorting to the "big lie" to attain its objectives, "just as Hitler did for his aggressive purposes," M. Sobolev alleged that U.S. forces had been sent to Lebanon not to uphold the "Government of Chamoun" but "to prevent the further spread of the disease that is coming from Iraq." He added: "That disease has a name—in Russian we call it 'Arab nationalism.' It is indeed a disease from the point of view of influential circles in the United States . . ."

Mr. Cabot Lodge, in reply, said that M. Sobolev's statement had interested him very much, coming as it did "from a representative of a Government which has been condemned by the United Nations three times in the past year for its actions in Hungary, which has violated the expressed wishes of the U.N. more than 30 times in the past eight years, and which has abused the veto power 82 times." Mr. Lodge continued: "I must defer to Mr. Sobolev in the knowledge of Hitler, because his Government was once an ally of Adolf Hitler when Mr. Molotov made a pact with Ribbentrop of unfragrant memory. The United States has never been an ally of Adolf Hitler;

so he knows more about it than I do. It is interesting, seeing that we are considering the Middle East, to remember that . . . in 1940 the Soviet Union . . . proposed to Ribbentrop that this area 'be recognized as the centre of the aspirations of the Soviet Union.' These ambitions came to nothing, but the Soviet Union nevertheless pressed forward toward the same goals after World War II."

Mr. Cabot Lodge added: "Let me just say that no country on earth is more friendly to Arab nationalism than is the United States . . . But we think there is a difference between normal aspirations of nationalism, which are proper, healthy, and can even be idealistic and forward-looking, and the subversion of the independence of small countries. Mr. Sobolev creates the impression that Arab nationalism and the subversion of independence are all one thing. They are not one thing, they are two entirely different things. We are in favour of nationalism and we are against the subversion of the independence of small countries."

Dr. Azkoul reiterated his Government's allegations of large-scale intervention in its internal affairs by the United Arab Republic, asserting that this had become more pronounced since the *coup d'état* in Iraq. Calling upon the Security Council to take "more effective measures" to safeguard Lebanon's independence, he emphasized that the request for U.S. forces had been taken under Article 51 of the U.N. Charter, which recognized the right of both individual and collective self-defence. He stressed also that this assistance would be temporary, and would continue only "until the entry into force of the action which we request the Council to take."

Mr. Loutfi maintained that Lebanon was in a state of civil war; that Article 51 of the Charter was not applicable to the situation, and that there had been no armed aggression against Lebanon, as borne out by the report of the U.N. observers. After saying that the events in Iraq were also "strictly internal in nature and cannot justify intervention," Mr. Loutfi expressed his regret at the U.S. Government's unilateral decision to send troops to Lebanon. He added: "This type of intervention in our part of the world recalls very painful memories. It will hamper the position and reputation of the United States in the Middle East, and have very grave repercussions."

Mr. Jarring stated: "One of the conditions for Article 51 to be applicable is that an armed attack has occurred against a member-State. The Swedish Government does not consider that this condition has been fulfilled in the present case, nor does it consider that there is an international conflict in the terms of Article 51. The action now taken by the United States has substantially altered the conditions of the activities of the [U.N.] observers in Lebanon, and the question is whether in practice they are able to fulfill their task as set forth in the Council's resolution of June 11. In the opinion of the Swedish Government, the proper course to take might be to suspend until further notice the activities carried on by the observers. I reserve the right to table a draft resolution on these lines."

Dr. Hammarskjöld (who spoke on July 15) emphasized that all his actions in the Lebanese situation had been carried out under the mandate conferred on him by the Council's resolution of June 11—namely, "to ensure that there is no illegal infiltration of personnel or supply of arms or other material across the Lebanese borders." In the present situation he was "neither an arbiter nor a mediator"; hence his actions had no relation to developments which must be considered as the internal affairs of Lebanon, nor to the wider international aspects of the problem. All his efforts had been devoted to getting the "necessary support for the observation operation, so as to make it possible for it to succeed and to give it the highest possible efficiency."

In a further statement on July 16, Dr. Hammarskjöld informed the Security Council that he had just received a second report from the U.N. Observation Group stating that it had now received full freedom of access to all parts of the Lebanese border areas. After stressing that the U.N. Group had thus achieved "complete success" in the arrangements for inspection, the Secretary-General added: "It is my feeling that, with the result thus achieved, the Observation Group is fully equipped to play the part envisaged for it in the total U.N. effort, with its general purpose of ensuring against infiltration and smuggling of arms. I hope that no later developments will cause a setback and that the Observation Group—although neither in the past nor probably in the future being the only tool used by the U.N. for the general purpose just mentioned—will retain its key position."

Sir Pierson Dixon's Statement on Despatch of British Troops to Jordan.

When the Security Council met on July 17 it had before it the Jordanian complaint charging the United Arab Republic with planning to overthrow King Hussein's Government (see page 16309, first column). Before the Council discussed this matter, however, it was officially informed by Sir Pierson Dixon that British paratroops had arrived in Jordan at the request of King Hussein.

Sir Pierson Dixon emphasized that British troops had been sent to Jordan in order to help the lawful Government of that country to maintain its integrity and independence, and under the provisions of Article 51 of the Charter. He added: "They are not there for any military purpose and do not constitute a threat to any other country . . . No doubt we shall hear from one member that this is all part of some 'colonialist and imperialist plot.' Not for the first time in our long history we are activated in what we have done by a sense of responsibility and a desire to see truly peaceful and stable conditions in the world."

Later in the debate, Sir Pierson said that H.M Government proposed "to explore urgently with the Secretary-General the possibility of devising some form of effective action by the United Nations" in Jordan; this would be done in consultation with the Jordanian Government and other Governments concerned. The object of these discussions would be "to work out proposals under which assistance can be given by the U.N. to the Government of Jordan to ensure the preservation of its territorial integrity and political independence." Should the lawful Jordanian Government request the withdrawal of British forces, this would of course be done.

Mr. Bahauddin Toukan (the Jordanian delegate) said that the United Arab Republic had "openly manifested hostility" towards Jordan and was threatening its independence. The problem had become too great for Jordan alone, and his Government, with the approval of the King and the unanimous support of the Jordanian Parliament, had therefore requested British and American aid under Article 51 of the Charter.

Defeat of U.S., Soviet, and Swedish Resolutions.

On July 18 the Security Council voted on the above-mentioned American and Soviet resolutions, and also on the Swedish resolution which Mr. Jarring had announced his intention of presenting during the debate on July 16.

The Swedish resolution (1) noted that U.S. troops had been sent to Lebanon at the request of the Lebanese Government, (2) recognized that the United Nations, according to the Charter, was "not authorized to intervene in matters which are essentially within the domestic jurisdiction of any State"; (3) stated that the action taken by the U.S. Government had "substantially altered the conditions under which the Security Council decided on June 11 to send observers to Lebanon"; and (4) requested the Secretary-General "to suspend the activities of the observers in Lebanon until further notice."

In presenting his resolution, Mr. Jarring said that the presence of U.S. troops in Lebanon had "completely altered" the conditions for the activities of the U.N. Group, which had become "superfluous" from a practical point of view and "unsuitable" from a political point of view.

All three resolutions were defeated, the votes being as follows:

(1) The American resolution for U.N. contingents to be sent to Lebanon received nine votes in favour and one against (U.S.S.R.), with Sweden abstaining; it was thus defeated by the Soviet veto.

(2) The Soviet resolution calling for the immediate withdrawal of U.S. troops from Lebanon and of British troops from Jordan was supported only by M. Sobolev; eight votes were cast against it, with Japan and Sweden abstaining.

(3) The Swedish resolution calling for the suspension of the U.N. Observation Group's activities in Lebanon received only two votes in favour (Sweden and the U.S.S.R.); the other nine votes were cast against.

Following these votes, Mr. Cabot Lodge presented a resolution which (1) noted that "the lack of unanimity of its permanent members" [i.e. the Soviet veto] had prevented the Security Council "from exercising its primary responsibility for the maintenance of international peace and security," and (2) asked for an emergency session of the U.N. General Assembly "in order to make appropriate recommendations concerning the Lebanese complaint."

M. Sobolev also presented a resolution which (1) described the despatch of U.S. and British forces to Lebanon and Jordan as "a serious threat to international peace and security," and (2) asked for an emergency session of the General Assembly "to consider the question of the intervention of the United States and Great Britain in Lebanon and Jordan."

Defeat of Japanese Compromise Resolution. - Adjournment of Security Council's Debate.

After the rejection of the U.S., Swedish, and Soviet resolutions, the Japanese delegate (Mr. Matsudaira) introduced a compromise resolution which requested the Secretary-General "to make arrangements forthwith for such measures, in addition to those envisaged by the resolution of June 11, 1958, as he may consider necessary in the light of the present circumstances, with a view to enabling the U.N. to fulfil the general purposes established in that resolution, and which will . . . serve to ensure the territorial integrity and political independence of Lebanon so as to make possible the withdrawal of U.S. forces." In moving this resolution, Mr. Matsudaira stressed that it was not intended "to create a police force of any kind" but only to provide for "a strengthened U.N. Observation Group in Lebanon."

When the Japanese resolution was presented on July 21 it was supported by Mr. Cabot Lodge, Sir Pierson Dixon, M. de Vaucelles, Mr. Jarring, and Dr. Sidney Smith, the Canadian Minister for External Affairs. It was opposed by M. Sobolev, however, and was ultimately defeated by the Soviet veto—the 85th in the Security Council to date.

Mr. Cabot Lodge described the resolution as "the indispensable minimum action which the U.N. should take in Lebanon at this time," adding that it "could lead to conditions which would make possible the withdrawal of U.S. forces from Lebanon." **Sir Pierson Dixon** said that the resolution was "a praiseworthy attempt to salvage something from the state of prostration to which the Council has been reduced by the Soviet veto," while **Dr. Smith** said that it offered the Council "a way of advance from the dead-end in which it finds itself following the rejection of the proposals previously before it."

M. Sobolev opposed the Japanese resolution on the ground that it amounted to "tacit moral sanction" for the continued presence of U.S. and British forces in Lebanon and Jordan. Whilst he did not question its motives, he had "a host of misgivings" about its substance; for example, it did not specify the measures which the Secretary-General was to take, and in voting for it the Security Council would be "buying a pig in a poke."

On a vote, the Japanese resolution received ten votes in favour and one against (U.S.S.R.) and was thus defeated by the Soviet veto.

Prior to the vote, M. Sobolev had submitted amendments which he described as designed to make the Japanese resolution "more palatable and more in accord with the principles and purposes of the United Nations"; these amendments authorized the enlargement of the U.N. Observation Group in Lebanon, but described the landing of U.S. troops as "intervention in Lebanese internal affairs" and called for their withdrawal. The resolution as amended by M Sobolev was defeated by eight votes to one (U.S.S.R.), with Japan and Sweden abstaining.

On the proposal of the president of the Security Council (Dr. Araujo, of Colombia) it was agreed on July 22 to adjourn the debate *sine die*. No vote was taken on the U.S. and Soviet resolutions calling for an emergency session of the General Assembly.

Dr. Araujo moved an adjournment *sine die* in view (*a*) of the current exchanges between Heads of Governments for a "summit" conference on Middle East problems, and (*b*) of the impending Presidential elections in Lebanon. The motion was agreed to by all members of the Security Council except M. Sobolev, who urged the Council to consider the resolutions calling for an emergency session of the General Assembly.

Statement by Dr. Hammarskjöld. - Formation of U.N. Consultative Group on Lebanon.

After the Japanese resolution had been defeated by the Soviet veto, Dr. Hammarskjöld informed the Security Council that he intended to proceed on his own, using "all opportunities offered to the Secretary-General within the limits set by the Charter," in order to "help prevent a further deterioration of the situation in the Middle East and to assist in finding a road away from the dangerous point at which we now find ourselves."

After recalling his statement at the time of the Suez crisis that the Secretary-General's task should not be allowed "to degenerate into a policy of expediency," Dr. Hammarskjöld emphasized that the United Nations' responsibility in Lebanon remained, despite the Security Council's failure to take action. He believed it to be in keeping with the spirit of the Charter that the Secretary-General "should be expected to act without guidance from the Assembly or the Security Council should this appear to him necessary towards helping to fill any vacuum that may appear in the systems which the Charter and traditional diplomacy provide for the safeguarding of peace and security." Immediate "practical steps" were now needed, and he therefore proposed to arrange for "the further development of the U.N. Observation Group in Lebanon so as to give it all the significance it can have consistent with the terms of the resolution under which it was established."

Dr. Hammarskjöld also indicated that he had plans in Lebanon which went beyond this, but asked to be excused for not revealing them at the moment. "However," he added, "I am certain that what I may find it possible to do, acting under the provisions of the Charter and solely for the purposes of the Charter, and guided by the views expressed around this table, will be recognized by you as being in the best interest of the Organization, and therefore of the cause of peace . . . Were you to disapprove of the way in which these intentions are translated by me into practical steps, I would, of course, accept the consequences of your judgment."

In conformity with his statement, Dr. Hammarskjöld announced on July 24 that he had set up a seven-man consultative group "in view of the growth in size and significance of the U.N. operation in Lebanon." Its members—all of whom were appointed in an "exclusively personal capacity"—were Senhor de Freitas-Valle (Brazil), Mr. Charles Ritchie (Canada), Sir Claude Corea (Ceylon), Dr. Alfonso Araujo (Colombia), Mr. Arthur Lall (India), Mr. Hans Engen (Norway), and Prince Aly Khan (Pakistan). The seven countries were the same as those represented on the Secretary-General's advisory committee on the U.N. Emergency Force stationed at Gaza.

Iraqi Representation on Security Council.

Throughout the Security Council's debate Iraq was represented by Dr. Abbas, who had been appointed by the Government of General Nuri es-Said. The legality of Dr. Abbas's participation was challenged by M. Sobolev, on the ground that he had not been accredited by the new Republican Government in Iraq; Dr. Araujo, however, ruled that Dr. Abbas should keep his seat for the time being, and M. Sobolev did not press the point further. On July 22 Mr. Hashim Jawad arrived in New York as the accredited representative of the Iraqi Republican Government in place of Dr. Abbas, who had meanwhile been recalled to Baghdad. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - U.S. Information Service - Soviet Embassy Press Department, London - U.N. Information Centre, London) **(Prev. rep. Middle East Crisis, 16305 A; Lebanon, U.N. Observation Group, 16293 A.)**

A. WESTERN GERMANY. — North Rhine-Westphalia Elections. - New Land Government.

Elections for the *Landtag* of North Rhine-Westphalia were held on July 6, the results being as follows (comparison given with the previous *Landtag* elections):

	1958			1954
	Seats	Votes	Percentage	Seats
Christian Democrats ..	104	4,011,122	50.5	90
Social Democrats ..	81	3,115,934	39.2	76
Free Democrats ..	15	566,274	7.1	25
Centre Party		83,733	1.0	9
German Party ..		125,044	1.6	
Others		45,936*	0.6	

*Including 43,890 votes (0.6 p.c.) for the German Reich Party.

In the 1954 elections the Christian Democrats polled 2,855,672 votes (41.3 p.c.); the Social Democrats 2,387,069 (34.5 p.c.); the Free Democrats 793,569 (8.5 p.c.); the Centre Party 278,925 (4 p.c.); the Communists (now banned) 264,067 (3.8 p.c.); the Refugee Party 319,811 (4.6 p.c.); and "Others" 22,180 (0.3 p.c.).

76.6 per cent of the electorate of 10,501,527 went to the polls, compared with 72.7 per cent in 1954.

The Christian Democrats thus gained an absolute majority over all other parties, and a new *Land* Government consisting entirely of Christian Democrats was accordingly formed on July 25, following the election on July 21 of Dr. Franz Meyers (Christian Democrat) as *Land* Prime Minister. Dr. Meyers obtained 103 votes in the new *Land* Parliament, the 94 Social Democrats and Free Democrats abstaining and three deputies being absent.

The new *Land* Government was as follows: Dr. Franz Meyers, Prime Minister; Herr Josef Hermann Dufhues, Interior; Dr. Artur Sträter, Deputy Premier and Finance; Herr Werner Schütz, Education; Dr. Otto Flehinghaus, Justice; Dr. Hans Lauscher, Economics and Transport; Herr Johann Ernst, Labour and Social Welfare; Herr Gustav Niermann, Agriculture and Forestry; Herr Peter Erkens, Reconstruction. No appointment was made to the Ministry for Federal Affairs, which will be administered by Dr. Meyers *ad interim*.

Herr Karl Arnold, *Land* Prime Minister of North Rhine-Westphalia from 1947 to 1956, died in Düsseldorf on June 29, aged 57. A deputy chairman of the Christian Democratic Party, he was the leading candidate of that party in the *Landtag* elections, and had hoped to regain the office of Prime Minister.

Karl Arnold, who started life as a leather-worker, was a leading member of the Christian Workers' movement (the Roman Catholic counterpart of the Socialist and Democratic trade unions) during the Weimar Republic. On the abolition of the trade union movement by the Nazis in 1933 he lost his posts, and in 1944 he was arrested by the Gestapo on suspicion of complicity in the attempt on Hitler's life. After the war he reconstructed the Catholic trade unions in the Rhineland, and was one of the founders of the Christian Democratic Union. He was Chief Burgomaster of Düsseldorf from January 1946 until his election as *Land* Prime Minister.

As North Rhine-Westphalia is the most populous *Land* of the Federal Republic, as well as the most heavily industrialized, the election results were regarded as an indication that the Christian Democrats were not only maintaining but also strengthening their position in the country. Particular significance was attached to the Christian Democratic victory in view of the extensive campaign of the Social Democratic and Free Democratic parties against the arming of the *Bundeswehr* with nuclear weapons, which had played an important part in the election campaign.—(Frankfurter Allgemeine Zeitung - Die Welt, Hamburg) **(Prev. rep. 15757 A; 13804 A.)**

A. UNITED KINGDOM. — Hire-purchase Finance. - Acquisition of Hire-purchase Interests by Clearing and Merchant Banks.

Following the relaxation of the "credit squeeze," which once again made it possible to provide fresh capital for the purpose of "improving the stability of the hire-purchase financial system," and also gave the banks greater latitude in the matter of advances (see 16269 A), a number of the leading banks, including four of the "Big Five" clearing banks, announced that they would take an interest in hire-purchase finance companies.

Barclays Bank announced on July 24 that it had entered into an agreement with United Dominions Trust (the largest hire-purchase company in Britain) which would give the bank a 25 per cent interest in the Trust's equity capital. Barclays Bank would be given a seat on the Board of the U.D.T. but, it was stated, would not participate in any way in the conduct of the Trust's business, which would remain entirely separate and independent.

The United Dominions Trust, in a statement issued the same day, said that Barclays (which has acted as clearing bank for the company since its inception) had agreed to subscribe for 1,000,000 new Ordinary shares of £1 each at £4 per share; the consent of the Capital Issues Committee had been obtained. The bank's subscription of £4,000,000 would result in a share premium reserve of £3,000,000, it was proposed to capitalize £1,000,000 of this and use it to pay up in full 1,000,000 4½ per cent Third Cumulative Preference shares of £1 each, to be issued as fully paid to the holders of the company's Ordinary capital in the proportion of one new share for every £4 of Ordinary stock held. Barclays Bank announced that it was arranging for its Scottish affiliate, the British Linen Bank, to participate in the investment.

Westminster Bank and **Martins Bank** announced on July 30 that, subject to the consent of the Capital Issues Committee, they had provisionally agreed to take each a 20 per cent equity interest in the Mercantile Credit Company, another major hire-purchase finance company.

It was stated that the two banks were each taking up 2,476,679 Ordinary 5s. shares at 16s per share, payable in four half-yearly instalments, and that the directors of the Mercantile Credit Company proposed a capitalization issue of Ordinary shares to their existing shareholders (i.e. excluding the two banks) in the ratio of one new share for every 20 already held. The present capital of Mercantile Credit, excluding the new free issue, is £1,725,391 in 6,901,564 shares of 5s.

The National Provincial Bank announced on July 31 that it had made an offer for the whole of the issued share capital of the North Central Wagon and Finance Company, and that the Board of the latter company had recommended acceptance of the offer.

It was stated that the price offered was £4. 10s. a share for the £1 Ordinary shares, and that the offer was conditional on its acceptance by 90 per cent of the Ordinary capital of Central Wagon and Finance, or such smaller percentage as the bank might agree to accept. It was also announced that the Prudential Assurance Company, which owns 54.79 per cent of the share capital of North Central Wagon and Finance (totalling 2,105,333 Ordinary shares of £1 each), had agreed to accept the offer.

Samuel Montagu and Company and **Guinness, Mahon and Company** announced on Aug. 5 that they were each taking a 25 per cent interest in the Industrial Banking Corporation, and that the other 50 per cent of that company's share capital would be held by the Olds Discount Company, the Nottingham-based credit financiers.

It was stated that the Industrial Banking Corporation (which was registered nearly 50 years ago and had been an investment trading subsidiary of Guinness, Mahon and Co.) had been re-formed with a capital of £200,000, and with its headquarters at Olds Discount in Nottingham, for the purpose of carrying on hire-purchase finance for the three interests concerned.

Olds Discount is a public company with a capital of £950,000 in 5 per cent Cumulative Preference and £1,329,000 5s. Ordinary units Samuel Montagu and Co. and Guinness, Mahon and Co. are leading private banking houses in the City of London.

The **Midland Bank** and the **Clydesdale and North of Scotland Bank** (its Scottish affiliate) announced on Aug. 9 that they had made a joint offer to purchase the whole of the share capital of Forward Trust Ltd., another hire-purchase finance house, and that provisional agreement had been reached with the directors of Forward Trust.

It was stated that the price offered was £3. 10s. for each of the Trust's £375,000 Ordinary shares of 10s., and £1 for each of the £100,000 6 per cent Cumulative Preference shares of £1—a total of £2,725,000. The agreement was conditional upon acceptance by all the Ordinary shareholders or such lesser number as the banks might consider sufficient. The directors of Forward Trust had agreed to accept the offer in respect of their own holdings, and the Britannic Assurance Company (which holds about 30 per cent of the Ordinary shares) had also accepted. Forward Trust has its head office in Birmingham, with branches in London, Nottingham, and Glasgow.

The following table, published by *The Times* on July 31, shows the leading hire-purchase finance houses in the U.K., their outstanding debts, and their issued Ordinary capital. The 12 houses account for about nine-tenths of all hire-purchase finance-house business.

Finance House	Outstanding debt	Ordinary capital
United Dominions Trust	£56,700,000	£4,000,000*
Mercantile Credit	19,200,000	3,050,000*
North Central Wagon and Finance	15,000,000	2,105,333
Scottish Midland Guarantee Trust	13,300,000	—
Olds Discount	12,700,000	1,329,000
Bowmaker	11,700,000	1,517,000
Lombank	8,900,000	1,498,148†
British Wagon	8,300,000	1,520,000
Forward Trust	4,400,000	475,000
Wagon Finance	3,200,000	1,250,000
Astley Industrial Trust	3,200,000	305,000
Mutual Finance	2,800,000	275,000

* Allowing for proposed issues. † Issued capital of Lombard Banking, of which Lombank is a subsidiary company.

Scottish Midland Guarantee Trust is wholly owned by the Commercial Bank of Scotland (the only interest by a U.K. bank in hire-purchase finance prior to the latest developments); a large interest in Lombank is held by Cable and Wireless; and Mutual Finance is controlled by Thomas Tilling Ltd.

Thus eight of the twelve hire-purchase finance houses have now formed associations with large investment institutions. (Times - Daily Telegraph - Financial Times)

(Prev. rep. 16269 A.)

B. ISRAEL. — Tenth Anniversary Celebrations. - Opening of Supreme Religious Centre.

The tenth anniversary of the foundation of the State of Israel was celebrated during the last week of April by a number of ceremonies, including a special commemorative session of the *Knesset* on April 22; ceremonies in synagogues and public places in memory of those who fell in the War of Independence; and a big military parade in Jerusalem on April 24. Messages of congratulation were received from President Eisenhower and many other Heads of State, while Sir Winston Churchill sent a message expressing the hope that Israel would "prosper and live in peace and friendship with her neighbours."

A feature of the 10th anniversary celebrations was the opening in Jerusalem on May 8 of a Supreme Religious Centre, a seven-storey building which will be the seat of the Chief Rabbinate of Israel. Situated in King George V Avenue, on the highest hill of the New City, it houses an extensive rabbinical library, a convocation hall seating 1,000 people, a motion-picture projection room, a museum, suites of offices, and a synagogue containing an Ark for the Scrolls of the Law specially brought from the historic synagogue at Padua, Italy.

The Supreme Religious Centre took six years to build at a cost of £600,000, of which £500,000 was given by Mr Isaac Wolfson, the British industrialist and chairman of Great Universal Stores. The building is in Judean stone and the interior largely of marble from Galilee; many of the rooms and halls are finely panelled in English oak.

The dedication ceremony was attended by President Ben-Zvi, Mr. Ben-Gurion and other members of the Cabinet, the Chief Rabbis of Israel and of many countries of Europe and the British Commonwealth, dignitaries of the Christian and Moslem countries in Israel, and the Diplomatic Corps. (Israel Government Press Office - Times - Daily Telegraph)

C. NATIONALIST CHINA. — New Cabinet.

It was announced from Taipeh (Formosa) on June 30 that President Chiang Kai-shek had accepted the resignation of Mr. O. K. Yui as Prime Minister and had appointed Vice-President Chen Cheng as his successor.

Mr. Yui, a banker, had submitted his resignation five times during the preceding 12 months, but on each occasion President Chiang refused to accept it. He first tried to resign after a mob sacked the U.S. Embassy in Taipeh during the anti-American riots of May 1957 (see 15595 C); subsequently he offered his resignation on four occasions after the Control Yuan (the highest supervisory body of the Nationalist Government) had impeached him late in 1957 on charges of neglect of duty, abuse of power, and personal corruption. Following the impeachment action the Government reprimanded by Mr. Yui, but ordered no other punishment.

Mr. Chen Cheng formed a 19-member Cabinet on July 14 in which Mr. Wang Yun-wu became Deputy Premier, Mr. Huang Shoa-ku Minister of Foreign Affairs, Mr. Tien Chun-chin Minister of the Interior, and Mr. Yu Ta-wei Defence Minister. Mr. Huang took over the Foreign Affairs portfolio from Dr. George Yeh, who, it was understood, would replace Dr. Hollington Tong as Ambassador in Washington. The new Foreign Minister is a graduate of the London School of Economics and was formerly publisher of *Ho Ping Jih Pao* (The Peace Daily) from 1942 to 1948.—(New York Times)

(Prev. rep. 13627 D.)

A. UNITED KINGDOM. — R.A.F. Estimates, 1958-59. - Mr. Ward's Review. - Recent R.A.F. Developments.

The Royal Air Force Estimates for 1958-59, and an accompanying memorandum by the Secretary of State for Air (Mr. George Ward), were published as White Papers on Feb. 21, 1958. The memorandum is summarized below under cross-headings.

Finance.

The net total of £467,050,000 shown for the R.A.F. in the Defence Estimates (£20,600,000 less than for 1957-58) was arrived at after deducting from the gross Estimates an amount of £7,500,000 representing the Deutschemark costs of the Second Tactical Air Force in Germany.

Although the Estimates included about £11,000,000 for improvements in pay, allowances, and conditions of service of R.A.F. personnel, reductions in the strength of the force had kept down the actual increase for pay and allowances to only about £2,500,000. A reduction in the number of civilians employed was also provided for, but because of higher salaries and wages the total for civilians was about the same as in 1957-58. There were reductions in the provision for aircraft and equipment (£17,300,000 less), petrol and oil (£2,500,000 less), and works (£14,550,000 less), whilst food, fuel, light, movement of personnel and stores, etc., would also cost less. On the other hand, the Vote for non-effective services was £5,940,000 more than in 1957-57, mainly because of special capital and other compensation payments to personnel prematurely retired or discharged (see 15795 A).

Manpower.

The Air Ministry aimed at having by the end of 1962 an all-Regular force of 135,000 officers and men and 13,000 women and boys, able to meet all requirements. The reduction from 228,000 on April 1, 1957 to 192,000 on April 1, 1958 and an estimated 174,000 on April 1, 1959 reflected reductions already made or planned in the front line and its backing. Ten operational stations in the U.K. and Germany had been closed in 1957-58, as well as 10 Maintenance Command units, recruit and cookery schools, and an R.A.F. hospital. In 1958-59 it was planned to close four more operational stations and to prune supporting organizations (e.g. the movements and marine craft units), and possibly to place more work, including catering, with civilian contractors.

Recruiting.

A total of 14,479 Regular airmen were recruited during 1957 (22,254 in 1956), a decline of 5,975 on short engagements (up to eight years) having been partly offset by an increase of 1,200 in engagements of over eight years. Describing the position as "encouraging on the whole," the memorandum pointed out (*a*) that the reduced number joining on shorter engagements reflected the smaller National Service intake; (*b*) that the average recruiting rate over the past nine months would be more than sufficient to maintain the 1962 target (see above); but (*c*) that it would not build up quickly enough. It was hoped, however, that improved conditions of service would enable the gap to be filled.

Meanwhile the cadet entry to Cranwell and the entry of technical branch cadets to Henlow (to which the scholarship scheme had been extended in 1956) had been satisfactory, but there had been a decline in aircrew recruiting, particularly in navigators and air electronics officers.

Women's Royal Air Force. It was hoped that the higher pay rates (see 16029 A) would reverse the present downward trend of recruiting.

Reserve Organization. This was being further streamlined; three more R.A.F. Figher Control units had been disbanded, while Class E Reserve had been cut heavily.

Incentives. Besides the pay increases announced in the Defence White Paper (see 16029 A), other incentives would include: (*a*) increased allowances for men not provided with married quarters; (*b*) more barrack blocks, single quarters, and messes, replacing hutted accommodation; (*d*) modernization of pre-war permanent accommodation, including married quarters; (*d*) more married quarters, of which the R.A.F. would have 32,000 by the end of 1958.

The Deterrent.

After mentioning the successful dropping of megaton weapons from *Valiant* bombers in the 1957 tests in the Pacific, and the R.A.F.'s part in the Maralinga tests (see 16012 A), the White Paper stressed that the continued effectiveness of the deterrent would be assured by Mark II *Victors* and *Vulcans* now on order, whilst power bombs of considerable range and a British ballistic missile were being developed on high priority. Plans had been prepared for a high proportion of R.A.F. bombers to be ready to take off at once in the event of an emergency.

Air Defence.

Any future threat to Britain (the memorandum pointed out) would come from both manned aircraft and ballistic missiles. Although the planned rundown of fighter strength would be completed during 1958-59, a smaller fighter force would still be needed to deal with manned aircraft and "stand-off" bombers and jammers as well as to investigate unidentified movements and prevent reconnaissance; the P.1 and its associated air-to-air guided weapons were being developed for this purpose. Meanwhile firing trials of the *Bloodhound* ground-to-air guided missile were proceeding at Woomera, and trials of a complete guided weapons system would begin shortly at the North Coates guided-weapons station (see below). The *Thunderbird* would also be tried during 1958, and ultimately the R.A.F. would look to surface-to-air guided missile systems for anti-ballistic missile defence.

The Control and Reporting System. Streamlining had made good progress, and new equipment and techniques would enable Fighter Command to meet bomber attacks further away from British shores. Electric computing equipment was being developed to make possible further improvements in the ground equipment needed for co-ordinated control of the P.1 supersonic fighter and surface-to-air guided weapons.

NATO.

R.A.F units in the Second Tactical Air Force, in Coastal and Bomber Commands, and at Malta provided an effective contribution to NATO, whilst R.A.F. radar stations were a major element in the European radar chain. *Canberras* in the 2nd T.A.F. and Bomber Command were being given a nuclear capacity, which would offset the reduction forecast in the 1957-58 Estimates and now completed. Re-equipment with later aircraft types was also proceeding.

The Middle East.

The reorganization of Middle East Command (see page 16089) was expected to produce "substantial" staff economies. In this connexion Air H.Q. Levant (situated in Cyprus) would be abolished from April 1, 1958, and its duties would be taken over by H.Q. Middle East Air Force.

During 1957 R.A.F. aircraft had assisted in dealing with encroachments on the Aden Protectorate and in suppressing the rising in Oman (see 15709 A), whilst R.A.F. helicopters had been successfully employed on internal security operations in Cyprus.

The Far East.

R.A.F. transport of passenger and freight had still been necessary in 1957 in operations against the Malayan terrorists. Under the terms of the defence agreement between the U.K. and the Federation of Malaya (see 15793 A) the R.A.F. was now assisting in the development of a Malayan Air Force.

The memorandum stated (*a*) that units of the Royal Australian and Royal New Zealand Air Forces were serving with the R.A.F. in the Middle East; (*b*) that the Gan staging post in the Maldive Islands (see 15762 A; 15295 A) was under construction; (*c*) that the R.A.F. station at Katunayake had been handed over to the Ceylon Government on Nov. 1, 1957 (see 15833 D) but was still used for staging R.A.F. aircraft, which had flown in food and supplies during the severe floods of December (see 16046 A). Both in the Far East and in the Middle East garrison squadrons could be rapidly reinforced by aircraft of Bomber Command.

Air Transport.

R.A.F. *Comets* were being used on the aero-medical service from the Far East, and also on a regular service to and from Christmas Island. *Beverley* freighters had proved valuable for moving heavy equipment to small airstrips up-country in the Aden Protectorate, and all Army airborne forces had been converted to *Beverleys*. As the 20 *Britannias* now on order (see 16019 A) were introduced, *Beverleys* would be supplemented by *Hastings* for heavy freight traffic, whilst the *Valettas* would be withdrawn.

Training.

The major accident rate had shown a "marked improvement" in 1957, especially as regards accidents to jet aircraft. The fatal accident rate had been virtually the same as in 1956, which, however, was the lowest for over 20 years.

The use of "synthetic" trainers was increasing - for surface-to-air guided weapons as well as for aircraft. Guided-weapon training was expanding, and a guided weapons school was being set up for training airmen in servicing and maintenance techniques.

Works.

A surface-to-air guided weapon station at North Coates (Lincs.) was nearly finished, and work on other stations would soon begin. About 9,000 acres of land at surplus airports had been sold in 1957, and holdings of requisitioned land had been reduced from 250,000 acres in 1945 to 7,000 acres.

Miscellaneous.

After speaking of the R.A.F.'s part in the work of the Trans-Antarctic Expedition (see 16055 A) and its contribution to the International Geophysical Year, the memorandum stated that the Meteorological Office's H.Q. had been reorganized as recommended by a committee under Lord Brabazon. The Meteorological Committee, which would keep the efficiency and policy of the Meteorological Office under constant review, had been reconstructed under Lord Hurcomb and would have its headquarters at Bracknell.

Statement by Secretary of State for Air.

Mr. George Ward presented the Air Estimates in the House of Commons on March 10.

Mr. Ward first pointed out that although the net total of the Estimates was about £20,000,000 less than last year, the true saving was considerably greater when allowance was made for the effect of increased pay and allowances, compensation for premature retirement, etc. Less was being spent on aircraft, but this would partly be offset by increases on armament, ammunition, missiles, and

guided weapons. Staffs, civilian as well as Service, had been considerably reduced, and on April 1, 1958 the R.A.F. would be employing about 107,000 civilians, compared with nearly 115,000 on April 1, 1957. The number of R.A.F. headquarters was still being reduced; those for Fighter Command and the 2nd T.A.F. group, as well as the Ceylon, Levant, and Singapore headquarters, had recently been closed or were about to be closed.

An internal review of Air Ministry organization had been undertaken to consider what staff changes and reductions would be possible in the next few years; although no large reduction would be possible because of the re-equipment programme, it was hoped to reduce headquarters staff by about 500 by Dec. 31, 1958. Outside the Air Ministry it was hoped to save about 2,000 civilians in 1958-59, although many essential tasks would have to be transferred to civilians. In the past two years about 3,000 posts had been "civilianized," and at present one-third of R.A.F. requirements were being met by civilians The search for operational economies included the introduction of an "electronic brain" for the supply and pay systems

As regards the chances of building up an all-Regular R.A.F. by 1962, recruiting of officers was "satisfactory on the whole" and it was unlikely that there would be any difficulty about filling aircrew requirements, except for navigators, where the position was "worrying." The number of Regular airmen on long-term engagements of nine years or more had risen from about 35,000 in 1950 to 65,000 at the end of 1957, whilst entry of apprentices and boys in 1957 was 25 per cent up on 1956. At the present rate of recruiting, however, there would only be 120,000 Regular officers and airmen by 1962, and the target of 135,000 would not be reached before 1965. The annual intake must therefore be increased and, in addition to the inducements already announced, the Air Ministry must concentrate on increasing the attractions and reducing the drawbacks of Service life. Steps already taken included: (*a*) the introduction of the "key personnel" scheme, allowing a percentage of n.c.o.'s and airmen to remain at the same station for up to five years and thus reducing the deterrent to recruiting caused by frequent postings; (*b*) a smarter walking-out dress for men on long-service engagements, which—together with blue gabardine raincoats in addition to the Service greatcoats—would be issued to all Regular airmen as from April 1958; (*c*) up-to-date holdalls which would eventually replace kitbags for carrying airmen's home kit. Improvements to encourage cadet forces would include the opening in 1958 of six new gliding schools and one full-time gliding centre, and the replacement of the present A.T.C. uniform by battledress over the next four years.

Mr. Ward then dealt with the striking and defensive power of the R.A.F., emphasizing that for the present the main threat to Britain would continue to come from the manned bomber, and that Fighter Command would still play a major part in air defence. In this connexion he announced (*a*) that a new *Javelin* fighter, equipped with a *Firestreak* missile, would come into service during 1958, and (*b*) that a long-range version of the powered bomb was being developed (see below). The Minister said:

"Having examined most critically the length of time which the V-bomber force is likely to remain an effective deterrent, bearing in mind the increasing power of the enemy defensive system, I am quite certain that we can rely on the V-bomber force to remain highly effective, certainly until it is supplemented by the British intermediate-range ballistic missile. Even then it will still have great value, and the two threats—manned bomber and ballistic missile—will set the enemy a much greater problem than either one of them would in isolation.

"... We must remember the enormous problem which the Russians face in defending their frontiers, besides the flexibility of the manned bomber and the various methods of attack we can employ to keep the enemy guessing. The later marks of V-bomber will have considerable advantages over the earlier versions because of their greater range and their equipment with the powered bomb, which will give them a wide choice of approaches to a given target. Furthermore, their increased operating height will make them less vulnerable to enemy defences.

"We are improving the performance of our fighters and their weapons system, as well as introducing the *Bloodhound* surface-to-air missile. So long as the main threat to these islands is from manned bombers—and there is no evidence yet to suggest that this is not so—the manned fighter with its guided weapons, range and inherent flexibility, supplemented by the surface-to-air guided missile, should be well able to meet the newest types of Russian bomber and discharge its primary task of defending the retaliatory force from destruction on the ground. This year will see the introduction of the Mark VII *Javelin* and the *Firestreak* missile which goes with it. Later on the *Javelin* Mark VII and Mark VIII will be given reheat to extend their effective lives, and the P.1 will come into Fighter Command."

In answer to a question by Mr. Shinwell (Lab.), Mr. Ward replied: "What I meant was that at the present time the main threat is from the bomber and not from the ballistic missile. But of course the position may change later on." He added that the P.1 would have its performance improved by installing electric computing equipment which would tell the automatic pilot the place in which to intercept the bomber, thus enabling the human pilot to act as a directing brain mounted in, and in charge of, a highly developed guided weapon (see below).

After saying that whilst the control systems of the *Bloodhound* would be tested at North Coates the actual firing would take place from the Aberporth (North Wales) range, Mr Ward explained that the North Coates trials would make it possible to draw up a "Service doctrine" for the handling and maintenance of the missile and its co-ordination with manned fighter defence. He concluded by stating that the long-term base of the R.A.F. in the Far East would be Singapore, and that the policy of equipping overseas theatres with aircraft designed for home stations would continue and would probably be extended to guided missiles. These aircraft would eventually have to be replaced, however, and although the *Canberra* had several years of useful life before it, there was need of a new strike and reconnaissance aircraft for overseas theatres. The Government were therefore reviewing the expected performances of types already being developed and those of designs put forward by aircraft firms in reply to a general operational requirement issued in October, 1957. They were also consulting the War Office about a successor to the *Beverley* transport.

An amendment by Mr. Emrys Hughes (Lab.) to reduce the Estimates by 1,000 men was rejected, and the Estimates were then passed.

Recent R.A.F. Developments.

Other recent developments in connexion with the R.A.F. are summarized below:

Re-forming of "Dam Buster" Squadron. The Under-Secretary for Air (Mr. C. I. Orr-Ewing) announced on Sept 19, 1957 that the famous "Dam Buster" squadron—which during the Second World War breached the Möhne dam and sank the *Tirpitz* in Altenfjord, but was disbanded in 1956—would be re-formed and equipped with *Vulcan* delta-wing bombers.

Closing of Biggin Hill Station. The R.A.F. station at Biggin Hill, on which fighters taking part in the Battle of Britain were based, ceased to be used by Fighter Command from March 1, 1958, but remained under R.A.F. control.

New British Power-Guided Bomb. The Ministry of Supply announced on April 21, 1958, that flight trials had begun of the new British "power-guided" bomb mentioned in the Defence White Paper (see page 16030). It was explained that the bomb—being developed by A. V. Roe and Co. for use with V-class bombers—was fired a long way from its target, to which it would then travel; aircraft would thus be able to escape ground-to-air missiles.

New Radar System for Fighters. Details were published on June 26, 1958 of a new airborne radar and fire-control system—known as "Airpass"—for use in the P.1 supersonic all-weather fighter, to enable pilots to locate hostile aircraft and attack them with guided weapons, rockets, and guns. Described as "one of the most versatile airborne radar systems in the world, "Airpass" (airborne interception radar and pilots' attack sight system) consists of a radar unit and a sighting system. The former enables the pilot to find a hostile aircraft by day or night and to "lock" the radar beam on to it Thereafter the radar automatically tracks the target and feeds information to the sighting system, enabling the pilot to manoeuvre into a suitable position from which to attack. It was claimed that the sighting system would ensure that weapons were aimed correctly even when the target was invisible to the pilot and travelling at supersonic speed.

The Air Ministry announced on Aug. 8 that it had been decided to name the English Electric P.1 fighter the *Lightning*. Powered by two Rolls-Royce *Avon* jet engines, it will be the R.A.F.'s first supersonic piloted jet fighter.—(Cmnd. 373 - Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 1958-59 Defence Estimates, 16029 A; 1957-58 Air Estimates, 15762 A.)

A. ATHLETICS. — New Mile and Two-Mile Records.

Herbert Elliott (20), of Australia, set up a new world record for the mile in Dublin on Aug. 6 with a time of 3 minutes 54.5 seconds—2.7 seconds faster than the previous world record of 3 min. 57.2 sec. set up in July 1957 by Derek Ibbotson, of Great Britain. Four other runners—M. Lincoln (Australia), R. Delaney (Eire), M. Halberg (New Zealand) and A. Thomas (Australia)—also ran the mile in under four minutes in the same race in which Elliott set up the new record; their respective times were 3 min. 55.9 sec., 3 min. 57.5 sec., 3 min. 57.5 sec., and 3 min. 58.6 sec.

Another world record was broken in Dublin on Aug. 7 by Albert Thomas (Australia), who ran two miles in 8 min. 32 sec.; the previous world record for the two miles (8 min. 33.4 sec.) was set up in June 1955 by S. Iharos, of Hungary. Thomas was one of the five athletes who had run the mile in under four minutes on the previous day.—(Irish Times, Dublin)

(Prev. rep. 15678 B.)

B. JORDAN. — Dissolution of Arab Federal Union.

King Hussein of Jordan issued a decree on Aug. 2 stating that the Arab Federal Union of Jordan and Iraq had ceased to exist and that the Federal Constitution was "in suspense and inapplicable in practice."—(Times - Observer)

(Prev. rep. 16305 A; 16230 A.)

A. FINLAND. — General Elections.

Following the dissolution of the Finnish Diet, which had completed its four-year term, general elections were held in Finland on July 6-7 ; some 1,050 candidates contested the 200 seats in the Diet, which were filled by proportional representation. The results were announced on July 11 as follows :

	Seats		Votes	Percentage	
	1958	1954	1958	1958	1954
Popular Democrats	50	43	445,832	23.17	21.59
Social Democrats	48	54	445,591	23.11	26.25
Independent Social Democrats ..	3	—	33,555	1.74	—
Agrarians	48	53	445,536	23.06	24.10
Conservatives ..	29	24	288,327	15.61	12.80
Swedish People's Party	14	13	131,404	6.76	6.98
Finnish People's Party	8	13	113,691	5.90	7.88

Another 15,252 votes (0.65 p.c.) were cast for Independent candidates, against 0.4 p c. for such candidates in 1954

73.8 per cent of the electorate of 2,630,000 went to the polls, against 79.9 per cent in 1954.

The outstanding features of the elections were (1) that the Popular Democratic Union (Communists) became the strongest party ; and (2) that, for the first time since 1916, the left-wing parties (Popular Democrats, Social Democrats, and Independent Social Democrats) commanded an overall parliamentary majority—viz. 101 seats, against 99 held by the right-wing parties.

The Social Democrats lost six seats but the Independent Social Democrats, which had split from the main party in March 1958 [see 16174 A], gained three—an overall Social Democratic loss of three seats compared with their strength in the previous Diet. The heaviest losses were suffered by the Agrarians and the Finnish People's Party, each losing five seats , the Conservatives gained five seats and the Swedish People's Party one

The reason for the Agrarian set-back was seen in the unpopularity of their economic policy of advocating higher prices for farm products at the expense of the urban population. The Finnish People's Party, whose leader (Professor Eino Saari) lost his seat, had at one time supported this policy. The Social Democratic losses were generally attributed to the split in the party's ranks, while the success of the Communists was ascribed to the country's economic difficulties, especially the increase in unemployment.

Immediately the election results became known, the Popular Democrats suggested to the Social Democrats that the two parties should form a coalition government ; this offer was rejected by the Social Democrats.

The new Diet met for the first time on July 29, when it elected Mr. V. J. Sukselainen—the leader of the Agrarians, and a former Prime Minister—as its Speaker.

The new parliamentary session was formally opened on July 30 by President Kekkonen, who appealed for co-operation between the parties to solve the country's grave social and economic problems, which required immediate attention. Later the same day it was announced that, following discussions between President Kekkonen, the Speaker, and the leaders of the political parties, it had been decided that there was no need for Dr. Kuuskoski's non-party government to tender its resignation immediately, as it had been formed on the express understanding that it would only remain in power until a parliamentary government was set up after the elections.

Further Split in Social Democratic Party.

Prior to the meeting of the new Diet, 10 members of the opposition group within the Social Democratic Party had written to the party executive proposing negotiations for the restoration of party unity, laying down certain conditions, and stating that they would refuse to take any further part in the party's parliamentary activities unless they received a reply by July 25. As the party executive refused to enter into such negotiations, and insisted on all matters in dispute being settled under the terms of the party's statute, the 10 M.P.s decided on July 28 to leave the party and to join the Independent Social Democrats. This decision increased the strength of the Independent Social Democrats to 13, while reducing that of the Social Democrats to 38. The Independent Social Democrats subsequently elected Mr. Simonen as their leader.—(Ministry of External Affairs, Helsinki)

(Prev. rep. 16174 A ; Elections, 14073 A.)

B. FRANCE - SOVIET UNION. — Opening of Direct Air Services between Paris and Moscow.

Direct air services between Paris and Moscow were opened on Aug. 1 by *Air France* and the Soviet *Aeroflot* line, the former using Super-Constellations and the latter TU-104 jet airliners. There will be two services a week in each direction by the two airlines.—(Le Monde, Paris)

(Prev. rep. 16311 B; 16266 B.)

C. UNITED STATES. — Launching of Explorer IV.

The largest American earth satellite launched to date, *Explorer IV*, was successfully fired into orbit at Cape Canaveral on July 26. Constructed and fired by the U.S. Army, it was the first satellite to be launched by the new Advanced Research Projects Agency (see page 16160).

Explorer IV weighs 38.43 pounds over seven pounds more than the two previous *Explorers* (*I* and *III*) that achieved orbit. A bullet-shaped missile, its overall weight is made up of 25.76 lb. for the satellite proper, 18.26 lb. of instruments carried, 7.50 lb. casing, and 12.67 lb. for the fourth-stage *Jupiter-C* rocket. It is 80 inches long 34 in. for the satellite itself and 46 in. for the final-stage rocket.

Whereas *Explorer I* and *Explorer III* were primarily designed for investigations into outer space temperatures, micro-meteorites, etc., and *Vanguard I* for temperature investigations only, *Explorer III* was specially designed to investigate the unidentified radiation whose intensity was such as to overwhelm the cosmic-ray counters carried in *Explorers I* and *III*. [As stated by Dr. Van Allen on May 1, the two latter satellites had encountered a hitherto unknown radiation belt of exceptional intensity at altitudes of 600 miles and beyond—see 16208 D.] For this purpose *Explorer IV* carries four radiation counters, two of the Geiger type and two of the scintillation type, and two radio beacons designed to transmit continuous information. The Geiger counter works by ionization of gas, and the scintillation type by converting radiation into pinpoints of light and counting them. Of the two radio beacons, one (of 30 milli-watts) transmits on 108.03 megacycles and the other (of 10 milli-watts) on 108 megacycles.

Explorer IV was fired at an angle of 51 degrees to the plane of the Equator, and will thus traverse an area of the earth's surface between 51 deg. N. latitude and 51 deg. S. latitude ; all previous satellites launched from Cape Canaveral had orbits ranging between 35 deg. N. and S. latitudes. The orbit of *Explorer IV* will carry it over a large part of the Soviet Union (the first U.S. satellite to do so) as well as over the whole United States, most of South America, and parts of Canada, Australia, and Africa ; its northernmost range in Europe will bring it over the south of the British Isles and to points north of Paris and Prague. First reports placed its apogee at 1,386 miles, its perigee at 178 miles, and its orbital time at 110 minutes.

Explorer III, launched into an erratic orbit on March 26, was believed to have come to an end on June 27, according to the Smithsonian Observatory at Cambridge (Mass.) and the Naval Research Laboratory in Washington ; one of its radio transmitters went "dead" on June 5, and no signals were received from the second after June 16.

The earth satellites at present encircling the globe are the American *Explorer I*, *Explorer IV*, and *Vanguard I* and the Russian *Sputnik III*. The *Explorer I* is expected to orbit the earth for three to five years, *Explorer IV* for a few years, and *Sputnik III* for about six months, while *Vanguard I* is expected to remain in orbit for at least two centuries. (New York Times)

(Prev. rep. Explorer III, 16147 B ; Sputnik III, 16182 A ; Cosmic Radiation Belt, 16208 D.)

D. IRAQ. — Republican Regime recognized by Great Britain and United States.

During the first week of August the new Republican Government of Iraq was officially recognized by the United Kingdom, the United States, Canada, Australia, New Zealand, Denmark, Norway, Sweden, Finland, and Lebanon.

British recognition of the Iraqi Republic was conveyed to Brigadier Kassem by Sir Michael Wright (H.M. Ambassador in Baghdad), who called on the Iraqi Prime Minister on Aug. 1. Sir Michael bore a letter from the British Government which (*a*) noted the assurances of the Iraqi Government with regard to the continuation of friendly relations between Iraq and the U.K., and the maintenance by Iraq of her existing international obligations ; (*b*) recognized that Iraq was an independent sovereign State ; and (*c*) recognized the Government formed by Brigadier Kassem as the Government of the Republic of Iraq. It was stated in Baghdad that Brigadier Kassem had told Sir Michael Wright that Iraq would base her relationship with Britain on "mutual interest and equality."

A Foreign Office spokesman in London said that Britain had reserved the right to claim compensation for the damage to the British Embassy and the death of Lieut.-Colonel Graham, who was shot during the revolt.

In addition to the countries mentioned on page 16307 (first column), the Iraqi Republic was also recognized by Saudi Arabia and Morocco during the last week of July. (Times - Daily Telegraph - Le Monde - New York Times) **(16305 A)**

Corrigenda. (1) The member of the British Embassy staff in Baghdad who was killed on July 14 was Lieut.-Colonel Patrick Graham—not Lieut.-Colonel "Wright" as incorrectly stated on page 16305.

(2) The correct name of the new Foreign Minister of Iraq is Dr. Abdul Jabbar Jomard. (Ed. *K.C.A.*).

A. SHIPPING. — World Construction Figures.

Lloyd's Register returns of merchant shipbuilding for the second quarter of 1958, published on July 23, gave the gross tonnage of vessels under construction throughout the world (excluding the U.S.S.R. and China, as well as all vessels under 100 tons, barges, etc.) as 10,133,497, of which 22.65 per cent was building in the United Kingdom and 77.35 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 336 of 2,295,371 tons (steamers 1,102,860 tons, motorships 1,192,511 tons), including 2 steamers of over 40,000 tons, 5 of 30,000-40,000 tons, 8 of 25,000-30,000 tons, and 13 steamers and 3 motorships of 20,000-25,000 tons. Of the total, 283 ships (1,950,674 tons) were building for the U.K., 17 (34,923 tons) for other British Commonwealth countries, 9 (98,300 tons) for Norway, 2 (42,000 tons) for Denmark, 4 (34,350 tons) for Liberia, 3 (25,800 tons) for Belgium, 2 (19,300 tons) for Greece, 1 (18,750 tons) for Panama, 1 (12,000 tons) for the Irish Republic, 2 (2,700 tons) for Poland, 1 small vessel each for the U.S.S.R. and Kuwait, and 6 ships (44,150 tons) for unspecified countries. The principal shipbuilding centres were: the Clyde (99 ships of 677,112 tons), the Tyne (38 ships of 382,352 tons), Belfast (19 ships of 337,800 tons), Sunderland (31 ships of 268,380 tons), the Tees (23 ships of 254,781 tons), Liverpool (12 ships of 106,202 tons), and Barrow (3 ships of 94,000 tons).

Ships building in other countries numbered 1,315 of 7,838,126 tons (steamers 3,546,094 tons, motorships 4,292,032 tons), divided as follows: Japan 147 (1,255,563 tons); Western Germany 228 (1,100,064 tons); Italy 98 (901,655 tons); the U.S.A. 47 (840,688 tons); the Netherlands 166 (724,864 tons); Sweden 67 (623,040 tons); France 63 (561,342 tons); Norway 62 (305,810 tons); Spain 107 (262,696 tons); British Commonwealth countries 70 (242,254 tons); Denmark 36 (234,149 tons); Poland 69 (196,000 tons); Yugoslavia 33 (192,415 tons); Finland 65 (182,773 tons); Belgium 16 (152,089 tons); Portugal 24 (43,040 tons); Turkey 8 (8,453 tons); Peru 1 (4,297 tons); Argentina 1 (3,000 tons); the Irish Republic 3 (2,397 tons); and 1 small vessel each in Mexico, Brazil, Greece, and Indonesia. The total included 2 steamers of over 40,000 tons in Japan, and 1 each in France, Sweden, and the U.S.A.; 6 steamers of 30,000-40,000 tons in the U.S.A., 2 each in Germany and Italy, 1 in the Netherlands and 2 motorships of this size in France; and 11 steamers of 25,000-30,000 tons in Japan, 4 in the U.S.A., 3 each in Sweden and Germany, 2 in France, and 1 motorship of this size in Sweden.

Tankers building throughout the world numbered 359 of 5,257,975 tons, including 74 (1,109,990 tons) in the U.K., 46 (757,493 tons) in Japan, 30 (710,450 tons) in the U.S.A., 32 (590,618 tons) in Italy, 59 (381,695 tons) in Western Germany, 20 (380,490 tons) in Sweden, 26 (351,218 tons) in the Netherlands, 14 (298,140 tons) in France, 15 (198,530 tons) in Norway, and 10 (155,000 tons) in Denmark.

Recent developments in connexion with shipping and shipbuilding are summarized below.

Proposed U.S. "Super-Liners." The U.S. Senate passed a Bill on June 9 authorizing the Government to build two new "super-liners," for operation respectively on Atlantic and Pacific routes, and to sell them to commercial operators at less than half their cost. The new Atlantic liner, intended as a sister ship to the *United States* (53,329 gross tons—see 12332 A), was estimated to cost $130,000,000 (about £46,500,000) and will be sold for $47,000,000 (£16,750,000); the smaller Pacific liner was expected to cost $75,000,000 (£27,000,000) and will be sold for $33,000,000 (£12,000,000).

New North Atlantic Passenger Line. A new U.S. passenger line—the American Banner Line, connecting New York with Zeebrugge (Belgium) and Amsterdam (Holland)—was inaugurated on June 19, when the tourist class liner *Atlantic* (18,100 gross tons) arrived at Zeebrugge on her maiden voyage from New York. Formed with the aid of a U.S. Government subsidy by Mr. Arnold Bernstein (who controlled the Red Star Line before World War II), the new line will principally carry tourist-class passengers. It is intended later to put two similar ships into service.

New Italian and West German Liners. The new Italian liner *Federico C* (22,000 gross tons—see 16168 A), of the Costa line, sailed from Genoa on March 23 on her maiden voyage to South America.

The liner *Hanseatic* (26,313 gross tons), formerly the Canadian Pacific *Empress of Scotland* and now owned by the Hamburg-Atlantic line (see 15989 A), left Cuxhaven on July 22 on her first voyage for New York under the West German flag. Reconditioned at a cost of £1,500,000, the ship accommodates 1,200 passengers, mainly in the tourist class.

New Greek Shipyard. The keel of a 25,000-ton tanker for the Niarchos group was laid on July 15 at Mr. Niarchos' new Hellenic Shipyard at Scaramanga, Greece (see 15704 A)—the first vessel to be built at this yard. It was stated that the Hellenic yard would in due course build tankers up to 65,000 tons, and that a floating dock able to take vessels of this size was being built for the yard in Germany.

New Tanker Finance Plan. It was stated on June 19 that a new company—Tankship Finance (U.K.) Ltd.—was being formed by a consortium of investment bankers, headed by M. Samuel & Co., to raise £10,600,000 on the British market to finance the tanker-building programme of the Caltex group of companies. Ships already on order in British, Continental, and Japanese yards will be taken over by the new company and chartered until 1983 to the Overseas Tankship (U.K.) Co. Ltd—the British tanker-operating subsidiary of the Caltex group, which will subscribe for £3,000,000 of the new company's loan capital.

Falling-Off in Orders for British Shipbuilders.

Figures published on July 22 by the Shipbuilding Conference showed that 28 ships aggregating 63,000 gross tons were ordered from British shipbuilders in the second quarter of 1958, bringing the total number ordered since June 30, 1957 to 164, aggregating 593,000 tons—the lowest figures since 1954. The number of ships on shipbuilders' order books at June 30, 1958, was 695, aggregating 5,970,000 gross tons and of an estimated value of about £860,000,000; by comparison, 812 ships aggregating 6,828,000 gross tons, and worth about £1,000,000,000, were on the order books at Dec. 31, 1957.

During the second quarter of 1958 orders were cancelled for nine ships, aggregating about 100,000 gross tons, bringing the number of cancellations from British shipyards in the year ended June 30 to 37.

Nuclear Propulsion.

It was announced on May 6 that Swan, Hunter, and Wigham Richardson Ltd. (Wallsend-on-Tyne), one of the leading British shipbuilding and marine engineering concerns, would collaborate with the Nuclear Power Plant Company (see 14360 A) in building nuclear-powered merchant ships. Messrs. Swan, Hunter, thus became the fourth British shipbuilding firm to make co-operative arrangements for exploring marine nuclear power, the others being John Brown and Co., Cammell, Laird and Co. (see 15704 A) and the Vickers group. In addition, Richardsons Westgarth and Co (the marine engineers) have formed a subsidiary for this project (Richardsons Westgarth, Atomic, Ltd), and the Mitchell Engineering Co. are also carrying out researches in this field. (Lloyd's Register of Shipping - Times - Daily Telegraph - New York Times) **(Prev. rep. 16168 A.)**

B. NEW ZEALAND. — Institute of Nuclear Science. - Creation of Atomic Energy Committee.

The N.Z. Minister of Scientific and Industrial Research, Mr. Holloway, announced on June 11 that the Government had decided to set up an Institute of Nuclear Science and to proceed with plans to purchase an atomic particle accelerator.

Mr. Holloway explained (1) that the new Institute would be a branch of the Department of Scientific and Industrial Research; (2) that the University of New Zealand would be fully represented on the Institute's advisory committee and would be given research facilities; (3) that the Institute would also provide laboratories and other facilities for the use of other universities, who would, however, be encouraged to develop research and training in the nuclear sciences within their own organizations. The decision to establish the Institute had been taken on the basis of recommendations by Australian and U.S. nuclear research experts who had visited New Zealand earlier in the year.

In a further statement on July 9 Mr. Holloway announced the appointment of a New Zealand Atomic Energy Committee, with the following responsibilities:

"To advise on the organization and administration of the Institute of Nuclear Sciences; make recommendations regarding the programme of research work at the institute and the funds required; advise on the co-ordination of New Zealand's activities in atomic affairs, including those of an international nature; encourage the publication and dissemination of the results of nuclear research; and advise on such other matters relating to nuclear science as might be referred to it."

The Committee will be under the chairmanship of Dr. R. W. Harman and will consist of two members of the Council of Scientific and Industrial Research, two scientists of the University of New Zealand, the University's Vice-Chancellor, and the Secretary of the Department of Scientific and Industrial Research—the two latter as *ex officio* members.

Dr. Harman (60), a New Zealander, had a distinguished career as scientist and administrator in Australia, where he was general manager and director of the Colonial Sugar Refining Company and a member of the Australian Atomic Energy Commission's advisory committee; he also served as Deputy-Chancellor of the Council of the New South Wales University of Technology.—(Directorate of Information, Wellington - N.Z. Department of External Affairs)

C. OMAN. — British Military and Economic Aid.

The U.K. Foreign Secretary (Mr. Selwyn Lloyd) announced in a written reply on July 31 that Britain had agreed to help the Sultan of Muscat and Oman to strengthen his military forces, and also to provide economic aid for the development of the Sultanate. The arrangements would include (1) the secondment of British military personnel where necessary; (2) the establishment of a small air force as an integral part of the Sultan's armed forces; and (3) British assistance in a civil development programme which would include road construction, medical and educational facilities, and agricultural research.—(Manchester Guardian) **(Prev. rep. 15709 A.)**

A. UNITED KINGDOM.—Report of British Transport Commission for 1957. - Deficit of £27,000,000 on British Railways.

The report and accounts of the British Transport Commission for the year ended Dec. 31, 1957, were published on June 27, 1958. They showed that the Commission had incurred the heaviset loss since its formation in 1948—this result being entirely due to losses on British Railways, whereas other sections of the Corporation's activities improved their position.

The operational deficit on British Railways amounted to £27,140,186, compared with a deficit of £16,496,624 in 1956. The Commission's other activities, including British Road Services, buses, London Transport, ships, docks, etc., earned a working surplus of £23,458,293. In view of the "intensified competition in all branches of public transport," the Commission considered the results of the year's working "as good as could reasonably be expected." They recognized, however, that "the prospects for increasing revenue at this time are not bright" and that the major objective in 1958 must be the reduction of working expenses. They also intended to "press urgently ahead" with the railways' modernization plan.

The report explained that at the beginning of the year receipts of British Railways, London Transport, and the Tilling and Scottish bus groups were "running well above expectations" as a consequence of oil and petrol rationing. For a short time the Commission were "within measurable distance of balancing their accounts," but this additional traffic fell off when petrol rationing was abolished. Moreover, the 5 per cent wage increase in January 1957 (see page 15434) and the rise in coal prices in July 1957 (see 15767 A) had cost the Commission £20,000,000 and £5,000,000 a year respectively The main increases in fares and charges to meet these additional costs were deferred until August-September, which meant that the receipts from extra traffic during petrol rationing were broadly absorbed by the higher costs incurred up to those dates.

Railway re-equipment and re-organization had made "encouraging progress" during the year, and in some important respects the modernization plan was "well ahead" of schedule. In many directions freight and passenger services had reached higher standards of speed, reliability, and convenience in 1957. The decline in railway freight traffic, in spite of the moderate level of rail charges in relation to prices generally, was attributed to (*a*) the general economic conditions; (*b*) increasing diversion of traffic to "C"-licensed road vehicles. In this connexion the report stated that the number of these vehicles in service passed the 1,000,000 mark for the first time towards the end of the year—a threefold increase since pre-war. Passenger traffic, on the other hand, continued to improve, and in spite of the growth of private transport British Railways were carrying more passengers than at any time since nationalization.

Analysis of Financial Results.

The financial results of the Commission's various activities were shown as follows:

Principal Carrying Activities—gross receipts, £712,310,646; working expenses, £724,262,212; deficit, £11,951,566.

Other Principal Activities—(docks and harbours, inland waterways, hotels and catering, letting of land and buildings)—gross receipts, £52,495,016; working expenses, £47,037,183; surplus, £5,457,833.

Income from Subsidiary and Associated Companies (i.e. bus and shipping companies, travel agencies, etc.)—surplus, £2,811,840.

The year's operations thus resulted in a working deficit of £3,651,893; but after taking into account interest and central administrative charges (together amounting to £59,847,429), the total deficit for the year amounted to £63,499,142. Under the Transport (Railway Finances) Act the Commission is authorized to borrow this amount from the Treasury.

Carrying Activities. Of the total receipts from this source, passenger traffic accounted for £286,162,524 (against £269,041,459 in 1956), freight traffic for £411,590,909 (£400,783,953 in 1956), and miscellaneous activities for £14,557,213 (£12,974,340). Details are shown below (all figures in £ million):

	Gross Receipts	Working Expenses	Surplus (+) or Deficit (−)	Better (+) or Worse (−) than 1956
British Railways: Passenger .. 138.9; Freight, Parcels and Mails .. 288.5; Parcels, etc. by Passenger Train 51.4; Collection and Delivery .. 13.3; Miscellaneous .. 9.3	501.4	528.5	−27.1	−10.6
British Road Services (Road Haulage)	50.3	47.5	+2.8	+1.0
Road Passenger Services (Provincial and Scottish Buses)	58.5	53.5	+5.0	−0.3
London Transport Services: Road Services	60.0	56.2	+3.8	+1.3
Railways ..	24.4	22.5	+1.9	−0.1
Ships (Passenger and Cargo Services)	16.6	14.7	+1.9	+0.1
Inland Waterways (Carrying Operations)	16.6	1.2	−0.2	−0.1

The percentages of working expenses to gross receipts were as follows: British Railways freight and passenger services, 105; road haulage services, 94; road passenger services (Provincial and Scottish), 91; London Transport road services, 94; London Transport railways, 92; ships, 89; inland waterways (carrying operations), 123.

Non-carrying Activities: The net profit of £5,457,833 was arrived at as follows:

Docks, Harbours and Wharves gross receipts £21,657,601; working expenses £19,224,927; net receipts £2,432,677.

Inland Waterways (non-carrying activities)—gross receipts, £2,668,139; working expenses, £3,024,995; deficit, £356,856.

Hotels and Catering—gross receipts, £21,906,887; working expenses, £21,760,372, net receipts, £146,515. Profits of £184,540 and £470,770 on hotels and refreshment rooms respectively were partially offset by a loss of £508,795 on restaurant cars.

Letting of Land and Buildings—Gross receipts, £6,262,386; working expenses, £3,026,889; net receipts, £3,235,497.

Detailed information given in the report regarding the principal activities of the British Transport Commission is summarized below:

British Railways. Passenger journeys and passenger-miles were each about seven per cent above 1956, but freight-tons and ton-miles were down by one per cent and three per cent respectively. Working expenses were £31,000,000 more than in 1956, including £26,000,000 for higher wages and general costs; most of the balance was for higher maintenance costs. Total train mileage increased by 1.6 per cent, largely as a result of further conversions from steam to diesel or electric multiple units.

During 1957 multiple-unit diesel trains were introduced on about 21 new routes, including Edinburgh-Glasgow (traffic up by 26 per cent); London-Hastings (diesel traffic 10 per cent more than corresponding steam services); Birmingham-Swansea (20 per cent traffic increase); Newcastle-Carlisle (34 per cent traffic increase). In the Birmingham and Hull areas diesel traffic was respectively 18 and 58 per cent higher than traffic under steam; in the Darlington area 30 per cent; in the Leeds-Bradford area 27 per cent; and in the Manchester-Macclesfield and Crewe-Stoke-Derby areas 29 per cent and 48 per cent respectively. By Dec. 31, 1957, a total of 1,316 new diesel train vehicles had been completed, out of 2,776 on order.

Progress in introducing better facilities for goods traffic had been slower, but total train-miles run by freight trains fully or partially fitted with vacuum brakes had risen by 20 per cent, with marked improvement in speed and reliability.

During the year further branch line services had been withdrawn and a number of wayside stations closed.

British Road Services. Despite some loss of traffic early in 1957 owing to fuel rationing, gross receipts were only about £100,000 less than in 1956, whilst expenses fell by about £1,100,000. Reasonable profits were earned by the Pickfords, Parcels, and Contracts companies, but the Meat Haulage company had incurred a loss on its operations.

Provincial and Scottish Buses. Results in 1957 were affected by fuel rationing in the early months and the national bus strike in July. The report added: "Public road passenger transport, without such abnormal influences, had been suffering a downward trend in traffic . . . The additional 444,000 private motor vehicles (including scooters and mopeds) which came on to the roads in 1957 could not fail to affect bus carryings. For this reason the maintenance of marginal services, such as those in rural areas, became more onerous. After careful examination and with the approval of the Traffic Commissioners it was possible to make a small reduction in service-miles on these routes, but the proportion of unremunerative services operated in England, Wales, and Scotland still remains uncomfortably high."

London Transport. Mainly owing to higher fares, receipts were the best since 1948. Although petrol rationing in the early months of 1957 led to additional traffic on L.T. road and rail services, traffic fell away rapidly as soon as rationing ended and the downward trend of recent years was resumed. The number of passengers on L.T. services fell by 2.3 per cent, but Green Line coach passengers increased by 9.5 per cent.

Ships. As in previous years, the main Continental services, apart from Southampton-Le Havre and Newhaven-Dieppe (see below) had produced satisfactory results, but the Clyde and Channel Islands services continued to show heavy losses. Passengers between Britain and the Continent rose by 68,000 but those to and from the Channel Islands fell by 63,000. About 26,000 more passengers were carried to and from Northern Ireland and 22,000 fewer to and from the Irish Republic.

Cargo declined by 90,000 tons, but 32,000 more motor vehicles were carried.

Docks, Harbours and Wharves. Total inward traffic rose by 2 per cent to 28,584,000 tons, but outward traffic declined by 3 per cent to 35,358,000 tons.

Staff. The Commission's staff increased by 307 during the year to 806,277 at Dec. 31, 1957, of whom 573,499 were employed by British Railways.

Other developments in connexion with nationalized public transport in recent months are described below.

Closing of Uneconomic Railways. The B.T.C. announced on June 11, 1958 that British Railways (Eastern Region), intended to close the greater part of the former Midland and Great Northern Joint Line, thus effecting an estimated saving of £500,000 a year and avoiding heavy expenditure on engineering works otherwise required. The first stages of the closure would take effect by the end of 1958.

The M. and G.N. line, with a length of 180 route miles, runs from Edmondthorpe (Leics.) and Peterborough (Northants.) to Sutton Bridge (Lincs.) and thence to Kings Lynn and Melton Constable (Norfolk), where three branches radiate to Cromer, Norwich, and Yarmouth. Only the Melton Constable-Cromer section will be retained pending further examination. The B.T.C. pointed out that the railway "is not a branch line, but a secondary or duplicate trunk route which was a product of the extravagant and over-optimistic period of railway development"; it had never paid its way and was largely duplicated by alternative facilities.

It had previously been announced (Feb. 12, 1958) that the Central Transport Consultative Committee had recommended that the Commission's decision to close the "Bluebell Line" between East Grinstead and Lewes (Sussex) should be upheld. The line was said to be losing £33,000 annually, and the Committee found that the introduction of light diesel services would not "show an adequate return."

Railway Economies and Train Cuts. Mr. Watkinson (Minister of Transport and Civil Aviation) announced on June 18 that economies to be made in railway services would include (1) a reduction of train mileage, including a cut of about nine per cent in the Western Region, followed by cuts in other Regions; (2) a reduction of overtime and week-end working; (3) reductions in repair and maintenance expenditure, and the scrapping of 100,000 older freight wagons by the end of 1958; (4) restriction of recruitment; (5) elimination of unremunerative services. He added that over 30 branch line services had been earmarked for withdrawal.

The chairman of the Scottish Area Board of the B.T.C. (Sir Ian Bolton) announced on June 30 that (1) some lightly loaded steam trains would be replaced by diesel units, saving about five per cent of the 20,000,000 miles a year run by Scottish trains; (2) that another five per cent of trains would be withdrawn altogether; (3) that the Glasgow suburban services would be reduced by closing several lines after 7.0 p.m. on weekdays and 2.0 p.m. on Saturdays. The changes would take effect in the first half of July.

Winter Suspension of Newhaven-Dieppe Service. The B.T.C. announced on June 4 that, subject to the agreement of the Transport Users' Consultative Committee, it was intended to suspend the Newhaven-Dieppe passenger service between Nov. 4, 1958 and March 19, 1959; the cargo service between the two ports would not be affected. It was explained that the great majority of the 356,640 passengers using the Newhaven-Dieppe route in 1957 travelled in the holiday season, and that in February 1958 the daily average of passengers was only 50.

On June 28 it was announced that the Southampton-Le Havre passenger and cargo service would be cut down for about 4½ months in the coming winter to two sailings weekly in each direction, instead of three as at present. Winter cuts in the Channel Islands services to two sailings a week from Southampton and two from Weymouth were announced on August 6.

Single Manning of Diesel and Electric Trains. An agreement between the B.T.C. and the Associated Society of Locomotive Engineers and Firemen, announced on Dec. 23, 1957 and effective from Jan. 1, 1958, provided for the manning of diesel and electric trains, both passenger and freight, by a single driver or motorman, except in certain circumstances. The exceptions to the manning rule were: (1) two men would man passenger trains between any two points where they were scheduled to run non-stop for over 100 miles or for more than two hours; (2) no man would be scheduled to drive passenger trains alone for over 200 miles or for more than six hours per duty turn; (3) the limits for non-stop running of freight trains single-manned would be 75 miles or two hours; (4) freight train drivers would not be scheduled to drive alone for more than 150 miles or six hours per duty turn; (5) between midnight and 6 a.m. both passenger and freight trains would be manned by two men except for those scheduled to finish between midnight and 1.0 a.m. or to start between 5 and 6 a.m.; (6) locomotives running light would be double-manned.

New Chief Inspecting Officer of Railways. It was announced on April 8, 1958 that Brigadier C. A. Langley had been appointed Chief Inspecting Officer of Railways in succession to the late Lieut.-Colonel G. R. S. Wilson.

Transport Commission Membership.

Mr. J. Ratter, a technical adviser to the B.T.C., was appointed on July 1 as a full-time member of the Commission in succession to Sir Lansdale Train, retiring. The appointments of Sir John Benstead (the deputy chairman), Lord Rusholme, and Sir Reginald Wilson as full-time members were confirmed for a further term.—(British Transport Commission - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15735 A; 15930 A; 16018 C; 16209 A.)**

A. UNITED KINGDOM. — Prince Charles created Prince of Wales.

In a recorded message on July 26 at the concluding ceremony of the sixth Empire and Commonwealth Games, held at Cardiff, H.M. the Queen announced her intention of creating Prince Charles as Prince of Wales. The announcement was greeted with great enthusiasm by the large crowd and was warmly welcomed throughout the Principality.

Her Majesty's message was introduced by the Duke of Edinburgh, who was attending the Games. It ran as follows: "The British Empire and Commonwealth Games in the capital, together with all the activities of the Festival of Wales, have made this a memorable year for the Principality. I have therefore decided to mark it further by an act which will, I hope, give as much pleasure to all Welshmen as it does to me. I intend to create my son Charles Prince of Wales to-day. When he is grown up I will present him to you at Caernarvon."

[The Festival of Wales, referred to in the Queen's message, opened in May and will last for five months. Apart from pageants, displays, and exhibitions depicting all aspects of Welsh life and tradition, it was marked by the Commonwealth and Empire Games, held in Wales for the first time; other events will include a historical pageant at Pembroke Castle and the Royal National Eisteddfod of Wales at Ebbw Vale. The Festival was opened on May 3 with impressive ceremonies and processions in Cardiff, the capital of the Principality.]

Prince Charles, who is nine, became the 21st Prince of Wales, and the first holder of the title for 22 years; the last holder (the present Duke of Windsor) was created Prince of Wales in 1910, on his 16th birthday, and held the title until his accession in 1936 as Edward VIII. In addition to becoming Prince of Wales, Prince Charles automatically assumed the title of Earl of Chester—the two dignities having been linked for more than six hundred years. Prince Charles has just completed his first year at Cheam School, in Berkshire. (Times - Daily Telegraph - Western Mail, Cardiff)

(Prev. rep. Prince Charles, 9679 F; 9625 A.)

Historical Note. The English Princes of Wales are regarded as successors in title to the native-born Welsh princes of the Middle Ages and can claim descent from some of the ancient Welsh dynasties through Meredydd ap Tudor, great-grandfather of Henry VII. In the settlement that followed the Barons' Wars of the 13th century, the Welsh prince Llewellyn ap Gruffydd—who was allied with Simon de Montfort—received the title of Prince of Wales under the Peace of Montgomery (1267). Prince Llewellyn, the grandson of Llewellyn the Great, was killed in a skirmish in 1283 near Builth, on the Wye. On April 24, 1284, an infant prince (later Edward II) was born at Caernarvon Castle to King Edward I and Queen Eleanor and, according to legend, was presented to the Welsh barons as their prince. At the Parliament of Lincoln (1301) Edward I formally created his son Prince of Wales and also conferred on him the earldom of Chester. Prince Edward, however, allowed the principality of Wales to lapse on his accession as Edward II; the continuous succession of English Princes of Wales therefore begins with his grandson, Edward the Black Prince, who was invested as Prince of Wales in 1343 and who also held the title of Earl of Chester. Since the days of the Black Prince the two dignities have always been concentrated in the same hands.—(Times).

B. UNITED KINGDOM - UNITED STATES. — Entry into Force of Anglo-American Atomic Agreement.

The Anglo-American agreement of July 3 for extended co-operation in the development of nuclear weapons came officially into force on Aug. 4 under an exchange of Notes between Mr. Herter, acting U.S. Secretary of State, and Lord Hood, British Chargé d'Affaires in Washington. As required under the amended "McMahon Act," the agreement had lain before Congress for the statutory period of 30 days before coming into effect.

A five-year agreement was concluded on Aug. 8 between the U.K. Atomic Energy Authority and the Power Reactor Company of Detroit for exchanges of information on fast reactors.—(Times - New York Times) **(Prev. rep. 16298 A.)**

C. FRANCE. — M. Arrighi regains Parliamentary Privileges.

It was announced in the *Journal Officiel* on July 2 that parliamentary privileges had been restored to M. Pascal Arrighi, the Radical Socialist deputy for Corsica whose arrival in the island precipitated the revolt of May 24. As stated on page 16279 (second column), M. Arrighi's parliamentary immunity had been lifted by the National Assembly on May 26, during the Premiership of M. Pflimlin; the investigating magistrate decided on July 1, however, that there were no grounds for a criminal prosecution.—(Le Monde, Paris)

A. FRANCE - TUNISIA. — Clashes between Tunisian and French Forces in Remada Area. - Tunisian and French Complaints to Security Council. - Agreement on Evacuation of French Forces outside Bizerta.

After a period of relative quiescence since the Sakhiet incident, a new series of clashes between Tunisian forces and the French forces stationed in Tunisia took place during the second half of May, following the military *coup* in Algiers. All the incidents occurred in the Remada area in southern Tunisia, where the French garrison had been restricted to its base since the Tunisian Government's ban on French troop movements following the raid on Sakhiet.

On May 18 French troops from Remada forcibly occupied a road-block newly erected by the Tunisians in the desert some 25 miles to the north of Remada, and set up another one in the same area. The Tunisians, in turn, sent a strong force of troops and armed civilians to protect the area, but no clash occurred until May 24-25 when there was prolonged heavy firing after the French forces had refused a Tunisian demand to evacuate the airfield outside Remada. Five French soldiers were killed and four injured by heavy Tunisian mortar-fire, and at the request of the French garrison, French aircraft—alleged by the Tunisian Government to have come from Algeria—intervened in the fighting and attacked Tunisian positions.

In consequence of the clash of May 24-25, the state of emergency—hitherto confined to the frontier areas—was extended by the Tunisian Government to cover the whole country. President Bourguiba announced on May 26 that Tunisia would renew her complaint against France in the Security Council, adding that Tunisia had asked the United States for arms ; the Foreign Office in London stated on May 27 that the British Government had received a similar request from the Tunisian Government.

M. Mongi Slim (Tunisian Ambassador in Washington and permanent representative at the U.N.) submitted on May 29 a formal complaint of " acts of armed aggression committed by the French forces stationed in Tunisian territory and in Algeria," together with a request for a speedy meeting of the Security Council. The French Government immediately lodged a counter-complaint reiterating its former allegation that Tunisia was assisting the Algerian insurgents, and accusing Tunisia of violating " the *modus vivendi* established since February with regard to the stationing of French troops at certain points in Tunisian territory."

Both complaints were heard by the Security Council on June 2, when M. Mongi Slim and M. Georges-Picot (France) made statements on behalf of their respective Governments—the former alleging that the French forces in Tunisia had been guilty of almost daily acts of an " aggressive character " since mid-May, and the latter maintaining that Tunisia was guilty of " aggression " through her continued support for the Algerian insurgents.

Following the cordial messages exchanged between General de Gaulle and President Bourguiba on June 2, however (see 16304 C), M. Georges-Picot proposed on June 4 that the Security Council should adjourn its discussions for about a fortnight to permit of direct negotiations between France and Tunisia. On the proposal of M. Slim, the Security Council accordingly adjourned to June 18.

As a result of discussions between M. Bénard (the French Chargé d'Affairs in Tunis) and Tunisian Ministers, an agreement on the evacuation of the French forces was concluded on June 17. It provided that the 7,000 troops stationed outside Bizerta would be withdrawn within the next four months, and that negotiations for a provisional agreement on the status of the Bizerta base, over which Tunisian sovereignty would be recognized, should begin not later than Oct. 1. The Tunisian Government undertook to remove all restrictions on the movements of the French troops. When the Security Council met on June 18, M. de Vaucelles (France) reported that full diplomatic relations would be resumed as a result of the agreement, and that France and Tunisia would have an opportunity to reach agreement on all outstanding problems.

In accordance with the agreement of June 17 the first French troops left Remada on July 5 for Sfax, where they embarked for Algiers. The remainder of the Remada garrison left on July 10.

Following the agreement of June 17, M. Gorse (the French Ambassador) returned to Tunis on June 22 after an absence of over five months ; it was stated in Paris that he would immediately resume negotiations with the Tunisian Government on all questions outstanding between the two countries. (Le Monde - U.N. Information Centre, London) **(16203 A.)**

Note. The number of fatal casualties in the Sakhiet raid, at first variously reported as 69 and 75, was given by M. Mongi Slim in his memorandum to the Security Council as 79.

B. GREECE - SOVIET UNION. — Trade Agreement.

A three-year trade agreement between Greece and the Soviet Union, covering the period 1958-60, was signed in Athens on July 21.

The agreement provided for total exchanges of goods worth $62,500,000 (approximately £22,300,000) each way on an annually rising scale : viz. $17,500,000 in 1958, $21,000,000 in 1959, and $24,000,000 in 1960. The most important Greek exports will be tobacco, citrus fruits, and dried fruits, as well as bauxite, hides and skins, and olive oil, while the principal Soviet exports will be machinery, oil and oil products, coal and anthracite, timber, paper and pulp, rolled steel, and chemical goods. [A previous Greco-Soviet trade agreement for 1957 had envisaged exchanges of goods worth $17,500,000 in each direction, but these totals were not reached Greek imports from the U.S.S.R. being only $13,600,000, against exports to the U.S.S.R. of $10,700,000.]

It was pointed out in Athens that the new trade agreement constituted a deliberate step towards the further development of commercial exchanges between Greece and the countries of the Soviet bloc, because of dissatisfaction at the lack of sufficient openings for Greek exports to Western countries. Moreover, in the recent elections the Government had been accused by the left-wing parties of shunning economic co-operation with the Communist countries for purely political reasons.

Prior to the signing of the new agreement the Greek Cabinet had approved legislation granting the Government the right to import foreign goods for the use of the State and of public corporations without previous international tendering, so as to enable Greece to fulfil her obligations *vis-à-vis* the Soviet Union.—(Hellenic News Agency, Athens - Soviet Embassy Press Department, London)

C. OCEANOGRAPHY. — Discovery of New Ocean Current in the Pacific.

The discovery of a hitherto unknown ocean current in the Pacific, 250 miles wide and up to 1,000 feet in depth, was announced on June 28 by the University of California Scripps Institution of Oceanography. It was stated that the current had been traced from a point north of the Marquesas to the Galapagos Islands—i.e. over about half the Pacific Ocean.

The new current (still unnamed) was discovered as a result of extensive investigations carried out in April and May by two research vessels taking part in the International Geophysical Year programme—the *Horizon*, of the Scripps Institution, and the *Hugh M. Smith*, of the Pacific Ocean branch of the U.S. Fish and Wildlife Service. The new current, which travels in an east-to-west direction at three knots an hour, was described as " as strong as a thousand Mississippi Rivers and as swift as the Gulf Stream." It moves to the south of the South Equatorial Current, and in the reverse direction.

Dr. Roger Revelle, director of the Scripps Institution, described the finding of the new current as " one of the great oceanographic discoveries of all time " and as " comparable with the wartime discovery of the jet stream in the atmosphere."—(New York Times) **(Prev. rep. 15501 A.)**

D. UNITED STATES. — Mr. Gordon Gray appointed Special Assistant for National Security Affairs. - Creation of Office of Defence and Civilian Mobilization.

Mr. Gordon Gray (48), who resigned on June 24 as Director of the Office of Defence Mobilization, was sworn in on July 23 as Special Assistant to President Eisenhower for National Security Affairs *vice* Mr. Robert Cutler, who relinquished the post to return to business life. A former president of the University of North Carolina, Mr. Gray held several posts in the Truman Administration, including that of Secretary of the Army.

The Office of Defence Mobilization and the Federal Civil Defence Administration were merged on July 1 as the Office of Defence and Civilian Mobilization. Mr. Leo Hoegh, formerly head of the Federal Civil Defence Administration, was appointed Director of the O.D.C.M.—(New York Times)
(Prev. rep. 15636 B ; 15385 C.)

E. UNITED KINGDOM. — Retirement of Sir Wilfred Neden. - Mr. St. John Wilson appointed Chief Industrial Commissioner at Ministry of Labour.

It was announced on July 30 that Sir Wilfred Neden, Chief Industrial Commissioner at the Ministry of Labour, would be retiring in August and would be succeeded in that post by Mr. P. H. St. John Wilson, Under-Secretary of the Industrial Relations Department of the Ministry of Labour. Sir Wilfred Neden (64) became Chief Industrial Commissioner in February 1954, and has been concerned with the settlement of many of the major strikes and disputes of the past four years. Mr. St. John Wilson (50) is the son of Dr. H. A. Wilson, formerly Bishop of Chelmsford.—(Times - Manchester Guardian)

AUGUST 9—16, 1958

A. UNITED STATES.—The Voyage of the "Nautilus" under the North Pole. - U.S.S. "Skate" reaches the Pole.

It was announced from the White House on Aug. 8 that the U.S. atomic submarine *Nautilus* (3,000 tons) had completed the first voyage in history under the North Pole, thereby pioneering a new and shorter route from the Pacific to the Atlantic and Europe. The *Nautilus* began her voyage at Pearl Harbour on July 23, passed through the Bering Straits on July 29, went under the Arctic icecap off Point Barrow (Alaska) on Aug. 1, and emerged four days later in the Greenland Sea in latitude 79 degrees North. Her log was as follows (all times G.M.T.):

Departed Honolulu 06.00 hours July 23.
Transited Bering Straits July 29.
Dived under pack ice off Point Barrow 12.37 hours August 1.
Passed under North Pole 03.15 hours August 4.
Emerged in 79 deg. N. 13.54 hours August 5.

The *Nautilus* was commanded by Commander William R. Anderson (37) and carried a crew of 116, including scientific observers. On her emergence in the Greenland Sea, Commander Anderson was transferred from the submarine to a U.S. helicopter, taken to Keflavik (Iceland), and flown thence to Washington, where he was decorated with the Legion of Merit by President Eisenhower. Presidential citations—the first of their kind in peacetime—were conferred on Commander Anderson and the crew of the *Nautilus*.

The Presidential citation to Commander Anderson was "for exceptionally meritorious conduct in the performance of outstanding service while serving as Commander of U.S.S. *Nautilus* during the period June 8, 1958 to Aug. 5, 1958." It continued: "Commander Anderson, by far-sighted planning, skilled seamanship, and thorough study of the Arctic area, succeeded in cruising *Nautilus* across the top of the world from the Bering Sea to the Greenland Sea, passing submerged below the North Pole. Under his intrepid leadership, *Nautilus* pioneered a submerged sea lane between the Eastern and Western Hemispheres. This points the way for further exploration and possible use of this route by nuclear-powered submarines as a new commercial seaway between the major oceans of the world."

The citation to the crew of the *Nautilus* was for "outstanding achievement in completing the first voyage in history under the Arctic icecap from the Bering Straits to the Greenland Sea . . . passing below the North Pole."

As stated below, the *Nautilus* completed her transpolar voyage by arriving at Portland (England) on Aug. 12; in the 19 days since leaving Pearl Harbour she had covered 8,146 miles at an average speed of over 17 knots. The submerged voyage of 1,830 miles under the Arctic icecap—from Point Barrow to the submarine's emergence in the Greenland Sea—was made in 96 hours.

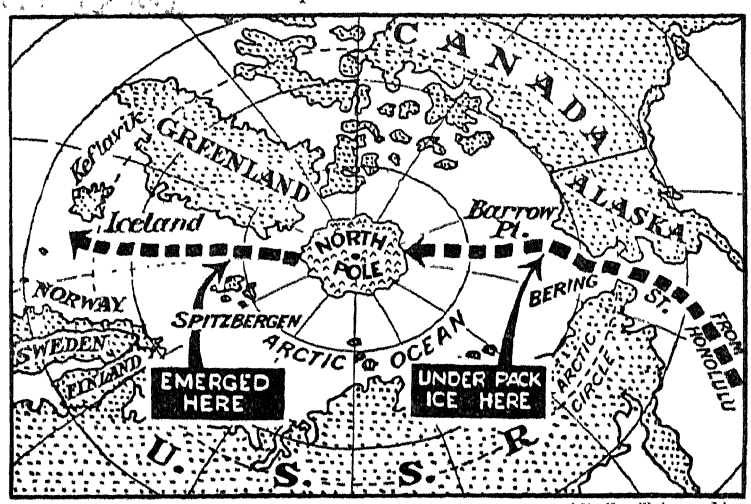
In a "fact sheet" issued by the U.S. Navy on Aug. 8, details were given about some of the equipment carried in the *Nautilus*, and also of the results of scientific investigations carried out during the transpolar voyage.

It was disclosed that the equipment included (1) a closed television network "with the camera pointing up for observing ice"; (2) ten separate sound instruments for detecting ice above the submarine, and three others for measuring the distance to the ocean floor below; (3) four compasses of various types; (4) automatic control gear for holding the submarine exactly on course and depth; and (5) an "inertial navigation system" (see below).

Results of scientific observations were summarized as follows: (1) the polar ice was found to be 12 feet thick on an average, though some ridges extended down to 50 ft. and even further; (2) measurements with a precision fathometer showed the water at the North Pole to be 13,410 ft. deep (nearly 2,000 ft. deeper than the maximum measurement previously recorded); (3) water temperatures in the Arctic Ocean were found to be about 32 deg. F., although north of Spitzbergen a branch of the Gulf Stream brought it up to 40 deg. F.; (4) the *Nautilus* had obtained a continuous record of water depth and ice thickness all the way across the Arctic Ocean, thus providing scientists and hydrographers with much important information previously unknown; (5) over 11,000 individual soundings were obtained in the relatively uncharted Arctic Basin; (6) the Arctic Ocean was found to be bisected by a 9,000-ft. submerged mountain range (the Lomonosov Ridge) running from Canada to Russia, and coming to within 2,500 ft. of the surface; (7) the ice in the Arctic Ocean was found to be in constant motion owing to the ocean currents and the winds; (8) "water openings are always present even in the dead of winter, although unbroken ice sometimes stretches for ten miles or more."

It was also stated that the submarine's nuclear power plant had performed perfectly throughout; that there were no casualties on the transpolar voyage; that the temperature inside the *Nautilus* during the entire voyage was 72 deg.; and that 93 per cent of the trip from Pearl Harbour to Iceland was made submerged, "the small time on the surface being used to survey the ice-pack edge." The *Nautilus* was entirely submerged on the 3,000-mile voyage from Honolulu to the Bering Straits, made at an average speed of 20 knots—a record for a long submerged voyage.

The U.S. Navy's "fact paper" said that the *Nautilus* was "the first combatant ship with an inertial navigation system," adding that "such a system works as well at the North Pole as anywhere else, unlike an ordinary gyro compass." The *New York Times* described the inertial navigation system as "a complex of gyroscopes, accelerometers, integrators, star trackers, depth finders, and other instruments which automatically enables an accurate determination of the ship's position even on long submerged cruises . . . [It is] essentially a computer of great accuracy that provides precise ship's position in latitude and longitude, true heading or course, ground speed, and pitch-and-roll information. An occasional star sight through the submarine periscope monitors and corrects the computer."



(*Daily Telegraph*)

In a press statement in Washington on Aug. 8, Commander Anderson disclosed that the *Nautilus*, when submerging under the pack ice north of Point Barrow, had navigated a "deep sea valley" ranging in depth from 300 ft. to an estimated 1,200 ft. Varying in width from four to 12 miles, it ran parallel to the north coast of Alaska and thence into deep water below the polar icecap. He declined to comment on the speed and depth of the *Nautilus* when cruising under the Arctic Basin, saying only that "we were cruising below 400 ft. at a speed of over 20 knots."

Commander Anderson arrived in London by air from Washington on Aug. 11 and was flown by helicopter to rejoin the *Nautilus* off the British coast. The submarine arrived at Portland on Aug. 12 as stated above, and was enthusiastically welcomed by hundreds of dockyard workers and thousands of holiday-makers. She was met by Lord Selkirk (First Lord of the British Admiralty), senior British naval officers, and the U.S. Ambassador (Mr. John Hay Whitney), who presented the presidential citation to the crew of the *Nautilus* on behalf of President Eisenhower.

The historic voyage of the *Nautilus* aroused world-wide interest, particularly as regards the eventual possibility of using the transpolar route for commercial purposes by nuclear-powered cargo submarines, as mentioned in President Eisenhower's citation to Commander Anderson. In this connexion, President Eisenhower's Press Secretary (Mr. Hagerty) pointed out that the present distance from London to Tokio *via* the Panama Canal was about 11,200 nautical miles; by traversing the Arctic under the icecap the distance would be reduced to 6,300 miles—a saving of nearly 5,000 miles.

The *Nautilus*, the world's first atomic submarine, was designed by Rear-Admiral Rickover and commissioned in September 1954 (see 13828 C). Prior to her transpolar feat she had made a number of long-distance submerged voyages, of which the most spectacular was a 3,000-miles journey from Connecticut to San Diego (California) *via* the Panama Canal, taking seven days and completed on May 30, 1957; she was submerged throughout the whole voyage except when traversing the Panama Canal. In the following month she remained submerged for 14 days while taking part in NATO exercises in the Atlantic. Her sister-ship, the *Seawolf*, was launched in July 1955 (see 14338 D) and commissioned at Groton (Connecticut) on March 30, 1957.

An interesting parallelism between the voyage of the *Nautilus* and the fictional *Nautilus* of Jules Verne's romance *Twenty Thousand Leagues under the Sea* (after which the atomic submarine is named)

was commented upon in the *New York Times*. Whereas the actual *Nautilus* sailed under the Arctic icepack and the North Pole, passing through a "deep sea valley," Captain Nemo's vessel cruised under the Antarctic ice through a similar submarine tunnel to reach the South Pole. In Jules Verne's story (published in 1869) the fictional *Nautilus* was described as 232 feet long, while the contemporary *Nautilus* has a length of 300 feet. As an additional point of similarity, Captain Nemo's *Nautilus* was powered by electricity generated from the sodium chloride in sea water; the U.S. atomic submarine fleet, and in particular the *Seawolf*, uses liquid sodium as a coolant or heat transferent.

U.S.S. "Skate" at the North Pole.

The U.S. Navy announced on Aug. 12 that a second atomic submarine, U.S.S. *Skate*, had repeated the feat of the *Nautilus* by crossing the North Pole under the Arctic icecap—this time in an east-to-west direction. The announcement said: (1) the *Skate* had sailed from New London (Connecticut) on July 30 "to conduct under-ice exploration in the Arctic"; (2) she had reached the Pole at 0147 G.M.T. on Aug. 12; (3) she had "subsequently surfaced in an icefield about 40 miles from the Pole, reported the fact of her polar transit, and is continuing her under-ice exploration." The *Skate*, which is rather smaller than the *Nautilus*, went under the icepack at a point between Iceland and Greenland; she carried a crew of 97 and was under the command of Commander James F. Calvert. The U.S. Defence Department stated that she would remain in the polar region for most of the month of August.

The *Skate*, described as "the first of the assembly-line submarines," was commissioned at Groton on Dec. 23, 1957. Though displacing just over 2,000 tons, compared with the 3,000-tons displacement of the *Nautilus* and *Seawolf*, she is said to be able to cruise around the world without surfacing and to travel 60,000 miles without refuelling—equal to three times around the earth at the Equator. In March 1958 she gained the distinction of being the first submarine to cross the Atlantic in both directions submerged. On the first (east-to-west) trip she remained submerged for 8 days 11 hours between leaving New London and emerging off the Lizard, at the entrance to the English Channel; the return journey from the Lizard to Nantucket was made submerged in 7 days 5 hours—20 hours better than the previous record set up by the *Nautilus*.

The American Nuclear Submarine Fleet.

Three nuclear-powered submarines have so far been commissioned in the U.S. Navy—the *Nautilus*, *Seawolf*, and *Skate*. Two others, the *Swordfish* and *Sargo*, were launched in 1957 and are nearing completion; two more, the *Seadragon* and *Triton*, are scheduled for launching in the present month (August 1958); another 13 are under construction; and contracts have been placed for a further nine—giving a total of 29 atomic submarines when the programme has been completed.—(New York Times - New York Herald Tribune)
(Prev. rep. "Nautilus," 13828 C; "Seawolf," 14338 D.)

A. UNITED KINGDOM. — Government Assistance to reduce Local Unemployment. - Special Areas for New Work Projects.

In a parliamentary written answer on July 30, the President of the Board of Trade (Sir David Eccles) announced (1) that the Government had decided to encourage industrial development in areas where the level of unemployment was above the national average; (2) that the Board of Trade would be more critical and discouraging when firms wished to expand or extend in the more congested parts of Britain; and (3) that the Development Areas Treasury Advisory Committee (D.A.T.A.C.) had been reconstituted so as to advise the Government in carrying out its policy in reducing the incidence of local unemployment.

Sir David Eccles issued a list of places in which industrial development would be encouraged under the provisions of the Distribution of Industry (Industrial Finance) Act, either by assisting new projects to establish themselves in those areas or by helping established firms. The areas in question have a persistent level of unemployment of at least 4 per cent of their working population, i.e. double the national average; though covering only 7 per cent of the total of insured workers in Britain, they account for 17 per cent of the total unemployed in the country. The areas were:

England.

Cornwall—The whole of Cornwall except Truro, St. Austell, St. Blazey, Lostwithiel, Launceston, and Bude.
Devon—Brixham, Ilfracombe, and Plymouth.
Kent—Herne Bay, the Isle of Thanet, and Whitstable.
Lancashire and Cheshire—Barrow-in-Furness, Dalton-in-Furness, and Merseyside.
Lincolnshire—Alford, Mablethorpe, and Skegness.
Norfolk—The coast belt from Blakeney to Great Yarmouth.
Suffolk—North-east Suffolk, excluding Lowestoft and Beccles.
Yorkshire—Bridlington, Filey, Scarborough, and Whitby.

Scotland.

North Lanarkshire; western Clydeside, with Bute; the Highlands and Islands; the Buckie-Peterhead area; Aberdeen; and the Dundee area.

Wales.

South-east Carmarthenshire and the adjoining part of Glamorgan; Milford Haven, Pembroke and Pembroke Dock; Anglesey; Blaenau Festiniog; and Caernarvonshire.

The provisions of the Distribution of Industry (Industrial Finance) Act are given on page 16162, second column; the legislation was enacted on July 24 after passing through all its stages in both Houses.

The Board of Trade explained on July 30 that grants and loans under the Act would be adapted to suit the particular needs of the applicant in meeting the uneconomic costs that he might incur by going to a nominated place [i.e. to one of the areas listed above]; for example, movement of machinery and plant, building houses for workers, levelling of sites, and construction of railway sidings, as well as additional transport costs. Government assistance might also be available for non-industrial firms wishing to site their offices outside congested areas, e.g. branch offices of banks, and departments of hire-purchase and insurance companies. In all cases the test would be whether the development created new jobs.

Sir David Eccles explained (in his written answer) that it was not the Board of Trade's present practice, save in the most exceptional circumstances, to issue industrial development certificates to firms wishing to set up factories in the more congested parts of Britain. He said in this connexion:

"I propose in future to examine all such applications, both for new buildings and for extensions, even more critically than in the past, and to extend the practice at present applied in the Greater London and Greater Birmingham areas to other parts of the country where employment is low." [The present practice is that all industrial building projects which are more than 5,000 sq. ft. must be backed by a certificate from the Board of Trade; in the more congested areas these are only granted in exceptional circumstances.] "I recognize that this may mean refusal to allow a project to go forward in some particular place, even though the labour could be found. But there are other places where the need for new industry is much greater, and it is these, in particular, that I should hope to benefit from this decision."

Finally, Sir David Eccles announced that the D.A.T.A.C. had been reconstituted with the following membership:

Mr. W. K. M. Slimmings (of Thomson McLintock & Co., accountants) as chairman; Mr. P. O. Williams, company director and secretary of the Tinplate Manufacturers' Association; Mr. Malcolm McDougall, managing director of J. and P. Coats Ltd.; Mr. S. A. H. Whetmore, a former director of I.C.I.; Brigadier L. H. McRobert, company director; and Mr. Lewis T. Wright, of the Amalgamated Weavers' Association and chairman of the British Productivity Council.

[Applications for Treasury help must be submitted to the D.A.T.A.C., which was set up under the 1945 Distribution of Industry Act. The committee is an independent group whose recommendations must either be accepted in their entirety by the Treasury or rejected; the Government may not vary them. Each application will be treated individually, and in each case the committee will decide whether or not to recommend a grant, annual grants, or a loan, and what rate of interest should be paid.]

It was stated by the Board of Trade that if conditions deteriorated in other areas, the Government would add them to the list, which would be revised and published at intervals of about six months.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 16161 A.)**

B. SOVIET UNION. — Restoration of Kalmuck Autonomous Republic.

A decree reconstituting the Kalmuck Autonomous Soviet Socialist Republic was issued on July 29 by the Presidium of the Supreme Soviet of the U.S.S.R., in fulfilment of the decision taken by the Supreme Soviet in February 1957.

The Kalmucks, who have racial and religious affinities with the Mongols and Lamaist Buddhism, have been subject to dispersion and deportations for nearly 200 years. In 1771 their difficulties had become so hard to bear that those who were settled in Russian territory (mainly in Siberia and Central Asia) returned to China at the instigation of the Emperor Ch'ien Lung; thousands died during the arduous migration before reaching what is now Sinkiang. During the Second World War the Kalmuck communities at the mouth of the Volga were deported *en masse* to Siberia, while large numbers of others were captured by the Germans or dispersed as refugees. It is not known how many were lost in the mass deportations of 1943, but the number was believed to be very large. In his speech at the 20th Soviet Party Congress (February 1956) M. Khrushchev denounced the Stalinist deportations of the Kalmucks and allied peoples as cruel, unjustified and "monstrous."

The Kalmuck A.S.S.R. is situated to the south of Astrakhan and inland from the Caspian Sea.—(Times - Soviet Embassy Press Department, London) **(Prev. rep. 15440 B.)**

A. UNITED KINGDOM. — Independent Television. - Developments, 1956-1958.

Developments in connexion with Independent Television during the past two years are summarized below under cross-headings.

New Transmitting Stations.

Four new transmitting stations, in addition to the stations at Croydon and Lichfield (see 14772 A ; 14980 B), were opened by the Independent Television Authority in 1956 and 1957, as follows :

Winter Hill, Lancashire. This station, covering Lancashire, Cheshire, and parts of Denbighshire, Flintshire, Staffordshire, Derbyshire, and Cumberland, was opened on May 3, 1956. It covers a larger population (7,440,000, including Liverpool and Manchester) than any other I.T.A. station except Croydon.

Emley Moor, West Riding of Yorkshire. This station, opened on Nov. 3, 1956, serves the greater part of Yorkshire, northern Lincolnshire, and part of Nottinghamshire. About 4,710,000 persons live within its range.

Black Hill, Lanarkshire. This station which started broadcasting on Aug. 31, 1957, serves a population of about 3,280,000 in the Scottish central lowlands, covering the area between Greenock-Ayr on the west coast and Arbroath-Dunbar on the east, including Glasgow, Edinburgh, Dundee, and Perth.

St. Hilary, Glamorgan. This station, opened on Dec. 17, 1957, serves about 3,280,000 people in South Wales and the West of England, it covers the counties of Glamorgan, Monmouthshire, and parts of Carmarthenshire and Pembrokeshire in Wales, as well as Somerset and parts of Gloucestershire, Wiltshire, Dorset, and Devon in England.

In its third report, covering the year ended March 31, 1957 and published on Nov. 12, 1957, the I.T.A. stated that two further stations would shortly be opened—at Chillerton Down, Isle of Wight, to serve the south of England, and at Burnhope (Co. Durham) to cover North-East England. Details were given as follows :

Chillerton Down. This station, intended to serve a population of about 2,760,000 in Hampshire and parts of Sussex, Surrey, Berkshire, and Wiltshire, was expected to be opened in the late summer of 1958. The area covered stretches from Bridport in the west to Brighton in the east and Guildford and Newbury in the north.

Burnhope. This station would serve about 2,500,000 people in an area stretching from Alnwick in the north to Whitby in the south, including the highly populated industrial areas of the Tyne, Wear, and Tees.

The Authority added that it " did not exclude the possibility that it could improve on the original programme of station-building so as to provide by 1960 a service for perhaps 95 per cent of the population from 15 or more stations."

Programme Contractors.

The I.T.A. report for 1956-57 (see above) recalled that at April 1, 1956, four programme companies were operating or were due to begin operating, viz :

Associated-Rediffusion Ltd.	London, Monday-Friday.
Associated TeleVision Ltd. . .	London, Saturday and Sunday. Midlands, Monday-Friday.
A.B.C. Television Ltd. . .	Midlands and North, Saturday and Sunday.
Granada TV Network Ltd. . .	North, Monday-Friday.

The first two companies have been operating since September 1955 ; the third since February 1956 ; and the fourth since May 1956.

It was announced on Feb. 3, 1958, that, with the approval of the I.T.A., the Associated British Picture Corporation had acquired the minority shareholdings in A.B.C. Television Ltd., hitherto held by the Birmingham Post and Mail Ltd., Birmingham Despatch and Mercury Ltd., and the Bradford and District Newspaper Co. Ltd., thus becoming the sole shareholders in A.B.C. Television. Both the Birmingham Post and Mail Ltd. and the Westminster Press Provincial Newspapers Ltd. (the parent company of the Bradford and District Newspaper Co.) retained their interests in Associated Television Ltd.

Contracts for Additional Stations. *Black Hill.* The report explained that the contract subsequently made for this station with Scottish Television Ltd. (see 14980 A) differed from those made with the first four companies in providing for Scottish Television to supply programmes for the whole week. The I.T.A. considered that, for some years at least, the potential audience in Central Scotland would not be large enough to support more than one programme company. Scottish Television would, however, be able to select network programmes offered by other companies ; moreover, the I.T.A. already had plans for further transmitter stations elsewhere in Scotland, which might provide an opportunity for another independent company.

St. Hilary. The acceptance of an offer for the supply of programmes for this station throughout the week was announced by the I.T.A. on Oct. 26, 1956. The contracting company was a group known as T.W.W. Ltd. (Independent Television for South Wales and the West of England), with Lord Derby as president and Lord Glenamin as chairman. Other directors include Mr. Herbert Agar (the American historian and author), Sir William Emsley Carr (chairman of News of the World Ltd.), Sir Ifan ap Owen Edwards (founder of the Welsh League of Youth), Mr. Alfred Francis (administrator general of the London Old Vic), Mr. Sidney Gilliat (the film producer), and Sir Grismond Philips (chairman of the Historic Buildings Council for Wales). Mr M. Chapman-Walker (manager of the *News of the World*) was appointed managing director.

Burnhope. The I.T.A. announced on Dec. 3, 1957 that it had accepted the offer of a company headed by Sir Richard Pease (chairman of Transparent Paper Ltd., and a director of the Cleveland Bridge and Engineering Co.) to supply programmes for this station. The company's board would include Lord Layton (chairman, Daily News Ltd.), Mr George Black and Mr. Alfred Black (the theatrical impresarios), and Mr. Sidney Box (the film producer).

I.T.A. Accounts for 1956-57.

The accounts of the I.T.A. for the year ended March 31, 1957, were published on Nov. 12, 1957.

Operating income was shown at £1,702,152 (against £423,499 in the previous year) and expenditure on revenue account at £415,901 (£182,213) ; provision for taxation, depreciation, etc., left a balance of £686,837. After adding £2,238 brought forward from the 1955-56 accounts and transferring £680,067 to reserves (including £580,000 for capital expenditure), a balance of £9,008 was left to be carried forward to 1957-58.

The accounts showed that £550,000 had been advanced to the Authority by the Postmaster-General under the Television Act (which sanctions advances of up to £2,000,000 over five years), of which £45,067 had been repaid.

Financial Results of Programme Companies.

The financial results for 1955-56 and 1956-57 of Associated-Rediffusion Ltd. and Associated TeleVision Ltd.—the first programme companies to begin operations—are summarized below.

Associated-Rediffusion Ltd. This company's first report (published Dec. 18, 1956), covering the 17 months from its incorporation to April 30, 1956, showed a loss of about £2,000,000. The second report, covering the year ended April 30, 1957 (published Nov. 14, 1957), showed a further loss of about £1,000,000, making a total loss of about £3,000,000 in the first 29 months of the company's existence.

Mr. John S. Wills (the company's chairman), commenting on the second report, attributed the losses mainly to the heavy cost of providing programmes in the initial stages, Associated-Rediffusion having been " the first in the field." He added that the company was " now operating at a profit."

Associated-TeleVision Ltd. In the 15 months from its incorporation to April 30, 1956, this company incurred a loss of £602,715. The report for the year ended April 30, 1957 (published on July 24, 1957), showed, however, that a net profit of £201,716 had been earned on the year's operations, after deducting for taxation. The report for 1957-58, published on July 8, 1958, gave the net profit for the year as £1,998,000, after providing for taxation.

Reduced Government Grant towards Cost of Programmes.

Dr. Charles Hill (then Postmaster-General) announced in a written parliamentary reply on Aug. 1, 1956, that he had informed the I.T.A. that, " because of the general economic situation and the need for economy in Government expenditure," no grant could be made under Section 11 of the Television Act in the then current financial year (1956-57).

The I.T.A. issued a statement on the same day expressing " dismay " at the Government's decision, which, the Authority maintained, would adversely affect the programme companies' ability to provide " properly balanced " programmes (i.e. containing enough items of serious interest). The statement read as follows :

" The Authority is conscious, and its view is shared by the programme companies, that the present programmes, although extremely popular, do not contain a sufficient number of programmes of information and discussion or of plays and performances of lasting value. For this the explanation is the very simple one that such programmes, whether transmitted by the Authority or the B.B.C., do not attract relatively large audiences, in spite of their national value. The possibility that this situation would arise was clearly foreseen during the debates on the Television Bill, and it was precisely in order to make such programmes possible that the £750,000 provision was included in Section 11 of the Act.

" The B.B.C. does not find itself in this difficulty, as its rising income is guaranteed whatever the size of its audience. The Authority and the programme companies are, however, very much in this difficulty and are apparently to be left unable to respond, as they would wish, to the preferences of large and important minorities.

" This is not a situation which the Authority can accept without feeling that it is failing in one of its main duties, whatever degree of success it may have achieved in the discharge of others. It is, of course, aware that the provision of the £750,000 is not automatic under the terms of the Act but depends upon the agreement of the Treasury and the Postmaster-General. It did not at any time enter into its calculations that this agreement would be withheld."

The statement added that the Authority appreciated that the Government might reasonably take the view that payment of the full sum should be deferred during the country's financial difficulties, and would have been content with the payment of a small part of the sum so that at least a start could be made in the provision of balancing programmes, but even "this modest proposal" had been rejected.

Following representations by the I.T.A. and the programme companies, Dr. Hill announced on Nov. 29, 1956, that the Government had decided that a temporary grant-in-aid of £100,000 should be provided for in the Broadcasting Estimates for 1957-58 to enable the I.T.A. to ensure a proper balance in the programmes transmitted over its network. He added: "This decision carries with it no implication of continuing Exchequer assistance. It is a temporary measure to assist the I.T.A. in procuring the inclusion of items which in its opinion are necessary for improving the balance of the subject matter of the programmes."

In a joint statement on the same day, the four original programme companies—A.B.C. Television Ltd., Associated-Rediffusion Ltd., Associated TeleVision Ltd., and Granada Television Network Ltd.—described the £100,000 grant as "unrealistic" and stressed that they did not wish to avail themselves of the offer. They pointed out that whilst the programme companies were "directly responsible for a large proportion of the increase in television revenue," they received "no part of this licence revenue" The I.T.A., however, explained in a later statement that while it "appreciated the disappointment of the four companies that a more substantial grant from the licensees will not be available for independent television," it would have to decide, after consultation with them, how best to make use of the grant.

In its 1956-57 report (see above) the I.T.A. explained that "the atmosphere in which it had found it necessary to press for a grant" had meanwhile been "greatly changed by the marked improvement in the companies' advertising revenues." The increased volume of advertising business, together with "some promising trends in the programmes themselves," had led the Authority to "withhold any immediate proposals for drawing on the grant at the outset of the new financial year."

Schools Television Service.

The first regular television broadcasts to British schools—preceding the B.B.C.'s schools service (see 15912 A) by over four months—began on May 13, 1957, when Associated-Rediffusion broadcast the first programme of an experimental bi-weekly series intended for children aged 14-15.

On July 10, 1957, Associated-Rediffusion announced that in view of the success of the experiment, more varied programmes—envisaged for age-groups between 11 and 16 and dealing with subjects ranging from science to play-producing—would be broadcast for 30 minutes daily during school terms in the coming year. Mr. Boris Ford, a lecturer and editor of educational journals, had been appointed head of school broadcasting, assisted by an educational advisory committee under Sir John Wolfenden.

Independent Television Programmes and Children.

The Children's Advisory Committee of the I.T.A. announced on June 6, 1958, that it would conduct an inquiry into "the effects of violence in children's television programmes on their habits and behaviour." The Committee gave it as its opinion, however, that for some time there had been "little or no cause for anxiety about the material shown." The statement followed widespread complaints by educators and parents about the contents of children's programmes.

Size of I.T.A. Audiences.

It was estimated by Television Audience Measurement Ltd. on Nov. 29, 1957 that about 4,185,000 homes—over one-third of those in areas covered by Independent Television—were receiving I.T.A. programmes, and that the number would increase to over 6,000,000 within 12 months.

Sir Ivone Kirkpatrick appointed Chairman of I.T.A.

Sir Ivone Kirkpatrick (60), formerly Permanent Under-Secretary of State at the Foreign Office, was appointed chairman of the I.T.A. by the Postmaster General (Mr. Marples) on Nov. 8, 1957, in succession to Sir Kenneth Clark, whose five-year term had expired on Aug. 31, 1957. Sir Ivone's appointment will be for five years.

Miss Diana Reader Harris (Headmistress of Sherborne School for Girls) and Mr. J. Alban Davies (a member of the Council of Aberystwyth University College) were appointed members of the I.T.A. on Aug. 3, 1956, and Mr. T. H. Summerson (a member of the British Transport Commission) on Feb. 2, 1957, in succession to Lord Aberdare, Lord Layton, and Miss E. Popham. Dame Francis Farrar (general secretary of the National Federation of Women's Institutes) was appointed a member from Sept. 6, 1957 *vice* Miss Dilys Powell, and Mr. W. B. Beard (a former chairman of the T.U.C.) and Professor David Talbot Rice (Professor of Fine Art, Edinburgh University) on July 25, 1958 *vice* Mr. G. B. Thorneycroft and Dr T. J. Honeyman. At the same time the term of office of Lieut.-Colonel Arthur Chichester (chairman, Moygashel Ltd.) was extended for a further year until Aug. 3, 1959. The new appointments were for periods ranging from 3½ to 5 years. Mr. Davies, Professor Talbot Rice, and Lieut.-Colonel Chichester will make the interests of Wales, Scotland, and Northern Ireland respectively their special care.

Contributions on Patronage of the Arts.

Sir Ivone Kirkpatrick announced on June 30, 1958, that the four original programme companies (see above) had decided to contribute "at least £100,000 a year" on patronage of the arts. A co-ordinating committee would be set up to see that the donations of individual companies did not overlap. (I.T.A., Report for 1956-57 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15912 A; 14980 B; 14658 A.)**

A. CAMBODIA. — New Cabinet. - Diplomatic Relations with Communist China.

Following the resignation of M. Sim Var from the Premiership, the Cambodian National Assembly unanimously invested a new Government formed by Prince Norodom Sihanouk on July 14. The new Government included M. Son San as Deputy Premier and Minister of Foreign Affairs, M. Mau Say as Minister of Information and Planning, M. Tim Ngoun as Minister of Defence, and M. Nhiem Sokphal as Minister of Commerce and Industry.

A joint Sino-Cambodian declaration issued in Pnom-Penh on July 24 announced that Cambodia had agreed to establish diplomatic relations with the Chinese People's Republic, and that the two countries would exchange diplomatic missions at ambassadorial level. In a press statement on the same day Prince Norodom Sihanouk said that Cambodia could "no longer ignore the existence of China and the essential part played by her in Asia and the world"; he stressed, however, that Cambodian *de jure* recognition of Communist China would not effect Cambodia's policy of strict neutrality.

M. Penn Outh, the former Prime Minister, left Pnom-Penh for Paris at the beginning of July to take up the post of Ambassador to France.—(Le Monde, Paris - New York Times) **(Prev. rep. 16251 A.)**

B. CANADA. — Conservative Ministry in Manitoba.

Following the victory of the Progressive Conservatives in the Manitoba provincial elections, Mr. D. L. Campbell (the Liberal Progressive Premier) tendered his resignation on June 24. Mr. Duff Roblin, the Progressive Conservative leader in Manitoba, formed a new Ministry on June 30 with the following membership:

Mr. Duff Roblin, Premier and acting Treasurer; Mr. Errick F. Willis, Deputy Premier and acting Minister of Public Works; Mr. Gurney Evans, Minister of Mines and Resources and acting Minister of Industry and Commerce; Mr. Stewart McLean, Education; Mr. Sterling Lyon, Attorney-General; Dr. George Johnson, Health and Public Welfare.

This was the first Progressive Conservative Government in Manitoba for 43 years, since the defeat in 1915 of the then Conservative Government headed by Sir Rodmond Roblin, grandfather of Mr. Duff Roblin. Mr. Roblin (41) is the youngest Provincial Premier in Canada.- (Montreal Star) **(Prev. rep. 16288 C.)**

C. WESTERN GERMANY. — Release of Dr. John.

It was announced in Bonn on July 26 that President Heuss had granted a reprieve to Dr. Otto John, who had been sentenced on Dec. 28, 1956, to four years' hard labour for treasonable falsification and conspiracy. It was officially explained that Dr. John had been granted the customary remission of the last third of his term of imprisonment because of good conduct, and that the President's decision meant that he would be put on probation for the remainder of his sentence. Dr. John was released from prison on July 27.

Dr. Wohlgemuth, who was alleged by Dr. John to have drugged and then abducted him to East Berlin, was arrested in West Berlin on Feb. 11, 1958, when he returned from the eastern sector of the city. He was charged with entering into treasonable relations with the Soviet-zone authorities, but was released on bail.—(Frankfurter Allgemeine Zeitung - Der Tagesspiegel, Berlin) **(Prev. rep. 15332 A.)**

D. IRISH REPUBLIC. — State Fertiliser Factory. - Production of Nitrates from Peat.

It was announced in Dublin on Aug. 8 that the Irish Government had approved the establishment of a State company to operate a factory for producing ammonium nitrate fertilisers from peat. The State Chemical Company (*Ceimici Teoranta*) had been instructed by the Minister of Industry and Commerce (Mr. Lemass) to prepare a scheme for building the factory at the Blackwater Bog, in County Offaly. The new company would have a capital of between £6,000,000 and £8,000,000, and the new factory would be planned to produce about 100,000 tons of nitrates annually.—(Irish Times, Dublin)

A. MIDDLE EAST. — International Reactions to the Middle East Crisis.

International reactions to the crisis in the Middle East are summarized below under cross-headings, in continuation of 16317 A and 16305 A.

United Arab Republic. - President Nasser's Visit to Moscow. - Discussions with M. Khrushchev. - Defence Agreement between U.A.R. and Iraqi Republic.

On July 15, the date on which U.S. troops landed in the Lebanon, President Nasser was on board his yacht in the Adriatic after his talks with President Tito at Brioni (see 16297 D). On learning of the Lebanese landings he returned to Pula, discussed the situation with President Tito on July 16, and flew the same evening to Moscow. After two long meetings with M. Khrushchev on July 17, lasting eight hours in all, President Nasser left Moscow at dawn on July 18 and arrived a few hours later in Damascus.

A brief statement was issued in Moscow on July 18 saying that the talks between M. Khrushchev and President Nasser had taken place in a friendly atmosphere, and that they had dealt with "the question of stopping the aggression of the United States and other colonial Powers in the Middle East and of ensuring the preservation of peace and the independence of the Arab countries."

In Damascus President Nasser was met by a delegation from the Iraqi Republican Government consisting of Colonel Abdul Salam Aref, the Deputy Premier, Mr. Mohammed Hadid, the Minister of Finance, and Mr. Shanshal, the Minister of Information; the Iraqi delegation also included General Rubai, chairman of the Council of Sovereignty. On the following day (July 19) an agreement was signed between the United Arab Republic and the Iraqi Republic containing the following provisions:

(1) Both countries reaffirmed their full support for the Charter of the Arab League and the Collective Security Pact between the Arab States.

(2) The U.A.R. and Iraq, "co-operating as one bloc," would take all measures to repulse any attack directed against either country.

(3) Both countries would "co-operate fully in the international field to safeguard the rights of the two countries, in supporting the U.N. Charter, and in strengthening peace in the Middle East and the world."

(4) "Urgent and effective steps" would be taken to promote economic and cultural co-operation between the U.A.R. and Iraq.

(5) "Continuous contact and consultations" would be maintained between the two countries in all matters concerning them.

In a speech in Damascus on July 18, President Nasser warmly welcomed the revolution in Iraq; declared that "our brothers in Amman and Beirut are also fighting for freedom"; and attacked what he described as the "occupation" of Lebanon by American forces and of Jordan by British forces. "Today," he declared, "we feel that the flag of freedom is flying higher, the flag of freedom which defeated the occupation and tyranny, which defeated imperialism and the great powers." In a further speech in Cairo, delivered on July 22 before a crowd of 500,000 and in the presence of an Iraqi delegation, President Nasser spoke of his talks with M. Khrushchev and declared that "the banners of victory will fly over every Arab city and also in Algeria."

After welcoming the Iraqi delegation from "dear and beloved Baghdad," and saying that Iraq had "won a victory over imperialism and exploitation," President Nasser attacked King Hussein of Jordan for having "opened his country to the British *via* Israel." He went on to say that the U.S. and British "aggression" in Lebanon and Jordan would be defeated; that "a free Lebanese people and a free Jordanian people" would emerge; and that the entire Arab people "from the [Atlantic] Ocean to the [Persian] Gulf" were engaged in a single battle "through which we shall attain the supreme aim for which free men have been dying." He continued:

"The excuses which the imperialists made at the time of Suez are the same as the excuses made today . . . by those who want to place us within their spheres of influence . . . [The Americans] forget their own history and their own past; they forget that another revolution also took place in the month of July—a revolution in the United States to get rid of British imperialism and achieve freedom. That revolution was victorious. It proclaimed the same principles that our brethren, the free people of Iraq, proclaim today . . ."

After emphasizing that the Arab peoples throughout the Middle East were determined to pursue a policy of "positive neutrality" and of non-alignment with power blocs, President Nasser continued: "When the Iraqi revolution occurred I was in Yugoslavia . . . I sent a message to M. Khrushchev advising him of my desire to meet him in order to discuss the international situation and the dangers which threaten us on the part of the imperialist powers. M. Khrushchev welcomed the meeting and I went to Moscow . . . I found in these discussions goodwill, fraternity, and determination. Naturally, I cannot tell you all the details of the discussions . . .

"The Prime Minister of the Soviet Union has issued a statement calling for a summit meeting in order to discuss the developments in the international situation, to ease international tension and remove the shadow of war . . . We support this proposal . . ."

Soviet Union. - Denunciation of U.S. and British Action in Lebanon and Jordan. - Protests to Western Germany, Italy, and Israel. - Demonstrations against U.S. and British Embassies in Moscow.

In a strongly-worded statement on July 16, the Soviet Government urged the United States to "cease its armed intervention in the internal affairs of Arab countries and withdraw its troops from the Lebanon immediately." It added that the Soviet Union "cannot remain indifferent to events creating a grave menace in an area abutting on its frontiers, and reserves the right to take the necessary measures dictated by the interests of peace and security."

After describing President Eisenhower's statement (see page 16307) as an attempt to justify "flagrant military intervention in Lebanon's internal affairs," the Soviet Government alleged that "the real reason for U.S. armed intervention is the desire of the oil monopolies of the United States and other Western Powers to retain their colonial hold on countries of the Middle East, and also the obvious bankruptcy of their policy in the Arab East and the collapse of the Baghdad Pact and the notorious Dulles-Eisenhower doctrine."

As regards the Iraqi revolution, the statement said that the policy statements of the new Iraqi Government were "in accord with the desires of all the Arab peoples and should meet with unanimous support, both in Arab countries and in all peace-loving countries which regard the establishment of a republic as an entirely internal affair of the Iraqi people." It added: "This turn of events in the Middle East obviously does not suit the colonial Powers, which received the news of the establishment of the Republic of Iraq with undisguised hostility . . ."

Reverting to the Lebanese situation, the statement said that the landing of U.S. troops constituted "armed intervention" not only against Lebanon "but also against all the freedom-loving Arab countries", it also showed that "the imperialists have cast off their disguise and have begun open aggression against the peace-loving Arab peoples." In conclusion, the Soviet Government accused the United States of "flagrant violation of the U.N. Charter," of "attempting to confront the Security Council and the United Nations with a *fait accompli*," and of "bringing pressure to bear on the U.N. to make it approve the unilateral aggressive actions of the United States."

A statement in equally strong terms was issued by the Soviet Government on the following day (July 17) with reference to the despatch of British troops to Jordan.

Allegations that Britain had committed "armed aggression" against Jordan, which was "threatened by no-one," were followed by charges that Britain and America had "a broadly conceived plan of aggressive actions to suppress the national liberation movement in the Arab East." Britain and the U.S.A. were also accused of desiring "to reimpose the yoke of colonialism" on the peoples of the Middle East, so that "American and British monopolies can continue plundering the natural resources and manpower of these countries."

After alleging further that "the purpose of Britain's armed intervention in Jordan is not only to oppose the movement of the Jordanian people for their independence, but to use that country, along with American-occupied Lebanon, as a military base for suppressing the popular revolution in Iraq," the statement continued: "This path of military adventures is fraught with the gravest consequences for peace . . . Who better than the British Government should realize, particularly after the shameful failure of the military venture against Egypt, that the time has gone forever when the fire of colonialist gunboats and the landing of armed detachments can crush the uprisings of oppressed peoples and save colonialist regimes."

The statement went on to say that Britain and the U.S.A. had "broken their commitments to the U.N. and come out as violators of peace"; that the "aggressors" should "bear in mind that . . . the peoples of the Arab East are not alone in their struggle for freedom against the criminal actions of the American and British colonialists"; and that "a wave of protest against this bloody venture of the U.S. and British ruling circles has surged throughout the world." After calling on Britain and the U.S.A. to "end their armed intervention in the internal affairs of Arab States and withdraw their troops at once from Lebanon and Jordan," the statement reiterated that the Soviet Union could "not remain indifferent" to the events in the Middle East and might be "compelled to take the necessary steps dictated by the security interests of the U.S.S.R. and the safeguarding of world peace."

Protests were also made to the German Federal Republic (July 24) and to Italy and Israel (Aug. 1) in connexion with the U.S. and British action in the Middle East. In its Note to Western Germany, the Soviet Government protested at the fact that U.S. reinforcements had been flown to the Middle East from the Fürstenfeldbruck (Bavaria) and Frankfurt airports; in the case of Italy, exception was taken to the use of the Capodichino airport for similar purposes, and also at the

transfer of U.S. troops by sea from Naples, Genoa and Taranto; whilst Israel was criticized for allowing British and U.S. planes to fly over her territory to Jordan.

The West German and Italian Governments were urged to take "effective measures" to ensure that their territories were not used "for purposes of aggression against Arab States which are defending their freedom and national independence." The German Federal Government was accused of having taken an attitude "in contradiction of its previous claims that American troops stationed in Western Germany were serving the interests of defence and would never become instruments of aggression," while the Italian Government was reminded that Signor Zoli (the former Prime Minister) had given an assurance that "Italy will not only never commit aggression but will never participate in, or support, such actions on the part of anyone or against anyone."

The Israeli Government was accused of having "become a direct accomplice in the aggressive actions of the United States and Britain" by giving permission for overflying by British and U.S. planes. After a warning of "the possible consequences of such an attitude at a time when the threat to peace in the Middle East has increased," the Soviet Note said that "the Government of Israel, by placing its airspace at the disposal of Britain and the U.S.A., bears responsibility for the heightened tension in the Middle East, which can develop into a conflict with extremely serious consequences for the national interests of Israel herself."

Large-scale anti-American and anti-British demonstrations took place in Moscow on July 18, when some 75,000 people demonstrated outside the U.S. and British Embassies. Many of the demonstrators carried placards bearing such slogans as "Hands off the Arab lands," "Down with the aggressors," and "Get out of Lebanon and Jordan."

Tens of thousands of people gathered outside the U.S. Embassy, where many windows were smashed by stone-throwing and the walls were smeared by bottles of coloured ink flung by the crowd. Smaller demonstrations took place outside the British Embassy, where about 100 people climbed into the grounds in an attempt to present "protest resolutions" to the Ambassador (Sir Patrick Reilly); they were prevented from breaking into the building by security police. The demonstrations were apparently organized, as great columns of marchers converged on the embassies from different directions; the police made no attempt to disperse the crowds until nearly two hours later. Strong protests were made to the Soviet Foreign Ministry by Sir Patrick Reilly and the U.S. Ambassador, Mr. Llewellyn Thompson.

Some 2,000 people had also demonstrated outside the U.S. Embassy on the previous day (July 17), when unsuccessful attempts were made to present resolutions to the Ambassador. There was a good deal of shouting, whistling, and booing, but no acts of violence.

From July 7 to the first week of August the Soviet Army carried out large-scale manoeuvres in the Transcaucasian and Turkmenistan military districts (i.e. the areas adjacent to the Turkish and Persian frontiers), while the Soviet Navy carried out manoeuvres in the Black Sea; the Caucasian manoeuvres were under the command of Marshal Gretchko (formerly C.-in-C. in Eastern Germany), while those on the Persian border were commanded by Marshal Meretzkov, who led the Soviet forces in the Far East at the end of World War II. The Soviet Defence Ministry announced on Aug. 7 that the manoeuvres had ended.

China. - Anti-Western Demonstrations.

A statement demanding the "immediate withdrawal" of U.S. troops from Lebanon was issued by the Chinese Communist Government on July 16; its wording was similar to that of the Soviet statement, and contained the same accusations against the United States. On July 18 a Note was presented to the British Chargé d'Affaires in Peking protesting against Britain's "armed intervention" in Jordan, demanding the withdrawal of British troops from that country, and warning Britain that she faced "grave consequences" if she failed to do so.

Over half a million people demonstrated in Peking on July 17 before the *Tien An Men* (The Gate of Heavenly Peace) to proclaim Communist China's support for the Iraqi Republic and to denounce the U.S. "intervention" in Lebanon; diplomats from the U.S.S.R. and the Communist countries of Eastern Europe and Asia attended the rally, in addition to the U.A.R. Chargé d'Affaires. The speeches included one by the Mayor of Peking (Mr. Peng Chen) in which he described the United States as a "paper tiger."

On July 19 vast numbers of demonstrators—stated by Peking radio to number 2,000,000—marched in procession outside the British Embassy in Peking, chanting anti-British slogans and beating gongs and tom-toms; the walls of the embassy were plastered with slogans and placards, but there were no acts of mob violence as in Moscow. The Chinese Government refused to post extra guards at the embassy on the grounds that the demonstrations were "righteous." Similar large-scale demonstrations took place outside the British Consulate-General in Shanghai.

British Commonwealth Reactions.

The action taken by Britain and America in the Middle East was supported by the Australian and New Zealand Governments, whilst the Canadian Prime Minister said that Canada would give "every encouragement and support" to the Anglo-American efforts for a U.N. force to be sent to the Middle East. On the other hand, the Government of India opposed the British and American action and urged that both countries should withdraw their troops from Lebanon and Jordan. [For Pakistani reactions see 16340 A].

Australia.

The Prime Minister and the Minister of External Affairs (Mr. Menzies and Mr. Casey) issued a joint statement on July 18 saying that the British Government had no other course than to go to the aid of Jordan. "Far from by-passing the United Nations," it declared, "the United States and the United Kingdom have each gone to the U.N. and asked that it assume the responsibility which they have temporarily and lawfully assumed."

The joint statement said: "We are sometimes told that when small countries are menaced by the ambitions of others, they should do nothing and their friends should do nothing except to turn to the U.N. for protection . . . We are told that it is wrong for the United States to land forces in Lebanon because the U.N. Charter forbids the use of force or threat of force.

"The fact is that the U.S. troops in Lebanon are not employing force against anyone. The need to use force there or in Jordan would depend on the actions of those threatening those States. The rights of collective self-defence are quite clear under the U.N. Charter. If small independent countries are to be given confidence that their independent policies will not lead to their downfall, they have to be given the prospect of protection from persistent external interference. The U.K. and the U.S.A. have an established history of encouraging true nationalism and independence. It was natural that Jordan should turn under the present conditions to the United Kingdom."

In a statement on Aug. 6 to the House of Representatives, Mr. Casey suggested that the United Nations should create a commission on the Middle East "to investigate, verify, and publicly report to the U.N. on all external acts or threats of interference or subversion, whether direct or indirect"; this commission should be backed by a U.N. police force which could act effectively in controlling threatened borders.

Mr. Casey said a U.N. commission would create an environment in which Governments could work out policies free from external pressures. It should be located in the Middle East and should remain in existence until the Middle East showed signs of permanent stability. United Nations jurisdiction and action on these lines would create an atmosphere more favourable to a solution of one of the root causes of the explosive conditions in the area—the Arab-Israel problem, and the absence of a settlement on borders. With progress on the Israel question it would be possible to examine whether the flow of arms could be checked and a more effective guarantee of nationhood provided than at present existed. The basic political disputes would remain to be solved by negotiation, and the aspirations of the peoples of the Middle East for economic advancement must be recognized.

An international organization should be created to assist the countries of the Middle East to develop their resources and a mutually beneficial trade with the rest of the world. It would then be easier to resettle nearly a million Palestinian Arab refugees, with Israel making its due contribution. In this way genuine Arab nationalism could fulfil its aspirations in harmony with the interests of the Western Powers and to their mutual advantage.

Speaking of the radio campaign of propaganda and subversion emanating from Cairo and Damascus, and directed against Middle East Governments desiring to maintain normal relations with the West, Mr. Casey said that the recent "Kill King Hussein" campaign was a "typical Egyptian answer to the U.N. resolutions condemning this use of the radio as a threat to peace." A more serious recent development had been the introduction of arms and infiltrators on a large scale for dissident elements in the threatened States.

It was this kind of infiltration that had caused President Chamoun to appeal to the Western Powers for aid—his appeal having been made because the work of the U.N. Observation Group in Lebanon had proved futile in the face of the obstacles encountered. In Jordan, two coups against the Government had been planned during July; British troops had been sent there only after King Hussein and his Prime Minister had stated that Jordan was faced with an imminent attempt by the U.A.R. to create internal disorder and overthrow the Government. The Australian Government was therefore quite convinced of the legality of Britain's action in Jordan and of America's action in Lebanon.

The Leader of the Opposition (Dr. Evatt) said that the Australian Labour Party would support the Government's proposals, and urged the need to "neutralize" the whole area of the Middle East. He believed the U.S. and British intervention in Lebanon and Jordan to be unjustified under the U.N. Charter, adding that the "shocking" case of Soviet intervention in Hungary did not justify others taking the law into their own hands.

New Zealand.

The Prime Minister of New Zealand (Mr. Walter Nash) issued the following statement on July 17 on the U.S. landings in Lebanon :

" No Government can fail to be concerned over the grave deterioration of conditions in the Middle East and the degree to which constitutional processes and orderly relations between States are being abandoned in favour of rioting, assassination, and incitement to violence. The help made available is in response to a specific request by the Lebanese Government. The United States has immediately reported its action to the Security Council, called for the creation of a U.N. Force, and indicated its willingness to withdraw when the United Nations itself is in a position to assume responsibility. The U.N. is thus faced with decisions which I trust it will not shirk.

" In situations of this nature the position of the New Zealand Government has always been clear. We are prepared to support action by the U.N designed to protect the independence and territorial integrity of its members. Lebanon is a small country whose actions have threatened no-one. We would consider it a sad day if such a country, considering itself menaced from without, were unable to receive effective assistance from an organization recognizing as one of its basic principles the sovereign equality of its members."

In a statement on July 24 to the N.Z. House of Representatives, Mr. Nash said that Great Britain was fully justified morally and legally in accepting Jordan's request for aid. He urged a comprehensive United Nations programme to ensure political stability and economic and social betterment in the Middle East.

Canada.

In a statement on July 17 to the Canadian House of Commons, Mr. Diefenbaker said that Canada would give " every encouragement and support " to the Anglo-American proposal for a U.N. Emergency Force to be sent to the Middle East. Both Britain and the U.S.A. had acted " with due regard to the ultimate authority and responsibility of the United Nations."

India.

The Indian Ministry of External Affairs issued the following statement on July 18 :

" The Government of India are against intervention by foreign forces in any country, and think they should be withdrawn. In Lebanon, in particular, the U.N. Observation Group have reported that they have access to all parts of the frontier, and the Indian Government feel that the Group should be allowed to continue their function This would be a safeguard against any infiltration of foreign elements, and the presence of U.S. forces against any threat to the Lebanese Government from outside is therefore not necessary. If necessary the Observation Group might be strengthened."

[Although the statement made no reference to Jordan, an official spokesman said that it was also applicable to British forces.]

In a short press statement on July 16, Mr. Nehru said that " foreign intervention is always dangerous " and that India therefore viewed the latest developments in the Middle East with " grave concern." It was stated in New Delhi that Mr. Nehru had received personal messages from Mr. Macmillan, Mr. Diefenbaker and President Tito ; their contents were not disclosed.

[The British Government's decision to send troops to Jordan in response to King Hussein's appeal had been conveyed by Mr. Macmillan beforehand to the Prime Ministers of all the Commonwealth countries.]

Turkey. - Reply to Soviet Warnings. - Turkish Attitude to Middle East Crisis.

The Soviet Chargé d'Affaires in Ankara called at the Foreign Ministry on July 18 to deliver a copy of the Soviet Government's statement of July 16 on the Middle East (see above). At the same time he made a verbal statement which (*a*) noted that M. Menderes (the Turkish Prime Minister) had on several previous occasions emphasized Turkey's attachment to the maintenance of peace ; (*b*) expressed the Soviet Government's concern at the developments in the Middle East; and (*c*) expressed the hope that Turkey would " refrain from any steps which might lead to a worsening of the situation."

The Turkish Foreign Minister (M. Zorlu), in an oral reply on July 22, noted " with great pleasure " the Soviet references to the " peace-loving character of the various statements by our Prime Minister." He added : " The Turkish Government always studies events from the angle of whether its security and that of its allies are endangered or not, and adjusts its policy to the inspiration it draws from the legitimate principles of protecting the joint defence pacts of which it is a member. You can therefore rest assured that Turkey will in no circumstances cause an increase of tension in the Middle East, and that every measure that Turkey adopts will be a measure of defence."

On July 24, however, a Soviet *aide-mémoire* was presented in Ankara saying that M. Zorlu's declaration was " not in keeping with the facts regarding Turkey's actual policy with respect to recent events in the Middle East," and alleging *inter alia* that Turkey was " preparing to begin military operations against Iraq."

In support of these allegations, the Soviet Government referred to an interview given by M. Zorlu to the *Daily Mail* in which he was alleged to have said that Turkey fully supported the British action in Jordan and hoped that it would be " extended to Iraq." " This statement by M. Zorlu," said the *aide-mémoire*, " . . . directly contradicts the Turkish Government's statement of July 22 It is likewise contradicted by the permission which Turkey has given the United States to use the Adana military base for the concentration of American troops engaged in aggression against Lebanon."

The *aide-mémoire* went on to say that " reports coming in from everywhere " indicated that the Turkish Government had " recently been preparing to begin military operations against Iraq " and that " a corresponding appeal from King Hussein could be used as a formal pretext for the invasion of Iraq by Turkish troops." It added : " It seems that only an absence of complete agreement with the United States on this venture, and the resolute protests and stern warnings served on the aggressors by the Soviet Union and other peace-loving States against the intervention in Lebanon and Jordan . . . have so far prevented the implementation of plans to move Turkish troops into Iraq."

After alleging that Turkish troops were concentrating on the Syrian and Iraqi frontiers, the Soviet Government said that it " considered itself in duty bound to warn the Turkish Government of the grave responsibility of the possible consequences of unleashing an armed conflict in this area. It would like to believe that Turkey will not side with the aggressors and will refrain, not only in words but also in deeds, from steps leading to a worsening of the situation in the Middle East."

A statement on Turkey's attitude to the events in the Middle East was made at an extraordinary session of the Grand National Assembly on July 26 by Dr. Namik Gedik (Minister of the Interior), in the absence of M. Zorlu.

After pointing out that Turkey had common cultural and economic ties with the Middle East countries, and that it was " her sincerest wish that each one of them should enjoy national independence, integrity, and progress on the road to prosperity," Dr. Gedik stressed that Turkey's own national interests were bound up with a " trustworthy, stable, and prosperous" Middle East. She would therefore continue a policy of reconciling the interests of those countries with her own interests.

Turning to the developments in Lebanon, Dr. Gedik pointed out that the rebels had widened the scope of their efforts following the *coup d'état* in Iraq, and said that the legitimate Government of Lebanon had had to ask for U.S. assistance. He continued : " The United States has given assistance under Article 51 of the U.N. Charter. This Article gives to member-nations the right of defence, singly or together, against armed attack, and requires that the Security Council should be notified at once. The U.S.A. duly notified the Council and declared that she will withdraw her forces immediately if the U.N. takes the necessary measures to secure Lebanon's independence. In addition, the U.S.A. submitted a resolution to the Council asking the U.N. to take action to prevent infiltration of arms and personnel into the country. However, this resolution was vetoed . . . "

Dealing with the events in Iraq, Dr. Gedik spoke as follows : " On July 14 there was a sudden *coup d'état* ; as a result, not only was the Government overthrown but the King, some members of the Royal Family, some Government leaders, and high-ranking officers were killed or arrested . . . At the time of the outbreak in Iraq, a decision had already been taken to hold a conference in Istanbul between the Heads of States of the four Moslem members of the Baghdad Pact. Following the *coup d'état* in Iraq, the conference was held with the participation of the three remaining States—Turkey, Persia, and Pakistan [see 16340 A]. As was expected, collective problems concerning our area, the changes in the position of the Lebanon, and the regrettable developments in Iraq were discussed in detail and in an atmosphere of complete solidarity. And as was emphasized in the communiqué, full identity of views was achieved during the discussions. The most important result achieved during the tripartite conference was the reaffirmation by Turkey, Persia, and Pakistan of their determination to act in unison and in a spirit of solidarity, and also their decision to achieve full co-operation in respect of measures to preserve their security.

" Simultaneously with the events in Iraq and the Lebanon," Dr. Gedik continued, " a plot against the legitimate Government of Jordan was discovered. The Government of Jordan, seeing that its independence and unity were in danger, appealed to Britain for help. In reply, Britain mobilized some of her parachute units based in Cyprus and sent them to Jordan at full speed. The help given by Britain to Jordan is also in complete conformity with Article 51 of the Charter. Britain, acting within the framework of this clause, informed the Security Council immediately of the action taken and announced that she would withdraw her forces as soon as the Security Council was in a position to take appropriate measures to protect the independence of Jordan. In view of the fact that we have very close and friendly relations with Jordan, we attach the greatest importance to the protection of that country's independence and

integrity. For this reason we consider that the measures taken by Britain following the appeal by Jordan were justified. It is impossible to deny the legality of actions aimed at meeting appeals from legitimate States in accordance with the U.N. Charter . . . In point of fact, such actions are entirely in keeping with the principles of international law

"I should like to turn briefly to our relations with Iraq. First of all I should like to emphasize the fact that our deepest wish is to maintain harmonious relations with our Iraqi brethren. This consideration is one of the underlying necessities of the policy of close friendship we are following towards all Arab States. In truth, our mutual interests with Iraq make it a necessity for our relations to develop in this direction . . . As you know, a meeting will be held in London on July 28 between the Prime Ministers of the Baghdad Pact countries [see 16340 A]. In view of the latest developments in the Middle East, this conference will be of the utmost importance. The U.S. Secretary of State will also take part in the conference . . . Problems concerning the Middle East as a whole, the position of the Pact in the face of recent developments, and the strengthening of the Pact organization to reinforce collective defence, will be among the questions to be examined The position of Iraq and the problem of her relationship with the Pact will no doubt also be reviewed. These developments have not yet been completely clarified. There is no doubt that as a result of the discussions, the position will become clearer and it will be possible to define our line of action more precisely.

"I should like to confirm that the traditional aim of our foreign policy is based on the desire to preserve world peace and the peace of the region in which we are situated, and on the necessity of reinforcing the security of Turkey. Turkey will never falter in her desire to co-operate closely with countries which, like herself, are dedicated to the preservation of peace and collective security."

Israel. - Mr. Ben-Gurion's Statement. - Cessation of British and U.S. Flights over Israel. - Mrs. Meir's Visits to Paris and London.

In a statement to the *Knesset* on July 21, Mr. David Ben-Gurion said that the recent events in the Middle East had increased "the danger of Israel's encirclement by President Nasser." He added: "The grave events surrounding us require careful and calm consideration. Two courses are open to us: (1) To remove the Nasser threat so far as it is within our power; this does not depend entirely on us. (2) To strengthen ourselves; this the Government has decided to do in the face of the present crisis . . . The events in Iraq are undoubtedly the gravest in our area since our War of Independence in 1948.

By 73 votes to 11, the Israel Parliament agreed to Mr. Ben-Gurion's motion that the Middle East developments should be considered by its Foreign Affairs and Security Committees, and should not be debated in the *Knesset*.

As stated below (see section "Jordan") the Anglo-American airlift over Israel was ended during the first week of August, after which all supplies for the British forces in Jordan were delivered through the port of Akaba.

The Anglo-American airlift over Israel ceased on Aug. 4, apparently as a result of Israeli representations in London and Washington. It was resumed for a limited period on Aug 6, at the request of the United States, to allow overflying by American *Globemasters* carrying supplies for Jordan; no further request for overflying rights was made by Britain, and on Aug. 10 it was confirmed that all such flights had ended, both by U.S. and British planes.

It was stated in Jerusalem that the ban on British and American overflying had no connexion with the Soviet protest to Israel (see above), nor did it necessarily mean that British and U.S. planes would be forbidden to fly over Israel "if an emergency should arise"

The Foreign Minister of Israel (Mrs. Golda Meir) had discussions in Paris on Aug. 5 with General de Gaulle and the French Foreign Minister, M. Couve de Murville. She also visited London on Aug. 11 for talks with the British Foreign Secretary, Mr. Selwyn Lloyd, before leaving for New York.

A brief statement was issued in Paris (Aug. 6) emphasizing the reciprocal desire of France and Israel to see peace and stability established in the Middle East; it was stated that the talks between Mrs. Meir and General de Gaulle had taken place in an atmosphere of "reciprocal understanding and cordiality" and "within the framework of the traditional Franco-Israeli friendship."

At a press conference before leaving Paris, Mrs. Meir confirmed reports that Israel was seeking arms from France, Britain, and the U.S.A. in view of the "massive quantities of armaments received by certain Arab States during the past three years, both from the East and the West." She intimated that Israel was particularly interested in expanding her naval forces.

A British Foreign Office statement on the talks between Mrs. Meir and Mr. Selwyn Lloyd said that there had been "a most useful exchange of views on problems of interest to the two countries, particularly those of the Middle East"; it was explained that Mrs. Meir had visited London at the invitation of H.M. Government.

Mrs. Meir stated at a press conference that the airlift to Jordan had not been discussed, saying in this connexion: "We were asked for a certain specific operation; we agreed to it. When we thought the operation was taking too long we asked for it to be suspended." On the future of Jordan, she said that her Government would be very happy to see the situation in that country stabilized, and to see Jordan assured of the possibility of free and independent existence and free of the threat of direct or indirect attack from her Arab neighbours. After saying that King Hussein had "not often made declarations of peaceful design" so far as Israel was concerned, she added: "Sometimes we are not in a position where we have to choose between friends and enemies, but between lesser and greater enemies. That is the situation so far as Jordan and the United Arab Republic is concerned. We cannot visualize Jordan joining the United Arab Republic voluntarily if left to itself If it joins the Republic it will mean that it has been attacked by the Republic or weakened by arms or infiltrators from outside."

Jordan. - King Hussein's Attack on "Nasserism" and Communism. - Death Sentences for Conspiracy Plot. - British Troops supplied through Akaba.

In a broadcast on Aug. 10 (the sixth anniversary of his accession), King Hussein made a strongly-worded attack on "Nasserism" and Communism, declaring that "Nasser, the Communist agent, went to Moscow as a pilgrim to pledge loyalty to his masters and submit a report on deeds in sister Arab countries." He described President Nasser as an "adventurer" and his regime as "sons of blasphemy," and said that not a single Arab country had been spared from the "conspiracies of the Egyptian dictator" and the "subversive activities of his embassies and military attachés." Syria had been "the first victim of Communism" in the Middle East, and now "evil hands" had fallen on Lebanon; Jordan, however, had stood firm, and he was confident that she would be able to repulse the threat to her existence.

Bedouin tribesmen from all parts of Jordan pledged their loyalty to King Hussein at a big military parade in Amman on Aug. 11. The desert tribesmen, who form about half the Jordanian Army, have a tradition of loyalty to the Crown and the Hashemite dynasty.

Thirteen people—12 Jordanian nationals and a Syrian—were condemned to death by a military court in Amman on Aug. 12 for smuggling arms and explosives into Jordan from Syria with the aim of stirring up armed rebellion against King Hussein and the Jordanian Government. Two others were sentenced to life imprisonment; eight (all between the ages of 17 and 19) to 15 years' hard labour; two to five years' imprisonment; and the remaining two were acquitted. The sentences were passed after a trial lasting eight days.

All the 27 persons concerned were seized in a series of Arab Legion operations along the Syrian border during the last few days of July; rifles, sub-machine-guns, anti-tank weapons, and explosives were impounded in those operations. It was alleged at the trial that all the accused had been trained and supplied with arms by the Syrian *Deuxième Bureau*.

It was also announced on Aug. 12 that five more Jordanians would be brought to trial on charges of plotting against the security of Jordan. The persons concerned were arrested after bomb explosions on Aug. 2 in Government buildings and the British Council library in Amman; little damage was done and there were no casualties. The arrested persons included two graduates of the American University in Beirut (one of them a woman) and an employee of the U.N. Relief and Works Agency in Amman, who was charged with smuggling explosives on UNWRA aircraft flying to Jordan from Beirut and Damascus.

The British forces in Jordan (about 2,500 men of the Parachute Brigade) were reinforced on Aug. 7 by the 1st Battalion, The Cameronians, who arrived at Akaba from Aden in the aircraft carrier H.M.S. *Bulwark*. It was explained in London that the infantry battalion about 500 men would be used for lines-of-communication duties between Akaba and Amman, and that all British forces in Jordan would henceforth be supplied by sea through Akaba instead of by air from Cyprus. As stated above, flights by British and American planes *via* Israel were terminated during the first week of August.

Kuwait and Persian Gulf Sheikhdoms.

The Ruler of Kuwait (Sheikh Abdullah as-Salim as-Sabah) had a meeting with President Nasser in Damascus on July 20 and also with M. Kuwatly, the former President of Syria; no statement was issued on these discussions. In a statement in Cairo on July 21, the chairman of the Ruler of Kuwait's Advisory Council (Mohamed Suleiman el-Oncibi) said that the Sheikhdom would "object to foreign troop concentrations on its soil"; that the Kuwaiti Army was "able alone to safeguard the oil"; and that Kuwait had no plans to join the Iraqi Republic, with which it had "brotherly relations."

The Sheikhdom of Kuwait produces about half of all the crude oil imported into Britain; situated at the head of the Persian Gulf, and adjoining Iraq, it is 5,800 square miles in area and has a population of about 200,000. Kuwait is in special treaty relations with Britain, which has responsibility for the Sheikhdom's foreign

relations and a major interest in its oil production. No British forces are stationed in the Sheikhdom - the nearest are at Bahrein, 300 miles to the south.

The Special Correspondent of the *Daily Telegraph* in Bahrein cabled (July 20): "Despite the superficial appearance of calm in Kuwait it has been apparent for some time that there has been considerable misgiving about the activities of the pro-Egyptian elements there, especially the teachers, who are mostly Egyptians. The Ruler normally spends a summer holiday each year in Lebanon, but this year, owing to the crisis there, he went to Damascus and Teheran instead."

The Ruler of Kuwait is reputed to have an income of over £100,000,000 a year from oil royalties; much of the proceeds have been used for building schools, hospitals, housing estates, and other amenities, whereby Kuwait has been transformed into one of the most modern places in the Middle East.

The Ruler of Qatar, a rich oil-bearing sheikhdom on the Persian Gulf in treaty relations with Britain, arrived in London on Aug. 13 for a four-day visit as the guest of the British Government. He travelled from Switzerland, where he had been on a private visit for about two months.

Qatar, though having a population of only 35,000, is one of the richest States in the world on a *per capita* basis, with estimated oil revenues approaching £20,000,000. Covering 8,000 square miles of arid desert, it adjoins Saudi Arabia and Trucial Oman. Oil was discovered just before the Second World War, and production has risen spectacularly from 4,500,000 tons in 1954 to 8,000,000 tons in the present year; the concession is operated by Qatar Petroleum Products, and profits are shared between the State and the company on a 50-50 basis. As in Kuwait, the vast oil royalties accruing to the Ruler (Sheikh Ali bin-Abdullah al-Thani) have been largely devoted to developmental and social service projects, including one of the most modern hospitals in the Middle East, built at a cost of £3,000,000. Many new schools have also been provided, but as in many parts of the Middle East - they have had to be staffed by Egyptian and Syrian teachers because few candidates of other nationalities are available.

Relations between Britain and Qatar are governed by a series of treaties and agreements concluded since 1820; one of the most important is a treaty of 1916, whereby Britian undertook to defend Qatar against any unprovoked attack. As in Kuwait, the Sheikhdom's foreign relations are a British responsibility. There is a British Political Agent in Qatar, as in the other protected sheikhdoms of the Persian Gulf, and a small number of British officers in the local police force. The Ruler's political adviser is a British national.

United States. - Warning to United Arab Republic. - Mr. Murphy's Mission to Middle East.

The State Department announced on July 18 that the U.S. Ambassador in Cairo (Mr. Raymond Hare) had called the previous day on Mr. Ali Sabry (U.A.R. Minister of State for Presidential Affairs, and acting Foreign Minister in Dr. Fawzi's absence) to ensure that the United Arab Republic "fully understood why the United States had acted as it did in Lebanon." In an oral communication, Mr. Hare had pointed out that "any attack on U.S. forces by military units of the United Arab Republic or under U.A.R. control could involve grave consequences seriously impairing" the relations of the two countries.

Mr. Robert Murphy, who had gone to Lebanon as President Eisenhower's special representative (see page 16308, first column), visited Amman on July 30, Baghdad on Aug. 2, and Cairo on Aug. 5-6 for discussions with the leaders of the respective countries. During his visit to Jordan he had talks with King Hussein and the Prime Minister, Mr. Samir Rifai; in Iraq he met Brigadier Kassem and other members of the Republican Government; and in Cairo he had a conversation with President Nasser. No statements were issued.

In a press statement in Baghdad, Mr. Murphy said that he had had an "extremely friendly and cordial reception" from Brigadier Kassem and the members of his Government. The Iraqi leaders were "actively studying" the question of the Baghdad Pact but had shown no hostility towards it; they had also listened "very earnestly" to his (Mr. Murphy's) explanations of the pact as part of a world-wide collective security system.

After commenting that the Iraqi leaders seemed more preoccupied with internal problems than external ones, Mr. Murphy added: "They told me about the corruption and mismanagement . . . and past sins of the former regime, and their efforts to increase the standards of living of the people and to continue marketing oil. They categorically denied that the revolution was inspired from outside and said it was a purely internal affair. I was impressed by the earnestness and alertness of the new leaders, who seem full of determination to maintain their independence of world blocs . . . They made no references to alliances with the U.A.R. or other countries, although they expressed the friendliest feelings for President Nasser and suggested that the United States failed to appreciate the significance of the Arab attitude towards him."

After visiting Athens for discussions with the Greek Prime Minister and Foreign Minister (M. Karamanlis and M. Averoff), Mr. Murphy arrived in London on Aug. 10 for talks with Mr. Macmillan; in a statement at London Airport he said that he was "not pessimistic" about the situation in the Middle East, and expressed his belief that "a great deal of progress has been made in the area" during the past few days. After talks with Mr. Macmillan at Chequers, Mr. Murphy visited Paris on Aug. 11 for a discussion with M. Couve de Murville before returning to Washington.

French Reactions to Lebanese Crisis.

A French naval squadron consisting of the cruiser *De Grasse* and three destroyers arrived off Beirut on July 18, but left Lebanese waters the same evening after the French Ambassador (M. Roche) had had discussions with Admiral Jozan, who was in command of the French warships. The discussions were held on board the *De Grasse* and, it was understood, dealt with developments in Lebanon and in the Middle East generally, with special reference to the protection of French interests. M. Roche and Admiral Jozan were visited on board the *De Grasse* by the U.S. Ambassador and the British Chargé d'Affaires in Beirut.

It was authoritatively stated in the French Press that the despatch of the French warships had been ordered for three reasons: (i) In view of France's century-old links with Lebanon, the French Government had felt that it should be represented at any development affecting the fate of that country; (ii) concern for the security of French residents and property in Lebanon a country whose currency was guaranteed by France; (iii) the fact that President Chamoun, in addition to his appeal to the U.S.A., had also formally asked for French support to protect Lebanese basic interests.

On the other hand, resentment was expressed in Paris at the fact that France had not been consulted in the Anglo-American discussions preceding the U.S. action in Lebanon, despite France's close ties with that country, and had only been informed of the British and U.S. decisions concerning the despatch of forces to Lebanon and Jordan as a *fait accompli*. In this connexion it was pointed out (*a*) that General de Gaulle's Government, since the beginning of the Lebanese crisis, had maintained the view that any military intervention from outside was undesirable; and (*b*) that in the light of subsequent developments in Lebanon it was felt that the Lebanese Government and Opposition would be able to reach a settlement without such intervention.

Yugoslav Statements on Middle East Crisis.

The Yugoslav Government issued a statement on July 15 expressing concern at the situation created by the despatch of the U.S. troops to Lebanon, which was described as an "arbitrary act" causing grave tension and theatening an international conflict; it was stated that the U.N. alone should have responsibility in Lebanese matters, and that intervention by armed forces was all the more dangerous as the U.N. was already dealing with the problem. A supplementary statement condemned the despatch of British troops to Jordan as a "further aggravation of an already explosive situation."

On July 18 the Yugoslav Government issued two statements: one calling for an urgent session of the U.N. General Assembly on the Middle East, and the other demanding effective measures by the United Nations to prevent "armed intervention in the internal affairs of two countries" being extended into "aggression against Iraq."

Letters advocating U.N action in the Middle East were sent by President Tito to the Emperor Haile Selassie of Ethiopia, President Sukarno of Indonesia, and the Prime Ministers of India, Burma, Greece, and Sweden.

British Reinforcements for Middle East.

The U.K. Ministry of Defence announced on July 15 that certain precautionary measures would be taken "in view of the generally unsettled situation in the Middle East," including the alerting of an infantry brigade in Britain and of the Parachute Brigade and the 1st Guards Brigade in Cyprus; the despatch of reinforcements from Kenya to Aden and from Aden to the Persian Gulf; and "certain precautionary moves" by naval units in the Mediterranean and the Persian Gulf.

All these movements were carried out within the following week, including the transfer of the H.Q. staff of the 24th Independent Brigade from Kenya to Bahrein and the movement of the 19th Brigade from the U.K. to Cyprus, both carried out by air. The latter operation involved the movement of some 2,000 men.

The Prime Minister of the Rhodesian Federation (Sir Roy Welensky) announced on Aug. 4 that a jet *Vampire* squadron of the Royal Rhodesian Air Force and a half-squadron of transport planes had been moved to Aden and would be attached to the Royal Air Force. -(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Embassy Press Department, London - Turkish Embassy Press Department, London - Australian News and Information Bureau - N.Z. Directorate of Information, Wellington - Indian High Commissioner's Office, London - Tanjug Agency, Belgrade)

(Prev. rep. Middle East Crisis, 16317 A; 16305 A.)

A. NIGERIA. — Request for Independence in 1960. - Constitutional Developments. - Self-Government for Northern Region in 1959. - Ministerial System in Southern Cameroons.

The Nigerian Federal House of Representatives passed a private member's Bill on Aug. 5, 1958, without a division, which proposed to seek independence from Britain on April 2, 1960. The motion was introduced by Mr. Fani Kayode and seconded by Chief T. T. Solaru (Action Group). The Federal Prime Minister (Mr. Balewa) accepted the Bill on behalf of the Government and announced that he was considering, in conjunction with the Governor-General, methods by which outstanding difficulties could be overcome in time; he appealed to all members to treat independence as a national and not as a political issue.

The proposal was linked with the statement on Nigerian independence made by Mr. Lennox-Boyd on June 23, 1957, during the London Constitutional Conference (see 15747 A). As a result of that conference, three Commissions were set up in the autumn of 1957 to deal with a number of questions requiring further investigation. They were:

The Constituency Delimitation Commission. Lord Merthyr (chairman of the Federation of Malaya Constituency Commission in 1954) was appointed chairman of this Commission on Sept 23, 1957, the other two members being Mr. T. Farley Smith (formerly Administrative Secretary, Nigeria), and Mr. J. F. A. Lees (Principal Surveyor in the Nigerian Federal Survey Department). Their report, published on May 16, 1958, recommended that there should be 320 single-member constituencies (on the basis of one such constituency for a federal average of each 98,622 of the population according to the 1953 census), and that these constituencies should be allocated as follows:

	Existing Distribution	Proposed Allocation
Northern Region .	83	174
Eastern Region ..	42	73
Western Region ..	42	62
Southern Cameroons	6	8
Lagos	2	3
	175	320

The Minorities Commission. The composition and terms of reference of this Commission were announced on Sept. 25, 1957 (see 15769 B), and its public hearings, under the chairmanship of Sir Henry Willink, began on Nov. 29 at Ibadan, capital of the Western Region. The Western Nigerian Regional Government, however, withdrew from the proceedings on Dec. 10 because of a procedural dispute. The Commission subsequently visited other parts of Nigeria, but has not as yet published its report.

The Fiscal Commission. This was appointed on Oct. 10, 1957, its members being Sir Jeremy Raisman (deputy chairman of Lloyds Bank) as chairman, and Professor R. C. Trees, of Bristol University. Its terms of reference were to review the present division of powers to levy taxation within the Federation, and also the system of allocating revenues between the Federal Government and the three Regions and the Southern Cameroons.

A preliminary report of the Commission, published in December 1957, proposed that, as from April 1, 1958, the Southern Cameroons should be treated in exactly the same way for revenue allocation purposes as the three Regions. This recommendation was subsequently accepted by the Colonial Secretary, and also by the Federal and Regional Governments.

A further report was published on July 28, 1958, with the following recommendations:

Northern Region. An additional payment of £500,000 should be made from Federal reserves during 1958-59, in consideration of this Region "having had less than its due share of allocated revenues"; a similar sum should be paid annually thereafter, until such time as the recommended new system of revenue allocation for Nigeria as a whole was put into effect.

Federal Revenue. Customs and Excise duties, and taxes on company profits, should remain federal—together with the basic jurisdiction to impose sales taxes. Federal jurisdiction over mining royalties and rents should be maintained, but 50 p.c. of the proceeds should go to the Region of origin, 20 p.c. to the Federal Government, and 30 p.c. to a distributable pool on which all Regions would draw. To this pool should be added 30 per cent of general import revenue, and it was proposed that its total resources should be distributed annually as from April 1, 1959, in the following proportions: North, 40 per cent; East, 31 per cent; West, 24 per cent; Southern Cameroons, 5 per cent.

Conference on Electoral Procedure.

Two special committees were set up at the London Constitutional Conference—one to consider proposals for an electoral law for the Federation, and another to investigate the functions of the Central Marketing Board. It was announced on Jan. 8, 1958, that—as agreed at the London Conference—an *ad hoc* constitutional conference to discuss the findings of the committees would open in Lagos during February.

Draft electoral regulations for the next Federal election, which had been approved by this conference, were published on May 13. They laid down:

(i) That the election should be held on one day throughout Nigeria, under the supervision of an electoral commission to be appointed by the Governor-General; (ii) that any person over 21 who was resident in Nigeria and a British subject, or protected person, would be eligible to vote; (iii) that in the Northern Region the franchise would be limited to male adults, and that women would neither vote nor be eligible as candidates.

Constitutional Developments.

The following recommendations of the London Constitutional Conference were made effective by an Order-in-Council on April 1, 1958:

Northern Region. Membership of the Northern House of Chiefs would be increased from 50 to 62; a Northern Council of Chiefs would be established, consisting of the Governor (as President), the Premier, from 2 to 4 Chiefs who were members of the Executive Council, and 4 other Chiefs from the House of Chiefs.

Southern Cameroons. For details see section "Regional Developments" below.

Eastern and Western Regions. In each of these self-governing Regions there would be set up, as from April 1, 1958, a Public Service Commission and a Judicial Service Commission; the office of Attorney-General would be filled on the recommendation of the Premier; and the post of Director of Public Prosecutions created. The tenure of office of members of Public Service Commissions, and those of judges, the Director of Public Prosecutions, and the Director of Audit, would be safeguarded.

The Federation. Provision was made for the creation of a Federal Police Commission.

Finance. Basic financial principles would apply to all Nigerian Governments, and an increase in the allocation of revenue derived from specific import duties to the Southern Cameroons would be provided at the expense of the Federation.

Regional Developments.

Various recent developments in the Regions of Nigeria are summarized below.

Eastern Region.

Dissensions within the N.C.N.C. Thirty-one leading members of the National Council of Nigeria and the Cameroons (the ruling party in the Eastern Region) presented a petition on June 14, 1958 to Dr. Azikiwe, the Regional Premier and party president, demanding his resignation from both the Government and the party. The signatories (in the main Federal or Lagos politicians) accused Dr. Azikiwe of "splitting the party asunder" and of "losing interest in it"; referred to the findings of the Foster-Sutton tribunal against Dr. Azikiwe (see 15489 A); and blamed him for the failure of the universal free primary education scheme (see below).

The five leading signatories were: Dr. Mbadiwe (Federal Minister of Commerce and Industry); Chief Kolawole Balogun (Federal Minister of Information); Chief H. O. Davies (Chairman of the party's Western Region working committee); Mr. U. O. Ndem (Parliamentary Secretary to Dr. Mbadiwe), and Mr. O. Bademosi (Parliamentary Secretary to Chief Balogun). All five were expelled from the party by its National Executive, but immediately formed a new organization designated the "N.C.N.C. Reform Committee." Subsequently, Dr. Mbadiwe announced on Aug. 4, 1958 the formation of a new party, under the name of the "Democratic Party of Nigeria and the Cameroons," advocating a federal form of government based on Socialist ideology.

Earlier, on Oct. 30, 1957, the N.C.N.C. had, at Dr. Azikiwe's request, granted him considerably increased powers for "drastic control of the party, even in a totalitarian manner." In a resulting reshuffle of the party's National Committee four of its officials were replaced, including Dr. Mbadiwe, Chief Balogun, and Chief Davies — all of whom signed the petition of June 14, 1958.

By-Elections. In a Regional Assembly by-election in the Eket division, held on May 11, 1958, all three seats were won by Action Group (Opposition) candidates on the issue of setting up a separate State comprising the provinces of Calabar, Ogoja, and Rivers.

The School Fees Dispute. As a result of demonstrations and violence arising out of the reintroduction of school fees on Jan. 27, 1958 (after the introduction of universal free primary education by Dr. Azikiwe a year earlier) the Governor-General assumed emergency powers in the provinces of Rivers and Owerri by proclamations of Feb. 5 and 12. The Regional Government had claimed that limited financial resources compelled it to abandon the free education scheme, and had imposed a registration fee of 10s.-20s. for each child, and a teaching fee of £6-£8 for older children of standards V and VI.

The demonstrations originated in the Port Harcourt and Okigwi areas, the majority of the demonstrators throughout being women, since according to family custom the women are responsible for the cost of educating their children from their share of agricultural earnings; men, however, joined in the later and more serious attacks. No violence was committed against Europeans.

At a special session of the House of Assembly at Enugu on Feb. 13, the Government announced that the existing system of school fees would be abolished. Mr. B. C. Okwu (acting Minister of Education)

told the House that instead of enrolment fees, fees would be charged for certain standards on a "voluntary" basis; a Government motion to this effect was carried by 62 votes to 11 on Feb. 16. During the debate Dr. Azikiwe drew attention to the facts that attendance at primary schools had increased from 900,000 to 1,500,000 between 1956 and 1957, and that the Education Budget—already more than £6,000,000 out of a total budget of £14,000,000—would increase by £1,300,000 annually.

The state of emergency was lifted on March 7.

Western Region.

Chief Awolowo, the Regional Premier and leader of the Action Group, announced a reorganization of his Ministry on Oct. 21, 1957. All former Ministers were retained, though some were given different portfolios, the only new appointment was that of Mr. A. Adigun, who became Minister of Health and Social Services.

Alhaji Adegoke Adelabu, leader of the Opposition in the Western Nigerian House of Assembly, was killed in a motor accident on March 25, 1958. This gave rise to prolonged and serious disturbances involving the deaths of 14 people in the first week alone, and necessitating the declaration of a state of emergency in several areas of Western Nigeria. A police statement expressed the opinion that the emotional reaction to Adelabu's death had been inflamed and exploited by persons "interested in anti-tax agitation," and by hooligans generally. Several hundred people were arrested, 77 being committed for trial at Lagos on May 27 on charges of murder.

Northern Region.

A resolution by the Regional Premier (the Sardauna of Sokoto) proposing that regional self-government should be granted on March 15, 1959, was unanimously adopted by the House of Assembly on Aug. 6, 1958. Detailed proposals will be submitted to the Colonial Secretary, including the following:

(i) The Governor (at present appointed by the Queen on the advice of the Colonial Secretary) should be named "after unofficial consultation with the Regional Premier"; (ii) the Governor would retain his powers to administer the Region in "war, insurrection, physical disaster, or political deadlock"; (iii) he would also retain reserved constitutional powers in relation to (*a*) the Federal Government (until the Federation itself became independent), and (*b*) the trusteeship of the Northern Cameroons; (iv) the Public Service Commission and the judiciary should be independent and free from political or other influences.

Southern Cameroons.

Although the Order-in-Council embodying the constitutional changes necessary to establish a ministerial system had come into effect on April 1, 1958, they were not implemented until May 15, after further discussions between Sir James Robertson (the Governor-General) and Dr. E. M. L. Endeley (the Leader of Government Business in the Southern Cameroons' House of Assembly). The changes were as follows:

(i) The Governor-General assumed the title of High Commissioner for the Southern Cameroons; (ii) a Ministry was created consisting of a Prime Minister, three Ministers holding portfolios, and one without portfolio; (iii) a House of Chiefs was established as a deliberative body; (iv) the elected membership of the House of Assembly was increased; (v) an unofficial elected majority was created in the Executive Council; (vi) provision was made for an increase of revenue, as outlined above.

[Under the existing trusteeship agreement the U.K. Government is obliged to administer the territory as an integral part of Nigeria, which will no longer be possible when Nigeria becomes independent. The peoples of both North and South Cameroons will be enabled to express their wishes freely on their future status, and no pressure will be exerted upon them to become part of an independent Nigeria against their will.]

Changes in Federal Government.

Dr. K. O. Mbadiwe and Chief Kolawole Balogun, together with their Parliamentary Secretaries, resigned from the Federal Government on July 26, 1958; all four were among the signatories of the petition of June 14 demanding the resignation of Dr. Azikiwe, the Premier of the Eastern Region (see above). It was announced on July 27 that Mr. Z. B. M. Dipcherima would become Minister of Commerce and Industry in succession to Dr. Mbadiwe, and that Mr. Victor Mukete would replace Chief Balogun as Minister of Research and Information; Mr. Dipcherima and Mr. Mukete had hitherto been Ministers of State.

In an earlier Cabinet change (Sept. 17, 1957) Chief Festus Okotie-Eboh (Minister of Labour and Welfare) had been appointed Finance Minister—an office previously held by the Prime Minister (Dr. Balewa); the Labour and Welfare portfolio was assumed by Mr. J. M. Johnson, who remained Minister of Internal Affairs.

Position of British Civil Servants.

In a White Paper of Aug. 1, 1958, the British Colonial Office announced new financial inducements to encourage British civil servants to remain at their posts in the service of the Nigerian Government in Northern Nigeria, when that Region became self-governing in March 1959.

[Previous schemes to ensure a similar stability in the Eastern and Western Regions, which attained self-government in 1957, appeared to have accelerated resignations rather than retarded them—primarily because the "lump-sum" payments offered dwindled with each further year of service, and were therefore more attractive if accepted intact upon immediate resignation.]

The new proposals were as follows:

(1) Officials who remained would be entitled, right up to the time of their retirement or prior resignation, to their maximum "lump-sum" compensation, of which 90 per cent would be advanced immediately. (2) All pensions, gratuities, and other payments would be made by the British Government (i.e. not by a possibly financially unstable local government), which would exact repayment from the local government concerned. (3) Officials might join a Colonial Office special list, offering possibilities of transfer to other territories. (4) There would be a right of appeal to the British Government in cases of dispute over payments or terms of service.

The British Government would meet a large proportion of the expense involved - the proportion being expected to be in the region of £1,000,000 in 1958, £1,500,000 in 1959, and thereafter at a decreasing rate.

The proposals—apart from minor details—were accepted by the Governments of Northern Nigeria and of the Federation.

The Federal Government, on the other hand, rejected on Aug. 4, 1958 the main proposals of a committee set up by the Prime Minister (Mr. Balewa) to suggest ways of speeding the "Nigerianization" of the public services. While endorsing the aim of an entirely Nigerian Civil Service, the Government considered it had insufficient experienced Nigerian officers to replace the present senior administrative officers who would be retired—particularly if, as was feared, professional, technical, and junior officers should also decide to leave.

Extension of Governor-General's Term.

It was announced in Lagos on Jan. 27, 1958, that the Queen had approved an extension for an unspecified period of the three-year term of the Governor-General, Sir James Robertson, which was due to end in June.—(Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey)

A. MOROCCO - ITALY. — Agreement on Italian Oil Concession. - Prospecting in Tarfaya Area.

An agreement granting a concession for prospecting and developing oil in the Tarfaya region of southern Morocco was signed in Rabat on July 25 by the Moroccan Government and Signor Enrico Mattei, president of ENI (the Italian State oil concern). The agreement was based on new Moroccan oil legislation announced on the same day, and contained the following provisions:

(1) A mixed Italo-Moroccan company would be formed to hold exclusive oil rights over an area of 30,000 square miles. The capital of this company would be provided in equal shares by ENI and the Moroccan Government.

(2) *AGIP Mineraria* (a subsidiary of ENI) would invest at least U.S.$1,000,000 annually for four years in oil exploration, without any contributions from the mixed company.

(3) When the oil production stage had been reached, profits would be divided on the basis of 50 per cent for the Moroccan Government and the other 50 per cent for distribution to the shareholders—thus giving Morocco an additional 25 per cent and bringing total Moroccan receipts to 75 per cent, as against 25 per cent for ENI.

It was stated that ENI and the Moroccan Government would also sign another agreement providing for the formation of a mixed Italo-Moroccan company to build and operate an oil refinery with an annual capacity of 1,000,000 tons of crude oil.

Tarfaya had only recently been transferred by Spain to Moroccan sovereignty (see 16223 A). According to experts' reports, the area covered by the concession shows "the same characteristics as the oil-bearing area at Hassi-Messaoud" in the Sahara—(Giornale d'Italia, Rome - Le Monde, Paris)

B. UNITED KINGDOM. — Duke of Edinburgh's Youth Award Scheme extended to Girls.

The extension of the Duke of Edinburgh's Youth Award Scheme to girls was announced on June 19 by Brigadier Sir John Hunt, secretary of the scheme.

Sir John Hunt explained that girls between 14 and 20 could enter for the award in three separate stages—preliminary, intermediate, and final. The syllabuses would be in four sections: (*a*) design for living, including grooming, poise, and running a home; (*b*) getting new interests; (*c*) adventure; (*d*) giving service. For the final award each girl would have to spend a week at a residential centre, complete a course in everyday nursing, and undertake some practical service to the community. Each successful girl would receive an attractive piece of costume jewellery embodying the Duke of Edinburgh's personal cipher.

About 1,000 awards have been made to date under the boys' scheme.—(Times) **(Prev. rep. 15411 A.)**

A. BAGHDAD PACT. — Istanbul Meeting of Heads of State of Turkey, Persia, and Pakistan. - London Meeting of Ministerial Council. - U.S. Undertaking to co-operate in Defence of Baghdad Pact Members against Direct or Indirect Aggression.

A meeting of the Heads of State of the Moslem members of the Baghdad Pact (i e. Turkey, Iraq, Persia and Pakistan) was scheduled to begin in Istanbul on July 14, the day on which the Iraqi revolution broke out. King Faisal II, who was to have attended the meeting, was killed in the early hours of that date (see 16305 A), and his Prime Minister (General Nuri es-Said) was killed on the following day. The Heads of State of Turkey, Persia, and Pakistan had assembled at the airport to welcome King Faisal and General Nuri, unaware at the time that the King had been killed and that a revolution was in progress in Iraq.

Despite the developments in Iraq, President Bayar of Turkey, the Shah of Persia, and President Iskander Mirza of Pakistan decided to continue with the meeting of Heads of State. They accordingly had a four-day conference (July 14-17) at the conclusion of which the following communiqué was issued :

" The Heads of State discussed the situation prevailing in the Middle East, with particular reference to the events in Lebanon and Iraq. They viewed with the greatest concern the latest manifestation of inspired subversion in an allied country, resulting in the brutal assassination of leading personalities whose valuable contribution to the deliberations of the allied members will always be remembered with gratitude.

" The Heads of State place on record their sense of profound grief at the loss of loyal and respected friends, and extend their heartfelt sympathies and condolences to the bereaved families and to the country at large. The Heads of State deplore wholeheartedly this relapse into barbarism, and are determined to support in every way possible such measures as should be taken to arrest international gangsterism in the region. In this connexion, they welcome the initiative taken by the United States to uphold the integrity and independence of free and peace-loving countries and, in particular, the practical support given to the lawfully constituted Government of Lebanon. The Heads of State look forward with confidence to the extension of this initiative in countries similarly threatened.

" The Heads of State believe that recent events in the Middle East emphasize more than ever the need for collective security arrangements of the most practical type, and propose to strengthen such collaboration between themselves They trust that they will receive the full co-operation of countries which are also concerned with the peace, security, and stability of the Middle East."

President Bayar, the Shah of Persia, and President Mirza also sent a message to President Eisenhower expressing " deep satisfaction and relief " at his " bold and appropriate decision " to send U.S. forces to Lebanon. The message said that this action would strengthen the faith of the free world in American leadership and would not only ensure the protection of Lebanon but strengthen the position of Persia, Pakistan and Turkey.

London Meeting of Ministerial Council.

The Ministerial Council of the Baghdad Pact (excluding Iraq) met in London on July 28-29, the delegations being led by the respective Prime Ministers—Mr. Harold Macmillan (Great Britain), Dr. Eghbal (Persia), Mr. Firoz Khan Noon (Pakistan), and Mr. Adnan Menderes (Turkey). An American delegation also participated in the talks, led by Mr. Dulles, the Secretary of State.

A joint declaration was issued on July 28 and a communiqué at the conclusion of the meeting on July 29, the most important feature being an undertaking on the part of the U.S.A. to co-operate in the defence and security of the other members of the Pact, excluding Iraq. The texts of these statements were as follows :

Joint Declaration.

" (1) The members of the Baghdad Pact attending the Ministerial meeting in London have re-examined their position in the light of recent events and conclude that the need which called the Pact into being is greater than ever. These members declare their determination to maintain their collective security and to resist aggression, direct or indirect.

" (2) Under the Pact collective security arrangements have been instituted. Joint military planning has been advanced and area economic projects have been promoted. Relationships are being established with other free-world nations associated for collective security.

" (3) The question of whether substantive alterations should be made in the Pact and its organization, or whether the Pact will be continued in its present form, is under consideration by the Governments concerned. However, the nations represented at the meeting in London reaffirmed their determination to strengthen further their united defence posture in the area.

" (4) Article 1 of the Pact of Mutual Co-operation signed at Baghdad on Feb. 24, 1955, provides that the parties will co-operate for their security and defence and that such measures as they agree to take to give effect to this co-operation may form the subject of special agreements. Similarly, the United States, in the interests of world peace, and pursuant to existing Congressional authorization, agrees to co-operate with the nations making this declaration for their security and defence, and will promptly enter into agreements designed to give effect to this co-operation."

Communiqué.

" The Baghdad Pact Council met, as previously scheduled, in London on July 28 and 29 . . . A significant declaration was signed on July 28. The member-Governments represented welcomed the new initiative of the United States as set out in Paragraph 4 of that declaration, whereby the United States agreed to co-operate with the other nations making the declaration for their security and defence.

" The Ministers exchanged views on the world situation, with particular reference to the Middle East. They expressed their concern at the recent examples of aggression by indirect means. This represents a spreading and dangerous threat to the independence and territorial integrity of sovereign States and should be combated by all possible legitimate means, including action by the United Nations.

" In this connexion the Ministers appreciated the recent prompt action, taken in accordance with the principles of international law and in conformity with the U.N. Charter, by the United Kingdom and the United States in responding to the call for help of the lawful Governments of Jordan and Lebanon.

" The Ministers agreed to maintain the close contact existing between their Governments in order to achieve the aims and purposes of their association for mutual co-operation, and to strengthen their ability to resist direct or indirect aggression."

The Diplomatic Correspondent of *The Times* commented as follows on the American decision to co-operate with the Baghdad Pact members in ensuring their defence and security against direct or indirect aggression :

" This declaration means that the United States, which has never been a full member of the Baghdad Pact, has undertaken exactly the same obligations to the member countries of the Middle East area, except Iraq, which the full members already have agreed among themselves . . There are two important considerations in the procedure adopted by the United States—that of agreeing to obligations to members of the pact instead of becoming a full member. One is that the special military and economic agreements which are to be made can be made immediately, under the joint resolution on the Middle East passed by both Houses of Congress in March, 1957 [i.e. the " Eisenhower doctrine "] . . . If the United States had, instead, decided to join the pact as a full member, this would have entailed a new treaty, which would have required ratification by a two-thirds majority of the Senate. This procedure could not have been completed before 1959. The second point is that the United States is not committed to make such special agreements with Iraq, since Iraq has not signed the present declaration."

It was understood that the Ministerial Council had also discussed their attitude to the new regime in Iraq as indicated in the third paragraph of the joint declaration stating that the organization of the Baghdad Pact was " under consideration by the Governments concerned." No definite statement of the Iraqi Republic's attitude to the Pact has so far been issued in Baghdad.—(Times - Pakistan High Commissioner's Office, London - Turkish Embassy Press Department, London - New York Times) **(Prev. rep. Middle East Crisis, 16333 A ; 16317 A ; 16307 A ; Baghdad Pact, 16023 A.)**

B. ALBANIA - GREECE. — Joint Mine Clearance Operation in Corfu Straits.

Under an agreement between Albania and Greece, concluded on Feb. 8, minesweepers of both countries co-operated in sweeping the straits between Corfu and the Albanian mainland to clear them of mines laid during and after the war. After several months' activities, during which Greek vessels swept the Greek side of the straits and Albanian vessels the Albanian side, it was announced in mid-July that the operation had been completed but that no mines had been discovered.

A Greco-Albanian declaration was signed at Santi Qaranta on July 30 testifying that navigation through the Corfu Straits was now safe by all international standards. It was stated that the straits would be open to navigation early in August, for the first time since 1946.

(Hellenic News Agency, Athens - Le Monde, Paris)

Note. In 1946 two British destroyers struck Albanian-laid mines in the Corfu Straits and were seriously damaged, with heavy loss of life (see 8240 A). The case was subsequently brought by Britain before the International Court of Justice in The Hague, which awarded the U.K. compensation against Albania (see 9939 A ; 10246 C). The Albanian Government refused, however, to make any payment (see 11294 B).

AUGUST 16—23, 1958

A. MIDDLE EAST CRISIS. — Correspondence between M. Khrushchev and President Eisenhower, Mr. Macmillan, General de Gaulle, and Mr. Nehru. - Abandonment of proposed "Summit" Meeting at Security Council. - Emergency Session of General Assembly on Middle East Situation.

The outbreak of the crisis in the Middle East led to a voluminous exchange of correspondence between M. Khrushchev on the one hand and President Eisenhower, Mr. Macmillan, and General de Gaulle on the other, in addition to an exchange of letters between the Soviet Prime Minister and Mr. Nehru. This correspondence, initiated by M. Khrushchev on July 19, went on until Aug. 10 and involved the exchange of some 25 letters, many of them running into thousands of words.

The principal stages of the correspondence were : (1) An initial proposal by M. Khrushchev for a meeting between himself, President Eisenhower, Mr. Macmillan, General de Gaulle and Mr. Nehru, to open at Geneva on July 22 with the participation of Dr. Hammarskjöld, the U.N. Secretary-General. (2) A subsequent proposal by Mr. Macmillan—accepted by M. Khrushchev, and supported by President Eisenhower—that the Heads of Government should participate at a special meeting of the Security Council on Middle East problems, to be held at U.N. headquarters. (3) M. Khrushchev's retraction of his previous agreement to a "summit" conference within the Security Council, and his proposal that Middle East problems should be debated instead at a special emergency session of the General Assembly.

Summaries of the correspondence exchanged between July 19 and Aug. 10 are given below under cross-headings :

July 19. - M. Khrushchev's Letters to President Eisenhower, Mr. Macmillan, General de Gaulle, and Mr. Nehru. - Proposal for Summit Conference at Geneva.

In letters sent on this date to President Eisenhower and the Prime Ministers of Great Britain, France, and India, M. Khrushchev urged that a summit meeting should open at Geneva on July 22 (i.e. within three days) "to take urgent measures to end the military conflict which has begun in the Middle East."

Letter to President Eisenhower.

M. Khrushchev's letter to the U.S. President began with the assertion that American and British "armed intervention" in Lebanon and Jordan had brought the world "to the brink of catastrophe" and could involve "extremely dangerous and unpredictable consequences and set off a chain reaction which it would be impossible to halt." He continued : "We are addressing you not from positions of intimidation but from positions of reason . . . We know that the U.S.A. has atom and hydrogen bombs, and we know that you have an Air Force and Navy. You are, however, well aware that the Soviet Union also possesses atom and hydrogen bombs and an Air Force and Navy, plus ballistic missiles of all types, including inter-continental ones. However, we believe that at this momentous hour it would be more reasonable not to bring the heated atmosphere to flash-point—it is sufficiently inflammable as it is. The statesmen must seek for solutions not by means of fomenting war hysteria, but in a calm and reasonable manner, so as to rule out war and ensure world peace . . .

"You explain the armed intervention in Lebanon by President Chamoun's request for help in combating aggression. But an internal struggle is going on in Lebanon, and the events in that country prior to the landing of American troops could in no way be classed as direct or indirect aggression by other States, a fact that is confirmed by the U.N. observers and the U.N. Secretary-General . . . Consequently, the 'invitation' sent by Chamoun has no constitutional validity. The same situation prevails in Jordan, where British troops have been sent, not to uphold the interests of the people and the country, but to save the monarchy . . . The military intervention of the U.S.A. and Britain in Lebanon and Jordan has been undertaken at the request of irresponsible rulers who do not enjoy the support of their peoples and are acting against their wishes . . ."

After calling for the immediate withdrawal of all "occupation forces" from the Middle East so as to give the peoples of that area "an opportunity to decide their destiny for themselves," M. Khrushchev continued : "In this grim moment of history . . . the Soviet Union . . . cannot remain indifferent to what is happening in the Middle East, near to its frontiers. It cannot keep aloof at a time when the question of war or peace is being decided. That is why the Soviet Government proposes an immediate conference of the Heads of Government of the U.S.S.R., the U.S.A., Great Britain, France, and India, with the participation of the U.N. Secretary-General, in order to take urgent measures to end the military conflict that has begun . . . History has left us a small margin in which to avert war, to prevent the annihilation of many millions of people and the destruction of great material and cultural values . . .

"The Soviet Union believes that a solution can and must be found which would meet the vital interests of the peoples of the Middle East and ensure their sovereign rights, with due regard for the interests of all States associated with the countries of that area. The Western Powers say that they are interested in using the oil and other raw material resources of that part of the world. But the peoples of that area are not denying the Western Powers this opportunity. They demand only one thing : that this problem be solved on an equitable and mutually beneficial commercial basis—which is the most reasonable basis.

"The Soviet Government believes that a conference of the Heads of Government of the U.S.S.R., the U.S.A., Britain, France, and India could also consider the question of ending deliveries of arms to the Middle East, as was earlier proposed by the U.S.S.R. We consider it necessary that this summit conference should work out definite recommendations to end the military conflict in the Middle East and submit them to the Security Council, so that this U.N. body may study them with the participation of representatives from the Arab States."

Finally, M. Khrushchev proposed that the five Heads of Government should meet at Geneva on July 22 so as "not to waste any precious time, as the guns are already beginning to speak." Should Geneva or some other neutral centre be unacceptable to the Western Powers, the U.S.S.R. was prepared "to agree to any place, including Washington," for a summit meeting." In conclusion," said M. Khrushchev, "I wish to lay special emphasis on the fact that the question of whether the conflict in the Middle East is settled through war or by peaceful means depends on your Government and on you personally, Mr. President."

Letter to Mr. Macmillan.

M. Khrushchev's letter to Mr. Macmillan was virtually identical with that sent to President Eisenhower, and for the greater part was phrased in the same terms. Containing the same allegations of Anglo-American "armed intervention," it stated *inter alia* that Jordan was threatened neither with direct nor indirect aggression and that "the military invasion of Jordan by Britain has been launched at the request of an irresponsible monarch who does not enjoy the support of the people." M. Khrushchev added in this connexion : "You should be well aware that it is not yet two years since . . . British troops were turned out of Jordan by the same reigning king. Now he is asking for British troops to be moved in again . . ."

Addressing Mr. Macmillan as "a man with vast knowledge of life and experience of statesmanship," M. Khrushchev said in the course of his letter : "I think, Mr. Prime Minister, that the bitter experience which Britain had as a result of her unprovoked attack on Egypt has left a mark on the heart of every Briton deep enough to make it clear what grave consequences Britain's participation in the new military adventure can entail for the people of Britain . . ." As in his letter to President Eisenhower, M. Khrushchev urged a meeting of the five Heads of Government in Geneva on July 22, "as the guns are already beginning to fire."

Letter to General de Gaulle.

In his letter to General de Gaulle, whom M. Khrushchev addressed as "a man with a wealth of military experience," the Soviet Prime Minister said that "American and British warships, planes and tanks have already invaded Lebanon and Jordan," and that "the danger of intervention is looming large over Iraq and all the States of the Arab East." After declaring that the "organizers of intervention" were "trying to lull world opinion" by "alleging that they plan to restrict their actions to Jordan and Lebanon," M. Khrushchev continued : "When attacking Poland, Hitler also alleged that he intended to limit himself to military operations of a local nature. He first made short work of Poland, then of Denmark, Norway, Holland, and Belgium, and then of France, after which he attacked the Soviet Union and the war turned into a world conflict . . ."

The rest of M. Khrushchev's letter was a recapitulation of the allegations and arguments in his letters to President Eisenhower and Mr. Macmillan. It contained, however, two direct references to France. Firstly, M. Khrushchev expressed his "surprise" at what he described as "the haste with which the official representatives of France have expressed solidarity with the aggressors and even tried to stage a military demonstration off the shores of Lebanon." [An apparent reference to the brief visit paid by a French naval squadron to Beirut on July 18—see page 16337, second column.] Secondly, he expressed the opinion that "France's sad and unpleasant experience in Algeria and during the unprovoked British, French, and Israeli attack on Egypt has left a sufficiently deep imprint in the heart of every Frenchman to make him understand what grave consequences may arise for the French people from participation in this new military adventure."

Letter to Mr. Nehru.

The Soviet Prime Minister's letter to Mr. Nehru said that "American aggression in Lebanon and British aggression in Jordan have . . . brought us to a brink where any imprudent step may touch off the greatest catastrophe the world has ever seen." After describing the Anglo-American action as "a continuation of the old colonialist policy to which your country fell victim at one time," M. Khrushchev added :

"We in the Soviet Union know that India's voice is heeded, not only in Asia, but throughout the rest of the world as well . . . We do not doubt that India will say her weighty word in defence of the cause for which her courageous people have always fought tirelessly. By supporting the proposal for an immediate [summit] conference, and by her own active participation in it, India would be making an inestimable contribution to the cause of preserving peace."

July 20-22. - Replies to M. Khrushchev. - Mr. Macmillan's Proposal for Summit Meeting at Security Council.

Mr. Nehru replied to M. Khrushchev on July 20, whilst President Eisenhower, Mr. Macmillan, and General de Gaulle replied on July 22.

Mr. Nehru to M. Khrushchev.

Mr. Nehru said that he was "grateful" for M. Khrushchev's letter, and recognized the "urgency and vital importance" of its contents. He continued:

"I entirely agree with you that we are living through one of the most serious crises in the history of mankind [and that] . . . reason and even self-interest drive us to the conclusion that the maintenance of peace is essential for all of us, and that war must be avoided. This means that the approach to this and similar questions must not be through military strength and pressures, but by calm negotiation and the firm determination that peace must be maintained.

"You are aware of our firm conviction that armed intervention by a foreign Power in any country is most undesirable, and that foreign troops should be withdrawn from the countries concerned . . . Therefore we have urged the United States and Great Britain to withdraw their forces from Lebanon and Jordan.

"We would welcome a peaceful approach by negotiation through the U.N. or its Security Council, or otherwise, with a view to helping the U.N. to take steps to end the conflict in the Middle Eastern region. We are always prepared to offer our services for this purpose . . . I am grateful to you for your kind invitation to India to join in the conference of Heads of Government suggested by you . . . We shall gladly offer our services in the cause of peace if they are needed . . ."

President Eisenhower to M. Khrushchev.

The U.S. President replied to M. Khrushchev's letter of July 19 as follows:

". . . The manner in which you have chosen to express yourself is hardly calculated to promote the atmosphere of calm reasonableness which, you correctly say, should replace the present overheated atmosphere. I am not aware of any factual basis for your extravagantly expressed fear of the danger of general war.

"What has happened in regard to Lebanon is this: On July 14 the lawful Government of Iraq was violently overthrown. On the same day a comparable plot against the Kingdom of Jordan was discovered and barely thwarted. The Government of Lebanon, which had already for some months been subjected to indirect aggression from without, appealed to the U.S.A. for instant assistance.

"In the light of the developments in neighbouring Iraq and Jordan, it felt that nothing less than immediate help would make it possible to preserve the independence and integrity of Lebanon. The U.S.A. responded to this appeal . . . Surely it is not 'aggression' thus to help a small nation to maintain its independence.

"You speak of 'armed conflict' in the Middle East. There has been the bloody coup in Iraq, the plot to assassinate those who compose the Government of Jordan, and the civil strife in Lebanon fomented from without. Otherwise, I know of no 'armed conflict.' Unless those of aggressive disposition are far gone in folly, they would not start war because Lebanon, with a population of 1,500,000, is helped to maintain its integrity and independence. The real danger of war would come if one small nation after another were to be engulfed by expansionist and aggressive forces supported by the Soviet Union.

"We do not want to see a repetition of the progressive destruction of the independence of small nations which occurred during the 1930's and which led to the Second World War. To be acquiescent in aggression, be it direct or indirect, is not the road to peace. This does not mean that the United States is dedicated to a perpetuation of the *status quo* in the Arab world. The U.S.A. recognizes and sympathizes with the yearning of the Arab peoples for a greater nationalistic unity. For example, the U.S.A. promptly recognized the United Arab Republic as soon as it was apparent that the change was accepted by the peoples concerned . . .

"But it is one thing to change the international *status quo* by orderly and peaceful processes, and another thing to change it by indirect aggression. Such processes cannot be reconciled with a peaceful world or with the ideals of the United Nations, which recognizes the equal rights of nations, large and small, and the dignity and worth of the human person . . .

"The action of the United States in relation to Lebanon was fully in accord with the accepted principles of international law and with the U.N. Charter . . . When last week the Soviet Union introduced in the U.N. Security Council a resolution condemning our action in Lebanon, that resolution received only one vote—that of the Soviet Union itself [see 16317 A]. Efforts were made within the Security Council to provide Lebanon with increased protection from the United Nations so as to preserve its integrity and independence, thus permitting U.S. forces promptly to be withdrawn. There were two such proposals [i.e. the U.S. and Japanese resolutions], each defeated by the one vetoing vote of the Soviet Union.

"How does the Soviet Union reconcile its allegation that U.S. forces in Lebanon endanger world peace with the veto of these two proposals? Am I to conclude that the Soviet Union seeks, by imputing to others 'war motives' and itself boasting of its nuclear and ballistic-missile power, to divert attention from the steady erosion of the independence of small nations? Are we, as civilized peoples, to accept the increasing use of violence, murder, and terrorism as instruments of international policy? If so, this constitutes the real danger to peace. The U.S.A. will steadfastly oppose that danger and seek to strengthen the established processes of international law and order . . ."

After referring to the Soviet Union's "constant abuse of its veto power in the Security Council," and pointing out that its latest veto on the Lebanese question was the 85th to date, President Eisenhower commented as follows on M. Khrushchev's proposal for a five-Power summit meeting on the Middle East:

"Your proposal seems calculated to derogate from the authority and prestige of the United Nations. What you propose amounts in effect to five nations, without sanction of the U.N. and without conformity with its Charter, reaching what you call 'recommendations' regarding the Middle East, which would then be submitted to the Security Council. But in reality such so-called 'recommendations' would be decisions, and the process would in effect make the U.N. into a 'rubber stamp' for a few great Powers.

"Furthermore, when procedures are sought to be improvised to meet what is alleged to be a situation of great urgency, this can scarcely be expected to save time. It raises a whole series of new problems which must be considered by the various nations that might consult together, and by others which might feel that they were improperly omitted and which are deeply concerned with the Middle East.

"If, indeed, the Soviet Union seriously believes that there is an imminent threat to world peace, it is bound by the U.N. Charter to take the matter to the Security Council. By Article 24 of the Charter, the Soviet Union, with other members of the U.N., has conferred on the Security Council 'primary responsibility for the maintenance of international peace and security,' and all the members have agreed that, in these matters, it 'acts on their behalf.' It is also agreed that the Council has the responsibility to 'determine the existence of any threat to peace' and to 'decide what measures shall be taken . . . to maintain or restore international peace and security.'

"The Security Council is already dealing with certain phases of the problem alluded to by you. If you or we believe that other aspects of this problem or other problems should be urgently dealt with in the interest of peace, then it lies open to any of us to enlarge the scope of the Security Council's consideration.

"Furthermore, under the Charter, members of Governments, including Heads of Government and Foreign Ministers, may represent a member-nation at the Security Council. If such a meeting were generally desired, the United States would join in following that orderly procedure.

"I do not, of course, exclude the discussion, outside the U.N., of world or regional problems not posing alleged imminent threats to peace. I cannot but deplore the persistent refusal of your Government for so many months to agree to the adequate preparation of a 'summit' meeting at which we could exchange considered views on the great problems which confront the world . . ."

Mr. Macmillan to M. Khrushchev.

Before giving a detailed reply to the Soviet Prime Minister's letter, Mr. Macmillan sent an interim reply (dated July 20) worded as follows:

"Your message contained many allegations and statements which I cannot accept. Nevertheless, as I have frequently stated before, I am anxious to find a suitable means of trying to resolve, through a meeting of Heads of Government, the grave problems which confront us. H.M. Government are urgently considering, in consultation with our allies, the best means by which to arrange for a meeting which Heads of Government could attend. I shall send you a further communication as soon as these consultations have been concluded."

In what he described as a "considered reply" to M. Khrushchev's letter, Mr. Macmillan proposed on July 22 that the "summit" conference of the U.S.A., the U.S.S.R., Great Britain, France, and India should be held at a special meeting of the Security Council in New York. Mr. Macmillan wrote:

"As I explained in my interim reply, this is a matter which H.M. Government have considered in consultation with our allies. I shall come quickly to the point of your letter. First, however, I wish to make it plain that I do not share your judgment that the world is on the verge of a military catastrophe. I say this in full and certain knowledge of the pacific intentions of the Western Powers, and in the belief that the Soviet Government would not themselves take a step which would lead to world war.

"I also wish to forestall any misunderstanding by saying at once that I cannot accept in particular your description of the action which we have taken in sending troops to Jordan, of our motives, or of the situation in Jordan itself. As has been made abundantly clear, the sole reason for our action in Jordan was to protect a small and independent country which had appealed for help against the threat of aggression and subversion stimulated from without.

"However, although I reject your premises, it by no means follows that I reject your conclusion. Indeed, I agree with you that it would be useful if Heads of Government could find an early opportunity to meet and discuss the Middle East. I should certainly be glad to explain to you face to face how H.M. Government view the problems which beset the area.

"I was glad to see that in your message you referred, with marked disapproval, to the idea of 'circumventing the United Nations' As you know, the Security Council already has under consideration certain questions concerning the Middle East. I hope you will agree that the proceedings in the Security Council should not be circumvented, but that the discussions for which you have asked should take place in that forum, thus providing continuity.

"Article 28 of the U.N. Charter enables the Security Council to hold meetings at which each of its members may, if it so desires, be represented by a member of the Government or by some other specially designated representative. I would certainly be ready to go to New York for such a meeting if you would also go, and I take it from the terms of your message that you would.

"It would not be the intention of H.M. Government that any resolutions should be put forward at this special meeting of the Security Council unless they arose out of previous agreement. In other words, the object would be to reach fruitful agreements rather than to register differences by votes. I hope that this spirit will prevail.

"You had hoped that we might meet in Geneva today. I hope that we may meet soon in New York in accordance with the plan I have suggested."

General de Gaulle to M. Khrushchev.

In his reply to the Soviet Prime Minister, General de Gaulle expressed his willingness to take part in a "summit" conference on the Middle East "as soon as this contact could be organized in reason and calm, as you yourself write."

After pointing out that the problem of the Middle East was already before the United Nations, General de Gaulle wrote: "I think that the best [procedure] at the moment is to let the U.N. continue its debates. If these do not produce any result, the project of a conference at the summit should, in my opinion, be then pursued. In that case the French Government would be ready to discuss immediately the composition, date, and place that would be most appropriate for the meeting envisaged."

General de Gaulle prefaced this statement by observing that certain of the terms and arguments in M. Khrushchev's letter seemed unlikely to contribute to the success of a meeting of Heads of Government. In this connexion he rejected M. Khrushchev's comparison of British and U.S. actions in the Middle East with Hitler's actions in 1939-40 (observing, in a parenthetic allusion to Soviet participation in the partition of Poland, that "Hitler, alas, was not alone"); he also emphasized that Algeria was a purely French problem. In an implicit retort to M. Khrushchev's reference to the "deep imprint on the heart of every Frenchmen" caused by the Suez crisis, General de Gaulle said: "I will abstain from insisting reciprocally on the traces that certain enterprises have left on the soul of the Russian people."

Consultations between Western Powers. - Mr. Selwyn Lloyd's Visit to Washington.

As stated in Mr. Macmillan's letter, consultations were held between the three Western Governments in connexion with the replies to be sent to M. Khrushchev. It was understood—though not officially stated—that there were certain divergencies of view on this matter, notably between Britain and the United States. After 24 hours of intensive consultations, however, it was announced at the White House on July 22 that the U.S. Government were willing to accept Mr. Macmillan's proposal for a "summit" meeting at the Security Council "if such a meeting were generally desired" the phrase used in President Eisenhower's reply to M. Khrushchev.

In a statement on the previous day (July 21) the French Government had declared itself "favourably disposed in principle" to the Soviet Government's proposal for a summit conference on the Middle East. The Minister of Information (M. Soustelle) commented, however, that while the replies of the Western Powers would express similar views and affirm Western solidarity, "it is possible that within this solidarity there are shades of opinion on the part of the different members."

At the invitation of Mr. Dulles, the British Foreign Secretary (Mr. Selwyn Lloyd) had previously flown to Washington on July 16 for consultations on the Middle East situation. After a series of lengthy meetings at the White House and the State Department (July 17-18) a joint statement was issued saying (*a*) that there had been "a general review of the situation in the Middle East, particularly in reference to Lebanon and Jordan"; (*b*) that President Eisenhower, Mr. Selwyn Lloyd, and Mr. Dulles had discussed "the joint efforts of the United States and the United Kingdom to assure the independence and integrity of these two small countries by giving the assistance requested by their lawful Governments"; and (*c*) that there had been "a close identity of views." Mr. Selwyn Lloyd returned to London on July 20.

July 23. - M. Khrushchev's Acceptance of Summit Meeting at Security Council. - Further Letters to Western Leaders and Mr. Nehru.

M. Khrushchev sent a further letter to Mr. Macmillan on July 23 welcoming the British Prime Minister's suggestion for a "summit" conference at the Security Council, and proposing that this meeting should begin in New York on July 28. Identically-worded letters were also sent to President Eisenhower and General de Gaulle noting that they had agreed to the British suggestion for a "summit" meeting at the United Nations. In addition, M. Khrushchev sent a letter to Mr. Nehru noting "with satisfaction" the identity of views between India and the U.S.S.R. on the Middle East question, and expressing the hope that Mr. Nehru would personally attend the proposed "summit" meeting in New York.

In his letter to Mr. Macmillan, the Soviet Prime Minister expressed gratification that the Soviet Government's proposal for a summit meeting on the Middle East "has been favourably received by you." He continued:

"Taking into consideration the need for urgent decisions in the interests of preserving peace, we believe that the form in which the meeting of Heads of Government takes place cannot be of decisive significance in this case. The important thing is that this meeting should be held as soon as possible . . .

"We agree with your considerations with regard to the approach to the discussion of this question at a special session of the Security Council . . . We agree that no resolutions whatsoever should be introduced unless they arise from previous agreement, and that the aim of our joint work should be to achieve fruitful agreement and not to record disagreement by means of a vote. The Soviet Government assumes that the Heads of Government will . . . also have the opportunity for joint consultations which are not only of a formal nature.

"Since what is involved is a discussion in the Security Council, not of ordinary current questions, but of problems of special importance from the point of view of preserving peace and ensuring security, we consider that it would be useful to invite India one of the biggest Asian countries, and universally recognized as a State standing for the preservation of peace to take part in the work of the Security Council. [India is at present not a Council member.] Her participation would really be beneficial, in contrast to the participation of one of the so-called permanent members who does not in fact represent anyone [i.e. Nationalist China] . . .

"Naturally, representatives of the interested Arab States should be invited to take part in the discussion in the Security Council with the participation of the Heads of Government of the five Powers" [i.e. the U.S.A., the U.S.S.R., Great Britain, France and India].

In the course of his letters to President Eisenhower and Mr. Macmillan, the Soviet Prime Minister reiterated the allegations of Anglo-American "aggression" in Lebanon and Jordan, though saying that he had "no wish to enter into polemics about the reasons for the tension and the threat to peace in the Middle East area."

July 25. - Replies by President Eisenhower, Mr. Macmillan and General de Gaulle. - French Proposal for Summit Meeting in Europe.

In his reply to M. Khrushchev (dated July 25) President Eisenhower said that the proposed date for a summit meeting at the Security Council (i.e. July 28) would be "too early for us." He suggested that Dr. Hammarskjöld should discuss with the permanent representatives on the Security Council both a "generally satisfactory" date for such a meeting and the "generally acceptable" conditions under which it should take place. Moreover, the President stressed that a summit meeting at the Security Council should not be "improvised" but should take place under the established U.N. rules of procedure, particularly with regard to "the conditions under which nations which are not members of the Council may participate in the discussions of the Council."

After commenting that M. Khrushchev's letter of July 23 contained "apparent misunderstandings," and requesting the Soviet Prime Minister to read his (President Eisenhower's) letter of July 22 "more carefully," the U.S. President continued:

"I then said that if, in spite of the facts established in the recent meetings of the Security Council, your Government still desires to allege that the situation in Lebanon constitutes an imminent danger to peace in the Middle East, the proper forum for an appropriate discussion is the Security Council. I am glad that you now recognize the responsibility of the U.N. and have withdrawn your original proposal, which would have gravely undermined the prestige and authority of the United Nations.

"My letter pointed out that the U.N. Charter authorizes members of Governments—and that of course includes Heads of Government and Foreign Ministers—to represent a member-nation at the Security Council and that, if such a meeting were generally desired, the U.S.A. would join in following that orderly procedure. It is, of course, not yet certain that such a meeting is in fact 'generally desired,' although that may prove to be the case.

"You now make specific suggestions dealing with the composition of the Security Council and the conditions under which nations other than members of the Council may participate in its discussions. My letter of July 22 urged that one of the advantages of proceedings in the Security Council is that there are established rules on these matters, and it is accordingly not necessary to rely on improvising.

"I pointed out that, when rules of this kind are sought to be improvised, there is raised a whole series of new problems—notably as to the participation and non-participation of various States. The U.S.A. will adhere in these respects to the Charter, which lays down the conditions under which nations which are not members of the Council may participate in the discussions of the Council.

"As to the agenda, we agree that it should be limited to a discussion of the problems of the Middle East, including the causes of those problems. I would, however, be lacking in candour if I did not make it clear that to put peace and security on a more stable basis in the Middle East requires far more than merely a consideration of Lebanon and Jordan. These situations are but isolated manifestations of far broader problems.

"In my opinion the instability of peace and security is in large measure due to the jeopardy in which small nations are placed. It would be the purpose of the U.S.A. to deal with the specific incidents you raise within that broad context. To do otherwise would be to be blind to the teaching of history.

"You will recall that World War II was brought about by a series of acts of direct and indirect aggression against small nations. In March, 1939, the then head of the Soviet Communist Party [i.e. Marshal Stalin] pointed out that the failure of non-aggressive nations, among which he named Britain and France, to check direct or indirect aggression against small countries meant 'giving free rein to war and consequently transforming the war into a world war.' That forecast unhappily proved true . . .

"In conclusion, I suggest that the permanent members of the Security Council should exchange views, under arrangements made by the Secretary-General, to ascertain that a meeting of the kind and under the conditions I suggest is generally acceptable If so, they should also agree upon a date which would be generally satisfactory. The date of July 28 would be too early for us I am authorizing our permanent representative to act in this sense."

Mr. Macmillan's reply to M. Khrushchev was worded as follows :

"I am sorry that in spite of your statement that you do not want to enter into polemics, you should still have felt it necessary to repeat accusations of Western aggression which have no foundation. Nevertheless, I have noted with satisfaction the main point of your letter, which is that you have accepted my view that certain Middle East problems should be discussed at a Security Council meeting in New York under the provisions of Article 28 of the U.N. Charter, which permits Heads of Governments to be present. I repeat that I would certainly be ready to go to New York for such a meeting if you would also go.

"I suggest that the necessary arrangements should be made through the permanent members of the Security Council, and that they should be requested to reach agreement about the date of the Council's first meeting under Article 28 and to decide what other States should be invited to be represented. The work could begin without delay in close consultation with the Secretary-General."

General de Gaulle, in his reply to M. Khrushchev, insisted that other Middle Eastern countries—notably Turkey, Persia, and Israel—should participate in a summit meeting at the Security Council, in addition to "interested Arab States" and India, as proposed by the Soviet Prime Minister. While expressing France's willingness to take part in a special session of the Security Council, he pointed out that such a meeting had no relation to a five-Power "conference at the summit" as originally proposed by M. Khrushchev. He urged, therefore, that preparations be made for a summit meeting of Heads of Government—preferably in Europe—in addition to the contemplated special session of the Security Council. General de Gaulle's letter ran as follows :

"In your letter of July 19 . . . you suggested Geneva as the place for our [summit] meeting. I replied on July 22 . . . that the French Government willingly agreed to examine at once, with the interested States, the composition, date and place [of such a meeting] as soon as the U.N. Security Council had finished its current debate . . . the Council has in fact ended the study of the Lebanon question without arriving at any positive result. I am therefore quite ready to proceed without delay to the preparation of a 'conference at the summit' and to take part therein.

"But your letter of July 22 brings me a proposition quite different from that which you formulated on the 19th. Considering, apparently, that the urgency of the questions relating to the Middle East has diminished, you no longer recommend a 'conference at the summit' but a special session of the U.N. Security Council. The Heads of Government could certainly participate in this session. But, in any case, the representatives of the 11 member-States of the Council, as well as those of India and the interested Arab States, would also be called on to take part.

"In this case, it would in my opinion be indispensable also to invite other States of the Middle East—at least Turkey, Persia, and Israel—who are also directly concerned. Without any doubt, debates started under such conditions would soon make the Council determined to extend the number of participants and the field of discussion even more.

"This 'special' session of the Security Council would not, therefore, have any relation to the 'conference at the summit' that we envisage, and which I have in principle agreed to attend. For my part, I think it preferable that we should keep to our initial project—that is to say, a conference of the Heads of Government of the principal powers interested. It seems to me also that it would be better that this meeting should take place in Europe. I willingly accept Geneva, or in default, any other city on our continent . . ."

After expressing his conviction that a "summit" conference would be held sooner or later, irrespective of the proposed special session of the Security Council, General de Gaulle concluded : "The French Government believes that it must . . . prepare for such a conference with care. With this aim it is discussing the question of the Middle East with other States– notably European ones which are interested in it, and whose points of view will not fail to be considered . . . You will certainly understand the significance of the consultations upon which the French Government are going to embark. For Russia, like France, knows that the destiny of the Middle East directly affects that of the whole of Europe."

As stated by General de Gaulle, the French Government was discussing the Middle East question with other European governments through diplomatic channels ; the Foreign Minister (M. Couve de Murville) had already visited Bonn and Rome in this connexion to obtain the views of the German Federal Government and the Italian Government. It was understood that similar consultations would be held through diplomatic channels with the Benelux countries, Greece, and certain Middle Eastern and North African countries, including Morocco, Tunisia, Turkey, and Israel.

M. Khrushchev's Accusations of "Delaying Tactics" against President Eisenhower and Mr. Macmillan. – Support for French Proposal for European Meeting.

In reply to President Eisenhower's letter of July 25, M. Khrushchev sent another letter to Washington on July 28 in which he accused the U.S. President of delaying a summit conference by "seeking to steer the pre-summit talks into a maze of endless discussion on the form and procedure of this meeting." He also sent a letter to Mr. Macmillan worded in identical terms and containing the same allegations. In both these letters he supported General de Gaulle's proposal for a meeting of Heads of Government in Europe, urging that it should be held at an early date "in Geneva, Vienna, Paris or any other place acceptable to the parties concerned."

In his letter to President Eisenhower, M. Khrushchev said that it was "now clear that the U.S. Government is delaying the calling of a Heads of Government conference and does not want this conference to take urgent steps towards a peaceful solution of the armed conflict that has broken out in the Middle East." After pointing out that the Soviet Government had accepted Mr. Macmillan's proposal for a summit conference within the framework of the Security Council, M. Khrushchev continued :

"Your reply is a step backward from the agreement reached, and naturally cannot fail to cause serious concern among the peoples. The U.S. Government proposes that, instead of a five-Power meeting of Heads of Government . . . the matter should again be referred to a regular session of the Security Council. This proposal is now supported by Mr. Macmillan as well. But what good can this do ? You know very well that the Security Council has been considering the situation in Lebanon and Jordan for a long time but has not arrived at any decision. The question of cutting short the armed aggression in the Middle East is so urgent that the Security Council, as the experience of its latest deliberations has shown, is not in a position to take prompt and effective decisions on this question at its regular sessions. This area . . . is increasingly becoming a powder barrel which can be blown up by the slightest spark and can touch off a world catastrophe.

"In these conditions, it is precisely the Heads of Government of the five Powers—the U.S.S.R., the U.S.A., the United Kingdom, France and India—who should meet, together with the U.N. Secretary-General, with the greatest possible urgency ; and who, vested as they are with extensive powers, could agree on an immediate ending of the armed conflict in the Middle East and on steps to be taken to preserve and consolidate world peace . . . Mr. Macmillan's proposal for holding the Heads of Government conference within the framework of the Security Council meant precisely this kind of meeting. But you and the Prime Minister of the United Kingdom are now going back on this proposal . . ."

After supporting General de Gaulle's proposal for a five-Power summit conference, "which does not differ from the Soviet Government's proposal on this subject," M. Khrushchev continued : "To put off the conference still further, you make reference to an alleged misunderstanding of the wording of the U.S. statement concerning the Heads of Government meeting. One cannot help wondering whether this statement had not been expressly worded in such a way as to give rise to different interpretations and entail a waste of time on correspondence to clarify its meaning. Since in your message of July 22 you announced your agreement to take part in a special meeting of the Security Council with the participation of Heads of Government, we could not fail to take it as your consent to such a meeting to be called as early as possible. Now . . . you recommend that we should re-read your letter of July 22. Can one take your words to mean anything but the U.S. Government's obvious unwillingness to see most urgent steps taken to cut short the armed intervention in Lebanon and Jordan ? "

M. Khrushchev went on to allege that "more and more American troops are being landed in Lebanon, where the State Department's special envoy, Mr. Murphy, has engaged in dubious activity"; that the U.S. Sixth Fleet in the Mediterranean was being reinforced; that "extensive preparations for armed intervention in the affairs of the Arab countries" were in progress in Turkey; and that King Hussein of Jordan was "threatening a march on Iraq." After describing King Hussein as "a pliant tool in the hands of certain Western Powers which are harbouring a conspiracy against the peoples of the Arab East," and saying that "a danger of an armed attack is overshadowing the Republic of Iraq," M. Khrushchev added. "Thus the stalling of the pre-summit talks, coupled with the progressive massing of armed forces in the Middle East, tends to aggravate the situation still further and may well bring mankind to catastrophe. Prompt and vigorous action is needed more than ever before to ensure the immediate withdrawal of foreign forces from Lebanon and Jordan and to prevent an extension of the armed conflict in the Middle East. There is no time to waste."

After accusing President Eisenhower of "seeking to steer the pre-summit talks into a maze of endless discussion on the form and procedure of this meeting," M. Khrushchev said that the London meeting of the Baghdad Pact Ministerial Council (see 16340 A) "looks like a conspiracy against the Arab countries." He added that "the withdrawal of Iraq, its only Arab member, from this Pact is yet another indication of the failure of the Western Powers' 'policy of strength' and of their policy of whipping up aggressive blocs . . ."

M. Khrushchev continued: "The U.S. Government is doing all it can to wreck the possibility of a five-Power Heads of Government meeting for putting an end to the armed intervention in Lebanon and Jordan . . . It is you, above all, who are thereby assuming a grave responsibility before mankind and before history for the consequences that such a policy may entail. A heavy responsibility devolves also on the Prime Minister of the United Kingdom, who, although he is trying to manoeuvre, is in fact pursuing the same policy of preventing any steps from being taken to end the armed conflict in Jordan and Lebanon.

"The Soviet Government . . . still considers that an immediate Heads of Government conference of the U.S.S.R., the U.S.A., the U.K., France and India, with the participation of the U.N. Secretary-General, is necessary. We have taken note of the statement by General de Gaulle that he prefers the meeting to take place in Europe. The Soviet Government . . . supports General de Gaulle's proposal.

"The question of holding a Heads of Government conference in one of the European cities is all the more worthy of consideration since there is a feeling among U.S. diplomats and in the American press that the American authorities will find it difficult to guarantee the safety of the Heads of Government should the conference be held in the United States. We should not like to put the U.S. Government in an embarrassing position in this matter. Therefore, while not objecting to a meeting in New York, the Soviet Government agrees to it being held in Geneva, Vienna, Paris, or any other place acceptable to all the parties concerned. We would likewise welcome an agreement to hold the meeting in Moscow, where the Soviet Government guarantees the complete safety of the delegations . . .

"In your message you avoid answering the question of the participation of the Prime Minister of India at a conference of Heads of Government. I consider it necessary to re-emphasize that India's participation will go far towards helping to achieve constructive solutions in the Middle East.

"As for the date of the conference, our suggestion was July 28. However, since you declare that this is too early for the U.S. Government, we are prepared to accept any other early date . . ."

As stated above, M. Khrushchev's letter to Mr. Macmillan was worded in virtually identical terms, containing the same allegations of Anglo-American "aggression" in Lebanon and Jordan. In its concluding section it urged the Governments of both Britain and the U.S.A. "to revert to the agreement concerning a conference of Heads of Government on the basis of the proposal you made on July 22."

M. Khrushchev's letter to General de Gaulle expressed the Soviet Government's full support for his (the General's) proposal that a five-Power summit conference should be held in Europe; it also reiterated the above-mentioned allegations against the United States and Britain.

July 31. - Anglo-American Proposal for Summit Meeting at Security Council on August 12. - French Proposal for Summit Meeting at Geneva on August 18.

In letters to M. Khrushchev dated July 31, President Eisenhower and Mr. Macmillan proposed that a summit meeting should be held at a special session of the Security Council to open on Aug. 12. President Eisenhower also replied to the allegations of U.S. "stalling" contained in the Soviet Prime Minister's letter of July 28.

President Eisenhower to M. Khrushchev.

"For several centuries," wrote President Eisenhower, "personal correspondence between Heads of Government and Heads of State has been an extremely valuable channel of communication when the normal diplomatic channels seemed unable to carry the full burden. However, it has always been recognized . . . that the essential ingredient in such correspondence . . . was a tone of serious purpose and an absence of invective. It is in this tradition that I reply to your letter of July 28.

"I consider it quite inaccurate for you, both implicitly and explicitly, to convey the impression that the U.S. Government has embarked on a policy of delay based on niggling procedural argument. The fact is that the differences between us are not procedural but basic. Very simply, the two basic points which the U.S.A. has stated many times in the past, and which I repeat now, are: (*a*) Do all of us, the Charter members of the United Nations, agree that the Security Council has the principal responsibility for the maintenance of international peace and security?; (*b*) Shall small nations as well as a few so-called 'Great Powers' have a part in the making of decisions which inevitably involve them?

"As to my first point—what of the United Nations? It was created out of the travail of World War II to establish a world of order and justice. It embodies the hopes of mankind. At this juncture, when you claim peace is endangered, you would push it aside. We would invoke its processes.

"This leads to my second point—what of the smaller Powers? Shall they be ignored or shall they be represented in the making of decisions which inevitably involve them? History has given us ample proof that a nation's capacity to contribute to the advancement of mankind is not to be measured by the number of divisions it can put into the field. You must be aware, as I am, of the many very specific proposals made these last years by the so-called smaller Powers which have been of great value to all of us.

"The assumption in your letter that the decisions of five Great Powers will be happily accepted by all other interested Powers seems to indicate an attitude on your part which could have dangerous consequences in the future for the smaller Powers of this world. Your position—which means that the desires, the dignity, in fact the security of the smaller nations should be disregarded—is one which the U.S.A. has consistently opposed and continues to oppose. Essentially you are proposing that we should join you in a policy reminiscent of the system of political domination you imposed in Eastern Europe. The United States cannot accept that point of view.

"The problem of the Middle East is not one of a threat of aggression by the United States, but rather the threat, by others, of further indirect aggression against independent States. This problem is clearly the responsibility of the Security Council.

"I am therefore instructing the U.S. permanent representative on the Security Council to seek a special meeting of the Council on or about Aug. 12, under Article 28 [of the Charter], which would permit direct discussions among Heads of Governments and Foreign Ministers. I would hope that you would similarly instruct your permanent representative. Such a meeting will make it possible for the Council to discharge its responsibilities in the manner contemplated by the Charter.

"As for the place of the meeting, the U.S.A. agrees that it might be held elsewhere than New York, but we could not agree to the meeting being held in Moscow. The memory of the well-organized mass demonstration and serious damage to the U.S. Embassy in Moscow [see page 16334, first column] is too fresh in the minds of the American people. If such a meeting is arranged I expect to attend and participate, and I hope that you would do likewise."

Mr. Macmillan to M. Khrushchev.

After saying that he did not propose to reply to M. Khrushchev's "many accusations against allied policy in the Middle East," none of which had "any foundation in fact," Mr. Macmillan wrote:

"In my letter of July 22 I proposed a special meeting of the Security Council to be attended by Heads of Governments. On July 26 I elaborated this proposal. I said that I was glad that it was acceptable to you, and I suggested that the necessary arrangements should at once be made through the permanent representatives of members of the Security Council.

"I hope that on reflection you will agree that this is the best course; I am encouraged in this hope by the passage in your last letter where you call for a return to my original proposal. From this proposal I have never departed.

"In addition to meetings of the whole Council under Article 28, it would of course be possible to arrange less formal meetings of Heads of Government on the questions which the Security Council is considering. The procedure would thus be flexible, and should promote the chances of making progress.

"As I said in my message of July 22, it would not be our intention that any resolutions should be put forward at this special meeting of the Security Council, unless they arose out of previous agreement. Of course this meeting would not preclude the holding of the summit meeting for which we have been working for some time.

"I am instructing the U.K. permanent representative at the U.N. to propose to the president of the Security Council a special meeting to take place under Article 28 on Aug. 12. Meanwhile the permanent representatives should discuss arrangements for the special meeting and decide where it will take place.

"If this meeting is agreed, I shall be there on Aug. 12; I hope you will be there too. So far as I am concerned, New York, Geneva, or any other place generally agreeable will do."

As stated by President Eisenhower and Mr. Macmillan, the U.S. and U.K. permanent representatives on the Security Council (Mr. Cabot Lodge and Sir Pierson Dixon) requested the president of the Council for the month (M. Georges-Picot, of France) to convene a special session on the Middle East for

Aug. 12, at which members might be "represented by Heads of Government or other specially designated representatives." Private consultations were also held between the U.N. Secretary-General and members of the Security Council in preparation for such a meeting.

General de Gaulle to M. Khrushchev.

In contrast to the proposal of President Eisenhower and Mr. Macmillan, General de Gaulle proposed in his letter to M. Khrushchev (dated July 31) that the Heads of Government of the U.S.S.R., the U.S.A., Great Britain, France and India should meet in Geneva on Aug. 18. Though raising no objection to the Anglo-American proposal for a summit meeting at the Security Council, General de Gaulle stressed that "because of the composition of the Council, the number of States that would be invited to participate, the nature of its agenda, and the character of its debates, such a meeting should not be confused with a conference of Heads of Government."

August 5. - M. Khrushchev withdraws Support for Summit Meeting at Security Council. - Call for Special Session of U.N. General Assembly.

In further letters to the Western Heads of Government, sent on Aug. 5, M. Khrushchev withdrew his previously expressed support for a summit meeting at the Security Council, and proposed instead that the Middle East situation should be discussed at a special session of the U.N General Assembly. In the course of his letters to President Eisenhower and Mr. Macmillan, the Soviet Prime Minister described the Security Council as "a kind of committee dominated by member-countries of NATO, the Baghdad Pact, and SEATO" He also called for the admission to the U.N. of the Chinese People's Republic, saying that its lawful seat on the Security Council was being held "by a representative of a political corpse—Chiang Kai-shek."

It was widely commented in the Western Press that M Khrushchev's apparent *volte-face* followed closely upon his recent discussions with Mao Tse-tung and other Chinese Communist leaders in Peking (see 16352 A). In particular, his derogatory references to the present composition of the Security Council, and his insistence on the admission of Communist China to the United Nations, were regarded as a direct result of his discussions in Peking.

M. Khrushchev to President Eisenhower.

The Soviet Prime Minister's letter to President Eisenhower was worded as follows:

"I fully agree with your remarks about the significance of personal correspondence between Heads of Government. In the present conditions personal correspondence must serve the basic aim of safeguarding peace and peaceful co-existence among States, regardless of their social systems. I also agree with you that an unusual correspondence is now taking place between us. This unusual correspondence has been a result of the unusual steps taken by the United States and Britain in the Middle East . . .

"You correctly point out that the United Nations was created out of the travail of World War II. It is common knowledge that mankind has linked its hopes for the preservation of peace with the work of the U N. and its Security Council . . . The Soviet Government, at the very beginning of the American and British aggression against the Arab States, submitted in the Security Council a proposal that the interventionist troops be withdrawn from Lebanon and Jordan and that an emergency session of the General Assembly be called on this question. However, the U S.A., Britain, and certain other States now on the Security Council prevented it from taking a decision normalizing the situation in the Middle East. It is precisely the policy that is being pursued by the United States, supported by Britain and, unfortunately, by certain other States, that deprives the Security Council of the possibility of carrying out its functions . . .

"If we glance at the composition of the Security Council as it now stands, we are bound to draw the conclusion that . . . this body has become a kind of committee dominated by member-countries of NATO, the Baghdad Pact, and SEATO, a committee in which the lawful seat of the great Chinese People's Republic is held by a representative of a political corpse—Chiang Kai-shek.

"The policy of ignoring People's China is sheer madness. This great Power exists and is growing stronger, regardless of whether or not it is recognized by certain Governments . . . Without the Chinese People's Republic, the Security Council and the U.N. cannot be completely effective bodies in safeguarding peace and ensuring security . . . A situation has thus arisen in which the Security Council has in fact been paralysed and is unable to take, against the will of the United States, any decision which would effectively promote the safeguarding of world peace . .

"You assert that the Middle East problem is not a problem of U.S. aggression but rather a problem of indirect aggression. In speaking of indirect aggression, you obviously regard—as we and the majority of other countries do—the despatch of foreign troops to the territories of other countries as being an act of direct aggression. There can be no objection to this. That is why the landing of U.S. troops in Lebanon and the despatch of British troops to Jordan is rightly regarded throughout the world as direct aggression. As for the hints in your message regarding some kind of indirect aggression, reference to this alleged danger cannot be regarded as other than an attempt to cover up the direct aggression committed by the United States. Incidentally, assertions about the indirect aggression allegedly threatening Lebanon have been refuted by the reports of the U.N. observers sent by the Security Council to Lebanon . . .

"The whole world knows that the internal events in Lebanon, Iraq, and Jordan are an expression of the anger of their peoples, who rose up against the system imposed upon them by the imperialist colonialists. People who could no longer endure the oppression and outrages of the lackeys of foreign States rebelled in Iraq. Now the U.S.A. and other Western Powers have recognized the Republican Government of Iraq. Consequently you and your allies have recognized that the people of Iraq had the right to change their former way of life. Your assertions about indirect aggression are thus absolutely without foundation . . .

"We regret that you do not agree to a summit conference in Moscow, ostensibly because there has been an angry demonstration by Muscovites outside the U.S. Embassy in protest against American armed intervention in Lebanon. That demonstration was an entirely natural manifestation of the Soviet people's sympathy for a victim of aggression. Your reference to this circumstance is even more unconvincing, because the U.S. Government itself still refuses to take measures to ensure normal conditions for the work of the Soviet representation at the United Nations, and has not put a stop to the provocative actions of certain elements in New York against the U.S.S.R. representation. [This was a reference to anti-Soviet demonstrations in New York by Hungarian refugees following the execution of Imre Nagy and General Pal Maleter; the protest demonstrations took place outside the offices of the Soviet representation at the U.N.].

"I return to the main subject of our correspondence the question of how to take speedy and effective steps to end the military intervention of the U.S.A. and Britain in the Middle East. You believe that this question should be entrusted to the Security Council. Unfortunately, as I have pointed out above, the situation in which the Security Council is now placed a situation in which it is practically subjected to U.S. foreign policy, and in which the majority of the countries sitting on it are unable to do anything that is in contradiction with the U.S. attitude does not allow us to regard your proposal as correct . . . The United States is striving to reduce the Security Council to the status of an auxiliary organ of the State Department . . ."

After alleging that the Security Council, as at present composed, was "unable to draw unbiassed conclusions on the situation in the Middle East," M. Khrushchev expressed his regret that President Eisenhower and Mr. Macmillan had not accepted the Soviet proposal for a five-Power summit conference with the participation of the U.N. Secretary-General. He continued:

"Although the U.S.A. and Britain have made the five-Power meeting impossible, it can be pointed out quite definitely that the demands of the peoples for such a meeting to end the armed intervention in Lebanon and Jordan, and the determination of the peace-loving States to put an end to aggression in the Middle East, have compelled the initiators of this armed intervention to refrain from extending the aggression to other countries, above all to Iraq and the United Arab Republic. . . This does not mean, however, that the danger of an extension of the conflict has been removed, or that the security of Iraq and other Arab States has been ensured. The interventionist troops have not yet been withdrawn from Lebanon and Jordan . . .

"Since the U.S.A. and Britain have declined a five-Power summit conference, and the Security Council has proved to be unable to reach a solution to the problem of the Middle East, the Soviet Government has instructed its representative at the U.N. to demand an emergency session of the General Assembly to discuss the withdrawal of U.S. troops from Lebanon and of British forces from Jordan. The Soviet Government hopes that the discussion of this question in the General Assembly, in which both large and small States are represented, will make it possible to find ways to eliminate the war danger that has been created in the Middle East, and to bring tranquillity to that area . . ."

M. Khrushchev to Mr. Macmillan and General de Gaulle.

M. Khrushchev's letter to Mr. Macmillan was virtually identical with that sent to President Eisenhower, containing the same arguments and allegations. Like the latter, it alleged that the Security Council could not take "impartial decisions" on the Middle East "when most of its members are States which belong to aggressive blocs and when the Chinese People's Republic is not represented in it." After accusing Britain and the U.S.A. of desiring to turn the examination of Middle East questions into a "channel of barren discussion . . . at an ordinary meeting of the Security Council," M. Khrushchev asked Mr. Macmillan to support the Soviet Government's proposal for an emergency session of the General Assembly.

In his letter to General de Gaulle, M. Khrushchev said that the proposal for a five-Power summit meeting had become impracticable because "neither President Eisenhower nor Mr. Macmillan agreed to a five-Power meeting of Heads of Government and suggest instead that a meeting of the Security Council be held."

M. Khrushchev stressed in all three letters that the Soviet Government were ready to participate in a summit meeting at any time, adding that "the speediest convocation of a summit conference is in the interests of all States both large and small."

August 7-10. - Further Correspondence between Mr. Macmillan and M. Khrushchev.

In a letter to M. Khrushchev on Aug. 7, Mr. Macmillan expressed his regret that the Soviet Prime Minister had withdrawn his (M. Khrushchev's) previous agreement to a special session of the Security Council attended by Heads of Government. Mr. Macmillan wrote :

"On July 31 I proposed that we should meet on Aug. 12 in New York, Geneva, or any other place that might be generally agreeable. I said that I would be there on that date and hoped that you would be there too. I therefore regret that in your letter of Aug. 5 you have withdrawn your agreement, very clearly set out in your letter of July 23, to a special session of the Security Council to be attended by Heads of Government . . .

"You now propose instead that there should be a special meeting of the General Assembly . . . A special session of the Assembly would be acceptable to H.M. Government. I do, however, still think that more progress could have been made on Middle East questions by a meeting of the Security Council, especially one where the Heads of Government could negotiate as well as debate.

"As to the 'summit' meeting of the larger character about which we have corresponded since last January, I fail to understand the suggestion in the last paragraph of your letter that you are awaiting a further move from me . . . I have always made it abundantly clear that I am anxious for such a meeting under conditions which are acceptable to all of us."

In his reply to Mr. Macmillan (Aug. 10) M. Khrushchev justified his change of attitude on two grounds : (1) that his original proposal for a five-Power meeting of Heads of Government, though accepted by France and India, had been rejected by the U.S.A. and Britain ; and (2) that Mr. Macmillan's proposal for a summit meeting at the Security Council, to which the U.S.S.R. had agreed in default of a five-Power conference, had been transformed by President Eisenhower into "an ordinary meeting of the Security Council" designed—M. Khrushchev alleged—"to lure us into a labyrinth of futile discussions." For these reasons he considered it necessary that an emergency session of the General Assembly be held instead of a summit meeting at the Security Council. The Soviet Prime Minister's letter was worded as follows :

"You write that in my letter of July 23 I said that the Soviet Government was ready to hold a special session of the Security Council to be attended by Heads of Government. Yes, true, we announced our readiness to take part in such a meeting. At the same time . . . you will recall that my original letter of July 19 . . . proposed a meeting of the Heads of Government of the U.S.S.R., the U.K., the U.S.A., France, and India, with the participation of the U.N. Secretary-General . . . If the Heads of Government of all the Powers approached had consented to such a meeting, that would have been evidence of a businesslike approach to the solution of most important international problems. We had great hopes that all of them would show such an approach . . . We expected that the leaders of all the countries concerned would display wisdom in their understanding of the present events, of the direction in which they were developing, and of the consequences of a war if it were unleashed and the incalculable sufferings it would bring to mankind.

"Unfortunately our expectations were not fulfilled. While Mr. Nehru and M. de Gaulle accepted our proposal for a five-Power meeting of Heads of Government, the U.S. President rejected such a meeting and you actually supported him in that. As a five-Power meeting of Heads of Government proved—through no fault of ours—to be impossible, the Soviet Government took a positive view of your proposal for a meeting of Heads of Government within the Security Council to discuss the situation in the Middle East, our idea being that this would be nothing else but a five-Power meeting of Heads of Government within the framework of the Security Council.

"However . . . it has finally become clear from the messages and explanations of the U.S. Government, and in particular from Mr. Eisenhower's letter of July 25, that it was intended to call an ordinary meeting of the Security Council, with all the negative aspects and shortcomings arising from its present composition—shortcomings of which I have spoken in my letter of Aug. 5 and which I do not wish to reiterate. And you have agreed to these proposals of the U.S. President . . .

"At the Security Council meeting proposed by the U.S. and U.K. Governments there would have been no serious discussion by the Heads of Government on the situation in the Middle East ; it would have amounted to a useless waste of time, as there are no grounds for supposing that, in its present composition, this body can ensure a correct solution to the question in the interests of peace. Thus, in pressing for the acceptance of this proposal, the U.S.A., with the backing of the United Kingdom, unquestionably wanted to lure us into a labyrinth of futile discussions.

"In these circumstances we have come to the conclusion that . . . it is necessary to convene, not the Security Council, but an emergency session of the General Assembly . . . which . . . will enable all States, both large and small, to give their views in the search for decisions which will help to restore peace and ensure security in the Middle East . . ."

President Eisenhower issued a statement on Aug. 5 saying that a special session of the General Assembly on the Middle East was "completely acceptable" to the United States. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Soviet Embassy Press Department, London - Le Monde, Paris - The Statesman, Calcutta) **(Prev. rep. Middle East Crisis, 16333 A ; 16317 A ; 16305 A.)**

Note. American and Soviet resolutions for an emergency session of the General Assembly were presented in the Security Council on July 18 following the defeat of the U.S., Soviet and Swedish resolutions on the Middle East (see page 16319, second column). No vote was taken on either resolution.

A. UNITED KINGDOM. — Oxford University. - Success of Appeal for Restoration of Historic Buildings.

It was announced on Aug. 7 that the target of £1,750,000 for the repair and restoration of the historic buildings of Oxford University had been reached within 13 months of the launching of the Oxford Historic Buildings Appeal.

The announcement was made by Lord Bridges (chairman of the Oxford Historic Buildings Trustees), who stated that 250 industrial and commercial firms had together donated £400,000 ; that $1,000,000 (about £360,000) had been donated by the Ford Foundation , and that contributions aggregating £380,000 had come from 12,200 graduates of the University, including £20,000 from overseas. In addition, the Government had contributed £125,000, mainly for repairs to specific buildings ; another £125,000 had been given by various charitable trusts, including the Rhodes Trustees, the Pilgrim Trust, and the Gulbenkian Foundation ; the general public had contributed £25,000 ; the City of Oxford had raised £16,000 by public appeal ; and Oxford colleges not in need of repairs had given £11,000. The Pakistan Government had donated £1,000.

Lord Bridges added that the appeal would remain open ; that repair work was already being carried out on the fabric of 12 colleges ; and that an immediate start would be made on the biggest task of all the renovation of the dilapidated Sheldonian Theatre.

The above-mentioned grant by the Ford Foundation (announced on Dec. 29, 1957) amounted to one-fifth of the total set by the Appeal ; it was one of the largest benefactions ever made by that organization. —(Times) **(Prev. rep. 15687 B.)**

B. CANADA. — Population Figures.

The Dominion Bureau of Statistics announced on July 8 that the population of Canada had passed the 17,000,000 mark, standing at 17,048,000 on June 1, 1958 an increase of 459,000 (2.8 per cent) during the preceding 12 months. The increase was smaller than the record gain of 508,000 (3.2 p.c.) for the 12 months June 1, 1956-June 1, 1957, but was well above the average increase of 414,000 for the five previous years.

Population estimates for the provinces as at June 1, 1958, were as follows (figures for June 1957 in parentheses) : Ontario 5,803,000 (5,622,000) ; Quebec 4,884,000 (4,758,000) ; British Columbia 1,544,000 (1,487,000) ; Alberta 1,201,000 (1,160,000); Saskatchewan 888,000 (879,000) ; Newfoundland 438,000 (426,000) ; Prince Edward Island 100,000 (99,000) ; Nova Scotia 710,000 (702,000) ; New Brunswick 577,000 (565,000) ; Manitoba 870,000 (860,000). The population of the Yukon was estimated at 13,000, and that of the North-West Territories at 20,000.—(Department of External Affairs, Ottawa) **(Prev. rep. 15100 C ; 14119 G.)**

C. SOVIET UNION. — Marshal Bulganin appointed Chairman of Stavropol Economic Council. - New Chairmen of State Bank and Chemical Industry Committee.

The Tass Agency announced on Aug. 15 that (*a*) Marshal Bulganin had been appointed chairman of the Economic Council for the Stavropol region (in the northern Caucasus, about 800 miles south of Moscow), and (*b*) that M. Korovushkin had succeeded Marshal Bulganin as chairman of the State Bank of the U.S.S.R. The Stavropol Economic Council is one of the 105 regional councils set up under M. Khrushchev's plan for the reorganization of Soviet industry. Marshal Bulganin became chairman of the State Bank in March last, when M. Khrushchev succeeded him as Prime Minister.

M. Fedorov, formerly deputy Minister for the Oil Industry, succeeded M. Tikhomirov on Aug. 21 as chairman of the State Committee for the Chemical Industry. M. Tikhomirov became deputy chairman of the Committee.—(Soviet Embassy Press Department, London) **(Prev. rep. 16101 A.)**

A. TANGANYIKA. — Joint Purchase of Williamson Diamond Mines by Tanganyika Government and De Beers Consolidated Mines.

An agreement for the joint purchase of the Williamson Diamond Mines in Tanganyika by the Government of Tanganyika and De Beers Consolidated Mines was signed on Aug. 13 in Dar-es-Salaam, after lengthy negotiations in Tanganyika and London. The Governor of Tanganyika (Sir Richard Turnbull), who announced the sale on the previous day, said that the purchase price was £4,140,000 plus death duties; that the agreement was subject to ratification by the Tanganyika Legislative Council; and that the Tanganyika Government and De Beers would hold an equal number of shares and have four directors each on the board of Williamson Diamond Mines.

Williamson Diamonds Ltd. was founded by the late Dr. John T. Williamson, a Canadian-born geologist who discovered in 1940 extremely rich diamond deposits at Mwadui, in a semi-desert area of north-west Tanganyika, and who died on Jan. 7, 1958, at the age of 50. He was the only man in the world to own his own diamond mine, his fortune being estimated at many million pounds. The share capital of Williamson Diamonds is £600,000 in 1,200 Ordinary shares of £500 each; 800 shares are held by the executors of the estate of the late Dr. Williamson, who bequeathed his holding to his brother, Mr. Percy Williamson, and his sister; 300 by Mr. Percy Williamson; and 100 by Dr. I. C. Chopra. [Dr. Chopra, an Indian, is one of Tanganyika's leading lawyers and a Q.C.; he was legal adviser to the late Dr. Williamson].

The chairman of De Beers (Mr Harry Oppenheimer) had previously issued a statement in Johannesburg on July 10 announcing (*a*) that De Beers had concluded an agreement with Mr. Percy Williamson and Mr. Chopra "for the purchase of a major interest in the Williamson Company of Tanganyika"; (*b*) that the agreement was subject to the approval of the Tanganyika Government; and (*c*) that proposals were under discussion whereby the control of the mine would be exercised jointly by the Tanganyika Government and De Beers. Dr. Chopra confirmed on July 11 that an agreement had been signed between Mr. Percy Williamson, himself, and De Beers concerning the disposal of the mine, subject to the approval of the Tanganyika Government, which was "interested in the question of death duties."

It was also announced on Aug. 12 that the Tanganyika Government would present a Bill in the Legislative Council to enable it to accept 320 shares of Williamson Diamonds Ltd. for estate duty; in addition, it would purchase another 280 shares from De Beers for £1,317,000, making its holding 600 out of the company's 1,200 shares. The purchase money would be paid over 20 years out of dividends from the shares. After interest had been paid on the capital, some two-thirds would be used towards paying off the capital sum and one-third would be allocated to Government revenue.

A second agreement was signed on Aug. 13 between the Tanganyika Government and De Beers concerning the technical aspects of running the mine.

Both parties agreed to run the mine to full capacity, while De Beers gave an undertaking that if any general curtailment of diamond production became necessary, the cut in Williamson's production would be no greater than the lowest curtailment in any of De Beers' own group of diamond mines. Furthermore, it was provided that Tanganyikan professional, business, and trade facilities should be used wherever possible; that De Beers would not part with their shares; and that the Tanganyika Government would not dispose of its shares to any other mining concern within the territory or to anyone resident outside.

Mr. Harry Oppenheimer, who was elected chairman of Williamson Diamonds Ltd. on Aug. 17, disclosed that the amount of death duties paid by De Beers on Dr. Williamson's estate (in addition to the purchase price of £4,140,000) had amounted to £1,500,000. He also stated that the Mwadui mine produced only about 4 per cent of world diamond sales, although 10 per cent of such sales had been allotted to it by the Diamond Corporation; he added, however, that Mwadui was "still an important mine" and that its annual production figure (see below) should be maintained "for many years."

The Mwadui mine employs 300 Europeans, 2,250 Africans, and 67 Asians; its total diamond production (gems and industrial) amounted to £3,025,000 in 1957. The present plant, of the most modern type, was completed as recently as 1957 at a cost of £6,000,000, and the employees are housed in a model township.—(Times - Financial Times - Cape Times)

(Prev. rep. De Beers, 16130 E.)

Note. John Thoborn Williamson was born in Quebec Province in 1907, the son of a Canadian lumberman of Irish descent. He graduated in geology and mineralogy at McGill University (Montreal), took a doctorate in those subjects, and went out to South Africa as a geologist at the age of 21. While working on the Rand he formulated the theory that somewhere in East Africa there was the original "pipe" through which, during the formation of the earth's crust, diamonds were thrown up from the subterranean cauldrons where they were formed. He was of the opinion that this "pipe" could be located by a scientific study of land formations, and with this aim he carried out a detailed study of rock formation over a large area of north-west Tanganyika, staking claims within a radius of 100 miles of Shinyanga. Though his theories were discounted by other geologists, Dr. Williamson succeeded in locating the "pipe" in 1940, six years after starting the search. The site of Williamson's Diamond Mines is located on the spot where he "struck" diamonds at a depth of only eight feet; even today, after the mine has been worked for 17 years, the mine's greatest depth is not more than 30 ft. Dr. Chopra staked Dr. Williamson in the final safari that resulted in the discovery of the mine.

Dr. Williamson, a bachelor, lived largely as a recluse and devoted much of the mine's profits to the welfare of his employees and to charitable purposes generally; he gave £50,000 to Makerere College (Uganda) for the benefit of higher education for Africans, and was specially interested in the promotion of harmonious race relations. In 1952 he gave the world's largest pink diamond to Princess (now Queen) Elizabeth as a wedding present on the occasion of her marriage. (Times - Daily Telegraph - Manchester Guardian)

B. AVIATION. — Transatlantic Record Flights.

A British *Comet IV* jet airliner set up a new record for a transatlantic flight from New York to Britain by a passenger-carrying civil aircraft when it made a non-stop crossing in 6 hours 28 minutes on Aug. 12. The *Comet*, commanded by Mr. John Cunningham (chief test pilot of the de Havilland Company), had 22 people on board but carried a load equivalent to 76 passengers and full reserves of fuel. The previous fastest crossing (7 hours 44 min.) was on Jan. 8 by a Bristol *Britannia* turbo-jet airliner of Israel Airlines.

On June 27 two U.S. Air Force KC-135 jet tanker aircraft had broken the New York to London speed record for any aircraft. Both machines were on a flight from the Westover Air Force Base in Massachusetts to Brize Norton (Oxfordshire); the first one, commanded by Major B. B. Davenport, passed over London after a flight of 5 hours 27 min. 42.8 sec. nearly 50 minutes better than the previous record of 6 hours 16 min. 59.2 sec. set up by an R.A.F. *Canberra* bomber on Aug. 23, 1955. The second aircraft, commanded by Major Q. W. Raaz, also broke the record in almost the same time, the two planes achieving average speeds of 630.2 m.p.h. and 626.6 m.p.h. respectively. A third KC-135 tanker which was scheduled to make the same flight crashed just after taking-off at Westover, the crew of 15 being killed.

On its return flight from Brize Norton to Westover the first aircraft set up a new east-west speed record between London and New York, covering the 3,460 miles in 5 hours 51 min. 24.8 sec.; the second aircraft took only 5.2 seconds longer. Both machines averaged about 588 m.p.h. The previous westbound record (7 hours 29 min.) was set up on Aug. 23, 1955, by the same *Canberra* which established the east-west record.—(Times - Daily Telegraph - New York Times - New York Herald Tribune) **(Prev. rep. 15959 B; 14406 B.)**

C. BASUTOLAND. — Constitutional Reforms. - Proposals for Representative Government.

It was announced on Aug. 15, 1957, that the U.K. Secretary for Commonwealth Relations (Lord Home) had invited the Basutoland National Council to submit recommendations for granting to the Council legislative powers for internal laws affecting only the Basuto people as a step towards representative government. In response to this invitation, committees were set up under the general guidance of Professor D. V. Cowen (Professor of Comparative Law at Cape Town University), and their eventual joint report was accepted in its entirety by the Basutoland National Council on July 27, 1958. The report proposed:

(i) The conversion of the National Council (at present a merely advisory body of 99 members) into a Legislative Council of which half the members would be elected by the Basuto, and which would have powers to legislate on all matters except external affairs, defence, internal security, and some other matters reserved to the High Commissioner; (ii) the establishment of an Executive Council for the formation of policy under the Resident Commissioner as president, with 3 other official members and 4 non-official members; (iii) the strengthening of local government; (iv) the creation of a House of Chiefs.

The National Council also agreed to send a deputation, including Professor Cowen, to London in order to submit the proposals to the Secretary for Commonwealth Relations. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Economic Development, 14492 A.)

A. UNITED KINGDOM. — The Landlord and Tenant (Temporary Provisions) Act.

The committee and report stages of the Landlord and Tenant (Temporary Provisions) Bill took place in the House of Commons on June 23. In the report stage important Government amendments were adopted designed to clarify the wording of the Bill and to safeguard the position of tenants and occupiers, as follows :

(1) To make it clear that the onus of proposing a new tenancy agreement was placed on the landlord and not on the tenant ; and to ensure that in applications by the tenant to the court for the suspension of a possession order, the tenant should not be disqualified unless it were shown that he had refused an offer by the landlord of a new tenancy which he could " reasonably have been expected to accept."

(2) To make it clear that a tenant or occupier might obtain suspension of the execution of a possession order if he had made " such efforts as were reasonable in the circumstances " to obtain other appropriate accommodation.

Mr. Brooke (Minister of Housing and Local Government) explained with regard to amendment (1) that, as the Bill stood, the tenant or occupier would have to satisfy the court that he had made " reasonable efforts " to secure a tenancy for a period of three years or more ; if there was " one reasonable step that he could have taken but did not take," the landlord would succeed. The Government, however, did not want to give the landlord a chance of winning merely by proving that there was some possible step which could have been taken, but which the tenant had not thought of.

The second point which the Government were trying to cover by amendment (1) was that the occupier should not be required to justify to the court his action in refusing or failing to accept a proposal for a tenancy which would involve him in paying a premium. The right object of the test was to show that he was willing to take the tenancy on reasonable terms for at least three years. It was also not intended to disqualify him if he was unwilling to purchase the house. Moreover, in a number of cases tenants of decontrolled property, particularly flats, had been offered long leases of more than 21 years, for which premiums might legally be charged. A long lease at a low rent, together with a substantial capital payment, was, however, tantamount to a sale in this context ; in other words, the amendment would put the sale of a lease on the same footing as the sale of a freehold.

The third point sought to be covered by amendment (1) was a possible demand by the landlord for an increased rent to come into effect retrospectively, i.e. from a date preceding that on which the new tenancy was offered. Legally, a rent increase was not recoverable for the " standstill " period [i.e. the period between the coming into effect of the Rent Act (July 6, 1957) and the expiry of the protection for the tenant (Oct. 6, 1958)] unless a new tenancy agreement had been concluded. Thus, a demand for " retrospective " rent was an attempt on the part of the landlord to obtain a payment which was not recoverable. It was therefore logical to provide that a tenant had acted " reasonably " in refusing an offer of a new agreement with such a condition attached.

Mrs. Lena Jeger (Lab.) said that owing to the delay in introducing the Bill, many people had already signed agreements involving them in paying back rent ; she suggested that there was a case for a refund paid before the clarification. In reply, **Mr. Brooke** emphasized that he had repeatedly said that tenants and landlords, before entering into new agreements, should take professional advice. If they had not done so and had signed agreements which were unreasonable in some respect or other, this had happened through their disregard of " the dictates of common sense."

Mr. Marlowe (C.), seconded by **Mr. Robert Jenkins** (C.), moved an amendment intended to protect tenants from finding themselves involved in heavy legal costs as a result of exercising their rights under the Bill ; it was defeated by 175 votes to 157 after **Mr. Brooke** had announced that the Lord Chancellor, when he came to make rules under Clause 4 of the Bill, intended to consider sympathetically a provision to limit costs. This provision, whilst preserving the court's discretion in exceptional cases, would normally limit the costs payable by either party to an amount ranging from £4 to £7 - £8. An occupier would thus be able to go to court and state his case, or be legally represented, without running the risk of having to pay inordinate costs.

After being given a third reading on June 23 and passing through the House of Lords, the Bill was enacted on Aug. 1. (Times - Daily Telegraph - Manchester Guardian) **(16235 A.)**

B. ICELAND. — Soviet Credits for Fishing Industry.

It was announced by the Tass Agency on Aug. 19 that the Soviet Union had granted Iceland a 12-year credit of 50,000,000 Icelandic crowns (about £1,100,000) to finance the purchase of fishing vessels in Eastern Germany ; the credit would bear interest at 2½ per cent, and repayment would be made in Icelandic goods. The agreement followed discussions between M. Skachkov, chairman of the Soviet Government's Committee for Economic Relations with Foreign Countries, and Hr. Thorsteinsson, the Icelandic Ambassador in Moscow. (Soviet Embassy Press Department, London)

C. UNITED STATES. — The National Aeronautics and Space Act. - Creation of Outer Space Agency.

Legislation establishing a Federal " space agency "—the National Aeronautics and Space Administration (N.A S.A.)—was signed by President Eisenhower on July 29 after approval by both Houses of Congress. Based on the recommendations contained in the President's Congressional message of April 2 (see page 16160), it represented a compromise version of two separate Bills previously passed by the House of Representatives and the Senate.

The legislation (the National Aeronautics and Space Act) contained the following principal provisions :

(1) The N.A.S.A. would be built around the 38-year-old National Advisory Committee for Aeronautics and would be headed by a civilian Administrator. It would plan, direct, and conduct all aeronautical and space research in the United States for peaceful purposes. The Defence Department would retain jurisdiction over space activities primarily involving weapons and defence.

(2) A joint civilian-military committee would be established to ensure liaison between the N.A.S.A. and the Defence Department on matters relating to space activities. The President would have ultimate authority to co-ordinate the work of both bodies.

(3) A National Aeronautics and Space Council would be set up to advise the President on space matters, similar to the National Security Council which advises him on defence and security matters. The President would preside over the new Council, whose other members would be the Secretary of State, the Secretary of Defence, the Administrator of the N.A.S.A., the chairman of the Atomic Energy Commission, and three Presidential appointees chosen from persons prominent in science, education, and engineering.

The National Aeronautics and Space Act declared that it was the policy of the United States to undertake space activities " devoted to peaceful purposes for the benefit of all mankind " ; it authorized " co-operation with other nations and groups of nations . . . in the peaceful application of the results of such work, pursuant to international agreements entered into by the President with the advice and consent of the Senate." In signing the legislation, President Eisenhower described its enactment as " an historic step " which would equip the United States " for leadership in the space age."

A new 15-member Senate Committee on Aeronautical and Space Sciences was set up by the U.S. Senate on July 24 ; it will have jurisdiction over the activities of the N.A.S.A. and will deal with all outer-space developments except those having military implications. A similar committee was set up by the House of Representatives on July 21.

Mr. T. Keith Glennan (52), president of the Case Institute of Technology (Cleveland) and a former member of the Atomic Energy Commission, was nominated by President Eisenhower on Aug. 8 as Director of the National Aeronautics and Space Administration. Dr. Hugh L. Dryden (60), director of the National Advisory Committee for Aeronautics, was nominated deputy director of the N.A.S.A. (New York Times) **(16157 A.)**

D. BAHAMAS. — Electoral Reforms.

The U.K. Colonial Secretary (Mr. Lennox-Boyd) arrived in Nassau on April 16 to discuss the possibilities of political and social reforms with the Governor of the Bahamas (Sir Raynor Arthur), the local authorities, political leaders, and other leading representatives of the population. His visit was the outcome of the general strike of January 1958 (see 16032 A), which, although originating in a transport dispute, was interpreted as an expression of resentment on the part of the coloured population (85 per cent of a total of 100,000) against white " domination " in the Administration.

On April 13 Mr. Lennox-Boyd announced the following electoral reforms, which were subsequently unanimously adopted in principle by the Bahamas House of Assembly on May 6 :

(1) The introduction of universal adult male suffrage (though it was not proposed to extend the franchise to women).

(2) The limitation of the number of votes permitted to any one person to two—the qualifications being residence and place of business.

(3) An increase in representation in the House of Assembly for New Providence Island (on which Nassau is situated) to 12 seats instead of 8, out of a total of 29.

Mr. Lennox-Boyd stated that legislation necessary for these changes would be brought into effect by the end of the year ; he added that, as a result of his investigations, he and the Governor would authorize immediate steps to " enact labour legislation consistent with the needs of the Bahamas, in a form which commends itself to modern opinion."
(Times - Daily Telegraph - Observer) **(Prev. rep. 16032 A.)**

A. SOUTH AFRICA. — Opening of Treason Trial. - The Special Criminal Courts Amendment Act.

It was announced in Pretoria on July 1 that a special criminal court would be set up to try without a jury 92 South Africans of all races who had been charged with treason or, alternatively, with certain offences under the Suppression of Communism Act. The court would consist of Justice F. L. H. Rumpff (a member of the Transvaal Division of the Supreme Court, and chairman of the Constituency Delimitation Commission in 1957), Mr. Justice A. Kennedy (a member of the Natal Division of the Supreme Court), and Mr Justice J. F. Ludorf (also of the Transvaal Division of the Supreme Court), and the trial would begin in Pretoria on Aug. 1.

On July 9 the Government published legislation—the Special Criminal Courts Amendment Bill—empowering the Minister of Justice to order trials on charges of treason or offences against the Suppression of Communism Act to be held by special court, whenever he considered this to be "in the interests of the administration of justice," and to appoint two or three judges constituting a special court. The Bill specifically validated the special court announced on July 1 for the present treason trial.

The Bill amended a statute of 1917 which empowered a Provincial Attorney-General to recommend to the Minister of Justice the trial of certain scheduled offences (treason, sedition, and public violence) by a special court when he was of the opinion that "if the accused were tried by a jury the ends of justice are likely to be defeated" In 1955 consolidating legislation was passed embodying the above-mentioned provision of the 1917 Act, and also enabling the Minister to direct that certain offences should be tried by a judge and assessors—thereby disallowing trial by judge and jury. In 1956 grave charges under the Suppression of Communism Act were added to those for which a special court could be constituted.

The Bill was given a second reading in the House of Assembly on July 14 by 84 votes to 46, the United Party and the Natives' Representatives opposing.

Mr. Swart (Minister of Justice) explained that under South African legislation four types of superior court trial were provided: (i) by a judge and two assessors; (ii) by a judge and jury, if so elected by the accused; (iii) by a judge and two assessors, at the direction of the Minister of Justice; and (iv) by special court, at the direction of the Minister and on the advice of the Attorney-General. Before the decision was made to bring the present case before a special court of three judges, he (the Minister) had consulted the Judge-President of the Transvaal as to what judge should be appointed if the case were to be heard before a judge and two assessors, and the Judge-President had nominated Mr. Justice Rumpff.

In the meantime the accused had elected to be tried by a judge and jury, but the Attorney-General had informed him (the Minister) that it was in the interests of justice that a special court should be constituted. After taking legal opinion, and receiving assurances that he (the Minister) had power to establish such a court, the special court announced on July 1 had been set up; the other two judges appointed to the court had been recommended by Mr. Justice Rumpff.

The accused, however, had meanwhile changed their minds and had elected to be tried by a judge and assessors The question had then arisen whether a special court was still allowed, and, according to legal opinion, this was the case. However, in order to clarify the intention of existing legislation and to avoid proceedings which would needlessly protract the trial, he (the Minister) had decided to bring in the new Bill.

Mr. Swart said that the Attorney-General had expressed the opinion that the complicated nature of the case, the legal questions which were expected to be raised, and the vast volume of evidence that would be produced, made it desirable in the interests of justice that three judges with experience of criminal courts should be appointed to hear the case. Where a judge sat with two assessors he had to take responsibility for the court's decision even if the assessors disagreed with him; thus "the decision in a trial perhaps lasting for months and months would be the responsibility of one judge" In a special court, however, there would be three experienced judges able to give a decision both on the facts and the legal aspects, and their decision would have to be unanimous. To create a special court was therefore not only in the interests of the State but "just as much in the interests of the accused."

After pointing out that it was traditional in South Africa for all treason trials to be referred to a special court, Mr. Swart deprecated what he called the "shocking misrepresentation in the Press" which had created the "totally incorrect impression" that the Bill empowered the Minister to create special courts whenever he wished. In actual fact, the Bill referred to only one Article in the Criminal Procedure Act which empowered the Minister of Justice to create a special court in certain specific instances—namely, in cases of treason, public violence, and Communistic activities.

Mr. H. G. Lawrence (U.P.) emphasized that a "fundamental change" would be brought about by the Bill. Under the legislation in force, a special court could be appointed if "the ends of justice were likely to be defeated by a trial by jury," whereas now such a court could be set up if it was "in the interests of the administration of justice," which was quite a different condition. The Minister should show that such an amendment of the law was reasonable and necessary. Mr. Lawrence also expressed the view that under existing legislation a special court could be set up only as an alternative to trial by jury. Mr Swart's instruction to the Governor-General to issue a proclamation to constitute a special court in connexion with the present treason trial was therefore "completely illegal" as the accused had chosen to be tried by a judge and two assessors, in which case there was no provision for the creation of a special court. If Mr. Swart now introduced *ad hoc* legislation "at the eleventh hour" to validate his earlier decision, this was nothing else but treating Parliament as a "rubber stamp." Mr. Lawrence accepted that Mr Swart's motives in introducing the measure were "impeccable," but said that he was creating "a most dangerous precedent" and that the new Bill was "repugnant to the rule of law."

The Bill was also strongly criticized by **Mr. Lee-Warden** and **Mr. W. P. Stanford** (Natives' Representatives).

Replying to the debate, **Mr. Swart** stressed that if cases were heard before a judge and two assessors the law did not require that the assessors should have legal knowledge, and it was, in fact, possible for persons to be appointed as assessors who had no legal knowledge or experience whatever. He repeated that he had "consulted Mr. Justice Rumpff about the appointment of the two other judges," and that those judges had been "recommended" by Mr. Justice Rumpff.

The Bill was given a third reading on July 16 by 91 votes to 52, after Mr. Swart had declared that observers who would be attending the treason trial from Britain, the U.S.A., and Norway would be "welcome to come to the hearing"; though South Africa had never sent observers to other countries to hold watching briefs, she was "not ashamed of her judicial system" and "had nothing to conceal."

The Bill was given a third reading in the Senate on July 21, and received the Governor-General's assent on July 22.

Opening of Treason Trial.

When the trial opened in Pretoria on Aug. 1, the leading defence counsel (Mr. I. Maisels) asked that Mr. Justice Ludorf, as well as Mr. Justice Rumpff, should recuse themselves on the grounds that "certain facts created reasonable fear in the minds of the accused that they would not have a fair trial." Mr. Justice Ludorf announced on Aug. 4 that he would accede to this request, but Mr. Justice Rumpff declined to recuse himself.

Mr. Justice Ludorf said that the defence request was based on the fact that he (the judge) had acted as counsel on behalf of the police in a matter in which the facts to some extent overlapped with those of the present trial. Until the matter had been raised by Mr. Maisels it had not occurred to him that there was any connexion between the two cases, and he had actually forgotten the facts of the previous case. Nevertheless, he could not say that it would be unreasonable for the accused to gain the impression that they would not have a fair trial.

Mr. Justice Rumpff explained that, "contrary to Mr. Swart's statement in Parliament" (of which he had not known beforehand), he had never "recommended" his two fellow-judges to serve with him, and he denied that he was responsible for their appointment (as had been contended by the defence). The appointments had been solely the responsibility of the Minister and had been a matter of indifference to himself (Mr. Justice Rumpff) personally.

Mr. Swart announced on Aug. 6 that Mr. Justice Bekker (of the Transvaal Division of the Supreme Court) had been appointed the third judge to fill the vacancy caused by the withdrawal of Mr. Justice Ludorf.

Of the 92 defendants accused in the indictment, 58 were Africans, 16 Europeans, 16 Indians, and two Coloured. When the trial opened, however, it was announced that the Crown had withdrawn the indictment against one of the accused, who would be unable to attend for six months on medical grounds.—(State Information Office, Pretoria - Cape Times - Times - Manchester Guardian) **(Prev. rep. 16138 A.)**

B. SOVIET UNION. — Construction of World's Largest Hydro-Electric Station.

The Kuibyshev hydro-electric station at Zhiguli, on the Volga, was officially opened by M. Khrushchev on Aug. 10. The largest of its kind in the world, it has a planned capacity of 2,100,000 kilowatts, with an annual output of 10,800,000 k.w.h. The first generating set was put into operation in December 1955; since then 19 more sets, each of 105,000 k.w. capacity, had been installed in the power house. The station took seven years to construct.

Mr. Khrushchev announced at the opening ceremony that the station would be named after Lenin and would henceforth be known as the Lenin Volga Hydro-Electric Station.
(Soviet Embassy Press Department, London) **(14717 A.)**

C. RUMANIA. — Withdrawal of Soviet Forces.

Bucharest Radio announced on July 25 that all Soviet armed forces had been withdrawn from Rumanian territory.
(Le Monde, Paris) **(Prev. rep. 16301 A.)**

A. UNITED KINGDOM. — The Isaac Wolfson Foundation. - Wolfson and Gulbenkian Benefactions.

The creation of a new charitable foundation with a capital of £6,000,000, almost entirely in ordinary shares of Great Universal Stores, was announced on July 30 on behalf of Mr. Isaac Wolfson, chairman and managing director of Great Universal Stores. The trust—known as the Isaac Wolfson Foundation—is the largest since the establishment of the Nuffield Foundation with a capital of £10,000,000 in 1943.

The Isaac Wolfson Foundation will have an income of approximately £400,000 a year, which will be free of income-tax as is the case with all charitable trusts. The policy of the Foundation is: "The advancement of education and health in the United Kingdom and Commonwealth, with particular reference to scientific and technological education; facilities for higher education; youth activities; general medical research; cancer research; and medical, surgical, and nursing services." The Foundation is also empowered to act in the United States and Israel in promoting these aims.

It was announced at the same time that the Wolfson Foundation had made the following benefactions: £250,000 to the Westminster School of Nursing to provide training facilities for 160-170 nurses; £250,000 to London University for a new Hall of Residence for Commonwealth students; £25,000 to the British Council of Spastics to build a new wing for a further 20 spastics and 10 staff at Beaconsfield, Bucks.; and £20,000 for the Duke of Edinburgh's Award for young people (see 16339 B, 15411 A).

The new Foundation replaced a smaller charitable trust which had been created by Mr. Wolfson in 1955 and which had itself made a number of important benefactions—including £150,000 for the British Empire Cancer Campaign, £125,000 for a post-graduate school of medicine attached to Hammersmith Hospital, £120,000 to the National Playing Fields Association, and £65,000 to Oxford University for a Chair of Metallurgy. The new Foundation and its parent body has given £1,114,000 for a variety of causes since the original trust was founded by Mr. Wolfson in 1955.

The Board of Trustees of the Isaac Wolfson Foundation consists of Lord Nathan, as chairman; Lord Evans, physician to H.M. the Queen; Lord Birkett, a former Lord Justice of Appeal; Professor A. L. Goodhart, Q.C., Master of University College, Oxford; Sir Stanford Coe, consulting surgeon and member of the Cancer and Radiotherapy Committee; Mr. Isaac Wolfson; Mrs. Isaac Wolfson; and Mr. Leonard Wolfson. Lieutenant-General Sir Harold Redman, lately Vice-Chief of the Imperial General Staff, accepted the post of Director and Secretary of the Foundation.

Gulbenkian Foundation Benefactions.

The first list of benefactions under the Gulbenkian Foundation (see 15031 A), announced on April 27, 1957, totalled over £500,000 for artistic, scientific, educational, and charitable causes in Britain, the Commonwealth, Portugal, and Armenian communities in the Middle East. Further grants totalling over £1,000,000 were announced on Nov. 8, 1957, for similar purposes, of which over £150,000 was allocated to Britain.

Benefactions to British institutions included £75,000 for the Royal College of Art for building a new wing on a site adjoining the Albert Hall; £60,000 for Durham University for building a Museum of Oriental Art and Archaeology, to be named the Gulbenkian Museum; £22,000 to Oxford University for building a Gulbenkian lecture-room adjoining the new Law Library; £20,000 to the London Police Court Mission for establishing a probation hostel for girls from rural areas; £15,000 for Gulbenkian Fellowships in mathematics, science, and technology at selected universities; and £10,000 to King's College, London, where the late Mr. Calouste Sarkis Gulbenkian took a science degree. Among many smaller benefactions was £3,000 to help expand the work of the Telephone Samaritans of the Church of St. Stephen's Walbrook, in the City of London. [The Telephone Samaritans of St. Stephen's Walbrook was founded in 1953 by the Rev. Chad Varah to help reduce the suicide-rate by encouraging persons in despair to telephone Mansion House 9000; assisted by voluntary helpers, trained and untrained, Mr. Varah has dealt with some 900 cases, of which 400 were potential suicides and the rest in great distress. The service has been imitated in Berlin and Stockholm.]

In addition to the benefactions mentioned above, the Gulbenkian Foundation has given £50,000 towards the building of the new Churchill College at Cambridge (see 16198 C).

It was announced on Jan. 20, 1958, that the needs of the arts in Great Britain would be reviewed over the next 18 months by a committee appointed by the Gulbenkian Foundation and headed by Lord Bridges, chairman of the Royal Fine Art Commission and former Head of the Civil Service. On May 14 it was announced that the other members of the Committee would be Lady Albemarle, Sir George Barnes, Principal of the University College of North Staffordshire, and Mr. Noel Annan, Provost of King's College, Cambridge. (Times - Daily Telegraph - Manchester Guardian)

B. TURKEY. — Economic Stabilization Programme. - Financial Assistance by O.E.E.C. Members, E.P.U., and I.M.F. - New Exchange Rate System.

It was announced in Ankara, Paris, and Washington on Aug. 4 that a large-scale programme of financial aid to Turkey had been approved by the Ministerial Council of the O.E.E.C., the International Monetary Fund, and the U.S. Government, following the adoption by the Turkish Government of a comprehensive stabilization programme designed to arrest inflationary pressures, to enable Turkey to overcome her present economic difficulties, and to assist her in obtaining fresh resources for her economic development programme. Details of the financial facilities, covering a total of $359,000,000 in foreign aid, were as follows:

(1) The O.E.E.C. would make available to the Turkish Government about $100,000,000 of credit; $25,000,000 of this would be made available through the European Payments Union, the Ministerial Council of the O.E.E.C. having decided to provide Turkey with a *rallonge* which would extend her settlement facilities in the Union on a 75 per cent gold and 25 per cent credit basis by $100,000,000. The equivalent of the remaining $75,000,000 would be provided by member-countries of the O.E.E.C., including the equivalent of $50,000,000 in Deutschemarks by Western Germany and the equivalent of $10,000,000 in sterling by Britain.

(2) The I.M.F. had approved a drawing by Turkey on the Fund of the equivalent of $25,000,000, half in U.S. dollars and half in Deutschemarks.

(3) The U.S. Government would extend to Turkey an additional $234,000,000, made up of (i) $25,000,000 of immediate aid; (ii) $75,000,000 of defence support assistance grants from Mutual Security Aid Funds; (iii) $75,000,000 in the form of a development assistance loan, about half of which would be granted by the Export-Import Bank; (iv) $15,000,000 by the supply of U.S. surplus agricultural commodities; and (v) $44,000,000 by the postponement of repayment of the loans granted to Turkey in 1948, 1949, and 1952 by the former International Co-operation Administration and the Mutual Security Agency.

(4) With regard to Turkish debts due or falling due within the next few years, it had been agreed that a conference should be convened at an early date, under the aegis of the O.E.E.C., to decide upon the arrangements for spreading the repayment over a certain period.

There would be a six-months' standstill in respect of the bilateral arrears agreements between Turkey and various O.E.E.C. countries; during this period negotiations would take place on new schedules of payment.

Turkish Economic Stabilization Programme.

The principal part of this programme (which became effective on Aug. 4) was the introduction of a new exchange system.

A single effective selling rate of £T9.00 to the U.S. dollar was introduced for imports, and three buying rates for exports: (i) £T4.90 to the dollar for a first list of commodities; (ii) £T5.60 for a second list of commodities; and (iii) £T9.00 for all other commodities, as well as for "invisible" transactions and capital transfers. These new rates, while leaving unchanged the official par value of the Turkish pound at £T2.80 per U.S. dollar, were brought about by granting premia for exports and making surcharges for imports, thereby readjusting export and import values to world prices and removing the previously existing disparity between internal and external prices. All other existing multiple currency practices were abolished.

In addition, the Turkish Government's programme included measures designed to balance the budget, to eliminate deficits of the State economic enterprises, and to restrict credit expansion; the Government is also adjusting its own investment policy with a view to giving priority to projects which can most effectively stimulate exports or reduce imports.

The O.E.E.C. stated that the Turkish Government had "declared its intention to put this programme into operation without delay, to pursue it with determination, and, by all available means, to ensure its complete success." Moreover, the Turkish Government was prepared, "when required and in consultation with the O.E.E.C., to strengthen and supplement the measures for which the programme provides." The I.M.F. stated that it would "remain in consultation with Turkey."—(O.E.E.C. Information Division, Paris - I.M.F., Washington - Turkish Embassy Press Department, London - New York Times) **(Prev. rep. 14015 A; Anglo-Turkish Debt Agreement, 15578 A; 14180 A.)**

C. NETHERLANDS - YUGOSLAVIA. — Agreement on Compensation for Expropriated Dutch Property.

An agreement was signed at The Hague on July 22 providing for the payment by Yugoslavia to the Netherlands of 2,500,000 guilders in compensation for nationalized or confiscated Dutch property in Yugoslavia, payment to be spread over five years. Negotiations for the agreement began in 1949, and it was stated that talks on the subject of Yugoslav State debts to the Netherlands were still continuing.—(Netherlands News Agency)

A. CHINA - SOVIET UNION. — Peking Meeting between M. Khrushchev and President Mao Tse-tung. - Joint Statement on International Situation.

The Soviet Prime Minister, M. Khrushchev, visited Peking from July 31 to Aug. 3 for talks with President Mao Tse-tung. Others taking part in the discussions were, on the Soviet side, Marshal Malinovsky (Defence Minister), M. Kuznetsov (acting Foreign Minister), and M. Ponomarev (a member of the Communist Party's central committee); and on the Chinese side, Mr. Chou En-lai (Prime Minister), Marshal Peng Teh-hai (Defence Minister), Marshal Chen Yi (Foreign Minister), and Mr. Wang Cha-hsiang (a member of the Communist Party's secretariat). The meeting took place under conditions of great secrecy, no intimation of the Soviet leaders' presence in Peking being given until August 3.

The communiqué issued at the conclusion of the talks (the main sections of which are given below) called for the immediate holding of a summit conference, the withdrawal of the U.S. and British forces from Lebanon and Jordan, the ending of nuclear tests, and the abolition of military blocs and military bases on foreign soil. It accused the Western Powers of "refusing to take any genuine measures to preserve peace"; declared that another world war would "put an end to the imperialist aggressors"; and reaffirmed the ideological unity of the Soviet and Chinese Communist parties.

After speaking of the "exceedingly warm and cordial atmosphere" of the discussions and the "complete identity of views" which had been recorded, the communiqué went on:

"The two parties agreed that the U.S.S.R. and the Chinese People's Republic, together with the other countries of the Socialist camp and all peace-loving countries and peoples, have achieved great successes in the struggle to ease international tension and defend peace. The peaceful policy of the U.S.S.R. and the Chinese People's Republic is receiving growing support and sympathy from the peoples of all countries. India, Indonesia, the United Arab Republic, and other countries and peoples of Asia, Africa, America and Europe are playing an ever-increasing role in strengthening peace . . .

"In contrast . . . aggressive imperialist circles, headed by monopolist groups in the United States, continue to reject peaceful co-existence and co-operation, stubbornly oppose the easing of international tension, obstruct the holding of a conference of Heads of Government of the great Powers, and intensify their preparations for a new war . . . They are forging aggressive military and political blocs, enmeshing the world in their network of military bases, and interfering more often and more brazenly in the domestic affairs of other countries.

"The armed aggression recently undertaken against Lebanon and Jordan by the United States and Britain, and the threats of force against the Republic of Iraq and the United Arab Republic, have sharply increased the tension in the Middle East and have made the war danger still more serious . . . The U.S.S.R. and the Chinese People's Republic strongly condemn the flagrant aggression by the U.S.A. and Britain in the Middle East; demand the immediate summoning of a conference of Heads of Government of the great Powers to discuss the Middle East situation; and insist on the immediate withdrawal of U.S. troops from Lebanon and of British forces from Jordan."

After expressing "full support" for the "struggle of the United Arab Republic, the Republic of Iraq, and the national liberation movements of the peoples of Asia, Africa, and Latin America," and saying that "the age of colonialism is gone, never to return," the communiqué continued:

"The two parties exchanged views on a number of important questions . . . and reached complete agreement on measures to be taken to combat aggression and preserve peace. The Soviet Union and the Chinese People's Republic will do everything possible to ease international tension and prevent the horrors of a new war. Both parties declare once again that the right of the peoples of all countries to choose their own social and political systems must be respected; that countries with different social systems must co-exist peacefully, in accordance with the well-known 'Five Principles' which have received wide international recognition; that all controversial international issues must be settled peacefully by negotiation; and that the development of economic and cultural relations between countries on the basis of mutual benefit and peaceful competition . . . must be encouraged.

"The major task in preserving and consolidating peace is the reaching of agreement among States to reduce armaments, to end [nuclear] tests and ban atomic and hydrogen weapons, to abolish all military groupings and bases on foreign territories, and to conclude a pact of peace and collective security. Whether war can be averted does not, however, depend solely on the good intentions of the peace-loving peoples and their unilateral efforts. Right up to the present moment, aggressive circles of the Western Powers are refusing to take any genuine measures to preserve peace; on the contrary, they are senselessly aggravating the international tension and putting mankind on the brink of catastrophe. If the sabre-rattling imperialist maniacs dare to force war on the peoples, they should realize that all the peace-loving and freedom-loving countries, closely united in a single unit, will put an end to the imperialist aggressors once and for all and establish everlasting peace the world over."

In conclusion, it was stated that both parties "noted with great satisfaction" that the "fraternal relations of friendship, co-operation and mutual assistance between the Communist parties and Governments of the Soviet Union and China . . . are being developed successfully and becoming more firmly established"; that the economic development of both countries was "proceeding at a rapid pace" and "increasing daily in strength"; and that they were in complete accord in assessing the tasks facing the Communist parties of China and the Soviet Union."

After saying that "the unshakable unity of our two Marxist-Leninist parties will always provide a firm guarantee of the triumph of our common cause," the communiqué ended: "The Soviet Communist Party and the Chinese Communist Party will . . . wage an uncompromising struggle against revisionism - the principal danger in the Communist movement. This revisionism has found its clearest manifestation in the programme of the League of Communists in Yugoslavia . . ."

An agreement on Soviet technical assistance to China for the construction or expansion of 47 metallurgical, chemical, coal-mining, machine-building, wood-working, and building materials enterprises and power stations was signed in Moscow on August 8.

It provided that the U.S.S.R. would carry out surveying, research work, and designing for a number of these enterprises; supply technological equipment, instruments, cables, and special materials for the manufacture of other equipment in China; send specialists to help in the installation and launching of the enterprises; and help in training Chinese personnel. The U.S.S.R. would also grant to China, free of charge, licences for the manufacture of certain goods, technical data and blueprints, for which China would only have to pay the cost of preparation and delivery. All other Soviet assistance would be paid for through the delivery of goods under the current Sino-Soviet trade agreement.

The communiqué added that the designing, surveying and research work for most of the enterprises covered by the agreement would be carried out by the Chinese themselves, who would also supply the necessary equipment for these enterprises.

M. Khrushchev and the Soviet delegation left Peking for Moscow on Aug. 3.—(Soviet Embassy Press Department, London - New York Times) **(Prev. rep. 16301 A; 15899 A.)**

B. ISRAEL. — Completion of Eilat-Haifa Pipeline.

The oil pipeline from Eilat to Ashdod Yam was extended to Haifa in July by a new section running for 84 miles along the Mediterranean coast; the first oil to reach the Haifa refineries overland since 1948 was pumped through the new pipeline on August 2.

Work on the pipeline—which runs practically the whole length of Israel—began early in 1957. It was completed in three stages: (1) an 8-in. section from Eilat to Beersheba, in the northern Negev; (2) a 16-in. section from Beersheba to Ashdod Yam, on the Mediterranean coast near Askalon; and (3) the new 16-in. section from Ashdod Yam to Haifa. Before the completion of the third link, oil from Eilat and Beersheba had to be transported by tanker from Ashdod Yam to Haifa, which will no longer be necessary. The section from Ashdod Yam to Beersheba was enlarged to 16 inches to carry production from the small Israeli oilfield at Heletz, near Beersheba.

The completed Eilat-Haifa pipeline is capable of transporting 90 per cent of Israel's domestic oil needs; in addition, it gives Israel a second oil outlet at Haifa in addition to that already existing at Eilat.—(Israel Government Press Office, Jerusalem - New York Times - Le Monde, Paris)
(Prev. rep. 15862 C; 15528 A.)

C. ASTRONOMY. — Australian Radio Telescope.

The Minister in charge of the Commonwealth Scientific and Industrial Research Organization (Mr. Casey) announced on Aug. 13 that a giant radio telescope, the most powerful of its kind in the world, would be built near Parkes (a small town in the interior of New South Wales, 200 miles west of Sydney) at a cost of £A500,000. When completed in 1961, it would have a steerable dish-cover reflector 210 ft. in diameter and would be capable of picking up signals from "radio stars" millions of light-years distant. The Australian telescope will be complementary to the 250-ft. instrument at Jodrell Bank, inasmuch as it will be in a position to observe "radio stars" which are only visible in the Southern Hemisphere. It will be housed on a concrete tower and steerable with very high precision, but will not be able to turn on objects less than 30 degrees above the horizon.—(New Scientist - Australian News Bureau)

D. BRAZIL. — New Navy Minister.

Admiral Jorge do Paco Matoso was appointed Minister of the Navy on Aug. 15 in succession to Vice-Admiral Alves Câmara, who had died the previous day.—(New York Times)
(Prev. rep. 16304 B.)

AUGUST 23—30, 1958

A. ATOMIC ENERGY. — Geneva Conference of Experts on Detection of Nuclear Explosions. - East-West Agreement on Methods of Detection. - Anglo-American Offer of Conditional Suspension of Nuclear Tests.

In the course of the protracted "summit" correspondence between the Soviet and Western Heads of Government, President Eisenhower suggested to M. Khrushchev on April 28 that technical experts of both sides should start work immediately on the "practical problems of supervision and control" which were indispensable to any dependable agreement on disarmament. In his reply (May 9) M. Khrushchev agreed that both sides should appoint experts who would "start work immediately on studying the methods of possible violations of an agreement to end nuclear tests, with the proviso that the work should be completed in the shortest time possible." He emphasized, however, that the Soviet Government's acceptance related only to the single issue of suspending nuclear tests and not to the disarmament problem as a whole, on which agreement had not yet been reached between the U.S.S.R. and the Western Powers.

A White House statement (May 11) said that "Premier Khrushchev's letter seems to constitute recognition of the validity of the position, long held by the U.S.A., the other Western members of the U.N. Disarmament Sub-committee, and the overwhelming majority of the General Assembly, that examination of the technical aspects of disarmament measures should begin as soon as possible and might serve as the basis for progress toward agreement on disarmament." After expressing the hope that "this acceptance presages agreement to begin similar studies on other measures of disarmament," the statement said that M. Khrushchev's letter would be "carefully studied" and would be "the subject of early consultation with our allies."

In a letter to M. Khrushchev on May 24, President Eisenhower expressed gratification at the Soviet Prime Minister's agreement to an early start on technical talks between experts of both sides. He proposed that the talks should begin at Geneva within three weeks, and that the experts should be designated not only by the U.S.A. and the U.S.S.R. but also by the United Kingdom, France, "and possibly other countries having specialists with a thorough knowledge in the field of detecting nuclear tests." He assumed that the Soviet delegates, "like those from our side," would be chosen "on the basis of special competence so as to assure that we get scientific and not political conclusions."

In his reply (May 31) M. Khrushchev agreed that the talks should begin within three weeks at Geneva, though the Soviet Government would "prefer the conference to be held in Moscow." He added that the U.S.S.R. had no objection to the inclusion of experts from Britain, France, and other countries, and proposed that Polish and Czechoslovak experts should also take part. M. Khrushchev also proposed that the experts should complete their work in three or four weeks and draw up a final report within that period.

In a further letter to M. Khrushchev (June 10) President Eisenhower suggested that the talks should begin in Geneva "on or about July 1." While appreciating the Soviet Government's offer to hold the talks in Moscow, the Western side would prefer to hold them in Geneva—particularly as that venue was acceptable to the Soviet Government, and as the Swiss Government had "agreed to this location." As indicated in his (the President's) letter of May 24, the Western side would include experts from the U.S.A., Britain, France, and possibly other countries, and there was no objection to the participation of Polish and Czechoslovak experts as proposed by M. Khrushchev. He agreed with M. Khrushchev's suggestion that it might be possible for the experts to produce a final report in three or four weeks, but believed that there should be "enough flexibility in our arrangements to allow a little longer time if it is needed to resolve the complex technical issues involved." President Eisenhower added: "These talks would be undertaken without commitment as to the final decision on the relationship of nuclear test suspension to other more important disarmament measures." Finally, he suggested that further arrangements for the Geneva meeting should be handled through normal diplomatic channels.

Correspondence between the U.S. and Soviet Governments on the question of the Geneva conference of experts was continued during the latter half of June, involving the exchange of seven *aides-mémoire* between the two Governments.

A Soviet *aide-mémoire* of June 13 agreed that the talks should begin in Geneva on July 1, and gave the names of the Soviet experts who would be taking part. It also stated that the Soviet Government had no objection to enlisting the help of the U.N. Secretariat on the organizational side of the conference, as proposed by the U.S. Ambassador in Moscow (Mr Llewellyn Thompson) in a conversation with M. Gromyko. In reply, a U.S. *aide-mémoire* of June 20 stated that Britain would be represented at the Geneva talks by Sir William Cockcroft and Sir William Penney, and that France and Canada would each be represented by one delegate—this being the first intimation of Canadian participation in the conference.

A further Soviet *aide-mémoire* (June 24) stated that there was no objection to the participation of Canada; it gave the names of the Polish and Czechoslovak experts who would be attending, and also announced that a Rumanian technical expert would take part in the conference. It added that the Soviet Government "continues to proceed on the basis . . . that the work of the conference of experts should promote the ending of tests of atomic and hydrogen weapons, at the earliest possible date, by all States possessing such weapons."

On the following day, however, another Soviet *aide-mémoire* was presented in Washington taking exception to a statement made by Mr. Dulles at a press conference on June 17. After quoting Mr. Dulles as saying that the work of the experts must be carried out without prejudice to the question of whether or not nuclear tests should be suspended, the Soviet Government said that it was "impossible to agree to such an attitude" and that "the conference can be fruitful only if it leads to positive results." It went on to allege that "attempts are being made to seal the doom of the conference in advance," and added: "One cannot but draw the conclusion that the gist of the position expounded by Mr. Dulles is to make the meeting of experts pointless and thus to discredit it . . Under such conditions the Soviet Government cannot send its experts, as it does not want to be an accomplice in deceiving the peoples." In conclusion, the Soviet Government said that it would "like to receive confirmation from the U.S. Government that the meeting of experts should be convened with the aim of solving the problem of the universal and immediate ending of nuclear weapon tests, and consequently that the purpose of the conference remains the same as was determined in the correspondence between the Soviet and U.S. Governments."

In reply, a U.S. *aide-mémoire* was presented in Moscow on June 26 saying that "the United States considers that the aims of the conference of experts remain as determined in the exchange of correspondence between the U.S. and Soviet Governments, as confirmed by the Soviet agreement of June 24." It was added that the U.S. experts were already *en route* for Geneva, and that "so far as we are concerned the conference will be proceeded with."

The Soviet reply (June 28) reiterated that the conference would be "a waste of time" unless it devoted itself to "the accomplishment of the task of the universal ending of nuclear weapon tests." It added: "It goes without saying that the decision on the ending of nuclear tests should be taken by the Governments themselves and not by the experts, whose task is to prepare the necessary conditions for control over compliance with an agreement on the ending of tests. However, with the conference of experts beginning its work, a full and clear-cut understanding should be reached among the Governments concerning the purposes of this meeting." The Soviet Government hoped that the United States would make "an unequivocal statement on this matter."

In reply (June 30), the U.S. Government noted "with satisfaction" the position of the Soviet Government, as set out in its *aide-mémoire* of June 28, "that a decision on cessation of tests must be taken by Governments themselves and not by experts." It went on: "The task of the experts . . . has been clearly defined in the preceding correspondence between our Governments; it is to study methods of detection or possible violations of an agreement on the cessation of nuclear tests. The position of the U.S. Government has been clearly and unequivocally expressed from the time of its initial proposal. In his letter of April 28, President Eisenhower proposed to Chairman Khrushchev that technical people should start work immediately upon the practical problems of supervision and control which are indispensable to dependable disarmament agreements, and stated that . . . 'these studies are without prejudice to our respective positions on the timing and interdependence of various aspects of disarmament.' It was in reply to this letter that Chairman Khrushchev stated on May 9 that the Soviet Government agreed that both sides should designate experts for the study which is now about to begin."

The Conference of Experts to Study the Possibility of Detecting Violations of Possible Agreements on a Suspension of Nuclear Tests opened at the *Palais des Nations* in Geneva on July 1. The principal delegates were:

On the Western Side—Dr. James B. Fisk, Dr. Robert Bacher, and Dr. Ernest O. Lawrence (U.S.A.); Sir John Cockcroft and Sir William Penney (Britain); Professor Yves Rocard (France); Dr. Omond Solandt (Canada). Dr. Fisk was chairman of the Western delegation.

On the Eastern Side—Professor Y. K. Fyodorov, Dr. I. Y. Tamm, Professor N. A. Semyonov, and M. Semyon Tsarapkin (Soviet Union); Professor Leopold Jurkiewicz and Dr. Marian Meisowicz (Poland); Dr. C. Simane and Professor Frantisek Behounek (Czechoslovakia); Dr. Horia Hulubei (Rumania). Professor Fyodorov was chairman of the Eastern delegation.

PUBLIC LIBRARY
SEP 26 1958

All the representatives on both sides were eminent scientists with the exception of three diplomats appointed to the Soviet, Polish and Czechoslovak delegations—respectively M. Semyon Tsarapkin, formerly Soviet representative at the U.N. and now a senior official in the Soviet Foreign Ministry; Dr. Mieczyslaw Blusztajn, of the Polish Foreign Ministry; and M. Zdenek Trhlik, of the Czechoslovak Foreign Ministry. No diplomatic representatives were nominated on the Western side.

Of the Western scientific delegates, Dr. Fisk is vice-president of the Bell Telephone Laboratories, Dr. Bacher is a professor at California Institute of Technology; Dr. Lawrence (inventor of the cyclotron) is Director of the University of California Radiation Laboratory; Sir John Cockcroft is Director of the U.K. Atomic Energy Establishment at Harwell; Sir William Penney is Director of the U.K. Atomic Weapons Research Establishment at Aldermaston; Professor Rocard, a member of the French Atomic Energy Authority, is Director of the Physics Laboratory at the *Ecole Normale Supérieure*; and Dr. Solandt, formerly chairman of the Canadian Defence Research Board, is director of research and development for the Canadian National Railways. Dr. Bacher and Dr. Lawrence are members of President Eisenhower's Science Advisory Committee.

The Eastern scientific delegates were all leading scientists from their respective countries. Apart from those enumerated above, the Soviet delegation also included Dr. Mikhail Sadovsky, Professor Osvei Leipunsky, Dr. Ivan Pasechnik, and Dr. K. Gubkin, and the Czechoslovak delegation included Professor Alois Zatopek.

The opening session was held under the chairmanship of Signor Pier Spinelli (Director of the European Office of the U.N.) and was also attended by Mr. Palthey (Deputy-Director) and Mr. T. G. Narayanan (U.N. Assistant Secretary-General for Disarmament), the last-named acting as "personal representative" for the U.N. Secretary-General, Dr. Hammarskjöld.

Signor Spinelli, in opening the conference, conveyed Dr. Hammarskjold's "deep concern" with the subject in view of its implications for the disarmament problem—a field in which the United Nations had special responsibilities.

Dr. Fisk said in reply: "We are meeting pursuant to an agreement reached between Chairman Khrushchev and President Eisenhower to study the technical problems involved in the detection and identification of nuclear exlosions. It is most important to have a common understanding of the technical problems which are involved in this question as a basis for further consideration by our Governments of the important issues on which future decisions will be required.

"Each of us brings to our task the tradition of science, a tradition that places the highest premium on objectivity. Thus we embark, with every hope, on what can well be an historic mission; to lay the essential technical basis for the important decisions which lie ahead."

Professor Fyodorov said: "... Certainly, we are not supposed to take up the solution of the problem of cessation of tests. This is a matter to be solved by Governments. The Soviet Government has already set a noble example in this respect. Meeting the desire of the Western Powers, the experts of the Soviet side participate [in the Geneva conference] in the belief that this discussion must facilitate the cessation of test explosions on the part of the Western Powers as well...

"Formerly it was characteristic of scientists to be somewhat reserved and to keep aloof from problems of vital interest to society. But nowadays scientists of all countries grow ever more anxious, and are imbued with a sense of responsibility, for the way the results of their scientific achievements are applied in practice—that is, whether scientific and technical achievements will be used for the benefit or to the detriment of the people. We are sure that ... our colleagues from the U.S.A., Great Britain, France, and Canada will help us to find a common language to attain the object facing us"

The conference—which held most of its business meetings under the alternate chairmanship of Professor Fyodorov and Dr. Fisk, with Sir William Penney and Dr. Bacher presiding occasionally—decided that strict secrecy should be observed in its discussions and that nothing should be revealed except what was stated in the official communiqué issued after each day's session. Many scientific papers were read by delegates on both sides as well as by other U.S. and Soviet scientists. As a result of the discussions, communiqués were issued on various dates announcing that agreement had been reacched on the following questions:

(*a*) "The applicability of acoustic methods for the detection of nuclear explosions at a considerable distance, with a view to safeguarding the observation of an eventual agreement on the cessation of nuclear tests." The experts had accordingly agreed "to include the method of registration of acoustic (air and hydro acoustic) waves in the list of basic methods for the detection of nuclear explosions with the aid of a network of control posts." (July 10)

(*b*) "The applicability of the method of collecting radioactive products as a means of detecting and identifying nuclear explosions." The experts had accordingly recommended "the inclusion of the method of collecting samples of radioactive products in the list of basic methods for detecting and identifying nuclear tests." (July 23)

(*c*) "The applicability of the method of registration of seismic waves as a means of detecting nuclear explosions." It had accordingly been recommended to include "the method of registration of seismic waves in the list of basic methods for detecting and identifying nuclear tests." (July 24)

(*d*) "The applicability of the method of electromagnetic radiation given off by above-surface nuclear explosions in the form of radio waves and visible light" as a means of detecting such explosions, and the inclusion of this method among the basic methods for detecting and identifying nuclear tests. (July 25)

(*e*) "The problem of detecting nuclear explosions carried out at high altitudes," and the possibility of using for this purpose "the registration (i) of gamma radiation and neutrons, with properly instrumented earth satellites; (ii) of ionospheric phenomena, using appropriate radio techniques, and (iii) of light." (July 28).

(*f*) A control system combining the various methods of detecting violations of a possible agreement on the suspension of nuclear tests. (Aug. 19).

The conference ended on Aug. 21, when the following communiqué was issued stating that it was technically feasible to set up "a workable and effective control system for the detection of violations of a possible agreement on the world-wide cessation of nuclear weapons tests."

"... The conference came to the conclusion that the methods of detecting nuclear explosions available at the present time namely, the method of collecting samples of radio-active debris, the method of recording seismic, acoustic, and hydro-acoustic waves, and the radio-signal method, together with the use of on-site inspection of unidentified events which might be suspected of being nuclear explosions—make it possible, within certain specific limits, to detect and identify nuclear explosions, and it recommends the use of these methods in a control system.

"The conference noted that the combined use of the various methods considerably facilitates detection and identification of nuclear explosions. The conference noted that the effectiveness of the methods considered will increase in course of time with improvement of measuring techniques and with study of the characteristics of natural phenomena which cause interference when explosions are detected.

"The conference has adopted an agreed conclusion regarding the technical equipment of the control system necessary for the detection and identification of nuclear explosions. The conference reached the conclusion that it is technically feasible to set up ... a workable and effective control system for the detection of violations of a possible agreement on the world-wide cessation of nuclear weapons tests.

"It was established in this connexion that a network of control posts which were equipped with all the necessary apparatus appropriate to the various methods of detection of nuclear explosions should be disposed on continents and islands, as well as on a few ships in the oceans.

"The experts came to the conclusion that the control system should be under the direction of an international control organ which would ensure the co-ordination of the activities of the control system and the functioning of the system in such a way that it would satisfy the necessary technical requirements.

"On Aug. 21 the conference of experts adopted a final report for consideration by Governments. The report will be made public at a time to be determined by Governments."

In his final speech Dr. Fisk confirmed that the conference had reached a "common understanding" of the technical problems and a "significant measure of agreement"; he praised the "friendly and co-operative working relationships we have enjoyed with our colleagues on the other side of the table." Professor Fyodorov, in turn, declared that after lengthy arguments they had "always arrived at agreed conclusions," and that the basic conclusion to be drawn from the conference was "very simple and very clear" inasmuch as nuclear explosions, even of small magnitude, could be detected. He added: "No matter where a possible violator attempted to conceal his atomic explosion—under the water, under the earth, or in cosmic space 100,000 kilometres from our planet—he would nowhere be guaranteed against exposure."

The result of the conference, therefore, was that the experts had reached agreement (*a*) that it would be possible to detect nuclear explosions by registration of acoustic and seismic waves, collection of radioactive samples, and registration of high-altitude phenomena; and (*b*) that all these methods should be included in a control system. The success of the conference was warmly welcomed in London, Washington, and Moscow.

Anglo-American Offer of Conditional Suspension of Nuclear Tests. - British and American Statements.

The British and U.S. Governments announced on Aug. 22 that, in view of the results of the Geneva conference, they were prepared to suspend nuclear weapon tests for an initial period of one year, on condition (*a*) that the Soviet Union would not resume such tests in this period, and (*b*) that all Governments which had tested nuclear weapons would be prepared to open negotiations on an agreement for the complete suspension of tests under effective international control. Both Governments

would be ready to begin these negotiations on Oct. 31, 1958, and would be prepared to extend the suspension period from year to year provided the Soviet Union did the same, and provided that satisfactory progress had been made towards an effective international control system and the adoption and execution of real disarmament measures.

Statement by British Government.

The following statement was issued from Downing Street:

"H.M. Government have learnt that the conference of scientific experts at Geneva on the detection of nuclear weapon tests has reached a successful conclusion. This represents a new and hopeful development, and H.M. Government regard the outcome as a clear justification of the technical approach to problems of control and inspection in the field of disarmament which they themselves first proposed over a year ago. It is now established that effective international control over a suspension of nuclear weapons tests is technically possible. The report of the Geneva conference provides the essential technical basis on which to build further progress. The next task is to find solutions to the important practical and political problems relating to the organization, installation, and functioning of a control organization.

"H.M. Government are prepared to enter into negotiations with other Governments which have tested nuclear weapons with a view to solving these problems and concluding an agreement for the suspension of nuclear weapons tests under effective international control. H.M. Government, for their part, will be ready to begin negotiations for this purpose by Oct. 31, 1958.

"H.M. Government hope that such negotiations will not only lead to successful results in themselves but will also facilitate early negotiation on measures of disarmament. H.M. Government have always made it clear that they do not regard the suspension of nuclear tests as itself constituting a measure of disarmament. If peace and security are to be placed upon a firmer and more lasting foundation, early progress must be made towards real disarmament, both nuclear and conventional, by measures such as H.M. Government have themselves proposed. Any real disarmament must also be subject to effective international control, and H.M. Government hope that the precedent of expert discussion established by the Geneva conference may be followed in other fields.

"As is known, H.M Government are now beginning a short series of tests. This will be completed as soon as possible. In view of the opportunities for agreement now opened up, both on the controlled suspension of nuclear tests and on measures of real disarmament, H.M. Government will, from the date when negotiations are begun for the suspension of nuclear tests under effective international control, refrain from further testing of nuclear weapons for a period of one year. They will do so on the understanding that the object of the negotiations has been accepted in principle by all the Governments which have tested nuclear weapons, and so long as the Soviet Government does not resume testing in this period.

"H.M. Government will be prepared to refrain from nuclear tests thereafter for further successive periods of one year, provided that the Soviet Union will do the same and that satisfactory progress has been made towards . . . an effective system of international control over the suspension of nuclear tests, and towards the adoption and execution of measures of real disarmament."

Statement by President Eisenhower.

President Eisenhower's statement was worded as follows:

"The United States welcomes the successful conclusion of the Geneva meeting of experts who have been considering whether and how nuclear weapons tests could be detected. Their conclusions indicate that, if there were an agreement to eliminate such tests, its effective supervision and enforcement would be technically possible. This is a most important conclusion, the more so because it is concurred in by the experts of the Soviet Union.

"Progress in the field of disarmament depends upon the ability to establish effective international controls, and the willingness of the countries concerned to accept those controls. The fact, therefore, of an agreement on technical possibilities of inspection and control opens up a prospect of progress in the vitally important field of disarmament. The United States, taking account of the Geneva conclusions, is prepared to proceed promptly to negotiate an agreement with other nations which have tested nuclear weapons for the suspension of nuclear weapons tests, and the actual establishment of an international control system on the basis of the experts' report.

"If this is accepted in principle by the other nations which have tested nuclear weapons, then, in order to facilitate the detailed negotiations, the United States is prepared, unless testing is resumed by the Soviet Union, to withhold further testing on its part of atomic and hydrogen weapons for a period of one year from the beginning of the negotiations.

"As part of the agreement to be negotiated, and on a basis of reciprocity, the United States would be further prepared to suspend the testing of nuclear weapons on a year-by-year basis, subject to a determination at the beginning of each year (*a*) that the agreed inspection system is installed and working effectively; and (*b*) that satisfactory progress is being made in reaching agreement on and implementing major and substantial arms control measures such as the United States has long sought. The agreement should also deal with the problem of detonations for peaceful purposes, as distinct from weapons tests.

"Our negotiators will be instructed and ready by Oct. 31 this year to open negotiations with other similarly instructed negotiators. As the United States has frequently made clear, the suspension of testing of atomic and hydrogen weapons is not, in itself, a measure of disarmament or a limitation of armament. An agreement in this respect is significant if it leads to other and more substantial agreements relating to limitation and reduction of fissionable material for weapons and to other essential phases of disarmament. It is in this hope that the United States makes this proposal."

It was authoritatively stated that the French Government had previously been informed of the Anglo-American offer. At present Britain, the U.S.A., and the Soviet Union are the only countries which have tested nuclear weapons, but it is known that the French Government plans to explode its first nuclear bomb somewhere in the Sahara in the not far distant future.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Le Monde, Paris - Soviet Embassy Press Department, London - Polish Embassy Press Office, London - U.N. Information Centre, London) **(Prev. rep. 16140 B; 16125 A; Disarmament Negotiations, 15941 A.)**

A. UNITED KINGDOM. — Further Cut in Bank Rate. - Gold and Dollar Reserves in July.

The Bank Rate was reduced from 5 per cent to 4½ per cent on Aug. 14—the fourth reduction since it was raised to 7 per cent on Sept. 19, 1957. A Bank of England spokesman said that the reduction was "in step with recent credit relaxations" and was "justified by the internal trends and continued strength of sterling despite seasonal pressures." It would give "greater freedom of movement in either direction as circumstances may require."

It was pointed out in the Press that if the Middle East crisis had not intervened it was likely that Bank Rate would have been cut to 4½ per cent at an earlier date. With the atmosphere in the Middle East somewhat calmer, however, and with the pound maintaining a firm stand in the foreign exchange markets, the conditions for a reduction in Bank Rate had again been established.

The Treasury announced on Aug. 1 that the sterling area's gold and dollar reserves had risen during July by $8,000,000, after taking into account (*a*) the payment of $52,500,000 to the E.P.U. in respect of the U.K.'s deficit in June, and (*b*) the payment of $2,500,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $3,084,000,000 on July 31.

The July figures were officially regarded as very satisfactory, in view of the fact that the current payment surplus had been more than sufficient to overcome not only the normal seasonal strain but the abnormal factors superimposed by the Iraqi revolt. Thus the reserves had risen for the tenth consecutive month, in spite of (i) the early onset of seasonal pressure in the exchange market (caused by the customary fall in sterling area exports on the one hand and British tourist expenditure on the Continent on the other); (ii) the need to support the pound during the first few days of the Middle East crisis; and (iii) the payment to the E.P.U. arising from the June deficit.

Provisional figures for the E.P.U. July settlement showed that Britain had a deficit of £18,500,000, three-quarters of which would be settled in August in gold or dollars and one-quarter by an increase in the U.K.'s debt to the Union.

July opened with the sterling-dollar rate at 2.80\frac{7}{16}$; it reached its highest point on July 4-5 at 2.80\frac{3}{4}$, thereafter fluctuating around 2.80\frac{1}{2}$ owing to commercial buying of dollars. The revolt in Iraq and nervousness about the developments in Lebanon and Jordan, however, led to a fall, and on July 17 (after the despatch of British troops to Jordan) the rate dropped to $2.80. From July 18 onwards it steadily recovered, moving around 2.80$\frac{1}{2}$ for the rest of the month.

Transferable sterling in Zürich stood at 2.78325 on July 1, fell to 2.7790 on July 15, and reached its lowest point on July 17 at 2.76875 (the lowest since Sept. 26, 1957). Sharply recovering to 2.7780 on July 18, it fluctuated between 2.7760 and 2.78125 for the rest of the month. It was remarked in the Press that although the authorities in London had to intervene from time to time during the critical week in the Middle East, and although for a period the pound was at its support level against five Continental currencies, sterling had nevertheless stood up well to the trying conditions.

B. RELIGIOUS LIFE. — Church of England. - New Bishop of Bristol.

It was announced on Aug. 6 that the Queen had approved the appointment of Dr. Oliver Tomkins (50), Warden of Lincoln Theological College, as Bishop of Bristol in succession to Dr. F. A. Cockin, retiring.—(Church Times) **(16084 D.)**

C. BELGIUM. — Renaming of Colonial Ministry.

Under a decree signed by King Baudouin on Aug. 18, the Belgian Colonial Ministry was renamed the Ministry of the Belgian Congo and Ruanda-Urundi.—(La Nation Belge)

A. UNITED KINGDOM. — Parliamentary Debates on Middle East Crisis. - Government's Support for U.S. Action in Lebanon. - Labour Party opposes Despatch of British Troops to Jordan. - Speeches by Mr. Macmillan, Mr. Gaitskell, Mr. Selwyn Lloyd and Mr. Bevan.

The House of Commons held three debates on the Middle East crisis during the latter part of July—the first on July 16, in connexion with the U.S. landings in Lebanon ; the second on July 17, in connexion with the despatch of British forces to Jordan ; and the third on July 22, when a debate on foreign affairs was devoted entirely to the Middle East situation.

The news of the U.S. landings in Lebanon had been given to the House on July 15 by **Mr. Selwyn Lloyd.** In a brief statement, punctuated by Opposition cries of "shame" and "Suez," the Foreign Secretary said that H.M. Government had been informed in advance of the U.S. action ; that they believed that action to be necessary to preserve the independence and integrity of Lebanon ; and that the U S. action "has H.M. Government's full support." After **Mr. Aneurin Bevan** (the Labour spokesman on foreign affairs) had described the U.S. action as "very grave news indeed" and had asked a number of questions, **Mr. Hugh Gaitskell** (Leader of the Opposition) asked that the House should have an opportunity to debate the matter at the earliest possible moment. This was agreed to by **Mr. R. A. Butler** (Home Secretary and Lord Privy Seal), and the debate was accordingly held on the following day.

Debate on U.S. Landings in Lebanon.

The principal speakers in this debate were Mr. Selwyn Lloyd, Mr. Gaitskell, Mr. Bevan, and the Prime Minister. The Opposition, though strongly critical of the Government's support for the U.S. action in Lebanon, did not force a division—Mr. Gaitskell explaining that "although there are strong feelings on these benches, we have tried to exercise the greatest possible restraint and do not want disunity in the nation."

Mr. Selwyn Lloyd spoke as follows : ..." The situation which has given rise to the debate is the action by the U.S.A. in Lebanon, where there has been mounting tension for months, with subversive activity inspired from foreign sources. That tension increased as President Chamoun's term of office drew to an end, and the rebellion was sparked off by the murder of a newspaper editor early in May. The [British] Government are satisfied that, apart from the major foreign propaganda effort, there is substantial physical interference from outside, and that the rebellion is being supported, supplied, and directed from outside Lebanon. In those circumstances H.M. Government encouraged the Government of Lebanon to go to the Security Council as quickly as possible. That it did, and the Council passed its resolution.

"The U.N. operation could have been successful had it been possible for the observers to have adequate means of transport and communication to enable them to carry out the task. They were only in a position to observe a small fraction of the frontiers—about 18 km. out of 270 km.—and their report indicated the limitation on their capacity to inspect, particularly in the areas where infiltration was taking place ...

"The [Iraqi] events of July 14 completely changed the situation. It was absolutely clear, in the atmosphere after the *coup d'état* in Baghdad and the plots against Jordan, that a group of observers, operating in the manner I have described, could not guarantee the integrity and independence of Lebanon. President Chamoun made an urgent appeal for help and the United States took its decision, with which the Government entirely agrees. The reasoning behind the U.S. action appears clearly in President Eisenhower's statement [see page 16307] ...

"We have to face the fact that ... speed is of the essence in these matters. I do not believe that, had this appeal from the Lebanese Government been rejected, any small country would ever have felt again that their independence and integrity could be effectively protected ..."

After pointing out that much thought had been given to the question of oil supplies during the past 18 months, that the U.S. Government was "fully aware of the implications of the existing situation," and that the position of stocks and tanker tonnage available was "much better than two years ago," the Foreign Secretary continued :

"We have no quarrel with nationalism in the Middle East. We have done much to meet the aspirations of nationalism in many parts of the world ... It is suggested that in this area we only support reactionary régimes, whatever that may mean. So far as material developments are concerned, the achievements of the régime in Iraq were outstanding. It was the place where oil revenues were spent most wisely, and the statesmanship of the Iraqi leaders proved of great benefit to their people. Perhaps they failed in not making clearer to the people how much had been done for them. There were certain weaknesses perhaps in the way of urbanization, but the achievements of the Iraq Development Board were better than anything done in any other part of that area.

"So this is not a question of nationalism ; it is part of the hostile propaganda to say that this is all a question of the West against Arab nationalism. The question is one of perverting nationalist feelings and perverting those who wish to overthrow the established order of society so that they serve to further indirect aggression. The House has to face up to the problems involved in this indirect aggression. It has been discussed more than once at the United Nations ... Unless the answer is found, the independence and integrity of one small State after another is bound to be undermined and finally destroyed ..."

Mr. Selwyn Lloyd then announced his intention of flying to Washington on the same day for discussions with the U.S. Government on "the whole range of problems thrown up by this extremely grave situation" [see page 16343]. He concluded :

"I believe a country has the right to ask for help from other countries when it feels itself to be in danger. I believe a country has the right to ask for help against aggression, whether direct or indirect. I believe another Government has a right to respond to such a request, and that such a response is in accordance with the spirit of the Charter. I believe it is also in accordance with the established rules of international law. Unless countries are prepared to respond to such appeals for help, we shall see one country after another go down to this form of aggression ... The Government of Lebanon appealed to the U.S. Government for help. The U.S. Government decided to respond to that appeal. We have indicated our support for that action. I believe that decision will have the overwhelming approval of the people of this country."

Mr. Gaitskell said : "A new chapter in the stormy history of the Middle East has been opened. It is being written almost literally as we debate the problem this afternoon. We regard this debate not as the final debate to be held on this matter, but the first of what may have to be a series ... This afternoon we are concerned solely with the situation up to now, as it stands to-day.

"Even so, there is much uncertainty about what has happened and what is happening. The Security Council has not yet concluded its debate on the subject, and I freely admit that the precise significance of the American intervention in Lebanon is not yet quite clear. So for this reason, and despite the very grave interests and apprehension which exists on this side of the House about the action of the U.S. Government, and while I shall have some questions to ask and some criticisms to put forward, we do not intend to divide the House unless some new development occurs ... which causes us to reconsider the matter ...

"I would like to explain why in all sincerity we on these benches are very apprehensive about what has been done. I would like to consider the American decision and to examine the arguments adduced in support of it. The first argument is that it was done to protect American lives. I do not think any of us wish to challenge the right of a Government to protect its nationals ... but I am bound to point out that what is implied by that right is intervention to remove nationals from danger—a small-scale operation, an airlift maybe. I do not see how the landing of 5,000 marines can be justified on the grounds alone of being necessary to protect the lives of 2,500 Americans ...

"The second reason was to assist the Government of Lebanon to preserve its territorial integrity and political independence. The Foreign Secretary made some reference to the legal situation- to the right, or absence of right, of one nation to intervene with another at the invitation of a Government. In the short time available, I have done my best to study the international law on this subject, and it is not entirely clear.

"I would just say this in general terms. I would have thought that it was extremely important to be careful about what we say in this matter. There are Communist Governments in Eastern Europe. Any one of them may be faced with an internal revolution. I am not just speaking of Hungary. There might be in Poland such a revolution, and there might be a request from the constitutional Government—if that is the right word —of Poland asking for assistance from the Soviet Union. We must be very careful what we say in this matter, so as not to put ourselves in a position where we could not morally oppose intervention of that kind.

"One can scarcely ignore the past history of the Lebanon affair. The situation was already being handled by the Security Council, and I feel that some very special circumstances would have to justify immediate action, in advance of further consideration of this matter by the Security Council. It is common ground that after the observers' report there was considerable hope ... that the Lebanese would settle this quarrel themselves. The excuse put forward by the Foreign Secretary was the events in Iraq. I can only say that, disturbing as these events are, they have not, so far as I am aware, been accompanied or followed by any threat of armed aggression across the Lebanese frontier.

"It is not unreasonable to say that the intervention of the U.S. Government in advance of further consideration of the matter by the Security Council ... was certainly contrary to the kind of procedure the United States usually recommends in such cases. In Korea there was without question armed attack across the frontier. Immediate action, in my view and that of the then Government, was justified. The situation on the Lebanese-Syrian frontier is not the same as that.

"I would put our feelings far more on the basis of whether this action in the long run was really wise from the point of view of Western interests in the Middle East. I do not deny that in the short run the arrival of a powerful force of American marines in Lebanon will have a stabilizing effect ... But we would be deluding ourselves if we thought we could applaud, as it were, and say there is nothing further to worry about.

"In what circumstances is it contemplated that the Americans will withdraw ? When they withdraw, is it likely that they will be able to leave in power a secure, democratically elected, and pro-Western Government ? I am bound to say that I would have thought the prospect was a very dim one indeed.

"There is no use in ignoring the internal situation in Lebanon. I agree with the Foreign Secretary that there was no doubt infiltration of arms, and even armed bands – although there was no clear evidence on that subject. But even he would agree that, if we were to judge from most of the Press reports from Beirut, there was a considerable internal struggle quite apart from any external assistance or infiltration.

"Is not the intervention of American forces in Lebanon likely to strengthen still further the very powerful anti-Western feeling which exists in that part of the world? I do not see how out of this intervention we can reasonably hope for a more friendly and stable Lebanon to emerge.

"The anxieties of the Opposition go rather further than Lebanon. We are seriously worried about the possibility of American and even British intervention in Iraq and Jordan. If the Americans contemplate, with or without British assistance, putting troops into Jordan or Iraq, I cannot help feeling that the only way of making sense of such actions is that they were attempting to set up by force Governments friendly to the West. We should hesitate before committing ourselves to any such dangerous course of action.

"In the present circumstances, and for some time past now, we have acquired a reputation among the Arab peoples for being opponents of what is called Arab nationalism, and also for being opponents of social revolution. I think this reputation is one of the gravest disadvantages to us in contending with the threat of Communist propaganda in that part of the world.

"With respect to the Foreign Secretary, I cannot feel that his description of the matter was really completely accurate. I do not think we can ignore the fact . . . that when the Arabs speak of nationalism today, they do not mean so much the independence of individual countries; what they mean is being able to come together in Arab unity. That is a fact of which we are bound to take very serious note this great explosive force of Pan-Arabism.

"I say categorically that I do not see that we can reach any ultimate solution in the Middle East unless we are prepared to come to terms with the Pan-Arab movement. That is easy to say. It is much more difficult to see exactly how we can do it. We have certain obligations in the Middle East. We have the obligation, that any Government has, to protect British lives if they are in danger; the protection of British lives might require some intervention, but that is of a very different kind from the large-scale intervention we are discussing this afternoon. We have certain treaty obligations against external aggression. Whether that is still true of Iraq it is difficult to say, but it is no longer true of Jordan because they denounced the treaty with us themselves. What I do say, with all the emphasis I can command, is that these treaty obligations cannot be extended so as to protect a particular Government from internal revolution. I do not see that you can justify the use of a treaty for that purpose.

"Whatever might be the evidence for external aggression in Lebanon, I have not heard so far, apart from propaganda, anything to justify intervention. I have not heard either that in Iraq or Jordan there is any evidence of external aggression or intervention with armed forces. I must say, on this question of whether or not we are to intervene, that the Government must not assume that the Opposition could support or acquiesce in the use of British forces to aid the Government of Jordan to suppress a revolution in Iraq . . .

"I do not want to raise it as a threat or a bogey, but there is the possibility of Soviet intervention. We can only hope that that will not eventuate. Even at this stage, if the United Nations would take over police functions in the Lebanon, and the U.S. forces were withdrawn, we might yet be able to do what I believe to be eventually essential—to come to terms with Arab nationalism. But if we attempt by force to impose our will on the Middle East to re-establish a system of government which might have been possible, even justifiable, in the 19th century, but which in modern conditions seems to us utterly inappropriate and profoundly dangerous, I can only say, God help us all!

"I hope the Government will respond to the spirit in which I have tried to express our fears. Although there are strong feelings on these benches, we have tried to exercise the greatest possible restraint. We do not want disunity in the nation on this great issue. I hope it will be possible to preserve unity."

Among the many speakers in the ensuing debate were Viscount Hinchingbrooke (C.), Mr. Desmond Donnelly (Lab.), Sir Robert Boothby (C.), Mr. Antony Head (C.), Mr. Grimond (the Liberal leader), Colonel Banks (Ind.), Mr. Richard Crossman (Lab.), Mr. Francis Noel-Baker (Lab.) and Mr. Hugh Fraser (C.).

Viscount Hinchingbrooke said that the Middle East had become the scene of three conflicting forces—international Communism, aggressive nationalism, and "dollar doctrine and diplomacy." Britain, which belonged to none of these forces, could play the part of an intermediary in the Middle East between the United States and the Soviet Union. At the same time she should point out to the Americans the dangers of further intervention, and try to dissuade them from "further enterprises across the Arabian peninsula."

Mr. Donnelly agreed that there was no parallel between the U.S. action in Lebanon and the action taken in the Suez crisis; he maintained, however, that it was no defence to take the law into one's own hands, however laudable the intention. If Britain became involved militarily in Jordan or Iraq, the country would be bitterly divided and political feeling would be aroused comparable to that at the time of Suez.

Sir Robert Boothby said that while U.S. intervention in Lebanon was inevitable and necessary, Britain should think "long and seriously" before attempting military intervention in either Jordan or Iraq. Unless the Western democracies could work better together than in the last five years, they would lose the struggle against Communism through their own disruption. "We go on squalling and fighting among ourselves," Sir Robert declared, "and agreeing about nothing. How can we survive in this struggle unless we can devise not only a common policy but an instrument to carry it out?"

Mr. Head (a former Secretary of State for War) said that various young countries aspiring to independence and nationhood had disappeared one by one into the Communist fold during the past 12 years. Historians of the future, looking back at these years, would find inexplicable the failure of the West to realize some form of collective defence outside Europe. He believed that, given "four more days at the end of Suez," the present situation would never have arisen.

Mr. Grimond believed that good might come out of the intervention in Lebanon if the West was prepared to couple with it a declaration of policy in the Middle East. It should be made clear that the West was not in Lebanon because it opposed Arab unity. Furthermore, it would be "most unwise" to send troops to Jordan or Iraq unless to defend the frontiers of those countries or to protect British nationals.

Colonel Banks, who had just returned from a visit to Lebanon, expressed the view that 35 per cent of the population of Beirut were behind the rebel cause and two-thirds of the population in the countryside were "behind the people who wanted to change the Government."

Mr. Noel-Baker felt that U.S. intervention in Lebanon, and possible British intervention in Jordan or Iraq, would deal a "shattering blow" to the prestige and effectiveness of the United Nations." He asked the Government for an assurance that British troops would not be used in any part of the Middle East except as part of a U.N. contingent acting under the authority of the United Nations.

Mr. Crossman believed that 95 per cent of the population in countries outside the North Atlantic area would regard the landing of troops in Lebanon as an example of "brutal Western imperialism." After warning the Government that the only justification for sending British troops to Jordan would be the protection of the lives of British nationals, he added: "Our one chance in the Middle East is to offer to the Arab world the one thing every Arab wants—that is, not to be on either side. Their basic desire is to see us at home and to sell us their oil at the highest price. But we have one moral responsibility, and that is to Israel. We must make it clear that if we withdraw militarily from the Middle East we are committed to the defence of Israel."

Mr. Fraser said that Opposition speeches seemed to be based on the illusion that there were democratic organizations in the Middle East willing to assume democratic power as it was known in the West. The fact, however, was that "Arab unity" was a dictatorship based on Cairo; the action taken by the United States was absolutely right, and the British Government should be prepared to go to the help of Jordan if such help were requested.

The debate was wound up for the Opposition by Mr. Aneurin Bevan.

Mr. Bevan said that the post-war Labour Government's decision to grant independence to India, Pakistan and Ceylon had had the result of building up a strong bulwark against Communism in Southern Asia. Similar experiments in Ghana and Nigeria showed that Britain had the sagacity to accommodate herself to the rise of nationalism in Africa. After commenting that no such sagacity had been shown with respect to the Middle East, Mr. Bevan added: "The Soviet Union is not responsible for stimulating the national ambitions of the Arab peoples. It may be seeking to benefit by them, but it is not the author of them. They are, in fact, spontaneous products of the peculiar historical situation now existing there, and we have to accommodate ourselves to that."

Mr. Bevan suggested that one of the reasons for the difficulties in the Middle East was that large sums of money, coming from the West in the form of oil royalties, were calling into existence a bourgeoisie with which the rulers would not share their power. The merchants and educated classes of the Sheikhdoms, Iraq, and other places were not permitted to form normal constitutional governments and were therefore driven to revolution. After declaring that "the existence of opulent luxury in the midst of unendurable poverty cannot provide stability for the Middle East," he continued:

"We have never tried at all to solve these problems by diplomacy. My main charge against the Government is that they have always sat back until trouble has arrived and then tried to deal with it empirically. They have never realized that there cannot be peace in the Middle East while there are poor non-oil States and opulent oil States . . . Our main interest is to get oil from the Middle East at a reasonable price. But it was the lesson of Suez that oil cannot be obtained peacefully, in sufficient quantity, and smoothly, from the Middle East without the ready co-operation, not only of Middle Eastern Governments, but of Middle Eastern peoples. You can have a friendly Government in Baghdad, Persia, Kuwait, or Saudi Arabia, but unless that Government is not only friendly but also rests on the loyal support of its own people, we cannot be sure of the oil, because the capacities for sabotage are infinite. Therefore we must not only have governments which are in friendly relationships, but we must have people who are prepared to be friends; and that means we must work out policies that the Middle East peoples can subscribe to."

As regards the Lebanese situation, Mr. Bevan maintained that there had been no serious attempt to overthrow President Chamoun from outside, and that there was no connexion or link between the Lebanese rebellion and the Iraqi insurrection. President Chamoun, with "60 per cent of the population against him and the Army not with him," had nevertheless been able to withstand infiltration from outside. The only conclusion to be reached was that the presence of U.S. marines was not due to any developments in Lebanon but to deal with the situation in Iraq.

"I hope," Mr. Bevan concluded, "that the Prime Minister has sent the Foreign Secretary to Washington with a message to the President of the United States that we cannot go it with the Americans in military adventure in the Middle East. I hope he will prevail on them not to be too repentant of their virtue in 1956. I am convinced that what they did then in the Middle East gave the United Nations an important reinforcement of strength. I believe it is our duty to try to use that organization to the utmost; I am certain it is in the best interests of Britain to restore our relations with the Arab nations on a permanent and friendly footing."

The debate was wound up by the Prime Minister, who emphasized that the Government had kept the Commonwealth Prime Ministers fully informed of all major developments in the Middle East during recent weeks.

Mr. Macmillan said: "I must express my gratitude to Mr. Gaitskell for the tone and temper of his speech. I feel sure his decision not to divide the House is a wise one . . . I do not quite see the relevance of Mr. Bevan's observations. He spoke as if we were governing these countries and as if we had refused them their independence . . .

"The decision of the American Government can be examined from two main points of view—whether it was legally and morally justified, and whether on the whole balance of considerations it was wise and prudent. I do not think there is anything legally improper for a nation either faced with actual aggression from outside, or with internal disturbances supported from outside, to ask for help. There seems to be nothing in the U.N. Charter which forbids such action. It seems to me that the legitimate Government of a friendly State has the right to ask for help. There is no doubt from the legal point of view that neither the American assistance nor any other assistance that might be given can be regarded as illegal. Still less, in my view at any rate, can it be regarded as immoral. There has been—it cannot be seriously disputed—subversion, foreign intervention, and a whole campaign organized from outside on a large scale. This is supported by evidence in our possession, for which I must ask the House to take my assurance. I am stating what I believe to be true . . ."

As regards the spread of Pan-Arabism, on which Mr. Gaitskell had laid emphasis, Mr. Macmillan asked what would happen if Iraq, Jordan, Lebanon, and ultimately the Persian Gulf Sheikhdoms were brought voluntarily or involuntarily within the ambit of Pan-Arab imperialism. What would be the future of the Sudan, Libya, and other parts of Africa, and what would be the effect on Persia, Turkey, and Pakistan? Such nationalist movements had their good side and might be the instruments of legitimate ambition; but they could also be used for subversion, and ultimately fall into Communist hands.

"To sum up," Mr. Macmillan concluded, "I think . . . there is a general understanding of the difficulties ahead of us, and a general wish that . . . we should not add to the problems of the nation by a divided Parliament. I say that we can make two claims: that we have the sympathy and understanding even of members who do not altogether approve our decisions, and that both the motives of the United States in taking the action which they have done, and the decision of H.M. Government in giving it full support, are understood and will be supported by the whole nation."

Debate on Despatch of British Troops to Jordan. - Labour Party opposes Government's Decision.

A hastily-arranged debate was held on July 17 as a result of the Government's decision to despatch British forces to Jordan in response to the appeal by King Hussein. In a preliminary statement to the House, Mr. Macmillan explained that "within a matter of minutes" after the ending of the previous day's debate he had received a telegram from the British Chargé d'Affaires in Amman containing a request from King Hussein and the Jordanian Prime Minister for the immediate despatch of British forces. Mr. Macmillan continued:

"In making this request, the King and the Prime Minister said that Jordan was faced with an imminent attempt by the United Arab Republic to create internal disorder and to overthrow the present régime, on the pattern of recent events in Iraq. They went on to say that Jordan's territorial integrity was threatened by the movement of Syrian forces towards her northern frontier and by infiltration of arms across it. They had information that a coup organized by the U.A.R. would be attempted today. I asked the Cabinet to meet late last night to consider this request.

"From our own sources we had received up-to-date intelligence which clearly showed that the apprehensions of the Jordan Government were well founded, and that an attempt was indeed being organized for today. The Government accordingly decided to accede to the request, and British forces are being sent by air to Jordan from Cyprus. The purpose of this military assistance is to stabilize the situation in Jordan by helping the Jordanian Government to resist aggression and threats to the integrity and independence of their country . . . The Jordan Government have made a similar request for help to the U.S. Government, who are considering it urgently in the light of their other commitments in the area.

"H.M. Government's decision was taken after full consultation with the U.S. Government, and our action has the full support and approval of the U.S. Government. The decision of H.M. Government is being reported to the United Nations. We are making it clear to the U.N. that if arrangements can be made by the Security Council to protect the lawful Government of Jordan from the external threat and so maintain international peace and security, the action which we have taken will be brought to an end. We have informed the other Commonwealth countries, and also the North Atlantic Council, of the action we have taken and the reasons which have led to the Government's decision."

In opening the debate, the Prime Minister said that he had hoped on the previous evening that the situation in Jordan, critical and threatening though it appeared, could be held stable for a further period which would have at least allowed the Foreign Secretary to complete his consultations in Washington; events, however, had moved too fast.

Mr. Macmillan continued: "I will tell the House exactly what happened. It was only five minutes before I ended my speech in the debate last night that my private secretary was told that an urgent telegram had arrived from Amman. A copy of it, decoded and in manuscript, was given to me as I was about to go home. This was the first I heard of the appeal for help.

"I immediately summoned a Cabinet meeting . . . The Chiefs of Staff and the Service Ministers were present, and our final conclusions were reached after a discussion of nearly three hours, during which there were some adjournments and I had to make two communications by telephone to Washington."

After announcing that some 2,000 men of the Parachute Brigade were being flown to Jordan, the Prime Minister went on: "Legally there could be no doubt that the Government were absolutely justified in acceding to the Jordanian request. Morally they were bound in honour to go to the help of a small friendly country which they had helped so much in the past. The situations in Lebanon and in Jordan were similar, although not identical. In both cases legitimate friendly Governments requested military assistance from their friends to enable them to preserve their independence and integrity. In each case these small countries were threatened with an aggression organized from outside and from the same source . . .

"What was different in Lebanon was that subversive forces had brought about a situation approaching civil war, whereas in Jordan the atmosphere was outwardly calm. In Lebanon the situation had already been brought to the notice of the U.N., whose observer groups were in position; but in Jordan no such appeal had been made. The threat to the Lebanon was imminent and growing, but perhaps somewhat of a general character. In Jordan there was precise information of a definite plot whose foreign authors had ordered it into operation today. This was the information which the Jordanian Government communicated to Britain last night, and of which the Government had independent corroboration from various sources.

"When I told the House yesterday that we had evidence of subversion and foreign intervention in Lebanon, I asked the House to accept my word. The information we had has been largely confirmed by a broadcast from Baghdad Radio announcing the revolution in Jordan. This is what it said: 'A revolution has started in Iraq and one in Lebanon, and tomorrow another revolution will start in Jordan.' It was in the light of this that we had to make our decision last night. What were we to do? Appeal to the United Nations? That would not have stopped a plot so confidently predicted by Baghdad Radio. Shrugged our shoulders and passed by, saying 'It is not our affair'?

"An appeal is being made to the United Nations by the Jordan Government asking the [Security] Council immediately to consider a complaint by . . . Jordan of interference in its domestic affairs by the United Arab Republic. We, in a similar manner to that adopted by our American allies after taking emergency action, are reporting our action to the U.N., suggesting proposals for the future. On moral grounds it seems to me that the position is absolutely clear, and I hope it will be accepted by the House. Whatever criticism may be made against our action, I do not believe that it could be held to be either illegal or dishonourable.

"The difficulties are very great in these decisions. The difficulty is not a moral or a legal one; it is a practical one. The House will understand the military difficulties of sending troops to the aid of a country which has no port immediately accessible and then supplying them when they are there. There was also the obvious doubt, to which Members drew attention yesterday, about what the future would hold. The arguments of convenience in favour of doing nothing were certainly very strong. Some Members took the view that military action may produce a temporary advantage but would in the long run be sterile or even positively harmful. But the immediate result of refusing this request may well have been the overthrow of another small independent country, in addition to the melancholy list of such States which have suffered this fate in our lifetime.

"With the end of Jordanian independence, what other countries in the Arab world could have maintained their freedom? I don't believe that Members on either side of the House really wish to see a

dictatorship in the name of Arab nationalism stretching across the broad lands of the Middle East. To preserve Jordanian independence is perhaps a limited objective, but there is reason to hope that by achieving this aim we may at least reassure other independent Arab countries.

"In making this decision, the Government were heartened by the assurances I received last night from the U.S. Secretary of State, who assured us that the action we were contemplating would have the full moral support of the United States. Furthermore, the U.S.A. undertook, as an earnest of their good will and to assist the Jordanian Government to combat aggression, to send today a reconnaissance flight over Jordan to precede the landing of our troops . . .

"It may be asked—and of course it is a question which I and my colleagues had to ask ourselves in whose interests we were intervening. It may be said that this revolutionary movement should be allowed to take over Jordan, as well as Iraq and perhaps other States, one after the other, and then make terms with it. That is the question which we examined fully yesterday. It is a question of which is the prudent course, and the wise one.

"The arguments for standing aside and doing nothing would be different if this movement were for genuine, popular, and constitutional change. But this is not a genuine evolutionary change. It is part of the pattern of conspiracy and subversion of which we have not only evidence but, in territories in which we are responsible, actual experience. What the future will be I cannot tell, but I think it could not be worse than if we had just stood aside and hoped for the best. We must face the problem as a practical one and as a moral one. It is not right to abandon one's friends in time of trouble. It is not right to turn a blind eye to the fate of independent nations, however small they may be.

"Of course, we would have been far better pleased if all this could be left as perhaps it may ultimately end, we trust -to the protecting hand of the United Nations. That indeed was the original concept of the Security Council, with its Military Committee and forces at its command, when it was planned to be the instrument for preserving the peace of the world and preventing this kind of thing from happening. But, alas, as things now are, this is the problem which presents itself and which we have to face. If we or other countries do not immediately act, then it may well be that the U.N. can only act too late . . ."

Turning to the position of the Arab Union between Iraq and Jordan, Mr. Macmillan said: "I should make it clear that it is to the Kingdom of Jordan that we are sending our help in this time of need. The Leader of the Opposition warned me very fairly yesterday that I could not assume that the Opposition would support the despatch of British forces to Jordan to suppress a revolt in Iraq. This is certainly not the purpose of the small force we have sent. It may be argued that by helping at the centre, Jordanian forces may be released for operations further afield. I can only reply that, whatever the future may bring, I think Members should have regard to the logistical and practical implications involved.

"Our purpose is a simple one and a clear one; to prevent this system of conspiracy and aggression from involving Jordanian territory, and to stop it from such successes. In making their request, the Jordanian King and Government said they had no intention that British troops should be used to release Jordanian forces to attack Iraq. That obligation remains with them, and it is upon that basis that we have decided to send our help.

"I have tried to give the House a clear picture of why we acted as we did when we took this decision in the early hours of this morning. It is the most difficult decision I, personally, ever remember having to take or be associated with. I do not know whether we shall succeed in our limited objective. I cannot predict the future course of events. All the same, I believe we had no option in what we have done, and I am confident in the moral justification of our action. I believe the House and the country will endorse it."

The Leader of the Opposition, who followed, said that the House was confronted with a much graver situation than existed on the previous day, for three reasons: (1) intervention by Western forces had been extended to Jordan; (2) British troops had become involved; and (3) there had been a reaction from the Soviet Union.

Mr. Gaitskell said that a good case could no doubt be made for the right of a Government to go to the assistance of another Government which believed itself threatened with internal subversion or external aggression. There might also be circumstances in which, in the event of an armed attack, it was right for allies of the country attacked to go to its aid before the matter reached the Security Council. He had serious doubts, however, whether Article 51 of the U.N. Charter [providing for the right of self-defence or collective defence against armed attack] could legitimately be invoked in the present case. Mr. Gaitskell continued:

"If other Governments in other circumstances are to treat the obligation of prior reference to the Security Council, except in the case of armed attack, as a matter of no importance, it seriously undermines the whole basis of the Charter and the idea of international law and order. Was it necessary that before the complaint by Jordan had been considered by the Security Council, the Government felt so compelled to take action? . . .

"The Prime Minister referred to the aim of preventing something from happening in Jordan which had happened in Iraq. What happened in Iraq was that the army took control and made a revolution. The basic fact was the inability of the Iraqi Government to rely on its army. Are we to understand that it was the belief of the British Government that King Hussein could not rely on his army? If he could rely on it, was the danger of a coup so urgent that we had, in advance of the Security Council discussion, to send our forces in? If it was so urgent because the King could not rely on his army, are we not involving ourselves in a dangerous position? . . .

"The Government of Jordan is not a democratic Government. It is a form of dictatorship. At the moment it is friendly to us because it feels threatened. Not long ago it was not so friendly. It bundled us out and denounced the [Anglo-Jordanian] Treaty. On available evidence, it is hard to believe it was necessary to send troops in before there was any visible sign of attack across the frontier. It is not so much the legality of the decision we question as the wisdom . . . We are sending our forces to an area with which there is no clear line of communication. The only direct contact is by air . . ."

After raising the question of overflying by British planes across Israel, and asking what the position was in this matter, Mr. Gaitskell continued: "Is it contemplated that our forces will stay indefinitely in this bridgehead where they have been sent to preserve the existing Government of Jordan? Is it contemplated that we should have so stabilized the position that it would be possible to withdraw them? Does the Government imagine that we shall be able to withdraw, leaving behind a stable, democratic, pro-Western Government in Jordan? I find it hard to imagine that such a prospect is in any way real if we confine our activities to Jordan alone . . . Suppose King Hussein decides to advance into Iraq; is it suggested that we could then withdraw our troops? . . ."

Referring to the Pan-Arab movement, Mr. Gaitskell said: "Whatever may be said against the methods adopted by the revolutionaries, none of us can deny that no other movement in the Arab countries commands any popular support whatever. I wish it were not so, but I do not think one can dismiss the activities of the revolutionaries as a kind of artificial intervention in the affairs of the Arab States. We have to recognize the strong desire of these Arab peoples for unity. I do not believe this necessarily involves the domination of a dictator. That remains to be seen; but that this tremendous desire and force exists, and is a real factor in the situation, cannot be denied."

Mr. Gaitskell continued: "The attitude of the Soviet Union cannot be ignored. They have made a declaration in fairly general terms that they cannot be indifferent to what is taking place. Soviet manoeuvres on the Persian frontier have been announced . . . The Prime Minister may be right in saying that it is a temptation to do nothing, but it can be a temptation to act too soon and too precipitously. As the days go by and the danger of a clash between Jordanian and Iraqi forces, and beyond them Western and Russian forces, advances, I beg the Government to pause and consider seriously even now whether it would not be better to try to talk to the Soviet Union about this situation. I know it may be said we will get nothing out of it; but if I am in any way right, if the danger exists, it is so colossal that we dare not avoid any possibility of averting it.

"I know these matters are being considered by the Security Council, but I do not believe these discussions are enough. More than ever now some kind of summit conference is needed. I ask the Government to consider this and bear it in mind in the coming days.

"I have tried, as yesterday, to put our apprehensions soberly and calmly. Believe me, they are very real and what has happened in the last 24 hours has caused us very grave concern. We gave our warnings yesterday. We expressed our fears, and it seems to us that those fears to some extent are already justified. For those reasons we regard this latest move of the Government, however sincerely taken, as fraught with the gravest risks both to our own interests and the peace of the world."

Speakers in the brief ensuing debate included Sir Charles Mott-Radclyffe (C.), Mr. Sydney Silverman (Lab.), Mr. Anthony Wedgwood Benn (Lab.) and Major Legge-Bourke (C.).

Sir Charles Mott-Radclyffe pointed out that Israel would have been completely isolated if the revolt in Jordan had succeeded; he added that he could not see the logic of the Opposition's argument that Pan-Arabism was "all right provided it is led by Nasser but all wrong if it is led by King Hussein." **Mr. Silverman** described the Anglo-American actions in Lebanon and Jordan as "almost lunatic in their irresponsibility," while **Mr. Wedgwood Benn** said that the long-term effect of sending British troops to Amman would be the exacerbation of Arab feelings against the West, the strengthening of the Arab nationalist movement, and the strengthening of the Communist position in that part of the world. **Major Legge-Bourke** said that what Britain, the U.S.A., and the free world were doing was to ensure that both the Arab States and Israel would live at peace in the future; they would not do so for long unless those who were friendly to the West were given some encouragement.

Mr. Aneurin Bevan, who followed, strongly criticized the despatch of British troops to Amman, describing Jordan as a "kept country" and King Hussein as a "kept king."

Mr. Bevan said: "... Here is a revolution started from outside surreptitiously, organized clandestinely, and then announced over the radio. Having been given notice that it was going to happen, King Hussein is such a popular monarch that he cannot deal with it. It is a grotesque situation. Are we to conclude that the King of Jordan is in such a weak position that, although he is told beforehand that there is going to be an uprising in his country, his own forces are inadequate to deal with it. There is no evidence here of outside intervention, unless by 'outside' is meant Baghdad . . .

"Why should the lives of British soldiers be risked in Jordan to maintain King Hussein on his throne against the wishes of his own people? We cannot have it said that we are putting people into the Army, Navy and Air Force to intervene gratuitously in various parts of the world where we are asked to send our boys to support some tottering government or some ancient throne. It was only two years ago that Hussein asked us to leave because our absence would strengthen him. The fact of the matter is that Jordan is a kept country and King Hussein is a kept king, and has been kept for many years. Now that a revolution has occurred in Baghdad, his resources have been cut off, and therefore no-one would be surprised if he found there was a reason for us to go back again . . .

"We consider our troops have been placed in unnecessary jeopardy, that the interests of the people of Britain will not be served by what the Government have done, and that they may have taken a long step towards plunging this country into war. In circumstances of that sort, it is impossible for the Opposition to do any other than its duty and ask the House to divide."

The final speech was made by the Prime Minister, who replied to the debate.

Mr. Macmillan replied as follows to Mr. Gaitskell's question about British overflying over Israel: "In view of the urgency, a small advance party was dispatched from Cyprus as soon as possible after the Government's decision was taken. It was landed in Jordan after obtaining clearance to fly over Israel territory from the local air-control authority. For the main body of the force, permission to fly over the territory was obtained at governmental level. It is true that the Israeli Government thought it right to register a complaint about the clearance of the small party without complete governmental authority, but the same letter conveyed its permission without any qualification."

The Prime Minister continued: "At the end of his speech Mr. Gaitskell made some suggestions in a very helpful spirit, to which I will try to make some provisional reply. I do not myself believe that anything that has happened has reduced the possibilities of trying to get some kind of agreement with the Soviet authorities. It certainly has not reduced my wish to have a summit meeting on the lines I have so often explained—reasonably prepared, and likely to be effective in at least some measure; and I must candidly add that I do not think that anything that has happened will make it less likely that we shall be able to achieve this purpose.

"In all the speeches, especially by the Leader of the Opposition, stress has been laid on the dangers of the action taken by the Government. Of course there are dangers in this action. If there were not, it would not have been so difficult to make this decision. But I would deny that this is in itself a reason why we should not have taken it, because in all these matters we have to weigh one set of dangers against another. I am bound to say that I thought Mr. Gaitskell and some others addressed themselves to the dangers that would result from our action, and not sufficiently to the dangers which would result from doing nothing. There would be dangers—and this impresses me most—in letting things slide; and, many think—for we cannot altogether disregard it—the danger of dishonour in not acceding to this request.

"Mr. Gaitskell does not wish to divide the nation, and the debates have been so conducted as to achieve that purpose in the main. But if we do not wish to divide the nation, why is it necessary to divide the House? Yesterday the Opposition did not divide the House when the United States took action in parallel, though not identical, circumstances in Lebanon, with the full support of Britain. Today it is thought necessary to divide the House when it is our own country which has acted with the full support of the United States. May I ask this question: if it is not right to vote against America, why is it right to vote against Britain?"

The Opposition forced a division on the motion for the adjournment (on which the debate was held) to signify their disapproval of the Government's action in sending forces to Jordan; the Government's policy was upheld by 314 votes to 251, five Liberals voting with the Opposition. Mr. George Brown, the Opposition front-bench spokesman on defence matters, abstained from voting, while two other Labour members—Mr. Christopher Boyd and Mr. Leslie Lever—also abstained under the party's "conscience" clause. Unlike Mr. Boyd and Mr. Lever, Mr. Brown had not previously informed the party Whips of his intention to abstain.

At a meeting of the Parliamentary Committee of the Labour Party, held on July 21, Mr. Brown made a personal statement on the reasons which had led him to abstain from voting after the debate of July 17; it was understood that he had offered to resign from the "Shadow Cabinet" but that his colleagues had unanimously declined to accept this offer. A statement was issued saying that note had been taken of the circumstances in which Mr. Brown had felt it necessary to abstain, and of "the fact that this action had been influenced by Mr. Brown's personal knowledge of many of the personalities who had been killed in the recent happenings in Iraq." [Mr. Brown had lately visited Iraq and was personally acquainted with General Nuri es-Said and other members of the former régime assassinated during the uprising.]

It was also believed that Mr. Brown had abstained from voting in view of his position as prospective Defence Minister in a Labour Government. The Political Correspondent of *The Times* commented in this connexion: "Any study of his views on defence and foreign affairs shows that he would be among the first to recognize the dangers of creating the impression that Britain is reluctant to go to the aid of friendly Powers who ask for help in emergency; and he would clearly be anxious that the party, or he himself, should be careful not to spread doubts about the firmness with which any Labour Government would act in support of Britain's allies and friends."

Debate of July 22. - Mr. Bevan's Four Points for Middle East Settlement. - Labour Agreement with Government's Approach to Middle East Situation.

The foreign affairs debate of July 22 was opened by the Foreign Secretary, who gave an *exposé* of the latest developments in the Middle East since the two previous debates of July 16-17.

Mr. Selwyn Lloyd said that he had discussed the Middle East situation during the past few days with Mr. Dulles, Dr. Sidney Smith (the Canadian Minister of External Affairs), and the U.N. Secretary-General during his recent visit to the United States. As regards Lebanon, he believed that that country's future position could be safeguarded by some special international status under U.N. auspices, with the consent of the Lebanese people. In Jordan, where the position was "quiet but tense," the first purpose of the British intervention—that of foiling a *coup d'état* organized from outside—had been successful. Britain's representative on the Security Council had made it clear that British forces would be withdrawn from Jordan if and when effective arrangements could be made by the U.N. to protect that country from any external threat and to preserve its territorial integrity and independence.

Referring to the Iraqi revolution, Mr. Selwyn Lloyd explained that he had not previously made reference to the deaths of King Faisal, Crown Prince Abdul Ilah, and General Nuri es-Said because there was not sufficient certainty about the fate that had befallen them; he now did so with great regret. "King Faisal," said the Foreign Secretary, "was educated here and had shown, in addition to a singular charm in manner, great capacity. He was devoted to the welfare of his people, and would have been a great ruler had he lived. King Faisal's uncle [Prince Abdul Ilah] was always a staunch friend of this country. He cared above all that his nephew should be a worthy king, and that was his abiding interest. Nuri es-Said was a great Arab patriot and nationalist. His part in the Arab revolt in the First World War is well known. It was falsely said of him that he was a servant of the British. That was absolute nonsense, because anyone who knew him was aware of his robust independence and his determination to get what he thought was best for Iraq. This country has lost three trusted friends, and I wish to put on record our profound sense of loss and deep regret for the manner in which they appear to have met their deaths."

Speaking of the correspondence between M. Khrushchev and the Western Heads of Government (see 16341 A), Mr. Selwyn Lloyd said that there were great advantages in the procedure whereby the projected summit conference on the Middle East would be held at the Security Council. [The Foreign Secretary's statement was made before M. Khrushchev's retraction of his previous agreement that such a meeting should take place within the Security Council.] Whatever might be said about a four-Power or five-Power approach, it was "quite unrealistic" to think that a Middle East settlement could be secured outside the United Nations; this was particularly the case since the U.N. already had a significant role in the area with regard to the Arab-Israel armistice agreements, the U.N. Relief and Works Agency, the U.N. Emergency Force at Gaza, and the U.N. Observation Group in Lebanon.

Mr. Aneurin Bevan said that the policy now decided upon by the Government would be supported in all parts of the House.

Mr. Bevan said that the Opposition entirely agreed with Mr. Selwyn Lloyd that the U.N. provided excellent machinery for both formal and informal "summit" discussions, and it sincerely hoped that M. Khrushchev would accept the invitation to a meeting of Heads of Government at the Security Council. It was "rather unfortunate that M. Khrushchev surrounded his [own] invitation with a little too much invective," but that was "a Russian habit, sometimes imitated elsewhere." The Opposition earnestly hoped that Russia would not veto the proposal to strengthen the U.N. Observation Group on Lebanon. With regard to Jordan, it was "an impeccable decision to invite the U.N. in to enable us to get out."

Mr. Bevan went on to enunciate four principles which, in the Opposition's opinion, could form a basis for a settlement of all the problems of the Middle East:

(1) Agreement between the great Powers that the Arab States should form an area in which they would not seek military allies or foster the formation of military blocs.

(2) A guarantee that the existing frontiers of States in the area, including Israel, should not be altered except by mutual consent, including an undertaking to go immediately to the defence of any State faced with armed aggression.

(3) A willingness to facilitate the coming together, by peaceful negotiation, of any Arab States wishing to do so.

(4) The setting-up of an economic commission, preferably under the United Nations, with sufficient finance to assist any scheme for the economic advancement of the area as a whole, or any part of it.

After debate, Commander Noble (Minister of State, Foreign Office) wound up with a speech in which he pointed out that Mr. Bevan's "four principles" could all usefully be discussed at the projected summit meeting at the Security Council. (Times - Daily Telegraph - Manchester Guardian)

A. NORTH ATLANTIC TREATY ORGANIZATION - JAPAN. — Relaxation of Embargo on Trade with Soviet-bloc Countries and Communist China. - Maintenance of U.S. Ban on China Trade.

Major relaxations in the embargo on exports to Soviet-bloc countries and Communist China were announced in Paris, London, and the other capitals concerned on Aug. 14, with effect from Aug. 15. The announcement followed five months of negotiations in Paris by "Cocom"—the co-ordinating committee of the Consultative Group in Paris dealing with exports by its member-States to countries of the Soviet bloc and Communist China, and comprising all the member-countries of NATO except Iceland, as well as Japan. The recommendations of "Cocom" were considered at a meeting of the Consultative Group in Paris on July 18-19, and the Group's conclusions were subsequently reported to member-Governments, who agreed to the proposed relaxations.

The agreement involved the following changes: (i) the first list on which the embargo was based, consisting of "strategic items" whose export was absolutely forbidden, was reduced from 181 items to 118—a large number of goods being freed but a small number added, while the remaining items were more closely re-defined; (ii) the second list, which laid down quantitative restrictions for the export of 25 items, was abolished; (iii) the "watching" list, details of which are not published, was retained.

The categories of goods freed for export to the Soviet bloc and China under the revised strategic embargo list were:

Aircraft and aero-engines in normal civil use; vertical boring and turning mills; horizontal boring, drilling, and milling machines; jig-boring and jig-grinding machines with no traverse exceeding 44 inches; contour profile grinders; lap radio grinders; roll-grinding machines; thread-grinding machines.

Most lathes (except certain lathes for making gas-turbine blades, and spinning lathes); thread-milling machines; planing machines and planing millers; forging hammers up to 10 tons (except certain counterblow hammers and horizontal impact hammers); forging machines; presses (mechanical or hydraulic) up to 5,000 tons; most gear-making machinery; most vacuum pumps.

Oil-well drilling and exploration equipment (except rotary rock drills); all equipment for the production of lubricants; all petroleum refinery equipment and petro-chemical plant; all electrical generating machinery (except mobile generators of more than 5,000 kw.); all electrical motors except those specially designed for submarines; all turbines.

Carbon-black furnaces; the smaller types of rolling-mill; radio valve-making machinery (except certain advanced types); most types of compressors and blowers.

Industrial diamonds and diamond tools; floating docks; tankers designed for speeds of up to 18 knots; fishing vessels up to 17 knots; other vessels up to 20 knots; all vehicles except those built to military specifications.

Spectrographs and spectrometers (except mass spectrographs and mass spectrometers); X-ray diffraction and electron diffraction equipment; electron microscopes; almost all industrial types of ball- and roller-bearings.

Aluminium, all forms; copper, all forms; gasolene and kerosene (except jet-engine fuel); lubricating oils and greases (petroleum-based); glycols and their derivatives; methyl methacrylate ("perspex"); and all tyres for civilian use.

Goods newly added to the embargo list were:

Machines incorporating electronic closed loop feed-back controls.

Chemicals and plant: Containers including mobile units of 500 gallons capacity or over for storage or transport of the liquified gases argon, helium, hydrogen, nitrogen, oxygen, and ozone; equipment specially designed for purification and processing of germanium and silicon; electric furnaces specially designed for recovery of titanium or zirconium from scrap; plant for production of zirconium metal and parts.

Electronics: Capacitors, tantalum electrolytic; communication equipment employing tropospheric or meteoric scatter phenomena and parts.

Components electronic not specified capable of reliable performance in relation to electrical and mechanical characteristics; equipment designed to provide secrecy facilities on voice or telegraph line or radio-communication circuits, except frequency inversions or band-scrambling techniques; materials designed and manufactured as absorbers of electro-magnetic waves with specified frequencies.

Sir David Eccles (President of the U.K. Board of Trade) explained at a press conference in London that the new embargo list consisted entirely of strictly strategic items. Although it was not possible to estimate how much the trade between Britain and the Soviet bloc and China would increase as a result of the changes, the revision of the embargo list represented a real chance for British exporters.

Sir David pointed out that among the items taken off were many of great interest to industry, such as civil aircraft and aero-engines; as a result, the aircraft industry was now free to offer such planes as *Viscounts* to any Eastern country. Moreover, almost all vehicles were also freed from restriction, and there had been very large changes in machine-tools, electrical machinery, diesel engines, and ships. He added that there had been "sharp arguments" between the "Cocom" experts on definitions, but stressed that "we and America and the others moved to this conclusion in complete agreement."

Replying to questions, Sir David said that although there had been allegations about previous infringements of the embargo, there had never been any evidence. Asked whether the embargo list had achieved anything in the past 10 years, he replied in the affirmative; he added, however, that the British Government had been "in the forefront of those who felt for some time that there were nonsenses on the list which ought to come off," and that "palpably out-of-date items made it difficult to get respect for sensible items."

The British Admiralty issued a statement on the same day outlining the position as regards ships.

It said that the new rules provided that ships which could in general now be built for, or sold second-hand to, the Soviet bloc were passenger and cargo ships of up to 20 knots, tankers up to and including 18 knots, and fishing vessels up to 17 knots. The statement added:

"There are, however, certain exceptions covering the installation or retention in ships of equipment which is banned in its own right, and of arrangements for demagnetization. Warships, whether or not converted to non-military use, certain large ice-breakers, and non-magnetic ships continue to be banned completely. The building of ships will continue to need a licence from the Admiralty and the sale of second-hand ships to the [Soviet] bloc will continue to need the sanction of the Minister of Transport and Civil Aviation."

The new list applies to the Soviet Union, Albania, Bulgaria, Communist China, Czechoslovakia, Hungary, North Korea, North Vietnam, Poland, Rumania, the Soviet zone of Germany, and Tibet.

It was announced in Washington, however, that while agreeing to the revision of the embargo in respect of trade with the U.S.S.R. and other Soviet-bloc countries, the United States would maintain the complete embargo on all U.S. trade with Communist China, North Korea, and North Vietnam.—(Times - Daily Telegraph - Manchester Guardian - Board of Trade Journal - New York Times - N.Y. Herald Tribune - Le Monde, Paris) **(Prev. rep. 15948 B.)**

Note. A survey of U.K. trade with Eastern Europe and China, published in the *Board of Trade Journal* of Aug. 15, showed that Western Europe's trade with Eastern markets had more than doubled since 1950, and that the U.K. had shared in this expansion. Britain's share in East-West trade reached £214,000,000 in 1957—£124,000,000 worth of imports and £90,000,000 in exports, including re-exports; these figures compared with imports of £73,000,000 and exports of £35,000,000 in 1950. Nevertheless, the 1957 figures accounted for less than 3 per cent of Britain's total foreign trade, compared with about 7 per cent in the immediate pre-war years.

Over one-half of Britain's East-West trade in 1957 was conducted with the Soviet Union (£122,000,000, against £48,000,000 in 1950). Nevertheless, the possibilities indicated by the Soviet purchasing programme announced in 1956 [see 14833 A], when Soviet leaders had spoken of the possibility of an increase of up to 400 per cent in their purchases from Britain by 1960, had not so far been realized.

British trade with China in 1957 amounted to £26,400,000, compared with £23,000,000 in 1956 and £20,200,000 in 1955; during the first six months of 1958 U.K. exports to China reached £7,000,000, compared with £4,300,000 during the first half of 1957.

(Board of Trade Journal)

B. GHANA. — Establishment of Ghana Airways.

An agreement between the Government of Ghana and the British Overseas Airways Corporation was signed in Accra on July 4 for the establishment of Ghana Airways, a new airline to operate domestic, regional, and international services. By arrangement between B.O.A.C. and Ghana Airways, aircraft chartered from the corporation will be employed on international routes.

Of Ghana Airways' nominal capital of £400,000, the Government of Ghana have subscribed £240,000 (60 per cent) and BOAC the remaining 40 per cent (£160,000). The airline will be controlled by a board consisting of a chairman and two directors appointed by the Ghana Government, and two directors appointed by BOAC (Lord Rennell and Mr. Basil Bampfylde). Training of Ghanaian nationals to take over the management, administrative, flying, and engineering sides of the airline will be undertaken initially by BOAC; however, a number of Europeans employed by BOAC will be seconded to the new airline.

Ghana Airways opened its international services on July 16 with a once-weekly Stratocruiser service to London.—(Times)

C. IRAQ. — Dutch Recognition of Iraqi Republic.

It was announced in The Hague on Aug. 12 that the Netherlands Government had recognized the Iraq Republic. (Algemeen Handelsblad, Amsterdam) **(Prev. rep. 16324 D.)**

A. MALTA. — Resignation of Mintoff Government. - Dr. Olivier declines to form Nationalist Cabinet. - Governor's Assumption of Governmental Responsibility. - Proclamation of State of Emergency. - Proposed Transfer of Dockyard to Civilian Management.

The Prime Minister of Malta, Mr. Mintoff, and his Cabinet tendered their resignations on April 21 to the Governor, Sir Robert Laycock. The resignations were accompanied by a declaration signed by the 23 Labour members of the Legislative Assembly which stated that they would support only a Labour Government.

Mr. Mintoff's action marked the climax of the lengthy negotiations between the Maltese and British Governments on Malta's future constitutional status and the amount of British financial aid to the island.

Mr. Mintoff, in a broadcast on April 21, described the crisis as "the hour of trial" and said that he and his colleagues were faced "not only with a financial problem but also with another, more serious matter—whether we are so cowardly as to allow the British Government to ride roughshod over us and, without consulting us, decide on the treatment to be meted out." Accusing the British Government of "broken promises," he said that of the £5,000,000 promised as financial aid (see 16121 A) Britain was "not prepared to let us have more than £1,000,000 for the first three months," and had insisted on approving each item of expenditure involved. On the issue of constitutional development, he declared that "the U.K. Government are in fact telling us that they will remain in Malta as long as they please, and that they will make use of Malta in any way they deem fit . . . In these circumstances my colleagues and I no longer want to remain responsible for public peace and order."

Mr. Lennox-Boyd, the U.K. Colonial Secretary, told the House of Commons on April 22 that although Mr. Mintoff and his colleagues had tendered their resignations, they would continue in office pending consultations about forming an alternative government. Mr. James Griffiths (Labour) advocated an all-party effort to reach a solution in Malta rather than allow events to lead on to an "embittered" election; but Mr. Lennox-Boyd, who denied that the issue of financial aid was the true cause of Mr. Mintoff's resignation, expressed the view that "the constitutional processes should work themselves out."

Dr. Borg Olivier, leader of the Nationalist Party and former Prime Minister of Malta, declined a request by the Governor to form a new Government, on the grounds that he could not do so without a popular mandate; on April 24, therefore, the Governor accepted the resignation of the Mintoff Cabinet and assumed direct responsibility for the administration of the island, including control of the Civil Service (see below).

Disturbances in Valletta. - Dispute between Mr. Mintoff and Sir Robert Laycock. - Ban on Demonstrations and Public Meetings. - Proclamation of State of Emergency.

Mr. Mintoff's decision to submit his Government's resignation was followed by some minor incidents outside the Governor's palace; as a precaution, Valletta was placed out of bounds for all British servicemen and their families on April 22. Barriers were erected by the police for the protection of various buildings, and warning notices, signed by the Commissioner of Police (Mr. Vivian De Gray), were posted saying that any demonstration crossing the barriers would constitute "an unlawful assembly." Disorderly demonstrations by crowds of dockyard workers and young people nevertheless took place during the evening of April 23, first outside the offices of the *Times of Malta* (the organ of the Progressive Constitutional Party led by Miss Mabel Strickland, who is editress of the newspaper) and later near the Government buildings, leading to police action with a view to dispersing demonstrators who had tried to break through the barriers.

At the height of the demonstrations Mr. Mintoff—in his capacity as Minister in charge of police—ordered the Police Commissioner to withdraw all mounted police within three minutes and to prevent any further baton charges. When Mr. De Gray reported these instructions by telephone to the Governor, the latter countermanded Mr. Mintoff's orders, insisting that this was a matter of public safety for which he (the Governor) was constitutionally responsible.

On the following day (April 24) Mr. Mintoff issued an order for Mr. De Gray's dismissal, but the Governor refused to sign it. At a subsequent two-hour meeting between the Governor and the Cabinet, Mr. Mintoff declined to give assurances that law and order would be maintained. As the Governor would not accede to the financial conditions put forward by the Ministers as a condition of their remaining in office, he accepted their resignations. By this time the Governor had received the Queen's assent to his request for the suspension of Section II of the Royal instructions requiring him to act on the advice of the Maltese Ministers except in "reserved fields." The same evening Sir Robert Laycock issued two proclamations under the Public Meetings Ordinance prohibiting all demonstrations and public meetings in Valletta and Floriana until May 8. [The General Workers' Union had planned to hold a mass meeting at Floriana on April 25.]

On April 25 the Governor received the general secretary of the G.W.U. (Mr. R. G. Miller) and two other trade union leaders; after consultation with the Police Commissioner, he agreed that the rally organized for Floriana might take place at Hamrun provided there was no demonstration or incitement to disorder. The mass meeting was duly held without incident, and a resolution was passed calling for a one-day general strike on April 28. On April 27, however, there were hostile demonstrations against the police by spectators at a football match in Valletta's Empire Stadium, where several people were injured.

The general strike, which was fully observed on April 28, was marked by several acts of violence, despite a previous warning by the Governor that any disorders would be "firmly dealt with."

Incidents included the setting on fire of a small Royal Navy tug, stoning of police officers and soldiers, damage to four police stations and two Army vehicles, and the cutting of Rediffusion (broadcast relay) cables and telephone wires. The Police Commissioner later announced that charges would be preferred against 25 youths and men who had been arrested in connexion with the disorders, and that 20 members of the police force had been injured making a total of 45 police officers injured since April 21.

As a result of the disturbances, the Governor issued two further proclamations in the evening of April 28 extending the ban on meetings and demonstrations to the whole of Malta and Gozo for a period of three months. On the following day (April 29) he proclaimed a state of emergency as "a purely precautionary measure" designed to give him and the police additional powers in case of need.

Addressing a joint rally of the Labour Party and the G.W.U. in Valletta on May 1, Mr. Mintoff called for "calm and order" to test the Governor's "promise" to consider withdrawal of the recent proclamations and to hold elections. Mr. Mintoff made it clear, however, that any such elections would only be acceptable to the Malta Labour Party if held under a new draft constitution whereby there would be no "Imperial Government side" in Malta; he also emphasized that "either we get integration with all the rights enjoyed by the British, or we will seek independence." Referring to the disturbances of April 28, Mr. Mintoff accused the Governor of acting wrongly in assuming responsibility for law and order when Ministers of the Maltese Government were still in office; he also strongly attacked Mr. De Gray for approaching the Governor without his (Mr. Mintoff's) knowledge.

Two Ministers of Mr. Mintoff's former Cabinet, Miss Agatha Barbara (Education) and Dr. Albert Hyzler (Health) were arrested on May 19 on charges of intimidation arising out of incidents during the general strike. They were both found guilty and sentenced to 32 days' imprisonment on June 13.

It was announced on Aug. 7 that the ban on public meetings (which had been extended for a further month on July 27) would be lifted on Aug. 18, except in Valletta and Floriana.

Further Political Developments.

Mr. Lennox-Boyd assured the House of Commons on April 29 that a Maltese general election would take place in the normal course of affairs, but said that "there were bound to be delays" as long as the present disturbances continued. Mr. Callaghan (Lab.) had expressed fears that the banning of public meetings in Malta might delay election preparations.

On May 5 Dr. Borg Olivier discussed with the Governor the existing state of emergency, his party's proposals for constitutional change, and the possibility of an early general election, which he was confident his party would win. He stated afterwards that it would be sufficient if the Nationalists increased their present number of seats from 17 (out of a total of 40) to 21, and added: "Mr. Mintoff has failed in his integration proposals and resorted to tactics which the Maltese people cannot understand or approve . . . With the [election] result in our favour, I am sure the British Government will be ready to think very seriously about our proposals for Dominion status within the Commonwealth." On June 9 the Nationalist Party issued a memorandum for transmission to Mr. Lennox-Boyd asserting that Malta was "racing towards a chasm of hunger and despair" and urging immediate and adequate financial aid from Britain, without which "generosity" it would be "impossible to save Anglo-Maltese relations from disruption."

Sir Paul Boffa—a former Prime Minister and Labour leader, who retired from public life in 1955—announced on June 9 that his Workers' Party intended to contest the next general election.

Sir Robert Laycock arrived in London on May 29 for talks with Mr. Lennox-Boyd on Malta's constitutional and economic problems. On July 31 the Colonial Secretary announced that, because of the conflicting attitudes adopted by the Maltese political parties on the issue of whether new elections should be held under the 1947 Constitution, he and the Governor were

agreed in proposing to invite the parties to talks on future constitutional arrangements next November. He also announced that the Queen had approved an extension of Sir Robert Laycock's term of office as Governor of Malta (due to end on Sept. 19, 1958) until the spring of 1959.

New Maltese Commissioner-General in London.

Colonel Victor G. Vella (Secretary to the Maltese Imperial Government) left Valletta for London on June 22 to take over the post of Commissioner-General for Malta in the U.K. in succession to Mr. Edward Ellul, who had resigned on June 9.

Mr. Ellul had been appointed by Mr. Mintoff, and his functions had included certain propaganda activities. After assuming full Governmental responsibility, Sir Robert Laycock had told Mr. Ellul that the new situation required that the post of Commissioner-General should be non-political, though he was quite willing for Mr. Ellul to continue in office on that understanding; this, however, Mr. Ellul was not prepared to do.

Relations between Government and Roman Catholic Church.

Mr. Mintoff had issued a statement on April 21 (before delivering his broadcast of the same date - see above) in which he announced the restoration of good relations between the Government of Malta and the Roman Catholic Church.

The statement added: "The Government firmly believes that . . . mutual understanding between the Government and the ecclesiastical authorities, for whom the Government has every respect, is indispensable for the welfare of the Maltese people." In acknowledgment, the Archbishop of Malta (Mgr. Gonzi) stated on behalf of himself and the Bishop of Gozo that "as a result of the negotiations that have taken place, and after the declaration made by the Prime Minister, good relations between the Government and the Church have been restored."

These statements followed the return by the Government to St. John's Cathedral of two Caravaggio paintings which, after being cleaned and restored in Italy, had been retained by the Government for exhibition in the local museum, against the Archbishop's wishes.

Proposed Conversion of Dockyard to Civilian Use.

Mr. Lennox-Boyd announced in the House of Commons on July 31, 1958, that the Royal Naval Dockyard at Malta would be converted to commercial use. This would be the basis of H.M. Government's plan for the restoration of the island's economy, which, together with the political issue, had been the main subject of prolonged discussion with Sir Robert Laycock during the latter's visit to London. Details of the scheme were as follows:

(1) Messrs. C. H. Bailey Ltd. (a South Wales ship-repairing firm) would form a company registered in Malta to take over the dockyard on a long lease. They would begin preparations at once, and should assume full responsibility "some time in 1959." The transfer would be accomplished in two "phases": during the first, the Admiralty would retain control of the dockyard while representatives of the firm became acquainted with the processes of management; in the second (i.e. during 1959) Messrs. Bailey would assume full control.

(2) The capital cost of converting and re-equipping the dockyard had been estimated in the region of £5,500,000, of which the British Government was prepared to provide £4,750,000 - partly in the form of a debenture and partly as a special grant. The balance of £750,000 would be put up by Messrs. Bailey in association with the Colonial Development Corporation and Maltese interests.

(3) The Admiralty had agreed to release Vice-Admiral Sir Gordon Hubback (Fourth Sea Lord and formerly Commodore Superintendent at Malta) to become managing director of the new undertaking.

(4) While Naval repair work was expected to decline to about 30 per cent of its present level after 1960, owing to changes in the structure of defence, the British Government undertook to ensure that the number of persons employed in the Malta Dockyard and Naval Base (at present 13,000-13,500) did not fall below 12,000. It was planned that those who unavoidably became unemployed should be absorbed in the commercial ship-repair work and secondary industries which would be provided by the new company.

(5) The British Naval Base (as distinct from the Dockyard) would remain in being, and even after 1960 the Dockyard itself would be available to the Royal Navy in an emergency.

Asked by Mr. Dugdale (Lab.) to what extent the Colonial Development Corporation would be in partnership with private firms, Mr. Lennox-Boyd said that "it looked as though there would be Maltese participation as well," since the banking family of Tarragani (of the National Bank of Malta) and the Maltese bank agents, Messrs. Pace, had undertaken to be associated with the new company (in which they would be able to buy shares) subject to the conclusion of a satisfactory agreement.

The Lieutenant-Governor of Malta (Mr. Trafford Smith) announced on Aug. 4 that discussions on the transfer of the Dockyard on lease to Messrs. Bailey had reached "agreement in principle." The Admiral Superintendent of the Dockyard (Admiral Lee Barber) stated on the same day that Messrs. Bailey aimed to absorb 6,800 men working in the Dockyard itself, while the Admiralty would employ 5,200—"with gradual reductions."

The British plan for the commercialization of the Dockyard was criticized both by the Malta Labour Party and the Nationalist Party, though for different reasons, but was welcomed by the Progressive Constitutional Party.

Mr. Mintoff announced at a public meeting on Aug. 23 that the Malta Labour Party would ask "both workers and capitalists" not to co-operate with Messrs. Bailey. He contended that 6,300 workers would find themselves discharged as a result of the proposed transfer, adding that if Messrs. Bailey would not work with the M.L.P. to provide alternative employment, "they would soon find themselves out of Malta." He also threatened that if the British Government did not guarantee alternative employment, his party "would go to anyone, even President Nasser."

Before accepting the British transfer proposals, Mr. Mintoff continued, his party wished to contact all nations seeking dock facilities (including Italy, Belgium, and Norway, who had already shown interest) and discuss what they were prepared to offer; he would also correspond with the U.N. on the matter, since he had been assured by the Colonial Secretary that foreign firms would not be excluded from negotiations provided they belonged to NATO. Finally, he protested against an alleged statement by the Governor that Maltese political parties would be consulted on the constitutional but not the economic issues of the island's future, claiming that he (Mr. Mintoff) had been assured by the Admiralty in 1957 that the Maltese Government would be consulted before the future of the Dockyard was determined.

Nationalist Party criticism of the Colonial Office for not consulting the people of Malta before embarking on the new project was expressed by their official organ, *Il Popolo*, which declared on Aug. 10 that it was "not just or democratic for the British Government to carry out plans and decide on their own."

Miss Mabel Strickland (leader of the Progressive Constitutional Party) welcomed the plan as an indication that "Britain was fulfilling her moral obligations towards Malta by remaining in the Mediterranean and helping the Maltese to overcome the economic consequences of her new defence policy." In a subsequent statement she accused Mr. Mintoff of "shouting to destroy Bailey's before Bailey's was born."

The secretary of Messrs. Bailey (Mr. J. W. Dalgliesh) arrived at Valletta on Aug. 10 with a number of engineering experts for a preliminary survey; he explained that one of the main objects of their visit concerned the setting-up of ancillary dockyard industries, and that the company aimed at making Malta "the workshop of the Mediterranean."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 16121 A.)**

A. SOUTH AFRICA. — Death of Mr. Strydom. - Mr. Swart becomes Acting Prime Minister.

Mr. Johannes Gerhardus Strydom, Prime Minister of South Africa and leader of the Nationalist Party, died in a Cape Town hospital on Aug. 24 after a prolonged illness, aged 65. The fifth Prime Minister of the Union, he had held the Premiership since the retirement of Dr. Malan in November 1954, and was returned to power with an increased majority at the recent general elections (see 16169 A). Biographical details of Mr. Strydom's life and career are given on page 13941, second column.

Mr. Strydom, who had been in ill-health for the past two years, entered hospital at the end of July suffering from a heart disease which had necessitated a prolonged period of rest earlier in the year. His condition became aggravated in mid-August, when embolism of the lung developed.

Only three days before Mr. Strydom's death, the Minister of Justice (Mr. C. R. Swart) announced that he had been appointed acting Prime Minister by the Governor-General in view of the serious condition of Mr. Strydom. Following the death of Mr. Strydom, the Union Parliament adjourned on Aug. 25 until Sept. 3, after tributes to the late Prime Minister had been paid by Government and Opposition leaders. It was understood that before that date the Nationalist Party caucus would elect a successor to Mr. Strydom as Prime Minister and party leader. (Cape Times - State Information Office, Pretoria)

B. UNITED STATES. — Mr. Arthur Miller acquitted of Contempt of Congress. - Court Ruling.

Mr. Arthur Miller's conviction for contempt of Congress was quashed on Aug. 7 by unanimous decision of the U.S. Court of Appeals for the District of Columbia, which ordered Mr. Miller's acquittal. The Court found that the House Committee on Un-American Activities had not sufficiently warned Mr. Miller of the risk of contempt if he refused to answer its questions; in this connexion it cited a Supreme Court ruling of 1955 that a contempt conviction could not stand if the witness had not been clearly warned of the possible penalty for refusing to answer questions put to him by a Congressional committee.—(New York Times) **(15938 B.)**

A. UNITED KINGDOM. — Royal Navy. - Aircraft Carrier "Warrior" sold to Argentina. - Disposal of 85 Further Warships. - Select Committee's Criticism of Ship-disposal Methods.

The Earl of Selkirk (First Lord of the Admiralty) announced in the House of Lords on June 25 that, following its earlier decision to dispose of the aircraft carriers *Ocean*, *Theseus*, *Glory*, *Perseus*, and *Unicorn* (sec 16077 A), the Admiralty had also decided to place the carrier *Warrior* (14,000 tons) on the sale list.

In reply to Earl Howe, who asked whether the six ships could not be treated as emergency transports, Lord Selkirk explained that they had all been laid down before or during the war and had not subsequently been brought up to date to meet modern requirements. The *Warrior* had been partially modernized, but the Admiralty were willing to sell her as she was surplus to immediate requirements; the other ships, unless they could otherwise be disposed of, would be scrapped. He added: "These ships and their equipment would be expensive to modernize, and the large sums needed to maintain ships in reserve in a reasonable degree of readiness would be better spent in keeping ships in the Active Fleet. This particularly applies to aircraft carriers, which are useless if they cannot keep pace with the development in aircraft."

The Admiralty announced on July 7 that the *Warrior* had been sold to Argentina; the purchase price was stated in the Press to be "between £1,000,000 and £2,000,000."

The Parliamentary Secretary to the Admiralty (Mr. R. A. Allan) informed the House of Commons on July 9 that it had been decided to dispose of a further 85 ships of various sizes during 1958. The list comprised five cruisers, seven destroyers, 33 frigates, nine ocean minesweepers, and 31 fast patrol boats and motor-, gun-, or torpedo-boats. All were of pre-war or wartime construction except for 18 patrol boats.

Mr. Allan added that during 1958 and 1959 two aircraft carriers, 13 destroyers or frigates, 16 minesweepers, 17 miscellaneous craft, and a number of submarines would come into service, either as new ships or after complete modernization.

A debate on naval policy had previously taken place in the House of Lords on June 11.

Viscount Alexander of Hillsborough (Leader of the Opposition and a former First Lord of the Admiralty) complained that the Government were placing "far too much reliance on the hydrogen bomb" and that, under Treasury pressure, the Royal Navy was being cut to an extent which made it impossible for it to carry out its proper duties. On the other hand the U.S.S.R. was steadily building up its navy, and was stated to have 37 modern cruisers against Britain's 18, 155 destroyers against 26 British destroyers in commission and 30 in reserve, and 300-400 submarines compared with Britain's 50-60. He asked what had become of the *Dreadnought*, the projected British nuclear-powered submarine.

Lord Selkirk, in reply, said that the Government's policy was to see that the Royal Navy maintained close association with the Commonwealth, U.S., and NATO navies, and with other nations through the Baghdad Pact and SEATO. Admittedly the reduced size of the Royal Navy was causing some anxiety, but it should be remembered that the U.S.A.—the strongest of Britain's allies—had the largest navy the world had ever seen. Moreover, the combined operational fleets of Britain and the Commonwealth possessed six aircraft carriers, 11 cruisers, and 120 destroyers and frigates—a force roughly comparable with the pre-war strength of the Royal Navy. The Admiralty believed that aircraft carriers, destroyers, frigates and submarines were of better value in modern war than the old cruisers, and that in a global war there would not be time to bring out the reserve ships which were not in the highest state of readiness.

Nuclear submarines (the First Lord continued) would present an entirely new problem to anti-submarine forces, as they would certainly have an underwater speed of 25-30 knots, making them extremely difficult to destroy from ordinary surface vessels; for the first time destroyers would no longer have the wide margin of speed which had been an essential part of submarine-hunting. Considerable progress had been made with the British nuclear submarine, but it was clear that the numerous difficulties still confronting the designers would be rapidly overcome if it were possible to obtain a set of machinery from the U.S.A., which already had several nuclear submarines in commission. The Government had therefore applied to the U.S.A. for approval of the purchase of one nuclear propulsion unit from an American firm.

In the ensuing debate **Lord Howe** suggested that instead of scrapping good ships, Britain should arrange for Commonwealth countries to take them into reserve on a care and maintenance basis. **Lord Winster** (a First Lord of the Admiralty in the Labour Government) urged the Government to press ahead with nuclear submarines able to launch rockets and guided missiles, whilst **Lord Cilcennin** (First Lord of the Admiralty under Sir Winston Churchill) stressed that in a future war the submarine threat to merchant shipping would not be confined to the Atlantic alone, but would be spread over the entire globe. **Admiral of the Fleet Viscount Cunningham** expressed the view that the naval forces of the Western Powers would be "quite inadequate" to meet the danger from the "enormous" Russian submarine fleet.

Strong criticism of the management of the Reserve Fleet and of the methods used for the sale and scrapping of Royal Navy ships was made by the Select Committee on Estimates in a report published on Aug. 8.

The report explained that the Reserve Fleet consisted of (*a*) the operational reserve—high priority ships maintained ready for active service; (*b*) the supplementary reserve, consisting of lower-priority ships; (*c*) the extended reserve—low-priority ships, de-stored and partially de-equipped, including vessels for sale or scrapping. The Select Committee considered that while class (*a*) ships should receive "the highest consideration in manpower and money," class (*b*) should be reduced and class (*c*) be confined to ships definitely intended to be sold or scrapped. In this connexion, it recommended that the battleship H.M.S. *Vanguard* [completed in 1946 at a cost of £9,000,000 excluding her heavy guns, and now used as Reserve Fleet H.Q. and for training] should be disposed of unless a "positive function" could be found for her.

The Select Committee also recommended:

(1) The concentration of the Reserve Fleet in fewer ports (having due regard to security needs), thus saving maintenance costs.

(2) A joint inquiry by the Admiralty, the Treasury, and the Foreign Office into the procedure for disposing of surplus vessels, including the work of naval attachés overseas in promoting sales. The Select Committee thought that the prices fixed by the Naval Arms Disposal Committee for obsolete vessels were not flexible enough and that more "export salesmanship" was needed.

(3) Direct dealings between the Admiralty and the agents of the British Iron and Steel Corporation in the disposal of ships for scrap, instead of dealings through the Ministry of Power as at present. The Select Committee believed that this would make the Admiralty "more conscious of the value of the decaying vessels on its hands" and lead to quicker decisions. The "profits" on scrapping should be received by the Admiralty as Appropriations in Aid.

(4) Scrapping of the "unsaleable residuum" of ships in the extended reserve as "so much dead wood," thus producing an immediate income instead of "the present continuing cost for maintenance and supervision."

The decision to sell the *Warrior* left the Royal Navy with eight aircraft carriers, including the 22,000-ton *Hermes* (to be commissioned shortly) and the 14,000-ton *Magnificent*, at present in the extended reserve. In addition, the uncompleted *Leviathan* (on which work was stopped in 1946) is in reserve at Portsmouth.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 16077 A.)**

B. SHIPPING. — International Convention for the Prevention of Sea Pollution by Oil in Force.

The International Convention for the Prevention of Pollution of the Sea by Oil (see 13598 C) came into force on July 26, 1958, twelve months after it had been ratified by France, the tenth nation to do so. Two days earlier the Netherlands ratification of the Convention had been announced, bringing the number of ratifying countries to 11 (in chronological order of ratification): Britain, Mexico, Sweden, Western Germany, Denmark, Canada, Norway, Irish Republic, Belgium, France, and the Netherlands.

Mr. James Callaghan, M.P., chairman of the British Co-ordinating Advisory Committee on Oil Pollution, stated on July 24 that about one-half of the world's tanker tonnage was now covered by the Convention; the most important of the countries which had not yet ratified was the United States. (Lloyd's List and Shipping Gazette) **(Prev. rep. 13598 C.)**

C. SPAIN. — Associated Membership of O.E.E.C.

An agreement admitting Spain to associate membership of the Organization for European Economic Co-operation was signed in Paris on Jan. 10 and ratified by the Spanish Cabinet on Feb. 7, 1958. Previously Spain had only been a member of the Ministerial Committee for Agriculture and Food, but her associate membership of the Organization had been recommended by the O.E.E.C. Council in September 1957. As an associate member Spain will be able to take part in the work of all committees, but will have no voting rights in the O.E.E.C. Council. A decree ratifying Spain's associate membership of the O.E.E.C. was published in the *Boletín Oficial* on July 12. (O.E.E.C. Information Division, Paris - Bank of London and South America, Fortnightly Review) **(Prev. rep. 14086 A.)**

D. AUSTRALIA. — Forthcoming General Election.

The Federal Prime Minister, Mr. Menzies, announced in the House of Representatives on Aug. 20 that general elections would be held on Nov. 22. Parliament would be dissolved on Oct. 14 and writs for the election would be issued on Oct. 22.

The Liberal-Country Party coalition government holds 75 full voting seats in the present House of Representatives, and the Labour Opposition 47. The Opposition also holds the Australian Capital Territory and Northern Territory seats, but the members for these constituencies can only vote on matters affecting their respective territories.

AUGUST 30—SEPTEMBER 6, 1958

A. UNITED NATIONS. — Emergency Session of General Assembly on Middle East. - President Eisenhower's Peace Plan. - Unanimous Adoption of Arab Resolution. - Dr. Hammarskjöld's Mission to Middle East. - Visit to Jordan.

The Security Council, meeting on Aug. 7, decided by unanimous vote to convene an emergency session of the U.N. General Assembly on the Middle East situation, to open on the following day. The relevant resolution was an amended version of the U.S. resolution of July 18 which called for an emergency session of the General Assembly after the U.S., Soviet and Swedish resolutions on the Middle East had all failed to secure adoption in the Security Council (see page 16319, second column).

When the Security Council met on Aug. 7, it had before it: (1) the above-mentioned U.S. resolution of July 18, calling for a special session of the Assembly in view of the lack of unanimity among the permanent members of the Security Council; and (2) the Soviet resolution of the same date, which also asked for an emergency session of the Assembly and, in addition, called on the Assembly to bring about the "immediate withdrawal" of American and British forces from Lebanon and Jordan.

In its original wording, the U.S. resolution not only asked for an emergency session of the Assembly but also made direct reference to the Lebanese and Jordanian complaints to the Security Council alleging interference by the United Arab Republic in the internal affairs of those countries. As the Soviet delegate (M. Sobolev) objected to any direct mention of Lebanon or Jordan, the Panamanian delegate (Señor Jorge Illueca) proposed that the resolution should be re-worded to read that the Security Council had "considered items 2 and 3" on its agenda [those items referred to the respective complaints by Lebanon and Jordan.] This textual amendment was accepted by Mr. Cabot Lodge (U.S.A.), M. Sobolev, and all other members of the Council, and the U.S. resolution, as amended by Panama, was reintroduced by Mr. Lodge and approved unanimously. In its final form, it stated that the Security Council, "having considered items 2 and 3" on its agenda, had decided to call a special emergency session of the General Assembly as "the lack of unanimity of the permanent members . . . has prevented it from exercising its primary responsibility for the maintenance of international peace and security."

Mr. Hashim Jawad took part in the Council's meeting as representative of the Iraqi Republican Government, after his credentials had been approved by the U.N. Secretary-General. [Iraq is at present a non-permanent member of the Council.] Mr. Jawad had represented Iraq at the U.N. in former years as delegate of the Royal Iraqi Government.

The General Assembly accordingly met in emergency session on Aug. 8 under its president, Sir Leslie Munro (New Zealand). After a speech by Sir Leslie and a brief statement by Dr. Hammarskjöld, it was agreed to adjourn until Aug. 13 to enable the Foreign Ministers of a number of countries to attend. When the Assembly began its debate on the latter date, some 20 Foreign Ministers were present, including Mr. Dulles (U.S.A.), Mr. Selwyn Lloyd (U.K.), M. Gromyko (U.S.S.R.) and Dr. Fawzi (U.A.R.); the French Foreign Minister (M. Couve de Murville) arrived some days later.

President Eisenhower's Speech to General Assembly. - Six-Point Peace Plan for Middle East.

The special session was opened by President Eisenhower, who had travelled to New York from Washington to address the General Assembly in person. In the course of a speech covering all aspects of the Middle East situation, the President put forward a comprehensive programme for peace in the area based on the following six points:

"(1) U.N. concern over Lebanon.

"(2) U.N. measures to preserve peace in Jordan.

"(3) An end to the fomenting from without of civil strife.

"(4) A U.N. peace force.

"(5) A regional economic development plan to assist and accelerate improvement in the living standards of the people in these Arab nations.

"(6) Steps to avoid a new arms race spiral in the area."

President Eisenhower addressed the General Assembly as follows (cross-headings inserted):

"It is almost five years since I had the honour of addressing this Assembly. I then spoke of atomic power and urged that we should find a way by which the miraculous inventiveness of man should not be dedicated to his death but consecrated to his life. Since then great strides have been taken in the use of atomic energy for peaceful purposes. Tragically little has been done to eliminate the use of atomic and nuclear power for weapons purposes.

"That is a danger. That danger in turn gives rise to another danger—the danger that nations under aggressive leadership will seek to exploit man's horror of war by confronting the nations, particularly small nations, with an apparent choice between supine surrender or war. This tactic reappeared during the recent Near East crisis. Some might call it ballistic blackmail. In most communities it is illegal to cry 'fire' in a crowded assembly. Should it not be considered serious international misconduct to manufacture a general war scare in an effort to achieve local political aims?

"Pressures such as these will never be successfully practised against America, but they do create dangers which could affect each and every one of us. That is why I have asked for the privilege of again addressing you. The immediate reason is two small countries—Lebanon and Jordan. The cause is one of universal concern.

U.N. Responsibility for Independence of Small Nations. "The lawful and freely elected Government of Lebanon, feeling itself endangered by civil strife fomented from without, sent the United States a desperate call for instant help. We responded to that call. On the basis of that response, an effort has been made to create a war hysteria. The impression is sought to be created that if small nations are assisted in their desire to survive, that endangers the peace. This is truly an upside-down portrayal. If it is made an international crime to help a small nation maintain its independence, then indeed the possibilities of conquest are unlimited. We will have nullified the provision of our Charter which recognizes the inherent right of collective self-defence. We will have let loose forces that could generate great disaster.

"The United Nations has, of course, a primary responsibility to maintain not only international peace but also security. That is an important fact. But we must not evade a second fact—namely, that in the circumstances of the world since 1945, the U.N. has sometimes been blocked in its attempt to fulfil that function.

The Checking of Aggression. "Respect for the liberty and freedom of all nations has always been a guiding principle of the United States. This respect has been consistently demonstrated by our unswerving adherence to the principles of the Charter, particularly in its opposition to aggression, direct or indirect. Sometimes we have made that demonstration in terms of collective measures called for by the United Nations. Sometimes we have done so pursuant to what the Charter calls the inherent right of collective self-defence.

"I recall the moments of clear danger we have faced since the end of the Second World War—Persia, Greece and Turkey, the Berlin blockade, Korea, the Straits of Taiwan [Formosa]. A common principle guided the position of the U.S.A. on all these occasions. That principle was that aggression, direct or indirect, must be checked before it gathered sufficient momentum to destroy us all—aggressor and defender alike. It was this principle that was applied once again when the urgent appeals of the Governments of Lebanon and Jordan were answered.

"I would be less than candid if I did not tell you that the U.S.A. reserves, within the spirit of the Charter, the right to answer any legitimate appeal of any nation, particularly small nations. I doubt that a single free Government in the world would willingly forgo the right to ask for help if its sovereignty were imperilled. But I must again emphasize that the U.S.A. seeks always to keep within the spirit of the Charter. Thus, when President Truman responded in 1947 to the urgent plea of Greece, the United States stipulated that our assistance would be withdrawn whenever the United Nations felt that its action could take the place of ours.

"Similarly, when the U.S.A. responded to the urgent plea of Lebanon, we went at once to the Security Council and sought U.N. assistance for Lebanon so as to permit the withdrawal of U.S. forces. United Nations action would have been taken, the U.S. forces already withdrawn, had it not been that two resolutions—one proposed by the United States, the other by Japan—failed to pass because of one negative vote—a veto.

"But nothing I have said is to be construed as indicating that I regard the *status quo* as sacrosanct. Change is the law of life and progress. But when change reflects the will of the people, that change can and should be brought about in peaceful ways. In this context the United States respects the right of every Arab nation of the Near East to live in freedom without domination from any source, far or near. In the same context, we believe that the U.N. Charter places on all of us certain solemn obligations. Without respect for each other's sovereignty, and the exercise of great care in the means by which new patterns of international life are achieved, the projection of the peaceful vision of the Charter would become a mockery.

The Lebanese Problem. "Let me turn now specifically to the problem of Lebanon. When U.S. military assistance began moving into Lebanon, I reported to the American people that we had immediately reacted to the plea of Lebanon because the situation was such that only prompt action would suffice. I repeat to you the solemn pledge I then made: our assistance to Lebanon has one single purpose—the purpose of the Charter and of such historic U.N. resolutions as the 'essentials of peace' resolution of 1949 and the 'peace through deeds' resolution of 1950. These denounce, as a form of aggression and as an international crime, the fomenting of civil strife in the interest of a foreign Power. We want to prevent that crime—or at least prevent its having fatal consequences. We have no other purpose whatsoever.

"The U.S. troops will be totally withdrawn whenever this is requested by the duly constituted Government of Lebanon or whenever, through action by the U.N. or otherwise, Lebanon is no longer exposed to the original danger. It is my earnest hope that

this Assembly, free of the veto, will consider how it can assure the continued independence and integrity of Lebanon, so that the political destiny of the Lebanese people will continue to lie in their own hands. The U.S. delegation will support measures to this end."

The Jordanian Problem. "Another urgent problem is Jordan. If we do not act promptly in Jordan a further dangerous crisis may result, for the method of indirect aggression discernible in Jordan may lead to conflict endangering the peace. We must recognize that peace in this area is fragile, and we must also recognize that the end of peace in Jordan could have consequences of a far-reaching nature. The U.N. has a particular responsibility in this matter, since it sponsored the Palestine armistice agreements upon which peace in the area rests, and since it also sponsors the care of the Palestine refugees. I hope this Assembly will be able to give expression to the interest of the United Nations in preserving the peace in Jordan."

Proposals for checking Inflammatory Broadcasts and Armed Infiltration. "There is another matter which this Assembly should face in seeking to promote stability in the Near East. That is the question of inflammatory propaganda. The U.N. Assembly has on three occasions—in 1947, 1949, 1950—passed resolutions designed to stop irresponsible broadcasts from one nation into the homes of citizens of other nations, thereby 'fomenting civil strife and subverting the will of the people in any State.' We all know that these resolutions have recently been violated in many directions in the Near East . . .

"I believe that this Assembly should reaffirm its enunciated policy and should consider means for monitoring radio broadcasts directed across national frontiers in the troubled Near East area, and for examining complaints from those nations which consider their national security jeopardized by external propaganda.

"The countries of this area should also be freed from armed pressure and infiltration coming across their borders. When such interference threatens, they should be able to get from the U.N. prompt and effective action to help safeguard their independence. This requires that adequate machinery be available to make the U.N. presence manifest in the area of trouble.

Proposal for U.N. Peace Force for Middle East. "Therefore I believe this Assembly should take action looking toward the creation of a standby U.N. Peace Force. The need for such a force is clearly demonstrated by recent events involving imminent danger to the integrity of two of our members. I understand that this subject is to be discussed at the 13th General Assembly and that our distinguished Secretary-General has taken an initiative in this matter. Recent events clearly demonstrate that this is a matter for urgent and positive action.

Proposal for Arab Development Institution. "I have proposed four areas of action for the consideration of the Assembly in respect of Lebanon, Jordan, subversive propaganda, and a standby U.N. force. These measures, basically, are designed to do one thing: to preserve the right of a nation and its people to determine their own destiny, consistent with the obligation to respect the rights of others. This clearly applies to the great surge of Arab nationalism.

"Let me state the position of my country unmistakably. The people of the Arab nations of the Near East clearly possess the right of determining and expressing their own destiny. Other nations should not interfere so long as this expression is found in ways compatible with international peace and security. However, here as in other areas, we have an opportunity to share in a great international task—the task of assisting the people of that area, under programmes which they may desire, to make further progress towards the goals of human welfare they have set. Only on the basis of progressing economies can truly independent Governments sustain themselves. This is a real challenge to the Arab people and to all of us. To help the Arab countries fulfil these aspirations, here is what I propose:

(1) That consultations be immediately undertaken by the Secretary-General with the Arab nations of the Near East to ascertain whether an agreement can be reached to establish an Arab Development Institution on a regional basis.

(2) That these consultations consider the composition and possible functions of a regional Arab Development Institution, whose task would be to accelerate progress in such fields as industry, agriculture, water supply, health and education.

(3) Other nations and private organizations which might be prepared to support this institution should also be consulted at an appropriate time.

"Should the Arab States agree on the usefulness of such a soundly organized regional institution, and should they be prepared to support it with their own resources, the United States would also be prepared to support it.

"The institution would be set up to provide loans to the Arab States, as well as the technical assistance required in development projects. This proposal for a regional Arab Development Institution can, I believe, be realized on a basis which would attract international capital, both public and private.

"I believe that the best and quickest way to achieve the most desirable result would be for the Secretary-General to make two parallel approaches. First, to consult with the Arab States of the Near East to determine an area of agreement. Then to invite the International Bank, which has vast experience in this field, to make available its facilities for the planning of the organizational and operating techniques needed to establish the institution on a progressive course.

"I hope it is clear that I am not suggesting a position of leadership for my own country in the work of creating such an institution. If this institution is to be a success, the function of leadership must belong to the Arab States themselves.

"I would hope that high on the agenda of this institution would be action to meet one of the major challenges of the Near East, the great common shortage—water. Much scientific and engineering work is already under way in the field of water development. For instance, atomic isotopes now permit us to chart the course of the great underground rivers, and new horizons are opening in the de-salting of water. The ancient problem of water is on the threshold of solution. Energy, determination, and science will carry it over that threshold.

"Another great challenge facing the area is disease. Already there is substantial effort among the peoples and Governments of the Near East to conquer disease and disability. But much remains to be done. The U.S.A. is prepared to join with other Governments and the World Health Organization in an all-out, joint attack on preventable disease in the Near East.

The Arab Renaissance. "But to see the desert blossom again and preventable disease conquered is only a first step. As I look into the future I see the emergence of modern Arab States that would bring to this century contributions surpassing those we cannot forget from the past. We remember that Western arithmetic and algebra owe much to the Arab mathematicians, and that much of the foundation of the world's medical science and astronomy was laid by Arab scholars. Above all, we remember that three of the world's greatest religions were born in the Near East.

"But a true Arab renaissance can only develop in a healthy human setting. Material progress should not be an over-riding objective in itself: but it is an important condition for achieving higher human, cultural, and spiritual objectives. But I repeat, if this vision of the modern Arab community is to come to life, the goals must be Arab goals.

"With the assistance of the U.N., the countries of the Near East now have a unique opportunity to advance, in freedom, their security and their political and economic interest. If a plan for peace of the kind I am proposing can be carried forward, in a few short years we may be able to look back on the Lebanon and Jordan crises as the beginning of a great new era of Arab history.

Ending of Middle East "Arms Race." "But there is an important consideration which must remain in mind today and in the future. If there is an end to external interference in the internal affairs of the Arab States of the Near East—if an adequate U.N. Peace Force is in existence ready for call by countries fearful for their security—then with this good prospect, and indeed as a necessary condition for its fulfilment, I hope and believe that the nations of the area . . . will no longer feel the need to seek national security through spiralling military build-ups. These will lead not only to economic impotence but to war.

"Perhaps the nations involved in the 1958 hostilities may, as a first step, wish to call for a U.N. study of the flow of heavy armaments to those nations. My country would be glad to support the establishment of an appropriate U.N. body to examine this problem. That body would discuss it individually with these countries and see what arms-control arrangements could be worked out under which the security of all these nations could be maintained more effectively than under a continued wasteful, dangerous competition in armaments. I recognize that any such arrangements must reflect these countries' own views.

"I have tried to present the framework of a plan for peace in the Near East. It would provide a setting of a political order responsive to the rights of people in each nation; which would avoid the dangers of a regional arms race; which would permit the peoples of the Near East to devote their energies wholeheartedly to the task for development and human progress in the widest sense.

Conclusion. After enunciating the six points mentioned above, President Eisenhower continued: "To have solidity, the different elements of this plan for peace and progress should be considered and acted on together, as integral elements of a single concerted effort. Therefore I hope that this Assembly will seek simultaneously to set in motion measures that would create a climate of security in the Near East consonant with the principles of the Charter, and at the same time create the framework for a common effort to raise the standard of living of the Arab peoples . . .

"The things I have talked about today are real and await our grasp. Within the Near East and within this Assembly are the forces of good, peace, restraint, and wisdom to make, with time and patience, a framework of political order and peace in that region. But we also know that all these possibilities are shadowed, all our hopes are dimmed, by the fact of the arms race in nuclear weapons—a contest which drains off our best talents and vast resources, straining the nerves of all our peoples.

"As I look out on this Assembly, with so many of you representing new nations, one thought above all impresses me. The world that is being remade on our planet is going to be a world of many mature nations. As one after another of these new nations moves through the difficult transition to modernization and learns the methods of growth, from this travail new levels of prosperity and productivity will emerge.

"This world of individual nations is not going to be controlled by any one Power or group of Powers. It is not going to be committed to any one ideology. Please believe me when I say that the dream

of world domination by one Power, or of world conformity, is an impossible dream. The nature of today's weapons, the nature of modern communications, and the widening circle of new nations, make it plain that we must, in the end, be a world community of open societies. And the concept of the open society is the ultimate key to a system of arms control we can all trust.

"We must, then, seek with new vigour, new initiative, the path to a peace based on the effective control of armaments, on economic advancement, and on the freedom of all peoples to be ruled by Governments of their choice. Only thus can we exercise the full capacity God has given us to enrich the lives of the individual human beings who are our ultimate concern, our responsibility, and our strength. In this memorable task there lies enough work and enough reward to satisfy the energies and ambitions of all leaders everywhere."

President Eisenhower was given a standing ovation by all delegations both before and after his speech.

The Assembly's Debate. - Dr. Hammarskjöld's Proposals for Settlement of Middle East Problems.

Representatives of over 50 countries took part in the General Assembly's debate, which lasted for a week (Aug. 13-20); the Assembly was also addressed by Dr. Hammarskjold, who outlined some of the "basic needs for action" in the Middle East area. The speeches of the various delegates were for the greater part a recapitulation of their Governments' views on the Middle East crisis (see 16356 A, 16341 A, 16333 A, 16317 A, 16305 A).

M. Gromyko (U.S.S.R.) said that President Eisenhower's plan for economic assistance to the Middle East merited "careful consideration," but insisted that the Assembly should not be "diverted" from its primary responsibility to secure the "immediate withdrawal" of U.S. and British troops from Lebanon and Jordan. He reiterated the Soviet Government's allegations of "aggression" by the United States and Britain, and maintained that there were no grounds for the allegations of interference by the United Arab Republic in the internal affairs of other Arab countries.

Mr. Selwyn Lloyd (U.K.) emphasized that Britain had gone to the assistance of Jordan at the request of King Hussein and the legal Government of that country; he reiterated that British troops would be immediately withdrawn when the U.N. had taken action to safeguard Jordan's independence and territorial integrity, or if the Jordanian Government so requested. Mr. Lloyd expressed Britain's full support for the programme outlined by President Eisenhower.

Mr. Abdul Rifai (Jordan) and **Dr. Malik** (Lebanon) both repeated their Government's charges against the United Arab Republic, the former declaring that President Eisenhower's speech had "given hope to all small nations." **Dr. Fawzi** (U.A.R.) denied that his Government had interfered in the internal affairs of Jordan or Lebanon, and supported M. Gromyko's call for the immediate withdrawal of Anglo-American forces from the Middle East.

M. Zorlu (Turkey) and **M. Abdoh** (Persia) both supported the action taken by the United States and Britain, while **Dr. Ronald Walker** (Australia) drew attention to the proposals for the Middle East made by Mr. Casey to the Australian Parliament (see page 16334, second column). **Mr. Arthur Lall** (India) maintained that there could be no Middle East settlement until the U.S. and British forces had been withdrawn; he opposed the suggestion for a U.N. Peace Force in the area on the grounds that it would constitute an infringement of the Charter and be incompatible with the internal sovereignty of the Arab States. On the other hand, **Prince Aly Khan** (Pakistan) strongly urged the creation of a U.N. Peace Force for the Middle East as proposed by President Eisenhower.

Dr. Hammarskjöld expressed the view that a general settlement in the Middle East should be based on the following principles:

(1) A declaration by the Arab States reaffirming their adherence to the principles of mutual respect for each other's territories, integrity, and sovereignty; non-aggression; and non-interference in each other's internal affairs.

(2) "Recognition by the world community of the particular problems and possibilities of the region," and an assurance to the peoples of the Middle East that they would be able to shape their own destinies "in the best interests of each nation within the region and of the region itself."

(3) "Some form of U.N. representation" in Lebanon might be "a desirable expression of the continued concern of the Organization for the independence and integrity" of that country. In this connexion Dr. Hammarskjöld said that the U.N. Observation Group had "rendered very useful services" and that its further development would be "fully justified." Nevertheless, the U.N. operation was related to conditions which might be temporary, "and the time may not be distant when a change of those conditions would call for a change of approach."

(4) The U.N. should give special attention to "the essential role of Jordan in efforts to ensure the peaceful and constructive development of the region." Consideration might also be given to "some strengthening of the U.N. Truce Supervision Organization in Palestine."

(5) U.N. technical assistance to the Arab nations, together with arrangements for economic co-operation "between oil-producing and oil-transiting countries" or "with a view to the joint utilization of water resources."

The U.N. Secretary-General added that action on these various points would provide a basis for dealing with other serious and long-outstanding problems of the area, primarily the problem of the 900,000 Palestine refugees.

The Soviet, Norwegian, and Arab Resolutions.

Three resolutions were presented to the General Assembly: (1) by the Soviet Union; (2) by Norway, co-sponsored by Canada, Colombia, Denmark, Liberia, Panama, and Paraguay; and (3) collectively by the ten Arab member-nations.

The Soviet Resolution.

This resolution was introduced by M. Gromyko on Aug. 13, at the opening of the Assembly's debate. Worded in moderate terms, it (1) "recommended" the U.S. and British Governments to withdraw their troops from Lebanon and Jordan "without delay"; and (2) instructed the U.N. Secretary-General "to reinforce the U.N. Observation Group in Lebanon . . . and also to send a group of observers to Jordan, in order to observe the withdrawal of American and British troops from Lebanon and Jordan and the situation on the frontiers of those countries."

In presenting this resolution, M. Gromyko said that it seemed to his Government to contain a "suitable formula" for easing the tension in the Middle East. He added, however: "This does not mean that we refuse to help in the search for a mutually acceptable formula, worked out with the consideration of the views of other delegations, if it meets the main purpose—the withdrawal of foreign troops from Lebanon and Jordan. We are prepared to enter into official or unofficial consultations- any sort of consultations—with any delegations, including those of the United States and the United Kingdom, in preparing a constructive decision which could be adopted by the General Assembly in the interests of peace."

The Norwegian Resolution.

The Norwegian delegate (Hr. Hans Engen) introduced this resolution on Aug. 18 after the British and U.S. Governments had submitted written declarations stating that they would withdraw their troops from Jordan and Lebanon if the United Nations took steps to ensure the "peace and security" of those countries (see below). As stated above, the Norwegian resolution was co-sponsored by six other countries.

After taking note of the British and U.S. declarations, and noting also that the U.N. Charter laid down that States should "practise tolerance and live together in peace as good neighbours," the resolution:

(1) Reaffirmed that all member-States should "refrain from any threats or acts, direct or indirect, aimed at impairing the freedom, independence or integrity of any State, or at fomenting civil strife and subverting the will of the people of any State." Member-States were asked "strictly to observe these obligations and to ensure that their conduct, by word and deed, in relation to the general area of the Middle East conforms to the above-mentioned policy."

(2) Requested the U.N. Secretary-General "to make forthwith such practical arrangements as he, in consultation with the Governments concerned, may find would adequately serve to help in upholding the purposes and principles of the Charter in relation to Lebanon and Jordan in present circumstances, having in mind paragraph (1) of the resolution."

(3) Noted that the Secretary-General was already studying "the feasibility of establishing a stand-by U.N. Peace Force," and invited him "to continue his studies now under way and, in this context, to consult with the Arab countries of the Near East with a view to possible assistance regarding an Arab Development Institution designed to further economic growth in these countries."

(4) Requested all member-States "to co-operate fully in carrying out this resolution," and asked the Secretary-General "to report as appropriate, the first report to be made not later than Sept. 30, 1958."

In presenting this resolution, Hr. Engen admitted that it was not "perfect" but maintained that it embodied "very fundamental elements representing some of the positions of all the parties directly concerned." Norway and the other co-sponsors believed that it provided a "middle-of-the-road" basis on which the U.N. could act in the present situation.

The Arab Resolution.

This resolution was presented collectively on Aug. 21 by the ten Arab member-nations of the U.N., after the Afro-Asian group had failed to reach agreement on whether or not to support the Norwegian resolution. [As stated below, intensive efforts were made to win general Afro-Asian support for the Norwegian resolution in order to secure the two-thirds majority required for its adoption by the Assembly.] The Arab resolution, like the Norwegian, recalled that the U.N. Charter enjoined all States to "practise tolerance and live together in peace as good neighbours." In addition, it noted that the Arab States had agreed, in the Pact of the Arab League, to strengthen the "close relations and numerous ties" linking the Arab countries; to "support and stabilize" those ties on a basis of "respect for the independence and sovereignty" of

the Arab States; and to direct their efforts towards "the common good of all the Arab countries, the improvement of their status, and the realization of their hopes and aspirations."

After expressing the desire of the Arab States "to relieve international tension," the resolution:

(1) Welcomed "the renewed assurances given by the Arab States to observe the provisions of Article 8 of the Pact of the Arab League," in which each member-State had pledged itself to "respect the systems of government in the other member-States," to regard them as the exclusive concern of the individual States, and to "abstain from any action calculated to change established systems of government." In addition, all U.N. member-nations were asked to "act strictly in accordance with the principles of mutual respect for each other's territorial integrity and sovereignty, of non-aggression, of strict non-interference in each other's internal affairs, and . . . to ensure that their conduct by word and deed conforms to these principles."

(2) Requested the U.N Secretary-General "to make forthwith, in consultation with the Governments concerned, . . . such practical arrangements as would adequately help in upholding the purposes and principles of the Charter in relation to Lebanon and Jordan in the present circumstances, and thereby facilitating the early withdrawal of foreign troops from the two countries."

(3) Invited the Secretary-General to "continue his studies now under way, and in this context to consult . . . with the Arab countries of the Near East with a view to possible assistance regarding an Arab Development Institution designed to further economic growth in these countries."

(4) Requested all member-States to co-operate fully in carrying out the resolution, and invited the Secretary-General "to report as appropriate, the first report to be not later than Sept. 30, 1958."

The Arab resolution, as shown, incorporated much of the wording of the Norwegian resolution, but differed from the latter (*a*) in invoking the principles of the Arab League Pact, in addition to those of the U.N. Charter; (*b*) in making a direct reference to the withdrawal of foreign troops from Jordan and Lebanon; and (*c*) in omitting mention of the possibility of a U.N. Peace Force for the Middle East.

Private Consultations between Western, Soviet and Afro-Asian Statesmen. - British and U.S. Declarations to General Assembly. - Unanimous Acceptance of Arab Resolution. - Ending of Emergency Session.

While the Assembly's debate was in progress, intensive consultations took place at U.N. Headquarters in an effort to reach agreement, by private diplomacy, on a resolution which would be generally acceptable to all interested parties in the Middle East crisis. These consultations, extending over several days, included private meetings between Mr. Dulles and M. Gromyko, who were reported to have reached a large measure of agreement; between Mr. Dulles and Mr. Selwyn Lloyd; between Mr. Selwyn Lloyd and M. Gromyko; between the British, U.S., Soviet, and U.A.R. Foreign Ministers and Dr. Hammarskjold; and between Mr. Selwyn Lloyd and Dr. Fawzi. [This latter meeting, at which Dr. Hammarskjöld was present, was the first to be held between the British and U.A.R. Foreign Ministers since the Suez crisis.] Throughout the special session the U.N. Secretary-General was active in promoting informal talks between the Foreign Ministers of the U.S.A., the Soviet Union, Great Britain, France, the United Arab Republic, and other interested countries.

On Aug. 18 Mr. Dulles and Mr. Selwyn Lloyd submitted written declarations (in the form of letters to the President of the General Assembly, Sir Leslie Munro) giving an undertaking that the U.S. and British Governments would withdraw their forces from Lebanon and Jordan respectively at the request of the Lebanese and Jordanian Governments, or if appropriate measures were taken by the U.N. to maintain peace and security in those countries. The two letters were in almost identical terms, except that Mr. Dulles's letter referred to Lebanon and Mr. Selwyn Lloyd's to Jordan. The British Foreign Secretary's letter was as follows:

"United Kingdom forces are now in Jordan in response to an appeal of the duly-constituted Government of Jordan for assistance in maintaining Jordan's territorial integrity and political independence against danger from without. They will be withdrawn from Jordan whenever this is requested by the duly-constituted Government of Jordan, or whenever as a result of the further action of the United Nations, or otherwise, their presence is no longer required.

"The United Kingdom will, in any event, abide by a determination of the General Assembly that action taken or assistance furnished by the United Nations makes the continued presence of U.K. forces in Jordan unnecessary for the maintenance of international peace and security."

As stated above, Norway and six other countries introduced a resolution on the same day which took note of the Anglo-American declarations but made no specific recommendations for troop withdrawals from Lebanon and Jordan. This resolution was intended as a compromise in the hope that it would be generally acceptable to the interested countries, and intensive lobbying took place in an effort to enlist the support of the 28-nation Afro-Asian group and thus obtain the necessary two-thirds majority in the Assembly. The Afro-Asian group, meeting under the chairmanship of Sir Claude Corea (Ceylon), discussed the matter for three days (Aug. 18-20) but failed to reach agreement.

No details of these discussions were made public, but it was understood that certain Afro-Asian countries (including India, Indonesia and the U.A.R.) felt that the Norwegian resolution was not strong enough and that it should have included a reference to the withdrawal of foreign forces from Jordan and Lebanon, on the other hand, Pakistan, Japan and other Afro-Asian nations were believed to have dissented from this view and to have urged acceptance of the Norwegian resolution as it stood.

At the final meeting of the Afro-Asian group (Aug. 20) Dr. Fawzi suggested that, in view of the prevailing differences, the representatives of all the Arab States should meet separately to see if they could evolve a formula satisfactory to all of them. Dr. Fawzi's suggestion was accepted, and the representatives of all ten Arab member-nations (Iraq, Jordan, Lebanon, Libya, Morocco, Saudi Arabia, the Sudan, Tunisia, the United Arab Republic, and Yemen) accordingly met later in the day and also on Aug. 21. Among the Arab Foreign Ministers taking part in these talks –in addition to Dr. Fawzi - were Dr. Malik (Lebanon), Dr. Jomard (Iraqi Republic) and Mr. Mahgoub (Sudan).

As a result of these discussions, unanimous agreement was reached on the text of the above-mentioned Arab resolution, which was presented to the Assembly by Mr. Mahgoub on Aug. 21 on behalf of all ten Arab member-countries of the United Nations. The resolution was supported by the British, U.S., Soviet, and many other delegates, and was unanimously approved by the Assembly, which ended its emergency session the same evening. No vote was taken on the Norwegian and Soviet resolutions.

Mr. Dulles welcomed the fact that the resolution had been supported by all the Arab States, adding that an opportunity now presented itself which, if seized, "will not only mark a great new triumph for the United Nations but will also promote the political, economic, and social welfare of the Near East. That, however . . . depends primarily not upon our words but our deeds. Words that we utter here are helpful, but the final answer is to be sought elsewhere." **Mr. Selwyn Lloyd** similarly described the resolution as a "constructive first step" which recognized "the need for a *détente* between the Arab States concerned"; this, in turn, would provide "the essential basis for successful U.N. operation, and also for the withdrawal of our troops." **M. Gromyko** said that the resolution contained "some inadequacies" since it did not speak of the "immediate withdrawal" of Anglo-American forces; nevertheless, he commended it as "very good work . . . serving well the cause of peace."

Mr. Mahgoub described the resolution as "the beginning of a glorious future" for the Arab nations, based on the strengthening of the ties between them, on mutual co-operation, and on mutual tolerance; thereby the Arab countries would "be able to contribute also to the well-being of the international family." **Sir Claude Corea** emphasized that the Arab States themselves had "shouldered this great responsibility so successfully that within a very brief period, not more than 24 hours, they were able to reach an agreement acceptable to all assembled here." Describing the occasion as "momentous and historic," Sir Claude declared that it would go down in the annals of the U.N. as "an occasion when people met together in a spirit of conciliation and goodwill to resolve differences . . . which primarily concerned themselves. It is an instance of fraternal goodwill such as we have seldom seen."

Among other delegates, **Mr. Lall** (India) said that the resolution could mark "the beginning of a new era of co-operation, prosperity, and peace in the Middle East"; he added that India had "no doubt whatsoever that there will be an early withdrawal of the troops now in Lebanon and Jordan. **Mr. Eban** (Israel) said that he would vote for the resolution despite "certain profound and serious reservations." The Government of Israel, he added, had "serious cause to doubt whether in fact all member-States, without exception, understand the applicability of these fundamental provisions to their relations with all their neighbours without exception." Nevertheless, Israel felt that the "overwhelming majority" of the U.N. members understood the applicability of these principles, and she also fully comprehended "the importance of unanimity in international issues of such grave moment and scope." An implied reference to Israel was also made by **Dr. Ronald Walker** (Australia), who pointed out that the resolution, while referring to the mutual pledges of the Arab League members, was "silent on the attitude of Arab States towards other States in the Middle East."

In closing the Assembly's emergency session, Sir Leslie Munro said that it would "be a matter throughout the world of general and genuine relief and gratification that by patience and goodwill, and in full awareness of the difficulties still to be

resolved, the Assembly has been able to make such substantial progress in reconciling differences among its members and adopting recommendations capable of attracting unanimous support." Sir Leslie expressed the hope that the resolution would lead to "deeds" which would help to make the principles of the U.N. Charter "more effective in the Middle East."

Dr. Hammarskjöld's Mission to Middle East.

At a press conference at U.N. Headquarters on Aug. 22, the U.N. Secretary-General announced his intention of leaving immediately for the Middle East as a first step towards carrying out the mandate entrusted to him by the Assembly's resolution. He said that the unanimous adoption of that resolution constituted an "invaluable contribution to present politics and diplomacy in the international field," and would be hailed by all who had the cause of peace at heart. Dr. Hammarskjöld stated that he would go first to Amman, then fly to Geneva for the opening of the second U.N. "atoms-for-peace" conference, and then return to the Middle East for visits to Cairo, Beirut and probably Baghdad.

Dr. Hammarskjöld accordingly paid a three-day visit to Amman on Aug. 27-29, during which he had discussions with King Hussein and the Jordanian Prime Minister, Mr. Samir Rifai. A joint communiqué was issued on Aug. 29 stating (1) that the U.N. Secretary-General shared the Jordanian Government's view that "neither a U.N. Force nor a border observation group would adequately serve the purposes which the General Assembly had in mind" when it approved the resolution authorizing Dr. Hammarskjöld's mission; (2) that the consultations had dealt with "other forms of U.N. presence [in Jordan], both sides having been guided by the wish to see such a presence developed in a form which would support the policies of co-operation and mutual respect to which all the Arab States co-sponsoring the resolution pledged themselves"; and (3) that the discussions would be "resumed and concluded at a renewed visit which the Secretary-General intends to make to Amman after having consulted with other Governments in the area."—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - U.S. Information Service - New York Times) **(Prev. rep. Middle East Crisis, 16356 A; 16341A; 16333; A; 16317 A; 16305 A.)**

A. CAMBODIA - SOUTH VIETNAM. — Cambodian Allegations of Frontier Violations by South Vietnamese Forces. - Vietnamese Counter-charges against Cambodia.

The Cambodian Premier, M. Sim Var, alleged in a broadcast on June 25 that several regiments of the South Vietnamese Army, totalling about 3,000 men, had crossed the Cambodian frontier in the north-eastern province of Stung-Treng and that their advance units had penetrated about nine miles. A royal proclamation was issued on the same day in Pnom-Penh alleging that 19 cases of violation of Cambodian territory by South Vietnamese troops had occurred since the beginning of 1957. King Norodom Suramarit appealed to the U.S. Government on June 26 to intervene in Saigon with a view to ending "numerous Vietnamese provocations," and on the following day the Cambodian Government invited the International Control Commission to make an investigation.

In a communiqué issued on June 26, the South Vietnamese Foreign Ministry claimed that the incidents referred to had occurred on Vietnamese territory. It was alleged that Cambodian troops had entered Vietnam on June 7 to cover the escape of a number of political prisoners who had broken out of an internment camp; that on June 15 they had twice attacked Vietnamese civil guards who were searching for the prisoners; and that they had moved a frontier-post about two miles into Vietnamese territory. The communiqué also accused the Cambodian Government of giving refuge to "remnants of the armed sects" from South Vietnam who had been "reinforced by Communist elements and cadres," and of allowing these armed bands to make periodic raids across the border, in which connexion it enumerated 39 frontier incidents alleged to have taken place between Oct. 20, 1957, and June 15, 1958. The Cambodian Government denied that it had given refuge to Vietnamese rebels, and alleged in turn that the internal situation in South Vietnam had "given rise to frequent frontier violations by Vietnamese insurgents and their pursuers."

The Cambodian Chief of Staff (Major-General Onnor) said at a press conference on June 29 that the Vietnamese forces appeared to have withdrawn. It had previously been denied in Saigon that any South Vietnamese armed forces had been in the frontier area, and it was claimed that the frontier posts were manned by civil guards only.—(Le Monde, Paris - Vietnam Press Agency, Saigon) **(Prev. rep. 15706 A.)**

B. SOUTH AFRICA. — Dr. Verwoerd becomes Prime Minister and Leader of Nationalist Party.

Dr. H. F. Verwoerd (57), Minister of Native Affairs since 1950, was elected leader of the Nationalist Party on Sept. 2 in succession to the late Mr. Strydom, and thus automatically became the sixth Prime Minister of South Africa.

The election was made by the parliamentary caucus of the Nationalist Party, meeting at Cape Town. Three candidates were nominated for the party leadership—Dr. Verwoerd; Mr. C. R. Swart, Minister of Justice and acting Prime Minister during Mr. Strydom's illness; and Dr. T. E. Donges, Minister of the Interior and Nationalist leader in the Cape. On a first ballot Dr. Verwoerd received 80 votes, Dr. Donges 52, and Mr. Swart 41; the last-named then withdrew, and on a second ballot Dr. Verwoerd received 98 votes and Dr. Donges 75.

Dr. Hendrik Frensch Verwoerd was born in 1901 in Holland and was brought by his parents to South Africa as an infant. After a brilliant academic career at Stellenbosch University, where he graduated in psychology, he studied at German universities and returned to Stellenbosch as Professor of Applied Psychology, subsequently becoming head of the Department of Sociology. Though possessing no previous journalistic experience, he became editor in 1937 of *Die Transvaler* (Johannesburg), which he built up as one of the most powerful organs of Nationalist opinion in South Africa. He was strongly opposed to South Africa's entry into the Second World War, advocated a policy of neutrality, and was extremely critical of the policies of General Smuts. In 1948 he was elected to the Senate, in which he became Nationalist Chief Whip, and two years later became Minister of Native Affairs, a portfolio he has held ever since. A lifelong exponent of *apartheid* and republicanism, he was the principal architect of the Nationalist Government's racial legislation of recent years. He is M.P. for Heidelberg.

In a broadcast on Sept. 3, Dr. Verwoerd said that he would devote all his energies to the establishment of a republic in South Africa "in such a way and at such a time that it will be lasting."

After expressing the view that a republic was the only way to bring about complete unity between the English-speaking and Afrikaans-speaking sections of the White population, Dr. Verwoerd stressed that the Government's *apartheid* policy did not mean oppression of any section of the population but was designed to ensure "happiness, security and stability for both the Bantu and the Whites by having their own home, language and administration." He emphasized that the Government intended to uphold democratic institutions and desired friendly relations with all countries, declaring in conclusion: "In South Africa we are being carried forward as never before by an overwhelming current of inspired nationalism."

Dr. Verwoerd was sworn in as Prime Minister on the same day, no changes being made in the Cabinet. It was announced that he would retain the portfolio of Native Affairs until the end of the present session of Parliament.—(Times - State Information Office, Pretoria) **(Prev. rep. 16363 A.)**

C. TONGA. — New Treaty of Friendship with Britain.

A new treaty of friendship between Great Britain and Tonga was signed on Aug. 25 in Nukualofa (the capital of Tonga), replacing the treaty of 1900 whereby Tonga became a British-protected State while remaining self-governing.

In a statement issued on Aug. 21 in London and Nukualofa, it was explained that Queen Elizabeth II and Queen Salote, with the approval of the British and Tongan Governments, had decided to conclude a new treaty because they desired to "confirm and strengthen the friendly relations which exist between them and their respective States." After pointing out that existing agreements (the first of which was concluded in 1879) did not provide a wholly satisfactory basis for Anglo-Tongan relations, the announcement added:

"The new treaty will reflect changes which have occurred since the previous agreements were concluded and will be designed to enable the existing friendly relations to develop. Tonga will continue to be a State under British protection, but will have increased local autonomy. Agreement has also been reached on the conduct of the external relations of Tonga, which, in general, will remain the responsibility of the United Kingdom, but arrangements will be made for certain aspects of external relations to be conducted by the Government of Tonga."

The new treaty was signed by Sir Ronald Garvey (Governor of Fiji) on behalf of Queen Elizabeth II, and by Prince Tungi (Prime Minister of Tonga) on behalf of Queen Salote.

(Times - Daily Telegraph)

D. SOVIET UNION. — Ministerial Change.

The Tass Agency announced on Aug. 26 that M. Nikolai Patolichev (a First Deputy Minister of Foreign Affairs) had been appointed Minister of Foreign Trade in succession to M. Ivan Kabanov. It was stated that M. Kabanov had been transferred to "another leading position," of which no details were given.—(Soviet Embassy Press Department, London) **(Prev. rep. 16347 C.)**

A. SCIENTIFIC RESEARCH. — Report of U.N. Scientific Committee on Effects of Atomic Radiation.

The report was published on Aug. 10 of the U.N. Scientific Committee on the Effects of Atomic Radiation, set up under the resolution adopted by the General Assembly on Dec. 3, 1955 (see page 14668). The committee consisted of scientists from 15 countries—Argentina, Australia, Belgium, Brazil, Canada, Czechoslovakia, Egypt, France, India, Japan, Mexico, Sweden, the Soviet Union, the United Kingdom, and the United States.

The report—which was unanimous—was issued after 2½ years of detailed studies on a world-wide scale, carried out by a network of monitoring stations in all continents and in a large number of countries, including all the major Powers except China. Among a great mass of information contained in the report were the following major conclusions :

(1) The level of radiation was increasing throughout the world, and in certain areas was already above the safety limit ; nevertheless, radiation hazards from nuclear weapons tests (even if continued) would not be substantially greater than those from natural causes.

(2) Even the smallest amounts of radiation, however, were " liable to cause deleterious genetic and perhaps also somatic effects." [Somatic effects are injuries to the body as a whole, including cancer, leukemia, pre-natal damage, and shortening of life.] Moreover, " even the smallest doses " could cause mutations affecting future generations. Thus, the fact that man's actions could damage his genetic inheritance " clearly emphasizes the responsibility of the present generation, particularly in view of the social consequences laid on human populations by unfavourable genes." It was stressed in this connexion that " mutational damage, once established, is not repaired."

(3) The most dangerous forms of radiation to man were Strontium-90 and Caesium-137 (see below). It had been established, for the first time, that the dangers of strontium contamination were five to six times as great among populations deriving most of their dietary calcium from rice than among those obtaining their calcium from milk [i.e. the danger was greater, for example, in Japan and other Far Eastern countries than in the West]. There was more strontium in brown rice than in white, in most vegetables than in milk products, in rainwater than in river water, and in fresh-water fish than in sea-fish.

(4) Caesium-137 was responsible for gonad radiation from fall-out, and hence transmissible to the next and future generations. It could be found particularly in milk, less so in cereals and rice, and very little in vegetables and fruit.

Extracts from the report of the U.N. Committee are given below (cross-headings inserted) :

Radioactive Fall-out from Nuclear Explosions. " The fall-out of radioactive materials near the sites of nuclear explosions . . . may cause high radiation exposure to individuals within these areas. The amount of such radiation exposure varies very greatly with the weapon tested, the height of firing, the distance from the point of explosion, the direction of winds at various altitudes, and the chance occurrence of rainfall through radioactive material in the early hours after the test. Therefore, at present, these doses cannot in general be calculated. Under very special conditions high radiation exposure and deleterious effects have been reported, as in the cases of the Marshall Islanders [see 13699 A] and the crew of a Japanese fishing vessel [i.e. the *Fukuryu Maru*—see 14390 A ; 13932 C ; 13485 A]. Not enough information is available as to the general circumstances in which such local deposition may occur, and the extent and duration of the exposures liable to be involved.

" Radioactive materials injected into the atmosphere below the tropopause [about 14 kilometres above the earth's surface] are brought down to the earth's surface by rainfall and sedimentation. This process takes a few months, during which they are carried several times around the world. This tropospheric fall-out consists of a mixture of radioactive materials, most of which are short-lived isotopes . . . The radio-isotopes of tropospheric fall-out may be taken into the body by inhalation and ingestion. Since the radio-isotopes of principal concern are short-lived, storage of contaminated food products reduces the dose which they contribute. The gonad dose over the whole population from inhaled and ingested tropospheric material is negligible as compared with the contribution from this material as an external source The average bone-marrow dose from internal sources is about 0.2 mrem per year. [A "rem" is an arbitrary unit of radiation exposure, standing for " roentgen equivalent mammal" ; a " mrem " is a one-thousandth part of a rem.]

" Increases in radio-activity of the thyroid gland have been found during periods of several weeks or a few months following weapon tests. In human thyroids a dose from iodine-131 of about 5 mrem per year has been estimated for 1955-56 in the United States, excluding areas immediately adjacent to weapon-test sites. Doses of this order are unlikely to cause detectable damage or functional change in the glands.

" Irradiation of bone may result from the incorporation of intermediate and short-lived fission products. Although these materials do not cause prolonged irradiation, they may become selectively concentrated into those areas of bone in which active growth is taking place at the time, and so cause more intense radiation locally than if the same amounts of these materials were distributed throughout the whole skeleton.

" The Committee has insufficient information on local variations and temporary increases of tropospheric fall-out in populated areas at different distances from weapon-tested sites, and emphasizes the lack of further data which would permit evaluation of the biological significance of this source of environmental contamination.

" Radioactive materials injected into the stratosphere, especially by high-yield nuclear explosions, constitute a reservoir from which they fall on to the whole of the earth's surface for many years. The rate of fall-out varies with latitude and is greater in the Northern Hemisphere, where most of the tests are carried out. Within any given area, fall-out rate may also vary with local meteorological conditions. The radiation due to stratospheric fall-out from weapons exploded so far will contribute a 30-year gonad dose of 10 mrem, and a 70-year *per capita* marrow-dose of 160 mrem and 960 mrem for two populations deriving most of their dietary calcium from milk and rice respectively."

Effects of Strontium-90 and Caesium-137. - Dietary Considerations.

" Owing to the relatively gradual fall out from the stratosphere, most of the subsequent radiation is due to two radioactive isotopes of slow decay, other fission products already having largely undergone decay. These two radioactive isotopes are Caesium-137 and Strontium-90. The physical properties and chemical behaviour of the two differ. Caesium-137 is responsible for gonad radiation from fall-out. When it is taken into the body it becomes distributed more or less evenly throughout the tissues, causing uniform irradiation of the whole body ; and when present in the surroundings, its penetrating gamma radiations cause a similarly uniform irradiation of tissues. Strontium-90, on the other hand, is not a gamma-emitter and does not contribute significantly to the irradiation of any part of the body from without. However, on being taken into the body it becomes incorporated in bone because of its chemical similarity to the normal bone-forming element calcium . . .

" The average concentration of Strontium-90 in the bones of children, in whom new bone is continuously being formed, is higher than in adults whose bones were largely formed before the environment, and consequently the food supply, became contaminated with Strontium-90. The highest concentrations of Strontium-90 in bone have in fact been observed in children from a few months to five years old . . .

" The radio-strontium concentration in bone is also affected by dietary habit and by the ratio of the amounts of Strontium-90 to calcium in the diet. At present this ratio differs in various dietary constituents ; it is higher in brown rice than in white, somewhat higher in many vegetables than in milk products, higher in rain water than in river water, and lower in sea fish than in fresh-water fish.

" Agricultural conditions may also affect the content of Strontium-90 in the diet, since the available calcium of the soil will, within certain limits, influence the ratio of Strontium-90 to calcium in crops derived from the soil. The distribution of soils which are highly deficient in calcium and their utilization require further study. More work is also needed to understand the distribution of Strontium-90 in the soil, its chemical availability to plants and uptake through their roots, and its behaviour under ploughing . . .

" It is evident that the radiation exposures from fall-out which are most likely to be of significance are :

(*a*) Those from short-lived fission products and radioactive material due to local or tropospheric fall-out ;

(*b*) Those of the gonads and other organs from Caesium-137 due to stratospheric fall-out ;

(*c*) Those of bone and adjacent tissue from Strontium-90, which also comes largely from the stratosphere. The relative importance of these contributions varies from region to region."

Biological Effects of Radiation. " The biological effects of radiation are exhibited in different ways according to whether isolated cells, tissues, organs or organisms are examined . . . The following paragraphs deal first with the cellular effects of radiation ; then with the somatic effects on the irradiated individual, and with the genetic effects on his progeny . . .

" Embryonic cells are especially sensitive to radiation, and some evidence suggests that exposure of the foetus to small doses of radiation may result in leukemia during childhood. Irradiation of pregnant mammals has shown that doses exceeding 25 rem to the foetus during certain stages of its development can cause abnormalities in some organs . . . If these results should be applicable to man, and since they relate to the development of the brain, the opinion seems justified that even a very small dose to the human foetus may involve some risk of injurious effects if received during a critical period of pregnancy. Radio-strontium must be expected to enter foetal bone when calcification starts in the second trimester of pregnancy, and so cause irradiation of the adjacent developing nervous system . . . The uptake of radio-strontium in foetal bone tissue is, however, at present very small, contributing less radiation than 1 per cent of that due to natural sources ; but if the present rate of test explosions is continued, it will rise ultimately to some 10 per cent of that due to natural sources.

"Children are regarded as being more sensitive to radiation than adults, although there is little direct evidence on this subject, except for an indication that cancer of the thyroid may result from doses of a few hundred rad which do not induce this change in adults. In adults it is difficult to detect the effect of a single exposure to less than 25 to 50 rem, or of continuing exposure to levels below 100 times the natural levels . . .

"Processes of repair play an important role in the final outcome of radiation damage. They are one cause of the existence of a threshold dose (or dose-rate) characterized by the fact that this dose or greater ones produce a particular biological effect which does not appear when the dose is less than the threshold . . . Threshold doses are found for some somatic effects, such as erythema of the skin. Other forms of radiation damage to cells, tissues or organisms, however, appear to be cumulative; for instance, mutational damage, once established, is not repaired.

"Damaged cells or tissues may be eliminated and replaced by regenerated normal cells, this process being most active in embryos and young animals and in certain tissues of the adult. The affected cells may also re-establish apparently normal biochemical functions. During the process of regeneration of tissues damaged by radiation, malignant tumours may be induced.

"The power of repair differs considerably in different organisms and types of cells, and varies to a high degree with the physiological conditions. No chemical treatment has yet been discovered which will induce or accelerate recovery from radiation damage in man. The grafting of blood-forming tissue has so far been successful only in small mammals irradiated with a lethal dose to the whole body, and no attempt to apply this treatment to irradiated man has yet been reported.

"Prevention of the effects of radiation is rendered more difficult, and complete protection against it impossible, because changes which already occur during the irradiation lead to later damage. The discovery of chemical protectors, although important theoretically, has not yet yielded methods which appreciably reduce radiation damage in man. At present, effective protection from external radiation sources can only be achieved by adequate shielding or by keeping at a safe distance from the source . . .

"Morphologically recognizable damage may be induced by total or partial, continuous or intermittent, irradiations much in excess of the currently accepted 'maximum permissible' levels of occupational exposure. Such damage includes anaemia and leukemia. Other pathological conditions such as cataract, carcinoma of the thyroid, and bone sarcoma are known to have resulted from partial body irradiations, but with rather high dosages involving hundreds or even thousands of rem given to these organs.

"The shortening of the life-span in small rodents exposed to large doses has suggested the possibility that certain degenerative processes may be aggravated by continued exposure to low radiation levels. Such a shortening has also been inferred from an analysis of the published death-rates of U.S. radiologists compared with those of certain other groups of medical men. However, studies in the United Kingdom have failed to demonstrate such an effect.

"Present uncertainty about the effects of low dose-levels makes it imperative that as much relevant information as possible be collected about groups of persons chronically exposed at these levels and for whom adequate control groups exist; for instance, certain populations in areas of high natural radiation, and workers in uranium mines."

Mutational Effects. - Genetic Considerations. "Exposure of the gonads to even the smallest doses of ionizing radiations can give rise to mutant genes which accumulate, are transmissible to the progeny, and are considered to be, in general, harmful to the human race. As the persons who will be affected will belong to future generations, it is important to minimize undue exposures of populations to such radiation, and so to safeguard the well-being of those who are still unborn . . . The knowledge that man's actions can impair his genetic inheritance . . . clearly emphasizes the responsibilities of the present generation, particularly in view of the social consequences laid on human populations by unfavourable genes.

"Besides increasing the incidence of easily discernible disorders, many of them serious but each comparatively rare, increased mutation may affect certain universal and important 'biometrical' characters such as intelligence or life-span. In this way, it is possible that continued small genetically-significant exposures of a population may affect, not only a corresponding small number of individuals seriously, but also most of its members to a correspondingly small extent. While less easy to detect, this second kind of effect on a population could also be serious.

"Unfortunately, the great majority of the genes affecting the 'biometrical' characters are not individually detectable and so can only be studied collectively and with difficulty. In consequence, far less is known about them than about genes responsible for individually detectable changes, and very little indeed about their response to irradiation, even in the best-studied experimental organisms. Hence it is impossible, at the present time, to estimate with any assurance the effect upon biometrical characters of any given level of irradiation of human populations. Much further research throughout this field is therefore needed.

"The Committee emphasizes the urgent necessity for well-planned investigations which may lead to a better understanding of the mechanism of mutation and the eventual possibility of controlling this process. More information is needed on the effect of radiation in inducing mutations in man. Indeed, even the dose required to double the normal mutation rate in man is not known with any accuracy . . .

General Conclusions. "The exposure of mankind to radiation at present arises mainly from natural sources, from medical and industrial procedures, and from environmental contamination due to nuclear explosions. The industrial, research, and medical applications expose only part of the population, while natural sources and environmental sources expose the whole population. The artificial sources to which man is exposed during his work in industry and in scientific research are of value in science and technology. Their use is controllable, and exposures can be reduced by perfecting protection and safety techniques. All applications of X-rays and radioactive isotopes used in medicine for diagnostic purposes and radiation therapy are for the benefit of mankind and can be controlled.

"Radioactive contamination of the environment resulting from explosions of nuclear weapons constitute a growing increment to world-wide radiation levels. This involves new and largely unknown hazards to present and future populations; these hazards, by their very nature, are beyond the control of the exposed persons.

"The Committee concludes that all steps designed to minimize irradiation of human populations will act to the benefit of human health. Such steps include the avoidance of unnecessary exposure resulting from medical, industrial, and other procedures for peaceful uses on the one hand, and the cessation of contamination of the environment by explosions of nuclear weapons on the other. The Committee is aware that considerations involving effective control of all these sources of radiation involve national and international decisions which lie outside the scope of its work.

"Certain general conclusions emerge clearly:

(*a*) Even the smallest amounts of radiation are liable to cause deleterious genetic, and perhaps also somatic, effects.

(*b*) Both natural radiation and radiation from fall-out involve the whole world population to a greater or lesser extent, whereas only a fraction of the population receive medical or occupational exposure. However, the irradiation of any groups of people, before and during the reproductive age, will contribute genetic effects to whole populations insofar as the gonads are exposed.

(*c*) Because of the delay with which the somatic effects of radiation may appear, and with which its genetic effects may be manifested, the full extent of the damage is not immediately apparent. It is therefore important to consider the speed with which levels of exposure could be altered by human action.

"It is clear that medical and occupational exposure, and the testing of nuclear weapons, can be influenced by human action; and that natural radiation and the fall-out of radioactive material already injected into the stratosphere, cannot."

The only point of disagreement in the 15-nation committee was whether or not to call for an "immediate cessation" of nuclear weapon tests, as proposed by the Soviet representative. This recommendation was opposed by the majority on the ground that it was beyond the jurisdiction of the committee and involved "national and international decisions which lie outside the scope of its work." The Soviet recommendation was supported only by Czechoslovakia and the United Arab Republic (Egypt), with Belgium and India abstaining. A. SOUTH AFRICA. — Foreign Liabilities and Assets.

The results of a preliminary census of the Union's foreign liabilities and assets, made by the Reserve Bank of South Africa in 1957, were published on July 9, 1958.

Foreign Assets. These amounted to £405,000,000, consisting of (*a*) gold holdings—£79,400,000; (*b*) official sector assets (Government, Reserve Bank, and commercial banks)—£121,600,000; (*c*) private assets—£204,000,000, or 50.4 per cent of the total. Of the latter amount, £107,700,000 represented private sector investment (direct and indirect) in the Rhodesian Federation, whilst £55,000,000 of private money was invested in the United Kingdom.

Foreign Liabilities. These totalled £1,394,100,000 and included British holdings of South African investments at £864,000,000 (61.97 p.c. of the total); U.S. investments at £170,600,000 (12.24 p.c.); French investments at £73,700,000 (5.28 per cent); Swiss investments at £57,200,000 (4.10 p.c.); Rhodesian investments at £31,800,000 (2.28 p.c.); investments by other sterling area countries at £38,100,000 ((2.74 p.c.); and investments by other countries at £91,500,000 (6.56 p.c.). In addition there was a liability of £67,200,000 (4.83 p.c.) to the International Monetary Fund and the International Bank.

Of the total investments by foreign countries in the Union, £181,100,000 were official investments; £760,500,000 direct private investments; and £452,500,000 indirect private investments. An analysis of British investments in the Union showed that £68,100,000 were official investments, £522,700,000 direct private investments, and £273,200,000 indirect private investments; of the U.S. investments £10,900,000 were official, £125,400,000 direct private investments, and £34,300,000 indirect private investments.

All estimates referred to December 31, 1956.—(Cape Times)

A. UNITED STATES. — Failure of First Attempt to launch Moon Rocket.

The first attempt to launch a "lunar probe" rocket to the moon, made by the U.S. Air Force on Aug. 17 at Cape Canaveral, ended in failure when the rocket exploded at a height of 50,000 feet only 77 seconds after launching. The fragments fell into the Atlantic about ten miles off the Florida coast.

The "lunar probe" was a four-stage vehicle (known as *Thor-Able I*) standing 100 ft. high and consisting of the following parts:

(1) First (bottom) stage—a *Thor* intermediate-range ballistic missile standing 62 ft. high, weighing more than 50 tons, and generating a thrust of about 150,000 lb.

(2) Second stage—a 12 ft *Aerojet-General* rocket designed as the second stage of the U.S. Navy's *Vanguard*. It weighed over two tons and generated a thrust of about 7,500 lb.

(3) Third stage—a new solid-fuel rocket with a thrust of 2,500 lb.; it was also designed for the *Vanguard* and had never been tested previously.

(4) Fourth (top) stage—a solid propellant rocket, with a thrust of 3,000 lb., embedded upside-down in an instrument package. This unusual mounting was necessary because of the curved trajectory to the moon, and the need for the rocket to veer in a certain direction when fired.

The vehicle was thus designed to provide the necessary thrust to enable the small instrument package to escape from terrestrial gravity, send it on its 240,000-mile journey to the moon (which would have taken two to three days), and place it in a lunar orbit. Had the experiment succeeded, the first three stages would have been jettisoned one after the other and the fourth and final rocket would have been fired by remote control from Hawaii after it had entered the moon's orbital path. The vehicle as a whole was described by the *New York Times* as resembling "a cylindrical penknife with the chunky *Thor* first-stage the handle and the slim upper three stages the blade."

The instrument package was an apparatus 30 inches in diameter and shaped like a child's spinning-top. It contained (1) an electronic scanning device for taking close-up lunar photographs (including pictures of the far side of the moon, which is never seen from earth) and transmitting them by radio to receiving stations around the world; (2) a magnetometer to measure the magnetic field in space between the earth and the moon, and to ascertain whether the moon possesses a magnetic field; (3) a device for measuring the impact of micro-meteorites; (4) a thermometer to measure temperatures inside the instrument package; and (5) two power batteries. The total weight of the package was 85 lb., of which the instruments accounted for 40 lb.

The experiment involved a number of extremely complex problems relating to the power of the rockets, their trajectory, and the relative motions of the earth and the moon. As the *Thor-Able* vehicle had some 300,000 component parts, and as a fault in any of these parts could cause the rocket to go off course or destroy itself, the long "count down" began on the day before the actual launching, involving a check of all 300,000 components; nevertheless, any final rectifications before the actual launching would have had to be made in less than 20 minutes before firing-time, which was at 8.14 a.m. local time.

The *New York Times* gave the following description of how the fourth-stage rocket would have travelled to the moon if the experiment had succeeded:

"Just before the firing of the third stage, the third and fourth stages were set to be spun around their long axis. The idea was to keep the last stage stabilized in space. Thus the instrument package, when finally on its own, was to sideslip through space with the nose end of its spinal rocket pointed about 130 degrees counter-clockwise from the direction it would be travelling when crossing the moon's orbit. When the rocket was fired, it would exert thrust in direction 130 degrees from the line of travel. The result would be a compromise that would veer the rocket generally in the direction of the moon. But its final speed would be 1,000 miles an hour slower than the moon's 2,287 miles an hour. This would give the moon a chance to catch up and gradually pull back the package into an erratic orbit. . . Only by curving the trajectory from earth to moon was it feasible to manoeuvre the last rocket so that it could perform such spatial acrobatics."

The explosion occurred in the first stage of the rocket assembly (i.e. the *Thor* missile), which should have burned for 157 seconds before falling away; instead, it functioned for only half that period. The tiny radio transmitters in the instrument-container continued to send back information for two minutes after the explosion, indicating that there had been no fault in the guidance system. The U.S. Defence Department said that "the cause of the malfunction will not be known until telemetric data have been processed," adding that "the United States will schedule another space flight experiment at a later date."

Major-General Bernard A. Schriever (head of the Air Force ballistic missile programme) expressed the opinion that there had been a leak or rupture in the Rocketdyne engine of the *Thor*; he added, however, that it was not a "fundamental failure," that the rocket had functioned perfectly in all other respects, and that there would be another lunar probe test "on or about Sept. 14." General Schriever pointed out that the *Thor* missile had been successfully fired on six out of seven previous occasions.—(New York Times - N.Y. Herald Tribune)

B. AVIATION. — Dutch Airliner Disaster.

One of the worst disasters in the history of civil aviation occurred on Aug. 14 about 130 miles off the west coast of Ireland, when a Super-Constellation airliner of Royal Dutch Airlines (K.L.M.) crashed into the Atlantic with the loss of all 99 persons on board—the Dutch crew of eight, and 91 passengers of several nationalities (85 adults, five children, and three babies). The airliner—the *Hugo de Groot*—was on a flight from Schiphol (Amsterdam) to New York *via* Shannon Airport and Gander, Newfoundland.

Intensive searches were carried out over a wide area by vessels in the vicinity—including four French trawlers, the Canadian destroyer *Crusader*, and the Irish corvette *Macha*—and also by aircraft of the Irish Army and R.A.F. Coastal Command. Bodies, wreckage, and empty semi-inflated dinghies were found, but no survivors, and the search was called off after about 36 hours. Thirty-four bodies in all were recovered and landed at Galway, whilst parts of the airliner's wreckage were picked up and flown to Holland for detailed examination. Officials and doctors of the K.L.M. flew to Ireland to assist in the investigations and to draw up a report for submission to an official inquiry to be held in The Hague; a K.L.M. spokesman said that a "most microscopic" investigation would be carried out to ascertain the causes of the disaster, possibly involving the use of underwater television and deep trawls to recover the airliner's engines from the ocean bed.

An inquest on the 34 persons whose bodies were recovered was held in Galway on Aug. 18; the jury found that they had died from "multiple injuries due to a violent impact sustained in an aircraft over the Atlantic, there being no evidence to show the cause of the impact." Post-mortem examinations were carried out by Dr. J. D. Kennedy (Professor of Pathology at University College, Galway), who stated that the pattern of injury in the bodies of all the victims was essentially the same—the cause of death in every case being multiple injuries, fractures, and haemorrhages due to violent impact. He could find nothing to indicate that the injuries were caused by an explosion, nor was there any internal or external evidence of death being due to drowning; the evidence pointed to a pressurisation failure as the most likely cause of the disaster, though this could only be established after extensive and detailed investigation.

Of the 34 bodies recovered, 12 were identified and flown to their home countries for burial. The bodies of the 22 unidentified victims were buried on Aug. 19 in a common grave at St. Mary's Cemetery, Galway, after an inter-denominational funeral service.

The death-roll in the K.L.M. disaster has been exceeded on only two occasions in civil aviation history—on July 1, 1956, when 128 people lost their lives when two U.S. airliners collided over the Grand Canyon, Arizona (see 15031 C); and on June 18, 1953, when 129 U.S. Servicemen were killed in a *Globemaster* crash near Tokio (see 13137 C). The worst air crash in the British Isles was that of March 12, 1950, when 90 people were killed in the Glamorgan disaster—see 10604 B.

C. LITERATURE. — Book Selections, July-August.

Selected books published in Great Britain, the United States and France are given below:

Great Britain. Baillie, Eileen—"The Shabby Paradise: The Autobiography of a Decade." Life in London's East End in the Early Nineteen-hundreds. (Hutchinson, 16s.)

Bassett, R.—"1931: Political Crisis." (Macmillan, 42s.)

Dumaine, Jacques—"Quai d'Orsay, 1945-51." Translated from the French and published posthumously. (Chapman & Hall, 30s.)

Kennan, George F.—"The Decision to Intervene." Soviet-American Relations, 1917-1920, Volume II. (Faber & Faber, 50s.)

McElwee, William—"The Wisest Fool in Christendom: The Reign of James I and VI." (Faber & Faber. 25s.)

Perowne, Stewart—"The Later Herods: The Political Background of the New Testament." (Hodder & Stoughton, 25s.)

Tremayne, Penelope—"Below the Tide: War and Peace in Cyprus." (Hutchinson, 16s.)

Vailland, Roger—"The Law." Prix Goncourt Novel, translated from the French (*La loi*). (Jonathan Cape, 15s.)

United States. Colum, Mary and Padraic—"Our Friend James Joyce." (Doubleday, New York, $4.00)

France. Chevallier, Gabriel—"Lyon 2000." The Story of a City. (Presses Universitaires de France, Paris)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 16271 B.)**

D. IRAQ. — Return of Rashid Ali.

The Baghdad newspaper *Jumhuriyeh*, which is closely associated with the Republican Government, announced in August that Rashid Ali al-Gailani—Prime Minister during the anti-British revolt of 1941—was returning to Iraq after 17 years' exile in Saudi Arabia and latterly in Egypt. (Times)

(Prev. rep. Rashid Ali, 7700 A.)

A. CEYLON. — Communal Riots in Sinhalese and Tamil Areas. - Proclamation of State of Emergency. - Ban on Federal Party. - Exchange of Refugees between Colombo and Jaffna. - Relaxation of Emergency Regulations. - Adoption of Tamil Language (Special Provisions) Bill. - Release of Federal Party Leaders.

The most violent communal disturbances for over 40 years occurred throughout Ceylon during the last 10 days of May and at the beginning of June, and were not suppressed until the Government had proclaimed a state of emergency. The Prime Minister, Mr. Bandaranaike, stated on July 4 that 159 people had been killed between May 26 and June 26, including those killed by the armed forces and the police; unofficial estimates, however, ranged from 300 to 500.

The Prime Minister's statements on the riots, and foreign correspondents' despatches, suggested that the disturbances had been carefully planned beforehand by Sinhalese extremist organizations with considerable funds at their disposal. For some weeks before the riots a boycott campaign had been organized in Sinhalese areas against Tamil shopkeepers and small businessmen, many of whom were forced to close down, and threatening messages were sent to Tamils in Colombo and elsewhere by telephone, duplicated letters, or printed leaflets. The boycott was organized by a section of the Buddhist priesthood, which produced the most influential propagandists for Sinhalese communalism; they had been largely responsible for Mr. Bandaranaike's victory in the 1956 elections, and for his abandonment in April last of his agreement with the Federal Party on the linguistic question (see 16177 A).

The disorders began on May 22, when a Sinhalese mob stopped a train taking delegates to the Federal Party's annual convention at Vavuniya (160 miles N. of Colombo), murdered four of them, and assaulted and robbed the rest. Another train carrying delegates was derailed on the following day outside Batticaloa (Eastern Province) as a result of sabotage, two policemen and a railway worker being killed and 15 passengers seriously injured. The Tamils retaliated by assaulting Sinhalese motorists passing through their areas.

During the next few days riots broke out in many parts of the North-Central and Eastern Provinces, and on May 25 the police admitted that in some places the situation was "completely out of hand." Bands of Sinhalese colonists from irrigation and land development schemes, armed with guns and swords, attacked Tamil villages and set fire to houses; a crowd of about 1,000 strong was turned back by the police on May 26 when marching on Batticaloa, and in the same area police and Army patrols were ambushed on several occasions. Some of the worst excesses occurred in and around the Buddhist holy city of Polonnaruwa (North-Central Province), where houses were burnt down and seven Tamils killed when they jumped down a well to escape from the rioters. By May 27 the riots had spread to all parts of the island; at this stage they were of such violence that in many places Tamils were indiscriminately murdered in the streets by hooligan elements.

In Colombo the rioting began on May 26, when 44 cases of arson were reported, and continued for three days. Tamils were beaten, robbed, and sometimes stripped naked in the streets, while Tamil-owned shops and houses were looted and set on fire. The evidence of planned organization of the riots was particularly strong in Colombo; the rioting in each area was carried on by hooligans from other parts of the city, who were carried to and from the scene in lorries and private cars, and Tamil-owned buildings had been carefully marked beforehand for destruction. The Army and police, which had received strict instructions not to fire on the rioters, were powerless to restore order.

After deputations of leading citizens and foreign embassies had appealed to the Government to take action, and the Opposition *Nava Lanka Sama Samaja* party (N.L.S.S.P.) had threatened to call on the people to defend themselves, the Government declared a state of emergency throughout Ceylon on May 27 and called on the armed forces to maintain law and order. A curfew from 6 p.m. to 6 a.m. was introduced; meetings and processions were banned; officers of the police and the armed forces were empowered to search houses, seize goods, and arrest people without warrant; and a strict censorship was imposed on the Press, which was forbidden to publish any information on the emergency other than that released by the Government. The Federal Party, whose convention at Vavunya had decided on May 25 to launch a civil disobedience campaign from Aug. 20 as a protest against the abrogation of the language agreement, was declared illegal, and the *Jatika Vimukti Peramuna* (National Liberation Front), a Sinhalese communal organization, was likewise prohibited.

Security forces on the same day opened fire on unruly mobs in the Southern, Western, Central, and North-Western Provinces. In Colombo, Army and Navy patrols fired three times on May 28 to disperse disorderly crowds, and shot dead three men caught in the act of looting or arson. Known criminals were arrested under the emergency regulations, and warning was given that arson, looting, unlawful assembly, and sabotage of essential services would be punishable by the death penalty.

As a result of these measures, order was re-established throughout the island by June 1, except in the Batticaloa district and in the Jaffna Peninsula (a predominantly Tamil district in the extreme north of Ceylon), where disturbances continued for some days longer. Several attacks were made on Government property; the living quarters at Jaffna airport were burnt down during the night of May 29-30, and on the following night every Customs post in the Kayts area was raided and weapons and ammunition stolen. All residents of the Batticaloa district possessing firearms were ordered on May 29 to surrender them to the police, a similar order being issued in the Jaffna Peninsula on June 2. In view of the dangerous situation in these areas, all inland commercial flights were suspended on June 6, and the aircraft which thereby became available were used to take troops to Jaffna and Batticaloa. Parts of the Regular and Volunteer Reserves of the Army (about 400 officers and men) were called up for active service on June 9, and on the same day Mr. Bandaranaike ordered the early formation of two battalions of volunteers from amongst ex-servicemen, consisting of 800 officers and men.

At an emergency session of the House of Representatives on June 4, **Mr. Bandaranaike** said that the Federal Party's campaign against the use of the "Sri" symbol on buses had given Sinhalese extremists an opportunity to start a counter-campaign, and that the latter movement "disclosed a certain organization and pattern which certainly leads to the conclusion that it was not merely a spontaneous outburst of resentment." Both these campaigns, however, had been dying down when certain incidents (e.g. the murder of a Sinhalese in the Batticaloa area on May 15), together with the unfortunate coincidence that the Federal Party convention had been fixed for May 23-25, had caused the situation to take a turn for the worse. After reviewing the course of the riots, Mr. Bandaranaike said that in parts of the Northern and Eastern Provinces there appeared to be "a movement against the State and against the Government." Police and troops had been fired on; Government buildings had been destroyed or damaged; and telephone and telegraph lines had been repeatedly cut, with the result that the Government had had difficulty in communicating with those areas. "Indeed," the Prime Minister added, "a situation had arisen which presumably may have been inherent in the policies and programmes of certain persons to bring the Government completely to a standstill."

Under the emergency regulations 58 members of the Federal Party were placed under house detention between June 5-9, including the eight Federal M.P.s and a Senator; only one Sinhalese was detained—Mr. K. M. P. Rajaratna, leader of the *Jatika Vimukti Peramuna*. [Mr. Rajaratna was elected to the House of Representatives as a Government supporter in 1956; he became Junior Minister of Posts, but resigned a few months later and was subsequently unseated on technical grounds. His wife was elected to represent his former constituency in September 1957—see 16177 A.]

A serious problem was created by the thousands of members of minority communities who took refuge in police stations and other Government buildings. Five British ships and a French ship were requisitioned by the Government on June 2 to take 9,426 Tamil refugees from Colombo to Jaffna; the operation—directed by the Ceylon Navy—was carried out in two stages during the nights of June 2-3 and 5-6, under conditions of complete secrecy. About 2,100 Sinhalese refugees were similarly transferred by sea from Jaffna to Colombo on June 3 in a requisitioned Japanese ship.

An organized campaign of threats against all minority communities, similar to that against the Tamils which had preceded the riots, was launched during June. Leaflets and anonymous letters were sent to British and other European residents, and also to native Christians, Moslems, and Hindus, warning them that "Ceylon is only for the Buddhists" and that if they did not leave the country by Dec 31 they would be "liquidated just as the Tamils were." In a broadcast on June 18 Mr. Bandaranaike referred to this campaign and to threatening letters which had been sent to Sinhalese residents at Trincomalee, and declared that the Government would deal "most drastically with all those responsible."

As confidence was re-established during June and July the emergency regulations were progressively relaxed.

Normal train services and long-distance bus services were gradually restored from June 9, and schools in many provinces were reopened on June 11. Two days later Mr. Bandaranaike directed that "Peace

Committees" should function as advisory and consultative bodies to co-operate with the authorities in maintaining peace, to associate the population as a whole with the Government's activities and the maintenance of law and order, and to "mobilize" all the forces of "sanity and stability" in their areas. The Peace Committees would consist of the existing District Co-ordinating Committees, chairmen of urban councils and village committees, local M.P.s and Senators, and co-opted members.

The curfew, the length of which had been gradually reduced, was finally lifted on July 12. The Government withdrew on July 5 the power of search, seizure, and arrest without warrant conferred on police and service officers under the emergency regulations, but restored it on the following day, no explanation being given. An official spokesman said that persons with bad police records arrested as a preventive measure during the emergency would be released, with the exception of known "rabble-rousers" and those previously convicted of grave crimes.

Censorship regulations were tightened on June 18, however, to forbid the Press to publish any information about Cabinet business without permission.

The Commonwealth Press Union, in a telegram to Mr. Bandaranaike, strongly protested on June 24 against the stringency of the censorship, which, it said, prevented the objective reporting of the situation; it commented that such "Draconian measures" were almost without precedent in Commonwealth countries in time of peace, and asked that the censorship imposed on Press messages leaving the country and reports from abroad relating to Ceylon should be lifted. Following this protest, the censorship was relaxed. As from June 26 the Press, which had been excluded from Parliament since the proclamation of the state of emergency, was permitted to report parliamentary proceedings subject to the right of the authorities to forbid publication of matter relating to the emergency, whilst editorial comment and articles on the internal situation were permitted from June 30. During the next few days the Senate and the House of Representatives set up censorship committees for the release of press reports of their proceedings.

The Governor-General (Sir Oliver Goonetilleke), in the Speech from the Throne to a joint session of Parliament, said on June 24 that the Government would "take the measures required to restore peace, goodwill, and confidence among the various sections of the people" and would "introduce early legislation for a reasonable use of the Tamil language." The speech was delivered first in Sinhalese and then in English, a Tamil translation being circulated to the members with the other two versions.

During the debate the N.L.S.S.P. moved an amendment regretting that the Speech from the Throne offered no hope of an early end to the emergency, and accusing the Government of being responsible for the situation through its "communalist policy." Another amendment calling for the formation of a Tamil State as a separate Dominion within the British Commonwealth was moved by Mr. Suntharalingam (Tamil Resistance Front) but was ruled out of order.

In moving the Opposition amendment on July 1, **Mr. Soysa** (N.L.S.S.P.) said that they were "living in conditions where rule by order and regulation has well-nigh nullified the rule of Parliament and a state of military rule prevails." **Mr. Suntharalingam** asserted that "the *de facto* separation of Ceylon has now taken place and should be given *de jure* recognition," adding that partition was the only logical, historical, cultural, and economic way out of the problem of Tamil-Sinhalese conflict. **Mr. Kandiah** (Communist) accused the Government of violating the freedom of M.P s and the sovereignty of the Legislature by preventing the Federal Party members from attending Parliament; he alleged that the Prime Minister had made the Tamils—the injured people—feel that they were the guilty party.

Mrs. Rajaratna, on the other hand, denounced the Government's proposed Bill for the "reasonable use" of Tamil. If correspondence with the Government in Tamil were allowed, she asserted, Tamil would automatically become the national language, whilst if Government examinations were conducted in Tamil, Tamils would swamp the Government service. **Mr. de Zoysa** (Parliamentary Secretary, Minister of Labour, Housing, and Social Services) maintained that Tamils held a disproportionate number of posts in the public service, and that "undue emphasis" had been placed on the allocation of money to Tamil areas for social services, at the expense of Sinhalese areas. **Mr. Tennekoon** (People's United Front) declared that the only way to achieve national unity was to accept one language as the official language of the country; that language could only be Sinhalese, which was the language of the majority. The debate gave rise to angry scenes at one stage when, in reply to an appeal by **Mr. Kotelawala** (N.L.S.S.P.) for parity between Sinhalese and Tamil, **Mr. Gunawardena** (Minister of Agriculture and Food) interjected: "Parity will never come in this country."

Replying to the debate on July 4, **Mr. Bandaranaike** said that the emergency powers could now be eased, but not completely lifted. "Should I remove the emergency today and release the Federal Party leaders," he continued, "there might still be another holocaust in this country by their starting *satyagraha*. There shall not be an opportunity for any *satyagraha* in this country, with all its implications. Nor, indeed, is there going to be a place for extremism for the other section" (i.e. the Sinhalese).

The Tamil Language (Special Provisions) Bill.

Mr. Bandaranaike introduced this Bill in the House of Representatives on July 17, after he had submitted it to a conference of Buddhist priests for approval. Its provisions were as follows:

(1) Tamil pupils in Government or assisted (*Swabasha*) schools would be entitled to receive instruction through the medium of the Tamil language.

(2) When Sinhalese had been made a medium of instruction in the University of Ceylon, the Tamil language would also become a medium of instruction for those students who, prior to their admission to the University, had been educated in Tamil.

(3) Persons educated in Tamil would be entitled to be examined in that language for admission to the Public Service, subject, however, to the condition that according to regulations to be made they should either have a sufficient knowledge of Sinhalese or acquire such knowledge within a specified time after admission to the Public Service. The latter concession (i.e. admission to the Public Service subject to the acquisition of a knowledge of Sinhalese within a specified period thereafter) would nevertheless come to an end once the Government was satisfied (i) that there were sufficient facilities for the teaching of Sinhalese in those schools in which Tamil was a medium of instruction; and (ii) that the abolition of the above-mentioned concession would not cause undue hardship.

(4) Correspondence between persons educated in Tamil and any official, or between any local authority in the Northern or Eastern Provinces (i.e. the predominantly Tamil-speaking areas) and any official, might be conducted in the Tamil language.

(5) In the Northern and Eastern Provinces, Tamil might also be used for prescribed administrative purposes without prejudice to the use of Sinhalese for such purposes.

Before the Bill came up for its second reading, it became known on Aug. 1 that Mr. Bandaranaike had rejected a request by Dr. Perera (the Leader of the Opposition) that all M.P.s then under house arrest under the emergency regulations—i.e. the eight members of the Federal Party and Mr. Rajaratna—should be released immediately. Mr. Bandaranaike had, however, offered to allow the Federal Party M.P.s to attend the debate under police escort, but had been informed by Mr. Chelvanayakam (the Federal Party leader) that they could not accept this suggestion, which they regarded as an affront to the dignity of the House.

When the second reading debate was due to start on Aug. 5, almost all the remaining members of the Opposition left the Chamber after explaining their objections to the debate.

Dr. Perera, speaking on behalf of the N.L.S.S.P., maintained that the Bill did not give the Tamil language a proper official status, and that until this was done the unity of the people of Ceylon could not be achieved. Furthermore, he objected to the debate taking place while the state of emergency was still in force, declaring that under these conditions both the Sinhalese and Tamil masses had been deprived of the democratic right to discuss the Bill freely. He also objected to the debate because of the continued detention of the Federal Party M.P.s and their inability to take part in the parliamentary proceedings.

Similar statements were made on behalf of the United National Party, the Tamil Congress and the Communist Party. When the debate began, only two members of the Opposition remained in the Chamber—Mr. S. D. Bandaranaike, who had recently been expelled from the Prime Minister's *Sri Lanka* Freedom Party, and Mrs. Rajaratna, the wife of Mr. K. M. P. Rajaratna.

Mr. Bandaranaike, who moved the Bill's second reading, stressed that the language question could be solved neither by Sinhalese extremism nor Tamil extremism. They had to find "some middle way where the Sinhalese interests are reasonably and fairly safeguarded and where justice is also done to the Tamil section of our fellow-citizens." After denouncing both those Sinhalese who demanded "that only Sinhalese should have the right to live in the country" and those Tamil extremists who wanted "a Tamil empire embracing Tamils in South India, East Africa, and Malaya," Mr. Bandaranaike declared: "We have differences . . . of race, religion, language, and customs. But above those we have one common factor—that we are all human beings faced with common problems." In this situation the only reasonable solution was that while Sinhalese, spoken by 70 per cent of the citizens, should be made a link between the various communities—just as English had been previously—the religious, linguistic and other requirements of their other fellow-citizens must be recognized, so that all sections of the people could live "as friends and brothers and not as slaves or inferiors."

The Prime Minister castigated the Opposition parties for their decision not to take part in the debate and for leaving the Chamber "without having the courage to express their views on this Bill"; in particular he derided the Communists, "who have now begun to talk of democracy." As regards the Federal Party M.P.s, he disclosed that he had offered them his own car to take them to Parliament for the debate, but they had refused. He defended the Government's decision not to release them from house detention at the present stage, alleging that there was a danger of their starting a *satyagraha* or civil disobedience movement in the North.

Refuting the argument that Parliament should not deal with the Bill as long as there was a state of emergency, Mr. Bandaranaike said that "everybody has considered and discussed the language issue threadbare during the last two years" and that Opposition members "know exactly where they stand." The Government was "not going to be bluffed" by such arguments and felt that it was its duty to carry on with the Bill, which had already been postponed too long and should have been introduced simultaneously with the Official Language Bill—an omission which he now regretted.

Dealing with the provisions of the Bill, Mr. Bandaranaike emphasized that the only meaning of an "official language" was that that language was "recognized for necessary official acts"—i.e. in due course official records and similar documents would be kept in the official language and documents recognized by a court would also have to be in that language, though there might be a translation for purposes of convenience. As regards the regulations to be made under the Bill concerning correspondence, he pointed out that under the Official Language Act the *status quo* would be preserved until Dec. 31, 1960; after that date any Tamil would have the right to correspond in the Tamil language, although the position of Sinhalese as the official language would be preserved. Thus a Tamil could be sent a reply in Sinhalese, but for his convenience a Tamil translation or a Tamil version of the substance of the reply would be attached. With regard to the use of Tamil for certain administrative purposes in the Northern and Eastern Provinces, Mr. Bandaranaike defended this concession on the ground that there were a very large number of Tamil citizens living in those areas.

In the ensuing debate the Bill was supported by all M.P.s representing the Moslems and other minorities. **Mr. C. R. Beligammana** (Parliamentary Secretary to the Minister of Local Government and Cultural Affairs) announced, however, that he would defy the party Whip and vote against the Bill, having been instructed to do so by the *Sri Lanka* Freedom Party branch in his constituency.

The Bill was finally passed later the same day by 46 votes to three (Mr. S. D. Bandaranaike, Mrs. Rajaratna, and Mr. Beligammana). On the following day Mr. Beligammana was expelled from the *Sri Lanka* Freedom Parliamentary Party for voting against the Government.

The state of emergency, which had been extended for one month from June 27, was extended for further monthly periods from July 27 and Aug. 27 "in the interests of public security and the preservation of public order, and for the maintenance of supplies and services essential to the life of the community." Mr. Bandaranaike announced on July 31 that 6,302 people had been arrested for offences under the emergency regulations; that cases had been filed against 3,630; and that the total number of persons detained for security reasons since the state of emergency had been 2,254, of whom 524 were still under detention.

On the instructions of Mr. Bandaranaike, the 58 Federal Party leaders who had been under house detention since the beginning of June were released on Sept. 5. Mr. Rajaratna, the leader of the *Jatika Vimukti Peramuna*, was also released from house detention at the same time.—(Ceylon Government Information Department, Colombo - Times - Daily Telegraph - Manchester Guardian - The Hindu, Madras) **(16177 A.)**

A. AUSTRALIA - MALAYA. — Trade Agreement.

A trade agreement between Australia and the Federation of Malaya—the first such treaty made by Malaya as an independent country—was signed in Kuala Lumpur on Aug. 26.

According to a joint statement issued by the two Governments, Australia agreed to abolish with immediate effect the import duty on Malayan rubber (subject only to the satisfactory disposal of rubber grown in Papua and Australian New Guinea); not to treat synthetic rubber more favourably in tariffs than natural rubber; to continue to allow Malayan tin imports to enter free of duty; and not to reduce her present preference margin for Malayan timber, which is one of the principal Malayan exports to Australia.

In return, Malaya agreed to import at least 80,000 tons of Australian flour annually; to investigate why less Australian flour was being bought at present in the Federation; and, if necessary, to act "to protect Australia against unfair trading practices of European and other flour exporters." Malaya also undertook to admit Australian wheat and tallow free of duty; to cut the duty on Australian cheese; and to maintain existing preferences on Australian processed milk, butter, canned fruits, undressed leather, and accumulator parts.

The joint statement expressed the belief of both countries in fair trading, and their determination to try to restore stability in prices of primary products.

The Australian Trade Minister (Mr. McEwen), stated that the two countries had sought no special trading rights from each other, and that the guiding principle in the new agreement had been the protection of a trading partner from unfair practices such as subsidized exports. In this spirit Australia had declined an offer of cheap Russian tin, and had warned Australian tin consumers not to buy it.

B. INDONESIA. — Cabinet Reorganization. - Sentences for Attempted Assassination of President Sukarno. - Scheme for Allocation of Export Proceeds.

President Sukarno announced a reshuffle of the Indonesian Cabinet on June 25, involving the following changes: (*a*) Mr. R. Muljomiseno became Minister of Trade *vice* Mr. Sunardjo, who left the Cabinet; (*b*) Colonel Suprajogi became Minister of State for Economic Stabilization, a new post; (*c*) Mr. Wahib Wahab was appointed Minister of State for Civil and Military Co-operation, also a new post; (*d*) Professor Mohammad Yamin became Minister of State without portfolio; (*e*) the Ministries of Manpower Mobilization and Inter-regional Affairs were dissolved. Mr. A. M. Hanafi (who hitherto held the Manpower Mobilization portfolio) became a Minister of State, while Dr. Ferdinand Tobing (the former Minister of Inter-regional Affairs) became Minister of State for inter-island migration.

Mr. Rachmat Muljomiseno, a banker, and Mr. Wahab are both members of the *Nahdlatul-'Ulama*; Colonel Suprajogi had been Acting Commander in West Java and is closely associated with General Nasution, the Army Chief of Staff; and Professor Yamin, Minister of Justice and of Education in former Cabinets, is a leading protagonist of the Indonesian territorial claim to Dutch New Guinea.

Dr. Djuanda (the Prime Minister) stated on the same day that there would be no change in policy and that the Government would "remain faithful to our independent and active foreign policy." In internal matters it would concentrate on economic stabilization and increased production, and would follow the decisions of the national conferences of 1957 concerning the granting of an extensive autonomy to the provinces and a "just and rational" division of export revenues between the provinces and the Central Government.

The Minister of Finance (Dr. Slamet) announced on July 28 a scheme for the allocation of export proceeds to the exporting regions. Under this scheme (retrospective from July 1) 10 per cent of the foreign exchange proceeds of its exports would go to the region concerned and another 10 per cent to the Central Government, whereas in the past the whole 20 per cent was taken up by the Government. In addition, exporting regions would receive 30 per cent of all foreign currency generally received through exports, for the implementation of their development projects. Non-exporting regions would receive direct aid from the Government.

The trial opened before a military court in Jakarta on April 28 of three young men (Jusuf Ismail, Saadon bin Mohammed, and Tasrif bin Hussein) charged with the attempted assassination of President Sukarno on Nov. 30, 1957; with causing the deaths of a number of people, including children; and with participation in a conspiracy to overthrow the Government and change the régime by unconstitutional means. A fourth defendant (Tasim bin Abubakar) was indicted for possessing firearms without a licence, and for having been a member of an organization engaged in criminal activities. All four accused pleaded guilty, the first three being sentenced to death on Aug. 13 and the fourth to 20 years' imprisonment. Another 71 persons, including some Army officers, are in custody on charges of being involved in the assassination plot, but have not yet been brought to trial.—(Indonesian Embassy Press Department, London) **(Prev. rep. Cabinet, 15514 A; Assassination Attempt, 15903 E; Division of Export Proceeds, 15421 A.)**

C. WHALING. — International Whaling Commission. - Restriction of Whale Catches.

The tenth annual meeting of the International Whaling Commission took place at The Hague on June 24-28 under the chairmanship of Dr. S. J. Lienesch (Netherlands).

In view of the concern expressed by the Commission's Scientific Sub-Committee regarding the state of whale stocks, the Commission decided to recommend to member-countries (1) that the catch limit for the 1958-59 season should remain at the equivalent of 14,500 blue whales [one blue whale is considered the equivalent of two fin whales or 2½ humpback whales]; (2) that the former whale sanctuary in the Antarctic should be re-established as from the 1959-60 season, subject to a further review in June 1959; (3) that there should be no change in the opening date of the Antarctic whaling season. It was also resolved to continue for further periods of five years (*a*) the existing prohibition of the killing of blue whales in the Northern Hemisphere, due to expire in 1960; (*b*) the agreement for the protection of humpback whales in the North Atlantic and in one sector of the Antarctic, due to expire in 1959.

The meeting was attended by representatives of Australia, Canada, Denmark, France, Great Britain, Iceland, Japan, Netherlands, New Zealand, Norway, South Africa, Sweden, the U.S.S.R., and the U.S.A., and by observers from Italy and Portugal.—(Lloyd's List and Shipping Gazette)

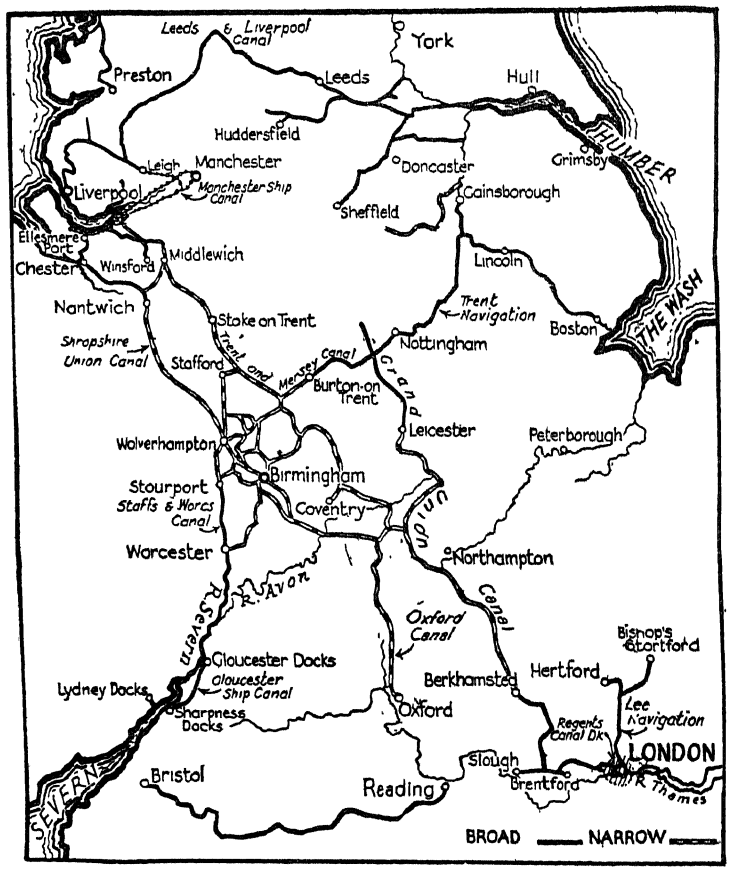
A. UNITED KINGDOM. — Report of Committee of Inquiry into Inland Waterways. - Recommendations on Future of Canals.

The Committee of Inquiry into Inland Waterways, appointed in February 1956 (see 14725 A), published its report on July 28, 1958, as summarized below.

Proposals for Class A and Class B Waterways.

The committee recommended that about 1,315 miles of waterways in England, now vested in the British Transport Commission, should be made into "an integrated and efficient transport system" and be grouped into two classes—"A" and "B," of about 380 and 935 miles respectively. It stated that Class A waterways, which had benefited under the B.T.C.'s £5,500,000 improvement programme, at present earned an operating surplus of about £300,000 a year and would probably continue to show a profit. Waterways in Class B—mainly "narrow" canals with many locks and often with circuitous routes—operated at an annual loss of about the same figure, but provided important navigational links and had other economic uses.



The map shows the principal canals of England. (*Financial Times*)

The Committee stressed that waterways in Class A should no longer be expected to subsidize the remainder, and that operating surpluses should be devoted to their maintenance and improvement. It felt, however, that doubt and insecurity about the future of Class B waterways should be removed by a commitment to maintain the navigable system to a prescribed standard for at least 25 years.

The report listed Class A and Class B waterways as follows:

Class A. Aire and Calder Navigation; Fossdyke Canal; Gloucester and Sharpness Canal and the River Severn (including Sharpness Docks), Grand Union Canal (Regent's Canal Dock and Brentford to Berkhamsted); Kennet and Avon (Avon section); River Lee below Enfield Lock; Sheffield and South Yorkshire Navigation; River Trent; River Weaver (including Weston Point Dock); and River Witham.

Class B. Ashby Canal (used section); Birmingham Canal Navigations; Calder and Hebble Navigation; Coventry Canal; Grand Union Canal above Berkhamsted, Kensington Canal; River Lee (above Enfield Lock) and River Stort; Leeds and Liverpool Canal; Oxford Canal (northern and southern sections); St. Helens Canal; Shropshire Union Canal (main line); Stourbridge and Stourbridge Extension Canals; Stratford-on-Avon Canal (northern section); Trent and Mersey Canal; and Worcester and Birmingham Canal.

Class B Waterways.

The committee felt that the main economic obstacle to the commercial use of Class B waterways was the number of "deterrents to enterprise" which they presented to potential users. It recommended:

(1) Their restoration within five years to widths and depths which would allow the largest craft built for use on them to navigate safely with full payloads (cost estimated as "at least £3,500,000").

(2) Abolition of the existing system of tolls levied on the amount of goods carried, and the substitution of an annual licence fee per vessel amounting to £1 per ton capacity (equivalent to about £25 a year for a "narrow boat") and covering all craft carrying up to 60 tons. Licensed vessels should be entitled to carry goods on any Class B waterway without further charge.

As regards finance, the committee recommended that funds for the restoration work and to meet the expected annual deficit on Class B waterways should be provided by direct Exchequer payments.

Waterways outside Classes A and B.

It was recommended that individual redevelopment schemes should be prepared for each waterway and that, although every length of waterway should be considered as a whole, this should not prevent the application of different treatments to different sections e.g. one section might be eliminated, another transferred to some body willing to take it over, and a third retained. The report stressed that those waterways were "not necessarily doomed" since they might be of use for other purposes than navigation (e.g. for drainage). An impartial tribunal on the lines of the War Works Commission should be set up to deal with cases in which the proposed treatment was disputed.

Proposals for Individual Waterways.

The committee recommended consideration of the following proposals:

(*a*) Improvement of the Grand Union Canal to allow 90-ton craft to load or unload in the Port of London and carry cargo without trans-shipment between London and Birmingham.

(*b*) The building of a new waterway usable by large craft to link the Mersey with Wolverhampton, *via* the Weaver.

The committee also reviewed the case of the Kennet and Avon Canal but found no justification for restoring the Bath-Reading section for through navigation; it recommended, however, that due weight should be given to its amenity and recreational values.

Recreational Uses of Inland Waterways.

The committee considered that more use should be made of waterways by anglers and by pleasure boats (which at present provided a revenue in fees and dues of about £28,000 a year), provided that such uses were not allowed to interfere with navigational needs. It suggested that a system of registering and licensing pleasure craft should be introduced.

Administration.

The committee was divided on the question of the administration of the proposed new waterways system. The chairman and three other members recommended that all nationalized waterways should continue to be vested in and administered by the British Transport Commission, which, however, should delegate substantial powers to a separate body, including three members of the Commission and four drawn from general industry. The other four members of the committee, however, recommended the setting-up of an independent Inland Waterways Corporation consisting of nine Government-appointed directors, including three part-time members chosen for their experience in local government, water supply, land drainage, etc.

The committee did not consider that any inland waterways at present outside B.T.C. jurisdiction should be nationalized, but recommended that the B.T.C. should have power to acquire any independent waterway if it was expedient to incorporate it in the national system. It was also recommended that the mass of special Acts under which the nationalized canals were at present administered should be swept away and replaced by a modern code of rights and duties.

With regard to waterways in Scotland, the committee recommended (i) that the Caledonian and Crinan canals should continue as navigational waterways; (ii) that the Crinan Canal should be improved, both working deficits and improvement costs being borne by the State; (iii) that the future of the Edinburgh and Glasgow Union, Forth and Clyde, and Monkland canals should be reviewed and development schemes prepared for them.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14725 A.)**

B. CANADA - BURMA. — Diplomatic Relations.

The Canadian Secretary of State for External Affairs (Dr. Smith) announced on Aug. 8 that the Governments of Canada and Burma had agreed to enter into diplomatic relations at embassy level. The Canadian High Commissioner in the Malayan Federation (Mr. A. R. Menzies) had accordingly been appointed concurrently as Ambassador to Burma, while the Burmese Ambassador in Washington (Thado Maha Thray Sithu U Win) had been concurrently appointed Ambassador to Canada.—(Department of External Affairs, Ottawa)

SEPTEMBER 6—13, 1958

A. LATIN AMERICA - UNITED STATES. — Vice-President Nixon's Goodwill Tour of Latin America. - Hostile Demonstrations in Peru and Venezuela. - Brazilian Proposals for Strengthening of Inter-American Relations and Economic Development of Latin America. - Correspondence between Brazilian and U.S. Presidents. - Dr. Milton Eisenhower's Visit to Central America.

Vice-President Richard M. Nixon, accompanied by Mrs. Nixon, paid a goodwill visit to eight Latin American countries —Uruguay, Argentina, Paraguay, Bolivia, Peru, Ecuador, Colombia, and Venezuela, in that order—between April 28 and May 14. In the course of his tour he had discussions with the Presidents and leading Ministers of the countries visited, the talks dealing with inter-American relations in general and the problems of the various countries in particular, with special reference to U.S. policy *vis à-vis* Latin America.

In two of the countries visited—Peru and Venezuela—Mr. Nixon had an extremely hostile reception from large crowds which staged violent anti-American demonstrations and subjected him to personal abuse and attempted personal assault. The demonstrations were for the most part organized and led by Communist or pro-Communist elements, and consisted predominantly of students and young people.

Mr. Nixon had a cordial reception in Uruguay, Argentina (where he attended President Frondizi's inauguration), Paraguay, Bolivia, Ecuador, and Colombia, though sporadic anti-American demonstrations were staged in Montevideo and Bogotá by a few hundred persons, mostly youths. On his arrival in Lima on May 7, however, over 1,000 Communist-led demonstrators assembled in the main square of the Peruvian capital chanting anti-American slogans and carrying placards denouncing Mr. Nixon, the United States, and "Yankee imperialism." On the following day Mr. Nixon had to abandon a projected visit to San Marcos University (Lima) when he and his entourage were surrounded at the entrance to the building by a crowd of 2,000 jeering students and adults; the Vice-President and those with him were showered with bottles, eggs, oranges, and stones and subjected to abuse—Mr. Nixon himself being spat upon and his neck grazed by a stone flung at him. Many of the demonstrators carried placards bearing the words "Nixon Go Home" and "Nixon is a viper." Earlier in the day Communist demonstrators had desecrated an American flag forming part of a wreath laid by Mr. Nixon at the monument of José San Martin, one of the heroes of the Spanish American war of independence.

Still more violent scenes occurred in Caracas on May 13, when Vice-President Nixon arrived in the Venezuelan capital on the last stage of his Latin American tour. The motor cavalcade in which he and Mrs. Nixon were travelling from the airport in separate cars was attacked on the outskirts of the city by a mob armed with clubs and stones; before the rioters were dispersed by tear-gas they had broken through the motor-cycle escort, flung stones and rotten vegetables at the cars containing Mr. and Mrs. Nixon, smashed the windows of both vehicles, ripped U.S. flags from them, and spat on the Vice-President and his wife. Both Mr. and Mrs. Nixon were covered with broken glass but escaped injury.

Mr. Nixon's first engagement was to have been a visit to the National Pantheon to lay a wreath on the tomb of Simon Bolivar; as a violently hostile crowd—estimated at 30,000, and described by the *New York Times* correspondent as "in lynching mood"—was gathered outside the building, Mr. Nixon drove instead to the U.S. Embassy and announced his intention of remaining there until the Venezuelan Government could guarantee the personal safety of Mrs. Nixon and himself. Meanwhile, the mob tried to attack the U.S. military and naval attachés, who were both at the National Pantheon in anticipation of Mr. Nixon's arrival; the two officers were escorted to safety by steel-helmeted Venezuelan infantry with fixed bayonets.

Before leaving Caracas, Vice-President Nixon held a press conference at the U.S Embassy at which he said: "It is not easy to endure the kind of activity we went through today. It certainly is not pleasant to be covered from head to foot with spit and to have a man spit directly in the face of my wife. We have a situation where the Communists were able to gain great support from students in this country because of what has happened here over the last ten years. What we are seeing is a terrible legacy of the dictatorship of Pérez Jimenez." Mr. Nixon expressed the opinion that much of the hostility he had encountered was caused by the fact that the former Venezuelan dictator and his police chief (Pedro Estrada) were living in the United States.

The discourtesy, hooliganism, and mob violence to which Mr. Nixon had been subjected on his visits to Peru and Venezuela were strongly denounced by political leaders in both countries, and by the entire Peruvian and Venezuelan press; in both countries it was emphasized that the riots had been directed by Communist and anti-national elements and were deplored by all decent citizens. The Peruvian Embassy in Washington expressed its "profound regret" at the "deplorable" incidents in Lima, while the Venezuelan Government tendered an apology for the indignities and danger to which Mr. Nixon had been subjected in Caracas.

After the incidents in Lima, President Eisenhower sent a personal telephone message to Mr. Nixon paying tribute to his "courage, patience, and calmness" in the face of "radical agitators," and expressing his conviction that the vast majority of Peruvian citizens deplored the incidents. On May 13, after the hooliganism in Caracas, President Eisenhower ordered four companies of marines and paratroops to Caribbean bases as a precautionary measure; the President's Press Secretary (Mr. Hagerty) said that Mr. Eisenhower was greatly concerned at the assaults on Mr. Nixon, while the Defence Department stated that troops had been flown to Puerto Rico and Guantanamo (Cuba) so that they could "be in a position to co-operate with the Venezuelan Government if assistance is requested." A sharply-worded Note was sent to Caracas reminding the Venezuelan Government that it was expected to guarantee Vice-President Nixon's personal safety.

Mr. and Mrs. Nixon received an enthusiastic welcome from great crowds on their return to Washington on May 15; they were greeted at the airport by President Eisenhower, all members of the Administration, Congressional leaders, and the entire corps of Latin American ambassadors. High tributes were paid to the dignity and personal courage displayed by Mr. Nixon during his visits to Peru and Venezuela.

The U.S. Senate Foreign Relations Committee decided on May 16 to launch an investigation into the background of the wave of anti-Americanism displayed in certain Latin American countries during Mr. Nixon's tour. The committee's chairman (Senator Theodore Green) stated that testimony would be taken from officials of the State Department and the Central Intelligence Agency, after which the committee would "decide on a course of action to be taken with respect to further studies of U.S. policy in relation to Latin America."

President Kubitschek's Proposals for Strengthening of Inter-American Relations. - Correspondence with President Eisenhower. - Mr. Dulles's Visit to Rio de Janeiro.

The President of Brazil, Senhor Juscelino Kubitschek, sent a letter to President Eisenhower on June 6 expressing his conviction that "the aggressions and vexations undergone by Vice-President Nixon" during his visit to Latin American countries had made it imperative to take steps to place inter-American solidarity on a firmer basis. President Kubitschek wrote:

". . . The widespread reaction of aversion on the part of the Governments and public opinion in the very nations in which occurred those reprehensible acts against the courageous person of the Vice-President, constitutes proof that such demonstrations proceeded from a factious minority. Nonetheless, it would be hardly feasible to conceal the fact that, before world public opinion, the ideal of Pan-American unity has suffered serious impairment. These disagreeable events . . . have imparted an inescapable impression that we misunderstand each other on this Continent. The propaganda disseminated by the tools of anti-Americanism is apparently now directed toward presenting such supposed misunderstandings as actual incompatibility and even enmity between the free countries of the American community. Fortunately, this is far from being the truth. . . .

"In addressing these words to your Excellency, my sole purpose is to acquaint you with my deep-seated conviction that something must be done to restore composure to the continental unity. I have no definite and detailed plans to that effect, but rather ideas and thoughts which I could confide to your Excellency should an early opportunity to do so arise. I might venture to state at this juncture, however, that the hour has come for us to undertake jointly a thorough revision of the policy of mutual understanding in this Hemisphere and to conduct a comprehensive reappraisal of the proceedings already in motion for the furtherance of Pan-American ideals in all their aspects and implications. The time has come for us to ask ourselves the pertinent question whether or not all of us are doing our utmost to weld the indestructible union of sentiments, aspirations, and interests called for by the gravity of the international situation.

"As a soldier who led democracy to victory, as an experienced statesman, and, above all, as a man sensitive to the ways of truth, your Excellency is in an unique position to evaluate the seriousness of the question which I postulate with the exclusive purpose of defining and subsequently eliminating an entire range of misunderstandings that are easily capable of being removed at this moment, but which may perhaps become a malignant growth should we fail to give it proper and timely attention.

"It is hoped that the unpleasant memory of the ordeal undergone by Vice-President Nixon will be effaced by the results of earnest efforts towards creating something deeper and more durable for the defence and preservation of our common destiny. As I have already said, it is advisable that we correct the false impression that we are not behaving in a fraternal way in the Americas; but besides this corrective effort, and in order that it may be durable and perfect, we must search our consciences to find out if we are following the right path in regard to Pan-Americanism. . . ."

President Eisenhower's reply was personally conveyed to President Kubitschek on June 9 by Mr. Roy R. Rubottom jr. (Assistant Secretary of State for Inter-American Affairs), who visited Rio de Janeiro for the purpose. After saying that President Kubitschek had "described accurately both the

PUBLIC

existing situation and the desirability of corrective action," and expressing his pleasure that the Brazilian President had " taken the initiative in this matter," President Eisenhower wrote :

" While your Excellency did not suggest any specific programme to improve Pan-American understanding, it seems to me that our two Governments should consult together as soon as possible with a view to approaching other members of the Pan-American community and starting promptly on measures that would produce throughout the continent a reaffirmation of devotion to Pan-Americanism, and better planning in promoting the common interests and welfare of our several countries. There is a wide range of subjects to be discussed and explored, including, for example, the problem of implementing more fully the Declaration of Solidarity of the Tenth Inter-American Conference held at Caracas in 1954 [see 13669 A].

" Because I deem this matter so important, I am instructing Mr. Rubottom to deliver my letter to you personally in Rio de Janeiro, and to explore with you further your thinking on these matters. Your thoughts and ideas thus obtained at first hand can be the subject of further consultation through normal diplomatic channels, preparatory to a later visit to Brazil by the Secretary of State."

As stated in President Eisenhower's letter, Mr. Dulles visited Rio de Janeiro on Aug. 4-5 for discussions with President Kubitschek and Brazilian Ministers. It was stated at the conclusion of the talks (*a*) that Brazil and the United States were agreed on the desirability of convening a meeting of the Presidents of all countries of the American continent, with the aim of drawing up programmes for the economic development of Latin America ; and (*b*) that the Washington ambassadors of all Latin American countries, together with Mr. Dulles, should act as a special committee for preparing such a Presidential conference.

Brazilian Proposals for Economic Development of Latin America.

On Aug. 16 the Brazilian Government presented identical Notes to all the Latin American countries, and also to the United States, proposing that the above-mentioned special committee should work out a detailed programme for the economic development of Latin America. The specific proposals were not released, but it was authoritatively stated in Rio that they were based on the following points :

(1) The application of private capital in the under-developed areas of Latin America.

(2) An increase in the volume of loans and other forms of direct assistance to Latin America, including the possible establishment of an Inter-American Development Bank

(3) Strengthening of the internal economies of the Latin American countries, particularly with a view to combating inflation.

(4) Stabilization of prices of basic raw materials produced in Latin America.

(5) Consideration of the impact of the European Common Market on Latin America.

(6) The possibility of the eventual creation of a Latin American Common Market.

(7) Technical assistance to Latin American countries

Dr. Milton Eisenhower's Visit to Central America.

Dr. Milton Eisenhower, president of Johns Hopkins University (Baltimore) and brother of President Eisenhower, paid a three-weeks' visit in July to the six Central American countries —Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, and Panama—at the request of the U.S. President. He was accompanied by representatives of the State and Treasury Departments, the Export-Import Bank, and the Development Loan Fund. Dr. Eisenhower was cordially welcomed in all the countries visited, and there were no untoward incidents. On returning to Washington (Aug. 1) he presented a report to his brother urging (1) " the imperative need for loans—not grants—in every country visited " ; (2) the need for an adequate U.S. response " to the appeal of Latin American nations for more stable relationships between raw commodity prices and the prices of manufactured products " ; and (3) " the urgent and immediate need to bring about throughout the hemisphere a clear, accurate understanding of U.S. policies, purposes, programmes and capabilities."

(New York Times - Brazilian Government Bulletin)

A. OMAN. — Gwadur ceded to Pakistan.

The British Foreign Office announced on Sept. 6 that the Sultan of Muscat and Oman had agreed " as a gesture of good will " to cede to Pakistan the small enclave of Gwadur, on the coast of Baluchistan. The transfer took formal effect from Sept. 8, when the Prime Minister of Pakistan (Mr. Firoz Khan Noon) thanked Britain for her help in bringing the negotiations with the Sultan to a successful conclusion.

Gwadur is a small port with a population of 5,000, the surrounding enclave covering an area of about 300 square miles ; it is 250 miles from Muscat across the Gulf of Oman, and 300 miles west of Karachi. The enclave had been under the control of the Sultanate of Muscat and Oman since the end of the 18th century. (Daily Telegraph - Manchester Guardian)

B. CZECHOSLOVAKIA. — Expulsion of British Embassy Official. - British Repudiation of Czech Allegations against Mr. Bedford.

The Czechoslovak Embassy in London announced on June 27 that Mr. E. P. Bedford, described as Second Secretary of the British Embassy in Prague, had been declared *persona non grata* and expelled from Czechoslovakia in connexion with an incident on April 3, when he was alleged to have tried to help a Czechoslovak national to escape to Western Germany by hiding him in the boot of his car.

The Embassy's statement said that the Czechoslovak national in question – Ladislav Machácek had been apprehended on April 3 " in most unusual circumstances " when, with the alleged help of Mr. Bedford, he had attempted to escape to Western Germany. It was stated that frontier guards, attracted by " unusual movements and noise in the rear of the car," had made investigations and found Machácek hidden in the boot. In the subsequent interrogation Machácek was alleged to have told the frontier guards that he had agreed to pay Mr. Bedford 40,000 crowns (£2,000) to help him escape from Czechoslovakia, of which 10,000 crowns had been paid as an advance payment and the balance of 30,000 was to have been paid to Mr. Bedford on reaching Western Germany.

After stating that Machácek had been arrested and that Mr. Bedford had returned to Prague, the Embassy statement continued : " Further investigation brought to light the fact that Machácek had maintained contacts with Bedford for a longer period of time, and transmitted to him information of military character important from the viewpoint of the country's defence. Bedford assured Machácek that should he find himself in direct danger because of his espionage activities, he would take him illegally to Western Germany. This situation did occur, and Bedford did in fact attempt to take Machácek illegally in his car to Western Germany . . ."

The British Foreign Office issued a statement on the same day saying that it was clear that Mr. Bedford had been the object of " a deliberate frame-up on the part of the Czech authorities." It was worded as follows :

" While Mr. Bedford's papers were being examined at the frontier post, the guards discovered a man hidden in the boot of his car. Mr. and Mrs. Bedford were detained for a few hours, and subsequently allowed to return to Prague It was there established by H.M. Chargé d'Affaires that Mr. Bedford, without the knowledge of his superiors, had in fact agreed to smuggle a Czech national (Machácek) out of the country.

" On April 4 the Czech authorities delivered a Note of protest, and declared Mr. Bedford *persona non grata* on the ground that he had abused his position as a diplomatist and violated Czechoslovak law. The Czech authorities did not at the time allege that Mr. Bedford had engaged in any intelligence activities, nor have they so alleged until the present statement.

" It is clear that this was a deliberate frame-up on the part of the Czech authorities. There can otherwise be no explanation of the fact that when Mr. Bedford's car was stopped at the frontier post, Machácek, who was concealed in the boot, immediately made loud noises designed to attract attention. When he was discovered by the Czech frontier guards, he showed no sign of fright or distress. Mr. Bedford has throughout denied that he undertook this operation for money, as the Czech authorities allege."

In a statement to the House of Commons on July 2, Mr. Selwyn Lloyd said that the " circumstances surrounding the discovery of Mr. Machácek in the boot of Mr. Bedford's car make it clear that the whole affair was a prepared trap " ; that the subsequent charges of espionage made against Mr. Bedford were unfounded ; and that there was no evidence whatever that Mr. Bedford had received money, as alleged by the Czechoslovak authorities.

It was conjectured in London that Machácek might possibly have played the role of an *agent provocateur*. Moreover, it was regarded as significant that the allegations against Mr. Bedford had been made within 48 hours of a case in which an electronics engineer living at Worthing had been committed for trial on five charges under the Official Secrets Act ; the engineer in question, Bryan Frederick Linney, was charged with having communicated to the Czechoslovak Military Attaché in London (Colonel Oldrich Pribyl), on various dates between June 1, 1957, and Jan. 31, 1958, information likely to be of great or potential assistance to an enemy. Linney pleaded " guilty " to all five charges and admitted having received £500 from Colonel Pribyl (who had previously left Britain) for disclosing vital secrets. He was sentenced to 14 years' imprisonment at Lewes Assizes on July 18. (Times - Daily Telegraph)

C. CEYLON. — Cargo Handling at Port of Colombo.

The transfer of cargo handling operations at Colombo from private firms to the new Government-owned Port (Cargo) Corporation took place on Aug. 1. The transfer was originally planned for June 30, but had to be postponed owing to the proclamation of a state of emergency following the communal riots.—(Ceylon Government Information Department)

A. CHINA - UNITED STATES. — U.S. Reasons for Non-Recognition of Communist China. - Declaration by State Department. - Suspension of Sino-American Ambassadorial Talks at Geneva.

The U.S. State Department issued a statement on Aug. 9 setting out in detail the reasons why the United States refused to recognize Communist China. The document, entitled "U.S. Policy regarding Non-recognition of the Chinese Communist Regime," was worded as follows :

"Policy toward Communist China has been an important issue since the Communists came to power there, and it is of critical significance to the United States and the free world today. In the U.S.A. the issue is a very real one to the vast majority of the people.

"As a result of Korean and Chinese Communist aggression in Korea, the United States suffered 142,000 casualties . . . Nevertheless, despite the emotions thus engendered and the abhorrence of the American people for the brutality and utter lack of morality of Communist systems, the policy of the U.S. Government toward China has necessarily been based on objective considerations of national interest. It also reflects a continuing appraisal of all available facts.

"Basically the U.S. policy of not extending diplomatic recognition to the Communist regime in China proceeds from the conviction that such recognition would produce no tangible benefits to the United States or to the free world as a whole, and would be of material assistance to Chinese Communist attempts to extend Communist dominion throughout Asia.

"It is not an 'inflexible' policy that cannot be altered to meet changed conditions. If the situation in the Far East were so to change in its basic elements as to call for a radically different evaluation of the threat Chinese Communist policies pose to U.S and free world security interests, the United States would of course readjust its present policies However, the course of events in the Far East since the establishment of the Chinese Communist regime in 1949 has thus far confirmed the U.S. view that its interests and those of the free world are best served by withholding diplomatic recognition from the regime in Peking.

"The basic considerations on which U.S. policy toward China rests are twofold. First, the Soviet bloc, of which Communist China is an important part, is engaged in a long-range struggle to destroy the way of life of the free countries of the world and bring about the global dominion of Communism. The Chinese Communists have made no secret of their fundamental hostility to the United States and the free world as a whole, nor of their avowed intention to effect their downfall. Today their defiance of, and attacks on, the non-Communist world have reached a level of intensity that has not been witnessed since the Korean War.

"The second basic factor is that East Asia is peculiarly vulnerable to the Communist offensive because of the proximity of the free countries of that area to Communist China, the inexperience in self-government of those which have recently won their independence, their suspicions of the West inherited from their colonial past, and the social, political and economic changes which inevitably accompany their drive toward modernization.

"The Chinese Communists see the victory of Communism in Asia as inevitable; and now that they control the vast population and territory of mainland China, they are utilizing the advantages these give to encompass their ends. The Chinese Communist leaders have shown by their words and acts that they are not primarily interested in promoting the welfare of their people while living at peace with their neighbours. Their primary purpose is to extend the Communist revolution beyond their borders to the rest of Asia and thence to the rest of the world. Liu Shao-chi, the second-ranking member of the Chinese Communist party, has said: 'The most fundamental and common duty of Communist party members is to establish Communism and transform the world into a Communist world.' Mao Tse-tung himself has said that his regime's policy is 'to give active support to the national independence and liberation movements in countries in Asia, Africa, and Latin America.' That these are not empty words was shown by Chinese Communist aggression in Korea and the provision of arms and other assistance to the Communist rebels in Indo-China.

"U.S. policy in Asia, as elsewhere in the world, is to promote the domestic welfare and to strengthen the independence of free nations. Because of the proximity of many Asian nations to mainland China, and the disparity in size and power between them and Communist China, this can be done only if the Communist threat is neutralized. . . . The United States has sought to accomplish this by military assistance to the nations directly in the path of Chinese Communist expansion—Korea, Taiwan [Formosa], and Vietnam—and by a system of mutual defence arrangements with other nations of the area. We have been successful in this effort, and since 1954 the Chinese Communists have not been able to make further gains through the open use of military force.

"Efforts to halt Communist expansion cannot be confined to military deterrence alone. Counter-measures against Chinese Communist subversion and political infiltration are equally necessary. This is especially so as, since 1955, Peking has increasingly resorted to propaganda, subversion, 'people's diplomacy', and political manoeuvring in its dealings with Asian neighbours. Peking seeks to win by this means what it apparently does not dare attempt through military conquest. The United States therefore considers that in preserving the peace and security of Asia, it is as important to be alert to the threat of subversion as to that of open military attack.

"In the effort to block Peking's attempts to extend Communist rule in Asia, the withholding of diplomatic recognition is an important factor. The extension of diplomatic recognition by a great Power normally carries with it not only increased access to international councils but enhances international standing and prestige as well Denial of recognition, on the other hand, is a positive handicap to the regime affected, and one which makes it that much the more difficult for it to pursue its foreign policies with success One basic purpose of U S. non-recognition of Communist China is to deny it these advantages and, to that extent, limit its ability to threaten the security of the area.

"In the case of China there are special considerations which influence U.S. policy with regard to recognition. For one thing, although the Chinese Communists have seized the preponderant bulk of China, they have not completed their conquest of the country. The legitimate government of China continues to exist and in Taiwan is steadily developing its political, economic, and military strength. The Government of the Republic of China [i.e. the Nationalist Government in Formosa] controls the strategic island of Taiwan, and through its possession of a sizable military force—one of the largest on the side of the free world in Asia—presents a significant deterrent to renewed Chinese Communist aggression.

"Recognition of Communist China by the United States would seriously cripple, if not destroy altogether, that government. On the other hand, continued U.S. recognition and support of the Republic of China enables it to challenge the claim of the Chinese Communists to represent the Chinese people, and keeps alive the hopes of those Chinese who are determined eventually to free their country of Communist rule.

"Recognition of Communist China by the United States would have an adverse effect on the other free Governments of Asia which could be disastrous to the cause of the free world in that part of the world. Those nations which are closely allied to the U.S.A. and are striving to maintain their independence on the perimeter of Chinese Communist power, especially Korea and Vietnam, would be profoundly confused and demoralized. They would interpret such action as abandonment of their cause by the United States. They might reason that their only hope for survival lay in desperate measures, not caring whether these threatened the peace of the area and the world.

"Many Governments further removed from the borders of China would see in American recognition of Communist China the first step in the withdrawal of the United States from the Far East. Without the support of the U.S.A. they would be unable long to defy the will of Peking; and some would probably conclude that their wisest course would be speedily to seek the best terms obtainable from Peking. Needless to say, these developments would place the entire free world position in Asia, and particularly that of Japan, in the greatest peril.

"Another special consideration is that large and influential 'overseas' Chinese communities exist in most of the countries of South-East Asia. The efforts of these countries to build healthy free societies and to develop their economies would be seriously retarded if these communities were to fall under the sway of the Chinese Communists; and a grave threat of Communist subversion through these overseas communities would arise Recognition of Communist China by the U.S.A., and the decline in the fortunes of the Republic of China which would inevitably result, would have such a profound psychological effect on the 'overseas' Chinese that it would make inevitable the transfer of the loyalties of large numbers to the Communist side This in turn would undermine the ability of the host countries to resist the pressures tending to promote the expansion of Chinese Communist influence and power.

"Still another factor which must be considered is the effect which recognition of the Communist regime would have on the United Nations. Recognition of Peking by the United States would inevitably lead to the seating of Peking in that body. In the view of the United States this would vitiate, if not destroy, the United Nations as an instrument for the maintenance of international peace.

"The Korean conflict was the first and most important effort to halt aggression through collective action in the United Nations. For Communist China, one of the parties against which the effort of the U.N. was directed, to be seated in the United Nations while still unpurged of its aggression and defying the will of the United Nations in Korea, would amount to a confession of failure on the part of the U.N. and would greatly reduce the prospects for future successful action by the United Nations against aggression.

"Moreover, the Republic of China is a Charter member of the United Nations and its representatives have contributed importantly to the constructive work of that organization. If representatives of the Chinese Communist regime were to be seated in their place and given China's veto in the Security Council, the ability of that body in the future to discharge the responsibility it has under the Charter for the maintaining of international peace and security would be seriously impaired.

"Those who advocate recognition of the Chinese Communists often assume that, by the standards of international law applied to such cases, the Peking regime is 'entitled' to diplomatic recognition. In the view of the United States, diplomatic recognition is a privilege and not a right. Moreover, this Government considers that diplomatic recognition is an instrument of national policy which it is both its right and its duty to use in the enlightened self-interest of the nation. However, there is reason to doubt that, even by the tests often cited

in international law, the Chinese Communist regime qualifies for diplomatic recognition. It does not rule all China, and there is a substantial force in being which contests its claim to do so.

"The Chinese Communist party which holds mainland China in its grip is a tiny minority comprising less than 2 per cent of the Chinese people, and the regimentation, brutal repression, and forced sacrifices that have characterized its rule have resulted in extensive popular unrest. To paraphrase Jefferson's dictum, this regime certainly does not represent 'the will of the populace, substantially declared.'

"Finally, it has shown no intention to honour its international obligations. One of its first acts was to abrogate the treaties of the Republic of China except those it chose to continue. On assuming power it carried out a virtual confiscation without compensation of the properties of foreign nationals, including immense British investments notwithstanding the United Kingdom's prompt recognition of it. It has failed to honour commitments entered into since, including various provisions of the Korean Armistice and the Geneva accord on Vietnam and Laos, as well as the announcement of September, 1955, by which it pledged itself to permit all Americans in China to return home 'expeditiously.'

"The U.S. policy toward recognition of Communist China is thus based on a carefully considered judgment of the national interest. Non-recognition of Peking, coupled with continued recognition and support of the Republic of China, facilitates the accomplishment of U.S. policy objectives in the Far East. Recognition of Peking would perilously hinder the accomplishment of these objectives and would facilitate the advance of Communist power in Asia.

"In the process of determining its policy toward China, the United States has taken into account the various statements and arguments advanced by proponents of extending diplomatic recognition to Peking. One of the most commonly advanced reasons for recognition is that 'reality' must be recognized and 600,000,000 people cannot be 'ignored.' While superficially appealing, both statements themselves overlook the realities of the situation U S. policy is, of course, based on full appreciation of the fact that the Chinese Communist regime is currently in control of mainland China. Indeed, the threat which the Chinese Communist regime poses to free-world security in Asia is, as set forth above, a fundamental consideration in the determination of U.S. policies in the Far East. Our recognition of this was clearly demonstrated by our costly participation in the United Nations action to repel Peking's aggression in Korea

"Similarly, U S policy in no sense 'ignores' the existence and the aspirations of the Chinese people. Its attitude toward the people of China remains what it historically has been—one of friendship and sympathetic understanding It is nonetheless clear that our friendship for the Chinese people must not be permitted to blind us to the threat to our security which the Communist regime in China presents. Moreover, the United States is convinced that the Chinese Communist regime does not represent the true will or aspirations of the Chinese people, and that our policy of withholding recognition from it is in their ultimate interests.

"It is sometimes contended that by recognition of Communist China it would be possible to exert leverage on the Peking regime which might ultimately be successful in weakening or even breaking the bond with Moscow. Unfortunately, there is no evidence to support this belief, and there are important reasons why it is unlikely.

"The alliance between Moscow and Peking is one of long standing; it traces its origin to the very founding of the Chinese Communist party in 1921, in which representatives of the Comintern played an important role It is based on a common ideology and on mutually-held objectives with respect to the non-Communist world. All recent evidence points to the closeness of the tie between the Chinese Communists and the U S.S.R. The Chinese Communists were outspoken in championing the armed intervention of the Soviets in Hungary, and have given unqualified endorsement to the execution of Nagy and the other leaders of the Hungarian revolt. They were also leaders in the recent Communist-bloc attack on Yugoslavia for its attempts to pursue national policies independent of Kremlin control These and other facts make it apparent that the two partners in the Sino-Soviet alliance clearly realize their mutual dependence and attach great importance to bloc unity *vis-à-vis* the free world.

"Furthermore, the alliance with the U.S.S.R. has special importance for the Chinese Communists, since it provides them with a dependable source of arms and military supplies. The Chinese Communist leaders, including Mao Tse-tung himself, came to power through their command of military force. They are, therefore, keenly conscious of the importance of military force to keep themselves in power against domestic and external opposition and to achieve the goals of their foreign policy. It is scarcely credible that they would risk any course of action which could lead to loss of their source of military supplies. For this reason alone, it would seem unrealistic to believe that recognition of Peking by the United States or any other leading nation would have the effect of tempting the Chinese Communists to play a 'Titoist' role. In fact the opposite is quite likely to be the result. Were the United States to grant diplomatic recognition to Peking—with all that this would entail by way of enhanced international prestige—its leaders would most likely feel confirmed in the correctness of their policies and the advantages of continued close co-operation with Moscow.

"It is often alleged that recognition of Communist China is a necessary step to expanding trade relations with that country. However, the facts do not support the contention that trade is dependent on recognition. Great Britain, which recognized Communist China in 1950, has found that she buys more goods from Communist China than Communist China buys from her. Western Germany, on the other hand, does not recognize Peking and enjoys a favourable trade balance with mainland China. In any case, trade opportunities with Communist China are severely limited by a shortage of foreign exchange, which is likely to persist for many years to come. . . . It would therefore seem that over the long run the advantages of trade with Peking would prove more ephemeral than real.

"An argument often heard is that the Chinese Communists are here 'to stay', that they will have to be recognized sooner or later, and that it would be the course of wisdom to bow to the inevitable now rather than be forced to do so ungracefully at a later date. It is true that there is no reason to believe that the Chinese Communist regime is on the verge of collapse; but there is equally no reason to accept its present rule on mainland China as permanent. In fact unmistakable signs of dissatisfaction and unrest in Communist China have appeared in the 'ideological remoulding' and the mass campaign against 'rightists' which have been in progress during the last year. Dictatorships often create an illusion of permanence from the very fact that they suppress and still all opposition. That of the Chinese Communists is no exception to this rule. The United States holds the view that Communism's rule in China is not permanent and that it will one day pass. By withholding diplomatic recognition from Peking it seeks to hasten that passing.

"In public discussions of China policy one of the proposals that has attracted widest attention is that known as the 'two Chinas' solution. Advocates of this arrangement propose that the Chinese Communist regime be recognized as the Government of mainland China while the Government at Taipeh remains the legal Government of Taiwan. They argue that this approach to the Chinese problem has the merit of granting the Communists only what they already control, while retaining for the free world the military strategic bastion of Taiwan. However, it ignores certain facts of basic importance The Republic of China would not accept any diminution of its sovereignty over China and could be expected to resist such an arrangement with all the means at its disposal. If a 'two Chinas' solution were to be forcefully imposed against its will, that Government's effectiveness as an ally and its loyalty to the free-world cause would be destroyed.

"Peking, too, would reject such an arrangement. In fact over the last year Chinese Communist propaganda has repeatedly and stridently denounced the 'two Chinas' concept and, ironically, has been accusing the U.S. Government of attempting to put it into effect. Peking attaches great importance to the eventual acquisition of Taiwan and has consistently reserved what it calls its 'right' to seize Taiwan by force, if need be. There is no prospect that it would ever acquiesce in any arrangement which would lead to the permanent detachment of Taiwan from China.

"The 'two Chinas' concept is not only opposed by Peking and Taipeh; it would be bitterly resented by the Chinese people as an attempt to split their country. Hence, even if such a solution could be imposed by outside authority, it would not be a stable one. Constant policing would be required to avert its violent overthrow by one side or the other.

"It is sometimes said that non-recognition of Peking tends to martyrize the Chinese Communists, thereby enabling them to pose, especially before neutralist opinion, as an innocent and injured party. It would be impossible to deny that there is some truth in this, but this disadvantage is far outweighed by the disadvantage that would result from following the opposite course. It is surely better that some neutralists, who are either unable or unwilling to comprehend the threat inherent in Chinese Communist policies, mistakenly consider Peking unjustly treated than that the allies of the United States in Asia, who are the first line of defence against Chinese Communist expansion, should be confused and demoralized by what to them could only appear a betrayal of the common cause."

The talks at ambassadorial level between the United States and Communist China, which began at Geneva on Aug. 1, 1955, and had continued at intervals for over three years, were temporarily suspended on Dec. 12, 1957, because of the impending transfer of the U.S. negotiator—Mr. Alexis Johnson, the Ambassador in Prague—to the Bangkok Embassy. The meeting on Dec. 12 was the 73rd to be held between Mr. Johnson and the Chinese negotiator—Mr. Wang Ping-nan, the Ambassador in Warsaw.

The U.S. Government subsequently appointed Mr. Edwin W. Martin (First Secretary at the London Embassy) as its representative in the Geneva talks, but the Chinese Communist Government refused to agree to discussions between Mr. Wang and Mr. Martin on the ground that the latter did not possess ambassadorial status; in a statement on April 12, 1958, the Chinese Foreign Ministry insisted that the two countries had agreed in 1955 to hold talks at ambassadorial level, and stated that China could not agree to any "unilateral alteration" of this arrangement by the United States.

On June 30 the Chinese Communist Government demanded that the United States should designate a representative of ambassadorial rank so that the Geneva talks could be resumed "within 15 days"; if this were not done, China would

" consider that the United States had decided to break up the Sino-American ambassadorial talks."

The Chinese statement was accompanied by allegations that the U.S. Government had " attempted to create the false impression of the continuance of ambassadorial talks so as to cover up its activities designed to maintain its occupation of China's territory of Taiwan and to increase international tension." After denouncing what it described as the " U.S. occupation of Taiwan," and saying that it constituted " an act of naked aggression against China," the statement declared that the Chinese people were " not afraid of U.S. aggression . . . and are perfectly strong enough to liberate their territory of Taiwan."

The U.S. State Department issued a statement on the same day rejecting China's 15-day " ultimatum " for the continuation of the ambassadorial talks ; at the same time it was made clear that the United States had neither " downgraded " the Geneva talks nor broken them off. The State Department spokesman (Mr. Lincoln White) explained that since December 1957, when the talks were suspended, the U.S. Government had been considering not only the selection of an ambassador to continue the discussions but also a change in the locale of the meetings. As the frequent visits to Geneva for meetings that proved sterile had been burdensome to U.S. diplomats, the State Department were considering a venue where a U.S. Ambassador could conduct such meetings without leaving his post.

It was announced in Washington on Aug. 3 that the U.S. Ambassador in Warsaw (Mr. Jacob Beam) had been asked to resume ambassadorial talks with Mr. Wang Ping-nan in the Polish capital.—(New York Times) **(Prev. rep. 15667 A.)**

A. NIGERIA. — Minorities Commission Report.

The Willink Commission, appointed " to inquire into the fears of minorities and the means of allaying them " (see 16338 A), completed its investigations in April 1958 and published its report on Aug. 18. The recommendations included the following :

Police Force. There should be only one Nigerian Police Force, as at present, acknowledging dual responsibility to the Federal Government and the Regional Governments but under the direct control of the Federal Government only (see 15747 A). It had been considered that, when Nigeria attained her proposed independence in 1960, regional police forces should be established ; but the Commission held that " no better means of allaying the fears of minorities can be found than the retention of a single strong police force not subject to purely Regional control."

Special Areas. There should be provision in the Constitution for the creation of Special Areas where there were special problems. The Federal Government and the Regional Government concerned would share financial and other responsibilities for development in these Areas, but there should be a Board to initiate supplementary development schemes. It was proposed that part of the Niger Delta should be declared a Special Area in the near future.

Minority Areas. In each of these proposed areas a council would be set up, with a chairman nominated by the Regional Government concerned, for the purpose of (i) bringing to the notice of the Regional Government matters relating to physical and cultural advancement and to economic and social development, and (ii) reporting any discrimination. It was suggested that two such Areas should be created from part of Benin province and the whole of Calabar province.

Annual reports from both Special and Minority Areas would be submitted to the Federal House of Representatives and the appropriate Regional House of Assembly.

Fundamental Rights. Specific fundamental human rights should be embodied in the Constitution. The report defined 16 such rights, based mainly on the U.N. Convention of Human Rights of 1950 and including the following : (i) right to life and liberty ; (ii) right to protection against slavery ; (iii) right to freedom of movement and peaceful assembly ; (iv) right to protection against discrimination ; (v) right to protection against retrospective legislation.

Western Region Territorial Claim. With reference to the Western Region's claim to the Ilorin and Kabba Divisions, at present included in the Northern Region, the Commission recommended (*a*) that there should be no change in the existing boundary except as a result of a plebiscite ; (*b*) that such a plebiscite should be held only if agreed at the forthcoming London Conference in September ; (*c*) that, if held, it should be binding ; and (*d*) that should any area be transferred as a result, at least 60 per cent of the votes cast must have been in favour of transfer.

Rights of non-Moslems in Northern Region. Non-Moslems in the predominantly Moslem Northern Region, who had expressed fears of the application of Moslem law, should be granted the option of being dealt with by non-Moslem courts of justice.

General Conclusions. The Commission had been satisfied that " a real body of fear " existed among the minorities, and that it was inspired by two main causes : (*a*) the use of physical force " by strong-arm groups," which " constitutes perhaps the most serious threat to democracy of which we were told," and (*b*) the fear that—" rightly or wrongly "—no Regional Government, secure in its majority, would respond to the criticism or meet the wishes of its minorities. With regard to (*a*) the Commission was convinced that a Federal Police Force was " the only protection against these party gangs," and that the proper functioning of the magistrates and judiciary depended upon it. As regards (*b*), it believed that subdivision into smaller provinces would " create problems as great as those it sought to cure." Emphasizing its general view that the interests of the minorities would be best protected " at Federal level," the Commission declared : " As the Federal Government grows . . . it will become increasingly important for each party to win every vote it can. Thus, in the working of the democratic machinery the true safeguards of the minorities will be found."

The report was received with satisfaction by the ruling party of the Northern Region (the Northern People's Congress) but was described as " disappointing " by the United Middle Belt Congress, a small political party in the Northern Region which had campaigned for the secession of the Ilorin and Kabba Divisions (see above). The Prime Minister of the Western Region, Chief Awolowo, strongly attacked the report as " a bad and astonishing document," while the Prime Minister of the Eastern Region, Dr. Azikiwe, paid tribute to it as " a studied effort to preserve the corporate existence of Nigeria as a great African nation." The Nigerian Federal Minister of Finance, Chief Okotie-Eboh, welcomed the proposals for the creation of Special and Minority Areas as recognition of the fact that " the minorities' fears are real."

B. UNITED KINGDOM. — Lord Parker succeeds Lord Goddard as Lord Chief Justice of England.

It was announced from 10, Downing-street on Aug. 20 that Lord Goddard would be retiring on Sept. 29 and that the Queen had accepted his resignation as Lord Chief Justice of England. Lord Goddard (81) had been Lord Chief Justice since January 1946, when he succeeded Lord Caldecote.

The son of a solicitor, Lord Goddard was successively Recorder of Poole, Bath and Plymouth from 1917 to 1932. He was subsequently a Judge of the King's Bench Division (1932-38), a Lord Justice of Appeal (1938-44) and a Lord of Appeal in Ordinary (1944-46) prior to his appointment as Lord Chief Justice of England. In the course of a long and distinguished career he had presided over many famous trials, including that of Klaus Fuchs, whom he sentenced to 14 years' imprisonment for conveying atomic secrets to Russia (see 10593 A). He was outspoken in the House of Lords on the questions of capital and corporal punishment, and took a prominent part in the debates on the Death Penalty (Abolition) Bill and the Homicide Bill —see pages 15602, 15605.

The appointment of Lord Chief Justice Parker (58) as Lord Chief Justice of England in succession to Lord Goddard was announced on Sept. 5.

Lord Chief Justice Parker was educated at Rugby and Trinity College, Cambridge, where he took a double first in Natural Sciences. Called to the Bar in 1924, he was subsequently appointed Junior Counsel to the Admiralty (1934) and Junior Counsel to the Treasury (1945) before his appointment in 1950 as a Judge of the King's Bench Division. He became a Lord Justice of Appeal in 1954. Lord Justice Parker was chairman of the tribunal set up in November last to inquire into the alleged Bank Rate " leak " (see 16212 A), and was also a member of the Franks Committee on administrative tribunals (see 16009 A). He is the third son of the late Lord Parker of Waddington, who was a Judge of the Chancery Division and later a Lord of Appeal in Ordinary.

It was also announced on Sept. 5 that the Queen had approved the conferment of a life barony on Lord Justice Parker.

C. SAUDI ARABIA - UNITED ARAB REPUBLIC. — Cairo Talks between President Nasser and Emir Faisal.

The Emir Faisal, Prime Minister of Saudi Arabia, concluded three days of discussions with President Nasser in Cairo on Aug. 17. A brief communiqué stated that the exchange of views had " resulted in complete agreement as well as in the reaffirmation of brotherhood and friendship between the two countries " ; it added that the U.A.R. and Saudi Arabia were both opposed to " the presence of foreign forces on the territory of any Arab State " and condemned " any interference in the affairs of others on the part of any foreign State or States which puts the peace and security of the world in danger." Before leaving Cairo, the Emir Faisal said that all misunderstandings between the two countries had been removed and all previous differences " ironed out."—(Times - Le Monde)
(Prev. rep. 16102 A.)

A. GHANA. — Political and Economic Developments. - Dr. Nkrumah's Visits to Cairo, Ottawa and Washington.- Abolition of Ministry of Justice. - The Preventive Detention Bill. - Report of Kumasi and Asanteman Inquiry Commission. - Industrial Development Plans. - Revision of Volta River Project.

Dr. Nkrumah returned to Accra on June 29 on completion of his tour of the seven independent African countries represented at the Accra Conference of April 1958—Ethiopia, Sudan, Libya, Morocco, Tunisia, the United Arab Republic and Liberia.

During his visit to Cairo, where he had discussions with President Nasser, Dr. Nkrumah said in a Press statement (June 23): "I want to declare Ghana a republic, and this will be done in not more than two years. I think it is proper than Ghana should remain in the Commonwealth just like the Indian type" [of republic]. He confirmed this declaration when questioned at a press conference at Accra on June 30, adding that such a republic would be declared by "constitutional means" and that, whatever form it might take, "ties with the Commonwealth should be preserved."

During a visit to Canada (July 22-23) Dr. Nkrumah had informal talks with Mr. Diefenbaker, the Prime Minister, and addressed a joint session of the Canadian Parliament. He arrived in Washington on July 23 as the guest of the U.S. Government, had discussions with President Eisenhower, Mr. Dulles, and Administration officials, and addressed Congress on July 25.

A joint statement was issued by President Eisenhower and Dr. Nkrumah on July 26 saying (i) that the U.S. Government "would continue to explore," in conjunction with private American interests, means of financial assistance to the Volta River project [see below]; (ii) that the U.S. Government was willing "to consider particular fields" of Ghanaian development "in which it might be able to co-operate through development loans"; (iii) that the U.S. and Ghanaian Governments were agreed that the solution of the present Middle East problems should be found within the framework of the United Nations; (iv) that the two Governments had exchanged views "on the emergence of new African States and the growing importance of the African Continent in the realm of international affairs."

On his return journey Dr. Nkrumah visited Britain on Aug. 3-7 for talks with Mr. Macmillan.

At a press conference in London Dr. Nkrumah expressed his belief that "the U.N. should consider the possibility of quarantining or neutralizing the whole area of the Middle East, with the preservation of sovereignty being guaranteed," and that "the oil resources should be brought under some international arrangement." He also claimed "the right of self-determination and self-government" for all non-independent African territories, "even in the French-speaking parts of Africa."

Recent political and economic developments in Ghana are summarized below under cross-headings.

Ministerial Changes. - Abolition of Ministry of Justice.

It was announced in Accra on July 15 that the Ministry of Justice had been abolished and its functions transferred to other Ministries; the Law Officers' Department would continue as an independent administration under the direct control of the Prime Minister. As a result of this decision, Mr. Ako Adjei (formerly Minister of Justice) was appointed Minister of Labour and Co-operatives *vice* Mr. N. A. Welbeck, who became Minister without portfolio. In addition, the Ministry of Defence and External Affairs was divided into two separate Ministries which remained the responsibility of the Prime Minister, as had been the case with the former single Ministry.

At the opening of the sixth session of the Ghana Parliament on June 17, three leading members of the Opposition (United Party) had crossed the floor of the House to join the Government party. Explaining their action, one of these members (Mr. Mumuni Bawumia) asserted that the Opposition as at present constituted was "neither progressive nor serving the purpose for which it was intended." As a result, the Government now holds 76 seats in the Assembly and the Opposition 28.

The Preventive Detention Bill.

This Bill, under which the Ghana Government sought powers to detain Ghanaians for actions considered "prejudicial to the security of the country and its relations with other countries" (see 16155 A), was first published on July 5. The Minister of Information and Broadcasting (Mr. Baako) explained that although there were already laws to deal with persons engaged in subversive activities, the Bill aimed at forestalling such activities and preventing their taking effect.

The Bill also laid down that any detained person should be informed of the grounds on which he was held within five days, and be given an opportunity to make written representation to the Governor-General, who might suspend the detention order under certain conditions binding on the petitioner. Should these conditions not be observed, the person concerned would become liable to further detention for a period not exceeding five years, within which limit the Governor-General would be empowered to specify the precise length of any detention order. It was proposed that the measure should remain in force for five years, unless the National Assembly decided to extend it.

The Bill was formally introduced on July 14 by Dr. Nkrumah, who said that, in the present unsettled state of Africa, Ghana must always be on its guard against a *coup d'état*. Opposition members opposed the Bill as unnecessary, asserting that its adoption would enable the Government to silence demands for better living conditions.

A Government statement of July 17 announced the immediate deportation of seven non-Ghanaians who were alleged to have ignored a warning to be of good behaviour given by the Minister of the Interior (Mr. Krobo Edusei) a month previously, and to have been "openly abusing the Government and attempting to bring it into disrepute." A cocoa farmer was similarly ordered to be deported on Aug. 27, and a further five "African aliens" on Aug. 31, bringing the total of persons deported for political reasons since August 1957 to 39.

Kumasi and Asanteman Inquiry Commission.

Mr. Justice Sardokee-Addo, who had been appointed by the Government in February as sole commissioner to inquire into the affairs of the Asanteman and Kumasi State Councils (see page 16156), concluded his hearings on June 28.

His findings, published in Accra on Sept. 3 as a White Paper, stated that of £40,000 allocated to building a new palace for the Asantehene, £19,000 had been appropriated by the Kumasi State Council for political purposes and diverted to the funds of the National Liberation (opposition) Party. The report also found that the Lands Department of the Asantehene had been guilty of general maladministration, and that in its dealings with Kumasi lands it had deliberately failed to comply with the provisions of the Kumasi Lands Ordinance of 1943, which had transferred the trusteeship of these lands from the Crown to the Asantehene.

The Government announced on Sept. 3 that it had decided to take over control of the administration of Kumasi lands as soon as possible, and to present to the House of Assembly, as a matter of urgency, the Ashanti Stool Lands Bill, which would transfer to the Governor-General the property rights and interests vested in the Asantehene by the Kumasi Lands Ordinance.

New Currency. - Dr. Nkrumah's Effigy on Coinage.

It was announced in Accra on May 21 that the new issue of coins and currency notes to be put into circulation throughout Ghana in July 1958 would carry the likeness of Dr. Nkrumah. The Government party had first pressed for this change early in 1957, but in the ensuing controversy Opposition leaders had favoured the retention of the Queen's head on the coinage.

Industrial Development Plans.

Dr. Nkrumah issued a statement on Sept. 3 setting forth the Government's policy for industrial expansion. He explained that the plan had been under formulation for some time; that it had been outlined to President Eisenhower during his visit to the U.S.A. in July (see above); and that it was aimed at attracting "private capital and technical know-how" from any source.

Under the plan Ghanaian industries would be divided into three categories: (*a*) those reserved entirely to the Government, viz. railways, electricity, broadcasting, atomic energy, armament manufacture, waterworks, telecommunications, and cocoa exports; (*b*) those in which Government participation was compulsory, viz. narcotics, alcohol, and alcoholic beverages; (*c*) those "freely open to private enterprise," i.e. all industries not included in "the very limited schedules" of (*a*) and (*b*). All new industries would be required to observe three main rules: (i) to recognize trade unions; (ii) to train Ghanaians for "superior posts" and appoint them to such posts "where feasible"; (iii) to develop the use of local raw materials wherever possible.

It was announced on Aug. 12 that the German Federal Government would establish a technical institute in Ghana to train Ghanaians as engineers and craftsmen, as part of a 50,000,000 DM. programme of technical and capital assistance to under-developed countries.

The Volta River Project.

The report was published on July 27, 1956, of the Preparatory Commission appointed by the British and Gold Coast Governments in 1953 to study the Volta River project for the development of hydro-electric power and aluminium production (see 12645 A).

Whereas the White Paper of 1952 had envisaged a cost of about £100,000,000 at the initial stage (producing 80,000 tons of aluminium a year) and £144,000,000 at the final stage (producing 210,000 tons), the Commission's report estimated that the cost would be about £160,000,000 at the initial and £231,300,000 at the final stage based on prices ruling at Sept. 30, 1955. Allowing eight years for completion of the project, and allowing for a further increase of 45 per cent to cover contingencies over that period, the total cost was estimated at £309,000,000.

Although the U.K. Colonial Secretary (Mr. Lennox-Boyd) had told the House of Commons in July 1956 that the British and Gold Coast Governments and the aluminium companies concerned (the British Aluminium Company and Aluminium Ltd. of Canada) had reaffirmed their interest, no firm decisions or commitments were made. Dr. Nkrumah's efforts to secure some alternative support for the scheme remained unsuccessful, but on Feb. 20, 1958, he informed the Ghana House of Assembly that he had made a direct appeal for aid to President Eisenhower.

Explaining the deadlock of the previous 18 months, Dr. Nkrumah said that the Governments which might be interested had taken the view that Ghana should first come to a satisfactory arrangement with the aluminium companies, whilst the companies themselves had required certain assurances in advance. Other difficulties had been the recession in the dollar and sterling areas and the "crippling" increase in the British Bank Rate to 7 per cent.

The project was further discussed during Dr. Nkrumah's visit to Canada and the U.S.A. in July, 1958 (see above), and on Aug. 12 he announced a major change from the original plan which had envisaged the production of electric power and the use of that power to produce aluminium from bauxite as a single entity. Dr. Nkrumah said that it was now proposed to concentrate only on building the Volta dam and producing the power, but to put aside the question of aluminium production until some future date. Claiming that this "change of emphasis" had rekindled interest in the project, he stated that the Kaiser Company of America would arrange a survey to bring the plan for the dam and power production up-to-date, and that President Eisenhower had agreed that the cost of this revision would be shared between the U.S. and Ghana Governments.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Montreal Star) **(Prev. rep. Ghana, 16155 A.)**

A. SIERRA LEONE. — Full Ministerial System. - First Sierra Leone Cabinet.

A Ministerial delegation from Sierra Leone headed by Dr. J. Karefa-Smart (Minister of Lands, Mines, and Labour) had exploratory talks at the Colonial Office in London from Dec. 6-19, 1957, with a view to effecting further development of the 1956 constitutional reforms towards eventual self-government. This was in accordance with the programme of the Sierra Leone People's Party which had won the 1957 elections (see 15708 E and 15160 B).

The talks were presided over by the Colonial Secretary, Mr. Lennox-Boyd, and it was announced at their conclusion that satisfactory agreement had been reached. The resulting proposals for the introduction of a full Ministerial system were published as a White Paper by the Sierra Leone Government on Jan. 14, 1958, and, after being passed in principle by the House of Representatives, were submitted to the Colonial Secretary in March. They were as follows :

(1) The leading Minister would henceforth be known as Prime Minister instead of Chief Minister.

(2) The Governor would consult the Executive Council and act upon its advice, subject to safeguarding his ultimate responsibility for the preservation of "peace and good government." His reserved powers would have to be re-defined, but he would retain responsibility for external affairs, defence, internal security, police, and the Public Service.

(3) The appointments of Chief Secretary and Chief Commissioner would be abolished ; the functions of the former would be allocated to the appropriate Ministries, and those of the latter would be absorbed by alternative administrative arrangements.

(4) The Attorney-General would continue to act as legal adviser to the Government, with a seat in the House of Representatives but without voting rights.

(5) The Financial Secretary would continue to be the principal financial adviser of the Government, but his executive functions would be transferred to a newly-formed Ministry of Finance.

(6) The four *ex-officio* members of the House of Representatives under the 1956 Constitution [i.e. the holders of the appointments mentioned in (3) (4) and (5) above] would no longer be members of the Executive Council, which would in future consist of the Governor (as President), the Prime Minister, and 7 other Ministers chosen from the elected members of the House of Representatives and appointed by the Governor on the recommendation of the Prime Minister.

The changes were approved by the Colonial Secretary at the end of July, and Orders in Council were issued by H.M. the Queen accordingly. The new Constitution came into effect on Aug. 14, with Dr. M. A. S. Margai (the present Chief Minister) became the first Prime Minister of Sierra Leone. The following ministerial appointments were announced :

Dr. M. A. S. Margai	..	Prime Minister, Internal Affairs and Development.
Mr. M. S. Mustapha	..	Finance.
Dr. J. Karefa-Smart	..	Mines, Lands, and Labour.
Mr. D. L. Sumner	..	Communications.
Mr. Kande Bureh ..	.	Works and Housing.
Mr. I. B. Taylor-Kamara		Trade and Industry.
Mr. H. I. B. John	..	Education and Welfare.
Mr. Ngobeh ..	..	Health.
Mr. A. J. Demby ..	..	Natural Resources.
Mr. Y. D. Sesay	.	Information.
Chief R. B. S. Coker	.	Minister without portfolio.

The first session of the House of Representatives under the new Constitution was opened in Freetown on Aug. 21.

The Governor (Sir Maurice Dorman), after reading a congratulatory message from the Colonial Secretary, drew attention to the added responsibilities which the new Constitution had not only on the Ministers but on the House of Representatives as a whole. He pointed out that henceforth the Prime Minister was alone responsible for the choice of his Ministers ; that, for the first time, control of taxation and the Treasury would be in the hands of a Minister and a Sierra Leonean ; and that Treasury officials would no longer be members of the Executive Council or of the House of Representatives.

Disturbances in Diamond Areas.

Disturbances occurred during August 1957 in the Yengema area of the Kono district leased by the Consolidated African Selection Trust Ltd., where the company estimated that 12,000 illicit diamond miners were working. The acting Governor (Mr. Alexander Waddell) gave details of the disturbances in a statement on Sept. 2, 1957.

Mr. Waddell said that on Aug. 23 two security posts on the Trust's property had been destroyed by fire and a further post on the following day, when a small security force attempted to arrest some 50 people before being overwhelmed. The same evening (Aug. 24) the Koidu mining plant had been attacked by a force of "300 trouble-makers" who had done "wanton damage" and stolen diamonds valued at approximately £7,000. In order to release police units from static duties the 1st Bn. Sierra Leone Regiment had been called in on Aug. 29, and a Security Committee for the Kono district formed on Sept. 2.

On Sept. 3 a police force of over 200 men, with military support, made a planned attack on a large encampment of some 3,000 illicit miners, arresting 36 people ; over a hundred more persons were arrested in smaller-scale operations near Musundu, Tefeya and Koidu between Sept. 4-11. Those detained included Africans from neighbouring territories, against whom the operations were mainly directed.

In a statement to the U.K. House of Commons on July 29, 1958, Mr. Profumo (Parliamentary Under-Secretary, Colonial Office) estimated the revenue losses to the Sierra Leone Government through illicit diamond trading as £7,000,000 in 1955 and £10,000,000 in both 1956 and 1957.—(Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey) **(Prev. rep. 15708 E.)**

B. NEW ZEALAND. — Bank Loan in London.

The N.Z. Finance Minister (Mr. Nordmeyer) announced on Sept. 2 that an agreement had been concluded with the Midland Bank in London for a loan to New Zealand of up to £10,000,000 ; the loan would be for a period of two years, would be drawn upon as needed to help New Zealand over her balance-of-payments problems during the next two months, and would bear interest at 1 per cent above the London Bank Rate (i.e. at 5½ per cent at present). Mr. Nordmeyer explained that "because of seasonal factors in the production of our main exports, our overseas funds normally build up in the first half of the year and decline in the second half."

(Directorate of Information, Wellington - Financial Times)

C. EASTERN GERMANY. — Dissolution of Eight Industrial Ministries. - Ministerial Change.

The East German Government decreed on Aug. 1 the final dissolution of the eight industrial Ministries whose abolition had been authorized under the legislation for the decentralization of industry passed in February last.

On the same day it was announced that Herr Ernst Scholz had been appointed Minister of Building in succession to Herr Heinz Winkler, who had died in June as a result of a bathing accident in the Black Sea.—(Der Tagesspiegel, Berlin) **(Prev. rep. 16076 A.)**

D. MOROCCO. — Diplomatic Relations with U.S.S.R.

It was announced in Rabat on Aug. 27 that Morocco and the Soviet Union had decided to establish diplomatic relations at ambassadorial level.—(Le Monde, Paris) **(Prev. rep. 16165 C.)**

A. UNITED KINGDOM. — Coal Industry. - N.C.B. Report for 1957. - Deficit of £5,300,000.

The 12th annual report of the National Coal Board, covering the year ended Dec. 31, 1957, was published on May 14. It showed that the profit on the Board's activities, before charging interest, amounted to £19,800,000, compared with £39,700,000 in 1956. After providing for interest, however, the year's working resulted in a deficit of £5,300,000, compared with a surplus of £12,800,000 in 1956. The 1957 deficit increased the Board's accumulated deficiency to £29,100,000.

The 1957 operational profits included £6,100,000 from collieries, £9,000,000 from opencast working, and £4,300,000 from coke ovens; the corresponding figures for 1956 were £26,500,000, £8,600,000, and £4,400,000. Of the nine divisions, the Northern, North-Eastern, and East Midlands earned profits in 1957, before charging interest, but the Scottish, Durham, North-Western, West Midlands, South-Western, and South-Eastern all incurred losses The highest profit (7s. 6.2d. a ton) was earned by the East Midlands division, whilst the heaviest loss (11s. 6.6d. a ton) was incurred by the Scottish division.

The following information was given in the report:

Output. Saleable output of coal in 1957 totalled 223,600,000 tons, compared with 222,200,000 tons in 1956. Output from N.C.B. collieries at 207,400,000 tons, and from licensed mines at 2,600,000 tons, was virtually the same as in 1956, but opencast production rose by 1,500,000 tons to 13,600,000 tons. Output from Saturday working declined by 300,000 tons to 10,900,000 tons.

Costs, Prices, and Profits. Cost of production of mined coal totalled 81s. 6d. a ton, against 75s 2d. a ton in 1956, the chief increases being in wages (3s. a ton) and materials (1s 6d. a ton). Proceeds per ton from the sale of coal averaged 82s. 1d. (74s. 5d. in 1956), resulting in a profit on colliery operations of 7d a ton (2s. 7d. in 1956). Proceeds per ton from opencast mining averaged 72s. 2d. and costs 58s. 5d., resulting in a profit of 13s. 9d.

The report stated that the increases in coal prices which came into effect on July 1, 1957 (see 15767 A) were expected to yield £32,000,000 in 1957 and £66,000,000 in a full year.

Productivity. Overall productivity remained about the same as in 1956—812 shifts worked per 1,000 tons of saleable coal. Productivity at the coal face, however, showed a slight decline, with 327 shifts worked per 1,000 tons.

Manpower and Shift-working. Total manpower averaged 710,100 and manpower at the coal face 284,800—increases of 6,600 and 1,200 respectively on 1956. The number of shifts worked fell, however, by 0.04 to 4.21 overall and to 4.61 at the coal-face.

Absenteeism. This increased during 1957, averaging 13.8 per cent overall (12.9 per cent in 1956) and 16.2 per cent at the coal-face (15.2 per cent in 1956). The report attributed the increased absenteeism largely to the effects of the influenza epidemic, which cost the industry an estimated 1,700,000 tons of coal in September and October alone.

Accidents. There were 391 fatal and 1,900 reportable non-fatal accidents in 1957, compared with 318 and 1,731 respectively in 1956.

Strikes. Unofficial stoppages and restrictions of work in 1957 numbered 3,771 (the same as in 1956), a rise of 240 in the number of stoppages being balanced by fewer restrictions of work. Coal lost through stoppages and restrictions totalled 1,828,600 tons, against 2,146,500 tons in 1956. As in previous years, stoppages and coal lost in the Scottish, North-Eastern, and South-Western divisions exceeded the figures for all other regions combined.

Mechanization. The drive to increase power-loading at the coal face continued to make rapid progress. In 1957 nearly 54,860,000 tons (23.1 per cent of total deep-mined output) were cut and loaded by machines, compared with 36,420,000 tons (15.5 per cent) mechanically cut and loaded in 1956.

Shortage of Large Coal. The proportion of large coal (over 2 in. in size) in deep-mined output continued to fall, and in 1957 was only 24 per cent of total output—the tonnage having dropped by 13,500,000 in 10 years. The report attributed this to (i) the increased use of explosives at the coal-face; (ii) more widespread mechanization. Alternatives to explosives (e.g. the Armstrong Airbreaker, which breaks up the coal face by compressed air) were being introduced, and the N.C.B. was also trying to accelerate the development of improved power-loading machines able to produce more large coal.

Steps were also being taken to increase the quantity of good class "doubles" (size about 2 in. by 1 in., and particularly suitable for modern grates and stoves) supplied to the domestic market, and to encourage industrial users to take smaller coal (see 16137 A).

Inland Coal Consumption. This totalled 218,400,000 tons, or 5,200,000 tons (2.4 per cent) less than in 1956. The biggest decreases were in industry as a whole (2,000,000 tons less, mainly owing to the greater use of oil by the steel and engineering industries); household deliveries (1,900,000 tons less); gas works (1,400,000 tons less); and railways (700,000 tons less, largely as a result of increased electrification and the use of diesel locomotives). Increases were shown by coke ovens (1,400,000 tons more) and electricity power stations (900,000 tons more).

Exports and Imports. The policy of reducing exports in order to keep down the need for costly imports was continued in 1957; as a result exports totalled only 6,600,000 tons, against 8,100,000 tons in 1956. In addition, 1,200,000 tons were shipped as bunkers. The report explained that when coal stocks rose during 1957 (see below) it was difficult for the N.C.B. to increase its export sales because demand had also fallen on the Continent, and many prospective customers had made long-term contracts with other suppliers.

Imports in 1957 (mainly of large coal) totalled 2,900,000 tons, compared with 5,200,000 tons in 1956.

Stocks. Coal stocks held by merchants and consumers at Dec. 31, 1957, amounted to 18,800,000 tons, or 700,000 tons more than at Dec. 31, 1956. Undistributed stocks at collieries and opencast sites totalled 8,600,000 tons, or 5,600,000 tons more than at Dec. 31, 1956.

Miners' Earnings. The average wage of pieceworkers in the industry increased from 67s. 4d. per manshift in 1956 to 72s. 7d. in 1957 (about 7 8 per cent). Day-wage men received a 5 per cent increase in May, 1957 (see 15530 A).

New Collieries and Colliery Reconstruction. Seven new colliery shafts were completed during 1957 (more than in any other year since nationalization), bringing the total to 26, including 12 at new collieries. A seam survey of colliery output (the first such survey ever made in Britain) had been initiated and was expected to last 12 years.

By Dec. 31, 1957, 228 major colliery reconstruction schemes had been approved since Vesting Day at a cost of £560,000,000, and 62 major schemes had been virtually completed.

Capital Expenditure. This amounted to £103,000,000 in 1957 (against £96,000,000 in 1956), bringing total investment in the industry since Vesting Day to £661,000,000. Of this sum, £289,000,000 had been spent on "work necessary to replace the decline in productivity inherent in an extractive industry"; £218,000,000 on colliery reconstruction schemes and new sinkings; £117,000,000 on ancillary undertakings; and £37,000,000 on new homes for workers.

Sir James Bowman, chairman of the N.C.B. commented on the report in a statement on May 14.

Sir James stressed that the "deterioration in operating results" which had marked the last seven months of 1957 followed the ending of the "bonus shift" system in May (see 15330 A), and had been accentuated by the influenza epidemic of the autumn (see above). In 1958, absenteeism had unfortunately remained "at an exceptionally high level"—the average rate for the first five months being 14.7 per cent, compared with 13 p.c. in the first five months of 1957. At the same time productivity had continued low during the first quarter of 1958; although there had since been some improvement, the industry now faced "very serious losses indeed." Special steps taken by the N.C.B. to safeguard the long-term position and the stability of employment included (1) the restriction of adult recruitment, thereby allowing natural wastage to bring about a reduction in manpower without hardship; (2) the ending of the voluntary Saturday shift system (see 16137 A); (3) the closure of uneconomic collieries; (4) the speeding-up of mechanization, from which "great benefits" had been derived during 1957. Sir James attributed the fall of 5,200,000 tons in home consumption in 1957, compared with 1956, to lower demand from important industries and to the unusually warm weather. He added that the export position had become much worse since Poland re-entered the market at "fiercely competitive prices," ranging from 15s. to 30s. less than British prices.

The following table shows the average weekly rate of coal production and consumption, and of manpower, output, and absenteeism in the second quarter of 1958:

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Exports and Bunkers† Tons
April ..	3,960,100	269,825	4,229,925	4,161,750	80,750
May* ..	3,887,080	285,580	4,172,660	3,684,400	96,400
June ..	3,940,500	300,675	4,241,175	3,502,500	99,250
2nd Quarter	3,929,227	285,360	4,214,587	3,782,883	92,133

	Wage-earners on colliery books	at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	Output per manshift over all Tons	Percentage of absenteeism
April	705,275	276,275	4.45	3.516	1.254	14.27
May*	701,860	275,080	4.34	3.527	1.268	13.29
June	697,775	274,050	4.42	3.529	1.281	12.99
2nd Qtr.	701,637	275,135	4.40	3.524	1.268	13.28

*Average of five weeks.

†Including fishing vessels but excluding coastwise bunkers.

Other recent developments in connexion with the coalmining industry are summarized below:

Miners' Wages. The Coal Industries Arbitration Tribunal rejected on May 29 a demand by the National Union of Mineworkers for a 10s. increase in the wages of day-wage men, whereupon the union decided to make a new application for weekly increases of 15s. for day-wage men (numbering about 380,000) and 21s. for colliery craftsmen. This new claim was approved by a miners' delegate conference at Porthcawl on July 8.

Closure of Lanarkshire Pit. The N.C.B. announced on Aug. 4 that the Calderhead pit, one of three pits still working in the Shotts district of Lanarkshire (where the Board was losing about 5s. 3d. a ton on all saleable coal mined), would be closed from Aug. 15. The closure would reduce the colliery labour force employed in the area to about 850.

The Opencast Coal Act. The Opencast Coal Bill (see 15960 A) was given an unopposed second reading in the House of Commons on Jan. 22, 1958, and after being considered in Standing Committee passed its remaining stages on June 16. The following Government amendments were approved in the Report stage.

(1) To provide for payment of compensation for depreciation of adjoining land in the same ownership as land compulsorily acquired by the N.C.B. for opencast mining.

(2) To ensure that when proposals for opencast working were being formulated by the N.C.B. or considered by the Minister of Power, account should be taken of their effect on flora, fauna, geological or physiographical features, buildings of historic or architectural interest, or the natural beauty of the countryside.

(3) To increase from 28 days to 56 the notice to be given by the N.C.B. before entering on a site.

(4) To prevent opencast mining being carried on within 50 yards of any dwelling house.

The Bill was enacted on August 1st.

Following the ending of domestic coal rationing on June 10, the Parliamentary Secretary to the Ministry of Power (Sir Ian Horobin) announced on July 14 that the Government had decided, in view of the stock position, to "take a further slight step in decontrol" and abolish the long-standing system of coal allocations to industry. When the present industrial allocations expired in May 1959, therefore, no further ones would be made and the N.C.B. would negotiate ordinary contracts on a commercial basis. Sir Ian added that there would be incentives to induce users to assist the Board by stocking up during the summer months.—(N.C.B. Report for 1957 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 1956 Report, 15767 A ; Quarterly Statistics, 16137 A ; 15960 A ; End of Domestic Coal Rationing, 16246 A.)**

A. UNITED KINGDOM. — A.I.D. Inquiry.

It was announced on Aug. 1 that Lord Feversham (Parliamentary Secretary to the Ministry of Agriculture from 1936 to 1939, and a son-in-law of the Earl of Halifax) had accepted the chairmanship of the inter-departmental committee which was being appointed by the Lord Chancellor and the Home Secretary to inquire into the practice of human artificial insemination (A.I.D.). The terms of reference of the committee were announced at the same time, as follows : "To inquire into the existing practice of human artificial insemination and its legal consequences, and to consider whether, taking account of the interests of individuals involved and of society as a whole, any change in the law is necessary or desirable."

The members of the committee—including three women—were announced on Sept. 6. They were :

Dr. Priscilla FitzGibbon, an anaesthetist at Gloucestershire hospitals and a juvenile court magistrate ; Mrs. Peggy Jay, a member of the L.C.C. and wife of Mr. Douglas Jay, Labour M.P. for Battersea North ; Mrs. Elizabeth Whitley, wife of Dr. H. C. Whitley, minister at St. Giles's Cathedral, Edinburgh ; Mr. Justice Stevenson, a Judge of the Probate, Divorce and Admiralty Division ; Dr. David McDonald, a Northumberland general practitioner and former president of the North of England branch of the B.M.A. ; Mr. Ralph Risk, a Glasgow solicitor, formerly president of the Law Society of Scotland ; Professor Ronald Tunbridge, Professor of Medicine at Leeds University ; and Mr. John Ross, lately head of the Children's Department at the Home Office and chairman of the Marriage Guidance Training Board.

The Government's decision to set up the committee was announced in February last during the House of Lords debate on the question of A.I.D.—(Times - Daily Telegraph) **(Prev. rep. 16109 A.)**

B. UNITED STATES. — Launching of World's Biggest Submarine (U.S.S. "Triton").

The largest submarine ever built—the nuclear-powered U.S.S. *Triton*—was launched on Aug. 19 at Groton, Connecticut. The eighth atomic submarine in the U.S. Navy, she has a displacement of nearly 6,000 tons (equivalent to that of a cruiser) and is the first atomic submarine with two nuclear reactors in her power-plant ; she is also the first submarine in the world to have three decks inside her hull. Almost twice the size of the *Nautilus*, she has a length of 447 feet and a complement of 148 officers and men. Her speed and many other details remain secret, but it was disclosed that she was equipped with the most modern radar and electronic "hearing" and "seeing" devices for communication, control and direction of aircraft and guided missiles.

Of the seven other U.S. atomic submarines launched or in commission, the *Seawolf* has a displacement of 3,400 tons, the *Nautilus* of 3,200 tons, the *Skipjack* of 2,830 tons, and the *Skate, Sargo, Swordfish* and *Seadragon* of 2,360 tons. The *Seadragon* was launched at Portsmouth (N.H.) on Aug. 16. (New York Times) **(Prev. rep. 16329 A.)**

C. SOVIET UNION - UNITED STATES. — Soviet Proposals for Expansion of U.S.-Soviet Trade and Long-term Credits to U.S.S.R.

In a letter to President Eisenhower on June 5, M. Khrushchev expressed the Soviet Government's willingness to conclude a large-scale trade agreement with the United States, and suggested that the U.S.S.R. could make big purchases of U.S. equipment and materials "with a view to speeding up the Soviet Government's new large-scale programme of expansion in the production of consumer goods." The Soviet Prime Minister also suggested that long-term U.S. credits could be granted to the U.S.S.R. to finance Soviet purchases in the United States.

After stating that Soviet purchases of U.S. materials and equipment could amount to "several thousand million dollars" over the next few years if an appropriate agreement were negotiated, M. Khrushchev suggested that the Soviet Union could supply the U.S.A. in return with "goods and equipment of particular interest to the United States," including manganese and chromium ore, ferrous metals, platinum, etc. He also proposed that the two countries should co-operate in the production of synthetic materials, and that American specialists should work in Soviet factories as consultants on the manufacture of certain types of such materials ; he added that the U.S.S.R. was "prepared to make available to U.S. specialists the possibility of studying Soviet achievements in this field."

In his reply (July 14) President Eisenhower pointed out that U.S.-Soviet trade could be expanded "right now" without any need for special action by the U.S. Government, and that Soviet trade organizations were free to develop a larger volume of trade with American firms. As the extension of long-term credits to the U.S.S.R. would raise "complex legal and political questions," he urged that the Soviet trade organizations should "take advantage of the normal commercial credit terms presently available."

President Eisenhower agreed that expanded Soviet-American trade "could under certain conditions be of mutual benefit and serve to improve our relations in general," especially if it were accompanied by "broad contacts between our peoples and a fuller exchange of information and ideas aimed at promoting mutual understanding as a basis for lasting peace." The President continued :

"As you know, U.S. export and import trade is carried on by individual firms and not under governmental auspices. There is no need, therefore, to formalize relations between U.S. firms and Soviet trade organizations. Soviet trade organizations are free right now, without any need for special action by the U.S. Government, to develop a larger volume of trade with firms in this country. They may not be taking advantage of all available possibilities.

"In recent years firms have bought far more from Soviet trade organizations than the latter have purchased from the United States. Furthermore, many of the more important Soviet trade items mentioned in your letter are accorded duty-free entry into the United States. Thus the situation favours the expansion of Soviet purchases in this country.

"While the extension of long-term credits for Soviet purchases in the United States would raise complex legal and political questions, the normal commercial credit terms presently available to Soviet trade organizations permit the further expansion of trade between our two countries.

In his recent report on the expansion of the Soviet chemical industry (see 16248 A) M. Khrushchev had referred to the possibility of placing large Soviet orders in the U.S.A., Great Britain and Western Germany for the necessary plant and equipment.—(New York Times - Soviet Embassy Press Department, London)

D. UNITED KINGDOM. — Royal Navy. - Ending of East Indies Naval Command.

The East Indies Station of the Royal Navy ceased to exist on Sept. 7, when its responsibilities were divided between the Commanders-in-Chief of the Far East and the South Atlantic and South America Stations and the Commander of the new Arabian Seas and Persian Gulf Station. The latter station includes the Red Sea, the Persian Gulf, the Arabian Sea, and a small area of the north-western part of the Indian Ocean.

The East Indies Station was founded in 1744 and had thus had a lifetime of over 200 years ; its forthcoming abolition had been announced by the Admiralty in February last (see 16077 A). The last C.-in-C., East Indies (Vice-Admiral H. W. Biggs) was the 100th holder of the post.
(Times - Daily Telegraph) **(Prev. rep. 16077 A.)**

E. AFRICA. — New President of Capricorn Africa Society. - Retirement of Colonel Sterling.

Mr. Michael Wood, a Nairobi surgeon and farmer, became president of the Capricorn Africa Society on Sept. 11 in succession to its founder, Colonel David Sterling, who had resigned the presidency earlier in the month after holding it for ten years.
(Times) **(Prev. rep. 14971 A.)**

A. PORTUGAL. — Presidential Election. - Rear-Admiral Tomaz becomes President of Portugal. - New Cabinet formed by Dr. Salazar.

Portugal's first contested presidential election since 1926 was held on June 8, resulting in the election of Rear-Admiral Américo Tomaz as President of the Republic in succession to President Craveiro Lopes, whose seven-year term of office had expired. The unsuccessful Opposition candidate was General Humberto Delgado, the Director-General of Civil Aviation. The Ministry of the Interior announced that 1,001,138 votes had been cast in metropolitan Portugal and the overseas territories, of which Rear-Admiral Tomaz had obtained 765,081 (76.4 per cent) and General Delgado 236,057 (22.5 per cent).

Rear-Admiral Tomaz (63) stood as candidate of the Government party—Dr. Salazar's National Union (*Umão Nacional*), which has ruled Portugal since 1926. He resigned the post of Navy Minister—which he had held for many years—to contest the presidential election. General Delgado (52), a senior Air Force officer, was military attaché in Washington and Portuguese representative at NATO before his appointment as Director-General of Civil Aviation. Although there had been Opposition candidates at the two previous presidential elections, they withdrew their nominations before polling day after alleging that they had not received adequate guarantees for the free conduct of the election. Presidential elections are held at seven-yearly intervals, and on a basis of universal adult suffrage, throughout metropolitan Portugal (including the Azores and Madeira) and the African and Far Eastern colonies.

A second Opposition candidature—that of Dr. Arlindo Vincente, a Lisbon lawyer—had originally been presented, but was withdrawn on May 30 after Dr. Vincente and his supporters had agreed to support General Delgado. A joint policy statement was issued by General Delgado and Dr Vincente saying that the latter had withdrawn his candidature in view of the need for "unity of action at the polls against the dictatorship Government." The statement called for freedom of expression, association, and religious belief; freedom from arbitrary arrest; free general elections under a new electoral law; the release of political detainees, and immediate measures for the "democratization" of Portugal In subsequent press conferences General Delgado announced his intention of dismissing Dr. Salazar if he were elected to the Presidency, of ending the latter's personal and "totalitarian" rule, and of introducing a democratic two-party system in place of the single-party regime of the past 32 years.

Although the elections themselves took place in a calm atmosphere, serious rioting occurred in Lisbon, Oporto, and Braga during the electoral campaign, in spite of the Government's ban on political demonstrations. During the third week of May supporters of General Delgado clashed with the police in Oporto, where some 25 people were injured, and in Lisbon, where over 100 people were injured and the police opened fire after being stoned by the crowds. A number of arrests were made, the Ministry of the Interior alleging that the Lisbon riots had been planned "with the evident intention of creating an insurgent atmosphere." Further disturbances occurred on June 1 at Braga, where a number of people were injured in clashes with the police during demonstrations in favour of General Delgado.

In a statement on the latter date (June 1) General Delgado alleged that the Government were putting numerous difficulties in the way of his election campaign, his allegations included charges that members of Opposition committees had been arrested on charges of fomenting riots, that the police had made three raids on his Lisbon headquarters, that at least two-thirds of his election propaganda was not allowed to be published in the Press, that he was not allowed to use the radio, and that his movements had been shadowed by police during the election campaign. After the poll General Delgado sent a letter to President Craveiro Lopes containing a list of alleged electoral irregularities during the voting, and stating that he might contest the validity of the elections in the courts.

It was officially announced on June 11 that General Delgado had ceased to hold the post of Director-General of Civil Aviation and had been ordered to return to the Portuguese Air Force.

Rear-Admiral Tomaz was formally sworn in as President of Portugal on Aug. 9 in succession to President Craveiro Lopes. At the same time Dr. Salazar tendered his Cabinet's resignation to President Tomaz, who asked him to form a new administration. The new Government, announced on Aug. 13, contained ten new Ministers, its membership being as follows :

*Dr. Antonio de Oliveira Salazar ..	.. Prime Minister.
†Dr. Pedro Teotonio Pereira ..	.. Minister of the Presidency.
Dr. Marcelo Matias	.. Foreign Affairs.
General Julio Botelho Moniz ..	.. Defence.
Colonel Almeida Fernandes ..	.. Army.
Commodore de Mendonça Dias	.. Navy.
*Dr. Pinto Barbosa	. Finance.
Dr. José Pires Cardoso	.. Interior.
*Sr. Francisco Leite Pinto ..	.. Education.
Sr. Ferreira Dias	.. Economy.
*Dr. Antunes Varela	.. Justice.
Sr. Carlos Ribeiro	.. Communications.
Sr. Henrique Martins de Carvalho	.. Health.
Commodore Vasco Lopes Alves ..	. Overseas Territories.
*Sr. Arantes Oliveira	.. Public Works.
*Dr. Veiga de Macedo	.. Corporations.

* No change.

†Dr. Teotonio Pereira is also Deputy Prime Minister in his capacity as Minister of the Presidency.

The governmental reorganization involved the following changes : (i) Dr. Teotonio Pereira (Ambassador in London) succeeded Dr. Marcelo Caetano as Minister of the Presidency and Deputy Prime Minister ; (ii) Dr. Matias (Ambassador in Paris) succeeded Dr. Paulo Cunha at the Foreign Ministry ; (iii) General Botelho Moniz (Chief of General Staff) became Defence Minister *vice* Colonel Santos Costa ; (iv) Commodore de Mendonça Dias filled the vacancy at the Navy Ministry caused by Rear-Admiral Tomaz's election as President of the Republic ; (v) Commodore Lopes Alves took over the portfolio of Overseas Territories from Dr. Raul Ventura ; (vi) Senhor Ferreira Dias succeeded Dr. Ulisses Cortez as Minister of Economy ; (vii) Senhor Ribeiro replaced General de Araujo at the Ministry of Communications ; (viii) Dr. Cardoso succeeded Dr. Trigo de Negreiros as Minister of the Interior ; (ix) Colonel Almeida Fernandes took over the Army portfolio, which was vacant before the Cabinet reorganization ; (x) Senhor Martins de Carvalho joined the Cabinet as Minister of Health, a new portfolio.

Dr. Salazar has held the office of Prime Minister without interruption for 26 years.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times)

(Prev. rep. 11639 D ; Cabinet, 14321 A.)

B. MALAYA.—Progressive Elimination of Terrorism. - Southern Malaya cleared of Terrorists.

The Prime Minister of the Malayan Federation, Tengku Abdul Rahman, disclosed on Aug. 26 that Hor Lung, one of the 10 members of the Malayan Communist Party's central committee and head of the terrorist organization in Southern Malaya, had surrendered in April. Since then the Federation Government had sought to "use" Hor Lung and, with his co-operation, the surrender of a further 160 terrorists had been brought about, including 33 "ranking terrorists," leading to the end of organized terrorism in the south. The number of terrorists eliminated in Northern Johore since the beginning of 1958 was 183, but the Tengku estimated that 73 still remained in Southern Johore and 600-700 in Northern Malaya. Of the total number of terrorists remaining throughout the whole country (1,078), the great majority were Chinese and not more than 100 were thought to be Malayans. Northern and Central Johore were declared "white" (i.e. terrorist-free) areas on Aug. 27.

The position in Perak, where the military offensive launched in May 1957 (see page 16105, second column) had been maintained for over a year, was outlined on July 9, 1958, by Dato Abdul Razak, Deputy Prime Minister and Minister of Defence. He said that 118 Communists, belonging to 14 or 15 "jungle gangs," had surrendered between November 1957 and July 1958, making a total of 304 surrenders since the amnesty regulations of Aug. 16, 1957 (see 16105 A) and reducing the number of terrorists in Perak to 263.

To achieve these results 260,000 Malayan dollars (about £30,000) had been paid out in rewards in Perak and 496,000 Malayan dollars (about £55,000) in Northern Johore the bulk of the latter payment having been made to Hor Lung. Defending these payments, the Tengku said : "We cannot stick strongly to principles. If money can buy the end, we must use it."

Following the intensive military operations in Perak during March 1958 (see 16105 A), similar military pressure, combined with measures to cut off terrorist food supplies, was concentrated in the south-west corner of the Malayan peninsula in a new offensive which began on April 15. Thirteen terrorists were killed by security forces in Perak between May and August, and a number of terrorists were killed or captured from time to time in other areas.

The 3rd Battn. Royal Australian Regiment joined the Commonwealth Forces in Malaya towards the end of June, while the R.A.A.F. took over the air base at Butterworth (Kedah) in July 1958 and increased its strength with a squadron of *Canberra* jet bombers.

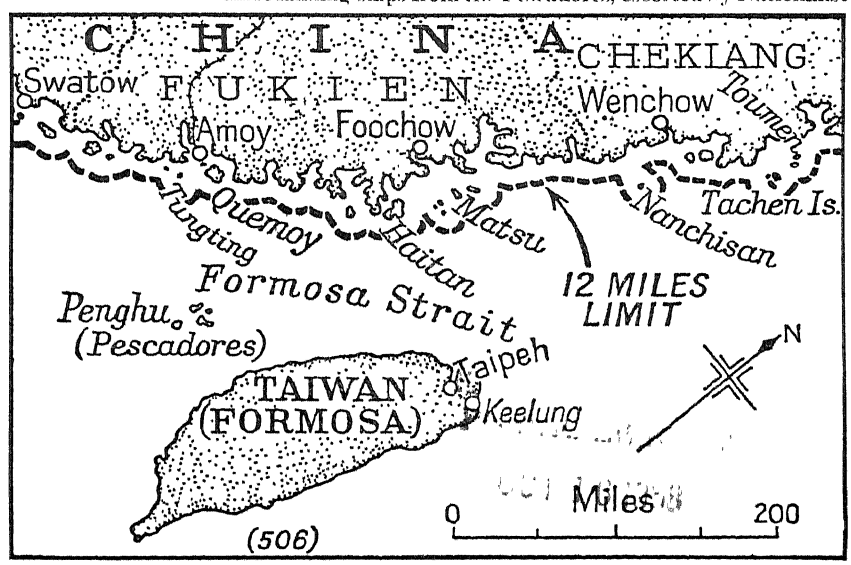
It was announced in the British House of Commons on April 16, 1958, that casualties to U.K. armed forces in Malaya since the beginning of the emergency in 1948 totalled 362 killed and 348 wounded.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 16105 A.)

SEPTEMBER 13—20, 1958

A. FAR EAST. — The Quemoy Crisis.

After a long period of quiescence, the situation in the Formosa Straits again became acute towards the end of August as a result of the intensive shelling of the Nationalist-held islands of Quemoy and Little Quemoy by Communist batteries on the Chinese mainland. The two islands had already been subjected to sporadic shellfire during the first week of August, and the Nationalist Government in Formosa had reported a strong build-up of Communist jet fighters in the coastal areas of Fukien province, bordering the Formosa Straits. As a precaution against possible Communist attack, the Nationalist Government had declared a state of emergency on Aug. 6 in the Pescadores (the island group half-way between Formosa and the mainland) and the offshore islands under Nationalist control—i.e. the Quemoys and Matsu, off the Fukien coast [see accompanying map].



(By permission of *The Times*)

The Quemoy group lies 15 miles east of the mainland port of Amoy, while Matsu (200 miles to the north) lies in the estuary of the Min River off Foochow. According to the U.S. Press, about 200,000 Nationalist troops (almost one-third of the total Nationalist forces) were believed to be garrisoning these offshore islands. The Tachen Islands (200 to 250 miles north of Matsu), together with the island of Nanchisan, were evacuated by the Nationalists in February 1955 (see 14117 A).

The Quemoy Bombardments.

From Aug. 23 onwards Quemoy and Little Quemoy were subjected to almost daily bombardments—many of great violence and intensity—from Communist shore batteries on the mainland; heavy shellfire was also directed against two small Nationalist-held islets (Tatan and Ehrtan, only 130 acres in extent) lying less than three miles off Amoy. Over 50,000 shells were fired within two hours on Aug. 23, while on subsequent days the Quemoys were hit by up to 60,000 shells in 24 hours. The bombardments were particularly intense between Aug. 23-28, slackened for some days thereafter, and were resumed at intervals during the first fortnight of September, being sporadic on some occasions and exceptionally violent on others. Apart from intensive bombardments of Nationalist batteries and fixed positions, heavy barrages were maintained with the object of preventing convoys from Formosa reaching the Quemoys. Up to the end of August the Nationalist authorities had reported over 1,000 casualties in the Quemoy bombardments, including many civilians.

The Fukien Command of the Chinese Communist Army broadcast a message on Aug. 28 to the Nationalist commander in the Quemoys (General Wu Lien) calling upon him to surrender and declaring that his position had become "hopeless," that he could expect no reinforcement from Formosa, and that continued resistance was useless.

After saying that a landing on Quemoy was "imminent," and expressing the determination of the Chinese People's Army to "liberate Taiwan [Formosa] as well as the offshore islands," the broadcast called on General Wu Lien and his officers to surrender or to lead their soldiers in a revolt against Chiang Kai-shek. It added: "If in this way you do something beneficial for the fatherland, the people will forgive you in accordance with our fixed policy. If you persist in making yourselves cannon-fodder for the American imperialists, in fighting for the Chiang Kai-shek clique, and in remaining the enemy of our 600,000,000 people, your end will be very sad . . ."

During the first fortnight of September a number of attempts were made to supply the Quemoy garrison and civilian population from Formosa. Owing to the intensity of the bombardments from the mainland, and frequent sorties by Communist gunboats, very few vessels were able to reach the island and those that did so had in most cases to put to sea again after discharging only part of their cargo. In the first three days of September three successive convoys from Formosa—consisting of landing-craft and other small vessels—had to abandon the attempt to reach Quemoy in face of artillery fire described by eye-witnesses as more intense than anything known in the Korean War. Further attempts were made on subsequent days, but mostly with little or no success; although a news black-out was maintained, it was understood that a number of Nationalist ships had been sunk or beached in the attempt to run the blockade. It was admitted in Formosa that the situation in Quemoy was causing great concern as the garrison and civilian population were running increasingly short of ammunition, supplies and food.

As from Sept. 7 units of the U.S. Seventh Fleet helped Nationalist warships to escort supply convoys to Quemoy, at the request of the Nationalist Government; a convoy successfully reached the island on that date, while on Sept. 17 three landing-ships from the Pescadores, escorted by Nationalist and U.S. warships, put supplies ashore in the most successful blockade-running operation since the beginning of the month. Other supplies were dropped in Quemoy by Nationalist cargo planes from Formosa, an airlift for this purpose being started on Sept. 14. In escorting the seaborne convoys, U.S. naval vessels ignored the 12-mile limit proclaimed by the Communist Government (see below) but did not approach Quemoy closer than three miles; they were not involved in any exchanges of fire with Communist batteries on the mainland.

Several small-scale air and naval clashes between Nationalist and Communist forces occurred in the Formosa Straits during this period. The Nationalist Defence Ministry claimed on Sept. 2 that 11 Communist torpedo-boats had been destroyed during an attack on a convoy bound for Quemoy, for the loss of only one Nationalist vessel. It was stated that 12 torpedo-boats had attacked in four waves and that all but one had been sunk.

American Reactions to Quemoy Crisis. - Declarations by President Eisenhower and Mr. Dulles.

The massive bombardments of Quemoy aroused serious concern in the United States, where fears were expressed that they might be a preliminary to a Communist assault on the offshore islands. On Sept. 4 the Secretary of State discussed the situation with President Eisenhower, who was then on holiday at Newport, Rhode Island, after which the following statement on the U.S. attitude was issued by Mr. Dulles with the authorization of the President:

"(1) Neither Taiwan nor the islands of Quemoy and Matsu have ever been under the authority of the Chinese Communists. Since the end of the Second World War they have been continuously under the authority of Free China—that is, the Republic of China.

"(2) The United States is bound by treaty to help to defend Taiwan from armed attack, and the President is authorized by joint resolution of Congress to employ the armed forces of the United States for the securing and protecting of related positions such as Quemoy and Matsu.

"(3) Any attempt on the part of the Chinese Communists to seize these positions or any of them would be a crude violation of the principles upon which world order is based, namely, that no country should use armed force to seize new territory.

"(4) The Chinese Communists have for about two weeks been subjecting Quemoy to heavy artillery bombardment and, by artillery fire and the use of small naval craft, they have been harassing the regular supply of the civilian and military population of the Quemoys, which totals some 125,000 persons. Peking Radio repeatedly announces the purpose of these military operations to be to take by armed force Taiwan, as well as Quemoy and Matsu. In virtually every Peking broadcast Taiwan and the off-shore islands are linked as the objective of what is called the 'Chinese people's liberation Army.'

" (5) Despite, however, what the Chinese Communists say, and so far have done, it is not yet certain that their purpose is in fact to make an all-out effort to conquer by force Taiwan and the off-shore islands. Neither is it apparent that such efforts as are being made, or may be made, cannot be contained by the forces of the Republic of China, with such substantial logistical support as the United States is providing.

" (6) The joint resolution of Congress, referred to above, includes a finding to the effect that ' the secure possession by friendly Governments of the Western Pacific island chain, of which Formosa is a part, is essential to the vital interests of the United States and all friendly nations in and bordering upon the Pacific Ocean.' It further authorizes the President to employ the armed forces of the United States for the protection not only of Formosa but for ' the securing and protection of such related positions and territories of that area now in friendly hands and the taking of such other measures as he judges to be required or appropriate in ensuring the defence of Formosa.'

" In view of the situation outlined in the preceding paragraph, the President has not yet made any finding under that resolution that the employment of U.S. armed forces is required or appropriate in ensuring the defence of Formosa. The President would not, however, hesitate to make such a finding if he judges that the circumstances made this necessary to accomplish the purposes of the joint resolution.

" In this connexion we have recognized that the securing and protecting of Quemoy and Matsu have increasingly become related to the defence of Taiwan. This is, indeed, also recognized by the Chinese Communists. Military dispositions have been made by the United States so that a Presidential determination, if made, would be followed by action both timely and effective.

" (7) The President and I [Mr. Dulles] earnestly hope that the Chinese Communist régime will not again, as in the case of Korea, defy the basic principle upon which world order depends, namely, that armed force should not be used to achieve territorial ambitions. Any such use of naked force would pose an issue far transcending the offshore islands and even the security of Taiwan. It would forecast a widespread use of force in the Far East which would endanger vital free-world positions and the security of the United States.

" (8) The United States has not, however, abandoned hope that Peking will stop short of defying the will of mankind for peace. This would not require it to abandon its claims, however ill-founded we may deem them to be.

" In the extended negotiations which the representatives of the U.S.A. and the Chinese Communist régime conducted at Geneva between 1955 and 1958 a sustained effort was made by the United States to secure, with particular reference to the Taiwan area, a declaration of mutual and reciprocal renunciation of force, except in self-defence, which, however, would be without prejudice to the pursuit of policies by peaceful means The Chinese Communists rejected any such declaration. We believe, however, that such a course of conduct constitutes the only civilized and acceptable procedure. The United States intends to follow that course, so far as it is concerned, unless and until the Chinese Communists, by their acts, leave us no choice but to react in defence of the principles to which all peace-loving Governments are dedicated "

On Sept. 11 President Eisenhower made a nation-wide broadcast about " the situation, dangerous to peace, which has developed in the Formosa Straits," with the aim of giving American people the " basic facts and my conclusions as to our nation's proper course of action." The President spoke as follows :

" . . . On the morning of Aug. 23 the Chinese Communists opened a severe bombardment of Quemoy, an island off the China coast. Another island in the same area, Matsu, was also attacked. These two islands have always been a part of Free China—never under Communist control. This bombardment of Quemoy has been going on almost continuously ever since. Also, the Chinese Communists have been using their naval craft to try to break up the supplying of Quemoy, with its 125,000 people. Their normal source of supply is by sea from Formosa, where the Government of Free China is now located. The Chinese Communists say that they will capture Quemoy. So far they have not actually attempted a landing, but their bombardment has caused great damage. Over 1,000 people have been killed or wounded. In large part these are civilians.

" This is a tragic affair. It is shocking that in this day and age naked force should be used for such aggressive purposes. But this is not the first time that the Chinese Communists have acted in this way. In 1950 they attacked and tried to conquer the Republic of Korea. At that time President Truman announced the intention of protecting Formosa, the principal area still held by Free China, because of the belief that Formosa's safety was vital to the security of the United States and the free world. Our Government has adhered firmly ever since 1950 to that policy.

" In 1953 and 1954 the Chinese Communists took an active part in the war in Indo-China against Vietnam. In the fall [autumn] of 1954 they attacked Quemoy and Matsu, the same two islands they are attacking now. They broke off that attack when, in January 1955, Congress and I agreed that we should firmly support Free China.

" Since then, for about four years, the Chinese Communists have not used force for aggressive purposes We have achieved an armistice in Korea which stopped the fighting there in 1953. There is a 1954 armistice in Vietnam; and since 1955 there has been quiet in the Formosa Straits. We had hoped that the Chinese Communists were becoming peaceful—but it seems not. So the world is again faced with the problem of armed aggression . . .

" What should we do ? Shall we take the position that, submitting to threat, it is better to surrender pieces of free territory in the hope that this will satisfy the appetite of the aggressor and we shall have peace ? Do we not remember that the name ' Munich ' symbolizes a vain hope of appeasing dictators ? At that time the policy of appeasement was tried, and it failed. Prior to the Second World War, Mussolini seized Ethiopia. In the Far East, Japanese warlords were grabbing Manchuria. Hitler sent his armed forces into the Rhineland in violation of the Versailles Treaty. Then he annexed Austria. When he got away with that, he turned to Czechoslovakia and began taking it bit by bit.

" In the face of all these attacks on freedom by the dictators, the powerful democracies stood aside. It seemed that Ethiopia and Manchuria were too far away and too unimportant to fight about. In Europe, appeasement was looked on as the way to peace. The democracies felt that if they tried to stop what was going on, that would mean war. But because of these repeated threats, war came just the same.

" If the democracies had stood firm at the beginning, almost surely there would have been no world war. Instead, they gave such an appearance of weakness and timidity that aggressive rulers were encouraged to overrun one country after another. In the end the democracies saw that their very survival was at stake. They had no alternative but to turn and fight in what proved to be the most terrible war the world has ever known. I know something about the war, and I never want to see that history repeated. But, my fellow-Americans, it certainly can be repeated if the peace-loving democratic nations again fearfully practise a policy of standing idly by while aggressors use armed force to conquer the small and weak.

" Let us suppose that the Chinese Communists conquer Quemoy. Would that be the end of the story ? We know that it would not be. History teaches that when powerful despots gain something through aggression, they try, by the same methods, to gain more and more and more. Also, we have more to guide us than the teachings of history. We have the boastings of the Chinese themselves. They frankly say that their present military effort is part of a programme to conquer Formosa.

" It is certain as can be that the shooting which the Chinese Communists started on Aug. 23 had as its purpose not just the taking of Quemoy. It is part of what is an ambitious plan of armed conquest. This plan would liquidate all the free-world positions in the Western Pacific area and bring them under captive Governments which would be hostile to the United States and the free world. Thus the Chinese and Russian Communists would come to dominate the western half of the now friendly Pacific Ocean. So aggression by ruthless despots again imposes a clear danger to the United States and to the free world.

" In this effort the Chinese Communists and the Soviet Union appear to be working hand-in-hand. On Sept. 1 I received a long letter on this subject from Prime Minister Khrushchev [see below]. He warned the United States against helping its allies in the Western Pacific. He said that we should not support the Republic of China and the Republic of Korea. He contended that we should desert them, return all our naval forces to our home bases, and leave our friends in the Far East to face, alone, the combined military power of the Soviet Union and Communist China.

" Does Mr. Khrushchev think that we have so soon forgotten Korea ? I must say to you, very frankly and soberly, that the United States cannot accept the result that the Communists seek. Neither can we now show a weakness of purpose- a timidity- which would surely lead them to move more aggressively against us and our friends in the Western Pacific area.

" If the Chinese Communists have decided to risk a war, it is not because Quemoy itself is so valuable to them. They have been getting along without Quemoy ever since they seized the China mainland nine years ago. If they have decided to risk a war, it can only be because they, and their Soviet allies, have decided to find out whether threatening war is a policy from which they can make big gains. If that is their decision, then a Western Pacific Munich would not buy us peace or security. It would encourage the aggressors and dismay our friends and allies there. If history teaches anything, appeasement would make it more likely that we would have to fight a major war.

" Congress has made clear its recognition that the security of the Western Pacific is vital to the security of the United States. The Senate has ratified, by overwhelming vote, security treaties with the Republic of China covering Formosa and the Pescadores, and also the Republic of Korea. We have a mutual security treaty with the Republic of the Philippines, which could be next in line for conquest if Formosa fell into hostile hands. These treaties commit the United States to the defence of the treaty areas. In addition, there is a joint resolution which Congress passed in January 1955, dealing specifically with Formosa and the off-shore islands of Free China in the Formosa Straits. At that time the situation was similar to what it is to-day. Congress then voted the President authority to employ the armed forces of the United States for the defence, not only of Formosa, but of related positions such as Quemoy and Matsu.

"To-day the Chinese Communists announce, repeatedly and officially, that their military operations against Quemoy are preliminary to attack on Formosa. So it is clear that the Formosa Straits resolution of 1955 applies to the present situation If the present bombardment and harassment of Quemoy should be converted into a major assault with which the local defenders could not cope, then we would be compelled to face precisely the situation that Congress visualized in 1955.

"I have repeatedly sought to make clear our position in this matter so that there would not be danger of Communist miscalculation. The Secretary of State, on Sept. 4, made a statement to the same end [see above]. This statement could not, of course, cover every contingency. Indeed, I interpret the joint resolution as requiring me not to make absolute advance commitments but to use my judgment according to the circumstances of the time. But the statement did carry a clear meaning to the Chinese Communists and to the Soviet Union There will be no retreat in the face of armed aggression . . .

"I do not believe that the United States can either be lured or frightened into appeasement. I believe that in taking the position of opposing aggression by force, I am taking the only position which is consistent with the vital interests of the U.S.A. and, indeed, with the peace of the world.

"I assure you that no American boy will be asked by me to fight just for Quemoy. But those who make up our armed forces– and I believe the American people as a whole—do stand ready to defend the principle that armed force shall not be used for aggressive purposes. Upon observance of that principle depends a lasting and just peace. It is that same principle that protects the Western Pacific free-world positions as well as the security of our homeland. If we are not ready to defend this principle, then tragedy after tragedy would befall us.

"But there is a far better way than resort to force to settle these differences, and there is some hope that such a better way may be followed. That is the way of negotiation. That way is open and prepared, because in 1955 arrangements were made between the U.S A. and the Chinese Communists that an ambassador on each side would be authorized to discuss at Geneva certain problems of common concern. These included the matter of release of American civilians imprisoned in Communist China, and such questions as the renunciation of force in the Formosa area. There have been 73 meetings since August 1955.

"When our Ambassador who was conducting these negotiations [i.e. Mr. Alexis Johnson] was recently transferred to another post, we named as successor Mr. Beam, our Ambassador to Poland [see 16379 A]. The Secretary of State, in his Sept. 4 statement, referred to these Geneva negotiations. Two days later Mr. Chou En-lai, the Premier of the People's Republic of China, proposed that these talks should be resumed 'in the interests of peace' [see below]. This was followed up on Sept. 8 by Mr. Mao Tse-tung, the Chairman of the People's Republic of China. We promptly welcomed this prospect and instructed our Ambassador at Warsaw to be ready immediately to resume these talks. Naturally, the United States will adhere to the position it first took in 1955 – that we will not in these talks be a party to any arrangements which would prejudice the rights of our ally, the Republic of China.

"We know by hard experience that the Chinese Communist leaders are indeed militant and aggressive. But we cannot believe that they would now persist in a course of military aggression which would threaten world peace, with all that would be involved. We believe that diplomacy can and should find a way out. There are measures that can be taken to assure that these offshore islands will not be a thorn in the side of peace. If the bilateral talks between Ambassadors do not fully succeed, there is still the hope that the United Nations could exert a peaceful influence on the situation.

"In 1955 the hostilities of the Chinese Communists in the Formosa area were brought before the Security Council. But the Chinese Communists rejected its jurisdiction. They said that they were entitled to Formosa and the offshore islands, that if they used armed force to get them that was purely a 'civil war,' and that the United Nations had no right to concern itself. They claimed also that the attack by the Communist North Koreans on South Korea was 'civil war,' and that the United Nations and the United States were 'aggressors' because they helped South Korea. They said the same about their attack on Vietnam.

"I feel sure that these pretexts will never deceive or control world opinion. The fact is that Communist Chinese hostilities in the Formosa Straits area endanger world peace. I do not believe that any rulers, however aggressive they may be, will flout efforts to find a peaceful and honourable solution, whether it be by direct negotiations or through the United Nations.

"We are confronted with a serious situation. But it is typical of the security problems of the world today. Powerful and aggressive forces are constantly probing, now here, now there, to see whether the free world is weakening. In the face of this, there are no easy choices available. It is misleading for anyone to imply that there are.

"However, the present situation, though serious, is by no means desperate or hopeless. There is not going to be any appeasement. I believe that there is not going to be any war. But there must be sober realization by the American people that our legitimate purposes are again being tested by those who threaten peace and freedom everywhere."

U.S. Reinforcements for Formosa.

The U.S. Seventh Fleet in the Formosa Straits, comprising some 60 warships, was reinforced during the first fortnight of September by the aircraft carrier *Essex* (33,000 tons) and four destroyers from the Mediterranean, the 45,000-ton carrier *Midway* from Hawaii, and the guided-missile cruiser *Los Angeles* (17,000 tons) from California ; the *Essex* and *Midway* joined four other large carriers already forming part of the Seventh Fleet—the *Hancock*, *Lexington*, *Princeton*, and *Shangri-La*. The American naval forces in the Formosa Straits are under the command of Vice-Admiral Roland N. Smoot, head of the U.S.Taiwan Defence Command.

It was also disclosed in Washington that the U.S. air forces in Formosa had been reinforced during the same period by a undisclosed number of *Sabre* and *Starfighter* jets from Hawaii and the United States ; the *Starfighter*, with a speed of 1,400 m.p.h., is claimed to be the fastest jet fighter in the world. In addition, the Pentagon confirmed on Sept. 15 that a battalion of *Nike-Hercules* anti-aircraft missiles, capable of firing atomic or conventional warheads, had been assigned "for service in the Pacific area." A squadron of *Matador* guided missiles (pilotless aircraft) had been stationed in Formosa for some time previously.

Chou En-lai on "Liberation" of Formosa. - Offer to resume Sino-American Ambassadorial Talks.

In a statement broadcast by Peking Radio on Sept. 6, Mr. Chou En-lai reiterated the Chinese Communist Government's claim to "liberate" Formosa and the Pescadores, and denounced what he described as the U.S.A.'s "aggression" in those areas and its support for the "Chiang Kai-shek clique." At the same time he called for a resumption of the Sino-American ambassadorial talks "to make another effort for the defence of peace."

In the course of his statement Mr. Chou claimed that Formosa and the Pescadores had been part of China from ancient times ; expressed the "sacred right" and "unshakable determination" of the Chinese people to "liberate" those areas ; and maintained that the question was solely of Chinese internal concern. He declared that "all so-called treaties concluded between the United States and the Chiang Kai-shek regime are null and void as far as the Chinese people are concerned and can never legalize U.S. aggression." After saying that the Chinese people could "not tolerate the immediate threat posed by such coastal islands as Quemoy and Matsu," and were "not to be cowed by war provocations of the United States," Mr. Chou expressed his Government's willingness to resume the Sino-U.S. ambassadorial talks in view of the fact that the United States had appointed a representative of ambassadorial rank [i.e. Mr. Beam] to continue them at the point where they had been broken off at Geneva in December last.

Mr. Chou's expressed willingness to resume the Sino-American ambassadorial talks was considered by President Eisenhower at a meeting of the National Security Council, held on Sept. 7 at the White House. An official U.S. statement said in part :

"We hope that the reported statement of Mr. Chou En-lai is responsive to the urging, contained in our Sept. 4 policy statement, that 'armed force should not be used to achieve territorial ambitions,' although such renunciations of force need not involve renouncing claims or the pursuit of policy by peaceful means . . . If the Chinese Communists are now prepared to respond, the United States welcomes that decision. The U.S. Ambassador at Warsaw stands ready promptly to meet with the Chinese Communist Ambassador there, who has previously acted in this matter."

The White House statement concluded with a reaffirmation of the negotiating position which the U.S.A. originally took in 1955, "namely, that we will not in these talks be a party to any arrangement which would prejudice the rights of our ally, the Republic of China."

Mr. Mao Tse-tung (chairman of the Chinese People's Republic), made a speech on Sept. 8 to the Supreme State Conference in Peking in which, although criticizing what he described as "U.S. imperialism," he said that he was hopeful about the ambassadorial talks to be resumed between China and the United States.

Communist China proclaims 12-mile Sea Limit. - Non-acceptance by United States and Great Britain.

The Chinese Communist Government issued a declaration on Sept. 4 extending the limit of China's territorial waters from three to 12 nautical miles. The new sea-limit was said to be applicable to "the Chinese mainland and its coastal islands, as well as Taiwan [Formosa], the Penghu Islands [the Pescadores], and all other islands belonging to China which are separated from the mainland and its coastal islands by the high seas." It was stated that no foreign warships or aircraft could enter China's "territorial sea" and the airspace above it without permission from Peking, and that all foreign

vessels navigating such areas "must observe the relevant laws and regulations laid down by the Government of the People's Republic of China." After commenting that "the Taiwan and Penghu areas are still unlawfully occupied by the United States," the declaration added that "the People's Republic of China has the right to recover these areas by all suitable means at a suitable time."

With regard to mainland China and the coastal islands, the declaration said that China's "territorial sea" comprised all water areas within straight 12-mile "base lines" drawn from the coast and from the offshore islands. As shown on the map on page 16387, the effect was to bring the offshore islands under Nationalist control—i.e. the Quemoys and Matsu—within the new 12-mile sea limit.

As stated above, the U.S. warships escorting Chinese Nationalist convoys to Quemoy ignored the new 12-mile limit claimed by Communist China, but observed the three-mile limit observed by the United States and the great majority of other maritime countries. In the week Sept. 4-11 Peking issued four statements accusing the United States of infringing China's "sovereignty" by permitting American vessels to enter the 12-mile limit, and describing such actions as "war provocations."

The U.S. State Department rejected the Peking Government's claim to a 12-mile sea limit as "an obvious attempt to cloak their aggressive purposes," while the British Government informed Peking on Sept. 13 that it could not recognize the legal validity of the 12-mile limit On the other hand, the Soviet Government announced on Sept. 9 that it would "fully respect" the extension of China's territorial waters

M. Khrushchev's Letter to President Eisenhower. - Soviet Support for Communist China. - President Eisenhower's Reply.

The Soviet Prime Minister sent a letter to President Eisenhower on Sept. 8 expressing the Soviet Union's concern at the situation in the Formosa Straits, and declaring *inter alia* that "an attack on the Chinese People's Republic would be an attack on the Soviet Union." M. Khrushchev expressed full support for the Chinese Communist Government in the Formosa dispute, denounced the attitude of the United States and of "Chiang Kai-shek," but urged that all parties should try to "find a common language" with the aim of "removing the tension which has arisen in the Far East."

After saying that a "dangerous situation" had arisen in the Far East and that "mankind is again confronted with a direct threat of war," M. Khrushchev called on the U.S.A. to "show reasonableness" and to "refrain from steps which could have irreparable consequences." He accused the U.S.A. of "seizing by force of arms the ancient Chinese territory of Taiwan and the Penghu Islands" and of "trying to extend its aggression to the Chinese offshore islands, covering it up by references to its support of the traitor to the Chinese people, Chiang Kai-shek." After referring to the "impermissible" exclusion of the Chinese People's Republic from the United Nations, M. Khrushchev went on to accuse the U.S. Government of "staging military demonstrations to prevent the liberation of Taiwan" and of taking "hasty steps" to reinforce the Seventh Fleet in the Formosa Straits by "rushing warships and aircraft from the United States, the Mediterranean, and other parts of the world."

"It should be pointed out," M. Khrushchev continued, "that the practice of rushing U.S. warships from one place to another has become frequent of late . . . Quite recently the world has witnessed such demonstrations by the American Navy in the Mediterranean, when the United States carried out its military intervention in Lebanon . . . Today, when attempts are being made at sabre-rattling and threatening China, we think it appropriate to recall that China is not Lebanon . . . China's 600 million people are strong and invincible, not only by virtue of their inexhaustible resources, but also by virtue of their unity behind their government . . I should like to emphasize not only this aspect of the matter, but also the fact that China is not alone and that she has true friends who are ready to come to her aid at any moment in the event of an act of aggression, because the security interests of People's China are inseparable from those of the Soviet Union."

M. Khrushchev continued: "The practice of despatching naval fleets and air wings from one part of the world to another—to the Middle East, the Far East, Latin America, and other areas—to bring pressure to bear now on some nations, now on others, and to try to impose a foreign will on them, raises the question whether it is not time to put an end to such actions, which cannot be recognized as normal methods in international relations. It is legitimate to ask whether the U.N. should not consider this and take a decision forbidding Powers to undertake such movements of their naval and air forces for the purposes of blackmail and intimidation, and obliging them to keep these forces within their national frontiers . . . Does it not seem to you, Mr. President, that such despatching of warships now in one direction, now in another, today loses much of its sense, at least with respect to countries possessing modern weapons? I do not know what your military advisers tell you, but they cannot but know that the heyday of surface-navy Powers is over. In this age of nuclear and rocket weapons, these once formidable warships are in fact fit for nothing but courtesy visits and gun salutes, and can serve as targets for the right types of rockets. This may hurt the pride of people closely connected with the Navy, but they are incontestable facts which one cannot ignore . . ."

Continuing, M. Khrushchev said that Mr. Dulles's statement of Sept. 4 [see above] represented "an undisguised attempt at gross and unceremonious infringement of the sovereign rights of other nations" and "cannot but be strongly condemned." After alleging that U.S. military leaders were "trying, with the tacit consent of the American Government, to resort to atomic blackmail against China," the Soviet Prime Minister added. "It can be said with full confidence that no threats or blackmail can scare the Chinese people . . . The Chinese people want peace but they do not fear war. Should a war be forced on China, we have not the least doubt that the Chinese people will strike back at the aggressor in a fitting manner."

After asserting that U.S. "aggressive preparations" in the Far East were "not confined to the Formosa Straits," M. Khrushchev referred to "reports that Syngman Rhee, encouraged and egged on by the United States, is again preparing for war provocations and airing his intention to 'march north.'" He alleged that "some people in the United States seem to have plans for turning Korea into a field of bloody struggle once again"; asked in this connexion why the U.S. Government was "so adamant in its refusal to withdraw its troops from South Korea"; and added that "the responsibility for Syngman Rhee's provocations lies entirely with the U.S. Government."

M. Khrushchev concluded his letter as follows: "You will, perhaps, consider what I have said as too sharp. I beg to differ. The only thing I want to do in this letter, just as on other occasions, is to speak my mind and emphasize the full gravity of the situation which has developed in the area of Taiwan and China's offshore islands as a result of U.S. actions . . . It would be a serious miscalculation for the United States to believe that one can make short work of China, as some Powers used to do in the past. Such a miscalculation would have grave consequences for the cause of world peace . . . An attack on the Chinese People's Republic, which is a great friend, ally and neighbour of our country, is an attack on the Soviet Union. Loyal to its duty, our country would do everything to defend jointly with People's China, the security of both countries and the interests of peace in the Far East and throughout the world.

"Nothing could be more erroneous than to try to read in this message of mine any intention of laying the colour on too thickly, let alone any threats. All we want to do is to draw your attention to the situation which no-one would be able to get out of neither you nor we—should a war break out in the Far East. We want to find a common language with you so that the U.S.S.R., the United States, the Chinese People's Republic, and other countries may join their efforts in removing the tension which has arisen in the Far East."

President Eisenhower replied to M. Khrushchev as follows on Sept. 13:

"I agree with you that a dangerous situation exists in the Taiwan area. I do not agree with you as to the source of danger in this situation. The present state of tension in the Taiwan area was created directly by Chinese Communist action, not by that of the Republic of China or by the United States. The fact is that following a long period of relative calm in that area, the Chinese Communists, without provocation, suddenly initiated a heavy artillery bombardment of Quemoy and began harassing the regular supply of the civilian and military population of the Quemoys.

"This intense military activity was begun on Aug. 23 some three weeks after your visit to Peking [see 16352 A]. Peking Radio has repeatedly been announcing that the purpose of these military operations is to take Taiwan, as well as Quemoy and Matsu, by armed force. In virtually every Peking broadcast, Taiwan and the offshore islands are linked as the objective of what is called the 'Chinese people's liberation army.'

"The issue, then, is whether the Chinese Communists will seek to achieve their ambitions through the application of force, as they did in Korea, or whether they will accept the vital requisite of world peace and order in a nuclear age and renounce the use of force as a means for satisfying their territorial claims.

"The territory concerned has never been under the control of Communist China. On the contrary, the Republic of China despite the characterizations you apply to it for ideological reasons is recognized by the majority of the sovereign nations of the world, and its Government has been and is exercising jurisdiction over the territory concerned. U.S. military forces operate in the Taiwan area in fulfilment of treaty commitments to the Republic of China to assist it in the defence of Taiwan and the Pescadores. They are there to help resist aggression—not to commit aggression. No upside-down presentation such as is contained in your letter can change this fact.

"The U.S. Government has welcomed the willingness of the Chinese Communists to resume the ambassadorial talks, which were begun three years ago in Geneva, for the purpose of finding a means of easing tensions in the Taiwan area. In the past, the U.S. representative at these talks has tried by every reasonable means to persuade the Chinese Communist representative to reach agreement on mutual renunciation of force in the Taiwan area, but the latter insistently refused to reach such agreement. The United States hopes that an understanding can be achieved through the renewed talks which will assure that there will be no resort to the use of force in the endeavour to bring about a solution of the issues there.

"I regret to say I do not see in your letter any effort to find that common language which could indeed facilitate the removal of the danger existing in the current situation in the Taiwan area. On the contrary, the description of this situation contained in your letter seems designed to serve the ambitions of international Communism rather than to present the facts. I also note that you have addressed no letter to the Chinese Communist leaders urging moderation upon them. If your letter to me is not merely a vehicle for one-sided denunciation of U.S. actions, but is indeed intended to reflect a desire to find a common language for peace, I suggest you urge these leaders to discontinue their military operations and to turn to a policy of peaceful settlement of the Taiwan dispute. If indeed . . . the Chinese Communist leaders can be persuaded to place their trust in negotiation and a readiness to practise conciliation, then I assure you the United States will, on its part, strive in that spirit earnestly to the same end."

British and Commonwealth Reactions.

The following statement on the British attitude to the Far East crisis was issued on Sept. 12 by the Foreign Office in London :

"We have no obligation or commitment of any kind to take military action for the defence of Quemoy, Matsu or Formosa. Our only obligations are those in accordance with the U.N. Charter. The U.S. Government have neither sought nor received promises of British support in the event of war over the Chinese offshore islands.

"With regard to the present situation, we regret the current indications that the Chinese Government wishes to settle the problem of the offshore islands by force. We hope that further attempts will be made to solve the problem of the status of the offshore islands by peaceful methods.

"The diplomatic discussions in Geneva since 1955, although they did not result in a solution, did seem to reduce the tension in the area. We regret that the Chinese Government should appear to be reverting to military methods. We strongly approve President Eisenhower's statement yesterday that he wishes these differences to be settled by way of negotiation. We hope that talks . . . between representatives of the two Governments will begin speedily. We also welcome the President's statement of his hope that the U.N. could exert a peaceful influence on the situation if bilateral talks do not fully succeed.

"It is important that the real issue should be appreciated. The immediate question is not the present or future status of the offshore islands ; it is whether a dispute of this nature should be settled by force ; and upon that point we strongly support the American position."

Following a meeting of the Labour Party Parliamentary Committee, at which the crisis in the Far East was discussed, Mr. Gaitskell wrote on Sept. 15 to the Prime Minister (then on holiday in Scotland) expressing the Labour Party's "deep concern at the dangerous situation which has developed" and setting forth its views on the question. Mr. Gaitskell wrote as follows :

"Like your predecessor [Sir Anthony Eden], we regard Quemoy and the other offshore islands as part of the mainland of China. We therefore consider that the claim of the Peking Government to them is legitimate, and that they should long since have been evacuated by the Chinese Nationalists instead of reinforced. We do not accept that from a military angle they are of any importance to the defence of Formosa, which raises different issues. Such military consequence as they have seems to be more as a possible aid to an attempt to reconquer the Chinese mainland, an attempt which, in our opinion, would be sheer lunacy.

"In our view, therefore, Great Britain should not support, much less participate in, any war to defend these islands against attack from China. We have read the official statements that no commitments have been entered into by H.M. Government, but we do not consider that these are clear enough. In view of various reports which have appeared in the Press, we ask you to make plain that, even if the United States becomes involved in a war to defend Quemoy, Britain would not join in.

"Moreover, we believe that it is the duty of H.M. Government to do everything in their power to dissuade the U.S. Government from engaging in such a war. It is clear that American intervention might very well have the gravest consequences. We have been particularly disturbed by reports that the use of nuclear weapons by the United States in defence of Quemoy against the mainland of China is being seriously contemplated. We hope you will make it clear that there is the strongest possible objection here to any such step.

"While we understand that normally there is a reluctance to publicize differences of opinion between ourselves and our allies, we regard the situation as far too serious for this consideration to be decisive. The fact is that public opinion, not only in Britain, but, we believe, in the whole of Western Europe, is completely opposed to a war over Quemoy and is unable to accept the arguments with which President Eisenhower sought to justify its possibility.

"We believe the British Government should make this abundantly clear to our American allies, and urge the greatest restraint upon them. If, as I trust, you share our views on these matters, I hope you will be prepared yourself, if need be, to go to Washington and represent them to the President.

"I am sorry to have to disturb you with this letter while you are on holiday. I should not have done so had I not felt the matter to be one of exceptional urgency."

Mr. Macmillan replied to Mr. Gaitskell on the same day as follows :

"H.M. Government's position has already been made clear. I said in a speech at Bromley on Sept. 12 : 'Our American allies have neither sought nor received promises of military support from us in the Formosa area. The fact that we are not militarily involved puts all the greater obligation upon us to help in any way we can, by private consultation and public action, to secure a peaceful solution of these problems. The immediate question is not the present or future status of the offshore islands ; it is whether a dispute of this nature should be settled by force On that point we strongly support our American friends.'

"I hope that you and I would both agree that territorial adjustments should be negotiated and not brought about by force. While there must, of course, be unfettered consultations and honest advice between partners in private on the best way of handling any particular problem, I think that we would be playing into the hands of the Communists if we allowed ourselves to take public attitudes on difficulties which we hope jointly to overcome

"While I am, as you know, always prepared to go anywhere and do anything in the cause of peace, I must point out that the Foreign Secretary is already on his way to the United States [for the 13th session of the U.N. General Assembly], where he will be in close touch with the situation and will discuss matters direct with the U.S. Government and representatives of other countries. Meanwhile I feel that we must treat this crisis calmly and constructively."

Addressing the Foreign Press Association in London on Sept. 16, Mr. Gaitskell summarized the Labour Party's attitude as follows : (1) the Peking Government should be recognized as the Government of China and take its place in the United Nations ; (2) Formosa and the Pescadores should be placed under U.N. administration for a period ; (3) General Chiang Kai-shek's Government should be withdrawn from Formosa ; (4) after a certain period, the people of Formosa should be free to make their own decision, without any intimidation, whether they wished to be independent or to join with China.

Statements by Commonwealth Prime Ministers.

The Prime Minister of Canada (Mr. Diefenbaker) suggested on Sept. 6 that the United Nations should intervene in the Formosa crisis, since the dispute between the Communists and the Nationalists had assumed "threatening proportions" ; he believed that it was "not beyond our capacity to find some means of settlement," and stressed that nothing should be left undone to prevent action which might result in "the world sliding into disastrous consequences."

Mr. Menzies (Prime Minister of Australia) told a press conference on Sept. 10 that the present tension in the Formosa Straits appeared to follow a "pattern," and pointed out that it followed closely upon the recent Peking talks between Mao Tse-tung and M. Khrushchev. "In 1955," he said, "Quemoy and Matsu were in the news ; next year it was Suez ; early this year it was Jordan, Iraq, and Lebanon ; now we are back to Quemoy and Matsu." In reply to questions, Mr. Menzies said that Australia had no automatic obligations if hostilities broke out in the Formosa Straits ; he also pointed out that the Anzus Pact between Australia, New Zealand and the U.S.A. did not extend to Formosa.

The Labour Prime Minister of New Zealand (Mr. Walter Nash) urged on Sept. 11 that Formosa should be made completely independent under U.N. guarantee, and demilitarized or neutralized ; he did not see that the present crisis could be solved by handing the island over to the Peking Government or, for that matter, allowing it to remain under the control of Chiang Kai-shek. Formosa had a history and culture of its own, and there was no reason why the Formosans should not manage their own affairs. The position of the offshore islands was different, as they belonged to China.

Mr. Nehru said on Sept. 7 that India supported Peking's claim to the offshore islands, adding that "no country can tolerate an island 12 miles offshore being used as a base for attack." After recalling that India recognized the Chinese People's Republic as the legitimate government of China, Mr. Nehru said he had no doubt that the offshore islands and eventually Formosa would have to go to that government. India, however, had always urged that this question should be settled peacefully, and it was unfortunate that "rather rigid attitudes" had been taken up on either side.

Reopening of Sino-U.S. Ambassadorial Talks.

The ambassadorial talks between the United States and the Chinese People's Republic were reopened in Warsaw on Sept 14, each country being represented by its ambassador in the Polish capital—respectively Mr. Jacob Beam and Mr. Wang

Ping-nan. The talks were held at the Mysliwiecki Palace, which was placed at the disposal of the ambassadors by the Polish Government. No statement was issued on the two-hour meeting between Mr. Beam and Mr. Wang—the 74th ambassadorial meeting since the opening of the Sino-American talks at Geneva in 1955.—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times - Australian News and Information Bureau - New Zealand Government Office, London - Indian High Commissioner's Office, London) **(Prev. rep. Evacuation of Tachen Islands, 14117 A; Sino-American Relations, Ambassadorial Talks, 16379 A.)**

A. UNITED STATES. — Federal Aid for Scientific Education and Teaching of Modern Languages.

Legislation was signed by President Eisenhower during the first week of September authorizing a four-year programme of Federal aid to scientific education at a cost of $900,000,000. It was fundamentally based on President Eisenhower's Oklahoma City speech of October 1957 (see page 15861), wherein the President stressed America's need for a great increase in the number of scientists, engineers, and teachers of modern languages in view of the great educational advances made in the Soviet Union. The appropriate legislation was passed by Congress in August, largely with bi-partisan support.

Under the Bill, loans of up to $1,000 a year for five college years will be made available to talented but needy students, with priority for (1) those intending to teach in schools, and (2) those whose high-school records show particularly ability in science, engineering, mathematics, or modern foreign languages. Interest at 3 per cent will start one year after graduation, repayments being on a periodic graduated basis over the next ten years. Half of the loan will be cancelled over a period of five years for college graduates who enter the teaching profession. It was estimated that about 100,000 students of outstanding ability would be able to go through college with the aid of the long-term loans to be provided.

In addition, 5,500 college graduates with special ability in science will be financed to enable them to take Doctor of Philosophy degrees; 1,500 "national defence" Fellowships for gifted college graduates will be offered for three years of post-graduate study; and the 27,000 high schools in the United States will be helped to bring their science laboratory equipment up to date.

Federal money for college loans (apportioned to the States on the basis of college enrolment figures) will be made available to both public and private colleges and universities. The Federal Government will provide 90 per cent of the loan fund and the college or university the other 10 per cent.

The programme will be administered by the Secretary of Health, Education and Welfare, Dr. Arthur S. Flemming.
(New York Times) **(Prev. rep. 16014 A.)**

B. WALES. — Development Corporation.

The establishment of a Development Corporation for Wales was announced at a press conference in Cardiff on Sept. 17 by Sir Miles Thomas, chairman of Monsanto Chemicals Ltd., and former chairman of B.O.A.C. Sir Miles explained that the corporation would have its headquarters in Cardiff and would have two primary objectives—to attract new industries to Wales and Monmouthshire, both from home and abroad; and to ensure a balanced economic development throughout the Principality

Sir Miles said that the corporation was envisaged as "a permanent feature of the Welsh economic scene" and described it as "one of the most important developments of the 20th century in the economic life of Wales" He explained that the Minister for Welsh Affairs (Lord Brecon) and himself were responsible for making the initial moves and securing support for the idea from leading Welsh industrialists. It would be comparable to the similar Development Corporations for Scotland and Northern Ireland and was expected to have an income of between £25,000 and £40,000 a year from industrial concerns supporting the scheme. Although it would be independent of Government control or finance, it would seek to co-operate closely with the Government, with existing organizations having the same aims as the corporation (e.g. the Industrial Association of Wales and the Welsh Economic Development Council) and with the trade unions. A director-general would be appointed to act as a Welsh industrial "ambassador-at-large," for which purpose he would visit the Continent and the United States to interest firms in establishing industries in Wales.

The board of the Development Corporation for Wales includes representatives of some of the largest industrial firms in the Principality, including Guest, Keen & Nettlefolds; South Wales Switchgear Ltd.; the B.P. Refinery (Llandarcy) Ltd.; Richard Thomas & Baldwins Ltd.; and John Summers & Sons Ltd.

Sir Miles Thomas is chairman of the Development Corporation for Wales, with Mr. Julian Pode (of the Steel Company of Wales) as vice-chairman.—(Western Mail, Cardiff)

C. ISRAEL - GHANA. — Economic and Technical Collaboration. - Trade Agreement.

A trade agreement between Israel and Ghana was signed in Jerusalem on Aug. 19 by Mr. Botsio, the Ghanaian Minister of Commerce and Industry, and Mr. Avriel, the Israeli Ambassador in Accra. Mr. Botsio had arrived in Israel earlier in the month as head of an official trade mission—the first mission of its kind to leave Ghana since the achievement of the country's independence.

Under the agreement, Ghana will pay for part of her purchases with funds accruing from goods sold to Israel, each party extending the other credit of up to £200,000. The remainder will come from a special credit fund provided by Israel of up to £7,500,000 for between five and 6½ years. The agreement will remain in force for four years and will be automatically renewed for a further year unless one of the parties gives three months' advance notice of its desire to terminate it.

Ghana will purchase chemicals, light industry products, cement and building materials, vehicles, machinery and other equipment, and food products; while Israel will buy such items as cocoa, oil seeds, copra, hides and wood.

Earlier in the year Mr. Barkai (general manager of a Tel-Aviv bank) and Captain Enrico Levy (head of the Israel Nautical School) had spent several months in Accra to advise the Ghanaian Government on the establishment of an agricultural co-operative bank and to assist in the establishment of a nautical training school. A delegation from the Ghana T.U.C. had visited Israel to study problems of trade union organization with the *Histadruth* -the Israeli trade union federation.

The Foreign Minister of Israel (Mrs. Meir) visited Ghana in February and March 1958 during a goodwill tour of eight Western African countries and territories.

D. FRANCE - WESTERN GERMANY. — Meeting between General de Gaulle and Dr. Adenauer. - Joint Declaration of Common Aims.

At the invitation of General de Gaulle, the German Federal Chancellor paid a visit on Sept. 14 to Colombey-les-Deux-Eglises (the French Premier's village home in eastern France) for discussions on questions of common interest to the two countries. The talks, lasting several hours, ranged over the whole field of European co-operation and international affairs, and were attended in part by the French and West German Foreign Ministers, M. Couve de Murville and Dr. von Brentano. The following joint declaration was issued by General de Gaulle and Dr. Adenauer at their conclusion:

"We have had a long, free and friendly discussion on many subjects, and are both deeply conscious of the importance and significance of our meeting. We believe that the hostility of former days is finished once and for all and that Frenchmen and Germans are called on to live in harmony and to work side by side. We are convinced that close co-operation between the German Federal Republic and the French Republic is the basis of all constructive work in Europe. It contributes to the strengthening of the Atlantic alliance and is indispensable to the world. We believe that this co-operation must be organized and that it must include the other nations of Western Europe with which our countries have close ties. We desire that this co-operation should be exercised to the advantage of all peoples in the field of the great problems of the world. We hope that it can be extended to the greatest possible number of European States."

General de Gaulle and Dr. Adenauer had never previously met each other before their meeting at Colombey.
(Le Monde, Paris - Frankfurter Allgemeine Zeitung)

E. UNITED KINGDOM. — Increase in Minimum Wage of Agricultural Workers.

The Agricultural Wages Board decided on Sept. 1, by a majority vote, to increase the minimum wage of adult farm workers in England and Wales by 6s. a week, bringing it up to £7 16s. for a 47-hour week. It was also agreed to make adjustments in the minima for juvenile workers so as to smooth out differences between the increases granted at various ages -e.g. the Board thought that there was at present too large a gap between the 120s. payable at 19 years of age and the 150s. payable at the age of 20. A claim by the National Union of Agricultural Workers for a reduction in working hours from 47 to 40 a week was rejected.

The increases were applicable to about 550,000 workers and were estimated to cost £9,000,000-£9,500,000 in a full year. They come into effect at the end of October.—(Times)

A. BURMA. — Split in Government and Anti-Fascist People's Freedom League. - New Cabinet formed by U Nu. - Government's Amnesty Offer to Rebels. - Proposed Legalization of Rebel Organizations. - Surrender of People's Volunteer Organization and Arakanese and Mon Rebel Leaders.

A serious split developed during the first six months of 1958 inside the Anti-Fascist People's Freedom League (AFPFL), the multi-party alliance which has ruled Burma since the attainment of independence in 1948. In consequence of internal disagreements, two of the four Deputy Premiers (U Ba Swe and U Kyaw Nyein) and 13 other Ministers resigned on June 4, whereupon the Prime Minister, U Nu, formed a new Cabinet in which the national minorities were represented. The new administration received a vote of confidence in the Chamber of Deputies on June 9 by a majority of eight, the Government being supported by the left-wing National United Front (N.U.F.) —the strongest Opposition group, a representative of which subsequently entered the Cabinet.

The most important organizations remaining inside the AFPFL at the beginning of 1958 were the Socialist Party, led by U Ba Swe and U Kyaw Nyein; the All-Burma Peasants' Organization, led by Thakin Tin (Deputy Premier and Minister for Social Services), and the Federation of Trade Organizations, the two latter organizations being Marxist in outlook. At the third congress of the AFPFL, held in January and February, there was a bitterly contested struggle for the secretaryship between Thakin Kyaw Tun (the Minister of Agriculture) and Thakin Tha Khin (the Home Minister); the rival candidates were supported by Thakin Tin and U Kyaw Nyein respectively, and when Thakin Kyaw Tun was elected an open breach was only averted through U Ba Swe's intervention. A new crisis developed in April as a result of the misconduct of sections of the *Pyusawhti* (village home guards), which had been organized in 1955 to protect the peasantry against rebels and bandits. When certain units were accused of ill-treating villagers in the Rangoon area, U Nu ordered the arrest of over 400 of them, including supporters of both the factions inside the AFPFL. On April 26 U Nu himself took over the Home Ministry from Thakin Tha Khin; he explained that he had done so because the police, who took their orders from the Home Minister, were "not so stable as the Army," which could be relied upon to remain neutral in political conflicts.

At a meeting of the AFPFL executive on May 3, U Nu stated that he would side with the faction led by Thakin Tin and Thakin Kyaw Tun and supported by the All-Burma Peasants' Organization and the Federation of Trade Organizations. U Ba Swe thereupon announced his support for the opposing group. The executive agreed on May 5 that a special session of Parliament should meet on June 5 to decide which faction should form the Government; that the defeated group should become a loyal Opposition; and that the League's funds should be equally divided between the two groups. U Nu announced at the same time that he would not dismiss his opponents from the Government, so that they might "work against him from positions of power." During the following month both factions attempted to gain the support of the Opposition groups and especially of the N.U.F., which finally sided with U Nu.

On June 4 U Ba Swe, U Kyaw Nyein, Thakin Tha Khin, Bo Khin Maung Gale (Finance Minister), and 11 other Ministers resigned from the Government, together with 22 Parliamentary Secretaries; U Nu nevertheless retained the support of two Deputy Premiers (Thakin Tin and Sao Hkun Hkio, the Foreign Minister) and 12 other Ministers. On the same day he formed a new Cabinet of 20 members, the five new Ministers being Saw Lulu (Minister for the Karen State), Duwa Zaw Rip (Minister for the Kachin State), Kyaw Min (Finance), U Maung Kyaw Zan (Judicial Affairs), and U Shwe Kyaing (Rehabilitation). Three of the new Ministers belonged to the Arakanese minority group in the Chamber, which had promised its support to U Nu.

A motion of no-confidence in the Government was presented on June 9 by U Ba Swe, who declared that U Nu had split the AFPFL and led the country into danger by aligning himself with the N.U.F., which, he alleged, was pro-Communist and had deviated from strict neutrality in foreign policy. In reply, U Nu denied that any alignment existed between himself and the N.U.F.; he declared that he would see to it that the Communists would never take power in Burma, and emphasized that his foreign policy was based on neutrality and would never change while he was in office. The motion of no-confidence was defeated by 127 votes to 119, the Government being supported by the 45 N.U.F. members and by the representatives of the national minorities. After the vote U Ba Swe and U Kyaw Nyein crossed the floor to congratulate U Nu, while the Government leaders shook hands with members of the Opposition group.

The Speaker of the Chamber of Deputies, Bo Hmu Aung, resigned on July 16 and was sworn in as Deputy Premier and Defence Minister—the post formerly held by U Ba Swe. Dr. E. Maung, president of the Justice Party and one of the chairmen of the N.U.F., was appointed Minister for Judicial Affairs on July 19 in place of U Maung Kyaw Zan, who had been transferred to the Ministry of Education.

In a broadcast on June 24 U Nu accused the Opposition faction of responsibility for corruption inside the AFPFL, and compared them to General Chiang Kai-shek, who, he alleged had paved the way for the victory of Communism in China by permitting corruption in his Government. He urged that more strenuous steps were needed to educate the nation's youth in the true meaning of democracy, and accordingly proposed that a national convention should be held under the combined auspices of the Government, the Opposition, and other suitable organizations. The main purpose of such a convention would be to draft a "national charter of democracy" clearly defining the rights and duties of the Government, the Opposition, the Press, etc., which would be signed and accepted by all parties.

On U Nu's advice, President U Win Maung cancelled on Aug. 19 his previous order summoning the Chamber of Deputies to meet on Aug. 28 for its budgetary session. U Nu stated that the Government had intended to dissolve Parliament during the session and to order elections, but district officers' reports had shown that, because of incomplete electoral rolls and the mounting tension between the two factions of the AFPFL, conditions did not warrant the holding of elections at the present moment. The President's action was regarded as equivalent to an indefinite prorogation of Parliament, in preparation for the holding of elections as soon as conditions were favourable.

The Civil War. - Amnesty Offer to Rebels.

After the split in the AFPFL U Nu adopted a more lenient attitude towards the Communist and other rebels, offering them a complete amnesty and the legalization of rebel organizations which renounced the use of violence. This policy led to the surrender during July and August of two sections of the rebels, the People's Volunteer Organization and the Mon United Front, although informal negotiations with the Communists failed to produce any immediate result. Details of the rebels' activities and of the Government's various amnesty offers are given below.

The main insurgent forces and their estimated strength in June 1958 were as follows. (1) The Burma Communist Party ("White Flag" Communists) led by Thakin Than Tun; these numbered 2,000 to 3,000 armed men, operating mainly in the mountains of the Upper Chindwin district. (2) The Communist Party of Burma ("Red Flag" Communists), a Trotskyist organization led by Thakin Soe, with about 1,000 men operating in the forest areas of the Pakokku district, on the Upper Irrawaddy. (3) The People's Volunteer Organization (P.V.O.), a left-wing group of 2,000 to 3,000 men which normally co-operated with the "White Flag" Communists; these were widely scattered, being found on the Upper Irrawaddy, on the Arakan coast, in the Irrawaddy delta, and in the Moulmein area. (4) The Karen National Defence Organization, which with 3,000 to 5,000 men was the strongest single rebel group; its main fields of activity were the Tenasserim area of southern Burma and the Irrawaddy delta. (5) The Moslem National Defence Organization, or *Mujahids*, with 2,000 to 3,000 men on the Arakan coast. (6) Various national minorities who had rebelled in support of their demands for autonomy or independence, including the Toungoos, with 500 to 1,000 armed men, and the Mons of Lower Burma; the Arakanese had already surrendered in January 1958 (see below). (7) The remnants of the Chinese Kuomintang troops who entered Burma after the Communist revolution in China and had refused evacuation to Formosa; numbering 2,000 to 3,000 men, they operated in the Kengtung area of the Shan States and supported themselves mainly by banditry.

The rebels concentrated on acts of terrorism and attacks on communications, though on occasion several hundred men—often drawn from different sections of the insurgents—would unite to attack a town. Thus Lamaing (50 miles S. of Moulmein) was sacked by about 1,000 Karen and Kuomintang guerrillas on Jan. 29, 1956; Thandaung (180 miles N. of Rangoon) was attacked by 200 Karens on Nov. 9, 1957; Thaton was unsuccessfully attacked by Karens on Dec. 19, 1957; and Minbu (270 miles N.W. of Rangoon) was raided on March 15, 1958, by about 200 well-armed Communists, who destroyed public buildings and kidnapped the local M.P. Among the rebels' more spectacular feats of sabotage were the destruction of seven railway bridges near Pegu on March 31, 1956; the derailment of a train 50 miles north of Rangoon on July 20, 1956 by a combined force of Karens and Communists, who attacked the wrecked train and kidnapped over 30 of the passengers; and the blowing-up on Feb. 23, 1958 of the main pipeline supplying water to Rangoon.

In September 1955 the Government had offered an amnesty to all rebels who surrendered by March 31, 1956. U Nu stated on Jan. 10, 1956, that individual members of the Government had received "peace feelers" from Communist leaders but that these were being ignored, as the Government was not prepared to legalize the Communist Party. According to reports published in the Rangoon press in January 1956, Thakin Than Tun had held frequent meetings with other rebel leaders at which he had pressed them to surrender and to take part in the general elections due to be held in April of that year, but had been opposed by Thakin Soe and leaders of the P.V.O. A proposal made to the Government by Thakin Than Tun for unofficial discussions as a preliminary to surrender was reported on April 3, 1956, to have been rejected by Bo Khin Maung Gale (then Home Minister), who insisted on unconditional surrender. The total number of rebels who had surrendered hitherto was given on the same date as 27,955, including 5,834 "White Flag" Communists.

In August 1957 the Army carried out an offensive against the Communists in the jungle area south of Mandalay, during which they captured large supplies of arms and equipment, numerous documents, a radio station, and the printing-press for the Communists' underground journal. The Communist Party chairman for the Pyinmana district (230 miles N. of Rangoon), Maung Maung, surrendered during these operations and helped to bring about the surrenders of 63 more insurgents in October. Bo Tin Yu, the Communist commander in this district, surrendered on Nov. 11 with 104 of his followers, including the entire district committee.

In a broadcast appeal to the rebels to surrender, made on Nov 18, 1957, U Nu announced that a special board would be set up to deal with problems of rehabilitation and resettlement; in implementation of his promises this board was subsequently set up and was empowered to make grants of money to former rebels to enable them to settle on the land or set up in business. During the next six months large numbers of rebels took advantage of the Government's offer. A Karen leader, Bo Myo Aung, surrendered with 146 followers on Nov 27 at Thaton; U Sein Da (a Buddhist monk), the leader of the Arakanese guerrillas who had been in arms since 1946, surrendered with 1,000 followers at Minbya on Jan. 25, 1958; 160 Communists surrendered at Monywa on March 16; and U Hla Pe (a pre-war deputy Speaker of the House of Representatives) surrendered with 1,334 other Karens at Taunggyi on May 5. Whenever a large group of rebels surrendered, a ceremony was held at which a member of the Government formally welcomed them back into "the legal fold."

The main obstacle to the ending of the civil war was the problem of legalization of political organizations which were in rebellion. U Nu disclosed on March 11 that Thakin Than Tun had approached the Government with a suggestion that the rebels should lay down their arms after the Communist Party and other rebel organizations had been legalized. U Nu stressed, however, that he was not prepared to enter into discussions with rebels unless they surrendered first; if the rebels handed over their arms, renounced the use of violence, and disowned those who refused to surrender, he (the Prime Minister) would see that "the right to organize their political parties democratically" was restored to them.

U Nu's broadcast of June 24 (quoted above), made after the split in the AFPFL, contained further concessions to the rebels. He promised them an amnesty for past offences, the legalization of their political organizations, and the right to take part in the proposed national convention, in addition to satisfaction for their other demands, such as the release of political prisoners and the holding of free and fair general elections, provided that they complied with the three conditions laid down in his speech of March 11. A decree granting an amnesty to rebels who surrendered, and legalizing rebel organizations which abandoned the use of violence, was issued by the President of Burma at the end of July.

The N.F.U. issued a statement on June 29 appealing to the Communists to take advantage of the Government's offer of an amnesty and legalization, which would enable them to contest the forthcoming elections. Although no formal negotiations took place between the Government and the rebels, the "internal peace committee," an unofficial body formed in 1957 by Thakin Kodaw Hmaing (one of Burma's leading men of letters), acted as an intermediary between the two sides during July and August.

Two rebel groups, the People's Volunteer Organization and the Mon United Front, took advantage of the Government's offer. On June 25 the P.V.O. allowed the Army to reoccupy Gwa (on the Arakan coast), the last rebel-held town in the country, which had been in their possession for the past ten years; 564 P.V.O. members and Mons "came into the legal fold" at Moulmein on July 19, and over 1,000 more on July 23. [The expression "come into the legal fold" was normally used by the Government in preference to "surrender," at the rebels' request.] The P.V.O. leader, Bo Po Kun (a former Education Minister), surrendered at Mandalay on Aug. 11 with 29 members of his central committee, and on Aug. 18 the People's Comrade Party (the political wing of the P.V.O.) was formally declared a legal party.—(Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Burmese Cabinet, 15492 A; Civil War, 12837 A.)**

A. UNITED STATES. — Presidential Pensions.

Legislation was signed by President Eisenhower on Aug. 25 granting a pension of $25,000 a year (about £9,000) to former Presidents of the United States and all future ex-Presidents, and also granting a pension of $10,000 a year to the widows of former Presidents. In addition, it was provided that ex-Presidents should have adequate office space at their disposal in a Government building, the services of the necessary administrative, secretarial and clerical staff, and free mailing privileges. There are two living ex-Presidents—Mr. Harry S. Truman and Mr. Herbert C. Hoover—and two surviving widows of ex-Presidents: Mrs. Woodrow Wilson and Mrs. Franklin D. Roosevelt.—(New York Times)

B. FINLAND. — New Coalition Government formed by Dr. Fagerholm.

A new Finnish Cabinet comprising representatives of the Social Democratic, Agrarian, Conservative, Swedish People's, and Finnish People's parties was formed on Aug. 29 by Dr. Fagerholm, after prolonged inter-party negotiations which had been in progress since the general elections of July last.

President Kekkonen had first asked Mr. Kilpi, the leader of the Popular Democratic Union (the Communists and their supporters, constituing the largest Parliamentary group) to form a Government on July 30. Mr. Kilpi's proposals for a left-wing coalition which would command the support of 101 of the 200 members of the Diet were rejected by both the Social Democrats and the Independent Social Democrats; he abandoned his attempt in consequence, and on Aug. 2 the President invited Mr. Hiltunen (a Social Democrat) to form a Cabinet. Mr. Hiltunen approached all the parliamentary groups except the Popular Democrats with a view to the formation of a broadly-based coalition; his invitation was accepted by the Conservatives and the Swedish and Finnish People's parties but was rejected by the Agrarians, whilst the Independent Social Democrats made their participation conditional on the restoration of unity within the Social Democratic Party. As the formation of a majority Government was impossible without Agrarian support, Mr. Hiltunen resigned his mandate on Aug. 6, Mr. Hetemäki (Conservative), whom President Kekkonen next invited to form a Cabinet, withdrew on the same day for the same reason.

Negotiations between the Social Democrats, Independent Social Democrats, and Agrarians for the formation of a three-party Government were begun on Aug 8, but produced no result. After prolonged but abortive inter-party negotiations, Dr. Fagerholm (the Social Democratic leader, who had previously been Premier in 1956-57) was asked by President Kekkonen on Aug. 26 to form a Government in which all parliamentary groups would be represented. This proved impossible owing to the other parties' refusal to co-operate with the Popular Democrats, whereupon the President asked Dr. Fagerholm to form a majority Government. Although the four right-wing parties agreed to enter a Cabinet led by Dr. Fagerholm, the Independent Social Democrats and the leaders of the Trade Union Federation (whom Dr. Fagerholm had consulted with a view to the inclusion of trade union representatives) refused to do so on the ground that the proposed Government would have a right-wing majority, whereas there was a left-wing majority in the Diet.

The membership of the new Government was announced on Aug. 29 as follows (abbreviations: S.D.—Social Democrat; Agr.—Agrarian; Cons.—Conservative; F.P.P.—Finnish People's Party; S.P.P.—Swedish People's Party):

Karl-August Fagerholm (S.D.) ..	Prime Minister.
Johannes Virolainen (Agr.) ..	Deputy Premier and Foreign Affairs.
Sven Högström (S.P.P.) ..	Justice.
Atte Pakkanena (Agr.)	Interior.
Toivo Wiherheimo (Cons.) ..	Defence.
O. P. Hetemäki (Cons.)	Finance.
Kaarlo Kajatsalo (F.P.P) ..	Education.
Martti Miettunen (Agr.) ..	Agriculture.
Kuusta Eskola (Agr.)	Communications and Public Works.
Onni Hiltunen (S.D.)	Commerce and Industry.
Vainö Leskinen (S.D.)	Social Affairs.
Mauno Jussila (Cons.)	Deputy Minister (Finance).
Niilo Kosola (Cons.)	Deputy Minister (Agriculture.
Olavi Lindblom (S.D.)	Deputy Minister (Communications and Works).
Kustaa Paasio (S.D.)	Deputy Minister (Social Affairs).

Dr. Fagerholm (57) is one of the most prominent figures in Finnish political life; he has been Prime Minister on two former occasions (1948-50 and 1956-57) and has held portfolios in many other governments. His new five-party Cabinet succeeded the non-party "caretaker" government formed in April last by Dr. Reino Kuuskoski. With the exception of Mr. Kajatsalo, Mr. Kosola and Mr. Lindblom, all members of the new Government have previously held ministerial office.

The new Government is supported by 137 of the 200 members of the Diet, the Opposition consisting of the 50 Popular Democrats and the 13 Independent Social Democrats. (Ministry of External Affairs, Helsinki) **(Prev. rep. 16324 A.)**

C. SUDAN. — Par Value for Sudanese Pound.

The International Monetary Fund announced on July 24 that the initial par value for the Sudanese pound had been established at £Sud.1 = U.S.$2.87156. The other parities were: £Sud.1 = 2.55187 grammes of fine gold, or £Sud.0.348242 = U.S.$1.—(International Monetary Fund) **(16227 D; 15689 B.)**

A. YUGOSLAVIA - SOVIET UNION.—Soviet-Yugoslav Note Exchanges on Suspension of Soviet Economic Aid. - President Tito's Reply to Soviet and Chinese Attacks on Yugoslavia. - M. Gomulka's Statement on Soviet-Yugoslav Controversy and Execution of M. Nagy. - Albanian Attacks on Yugoslav Leaders. - Flight of Yugoslav "Cominformists" to Albania.

The Soviet Government, in a Note on June 28, proposed that representatives of the Soviet and Yugoslav Governments should meet to discuss changes in the economic agreements between the two countries concluded in 1956. The text of the Note was subsequently published, together with those of the Soviet Note of May 27 and the Yugoslav Note of June 3 (see 16229 A).

The Note of May 27 stated that it was necessary to revise the agreements in view of the recent decision to speed up the development of the Soviet chemical industry (see 16248 A), in which large new capital investments would be necessary in the next few years. The Soviet Government therefore proposed that the credits granted under the agreements of Jan. 12 and Aug. 1, 1956 (see 14937 A, 15035 B), should be used in the periods 1962-69 and 1963-69 respectively, and that the delivery of equipment and the fulfilment of designing work under the agreements should be postponed for a similar period. If the Yugoslav Government so desired, however, equipment could be delivered and designing work carried out within the period originally envisaged, and could be paid for, not on credit, but through current exchanges of goods. These proposals, the Note concluded, had been approved by the East German Government, which was a partner to the agreement of Aug. 1, 1956

The Yugoslav reply (June 3) refused to accept the Soviet proposals, and pointed out that both the agreements clearly defined the obligations of the two countries. As the construction of certain enterprises envisaged under the agreements had already begun, and considerable manpower and resources were involved, any postponement would directly injure Yugoslavia's economy. The Note continued: "Such acts on the part of the Soviet Government introduce a lack of confidence in the economic relations between Yugoslavia and the U.S.S.R., and this can only do harm to the general normal relations between our countries. The Yugoslav Government also wishes to draw the Soviet Government's attention to the responsibility which it will assume for damage caused to Yugoslavia's economy if it maintains its present position, and reserves the right to demand fair compensation."

The Soviet Note of June 28 expressed surprise at the tone of the Yugoslav Note, which, it said, suggested "an attempt to present the U.S.S.R.'s position on Soviet-Yugoslav economic relations in a wrong light and to cast doubt on the fulfilment by the U.S.S.R. of its commitments under international agreements." After declaring that "the U.S.S.R. strictly abides by its international commitments," the Note maintained that "it is common knowledge that a change in certain terms of agreements as a result of negotiations between the parties does not go beyond the bounds of the normal, generally recognized practices of States in relation to international treaties, and that agreements as such do not deprive the parties of the right to raise the question of changing particular terms of the agreements." It therefore proposed that representatives of the two Governments should meet in the near future to discuss changes in the agreements "in a businesslike way."

The Yugoslav Government replied in a Note of Aug. 5, the contents of which were not disclosed. The Yugoslav Communist organ *Borba* reported on Aug. 25 that the Soviet Union had refused to complete the delivery of 200,000 tons of wheat due under the trade agreement between the two countries; the same issue of *Borba* quoted a Moscow despatch stating that the U.S.S.R. was expecting a record wheat harvest.

Addressing the Yugoslav National Assembly on June 26, M. Todorovich (the Vice-President in charge of economic affairs) said that Yugoslavia would go ahead with the projects affected by the cancellation of the Soviet credits and would seek credit elsewhere. He added that Soviet pressure was intended to "force Yugoslavia to abandon her independent position," and contained within itself the elements of a policy which relied on force in the settlement of international problems.

The Anti-Yugoslav Propaganda Campaign.

The Soviet and Chinese Governments and the Soviet "satellites" continued their propaganda campaign against Yugoslavia throughout the summer. M. Khruschev sent a message of greetings to President Tito on May 25 (the Yugoslav President's 66th birthday) in which he expressed the hope that the "misunderstandings" between the Soviet Union and Yugoslavia would be overcome; in his reply (June 2) President Tito said that the two countries had much in common, and that they should emphasize the bonds which drew them together. Soviet-Yugoslav relations nevertheless deteriorated further during June, following the Soviet Note of May 28 and M. Khrushchev's Sofia speech of June 3 (see 16229 A). President Tito replied to this speech, and also to recent Chinese attacks on Yugoslavia, in an address to 50,000 miners at Labin (Istria) on June 15.

Marshal Tito said that the main reason for the campaign against Yugoslavia was that "we refused to sign the 12-nation declaration in Moscow in November 1957 and refused to enter the so-called Socialist camp for reasons which have already been familiar to everybody for a long time, and which boil down to the fact that we are opposed to the division of the world into camps." After protesting against the attacks being made on Yugoslavia, particularly in the Chinese press and in the speeches of some Chinese leaders, he continued: "Marx, Engels and Lenin would turn in their graves if they knew who is explaining their theoretical premises and in what way. Marxist science appears to have undergone such a metamorphosis before it reached the Chinese leaders that today its founders would be unable to recognize it, and would especially be horrified by the ethics which certain Chinese leaders are palming off as Marxism . . . If the Chinese leaders have their own internal difficulties, as no doubt they have, let them solve them in some other way and not by attacks on Yugoslavia . . . The Chinese leaders have raised a hue and cry against us because of our foreign policy—the policy of co-existence between States and nations with different social systems. This means that they are against the relaxation of tension in the world, and that they are in the same position as the most reactionary warmongering elements in the West. There lies the crux of the matter—they are worried by our policy of peace and co-existence. But war does not solve internal difficulties in building Socialism, even though a country may have 600,000,000 inhabitants and even though some of their leaders may like to emphasize that in the event of war there would still be 300,000,000 Chinese left . . .

"In quantity and offensiveness of abuse," President Tito continued, "the Bulgarian Press vies with the Chinese, to say nothing of the Albanian leaders. They are always among the first when it is a question of slandering Yugoslavia . . . Other Communist parties are also endeavouring not to lag too far behind . . . It would appear that this campaign has been organized for a course of long duration, and that certain palliative statements made by some leaders in those countries from time to time have a definite purpose—to delude world opinion so as to isolate and discredit us as much as possible . . ."

Replying to M. Khrushchev's allegation that Yugoslavia was receiving U.S. aid in return for serving U.S. interests, President Tito said: "I fully agree that the Americans are not giving us aid so that Socialism may triumph in Yugoslavia, just as in 1921 and 1922 they gave assistance to the Soviet Union—not in order to strengthen the Soviet Government, but because there was famine there. The Americans gave us aid after 1949, not so that Socialism might triumph in our country—they have no liking for Socialism and do not hide the fact—but because there was a threat of hunger here, and also to help Yugoslavia resist Stalin's pressure and preserve her independence. If some quarters in America fostered other hopes in this connection, that was no concern of ours. Stalin's policy of economic blockade and threats caused Yugoslavia immense damage, which according to expert estimates amounted to about 600,000,000 dinars (£720,000,000), whereas the assistance of America, Britain, and France greatly helped Yugoslavia, which was in dire straits because of the blockade and Cominform pressure.

"Comrade Khrushchev often repeats that Socialism cannot be built with American wheat," President Tito continued. "I think it can be done by him who knows how, whilst he who does not cannot build Socialism even with his own wheat. Khrushchev says that we live on the charity we receive from the imperialist countries in the form of goods of poor quality which could not be placed elsewhere . . . But the American wheat, cotton, and fats are of very high quality and could be placed anywhere. American wheat is no worse than Soviet wheat, which we do not receive anyway . . . What moral right have those who attack us to rebuke us about American aid or credits, when recently Khrushchev himself sought to conclude an agreement with America on credits and long-term economic co-operation? Not only is there no logic here, but it is the height of cynicism . . ." [President Tito here referred to the recent letter from M. Khrushchev to President Eisenhower proposing increased trade between the Soviet Union and the U.S.A. and the granting of long-term American credits to Russia—see 16385 C.]

The anti-Yugoslav campaign was intensified after the Hungarian announcement on June 17 of Imre Nagy's execution (see 16231 A). Official Yugoslav comment on the execution emphasized the resemblance between the charges against Nagy and those brought against Laszlo Rajk (the former Hungarian Foreign Minister, who was hanged in 1949 on a charge of plotting to overthrow the Government with Yugoslav assistance—see 10265 A). M. Vlahovich, a leading member of the Yugoslav League of Communists, accused the Soviet Government on June 24 of reviving the methods used against Yugoslavia by the Cominform after the adoption of its anti-Yugoslav resolution in 1948; "the logic of 1948," he observed, had led to a series of political trials beginning with that of M. Rajk, and the execution of M. Nagy and the fresh accusations brought against Yugoslavia indicated that ideological discussion was again being replaced by "fabrication of court documents."

The Peking *People's Daily* asserted on June 26 that the Yugoslav leaders, by protesting against M. Nagy's execution, had "acted as the anti-Soviet and anti-Communist vanguard for the imperialist reactionaries"; it compared President Tito's references to China in his Labin speech to "a dwarf

kneeling in the mud and trying to spit at a giant standing on a lofty mountain." When the Yugoslav Ambassador to China left Peking on June 25, on his appointment to the Federal Executive Council, his departure was ignored by the Chinese Government, the members of which had previously boycotted both an official dinner given in his honour by the diplomatic corps and a farewell reception at the Yugoslav Embassy.

In a speech on June 19 to the Czechoslovak Communist Party congress, M. Kirichenko (a member of the Presidium of the Soviet Communist Party) repeated the allegation that the Yugoslav "revisionists" were very useful to the "imperialists"; he also denounced the theory that the transition to Socialism might take a number of forms, which had been put forward by M. Khrushchev at the 20th congress of the Soviet Communist Party (see 14745 A).

M. Kirichenko said in this connection : "The successes in building Socialist society in Czechoslovakia decisively refute all kinds of preaching about 'special' and 'specific' ways to Socialism . . Experience has shown that all attempts to stray from the broad highway to Socialism laid by the great October Socialist revolution [i.e. the Russian Revolution] undermine the forces of the international Communist movement and lead to division and disintegration, and that those who want to reach Socialism along some twisted path only land in a blind alley and in the quagmire of revisionism."

M. Gomulka's Statement on Yugoslavia.

M. Gomulka, the first secretary of the Polish United Workers' Party, criticized the attitude of the Yugoslav leaders and referred to the execution of Imre Nagy in a speech at Gdansk (Danzig) on June 28. [The P.U.W.P. had hitherto maintained a neutral attitude towards the controversy between the Yugoslav and Soviet Communist parties and had made no official comment on M. Nagy's execution.] M. Gomulka's references to Yugoslavia, though critical, were phrased in moderate terms, and he expressed no opinion on the trial and execution of Imre Nagy.

Despite the Yugoslav leaders' "undeniably sincere efforts" to bring about a relaxation of tension in international affairs," said M. Gomulka, their "negative attitude to the Socialist camp," seen objectively, had weakened the forces of peace and played into the hands of the "aggressive forces of the imperialists." which were doing their utmost to undermine the unity of the Socialist countries These elements supported Yugoslavia, not out of a liking for Socialism, but because they wished to encourage other Socialist countries to follow in Yugoslavia's footsteps. In contrast to the conflict of 1948-54 with the Cominform, nothing justified the present Yugoslav attitude, and he was criticizing it in the hope that they would come to understand its harmful effects. The execution of Imre Nagy, he added, was an internal Hungarian affair, and "it is not for us to judge whose fault it is or the justice of the penalty." M. Gomulka described M. Nagy as a "revisionist" who had capitulated to "forces hostile to the people's power," allowed the Socialist system in Hungary to collapse, proclaimed Hungary's withdrawal from the Warsaw Pact, and turned to the "imperialist" States for help.

Albanian Attacks on Yugoslavia.

The most violent attacks on Yugoslavia (apart from those in the Chinese press) were made by the Albanian leaders, notably during an official visit to Tirana by a Czechoslovak Government delegation at the end of June.

At a reception in Tirana on June 29, M. Enver Hoxha (first secretary of the Albanian Party of Labour) described the Yugoslav leaders as "traitors, incorrigible revisionists, enemies of the Soviet Union and Marxism, and hardened agents of American imperialism"; he declared that "we will do all we can to help these renegades from Marxism-Leninism to drown in muck," and asserted that "despite the Marxist varnish which the Yugoslav leaders have given it, revisionism is only a rusty weapon of the bourgeoisie which will end in the dustbin of history." M. Mehmet Shehu (the Albanian Premier) also described the Yugoslav leaders as "a band of traitors and enemies of Socialism" and "a group of agents of imperialism," adding that the struggle against them would be "fought to a finish and without any compromise."

Relations between Albania and Yugoslavia have been extremely strained since 1948, except for two brief periods in 1956 and 1957-58, when they underwent a superficial but short-lived improvement. The Albanian Party of Labour was the last Communist party in Eastern Europe to express support for the "de-Stalinization" policy adopted at the 1956 Soviet party congress, or to admit that it had made a mistake in breaking off relations with Yugoslavia ; it had also refused to rehabilitate Lieut.-General Kochi Dodze, who was executed in 1949 for "Titoism" (see 10057 C).

Yugoslav-Albanian relations deteriorated markedly in November 1956, when President Tito denounced M. Hoxha in his Pula speech as a Stalinist and an opponent of democratization (see 15258 A), and were further exacerbated by the execution of three former associates of Lieut.-General Dodze, one of them a Yugoslav. These were M. Andreu Dali (a wartime partisan leader and a former leading member of the Albanian Party of Labour), Mme. Liri Gega (his wife), and M. Petar Bulatovich (a Yugoslav citizen who commanded an Albanian partisan brigade during the war); all three were shot in Tirana on Nov. 23, 1956, on charges of espionage for an un-named foreign Power. A temporary "reconciliation," took place in July 1957, when Yugoslav and Albanian Communist leaders met in Moscow (see 15731 A), but this also proved short-lived ; on March 4, 1958, the Yugoslav Government recalled its Minister in Tirana as a protest against the ill-treatment of Yugoslav representatives by the Albanian authorities—notably the recent arrest of the Minister for moving two miles outside the zone which he was permitted to visit.

A Yugoslav Government spokesman confirmed on June 13 that ten Yugoslav citizens (all of whom had served prison sentences for pro-Cominform activity, but had been released before the completion of their terms) had fled to Albania on May 31 in order to join in the propaganda campaign against Yugoslavia from abroad. They included ex-Colonel Vlado Dapcevich (a half-brother of General Peko Dapcevich, the Minister of Communications), who was sentenced to 20 years' imprisonment after trying to flee the country in 1948 (see 9491 C) and was released in 1957. The spokesman added that a number of persons suspected of having aided their escape or engaged in other forms of "harmful activity" had been arrested, but denied reports of large-scale arrests which had appeared in the foreign press. (Tanjug Agency, Belgrade - Soviet Embassy Press Department, London - Times - Manchester Guardian - Le Monde, Paris)

(Prev. rep. Yugoslav-Soviet Dispute, 16229 A.)

A. NEW ZEALAND - JAPAN. — Three-year Trade Agreement on Most-favoured-nation Basis.

A three-year trade agreement between New Zealand and Japan was signed in Wellington on Sept. 9, whereby the two countries agreed to extend most-favoured-nation treatment to each other. The provisions of the agreement were announced to the N.Z. House of Representatives by the Prime Minister, Mr. Walter Nash.

Mr. Nash explained that both countries had agreed to extend to each other full "most-favoured-nation" treatment in respect of Customs duties, import licensing, and the control and allocation of foreign exchange As a result, New Zealand could expect to sell about 10,000 tons of meat to Japan a year under the agreement; to secure about 50 per cent of the Japanese casein (milk protein) market for the next three years; to compete in the Japanese market on a commercial and non-discriminatory basis in respect of N.Z. butter, cheese, dried skim milk powder, and other dairy produce; and to compete for 90 per cent of Japanese foreign exchange allocation for wool.

After pointing out that the agreement was similar to that concluded in 1957 between Australia and Japan (see 15666 C), Mr. Nash emphasized that it gave New Zealand manufacturers ample protection, would form a sound basis for the expansion of trade between the two countries, and would be advantageous to the New Zealand economy.

(Times - New Zealand Government Office, London)

(Prev. rep. 15666 C.)

B. AUSTRIA. — Soviet Protest at U.S. Overflying during Middle East Crisis.

The Soviet Government protested to the United States on July 21 against flights by U.S. military aircraft over Austrian territory during the Middle East crisis. The Soviet Note said that U.S. planes from Western Germany had flown across Austria *en route* for the Middle East "on July 16 and following days," thereby violating Austria's neutrality in spite of protests by the Austrian Government; these "unlawful actions" constituted a "gross violation of the Austrian State Treaty" and were "resolutely condemned" by the Soviet Union. Copies of the Soviet Note were sent to the British, French and Austrian Embassies in Moscow.

It was explained in Washington on July 22 that some unarmed U.S. transport planes had flown over Austria "during the pressure of Middle East events" without obtaining prior authorization from the Austrian authorities ; the U.S. Government had expressed its regret to the Austrian Government, and all such flights had now ceased.—(Wiener Zeitung - New York Times - Soviet Embassy Press Department, London)

(Prev. rep. 16305 A.)

C. JORDAN. — British Financial Assistance.

The British Foreign Office announced on Sept. 14 that H.M. Government had decided to make a grant-in-aid to Jordan of £1,000,000 during the fiscal year ended March 31, 1959, additional to earlier British loans made to the Jordanian Government.—(Times) **(Prev. rep. 15707 B.)**

A. UNITED KINGDOM. — Local Elections.

Results of local elections held in the spring of 1958 are summarized below, covering (i) the county council elections in England and Wales ; (ii) the elections to the London County Council, which are described separately ; (iii) the municipal borough elections in England and Wales ; and (iv) the Scottish city and burgh elections.

English and Welsh County Councils.

Elections in the 62 English and Welsh administrative counties, held during the week April 10-16, resulted in the Labour Party gaining control of four county councils—Essex, Lancashire and Middlesex being won from the Conservatives, and Carmarthenshire from the Independents. The only other change was in Worcestershire, where the Independents won control from the Conservatives.

The overall result of the county council elections was that anti-Labour parties retained control in 49 of the 62 counties, while the Labour Party controlled 11—the above-mentioned four counties, and seven where Labour was already in control (London, Derbyshire, Durham, Glamorgan, Monmouthshire, Northumberland, and Nottinghamshire). The Labour and anti-Labour groups are in equal strength in Staffordshire and the West Riding of Yorkshire.

Apart from London (see below), the Labour Party's biggest gains were in Lancashire and the Home Counties. In Lancashire the party won 21 seats from the Conservatives and lost three to Conservatives and Independents (a net gain of 18), while in Essex and Middlesex they gained 12 and 10 seats respectively. In Kent and Surrey (both of which were held by the Conservatives) Labour gained 17 and 12 seats respectively.

London County Council.

In the L.C.C. elections, held on April 16, the Labour Party gained 27 seats from the Conservatives and thereby increased their majority to 76—the biggest majority the party has had in its 24 years' control of the London County Council. Results were as follows :

	Seats	Votes	Percentage
Labour	101	1,248,125	59.0
Conservatives	25	796,581	37.8
Others*	—	66,783	3.2

*Liberals 57,424 votes ; Communists 4,772 ; others (Independents, Independent Labour Party, and S.P.G.B.) 4,587.

The total number of votes (2,106,489) represented only 30.3 per cent of the electorate—a decrease of about 2 per cent on the figures for the last (1955) L.C.C. elections. The highest poll was in North Lewisham (50.4 per cent) and the lowest in Stepney (15.7 per cent). As compared with 1955, the Labour vote increased by 8.7 per cent and the Conservative vote dropped by 26 per cent.

The L.C.C. constituencies (each returning three members) are identical with the London Parliamentary constituencies. The Labour and Conservative parties contested every seat, while the Liberals put up 31 candidates, the I.L.P. 7, the Communists 4, and the Socialist Party of Great Britain 3. There were also 7 Independent candidates.

Labour gained all three seats from the Conservatives in the following constituencies—Battersea South, Camberwell (Dulwich), Clapham, Holborn and St. Pancras South, Lambeth (Norwood), Wandsworth Central, and Wandsworth (Putney). In three other constituencies—Barons Court, Lewisham North, and Lewisham West—Labour gained one seat from the Conservatives. Among newly-elected members of the L.C.C. was Mr. Christopher Chataway (the British athletics champion, who has run the mile in under four minutes); he headed the poll for the Conservatives in Lewisham North.

English and Welsh Municipal Boroughs.

Elections were held on May 8 in 373 of the 401 municipal boroughs of England and Wales, the seats on the remaining 28 borough councils being filled by unopposed returns. In all cases the elections were for one-third of the councils' membership except at Banbury, Eastbourne, Reading, and Rotherham, where the whole council was elected. Final gains and losses for the 401 borough councils were as follows :

	Gains	Losses	Net change
Labour	343	48	+ 295
Conservatives	28	320	- 292
Liberals	54	5	+ 49
Independents	33	84	- 51
Communist	—	1	- 1

These figures do not include new seats created by rearrangement of ward boundaries ; Labour won 74 of these new seats, Conservatives 53, Liberals 1, and Independents 1.

The results of the municipal elections could be summarized as follows : (*a*) Labour's net gain of 295 seats virtually restored the party's position as it existed before the last (1955) borough council elections, when Labour lost 297 seats ; (*b*) the Conservatives' net loss of 292 seats was 28 more than the net gain of 264 which they achieved in 1955 ; (*c*) the Liberals, with a net gain of 49 seats, made their best showing since the war ; (*d*) the Independents, with a net loss of 51 seats, again declined in representation as in all post-war municipal elections.

Labour gained control of 12 boroughs—Bolton (Lancs.), Brentford and Chiswick (Middlesex), Darwen (Lancs.), Daventry (Northants.), Dudley (Worcs.), Gillingham (Kent), Heston and Isleworth (Middlesex), Luton (Beds.), Spenborough (Yorks.), Stourbridge (Worcs.), Uxbridge (Middlesex), and Walsall (Staffs.). The Conservatives gained control at Banbury and West Hartlepool, while the Liberals became the strongest party at Blackpool and Tewkesbury. Labour lost their former overall control at Brighouse, Bridgwater, Goole, High Wycombe, and Kidwelly, while the Conservatives lost overall control at Oxford, Ealing, and Bexley. Independents gained full control at Andover (Hants.), where they had previously had to rely on Conservative support. The sole Communist on an English borough council failed to secure re-election at Rowley Regis, Staffs.

As a result of subsequent aldermanic elections, Labour took control of Cardiff City Council (for the first time) and the Liberals took control at Blackpool. In Cardiff, the election of six Labour councillors to the aldermanic bench, in place of five Conservative aldermen and a Ratepayers' representative, gave the Labour Party an overall majority of two on the council, including the new Lord Mayor. In Blackpool, the replacement of five Conservative by five Liberal aldermen gave the Liberal Party an overall majority over the Conservative and Labour parties combined. Similar aldermanic elections at Oxford (in which Labour gained six out of seven seats) gave the Labour Party a majority over the Conservatives of 28 to 24—increased to 32-24 on June 26, when Labour won all four seats in a municipal by-election. Labour is not in full control of Oxford City Council, however, as there are also 12 University representatives on the council.

Scottish Cities and Burghs.

Polling took place on May 6 in some 150 Scottish cities and burghs. In the four leading cities, Labour retained control of Glasgow, Dundee, and Aberdeen, and the Progressives of Edinburgh.

There was only one change in the 38 Glasgow contests—a Labour gain from the Progressives, thereby increasing Labour's representation on the council to 69, against 44 for the Progressives and others. In Edinburgh, the Progressives lost two seats to Labour but remained in control of the council, whose new membership became 38 Progressives, 27 Labour, 1 Liberal, 1 Independent, 1 Protestant Action. Labour lost two seats to the Progressives at Dundee but retained a large overall majority on the council (24 Labour, 12 Progressives, 1 Independent). At Aberdeen the Labour majority was reduced to two as a result of two gains by the Moderates.

Elsewhere in Scotland, Labour won three burghs from the Progressives (Coatbridge, Motherwell and Wishaw, and Denny and Dunipace) and achieved parity at Kirkcaldy ; they were ousted only at Campbeltown (Argyll), where they lost control to the Independents. Two Scottish Nationalists hold the balance of power at Stirling, where the Progressives obtained 10 seats and Labour nine. The Communists gained a seat from Labour at Greenock.

In the Scottish burgh elections as a whole Labour gained 36 seats and lost 16—a net gain of 20 seats.

Polling in Scotland was somewhat higher than in recent years, though seldom above 50 per cent and sometimes as low as 20 per cent.—(Times - Daily Telegraph - Daily Herald - Manchester Guardian - The Scotsman, Edinburgh) **(Prev. rep. Local Elections, 15554 A ; 14877 A ; 14215 C ; 14208 A.)**

B. TURKEY. — Cabinet Changes.

The following changes in the Turkish Cabinet were announced on Sept. 5 consequent on the resignation of M. Sidki Yircali, the Minister of Industry, and M. Emin Kalafat, Minister of State : (1) M. Hafuk Saman (chairman of the Democratic Party's parliamentary group) as a Minister of State and acting Minister of Labour ; (2) M. Abdullah Aker (formerly Minister of Commerce) as a Minister of State ; (3) M. Hayrettin Erkmen (formerly Minister of Labour) as Minister of Commerce *vice* M. Aker ; (4) M. Hasan Polatkan (Minister of Finance) as acting Minister of Industry *vice* M. Yircali. M. Polatkan continued to hold the Finance portfolio.

M. Yircali resigned following a divergence of views with the Minister of Co-ordination (M. Ataman) on the price of imported newsprint, which had to be fixed on a new basis after the recent realignment of the Turkish currency (see 16351 B). It was understood that M. Kalafat had also disagreed with the application of the new economic regulations governing exports and imports.—(Times - Turkish Embassy Press Office, London) **(Prev. rep. Turkish Cabinet, 16315 B)**

A. LAOS. — Partial Elections to National Assembly. - Pathet Lao Gains. - Resignation of Prince Souvanna Phouma. - New Cabinet formed by M. Sananikone. - Laos Armistice Commission adjourned "sine die."

Elections were held on May 4 to fill 20 new seats in the Laotian National Assembly (the membership of which had been increased from 39 to 59 to make the Assembly more representative) and to replace a member who had recently died. Of the 21 seats, nine were won by the *Neo Lao Haksat* ("Patriotic Front of Laos"), consisting of *Pathet Lao* supporters; eight by the "National Liberty Front," a loose grouping of the right-wing and centre parties supporting Prince Souvanna Phouma's Government; and four by the *Santiphab* party, a neutralist left-centre group led by M. Bong Souvannouvong, which already held eight seats in the Assembly and had previously co-operated with the *Neo Lao Haksat*. The parties comprising the National Liberty Front were the Nationalists, sponsored by Prince Souvanna Phouma; the Independents (right-wing) led by M. Phoui Sananikone (the Foreign Minister); and the Democrats led by Mr. Katay Don Sasorith, a former Prime Minister and a strong opponent of the *Neo Lao Haksat*.

Prince Souvanna Phouma pointed out in a post-election statement that 680,000 votes in all had been cast for candidates of the centre and right-wing parties, against only 256,000 for the left-wing candidates. He attributed the success of the left-wing parties to the fact that the centre and right-wing parties had in many cases put up candidates against each other instead of supporting a single candidate in each constituency. To avoid any repetition of this, the centre and right-wing groups would shortly unite in a single party.

On July 22 Prince Souvanna Phouma tendered his Cabinet's resignation, but was asked by Crown Prince Savang Vatthana to form a new Government without support from the *Neo Lao Haksat* [the latter party had been represented by two Ministers in the outgoing Government since the agreement of Nov. 18, 1957 between the Government and the *Pathet Lao*—see 15881 B.] On Aug. 6, however, it was announced that Prince Souvanna Phouma had been unsuccessful owing to the demands of a newly formed *Comité pour la Défense des Intérêts Nationaux*, a group of "young men"—mainly senior Civil Servants—who had never before served in the Government, and who demanded that they should be allocated eight of the 12 Cabinet posts. This group contended that the people were dissatisfied with the "old guard" which had governed the country since the French withdrawal; it urged that the only way to check the increasing influence of the *Neo Lao Haksat* was to eliminate not only the representatives of the latter in the Cabinet, but also some of the old right-wing Ministers.

M. Phoui Sananikone, Foreign Minister in Prince Souvanna Phouma's Government, was thereupon asked to form a new government. He presented his Cabinet to the National Assembly on Aug. 15 and received a vote of confidence three days later by 27 votes to 21. In addition to the Premiership, M. Sananikone also took over the portfolios of Economic Affairs and of Posts and Telegraphs. M. Katay Don Sasorith (Deputy Premier in Prince Souvanna Phouma's Cabinet) retained the post of Deputy Premier and also became Minister of Defence and the Interior, whilst M. Souvannavong [see above] became Minister of Education and Culture. Apart from MM. Sananikone and Sasorith, all the Ministers were newcomers.

Prior to his resignation, Prince Souvanna Phouma had informed the chairman of the International Control Commission for Laos on May 24 that he considered the Commission's work as completed, since the Laotian Government had now carried out all its obligations under the Geneva Armistice Agreements; in these circumstances, he asked when the Commission intended to leave the country. An earlier Canadian proposal that the Commission should terminate its work after the elections had been opposed by the Indian and Polish members of the Commission—the Indian member (who is chairman of the Commission) taking the view that the Commission had no power to wind itself up and would have to await instructions from the co-chairmen of the Geneva Conference, i.e. the Foreign Ministers of Great Britain and the Soviet Union. On July 19 the Commission nevertheless decided by a majority vote of the Indian and Canadian members that it should adjourn *sine die*, though it might be re-convened in accordance with normal procedures; the Polish member formally protested against this decision, which, he claimed, would lead to the Commission's virtual liquidation.

In accordance with the majority decision, the Commission's Secretariat was suspended and the members of the Commission and their staff left Vientiane towards the end of July. At the same time the Indian Government announced that Major General Tara Singh Bal (India's alternate delegate to the International Control Commission for Vietnam) had been concurrently nominated as Indian delegate on the Laos Commission.

The Indian Deputy Minister for External Affairs (Mrs. Lakshmi Menon) told the *Lok Sabha* on Aug. 12 that the Government of India had always held the view that the Commission could not be finally dissolved independently of the progress of political settlement in the other two Indo-Chinese States, particularly in Vietnam, without adversely affecting peace in the whole of Indo-China. In reply to a question, Mr. Nehru said that the matter had been referred to the two co-chairmen—Britain and the Soviet Union—who had "recorded rather different reactions" to the proposal for winding up the Laos Commission.

Anglo-Soviet discussions on the matter were resumed at the Foreign Office in London at the beginning of July; a further meeting between Commander Allan Noble (Minister of State at the Foreign Office) and M. Malik (the Soviet Ambassador) took place on Aug. 26.—(Le Monde, Paris - Times - Montreal Star - Indian High Commissioner's Office, London - Polish Embassy Press Office, London) **(Prev. rep. 15881 B.)**

B. SOVIET UNION. — Successful Launching of Dogs to Height of 280 Miles. - Safe Return to Earth.

The Tass Agency announced on Aug. 29 that two dogs—"Byelanka" (Whitey) and "Pyestraya" (Brindle)—had been sent up to a height of 280 miles in a one-stage rocket and had been brought back to earth safely. It was stated that the experiment had taken place in the central part of European Russia on Aug. 27 under the International Geophysical Year programme. The following description was given by Tass:

"The rocket was launched at an angle close to vertical. Special stabilizers prevented the rocket's rotation around its vertical or horizontal axis throughout the whole flight, including the coasting. After reaching the planned height the rocket landed accurately in a prearranged area. The rocket was fitted with instruments for investigating the upper layers of the atmosphere.

"The two animals . . . were placed in a special hermetically-sealed pressurized cabin equipped with an air-purifying system, instruments for registering the animals' biological functions, and a film camera for recording their behaviour in flight.

"The total weight of scientific equipment, telemetering devices, batteries, and other instruments installed in the rocket, together with the shell of the instrument-carrying section, was 1,690 kilograms [more than 1¾ tons] . . . All the equipment functioned normally during the flight and supplied scientific data which are now being analysed.

"Special aerodynamic brakes and a giant parachute were used to bring down the instruments and pressurized cabin containing the dogs. The parachute, which was opened at an altitude of four to five kilometres [2½ to 3 miles], made the nose of the rocket containing the instruments and animals descend smoothly to earth.

"The dogs, which returned to earth fit and well, underwent several months' training before their record flight. The biologists in charge of them said that the animals had become so accustomed to their pressurized cabin, the instruments, and other features of the flight that they had entered the cabin themselves. For this reason, the information obtained by biologists is free of unrelated elements and truthfully reflects the behaviour of a living organism and its functions in conditions of flight at a great height."

The Tass Agency added that "Byelanka" and "Pyestraya" were "the first animals in the world to reach a height of 450 kilometres (280 miles) and to return safely to earth"; hitherto the maximum height attained on rocket flights by test dogs had been 212 kilometres.—(Soviet Embassy Press Department, London) **(Prev. rep. "Laika," 15950 C; 15835 A.)**

C. PERSIA. — Canadian Oil Concession.

The Prime Minister of Persia (Dr. Eghbal) informed the Majlis on June 22 that an agreement had been concluded between the National Iranian Oil Company (N.I.O.C.) and a Canadian oil company (Saphire Petroleum Ltd.) for exploration and exploitation of oil in two concessional areas in Persian Baluchistan, covering 1,000 square kilometres and including offshore rights in the Gulf of Oman. The agreement provided (1) for the formation of a joint organization (the Iran-Canada Oil Company) to carry out the work of exploration and exploitation; (2) for the division of profits in the proportion of 75 per cent to Persia and 25 per cent to Saphire Petroleum Ltd.; (3) for Canadian expenditure of $18,000,000 (about £6,500,000) in oil exploration over the next 12 years, with the proviso that Saphire Petroleum would pay the N.I.O.C. an indemnity of $350,000 (about £125,000) in the event of failure to drill the first oil-well within two years. The agreement was ratified by the Majlis on June 29.—(Times - Manchester Guardian - Montreal Star)

SEPTEMBER 20—27, 1958.

A. INDONESIA. — Suppression of Rebellion in Central Sumatra and North Celebes. - Raids on Shipping by Rebel Aircraft. - Government Allegations of Foreign Assistance to Rebels. - Arms Purchases in U.S.A. and Communist Countries.

The Indonesian Government forces operating against the rebels in Central Sumatra occupied Padang on April 17 virtually unopposed, and entered Bukittingi, the former seat of the rebel Government, on May 5. With the fall of Pajakumbu on May 22 organized resistance came to an end, although terrorist activities by scattered rebel bands continued. The rebels in North Celebes meanwhile seized a number of bases in the North Moluccas and carried on a systematic campaign of bombing raids on shipping in East Indonesian waters, with the object of weakening the Government by bringing economic life to a standstill. As their equipment was partly of U.S. origin, and some of their pilots were believed to be American and Nationalist Chinese "soldiers of fortune," this campaign led to a period of strained relations between Indonesia and the U.S.A. during April and the first half of May. The Government forces gradually re-established control over North Celebes and the North Moluccas during May and June, and occupied the new rebel "capital" at Menado on June 26.

Details of these and related developments are given below under cross-headings.

Suppression of Rebellion in Central and North Sumatra.

During the last week of March and the first half of April, Government troops advanced on the rebel territories in the west of Central Sumatra from three directions: from Pakanbaru to the north-east, from Rengat and Taluk to the east, and from Medan to the north. On April 1 troops from Pakanbaru occupied the town of Bangkinang (85 miles E. of Bukittingi) without resistance, but were then held up for three weeks by blown bridges and by guerrilla attacks. The forces advancing by the southern route crossed the Indragiri River on April 4, occupied the town of Lubuk Djambi on April 6, and captured Kilirandjau and Sungailangsat on April 16, after a skirmish in which the rebels lost 13 killed. [Kilirandjau stands at the junction of the Taluk road with the main road from Padang to Jambi and Palembang, by which the rebels obtained their food and petrol supplies.]

The rebel forces in North Sumatra broke up after their expulsion from Medan on March 17, the main body—led by Major Nainggolan—retreating southward into the province of Tapanuli, on the west coast south of Lake Toba. The pursuing Government troops, which had reached the borders of Tapanuli by March 28, refrained at first from entering the province, but the advance was resumed on April 11 and the occupation of the main towns completed on April 27, when Tarutung (the provincial capital) was recaptured.

The rebel Government was meanwhile meeting with increasing resistance within its own territory. Colonel Djambek, the insurgent Minister of the Interior, announced on April 2 that a plot to overthrow the rebel Government, led by prominent Socialists and by officers of the defence forces and the police, had been suppressed in Bukittingi; heavy fighting occurred near the town on the following day between troops and police who had rallied to the Jakarta Government and insurgent forces. Hand-grenades were thrown into the offices of Dr. Sjafruddin and Dr. Harahap (Premier and Defence Minister respectively in the rebel Government) on April 7, several police guards being wounded.

Lieut.-Colonel Kawilarang (the former Military Attaché in Washington, who had joined the rebels in March) arrived at Padang by air from North Celebes on April 15 to take command of the rebel forces in Central Sumatra. No explanation was given by the rebel leaders why the former commander, Lieut.-Colonel Hussein, had been superseded; according to later Government statements, however, letters seized after the fall of Padang showed that a split had occurred between the political leaders of the rebellion and Colonel Hussein and his officers.

A naval task force of 20 warships which had been blockading Padang shelled rebel defences around the port on April 16. At 6.30 a.m. on the following day marine commandos landed at Merah Enam (just north of Padang) and established a bridgehead, while at the same time parachute troops were dropped on the airfield, six miles north of the town. Two hours later infantry units began landing in waves, supported by warships and aircraft which shelled and bombed rebel fortifications. Before 5.30 p.m. the whole of Padang was in the hands of the Government forces, and the rebels, many of whom abandoned their equipment, were retreating in disorder, harassed by Government fighters and bombers. Loyalist casualties were given as one man accidentally killed, and two wounded. The most striking feature of the capture of Padang—the largest amphibious operation ever carried out by the Indonesian armed forces—was the almost complete absence of any opposition from the rebels.

After the fall of Padang the rebels' resistance rapidly collapsed, as the loyalist forces closed in on them from all sides. Government troops advancing from Lubuk Djambi captured Sungei Dareh on April 17, cutting the last road connecting Bukittingi with South Sumatra. The forces based on Pakanbaru resumed their advance, and occupied Muara Mahat on April 20. Solok (the rebels' military headquarters, 25 miles E. of Padang) fell on April 27 after a feeble resistance in which two rebels were killed, while Padangpandjang (at the junction of the roads from Padang and Solok to Bukittingi) was captured on May 4. Bukittingi, which had been abandoned by the rebel Government a fortnight before, was occupied on May 5; Batusangkar (the new rebel capital, 28 miles S.E. of Bukittingi) fell without resistance on May 9; and Pajakumbu, the last town held by the rebels, on May 22. The Government lifted the blockade of Sumatra on May 13 and authorized the resumption of air services to Padang.

The fate of the rebel leaders remained obscure. A report in the *Straits Times* (April 26) that Dr. Sjafruddin and his colleagues had escaped to Singapore in a speedboat was officially denied by the Singapore Government, and later reports suggested that they had fled to the jungle. Insurgent sources indicated during the first week of May, however, that Colonel Kawilarang and some of the rebel Ministers, including Dr. Sumitro (Minister of Commerce), had escaped to North Celebes.

Remnants of the rebel forces continued to carry on a guerrilla struggle in Central and North Sumatra. A force of about 2,000 attacked Bukittingi during the night of July 23 and were only driven out after several hours' heavy fighting, in which they lost 183 killed. Other rebel bands resorted to terrorism, attacking rubber estates and farms.

It was officially announced on July 30 that 480 rebels had been killed and 238 captured in Central Sumatra, whilst 2,110 (1,610 regular soldiers and 500 volunteers) had gone over to the Government forces; 2,875 heavy and light arms, 185 tons of ammunition, and 260 vehicles had been captured since April 17.

Developments in North and South Sumatra.

After the occupation of Tapanuli by the Government forces, Major Nainggolan and his followers returned to the Medan area, where they were reported in June to be raiding estates. Another section of his supporters, who withdrew to the Atjeh district (north-eastern Sumatra) after their expulsion from Medan, were officially stated on April 8 to have surrendered and been disarmed. The military commander of Atjeh announced on April 28 that an attempt by Army officers to seize control at Kutaradja (the capital of the district) and to bring it over to the side of the rebels had been suppressed and the ringleaders arrested.

Colonel Barlian, the military commander of South Sumatra, who had controlled the administration of the province since March 1957 (see 15421 A) and had adopted a neutral attitude towards the rebellion in Central Sumatra, was removed from his command on May 1 as the result of action by some of his own officers. All trade regulations issued by him were cancelled on May 16.

Operations in East Indonesia. - Rebel Attacks on Shipping.

The Indonesian Government started operations against the rebels in North Celebes on April 2, when forces from Borneo and Java landed on the west coast of Central Celebes and occupied the towns of Donggala and Palu, with the assistance of loyalist guerrillas. The towns of Kulawi (35 miles S. of Palu) and Parigi (on the east coast of Central Celebes) were both occupied on April 18. Loyalist guerrillas had previously seized control of the Sangihe and Taluad Islands (N.E. of Celebes) from the rebels on April 5.

The port of Gorontalo (on the south coast of North Celebes), which was held by the insurgents at the outbreak of the rebellion and had subsequently been seized by Government forces, was recaptured by the rebels during March. Rebel troops from North Celebes occupied the island of Morotai (the northernmost of the Moluccas) on April 28, and on May 7 landed on Halmahera (the largest island of the North Moluccas), where they seized the airfield at Djailolo. Both operations were preceded by heavy bombing by the rebel air force.

During April rebel aircraft operating from Menado carried out a number of raids on ports and airfields, causing considerable damage to foreign shipping. The raids were at first believed to be the work of a single bomber; on April 28, however, rebel aircraft bombed four widely separated ports and also

supported the landing on Morotai, suggesting that the rebels had recently obtained new supplies of aircraft from foreign sources. As thus augmented, the rebel air force consisted of at least 12 planes, including American-built *B-25* and *B-26* bombers, *Mustang* fighters, *Dakotas*, and a *Catalina* flying boat. Allegations by the Indonesian Government that these machines were being flown by American and Chinese Nationalist "adventurers" were partly confirmed by the capture of an American pilot on May 18 (see below).

During the fortnight April 13-27 rebel aircraft carried out raids on Macassar (South Celebes), Balikpapan (Borneo), and the island of Ternate (North Moluccas). On April 28 a single bomber raided Balikpapan harbour and sank an Indonesian Navy corvette, the *Hang Tuah*, which had been taken over from the Royal Netherlands Navy in 1949; official sources stated that 14 of the crew were missing and four had been seriously injured. The British tanker *San Flaviano* (12,278 tons), owned by the Eagle Oil and Shipping Co., was set on fire by a bomb and afterwards sank, the crew escaping with minor injuries; another British tanker, the Shell Oil Co.'s *Daroma* (8,139 tons), suffered only slight damage from a bomb which dropped alongside it. The Shell Company subsequently closed its refinery at Balikpapan and suspended production at the Tarakan and Bunju oilfields in Borneo, in order to protect the staff and installations.

During a raid on Amboina on April 28 the Italian freighter *Aquila* (5,330 tons) was bombed and sunk, 10 of the crew being killed, and the Greek ship *Armonia* (2,740 tons) was machine-gunned. The freighter *Moro* (549 tons), with a British master and a Chinese crew, was sunk in Donggala harbour on the same day. On April 29 the *Intata* (282 tons), an Indonesian pilgrim ship bound for Mecca, was bombed and damaged in the port of Kendari (South Celebes), five people being killed and 23 seriously injured. On April 30 the Panamanian freighter *Flying Lark* (1,253 tons) was bombed near Amboina, and 12 of her crew of 26 Hongkong Chinese killed. The rebel Government gave warning on May 5 that it would not be responsible for foreign ships sunk or damaged in raids on ports in Java and East Indonesia, whilst Dr. Sumitro stated on May 7 that compensation for loss or damage would not be payable unless ships carried clearances issued by the rebel Government. The Dutch shipping companies *Stoomvaart Maatschappij Nederland* and *Koninklijke Java-China Paketvaart Maatschappij* announced on the same day that they had ordered their ships to leave Indonesian waters pending the cessation of rebel raids on shipping.

A rebel bomber was shot down and another damaged during a raid on Amboina on May 1; two days later it was announced in Jakarta that a *B-26* bomber, with two American pilots and a Chinese Nationalist crew on board, had exploded in the air while approaching Makassar, it being claimed that this was due to sabotage. In consequence of these setbacks and the increasing military pressure on the rebels, the campaign against shipping was virtually brought to an end.

Suppression of Rebellion in North Celebes.

Following the collapse of the rebellion in Sumatra, the rebel leaders in North Celebes attempted to open peace negotiations with the Central Government. Jakarta Radio reported on May 5 that a letter requesting negotiations had been received from Colonel Warouw (the former military attaché in Peking), who declared that he was not personally on either side, but that he would join the rebel Government if the negotiations failed. [Colonel Warouw was nominated as a member of the rebel Government on its formation in February, and subsequently left Peking for Menado; it was not clear, however, whether he had ever taken up his post.]

An Army spokesman in Jakarta stated on the same day that Lieut.-General Nasution had given his officers permission to negotiate with Colonel Kawilarang in order to find out the latter's "intentions" and his "personal standing in the present situation." On May 6, however, Dr. Djuanda (the Prime Minister) said that his Administration would not deal with "adventurers" who invited foreign help, and that there would be no negotiations as long as the rebels continued to fight, although the Government would be willing to listen to "reasonable proposals." A second Army statement (May 7) said that the delegation of officers sent to meet Colonel Kawilarang had not been empowered to negotiate with him, but only "to remind him of his duty as an officer."

The Government opened its counter-offensive against the rebels in East Indonesia on May 9, when troops were landed on Halmahera, followed by landings of Government forces in the Gorontalo area of North Celebes on May 13.

The forces landed on Halmahera marched on Djailolo, which the rebels had seized two days beforehand; the recapture of that town was not announced until June 3, a force of 500 rebels having held out for three weeks.

The Government forces landed in the Gorontalo area occupied the town on May 20, meeting little resistance; Morotai was reoccupied by an amphibious force on the same day. In Central Celebes the town of Pendolo was captured by loyalist guerrillas on May 23, and Toboli was occupied by Government troops without resistance on May 30.

In a raid on Menado on May 15 the Indonesian Air Force destroyed six rebel aircraft, including a *Catalina* flying-boat, and also sank two ships in the harbour, while in a further raid on May 23 on Menado and rebel air bases it claimed to have destroyed or damaged three aircraft and several ships.

A rebel aircraft bombed and machine-gunned Amboina on May 17, causing many casualties. During a second raid on the following day, however, a rebel B-*26* bomber was shot down, its American pilot, Allan Lawrence Pope, and a former Indonesian Air Force sergeant (his navigator) being picked up by an Indonesian naval vessel off Amboina.

Lieut.-Colonel Pieters (Military Commander in the Moluccas) stated on May 27 that Pope, a former lieutenant in the U.S. Air Force, had been employed by the Civil Air Transport Company in Taiwan (Formosa), had admitted that he was paid $10,000 a month by the rebels for bombing missions, and had said that he had flown to Menado from the U.S. Air Force base at Clarke Field, in the Philippines. It was announced on the following day that Pope and the sergeant would be tried by a military court for aiding the rebels.

In view of the advance of the Government troops in North Celebes, Lieut.-Colonel Sumual (the rebel commander in North Celebes) made a second appeal for a negotiated settlement in a broadcast from Menado on May 21. This was rejected by the Government on the following day, whereupon Menado radio announced on May 24 that the rebels had formed a new "caretaker Cabinet" headed by Colonel Warouw. At the beginning of June the Government forces prepared for the final assault on Menado by occupying the islands of Talise (off the northern tip of Celebes) and Lembeh (at the mouth of Bitung harbour).

Troops were landed on June 9 on the east coast of North Celebes near Bitung (25 miles E. of Menado); paratroops were dropped on June 13 on the west coast north of Menado; and infantry and marines landed in force on June 16 at Kema (10 miles S. of Bitung). Both the port of Bitung and Menado airfield were occupied on June 19. Menado itself, which was defended by 10,000 rebel troops and a triple defence line of artillery, put up the strongest resistance offered to the Government forces throughout the entire rebellion; although the loyalists entered the town on June 21, it was not completely occupied until the afternoon of June 26.

After the fall of Menado the rebel forces retreated southward to Tomohon, the only town in North Celebes still in their hands, with the exception of Tondano (20 miles S.E. of Menado); Tondano, however, was occupied by Government troops on July 17, and Tomohon on Aug. 16. In Central Celebes, Government forces captured the town of Poso on July 15, and minor operations against rebel guerrillas in both North and Central Celebes continued to be reported during August. It was announced on Aug. 20 that three rebel battalions (about 3,000 men) had gone over to the Government in North Celebes, while the surrender of more than 3,000 rebels in the area was announced on September 3.

The Government announced on June 20 that there was no further danger of rebel air raids, as with the capture of Menado airfield all Indonesian airfields were under Government control; shipping could therefore again use East Indonesian waters. The Shell Oil Company resumed operations in Borneo on June 26, whilst the Dutch shipping companies resumed normal services on the following day.

At a conference of regional military commanders ending on Aug. 6, it was decided to ban illegal barter trade; to forbid military officials to take payment for issuing permits to traders; to take action against abuse of the military authorities' power to commandeer private property for war purposes; and to dismiss military personnel and civil servants who had taken part in the rebellion. A decree was also issued by Lieut.-General Nasution ordering all high-ranking officials to give details of their relations with political parties before Nov. 30.

Indonesian Diplomats' Support for Rebellion.

Fourteen members of Indonesian diplomatic missions to foreign countries resigned their posts between February and May, as a gesture of support for the rebels or of disapproval of the Government's policies.

The most prominent of these, apart from Colonel Warouw and Lieut.-Colonel Kawilarang, was Mr. Sutan Mohamad Rasjid, the Indonesian Ambassador to Italy, who resigned on April 19 and was appointed as the rebel Government's "co-ordinator for Europe and the United Kingdom"; he was succeeded as Ambassador in Rome by Dr. Abu Hanifah. Other diplomatic representatives who resigned included Mr. Makatita, Commercial Counsellor at the London Embassy; Mr. Bachtiar Effendi, Press Attaché in Rome; Mr. Wilhelm Pesik, Consul-General in Saigon; Major Tengku Nurdin, Military Attaché in Singapore; and the Second Secretary and Press Attaché in Brussels. Major Nurdin was subsequently reported to have been captured in North Sumatra.

Indonesian Arms Purchases from Abroad. - Tension with U.S.A. - Subsequent Détente in U.S.-Indonesian Relations.

Relations between Indonesia and the U.S.A. deteriorated seriously during April and the first half of May, as a result on the one hand of the U.S. Government's refusal to supply arms to the Indonesian Government; and on the other of the supplies of arms of U.S. origin received by the rebels from

outside sources (though there was no indication of any U.S. responsibility for these supplies), the assistance given to them by some American "soldiers of fortune," and a statement by the U.S. State Department which was interpreted in Jakarta as implying moral support for the rebellion.

The Indonesian Government had approached the U.S.A. in July 1957 with a view to purchasing large quantities of arms, but no action had been taken on this, despite repeated Indonesian requests for a response. An Indonesian Army spokesman stated on Jan. 2, 1958 that, in addition to the U.S.A., Indonesia had approached Britain, France, Italy, Australia, Yugoslavia, Czechoslovakia, Poland, and Sweden for arms, but the only reply had been a negative one from Sweden.

The Indonesian Foreign Minister, Dr. Subandrio, stated on April 3 in an interview with the Jakarta correspondent of *The Times* that Indonesia would buy arms or military aircraft from Czechoslovakia or Yugoslavia under newly concluded contracts, though he did not know any details. He added that she would renew her request for the purchase of arms from the U.S.A., and that inquiries were being made about the purchase of small arms and ammunition from India, Japan, and Egypt.

Dr. Subandrio's statement on Indonesian purchases of military aircraft from European Communist countries was contradicted by a spokesman of the Indonesian Foreign Ministry, who denied on April 6 that Indonesia would buy Soviet military aircraft from Czechoslovakia and train pilots in Egypt, describing such reports in the foreign Press, as well as other reports that she would train pilots in Egypt, as "invented stories." On May 16, however, Air Vice-Marshal Surydharma (C.-in-C. of the Air Force) said in a press interview that "a variety of aircraft ranging from gliders to jet and conventional trainers and jet fighters and bombers" had been ordered "from Yugoslavia, Czechoslovakia, and Poland."

Meanwhile an Associated Press report from Jakarta (April 6) quoted a Government spokesman as saying that Indonesia had completed negotiations with Poland, Czechoslovakia, and Yugoslavia for the purchase of military equipment, including *Mig* fighters and *Ilyushin* bombers. This report led to a statement by the Press Officer of the U.S. State Department (Mr. Lincoln White) on the following day which aroused strong feeling in Indonesia.

Mr. White said that the U.S.A. had known for some time that Indonesia had sent arms-purchasing missions to both Western and Eastern Europe in the past three months and had placed orders for aircraft and other equipment, none of which had been supplied by Western countries. He expressed regret that "Indonesia turns to the Communist bloc to buy arms for possible use in killing Indonesians who openly oppose the growing influence of Communism in Indonesia," and said that there was no doubt that the arms were being made available by the Communist countries "as a means of strengthening Communist influence in South-East Asia."

As Mr. White's statement was interpreted in Jakarta as an expression of support for the rebels, Dr. Subandrio demanded an explanation on April 8 from the U.S. Ambassador, Mr. Howard Jones, who gave an assurance that the U.S.A. had no intention of interfering in Indonesia's internal affairs. Dr. Subandrio afterwards told the press that Indonesia had not withdrawn her request for the purchase of U.S. arms, but that she could not wait until the U.S. Government had reached a favourable decision, as the matter was of the greatest urgency.

Mr. Dulles outlined the U.S. Government's position in a press statement on April 8.

After confirming reports that the Indonesian Government had made a new request to the U.S.A. for arms purchases, and saying that no request for arms had been received from the rebel forces in Sumatra, Mr. Dulles stated that the U.S.A. would not supply arms "to either side" in the Indonesian fighting. Referring to the Indonesian announcement of Aug. 6 that agreements for the purchase of arms and aircraft had been concluded with Poland, Czechoslovakia, and Yugoslavia, Mr. Dulles said that the U.S. Government "does not believe that the promiscuous spreading of large amounts of major armaments around the world is a sound or healthy practice." It was U.S. policy, Mr. Dulles added, to supply defensive arms to a friendly nation threatened with aggression, and small arms for normal police duties and the maintenance of internal order against subversion. The "very large amount of arms" requested by the Indonesian Government, however, could not be justified on either of these two grounds. At the time of the first Indonesian requests, the U.S. Administration had felt that Indonesia wanted the arms to force the Netherlands to agree to talks on the disposition of Dutch New Guinea. When, later on, the revolt had broken out in Sumatra, "it did not seem wise to the United States to be in the position of supplying arms to either side of that civil revolution."

In reply to questions, Mr. Dulles declared that it was still the American view that the situation in Indonesia was "primarily an internal one," and that the U.S.A. intended "to conform scrupulously to the principles of international law that apply to such a situation."

On the question of arms supplies to the rebels, Mr. Subandrio said in a statement in mid-April that it had been proved by photographs that the rebels were buying arms from Singapore, and that weapons dropped for the rebels in Central Sumatra and captured there by the Government forces had been marked for use by the Chinese Nationalist forces. During May it was reported in Jakarta that military equipment marked "made in the United States" or bearing Chinese Nationalist markings had been captured from the rebels in North Celebes and Halmahera. The intensification towards the end of April of rebel raids from North Celebes by aircraft believed in Jakarta to have been piloted by Americans and Nationalist Chinese led to strong protests by the Indonesian Government, which gave warning that such "foreign aid" might "lead to a third world war" and that Indonesia would appeal to the United Nations if it continued.

Dr. Djuanda, the Indonesian Prime Minister, claimed on April 30 that the rebels had only two Indonesian pilots, and that for a long time no petrol had been available for aviation at Menado, where the petrol dump had been destroyed. The conclusion could therefore be drawn that the pilots employed by the rebels were foreigners, and reports received from Menado indicated that they were Americans and Nationalist Chinese. The Government had "proof" that automatic weapons and fighter planes had been smuggled from Formosa, and it could also be inferred that petrol had been illegally imported from abroad. If this situation were allowed to develop it would have a disastrous effect on relations between Indonesia and the U.S.A. and would invite other groups to interfere in Indonesia's domestic conflicts, thereby reducing the country to a battlefield for conflicting foreign interests. The Government therefore called for an undertaking from the U.S.A. that U.S. nationals would not provide aid to the rebels in any form whatever, whether arms, aircraft, ships, technicians, or air base facilities. As Nationalist Chinese living in Indonesia were treated fairly (Dr. Djuanda continued), the Government in Formosa should adopt a similar attitude towards Indonesia. In conclusion, he condemned all foreign intervention in Indonesian affairs as a threat to the peace of Asia and the world.

In a speech on May 2 President Sukarno said: "We could easily have asked for volunteers from outside . . . We could have thousands of volunteers, but we will meet the rebels with our own strength. I want to tell the whole world don't play with fire in Indonesia. If some circles assist the rebels, others would assist us, and the result would be a world war. Indonesia is not going to become another Vietnam or Korea. Any attempt to divide us would result in a third world war." After stating that he had received letters from foreigners offering to fight against the rebels, he continued: "If they (the rebels) have one bomber from one side, we can get three from the other. But I don't want this . . ."

Mr. Dulles said on May 1 that the U.S. Government would give serious consideration to any proposals which the Indonesian Government might make, although it could not be held responsible for the activities of American "soldiers of fortune." The Chinese Nationalist Government denied on May 3 that it had helped the rebels with either men or weapons. In a broadcast from Menado on May 1, Colonel Warouw denied that the rebel aircraft were being flown by foreigners and named seven Indonesian pilots who were flying them.

After a two-hour interview with Mr. Howard Jones on May 3, Dr. Subandrio told the Press that if intervention by U.S. and Chinese Nationalist "soldiers of fortune" continued, Indonesia would regard their activities as "foreign aggression leading to a war situation" and would have no alternative but to take the matter to the United Nations. In a further statement on May 8 he said that, as the result of an agreement reached at a meeting between Dr. Djuanda and Mr. Jones, the Government hoped that "efforts will be made to prevent continuing foreign intervention"; if it did not end, the Government might take "other steps" to prevent it.

During the next few days, however, three developments led to a great improvement in U.S.-Indonesian relations. Mr. Dulles reiterated at a press conference on May 20 that the rebellion was a matter for the Indonesians to settle without outside interference, and said that the U.S.A. hoped for the quick restoration of peace and stability. The State Department announced on May 21 that licences had been granted for the export to Indonesia of small arms and ammunition for the police, aircraft spare parts, and radio equipment, to the total value of about $500,000; the licences, it was stated, covered purchases from private companies and were not connected with the Indonesian Government's request to buy arms directly from the U.S. Government. An agreement for the sale of 35,000 tons of rice to Indonesia by the U.S.A. was concluded on the same day under the legislation authorizing disposals of U.S. surplus farm products.

As a gesture of reconciliation, President Sukarno broke with tradition on May 22 to visit the U.S. Ambassador's home in Jakarta, accompanied by Dr. Djuanda and Dr. Subandrio. The Indonesian

Ambassador in Washington (Dr. Notowidigdo), visited Mr. Dulles on May 23; he afterwards expressed confidence that relations between the two countries would continue to improve, and stated that he had assured Mr. Dulles that "democratic forces in Indonesia are the strongest forces there, and we are firmly determined to establish a democratic country."

It was announced in Jakarta and Washington on Aug. 19 that, under an agreement signed on Aug. 13, the U.S. Government had sold Indonesia light military equipment for the Indonesian Army, the first consignments having already been flown to Jakarta. A State Department spokesman said that the agreement had initially been kept secret at the request of the Indonesian Government, and that the shipments included rifles, machine-guns, small vehicles, and communications equipment, but no heavy material. It was stated in Jakarta that the transaction was on a purely commercial basis.

Mr. Casey said on Aug. 20 that the Australian Government had been notified in advance that American arms would be sent to Indonesia, and approved the U.S. decision. He added that Indonesia had given an undertaking that the arms would be used solely for internal security, in view of this undertaking, and of the fact that the arms had only a limited use, he could see no danger of their being put to aggressive use, such as an attack on Dutch New Guinea.

The Indonesian Army spokesman (Lieut.-Colonel Pirngadie) disclosed on Aug. 24 that Indonesia had bought military equipment on a commercial basis from Yugoslavia, Czechoslovakia, Egypt, India, the Soviet Union, and Western Germany, as well as from the U.S.A., and was also approaching several other countries for arms supplies. He added that the purchases had been made "without any political obligations attached," that no heavy arms had been bought, and that the equipment obtained had been "mostly small arms and ammunition, engineering equipment, optical goods, and vehicles."

Soviet and Chinese Allegations on "Foreign Interference" in Indonesia.

Statements condemning "foreign interference" in Indonesian affairs, and accusing the U.S.A. of assisting the rebels, were issued by the Soviet Government on May 14 and by the Chinese Communist Government on the following day.

The Soviet statement referred to press reports alleging that the rebels were being supplied by sea and air from Singapore, the Philippines, and Formosa, that in some cases weapons were being delivered to the rebels directly from the U.S.A.; that U.S. instructors were training the rebels in their use; and that foreign aircraft, based on Formosa and the Philippines and piloted by U.S. and Chinese Nationalist airmen, were bombing Indonesian towns and Indonesian and foreign shipping. This "intervention," it alleged, was the result of the Western Powers' desire "to overthrow the Indonesian Government and alter its independent foreign policy," which had become "a great obstacle to the realization of the designs of certain Western Powers to keep up the colonial exploitation of the Afro-Asian peoples and inveigle the countries of this part of the world into aggressive military blocs." After describing the situation in Indonesia as "a serious menace to peace," the statement concluded: "The Government of the U.S.S.R. hopes that the Powers which are responsible for the situation that has developed in the area of Indonesia, and the United States first and foremost, will heed the voice of reason and will cease interfering in the internal affairs of the Indonesian Republic."

The Chinese statement alleged that the U.S.A. was sending "a continuous stream of light and heavy weapons, fighter planes, and petrol" to the rebels by way of Formosa, and declared that the "unscrupulous and vicious gangsterism" of the U.S.A. contained "an element of danger to peace in Asia and the whole world." It added that "should the United States fail to stop at once its interference in the internal affairs of Indonesia, it will certainly eat the bitter fruit of its aggression and provocation", if Washington continued to aid the rebels, the Chinese Communist Government was "prepared to give further assistance within its ability, as may be requested by the Indonesian Government." [Although China had previously supplied only economic aid to Indonesia, the above Chinese statement was widely interpreted as a hint that, as in Korea, China might send "volunteers" to Indonesia, in addition to supplying aircraft and ships. A Sino-Indonesian economic agreement had been announced on April 8 whereby Indonesia was granted credits for purchases of both capital and consumer goods, including 72,000,000 yards of cotton goods and 20,000 tons of rice.]

Postponement of Elections. - Internal Security Measures.

Dr. Djuanda announced in the Indonesian Parliament on Sept. 22 that the Government had decided to postpone for one year the general elections fixed for September, because political disturbances in Sumatra and Celebes made "free and honest balloting impossible."

General Nasution had previously issued an order on Sept. 5 prohibiting four political parties from operating in those areas of Sumatra and Celebes which had been cleared of rebels. The most important of the four parties was the Masjumi, the largest Moslem political organization in Indonesia; it polled 800,000 votes (about 51 per cent of the total vote) in Central Sumatra at the general elections of 1955, and nearly 8,000,000 votes (about 21 per cent of the total) throughout Indonesia. Dr. Sjafruddin Prawiranegara, the Prime Minister of the rebel Government proclaimed in Central Sumatra in February last, was a leading member of the Masjumi, whilst other prominent members of that party had also been connected with the revolt. The other three parties affected were the Socialists, the Christian Party, and the IPKI (Independence Party), of whom Lieut.-General Nasution was one of the founders, though he is no longer connected with it.

Following a statement by the Minister of Justice (Mr. Maengkom) alleging that Kuomintang agents in Indonesia had assisted the rebels in Sumatra and Celebes, the local Army Command in Jakarta announced on Sept. 18 that it had banned 52 Chinese organizations for conducting activities "in political, economic, social, and cultural fields identical with those of the Chinese Nationalist Kuomintang Association," which were "harming the national interests of the Indonesian people." The banned organizations included a bank, a number of cinemas, 11 schools, three newspapers, and various trade, youth, and sports organizations. The Chinese Nationalist Kuomintang Association in Jakarta had already been banned some weeks earlier. It was also announced in Jakarta on Sept. 18 that residents of Chinese descent who did not possess Indonesian or Chinese Communist passports would not be allowed to return to Indonesia once they left the country, and would be regarded as "stateless" persons. (Indonesian Embassy Press Office, London - Times - Daily Telegraph - Manchester Guardian - New York Times)

(Prev. rep. 16081 A.)

Corrigendum. The opening sentence of the second paragraph on page 16082 should read: "General Nasution ordered the arrest of the members of the rebel Government on charges of treason, and also of Lieut.-Colonel Somba, the latter's chief of staff, and two of his officials." (Ed. K.C.A.)

A. MALAYA. — Royal Malayan Navy transferred to Federation of Malaya. - Singapore Ceremony.

The Royal Malayan Navy, hitherto part of the Royal Navy, was transferred to the Government of the Malayan Federation at a ceremony in Singapore on July 12 attended by the Prime Minister of Malaya (Tengku Abdul Rahman), the Chief Minister of Singapore (Mr. Lim Yew Hock), the Governor of Singapore (Sir William Goode), and Admiral Sir Geralding Gladstone, C.-in-C., Far East. Until Malaya has a base of her own, the Royal Malayan Navy will continue to be based on Singapore; as from January 1959 the Federation Government will pay the Singapore Government a rent of 400,000 Malayan dollars a year for the lease of facilities on Singapore territory.

At present the Royal Malayan Navy possesses seven seaward defence motor-launches, a minelayer, a maintenance repair craft, and a landing-craft, all lent by Britain; Admiral Gladstone stated at the transfer ceremony that the Royal Navy would also present the Royal Malayan Navy with five minesweepers over the next two years. In addition to guarding the Malayan coastline, the Royal Malayan Navy will also assist in guarding Singapore territorial waters.

B. WEST INDIES. — British Grant.

It was announced on Sept. 27 that, following talks in London between Mr. Lennox-Boyd, the Colonial Secretary, and representatives of the West Indies, H.M. Government had agreed to provide a grant of £8,750,000 to the Federation for the five-year period 1959-63. The grant had been fixed in accordance with the arrangements agreed at the West Indian Federation Conference in 1956, and it was to enable the Federal Government to undertake the responsibility for making grants-in-aid to those Governments participating in the Federation whose revenues were insufficient to cover their administrative expenses. - (Times)

C. PAKISTAN - SIAM. — Friendship Treaty.

A treaty of friendship between Pakistan and Siam was signed in Bangkok on Aug. 28, its objectives including the maintenance of perpetual peace and the fostering of friendly relations between the two countries. The communiqué issued after the signing stated that negotiations for trade, cultural, and communications agreements had already started and that the questions of consular services and civil aviation would also be considered.—(Pakistan High Commissioner's Office, London)

A. UNITED STATES. — President Eisenhower's Proposals for Expansion of World Trade. - Proposed Creation of International Development Association.

In a letter of Aug. 26 to the U.S. Secretary of the Treasury (Mr. Robert B. Anderson), President Eisenhower put forward a three-point programme designed to stimulate world trade and economic development and comprising :

(1) An increase in the quotas of the member-Governments of the International Monetary Fund.

(2) Provision of additional capital for the International Bank, to be offered for subscription to member-Governments.

(3) The creation of an International Development Association as an affiliate of the International Bank.

President Eisenhower requested Mr. Anderson to make appropriate proposals as regards (1) and (2) at the forthcoming annual meetings of the International Bank and the I.M.F., to be held in New Delhi in October. Mr. Anderson was also requested to initiate negotiations aimed at establishing an International Development Association.

The President's proposals were made in response to a letter wherein Mr. Anderson had suggested the desirability of action along the above-mentioned lines, and had asked the President whether he wished "to have the subject pursued formally with the Governments of the other member-countries of the International Bank." In the course of his letter Mr. Anderson suggested that the International Bank and the I.M.F. should be strengthened to enable the two institutions to deal "more effectively" with the problems of expanding the free-world economy and also with "the economic growth and progress of nations in the less-developed areas of the free world." He also suggested the advisability of establishing an International Development Association as an affiliate of the International Bank.

President Eisenhower's letter to Mr. Anderson was worded as follows :

"I thoroughly agree with you that the well-being of the free world is vitally affected by the progress of the nations in the less-developed areas as well as the economic situation in the more industrialized countries. A sound and sustainable rate of economic growth in the free world is a central objective of our policy . . Among the principal elements in maintaining such an economic basis for the free world are (1) a continuing growth in productive investment, international as well as domestic; (2) financial policies that will command the confidence of the public and assure the strength of currencies; and (3) mutually beneficial international trade and a constant effort to avoid hampering restrictions on the freedom of exchange transactions."

After pointing out that the U.S.A. itself had taken a number of important measures in the past year (e.g. by increasing the lending authority of the Export-Import Bank, establishing the Development Loan Fund on a firmer basis, and extending and broadening the Reciprocal Trade Agreements Act), President Eisenhower continued : "Our own programmes, however, can do only a part of the job. Accordingly, we should also seek a major expansion in the international programmes designed to promote economic growth with the indispensable aid of strong and healthy currencies. As you have pointed out, the International Bank for Reconstruction and Development and the International Monetary Fund are international instruments of proved effectiveness already engaged in this work. While both institutions still have uncommitted resources, I am convinced that the time has now come for us to consider, together with the other members of these two agencies, how we can better equip them for the tasks of the decade ahead.

"Accordingly, I request that you take the necessary steps . . . to support a course of action along the following lines :

(1) In your capacity as U.S. Governor of the International Monetary Fund, I should like to have you propose, at the annual meeting of the Fund at New Delhi in October, that prompt consideration be given to the advisability of a general increase in the quotas assigned to the member-Governments.

"The past ten years testify to the important role played by the I.M.F. in assisting countries which, from time to time, have encountered temporary difficulties in their balance of payments. We are now entering a period when the implementation of effective and sound economic policies may be increasingly dependent in many countries upon the facilities and technical advice which the Fund can make available as they meet temporary external financial difficulties. This is particularly true of the less-developed countries, with the great variability in foreign exchange receipts to which they are subject from time to time. It also applies to industrialized countries which are dependent on foreign trade . . . The I.M.F. is uniquely qualified to harmonize these objectives, but its present resources do not appear adequate to the task.

(2) In your capacity as U.S. Governor of the International Bank, I should like you to propose that prompt consideration be given to the advisability of an increase in the authorized capital of the Bank and to the offering of such additional capital for subscription by the Bank's member-Governments. Such additional capital subscriptions, if authorized, would not necessarily require additional payments to be made to the Bank; they would, however, ensure the adequacy of the Bank's lending resources for an extended period by strengthening the guarantees which stand behind the Bank's obligations.

"The demands upon the Bank for development loans have been increasing rapidly, and it is in a position to make a growing contribution to the economic progress of the free world in the period which lies ahead. Moreover, it can do this by channelling the savings of private investors throughout the world into sound loans, repayable in dollars or other major currencies. But to meet the rising need for such development loans, it must be able to raise funds in the capital markets of the free world. An increase in the Bank's subscribed capital, by increasing the extent of the responsibility of member-Governments for assuring that the Bank will always be in a position to meet its obligations, would enable the Bank to place a larger volume of its securities in a broader market while still maintaining the prime quality of its securities and hence the favourable terms on which it can borrow and re-lend funds.

(3) With respect to the proposal for an International Development Association, I believe that such an affiliate of the International Bank, if adequately supported by a number of countries able to contribute, could provide a useful supplement to the existing lending activities of the Bank and thereby accelerate the pace of economic development in the less-developed countries of the world . . I request that you initiate promptly negotiations looking to the establishment of such an affiliate of the Bank . . .

"The three-point programme I have suggested for consideration would require intensified international co-operation directed to a broad attack on some of the major economic problems of our time . . "

In the course of his letter President Eisenhower pointed out that the International Bank had invested about $8,880,000,000 in development projects in 47 different countries and territories, most of them under-developed; loans by the Bank were running at the rate of about $750,000,000 a year, and the establishment of the International Finance Corporation had "greatly increased the scope and flexibility of the Bank's field of operation." The International Monetary Fund had made advances in the past two years amounting to approximately $1,800,000,000, and an additional sum of $900,000,000 was "in effect earmarked against stand-by commitments which the Fund has undertaken."
(New York Times) **(Prev. rep. 15048 A.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves in August.

The Treasury announced on Sept. 3 that the sterling area's gold and dollar reserves had risen during August by $5,000,000 after taking into account (*a*) the payment of $39,000,000 to the E.P.U. in respect of the U.K.'s deficit in July, and (*b*) the payment of $23,500,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $3,089,000,000 on Aug. 31.

In view of the usual seasonal pressure on the reserves, the August result was considered officially as "very satisfactory," this being the first time since 1953 that the reserves had increased during that month. It was also pointed out that the bilateral payments to E.P.U. creditors included a special one of $21,000,000 to Western Germany under the agreement of July 10, 1954; this provided for the repayment of $147,000,000 worth of credits granted to the U.K. by the E.P.U., and by the German Federal Government to the E.P.U., in equal annual instalments of $21,000,000 beginning Aug. 1, 1957, the present payment therefore constituting the second instalment.

Provisional figures for the E.P.U. August settlement showed that Britain had a deficit of £8,000,000, three-quarters of which would be settled in September in gold or dollars and one-quarter by an increase in the U.K.'s debt to the Union.

The E.P.U. deficit was an unusually low one for of the main months of tourist spending on the Continent, but it was believed that the sterling area's transactions with the E.P.U. had benefited from some purchases of sterling by the West German *Bundesbank*, following the undertaking by the Federal Government last May to deposit a further £50,000,000 in London for the purchase of armaments [see page 16240].

The sterling-dollar rate maintained a firm undertone during most of August, opening at 2.80 $\frac{5}{8}$ on Aug. 1, reaching its highest point at 2.80$\frac{7}{8}$ on Aug. 8, and fluctuating thereafter around 2.80$\frac{1}{2}$; towards the end of the month, however, it weakened to 2.80$\frac{1}{4}$ and 2 80$\frac{3}{8}$. Transferable sterling in Zürich showed similar fluctuations between 2.7805 on Aug. 1 and 2.78125 on Aug. 30, but was particularly firm from Aug. 20-25, moving between 2.78475 and 2.78675.—(Treasury Press Office, London - Times - Financial Times)

C. YUGOSLAVIA. — Conspiracy Trial. - Defendants' Appeals rejected.

The Yugoslav Supreme Court rejected on July 31 the appeals lodged by the two Socialist leaders—Dr. Alexander Pavlovich and M. Bogdan Krekich—and by Dr. Milan Zujovich against the prison sentences imposed on them in February last on charges of conspiring to overthrow the Yugoslav Government.—(Le Monde, Paris - New York Times)
(Prev. rep. 16067 A.)

A. POLAND. — Political and Economic Developments. - Deterioration in Church-State Relations. - Press Campaign against Clergy. - M. Gomulka's Statement. - Measures for Decentralization of Industry. - Reorganization of Workers' Councils. - Proposals for Sale of State Land to Peasants. - Cabinet Changes.

Relations between the Polish Government and the Roman Catholic Church deteriorated seriously during the summer, following an incident on July 21 when police searched the monastery of Jasna Gora at Czestochowa (the most sacred Catholic shrine in Poland) and carried off printing equipment and publications.

An official statement (July 30) said that "for some time illegal publications containing subversive matter directed against the regime" had been issued by the Primate's Institute for the National Vows, an organization with its headquarters at Jasna Gora; these had been "printed in violation of the existing legal regulations at an unregistered printing works," and had been widely distributed in all parts of Poland without having first been submitted to the Office of Press Control [i.e official censorship] After a formal warning given on May 13 had been ignored, a search had been carried out on July 21, "illegal publications" impounded, and the printing presses sealed; as the search had been resisted by employees of the Institute and some of the inhabitants of the monastery, militiamen had been called in and one person had been arrested.

The Minister for Religious Affairs (Dr. Sztachelski) announced on July 30 that the Government had summoned an urgent meeting of the joint commission established in 1956 to consider relations between the Church and the State. Accusing Cardinal Wyszynski (the Primate of Poland) of deliberately inflaming Church-State relations, he alleged that since his visit to Rome in 1957 the Cardinal had abandoned his previous attitude of support for M. Gomulka and had instead laid emphasis on "problems on which opinions differ."

The commission met on July 31, the Government being represented by Dr. Sztachelski and M. Kliszo (Deputy Speaker of the Seym) and the Roman Catholic Church by the Bishop of Lodz and M. Choromanski (secretary to Cardinal Wyszynski). According to a Government statement, it was agreed that the bishops should order religious organizations to remove all printing equipment from monasteries and other consecrated ground, and to submit all publications to the Office of Press Control for censorship.

Agreement was also reached on the distribution of gifts sent to the Polish Church by Catholics abroad, especially in the U.S.A.; this question had been a source of friction for some time, as the Church had insisted that the goods should be distributed by the clergy, whilst the Government had demanded distribution through an official board including ecclesiastical representatives. The commission decided that the gifts should be sent to the victims of recent floods in southern Poland, and should be distributed by the flood relief committee, which would be joined by three representatives of the Church.

Despite the agreement reached on these two issues, a press campaign against the attitude of the clergy, and especially of Cardinal Wyszynski, was launched during August.

The influential Warsaw daily *Zycie Warszawy*, in its issues of Aug. 8-9, accused the Cardinal of violating the agreement with the State concluded in 1956, quoting in this connexion a sermon delivered to a student congregation in Warsaw in which he denounced all forms of large-scale nationalization of property. *Trybuna Ludu*, the official organ of the Polish United Workers' Party, alleged on Aug. 12 that certain priests had acquired property which the Church had lost under the post-war land reform, or had encouraged parishioners to take over public buildings for use by the Church. In an article published by *Trybuna Ludu* four days later, a Supreme Court judge accused the clergy of encouraging violations of the law, especially the laws relating to marriage, birth control, and divorce. Cardinal Wyszynski replied to the press campaign by ordering special prayers of atonement to be said for three months in all Polish churches "in the face of press statements offensive to the dignity of our Queen, the Lady of Czestochowa."

Another cause of friction was the question of religious instruction in schools. The official press accused the clergy of exercising pressure on parents to make them send their children to religious education classes, and of undermining the secular character of education by attempting to introduce religious symbols into schools and to begin the school day with prayers. The Church, on the other hand, protested against an order forbidding members of religious orders to teach unless they were fully qualified which, it was stated, would deprive over 2,000 monks and nuns of their posts, thereby seriously hampering religious education. According to reports from ecclesiastical sources, Cardinal Wyszynski had a secret meeting with M. Gomulka and M. Cyrankiewicz (the Prime Minister) in January, and again on April 23, at which the problem of religious education was discussed, but without reaching agreement.

M. Gomulka made a strong attack on the Roman Catholic hierarchy when addressing educational workers of the United Workers' (Communist) Party, in Warsaw on Sept. 24.

M Gomulka recalled that the Church-State agreement of 1956 allowed optional religious instruction in schools if a majority of parents expressed a desire in writing. The State had expected the Church "to respect the old principle of rendering unto God what is God's, and unto Caesar what is Caesar's," but the Catholic Episcopate was "not only not supporting the Government" but was "overtly and secretly working in the opposite direction." Emphasizing that the schools belonged to the State, M Gomulka declared that "the State does not intend to back out from its agreement with the Church" and that "lessons in religion as an optional subject in schools will be continued", the State's attitude towards the teaching of religion was "one of tolerance, while maintaining the lay character of the school" The question of "religious emblems and practices" in schools (M. Gomulka continued) was quite a different matter. The Church-State agreement had made no references to crucifixes and collective prayers, which had "infiltrated" into schools, nor had the Catholic Episcopate made any request for their introduction; such emblems and practices, M. Gomulka maintained, would give the school a religious character, to which the State could not agree. A recent order by the Ministry of Education for the removal of crucifixes and other religious emblems from classrooms had met "with a varied reception from the clergy," and there had been instances in which priests had "whispered, incited, and loudly encouraged opposition to this instruction." M. Gomulka concluded: "We are not looking for war with the Church . . . but we will not permit a certain part of the Church hierarchy and clergy, who are under the influence of Vatican circles hostile to People's Poland and striving for ends not connected with religion, to undermine the legal State."

Other recent political and economic developments in Poland are described below.

Measures for Decentralization of Industry.

The Central Committee of the United Workers' Party (U.W.P.), at a plenary session on Feb. 27-March 1, adopted a resolution on economic policy for 1958 which included proposals for radical changes in the organization of industry.

The resolution noted that industrial output had risen by 9.6 per cent during 1957 and that the production plan for agriculture had been over-fulfilled; it attributed these achievements to the greater responsibilities granted to the factories, the setting-up of workers' councils, and the peasants' interest in increased production arising from the new agricultural policy adopted in 1956. The increase in wages and in the peasants' incomes, however, had surpassed the increase in production, and the profits of private enterprises in the towns had risen excessively. In consequence, the danger had developed early in 1957 of a serious disturbance of the market equilibrium; stockpiles of consumer goods had decreased, short term debts to foreign countries bearing a high interest rate had increased, and certain prices had risen.

The basic weakness of the national economy in 1957 (the resolution stated) had been insufficient productivity, caused by over-staffing in factories, the slackening of labour discipline, and an increase in absenteeism. During the second half of the year the situation had improved; labour discipline had been tightened, steps had been taken to limit unjustified private profits, and the reserves of consumer goods had increased, although the increase was still inadequate. Changes in the planning and management of the national economy had been gradually carried out, aimed at making the planning system simpler and more elastic and at the decentralization and democratization of management, by increasing the responsibilities of individual enterprises and of the people's councils and the workers' councils in the factories, and by the development of various forms of self-governing co-operatives.

Further radical changes in the organization of industrial management were envisaged in 1958. The existing central boards, which were purely administrative supervisory bodies forming specialized departments inside the industrial Ministries, were to be abolished; in their place, industrial enterprises would be grouped in "combines" which, without restricting the responsibilities of the individual enterprises, would have the task of co-ordinating their production plans. The "combines" would generally consist of enterprises belonging to the same branch of industry, but enterprises might also be grouped on the basis of locality or the existence of common features and scope for co-operation between them.

The resolution emphasized that in 1958 the rise in wages in industry must be closely linked with the increase in production, and must not outpace it. The employment position in each enterprise and each production department should be analysed, in order to eliminate over-staffing where possible. With this end in view, the minimum old-age pension would be increased from 120 to 500 zlotys a month, which would make it possible for all old-age pensioners to stop working. To combat absenteeism and the abuse of sick leave, control over the payment of sickness benefits should be more strict; a limit should be fixed on the outlay on such benefits for the various enterprises, and benefits paid above this figure should be deducted from the wages fund

The resolution was strongly opposed by a small "Stalinist" group on the committee headed by M. Klosiewicz (Deputy Minister of Labour and Social Welfare), which criticized the

proposed measures against over-staffing and absenteeism. This group was also reported to have accused M. Gomulka of weakness towards "revisionists," and to have criticized his attitude towards the Soviet Union. After M. Gomulka had replied, a motion was carried on March 1 expelling M. Klosiewicz from the Central Committee and reprimanding him for "undermining party unity," and on March 4 he was removed from his Ministerial post. [M. Klosiewicz was formerly a member of the Council of State and chairman of the Central Council of Trade Unions, but was dismissed from both these posts in November 1956—see pages 15244-5.] Two other leading "Stalinists" who had supported M. Klosiewicz at the Central Committee meeting, M. Matuszewski and M. Pawlak, were deprived of their posts as chairman of the control committee (which ensures the loyalty of party members) and as party secretary for the Warsaw district, on March 6 and Aug. 1 respectively.

In accordance with the Government's policy of decentralization of industrial management, the economic committee of the Council of Ministers decided on March 27 to reorganize the Ministry of Heavy Industry by reducing the number of its departments from over 20 to 13. The Ministry ceased to deal with such questions as industrial safety and hygiene, vocational training, minor personnel problems, etc., which were delegated to the central boards, and confined its activities to such fundamental tasks as the working out and co-ordination of long-range production plans and co-operation with foreign countries.

Reorganization of Workers' Councils. - Closer Party Control.

In a speech at the opening session of the Polish Trades Union Congress on April 14, M. Gomulka put forward proposals for the reorganization of the workers' councils, which, he suggested, should be amalgamated with the trade union and U.W.P. organizations inside the factories.

M. Gomulka stated that 5,600 workers' councils had so far been set up; the experience of the past 18 months had shown that "the institution is good and has passed its initial test," but also that "workers' self-government cannot find full expression in this form." After pointing out that workers' committees (the U.W.P. organizations) and works councils (trade union organizations) were functioning inside the factories side by side with the workers' councils, M. Gomulka continued:

"The exclusion of the works councils from workers' self-government has led to the wrong conception of restricting the tasks of works councils to questions of welfare, to the so-called defence of working-class interests, while questions of production and management were to be left entirely to the workers' councils. Restriction of workers' self-government to the workers' councils makes it very difficult for the works committees to realize the leading role of the party in the enterprises. Without the help of the works councils and of the party organizations, the workers' councils cannot properly perform their organizational and technical, to say nothing of their social and educational functions . . . Experience has shown that separation of these two functions—that is, leaving the organizational and technical tasks to the works councils and the social and educational tasks to the workers' councils—is impractical." He therefore suggested that a new body, called the "workers' self-government conference," should be appointed in all enterprises; this would include all the members of the workers' councils, works councils, and works committees, and its decisions would be binding on all three bodies.

The congress adopted on April 18 new rules for the Federation of Trade Unions, which laid down *inter alia* that strike action should be restricted to brief "token" strikes.

The new rules stated: "The trade unions will endeavour to settle justified and realistic demands of the workers and to eliminate causes of conflict in industry . . . In the conditions of Socialist economy strikes are harmful to the working class, and therefore they are not and cannot be recognized as a proper method of settling disputes. Particularly harmful, and requiring the most determined opposition from the trade unions, are the attempts at organizing 'wild' strikes made by self-styled organizers . . . In the case of persistent infringement of workers' rights, if the measures taken by the works council and the intervention of the trade union bodies fail to bring the desired result and the fixed dates are not adhered to, the works council, in consultation with the union executive, can . . . adopt a resolution addressed to the management to the effect that if the matter is not settled within a reasonable time the works council will appeal to the workers to support its attitude by a short warning strike lasting a quarter of an hour or so. Supervisory authorities of the factory concerned must be notified of such a decision, which may include a suggestion for the dismissal of the manager . . ."

Agricultural Policy.

Three Bills were passed by the Seym on Feb. 25 laying down procedure for (1) the expropriation of land, which might only be carried out by the State on payment of compensation; (2) the sale of State-owned land; and (3) the settlement of outstanding questions arising from the agrarian reforms carried out after 1945.

M. Ochab (Minister of Agriculture) told the Seym that the Government proposed to sell several hundred thousand hectares of land from the State farms to working peasants on easy terms. As regards the third Bill, he said that during the agrarian reform period and in the course of mass resettlement in the Western Territories (i.e. the former German territories) the people's councils and agricultural authorities had not always complied with the laws in force. Many abuses had been corrected, but some claims relating to land in the eastern Territories had had to be rejected, as it was of great political importance to strengthen the sense of the stability of property rights in these territories among the hundreds of thousands of peasant families which had settled there. M. Ochab said that apart from compensation for the former owners, a special fund was being set up to assist working peasants who wished to buy land.

Constitutional Changes.

On Dec. 13, 1957, the Seym unanimously passed a Bill reviving the Supreme Chamber of State Control, which had been abolished under the 1952 Constitution. The Chamber, which was declared to be directly responsible to the Seym, was empowered to investigate the activities of all central and local government bodies and Government departments. The chairman was to be elected by the Seym, and the other members by the Council of State.

Dismissal of M. Kuryluk.

M. Karol Kuryluk, the Minister of Culture, was dismissed on April 29, no reason being given; he was replaced on July 2 by M. Tadeusz Galinski. According to unofficial reports, M. Kuryluk (who belonged to the liberal wing of the U.W.P.) had opposed proposals for the limitation of the freedom which the Press, writers, and artists had enjoyed since 1956.

Purge of U.W.P. Membership.

It was announced in April that, as a result of the current purge of U.W.P. membership, the number of party members had been reduced from 1,266,754 to 1,052,809, whilst 4,249 new candidates had been admitted since December.
(Polish Embassy Press Office, London - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 15871 A.)**

A. UNITED STATES. — Space Council.

The following four members were appointed by President Eisenhower on Sept. 4 to serve on the National Aeronautics and Space Council set up under the recently enacted National Aeronautics and Space Act: Lieut.-General James H. Doolittle (retd.), who led the first bomber raid on Tokio during the war and is now vice-president of the Shell Oil Company; Mr. William A. Burden, formerly Assistant Secretary of Commerce for Air (1950-52) and subsequently special research and development assistant to the Secretary of the Air Force; Dr. Alan T. Waterman, director of the National Science Foundation; and Dr. Detlev T. Bronk, president of the National Academy of Sciences.

The other members of the Space Council are the Secretary of State (Mr. Dulles), the Secretary of Defence (Mr. McElroy), the director of the new National Aeronautics and Space Administration (Mr. T. Keith Glennan), the chairman of the Atomic Energy Commission (Mr. John A. McCone) and President Eisenhower himself.— (New York Times)
(Prev. rep. 16349 C.)

B. SOVIET UNION. — Marshal Bulganin dropped from Presidium of Soviet Communist Party.

It was announced in Moscow on Sept. 5, after a meeting of the Central Committee of the Soviet Communist Party, that Marshal Bulganin had been "relieved of his duties" as a member of the party's Presidium, no further explanation being given. The only remaining post held by the former Soviet Prime Minister is that of chairman of the regional economic council for the Stavropol area, to which he was appointed in August.

It was also announced that the 21st congress of the Soviet Communist Party would be convened on Jan. 27, 1959, to discuss "target figures for the development of the national economy for the years 1959 to 1965" and to hear a report from M. Khrushchev on this matter.—(Times - Soviet Embassy Press Department, London) **(Prev. rep. 16347 C.)**

C. SPAIN. — The Valley of the Fallen.

A national monument to commemorate those who fell on both sides in the Spanish Civil War was opened on Sept. 7 in the Guadarrama mountain range overlooking Madrid. It takes the form of a lofty 450-ft. cross towering over a mountain valley and visible from a great distance; under the base of the cross is a huge arched crypt carved out of the rocky heart of the mountain and dominated by a life-sized ivory figure of Christ. The monument, known as the Valley of the Fallen, took 16 years to build and will be maintained by the Benedictine Order. (A.B.C., Madrid)

A. ATOMIC ENERGY. — Detection of Nuclear Weapons Tests. - Report of Geneva Conference of Experts. - Proposals for World Network of Detecting Stations. - Forthcoming Anglo-American-Soviet Conference at Geneva on Suspension of Nuclear Tests.

The report was published on Aug. 30 of the Geneva conference of experts which met in July and August to consider methods of working out a control system for detecting violations of a possible international agreement on the suspension of nuclear weapons tests. Signed by all the Western and Eastern scientists taking part, it made a number of recommendations for an international control system for consideration by the Governments concerned, including a network of 160 to 170 ground stations throughout the world and about 10 ships on the oceans.

It was stated that the conference of experts had agreed that it was possible to detect and identify nuclear explosions, including low-yield explosions of 1 to 5 kilotons, by making use of the methods enumerated in the statement issued at the end of the conference—viz., collection of samples of radioactive debris; recording of seismic, acoustic, and hydro-acoustic waves; the radio-signal method; and on-site inspection of "unidentified events which could be suspected of being nuclear explosions." The experts also agreed that it was "technically feasible to establish . . . a workable and effective control system to detect violations of an agreement on the world-wide suspension of nuclear weapons tests." The report is summarized below (cross-headings inserted):

General Principles of Control System. The control system should be under the direction of an international control organ which would ensure that all control functions were co-ordinated in accordance with the following technical requirements:

(*a*) Development, testing, and acceptance of the necessary measuring apparatus and equipment for the control posts.

(*b*) Carrying-out at the control posts and on aircraft [see below] of "continuous and effective observations of the phenomena which make it possible to detect nuclear explosions by the methods recommended by the conference."

(*c*) Reliable communication between the international control organ and the various control posts.

(*d*) Means of transporting the personnel of the control posts and, so far as necessary, the staff of the international control organ.

(*e*) "Timely analysis and processing" of the data obtained by the control posts, "with the aim of speedily identifying events which could be suspected of being nuclear explosions."

(*f*) Staffing of the control system by qualified personnel.

Proposed World Network of Control Posts. It was recommended that the network of control posts should comprise 160 to 170 land-based posts and about 10 ships. Of the land-based control posts, about 100 to 110 should be situated on continents, 20 on large oceanic islands, and 40 on small oceanic islands. "However, the exact number of control posts . . . can be determined only in the process of actually distributing them around the globe, taking into account the presence of noise at the sites at which they are located and other circumstances."

In continental aseismic areas [i.e. areas not subject to earthquakes] the control posts should be spaced at distances of about 1,700 kilometres (1,060 miles) from each other, while in seismic areas they should be about 1,000 kilometres (625 miles) apart. Spacing of control posts in ocean areas would vary between 2,000 and over 3,500 kilometres (1,250 to 2,200 miles) except in seismic areas, where they would be about 1,000 kilometres apart.

The approximate distribution of control posts throughout the world (including a network of 110 continental control posts) would be as follows—37 in Asia, 24 in North America, 16 in Africa, 16 in South America, 7 in Australia, 6 in Europe, and 4 in Antarctica; together with 60 on oceanic islands and about 10 ships.

The tasks of the personnel at control posts would include "the ensuring of the normal functions of apparatus, the preliminary processing of data received, and the forwarding of these data to the international control organ and to the government of the country on whose territory the control post is located." Each control post would be staffed by some 30 qualified persons, together with auxiliary staff.

Aerial Patrols for Air Sampling. In addition to the network of control posts, "air sampling" would be carried out by aircraft engaged in regular flights "along north-south routes over the oceans, along the peripheries of the Atlantic and Pacific Oceans, and over areas of the oceans which are remote from surface control posts." Special flights would be organized to collect samples of radioactive debris in the case of "detection of an unidentified event which could be suspected of being a nuclear explosion."

Unidentified Explosions. If the control posts detected "an event which cannot be identified by the international control organ and which could be suspected of being a nuclear explosion," the international control organ could send an inspection group to the site of the event "to determine whether a nuclear explosion had taken place or not." The inspection group would forward a report to the international control organ and to the government of the country on whose territory the investigation was made.

Effectiveness of Control Posts. Subject to certain qualifications mentioned below, the experts were of opinion that the network of control posts, together with the use of aircraft for "air sampling," would have the following effectiveness

(*a*) "Good probability of detecting and identifying nuclear explosions down to about one kiloton taking place on the surface of the earth and and at altitudes up to 10 kilometres (6¼ miles); and good probability of detecting, but not always identifying, explosions at altitudes of 10 to 50 kilometres (6¼ miles to 31 miles)."

(*b*) "Good probability of detecting nuclear explosions of one kiloton set off deep in the ocean." In such cases use would be made of independent hydro-acoustic and seismic methods. It was pointed out that, in comparatively rare cases, "the identification of underwater explosions can be made more difficult by natural events which give similar hydro-acoustic and seismic signals."

(*c*) "Good probability of recording seismic signals from deep underground explosions equivalent to one kiloton and above."

Detection of Underground Explosions. It was pointed out that the detection of underground explosions posed special problems because the control posts would also be recording "a considerable number of similar signals" caused by natural earthquakes. The report commented in this connexion: "Although . . . the network of control posts would be unable to distinguish the signals from underground explosions from those of some earthquakes, it could identify as being of natural origin about 90 per cent of continental earthquakes whose signals are equivalent to 5 kilotons, and a small percentage of continental earthquakes equivalent to one kiloton. It has been estimated, on the basis of existing data, that the number of earthquakes which would be undistinguishable from deep underground explosions of about 5 kilotons' yield would be from 20 to 100 a year in continental areas. Those unidentified events which could be suspected of being nuclear explosions would be inspected as described above" [i.e. by on-site investigation by inspection groups.]

Special Difficulties. It was noted that the possibility of detecting nuclear explosions would be reduced in certain special cases, e.g. when explosions were set off in ocean areas where the number of control posts was small and the meteorological conditions unfavourable; in the case of shallow underground explosions; when explosions were set off on islands in seismic regions; and in "some other cases when the explosion is carefully concealed." In certain cases it might be impossible to determine exactly where a nuclear explosion had taken place, even though the explosion itself might have been detected. Nevertheless, the experts believed that "whatever the precautionary measures adopted by a violator, he could not be guaranteed against exposure, particularly if account is taken of the carrying-out of inspection at the site of the suspected explosion."

In conclusion, it was pointed out that the system described above "does not include specific means to detect and identify nuclear explosions at high altitudes (above 30-50 kilometres)." It was added, however, that the experts had "formulated findings on the method of detecting nuclear explosions at altitudes greater than 30-50 kilometres."

The Soviet Government sent Notes to the U.S. and British Governments on Aug.30 agreeing to the Anglo-American proposal that talks should open on Oct. 31 with a view to the suspension of nuclear weapons tests. The Soviet Government urged (*a*) that the talks should be held "for the purpose of concluding an agreement on the ending of atomic and hydrogen weapons tests for all time, coupled with the institution of appropriate control over the fulfilment of such an agreement"; (*b*) that they should be held in Geneva; and (*c*) that, "in order to avoid dragging out the negotiations," they should be limited to "a definite period of time," in which connexion the Soviet Government suggested "two or three weeks."

Appended to the Soviet Notes was the text of a statement by M. Khrushchev setting out the Soviet Government's point of view on the questions dealt with in President Eisenhower's statement of Aug. 22 relating to the suspension of nuclear tests (see page 16355). In this statement, which took the form of an interview with a *Pravda* correspondent, the Soviet Prime Minister expressed his full agreement with the conclusions of the Geneva conference of experts and said that there could be "no excuse or justification for refusing to end experiments with nuclear weapons at once and everywhere." The conference of atomic experts, he added, had "finally buried the legend about the alleged impossibility of control over the observance of an agreement to end nuclear tests."

The British and U.S. Governments presented identical Notes in Moscow on Sept. 10 announcing the readiness of both Governments to hold discussions with the Soviet Union in Geneva, beginning on Oct. 31, to discuss the suspension of nuclear weapons tests. As regards the Soviet proposal that the talks should be limited to two or three weeks, the Notes stated that the U.S. and British Governments "agree that the negotiations should be concluded as quickly as possible, but believe that their importance requires the expenditure of whatever time may mutually be deemed necessary for their successful conclusion."—(Times - Daily Telegraph - Manchester Guardian - New York Times - Soviet Embassy Press Department, London)

(Prev. rep. 16353 A.)

A. TIN. — Restrictions by Britain, Netherlands, etc., on Tin Imports from U.S.S.R. and China. - Large Purchases by International Buffer Stock to maintain "Support Price." - Export Restrictions for Producer-members of International Tin Council. - Breakdown of Price Stabilization Scheme. - Steep Fall in Tin Prices.

The British Board of Trade announced on Aug. 29 that from the following day imports of tin and tin alloys from the Sino-Soviet bloc would be subject to individual licensing. Imports from the U.S.S.R. itself would be subject to a quota of 750 tons a quarter, compared with actual imports of 1,362 tons in the first quarter of 1958 and of 2,090 tons in the second quarter. Eight other tin-importing countries, notably the Netherlands and Denmark, also announced restrictions on tin imports from the Soviet Union.

It was explained in the Press that this step followed a marked rise in the sale of Russian tin in world markets over the past 18 months. Soviet exports of tin to the free world (mainly to Britain and the Netherlands) had risen from 450 tons in 1956 to about 9,000 tons in 1957 and to about the same tonnage in the first seven months of 1958. This rapid increase, resulting in a further large fall in the price of tin in the international markets, had been causing distress in the main producing countries—Malaya, Bolivia, Indonesia, the Belgian Congo, Siam, and Nigeria. Moreover, heavy unemployment amongst Malayan tin miners had led the Malayan Government to make [unsuccessful] representations to the Soviet Government asking for a voluntary suspension of Soviet tin exports.

At a meeting in Paris on June 20, the International Tin Council had agreed to ask the Soviet Union to become a producer-member of the Council, and to approach the U.S.A., Western Germany, and Japan with a view to their joining as consumer-members. On Aug. 6, however, the Soviet Government replied that it would only be willing to join the Council as an "observer member," thus avoiding being bound by the stipulations of the International Tin Agreement.

The Soviet proposal to join the International Tin Council as an "observer member" was strongly opposed by the producer-members of the Council. On Sept. 5 Mr. Tan Sieuw Sin, Commerce Minister in the Malayan Federal Government, stressed that Malaya could not agree to Russia's "learning the Council's secrets without joining [as a full member] and abiding by the restriction regulations." He added that Malaya would oppose the Russian suggestion at the next meeting of the International Tin Council in London in October.

Prior to these developments, the International Tin Council, meeting in London on Dec. 4-6, 1957, had decided to impose a quota system for exports from the six producing countries participating in the International Tin Agreement.

The Council's decision was prompted by the heavy surplus of supply over demand in 1957 (estimated at 12,500 tons); the consequent fall in the tin price in international markets; the need to support the "spot" price of tin at £730 a ton through market purchases for the International Buffer Stock, as stipulated by the International Tin Agreement; and the consequent accumulation of tin by the Buffer Stock, which had reached the 10,000-ton mark—i.e. the point at which it was provided that export restrictions could be imposed on producers.

The Council fixed the total quantity permitted to be exported during the first control period (Dec. 15, 1957-March 14, 1958) at 27,000 long tons—a reduction of about 28½ per cent in the rate at which the six countries, taken together, had been producing in the 12 months ended Sept. 30, 1957. Individual quotas were fixed as follows (percentages of total in parentheses): Belgian Congo and Ruanda-Urundi, 2,416 long tons (8.95 per cent); Bolivia, 5,516 tons (20.43 p.c.); Malaya, 10,125 tons (37.50 p.c.); Nigeria, 1,442 tons (5.34 p.c.); Indonesia, 5,516 tons (20.43 p.c.), Siam, 1,985 tons (7.35 p.c.).

At its next meeting on Jan. 22-24, 1958, the Council decided to extend the first control period to March 31, and to impose control for a further period (March 31-June 30); the overall export quota for this period was fixed at 23,060 long tons, representing an aggregate reduction of 40 per cent on 1956-57 production. Individual quotas were as follows: Belgian Congo and Ruanda-Urundi, 2,059 tons; Bolivia, 4,699 tons; Indonesia, 4,699 tons; Malaya, 8,625 tons; Nigeria, 1,288 tons; Siam, 1,690 tons.

Meanwhile the Council had asked the producer countries subscribing to the International Tin Agreement to provide a "special fund" for the use of the Buffer Stock Manager in case the resources originally provided for him should prove insufficient to enable him to absorb all the tin offered on the market but not bought by commercial buyers at £730 a ton. The amount of the "special fund" was not made public. During the third quarter of 1958, the overall export quota was maintained at the same level, but on July 26 it was announced that for the fourth quarter it had been reduced to 20,000 tons.

The decision to limit tin imports from the U.S.S.R. led to immediate increases in the prices of "spot" and "forward delivery" tin, both of which rose in the London Metal Exchange on Sept. 1 to about £745-£746 a ton, or £15-£16 above the "support" price of £730 a ton for "spot" tin. [For many months the "spot" price had only been maintained at, or very slightly above, this level through the above-mentioned purchases by the manager of the International Buffer Stock, but the "forward" price for three-monthly delivery had fallen during the second half of November 1957 as low as £683 10s. a ton—a drop which had only been ended with the imposition of the export restrictions by the International Tin Council.] As a result of further heavy selling on the London Metal Market, however, the price of "forward delivery" tin fell on Sept. 5 to £725 15s. a ton, whilst the Buffer Stock manager again had to buy tin to maintain the "floor" price of £730 a ton for "spot" metal. The fall was attributed mainly to Russian selling of newly arrived shipments and to uncertainty about the future of the Buffer Stock scheme.

On Sept. 18 the chairman of the International Tin Council (M. Georges Péter) announced that the Buffer Stock manager had withdrawn his support of the tin "spot" price "for the time being." The statement added that "the matter will be discussed at a Council meeting," and that "the International Tin Agreement will, of course, continue in force."

After a temporary suspension of dealings on the London Metal Exchange, trading was resumed later in the day, when the price of "forward" tin fell by rapid stages to £640 a ton; "spot" tin closed at £642 10s. a ton, the lowest level for five years.

In a Press statement in London on Sept. 26 M. Péter gave no specific reason for the Buffer Stock manager's withdrawal from the tin market, saying that the withdrawal only implied that the original contributions to the buffer pool were exhausted but did not necessarily mean that the "special fund" was exhausted as well. M. Péter also gave no indication when the Buffer Stock manager might re-enter the market.

M. Péter emphasized, however, that the "special fund" was not bound by any of the price rules of the International Tin Agreement and that it could thus buy and sell at any price the manager chose. He did not reveal the original size of the "special fund" or how much of it was now left, but intimated that the Buffer Stock manager would start to operate again in the market, either as a seller, at £780 a ton or above, of the tin bought with the original Buffer Stock contributions, or as a buyer or seller under the unrestricted terms of the "special fund", without any prior announcement.

By Sept. 26 the tin price in the market had recovered from its lowest level, "spot" tin being traded at £720-£725 per ton and "forward" tin at £712. 10s.-£714.

The head of the Malayan delegation to the U.N. General Assembly, Dr. Ismail Bin Dato Abdul Rahman, speaking in New York on Sept. 26, accused the Soviet Union of "wrecking" the International Tin Agreement by "consistent dumping." Saying that the agreement was a "good manifestation" of efforts made by under-developed countries to help themselves, he added: "Yet hardly had the agreement begun to work when one great Power, the Soviet Union, began to wreck it. I suggest that the Soviet Union should alleviate the harm done to the under-developed countries affected, by calling a halt to her present destructive manoeuvres on the tin market."

In reply to representations by the Malayan Government, the German Federal Government sent a Note on Sept. 25 stating that if German tin importers made new large applications to buy Russian tin these would be considered in the light of what was happening on the tin market and due regard be paid to the interests of producing countries outside the Soviet bloc. Commenting on the German Note, the Malayan Government said that it appreciated Western Germany's "sympathetic attitude."—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Economist - Netherland News Agency)
(Prev. rep. 14988 E.)

B. UNITED KINGDOM. — Foreign Service. - Appointment of Scientific Attachés.

The Department of Scientific and Industrial Research announced on Sept. 10 that a senior principal scientific officer was being appointed to the British Embassy in Moscow as Scientific Attaché—the fifth appointment of its kind in the Foreign Service. Of the four British scientific attachés previously appointed, three are attached to the Washington, Paris, and Bonn Embassies respectively and the fourth jointly to the Stockholm, Oslo, and Copenhagen Embassies. The task of a scientific attaché—a comparatively recent addition to the diplomatic list—is to report on scientific developments in the country in which he is serving and to advise the ambassador on scientific questions. — (Times)

A. UNITED KINGDOM. — Civil Aviation. - B.O.A.C. and B.E.A. Reports for 1957-58. - B.E.A. Cheaper Fares Policy. - Record Testing Flight by Comet IV.

The reports and accounts of the British Overseas Airways and British European Airways Corporations for the financial year ended March 31, 1958, were published on July 31 and Aug. 27 respectively. They showed that while B.O.A.C. incurred a net loss, after payment of interest on capital, of £2,839,350, B.E.A. earned a net profit of £1,054,807, the largest in the Corporation's existence. The reports are summarized below :

British Overseas Airways Corporation.

Gross revenue on operating account totalled £53,526,375 (compared with £49,004,711 in 1956-57), whilst operating expenditure amounted to £53,397,253 (£46,460,789), resulting in a gross profit on operations of £129,122 (£2,543,922). Adjustments for losses on the operations of associated companies (£590,748) and for interest on capital (£2,377,724) converted the operational profit into a loss of £2,839,350, compared with a net profit of £303,352 in 1956-57.

Detailed financial and traffic statistics are shown below, with 1956-57 figures for comparison :

	1957-58		1956-57	
Traffic Revenue	£53,031,491		£48,586,918	
(*a*) Scheduled Services :				
Passenger (incl. excess baggage)		£36,141,941		£33,208,122
Mail		9,458,590		9,861,549
Diplomatic Bags		189,683		213,997
Freight		4,920,271		4,354,498
(*b*) Non-scheduled Services		2,321,006		948,752
Capacity-ton-miles	329,735,088		282,134,827	
Revenue-ton-miles	206,091,772		182,378,888	
Revenue Load Factor (per cent)	60 5		63.7	
Passengers carried	480,314		409,681	
Passenger Load Factor (per cent)	63.3		66 0	
Cargo carried (tons)	7,982		7,483	
Mail carried (tons)	4,103		4,145	
Traffic Revenue per capacity-ton-mile	38 6d.		41 3d	
Operating Costs per capacity ton-mile	38 7d.		39 6d.	
Unduplicated Route Mileage	65,918		63,418	

The report explained that although the B.O.A.C.'s gross revenue in 1957-58 was "the highest in the Corporation's history, including record dollar earnings," the trade and economic recession in North America and other unforeseeable factors had meant that traffic expansion had fallen short of expectations and had not kept pace with the capacity provided. Results had also been adversely affected by (1) makers' delays in delivering *Britannia 302's*, necessitating the retention on Atlantic routes of out-moded aircraft due for retirement ; (2) the low profit-margin in the air transport industry, which left no "cushion" to withstand adverse conditions ; (3) the delay on the part of the U.S. Civil Aeronautics Board in approving the increased fares recommended by the International Air Transport Association ; (4) competition on African routes from private operators using more modern aircraft than the B.O.A.C.'s ; (5) the heavy expenses of bringing new aircraft into service, the report saying in this connexion : "No other country in the world expects its airlines to bear the additional expenses of developing a new aircraft to make it fit for competitive service and for export."

As regards the future, the report stated that the orders placed for *Vickers VC 10's* and for *Boeing 707's* together represented expenditure of about £87,000,000, excluding spares. B.O.A.C.'s capital commitments at March 31,1957— to be financed out of obsolescence provisions and existing borrowing powers—totalled £104,000,000, "the highest rate of investment in the life of the Corporation."

The following information was given in the report :

Relations with other Airlines. After referring to the new agreement concluded with British European Airways (see below), the report stated that in 1957-58 B.O.A.C. had introduced *Britannias* on the Australian ("Kangaroo") and South African ("Springbok") routes operated jointly with Qantas Empire Airways and South African Airways respectively. The "Southern Cross" route operated by Qantas between Australia and San Francisco had been extended across North America to London, the San Francisco-London sector being operated in partnership with B.O.A.C.

Associated and Subsidiary Companies. The total revenue of associated airlines amounted to £9,916,661 and expenditure to £10,601,554, resulting in a deficit of £684,938, of which £614,828 fell to be borne by the Corporation. This result was mainly attributable to general traffic recession, but British West Indian Airways had been hit by a pilots' strike and Bahamas Airways by the general strike in the islands (see 16032 A) ; both of these had discouraged U.S.A. tourist traffic.

In September 1957 B.O.A.C. Associated Airways had been formed as a holding company with special responsibilities for the Corporation's interests in subsidiary and associated companies. From Nov. 30, 1957 the new company assumed responsibility for the Corporation's rights and assets (valued at £12,590,538) in 17 companies.

Aircraft in Service and on Order. At March 31, 1958, B.O.A.C. had 60 aircraft on service (against 56 on March 31, 1957), with 16 others on development and training and seven more scheduled for disposal. The operating fleet consisted of 16 *Stratocruisers*, 14 *Britannia 102's*, 14 *Argonauts*, 7 *DC 7's*, 6 *Constellation C.749's*, 2 *Comet IIE's*, and 1 *Britannia-312*. With regard to the future, it had been decided to employ the *Comet IV's* now on order (see 15856 A) principally on the Atlantic routes ; the two *Comet IIE's* in the fleet, fitted with Rolls Royce *Avon MK 524* engines (similar to those to be installed in the *Comet IV's*), were now being operated on these routes so that experience might be gained of these engines' performance under service conditions.

The report added that the capacity which would be provided over the North Atlantic by the *Boeing 707's* now on order (15868 A) in their first full year of operation (1959-60) would be three times as great as that provided by all B.O.A.C. aircraft on Atlantic routes in 1957-58.

Organizational Changes. Following a review of the Corporation's internal organization, it had been decided to establish three regions East, West, and South— each under a General Manager. Maintenance and flight operations would remain centralized under the Chief Engineer and Chief of Flight Operations respectively.

As the result of an inquiry into the reasons for the high level of B.O.A.C. engineering costs, compared with those of other airlines, consultations were taking place with employees' organizations with a view to a fundamental revision of the Corporation's engineering organization and methods.

British European Airways Corporation.

Gross revenue on operating account amounted to £28,340,725 (against £23,023,008 in 1956-57) and total expenditure to £26,465,070 (£23,023,008), resulting in a gross profit on operations of £1,875,655 (£924,766). The deduction of £34,074 for losses on subsidiary and associated companies, and of £23,289 for salaries of chairman and board members, and the addition of £40,595, representing profit on retirement of aircraft, etc., reduced the gross profit to £1,858,887. Interest on capital and other financial charges totalled £804,080, reducing the net profit for the year to £1,054,807, against £205,725 in 1956-57.

Detailed financial and traffic statistics are shown below, with 1956-57 figures for comparison :

	1957-58			1956-57		
Traffic Revenue						
Passenger	£23,909,689			£19,815,203		
Freight	1,758,441			1,568,514		
Mail	1,528,926			1,534,323		
Charters	155,001	£27,352,057		162,638	£23,080,678	
Load-ton-miles flown :						
International Services	76,989,251			67,239,528		
Domestic Services	25,073,096	102,062,347		22,445,895	89,685,423	
Passengers carried :						
International routes	1,531,483			1,342,777		
Domestic routes	1,234,108	2,765,591		1,118,288	2,461,065	
Passenger-miles flown :						
International Services	676,752,944			578,595,000		
Domestic Services	259,002,933	935,755,877		230,277,000	808,872,000	
Passenger load factor (per cent)		68.5			71.1	
Cargo carried (tons)		24,555			22,524	
Freight ton-miles flown		9,925,764			9,227,790	
Mail carried (tons)		7,465			7,541	
Mail ton-miles flown		3,599,500			3,622,641	

Revenue load-factor (per cent)	63.7	64.5
" Break even " load factor (per cent)	61.3	63.9
Costs per capacity-ton-mile	40.9	41.0
Total route mileage	28,904	26,169
Staff (March 31)	11,232	10,540

Other salient points in the report are summarized below.

Commercial Agreement with B.O.A.C. During 1957-58 B.E.A. concluded an agreement with B.O.A.C. defining each Corporation's sphere of influence The report explained that B O.A.C. transited certain European points on its U K.-Africa and U.K.-Far Eastern routes, and was also anxious to provide through flights from North America to European cities Although existing B.O.A.C. services through Europe were operated in pool with B.E.A., they nevertheless deprived B.E.A. of traffic within its sphere of influence. If B.O.A.C. were to increase its operations in Europe it seemed fair that B.E.A. should be free to obtain an equivalent amount of work within B.O.A C's sphere. The new agreement provided that B.O.A.C., after consulting B.E.A., should be free to apply for Governmental permission to operate through any desired point in Europe, while B.E.A. should be free to extend its services to Beirut, Tel-Aviv, and Cairo and to operate services to the Persian Gulf on behalf of its subsidiary, Cyprus Airways Ltd.

Aircraft Fleet. Fixed-wing aircraft in service at March 31, 1958 numbered 119, comprising 25 *Viscount 701's*, 22 *Viscount 802's*, 8 *Viscount 806's*, 13 *Elizabethans*, 38 *Pionairs*, 2 *Hebrides*, 3 *Islanders*, and 8 *Pionair-Leopard* freighters. The *Elizabethans* had been gradually withdrawn from service during the year, and were due for complete replacement in 1958.

The report added that the first *Viscount 806* was introduced into commercial service on Jan. 27, 1958; by the end of the summer 18 of these aircraft—with a cruising speed of 360 m.p.h.—would be in service, bringing the B.E.A. *Viscount* fleet to 64. *Viscount* services were now provided to every European and Middle Eastern country served by B.E.A., and in 1957-58 these aircraft carried nearly 1,500,000 passengers.

A detailed specification of the *De Havilland DH 121* was currently being worked out with the Aircraft Manufacturing Co. Ltd. (see 16019 A), preparatory to the placing of a definite order for 24 of these aircraft. They would be low swept-wing monoplanes; be powered by three Rolls-Royce engines mounted at the rear of the fuselage; have a speed, range, and capacity to B.E.A. requirements (see 15856 A), and be able to operate from 6,000-ft. runways.

Helicopter Experimental Unit. It had been decided to develop the charter side of the Unit's work, and this policy had shown some success. The Corporation was closely following the progress of the Fairey *Rotodyne* (first flight Nov. 6, 1957) and the Westland *Westminster* (first flight, June 15, 1958), both of which held promise of meeting B.E.A. requirements.

Lord Douglas of Kirtleside (chairman of B.E.A.), commenting on the report, explained that the year's " good results " had been achieved " in spite of a marked falling off of traffic during the winter." He said that B.E.A. was now " the second largest airline in the world in international passenger traffic," having undoubtedly benefited greatly from the success of thr *Viscount*. The new *Viscount 806's* would be followed by the *Comet IVB* jets, six of which should be in operation by the summer of 1960; these in turn would be followed by the new *Vanguard* turbo-props, of which the full fleet of 20 should be in service by 1962.

Lord Douglas added that, in order to develop air travel to the maximum possible extent, cheaper fares would ultimately have to be introduced, the " most straightforward way " of doing this being an increase in passenger accommodation in aircraft by " cutting out the frills." The aircraft of the future would therefore have to be " considered more in terms of the bus—without drinks and cigarettes handed out by the conductor." B.E.A. was not yet ready to introduce " a bus fares policy," and fares would be retained at their existing general level during 1958-59; nevertheless, a number of cheaper special fares would probably be introduced to create traffic on routes with favourable conditions, and the Corporation hoped in 1960 to start implementing the policy of reducing fares in general.

Mr. Harold Watkinson, Minister of Transport and Civil Aviation, stated in a Parliamentary written reply on Aug. 1 that the Government had given approval to B.E.A. to conclude a contract with the Aircraft Manufacturing Co. Ltd. (see 16019 A) for 24 *DH-121* jet airliners, to cost about £29,000,000 and be delivered between 1964 and 1966.

B.E.A. "Cheaper Fares" Policy.

B.E.A. announced on Sept. 9 that, as a first step in the cheaper fares policy announced by Lord Douglas, substantial reductions in winter week-end tourist fares would be introduced on the Corporation's main domestic trunk routes—London-Edinburgh, London-Glasgow, London-Belfast, and London-Manchester.

From Nov. 1 the eight-day week-end excursion fare between London and Scotland and Northern Ireland would be £8, and that between London and Manchester £5. These fares—representing reductions of 40.74 per cent and 41.79 per cent respectively on the normal 12-monthly return fares between London and Scotland or Northern Ireland (£13 10s.) and between London and Manchester (£9 9s.)—were the cheapest ever charged by B.E.A. on these routes. They would be available for journeys in either direction on Saturdays and Sundays, with return on the same week-end or the next.

Record Testing Flight by Comet IV. - Hongkong-London in 16 Hours.

A de Havilland *Comet IV* jet airliner, piloted by Group-Capt. John Cunningham (the makers' chief test pilot), flew on Sept. 13 from Hongkong to Hatfield (Herts.), a distance of 7,925 miles, in a flying time of 16 hr. 16 min., equivalent to an average speed of 487 m.p.h.

The *Comet* took off from Hongkong at sunrise and landed at Hatfield two hours before sunset; the whole flight—with stops totalling 2 hr. 6 min. at Bombay and Cairo—was accomplished in daylight. The aircraft carried about 30 passengers, including Mr. Basil Smallpeice, managing director of B.O.A.C., and two senior B.O.A.C pilots, who took over the controls for periods. Mr. Smallpeice described the flight as " the most remarkable long distance flight by a civil airliner and by far the fastest ever made." He added that in service a " reasonable schedule " for the *Comet IV* from Hongkong to London would be about 22 hours total time, compared with the present scheduled time for *Britannias* (including stops) of 33 hours 30 min.

The *Comet IV* had previously flown out from Hatfield to Hongkong *via* Cairo, Bombay, and Bangkok—a distance of 7,985 miles—in 17 hrs. 22 min., an average speed of 461 m.p.h. (B.O.A.C. and B.E.A. Annual Reports - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 16019 A; 15856 A.)**

A. CEYLON. — Tamil Language Bill passed by Senate. - Ban on Political Meetings lifted. - Partial Revocation of Emergency Regulations.

The Tamil Language (Special Provisions) Bill was debated by the Senate on Sept. 2-3 and passed through all its stages on the latter date.

Senator M. W. H. de Silva, the Minister of Justice and Leader of the Senate, who moved the second reading of the Bill on Sept. 2, said that its true intention was to bring the Sinhalese and Tamil communities together as far as possible. As it was inconvenient to have more than one official language the Government had adopted the language of the majority, but " that does not mean any disgrace to the other languages or any contempt for them," and the Government had recognized that the Tamil people could use the Tamil language. In the circumstances he appealed for the co-operation of the Tamils for the sake of the country's economic progress.

While the 58 Federal Party leaders, who had been under house detention since the declaration of the state of emergency, were released on Sept. 4, together with Mr. K. M. P. Rajaratne of the *Jathika Vimukhthi Peramuna* (see page 16375), the ban on public meetings by political parties was generally lifted on the following day, except for meetings of the Federal Party and the *Jathika Vimukhthi Peramuna*, both of which had been declared illegal.

Although the state of emergency was again extended for a further unspecified period as from Sept. 27, ten emergency regulations issued under the Public Security Ordinance were revoked on Sept. 26. They included the regulations (*a*) controlling publications and the Press, and (*b*) empowering the Government to carry out searches and seizures without warrant, to maintain essential services, to deal with any obstruction of essential services, to requisition personal services, to requisition transport, to prevent the entry of unauthorized persons into places occupied or used for the maintenance of essential services, and to requisition property. The Government, however, retained powers, *inter alia*, to ban political parties, processions, and demonstrations.

B. SPAIN - LIBYA. — Admission to World Bank and International Monetary Fund.

Spain became a member of the International Bank and the International Monetary Fund on Sept. 15, and Libya on Sept. 18. Their quotas in the I.M.F. were fixed at $100,000,000 for Spain and $5,000,000 for Libya, whilst their subscriptions to the capital stock of the Bank were respectively 1,000 shares with a par value of $100,000,000 and 50 shares with a par value of $5,000,000. These admissions brought the total of members' quotas in the Fund to $9,193,000,000 and the total subscribed capital of the Bank to $9,510,400,000. The total membership of both institutions rose to 68, having previously decreased by one owing to the merger of Egypt and Syria into the United Arab Republic.—(International Bank - I.M.F., Washington) **(Prev. rep. 16150 E; Spain, OEEC Membership, 16364 C)**

A. ALGERIA. — Rebel Government-in-Exile formed in Cairo. - Recognition by Arab Countries, Pakistan, and Chinese People's Republic.

The formation of a "Free Algerian" government in Cairo was announced in that city on Sept. 19 by M. Ferhat Abbas, the Algerian rebel leader. Headed by M. Abbas as Prime Minister and drawn entirely from the National Liberation Front (F.L.N.), it was described as the "Provisional Government of the Republic of Algeria" and consisted of the following 19 Ministers and State Secretaries:

Ferhat Abbas	Prime Minister.
Krim Belkacem	Vice-Premier and Minister for the Armed Forces.
Ahmed Ben Bella	Vice-Premier.
Hocine Aït Ahmed	Ministers of State.
Mohammed Boudiaf	Ministers of State.
Mohammed Khider	Ministers of State.
Bitat Rabah	Ministers of State.
Dr. Mohammed Lamine Debaghine	Foreign Affairs.
Mahmoud Cherif	Armaments and Food Supplies.
Lakhdar Ben Tobal	Interior.
Abdel Hafid Boussouf	Liaison and Communications.
Abdelhamid Mehri	North African Affairs.
Dr. Ahmed Francis	Economic Affairs and Finance.
Mohammed Yazid	Information.
Youssef Ben Khedda	Social Affairs.
Ahmed Fewfik el-Madani	Cultural Affairs.
Lamine Khan	State Secretaries.
Mustapha Stambouli	State Secretaries.
Omar Oussedik	State Secretaries.

M. Ahmed Ben Bella and three of the Ministers of State are imprisoned in the Santé prison in Paris; the fourth Minister of State is serving a prison sentence in Algiers. All three Secretaries of State are leading rebel units in Algeria.

M. Ferhat Abbas (58), formerly a chemist at Sétif, is leader of the F.L.N. and is regarded as more moderate and less strongly anti-French than many of his colleagues. Before the war he advocated complete Algerian "assimilation" with France, but during the war years became a convert to the idea of Algerian independence. In 1946 he founded the *Union démocratique du Manifeste Algérien* (UDMA) and was subsequently a member of the French Constituent Assembly and the Algerian Assembly. At the outbreak of the Algerian rebellion (Nov. 1, 1954) he at first tried to prevent it from spreading, appealed for calm, and urged the French to put forward a comprehensive programme of reforms; during 1955 he was one of the group of Moslem deputies in Algiers—known as "the 61"—who attempted to bring pressure on the French from a moderate nationalist standpoint without openly siding with the rebels. In 1956, however, he decided to join the F.L.N., went to Cairo, and dissolved the U.D.M.A. He is married to a Frenchwoman.

Among the other Ministers (all of whom have played leading parts in the rebellion), **Krim Belkacem** has been actively engaged in separatist activities for many years and commanded rebel units in the Kabylie; **Dr. Debaghine** (a physician) has been in Cairo since 1955 and was formerly a deputy for Constantine, representing the M.T.L.D.; **Dr. Ahmed Francis** (also a doctor of medicine) is a close associate of M. Ferhat Abbas, whom he accompanied to Cairo in 1956; and **M. Mohammed Yazid** has been a "roving ambassador" for the F.L.N., whom he at present represents in New York as "permanent delegate" to the United Nations. A biography of **M. Ben Bella** is given on page 15330, first column.

In Paris, a spokesman of the Quai d'Orsay stated that recognition of the rebel "government" would be regarded by the French Government as an "unfriendly act." He stressed the following points: (1) there was no precedent for such a "government" in peace-time, nor was it in any sense the "depository of any Algerian sovereignty whatever"; (2) the rebel "government" had no authority in Algeria and its only methods were those of assassination and terrorism; (3) France, while taking into account the "demagogic reasons" which might prompt any recognition of this "artificial organization," would consider any such recognition as an "unfriendly act." Moreover, France would have cause to doubt the "normality" and "stability" of any Government which extended recognition to the Algerian rebels.

Despite the French Government's warning, the "Provisional Government of the Algerian Republic" was recognized within three days by the United Arab Republic, Iraq, Jordan, Yemen, Libya, the Sudan, Tunisia, Morocco, Pakistan, and the Chinese People's Republic; the U.A.R. extended diplomatic recognition within a few minutes of M. Abbas's proclamation.

In spite of their recognition of the "Free Algerian" government, statements both in Tunis and Rabat showed that the Tunisian and Moroccan Governments were anxious to avoid any decisive break with France. In Tunis, the State Secretariat of Information issued a declaration on Sept. 20 expressing the hope that the Tunisian Government's decision would "initiate an era of peace and reconciliation between the United Arab Maghreb and France," and saying that it did in no way imply "that Tunisia wishes to terminate her traditional policy based on mutual respect and free co-operation between the united Maghreb and France." In Rabat, M. Balafrej (the Premier and Foreign Minister) said in a press interview that "nothing has changed in Franco-Moroccan relations."

It was announced in Paris on Sept. 22 that French protests at the Moroccan, Tunisian and Libyan recognitions had been presented in Rabat, Tunis, and Tripoli.

The Minister of Information in the "Free Algerian" government (M. Yazid) declared on Sept. 19 that his government considered itself to be "in a state of war with France." In a letter to the U.N. Secretary-General published on Sept. 20 the "Free Algerian" government protested against the holding of the forthcoming referendum in Algeria, which it denounced as "an international political mystification." (Le Monde, Paris - Times)

(Prev. rep. 16227 C; Algerian Rebellion, 16183 A.)

B. VENEZUELA. — Failure of Attempted Military Coup. - Pro-Government General Strikes.

An unsuccessful attempt was made on Sept. 7 to overthrow the Provisional Government of Rear-Admiral Wolfgang Larrazabal, who was visiting eastern Venezuela at the time of the attempted *coup d'état*. The uprising was suppressed within a few hours, some 20 people being killed in Caracas and about 120 injured.

The revolt was directed by a group of military officers led by Lieut.-Colonel Juan Moncada and Lieut.-Colonel José Mendoza; both had been expelled from Venezuela after involvement in an anti-Government movement in July (see below) but had returned clandestinely during August. With the support of some units of the military police, the rebels and their supporters surrounded the Presidential palace, demanded the surrender of the Government, and seized temporary control of a Caracas radio station. The great majority of the armed forces remained loyal, however, and the uprising collapsed within a few hours. Most of the casualties occurred when large crowds of civilians, demonstrating in favour of the Government, attacked the military police barracks under the impression that the revolt was being directed from there; firing broke out when demonstrators attempted to storm the barracks, resulting in a number of casualties in killed and wounded.

A general strike in support of the Government was observed throughout Caracas on Sept. 8; called by the trade unions and supported by all sections of the business community, its proclaimed purpose was to bring about "energetic measures" against the leaders of the revolt and to ensure that no further attempts were made to overthrow the Government. In response to demands by the central committee representing all Venezuelan trade unions, the Government promised to try the conspirators by special military courts; to punish those who were proved guilty with 14 to 18 years' imprisonment; to deny safe-conducts to rebel officers who had taken refuge in foreign embassies; and to eliminate from Government agencies all persons who had had any connexion with the former dictatorial regime of President Pérez Jiménez. The Government also announced that it was considering a Bill to punish military conspirators with 30 years' imprisonment and loss of military rank.

The Minister of Defence (General Lopez Henriquez) announced on the same evening that seven of the rebel leaders had been arrested, including Colonel Mendoza; four had taken refuge in the Mexican and Cuban Embassies, including Colonel Moncada; and one had escaped. The Foreign Ministry stated that it would ask for extradition of the rebels in foreign embassies on the ground that they were "common criminals."

A short-lived crisis had previously occurred on July 22, when the then Minister of Defence (General Castro León) and a number of military officers put forward demands which included a censorship of the Press (on the ground that newspapers had allegedly insulted the Army) and the postponement of elections for three years. After failing to get any significant support from the armed forces, and none whatever from the Navy, General Castro León tendered his resignation to Rear-Admiral Larrazabal on the same day and was replaced as Defence Minister by General José Lopez Henriquez. A seven-hour general strike in support of the Government was called in Caracas on July 23 and was observed by all workers, shopkeepers, businessmen and industrialists. All the political parties issued statements expressing full support for the Provisional Government.—(New York Times - Venezuelan Embassy Information Service, Washington)

(Prev. rep. 16026 A.)

C. CANADA. — Army. - New Chief of General Staff.

Lieut.-General Howard D. Graham retired on Aug. 31 as Chief of the General Staff of the Canadian Army, being succeeded by Lieut.-General S. Findlay Clark, previously G.O.C., Central Command.—(Department of External Affairs, Ottawa)

(Prev. rep. 14424 D.)

SEPTEMBER 27—OCTOBER 4, 1958

A. UNITED NATIONS. — Conference on the Law of the Sea. - Adoption of Four Conventions. - Dispute over Limit of Territorial Waters. - Preliminary Meeting of Land-locked States.

A United Nations Conference on the Law of the Sea, attended by delegates from 87 countries (later reduced to 86 by the merger of Egypt and Syria into the United Arab Republic), as well as by observers from several specialized agencies and nine non-governmental organizations, took place at Geneva from Feb. 24-April 28.

The Conference, charged with drawing up a comprehensive international agreement on maritime law, examined 73 draft articles prepared by the U.N. International Law Commission, and adopted four conventions, nine resolutions, and an optional protocol. The conventions dealt respectively with (1) the territorial sea and the contiguous zone ; (2) the high seas ; (3) fishing and conservation of living resources on the high seas ; (4) the continental shelf. The protocol was opened for signature by all countries which agreed to recognize the compulsory jurisdiction of the International Court of Justice in disputes arising out of the conventions—except those concerning measures for the conservation of resources on the high seas, for which a separate arbitration procedure was envisaged.

The Conference, however, failed to arrive at an agreed decision on the width of the territorial sea, as none of the proposals submitted to it—for the retention of the traditional three-mile limit or for its replacement by a limit of four, six, or 12 miles—secured the necessary two-thirds majority. [A previous conference on the law of the sea, held at The Hague in 1930, had also failed to agree on the width of the territorial sea].

The following countries were represented : Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Britain, Bulgaria, Burma, Byelorussia, Cambodia, Canada, Ceylon, Chile, China (Nationalist), Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, German Federal Republic, Ghana, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iraq, Irish Republic, Israel, Italy, Japan, Jordan, Korea (South), Laos, Lebanon, Liberia, Libya, Luxemburg, Malaya, Mexico, Monaco, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Persia, Peru, Philippines, Poland, Portugal, Rumania, San Marino, Saudi Arabia, Siam, South Africa, the Soviet Union, Spain, Sweden, Switzerland, Tunisia, Turkey, Ukraine, the United Arab Republic, Uruguay, the United States, the Vatican, Venezuela, Vietnam (South), Yemen, and Yugoslavia.

The calling of the Conference implemented a 23-nation resolution adopted by the 11th session of the U.N. General Assembly on Dec. 20, 1956 (see page 15510). The resolution, which followed a long debate on a report submitted by the U.N. International Law Commission after a seven years' study of the law of the sea, had recommended that the proposed conference should take account of the technological, biological, economic, and political aspects of the question as well as the legal aspect.

Prior to the opening of the U.N. Conference, informal discussions had taken place in Geneva from Feb. 10-15 on the maritime and communication rights of land-locked countries. The meeting was convened by the Swiss Government and was presided over by Dr. Paul Ruegger, the eminent jurist and former President of the International Committee of the Red Cross.

The following 13 non-coastal countries were represented : Afghanistan, Austria, Byelorussia, Bolivia, Czechoslovakia, Hungary, Laos, Luxemburg, Nepal, Paraguay, San Marino, Switzerland, and the Vatican.

During the discussions the Czechoslovak and Bolivian delegates advocated the adoption of a "Charter" defining the maritime rights and duties of land-locked countries, based on a draft prepared by the Czechoslovak delegation. This point of view was favoured by Byelorussia, Hungary, Nepal, Afghanistan and Bolivia. The Nepalese delegate pointed out in this connexion that although the right of land-locked countries to have unrestricted access to the sea had in practice always been granted, it should be laid down in the form of international law. The Swiss and Austrian representatives, on the other hand, opposed codification on the grounds (*a*) that an international convention of this kind might only prejudice rights already enjoyed by land-locked countries ; (*b*) that the draft prepared by the U.N. International Law Commission covering this matter was completely satisfactory to Switzerland ; and (*c*) that the parties to the discussions had no authority to draw up such a convention, but were restricted to an exchange of views for submission to the U.N. Conference.

A working party, consisting of the Austrian, Bolivian, Czechoslovak, Nepalese, and Swiss representatives was appointed to consider the question, and eventually a memorandum was drawn up for submission to the U.N. Conference, "re-stating the principles governing the relations between land-locked and coastal States." This memorandum, based largely on the Swiss and Austrian point of view, declared (1) that the right of land-locked States to have free access to the sea "derives from the basic principle of the freedom of the high seas" ; (2) asserted the right of ships owned by nationals of land-locked countries to fly their national flag and make use of all commercial ports ; (3) claimed that all land-locked countries possessed a right of transit through other countries to the coast, subject to the latter countries' right to protect their legitimate interests ; (4) provided for the reservation of rights already established under treaties, conventions, or international law.

At its opening session on Feb. 24 the U.N. Conference elected as its President Prince Wan Waithayakon, the Siamese Foreign Minister and former President of the 11th session of the U.N. General Assembly.

Earlier, the Soviet delegation had protested against the exclusion from the Conference of the People's Republics of China, East Germany, North Korea, North Vietnam, and Outer Mongolia. This protest was supported by Burma, Ceylon, Czechoslovakia, Egypt, India, Nepal, Yemen, and Yugoslavia, but after lengthy debate the Conference adopted the view (put forward by the U.S. delegation) that it was not competent to over-ride the decision of the U.N. General Assembly when convening it.

On Feb. 25 the Conference divided its work among five committees, as follows :

First Committee—the territorial sea and the contiguous sea (chairman Professor K. H. Bailey, Australia)

Second Committee—the general regime of the high seas (chairman Mr. O. C. Gundersen, Norway).

Third Committee—fishing and the conservation of living resources on the high seas (chairman Señor Carlos Sucre, Panama).

Fourth Committee—the continental shelf (chairman Mr. A. B. Perreira, Ceylon).

Fifth Committee—the right of land-locked countries to free access to the sea (chairman M. J. Zourek, Czechoslovakia).

The main proceedings of the Conference and the instruments adopted are summarized below under cross-headings.

Dispute on the Breadth of the Territorial Sea and the Zone of Exclusive Fishing Rights.

The main part of the deliberations of the Conference was devoted to the question of the breadth of the territorial sea and the width of a contiguous zone of exclusive fishing rights. As mentioned above no agreement was reached on either of these matters and the Convention on the Territorial Sea and the Contiguous Zone was adopted without stating the maximum allowed limits.

The International Law Commission, in its draft articles, had left open the question of the width of the territorial sea, but had stressed that "international law does not permit any extension . . . beyond 12 miles from the base lines." Some countries claimed that this meant that the Commission approved extensions up to 12 miles, but this view was strongly opposed by the traditional maritime countries which advocated the retention of the traditional three-mile limit for territorial waters.

The various breadths for the territorial sea proposed in the first stage of the discussions (and in some cases already adopted unilaterally by the countries concerned) are given below. Some representative countries supporting each limit at the outset of the Conference are also given, but in several cases, as explained below, these countries subsequently gave their support to compromise proposals put forward in the course of the discussions.

Three Miles. Britain and most British Commonwealth countries, France, Greece, Japan, Netherlands, the U.S.A.

Four Miles. Denmark, Norway, Sweden.

Six Miles. Greece, India, Italy, Siam.

Twelve Miles. Ghana, Guatemala, Indonesia, Mexico, Saudi Arabia, Venezuela, and the Soviet Union.

During the earlier discussions, the leader of the Greek delegation explained that although Greece had adopted a six-mile limit for her territorial sea, she would be prepared to adopt the traditional three-mile limit if this would facilitate general agreement.

The leaders of the Swedish and Italian delegations stated similarly that although their countries preferred a four-mile and a six-mile limit respectively, they would be willing to agree to any other reasonable limit which was supported by a large majority of countries.

The leader of the Soviet delegation (Professor G. I. Tunkin), on the other hand, said that Russia considered that each State should be free to fix its own width for its territorial waters up to a maximum of 12 miles, after taking account of local conditions and the need to safeguard its "legitimate national interests." This view was also taken by the Indian delegate (Mr. A. K. Sen, the Law Minister), who pointed out that India herself had already adopted a six-mile limit. The leader of the Peruvian delegation recalled that at the

Santiago Conference of 1954 (see 13908 A) the South American Pacific States had proclaimed sovereignty over 200 miles of sea, in order to conserve their natural resources; he argued that each country should be allowed to fix its own "reasonable" limit, preferably by regional agreement.

A summary of the arguments put forward on behalf of other representative countries is given below.

United Kingdom. Sir Reginald Manningham-Buller, Attorney-General, stressed that the principle of the freedom of the seas had "thrown open the seas for the common use of mankind and promoted freedom of communications and intercourse between nations." The effect of any large extension of territorial seas, on the other hand, would be to "carve up the sea into enclaves or enclosures dominated by particular Powers or groups, and so "put back the clock three or four centuries to the days of the *mare clausum*." The three-mile rule was "the only traditional rule observed by a very great many States over a very long time" and also "the only rule which has obtained any general measure of agreement." The various proposals put forward from time to time. and the unilateral proclamations by certain States of extensions of their territorial seas, had no standing in international law. He added: "If the doctrine that it is open to each country to proclaim whatever breadth [of the territorial sea] suits its particular circumstances is pushed to its logical conclusion, it will make complete nonsense of the principle of the freedom of the seas."

Sir Reginald also argued that the fact that international law stipulated no right of "innocent passage" for aircraft over territorial waters (corresponding to the right of ships) was "very largely based on the view that the territorial seas consist of a relatively narrow belt of water." The absence of a right to fly along the air space above them was not regarded as "seriously likely to hinder air navigation," but if their width was extended the absence of such a right might become "of serious concern" in the development of air communications.

Sir Reginald concluded by saying that although Britain had so far not accepted the principle of the "contiguous zone" in which coastal States would have fisheries conservation and other rights up to, say, 12 miles from the coast, she would probably be prepared to do so as part of a generally accepted agreement. He emphasized, however, that she regarded the right of "innocent passage" through territorial waters by ships of any country as "of the essence of the doctrine of the freedom of the seas," which would be "little more than a mockery" without it.

United States. Mr. Arthur H. Dean pointed out that if the 12-mile limit was generally adopted the area of the high seas would be reduced by over 2,500,000 square miles—"an area roughly equivalent to the size of the United States." Since coastal States almost invariably refused other countries the right to fish in their territorial waters, the rest of the world would be denied "a great and inexpensive source of food." Moreover, a 12-mile limit—unless accompanied by an absolute guarantee of the right of "innocent passage" for foreign ships—would greatly increase navigational risks, since only about 20 per cent of lighthouses had a range of 12 miles or more and radar was "generally only of marginal utility" at this distance. Finally, there was the danger that in wartime belligerent submarines would use the "particularly attractive havens" provided by the extended territorial waters of neutrals to lie in wait for enemy shipping. Mr. Deane urged the Conference to "make an unequivocal declaration that the breadth of a State's territorial waters should not exceed three miles."

Japan. Mr. Akora Oha emphasized that it was a basic principle of international law that the width of the territorial sea should be determined by international law itself. The claims made by certain States that each country must be free to determine the width of her own territorial waters, and those made by others that large bays or gulfs (the so-called "historic bays") were internal waters, were not reconcilable with international law and "ran counter to the progress of the community of nations as a whole." The three-mile rule had been sanctioned in practice by a great majority of States and had been embodied in many international treaties; on the other hand, most countries had never endorsed the various claims put forward for extensions to four, six, or 12 miles, and were, in fact, strongly opposed to them. It must therefore be concluded that "the three-mile limit for the width of the territorial sea is the only established rule of international law."

Netherlands. Professor J. W. H. Verzijll pointed out that the traditional foundations of maritime law had contributed greatly to the growth of international trade, and said that no infringement of the freedom of the seas should be permitted unless based on "considerations of at least equal value." The Netherlands recognized only two such considerations, viz. (i) the necessity to protect certain well-defined vital interests of a coastal State; and (ii) safeguards against over-fishing. The rule of the three-mile limit had never lost its validity, and no country could be compelled to recognize a wider zone, "with the possible exception only of well-motivated cases and traditional rights." Thus the fact that several countries had extended their maritime sovereignty by unilateral declarations had not created any obligation on other countries to recognize these extensions. The Netherlands was therefore convinced that the existing three-mile rule should stand, because "all specific interests which might justify an extension could be served by a grant of special rights in a zone of waters along the coast."

The Soviet Union. Professor G. I. Tunkin denied that the three-mile limit was the sole rule accepted in international law. Of the 63 States about whose position the Soviet delegation had information, some 40 applied a limit of more than three miles, and it would be "wrong and unrealistic" to expect these countries to give up what they had established for themselves to safeguard national interests. Moreover, the 1930 Conference on the Law of the Sea had not accepted the three-mile limit as internationally binding, and Russia herself had applied a 12-mile limit for over 50 years.

Indonesia. Mr. Subardjo maintained that the interests of Indonesia required a 12-mile limit, measured from the coasts of the outer islands of the Indonesian Archipelago. Within these limits, however, freedom of navigation would be guaranteed to all ships "as long and in so far as it is not contrary to the security of Indonesia or harmful to her interests."

Saudi Arabia. Mr. Ahmad Shukairi claimed that the principle behind the concept of the "territorial sea" was the need to provide for the basic defence of the coastal State, and that, in view of the development of long-range weapons, the three-mile limit was now "outmoded" and had ceased to be the general practice. Saudi Arabia herself had recently adopted a 12-mile limit.

The following proposals were put forward by various delegations:

(1) A Canadian proposal (March 31) that the three-mile limit should be retained for the territorial sea but that countries should be allowed to reserve exclusive fishing rights for their own nationals in a "contiguous zone" extending 12 miles from the coastal baseline (i.e. they should have the right to preserve their fisheries up to 12 miles from the shore).

Mr. George Drew (Canadian High Commissioner in London), who put forward the proposal, explained that, in order to protect her inshore (i.e. seine-net and line) fisheries, Canada had since 1911 imposed a ban on trawl fishing by her own trawlers inside a line 12 miles from the shore; it was therefore "completely natural" that she should now "seek an international law, which will impose the same restrictions upon trawlers from other countries fishing in the waters off our coasts." He added: "It does seem reasonable that a country should have some prior claim upon the stocks of fish heavily concentrated in an area where the local population is dependent on them for their livelihood." Canada considered that the question of fishing rights "is not in any way bound to the question of the width of the territorial sea itself," and that any general extension of the territorial boundary could have "very serious consequences for the freedom of sea and air navigation."

(2) A Soviet proposal (April 2) that each State should "as a rule" determine the breadth of its territorial sea in accordance with established practice within limits of from three to 12 miles, "having regard to historical and geographical conditions, economic interests, and internal navigation." This wording of the Soviet resolution was interpreted by some delegations as intended to allow in certain cases an extension of the territorial sea beyond 12 miles.

(3) A British proposal (April 2) to extend the limit of the territorial sea to six miles, but stipulating that the existing rights of passage for aircraft and ships—including warships—outside the present three-mile limit should not be affected.

Sir Reginald Manningham-Buller, in submitting the proposal, stressed that Britain still considered that "under international law the maximum breadth of the territorial sea is limited to three miles, except where historical considerations apply—as in the case of the Scandinavian limit of four miles." However, she viewed with "growing concern" the "encroachments which for some time have been taking place on the principle of the freedom of the seas," and took the view that "this should not continue but be brought to an end by agreement." She had therefore "reluctantly" decided to submit the new proposal as a compromise in the hope that it would be acceptable and lead to agreement. Under the proposal, States could claim up to six miles of territorial sea, and within that limit enjoy exclusive fishing rights. The preservation of passage rights for aircraft and ships outside the three-mile limit was an essential part of the British proposal, and if this was not accepted the proposal would fall to the ground.

Sir Reginald added that Britain could not support the Canadian proposal to reserve to the coastal State fishing rights within a 12-mile limit. A large part of the foodstuffs she consumed had to be imported and paid for out of foreign currency earnings. Commodities such as fish which could be caught and made available in British markets without any foreign currency payments, and without having to be set off against corresponding exports, therefore played a very important part in balancing the economy. British fishing operations, largely carried out in distant waters, would be "disastrously affected" by a 12-mile limit of exclusive fishing.

(4) A joint Mexican-Indian proposal (April 9) to allow each State to fix the breadth of its own territorial sea up to a limit of 12 miles.

Mr. Sen, in submitting the proposal, stressed that both the Canadian and the British proposals would leave coastal waters outside the three- and six-mile limits "open and unrestricted" for the operations of military aircraft and warships.

(5) A Swedish proposal to extend the width of the territorial sea universally to six miles.

(6) A U.S. "compromise" proposal (April 15) to extend the territorial limit to six miles, with a further contiguous zone of six miles (making 12 miles in all) in which coastal States would be

allowed to exclude fishermen of other countries, with the exception of "countries whose nationals have fished in that zone for a period of 10 years immediately preceding the signature of a convention to be agreed."

Mr. Dean, in submitting the proposal, described it as a "realistic compromise" and as offering a "just and honourable solution." Recalling that the United States had adhered consistently to the three-mile limit since 1793, he said that the new proposal represented "a very real and substantial sacrifice of American interests," and had been put forward after "the most careful and painstaking thought at the highest levels." In offering to depart from the three-mile limit, the U.S.A. had taken a "historic step" in order to meet the desires of the new States in Asia and elsewhere, and in the hope that the Conference might, after all, reach agreement.

(7) A new proposal, put forward jointly by the Canadian, Indian, and Mexican delegations (April 16). Under this (*a*) States in general would be entitled to fix the breadth of their territorial seas at up to six miles, (*b*) any State which before Feb 24, 1958 (the date when the Conference opened) had declared the width of its territorial sea to be over six miles might claim up to 12 miles; (*c*) States whose width of territorial sea under the proposal would be under 12 miles might claim a fishing zone (contiguous to the territorial sea) extending to 12 miles from the shore, and in which they would enjoy "the same rights in respect of fishing and exploration of the sea as in the territorial zone itself."

Mr. Drew, in submitting the proposal, explained that Canada was unable to support the new U.S. proposal because she could not agree to granting a "perpetual reservation of other countries' fishing rights" in the contiguous zone. Mr. Sen explained that it was intended to safeguard the position of such countries as Mexico, which had had a nine-mile limit for 110 years, and the U.S.S.R., which had had a 12-mile limit for over 50 years.

On April 18, however, it was announced that the joint Canadian-Indian-Mexican proposal had been dropped, and that Canada had returned to her own plan—see (1) above—but with the important difference that she now proposed a six-mile breadth for the territorial sea plus a contiguous zone, also of six miles, in which the coastal State would have exclusive fishing rights. In consequence of the Canadian decision, India and Mexico also revived their original proposal—see (4) above.

The U.S. delegation then announced readjustments in its proposal as follows:

(*a*) to reduce from 10 years to five the period during which nationals of other countries must have fished within the contiguous zone in order to preserve their right to fish there;

(*b*) to leave a coastal State free to fix the breadth of its territorial sea at three or six miles, plus a contiguous fishing zone of sufficient breadth to bring the total of territorial sea and contiguous zone up to 12 miles.

After Sir Reginald Manningham-Buller had stated that Britain would not press her own proposal, but would "reluctantly" support the revised U.S. proposal provided the right of passage for ships and aircraft within the three-mile limit was maintained, the various proposals were put to the vote, with the following results:

U.S. Proposal. Defeated by 38 votes to 36, with nine abstentions.
Soviet Proposal. Rejected by 44 votes to 29, also with nine abstentions.

Indian-Mexican Proposal. A tie vote of 35 to 35 (with 12 abstentions) which, according to the rules of the Committee, was considered a rejection.

Swedish Proposal. Rejected by 49 votes to 16.

Canadian Proposal. That part of the plan calling for a six-mile territorial limit was rejected by 48 votes to 11, but a proposal to grant coastal States exclusive fishing rights within a 12-mile belt was adopted by 37 votes to 35, with nine abstentions.

When the Committee rose on April 20, therefore, all the proposals had been rejected except the fishing rights provision of the Canadian proposal.

Only three of the above proposals were submitted to the vote in plenary session of the Conference on April 25, but none obtained the necessary two-thirds majority, the figures being as follows:

Canadian Proposal (only the part referring to exclusive fishing rights)—for 35; against 30; abstentions 20.

U.S. Proposal for 45; against 33; abstentions 7.

This proposal, which obtained the largest majority, though under two-thirds, was supported, *inter alios* by Australia, Britain, Ceylon, Ghana, India, Malaya, New Zealand, and South Africa, but was opposed by Canada.

Soviet Proposal—for 21; against 47; abstentions 17.

A last-minute proposal, sponsored by Burma, Colombia, Indonesia, Mexico, Morocco, Saudi Arabia, the United Arab Republic, and Venezuela, was then put to the vote but was rejected. It was proposed (i) that each coastal State should be entitled to fix the breadth of its territorial sea up to 12 miles; (ii) that States which elected to fix their territorial limits at less than 12 miles should have exclusive fishing rights up to 12 miles from the shore. The voting figures were—for 39; against 38; abstentions 8.

Although no agreement was reached on the maximum allowed width of the territorial sea and the maximum limits of exclusive fishing rights, the conference—as stated above—finally adopted four conventions by the following votes:

Convention on the Territorial Sea and the Contiguous Zone (without stating the maximum allowed width of the territorial sea or the maximum limits of exclusive fishing rights)—61 votes to nil, with two abstentions.

Convention on the High Seas—65 votes to nil, with one abstention.

Convention on Fishing and Conservation of the Living Resources of the High Sea—45 votes to one, with 18 abstentions.

Convention on the Continental Shelf—57 votes to three, with eight abstentions.

The Conference also adopted an optional Protocol on compulsory settlement of disputes by 52 votes to nil, with 13 abstentions, and nine Resolutions.

On April 28 the Conference adopted a resolution sponsored by Australia, Ceylon, Cuba, and Ghana (i) recording that it had adopted conventions and other instruments on all matters referred to it, with the exception of "the breadth of the territorial sea and the extent of the fishing rights which should pertain to coastal States in the contiguous zone"; (ii) recommending the reconvening of the Conference to decide on these questions immediately after the ending of the forthcoming 13th session of the U.N. General Assembly, (iii) calling upon all States to refrain meanwhile from enlarging their territorial waters or making any claim to alter the *status quo* with regard to fishing until the General Assembly had considered the matter.

The Conventions, the Protocol, and the other Resolutions are summarized below.

Convention on the Territorial Sea and the Contiguous Zone.

Definition of Territorial Sea. Articles 1 and 2 laid down that the sovereignty of a State extended, beyond its land territory and internal waters, to a belt of sea adjacent to its coast ("territorial sea"), as well as to the air space over the territorial sea and to its bed and subsoil. Sovereignty would be exercised subject to the present Convention and "to other rules of international law." Except where otherwise provided, the normal base-line for measuring the breadth of the territorial sea was "the low-water line along the coast" (Art. 3).

With deeply indented coast lines, or where there was a fringe of islands along the coast in its immediate vicinity, the method of straight baselines joining appropriate points might be employed, provided the drawing of such baselines did "not depart to any appreciable extent from the general direction of the coast," and the sea areas lying within them were "sufficiently closely linked to the land to be subject to the regime of internal waters." On the other hand, in determining particular straight baselines account might be taken of "economic interests peculiar to the region concerned, the reality and the importance of which are clearly evidenced by long usage." The system of straight baselines must not be applied in such a manner as to cut off from the high seas the territorial sea of another State (Art. 4).

Waters on the landward side of the baseline would form part of the internal waters of the State, but where a straight baseline was used with the effect of enclosing as internal waters areas, which previously had been considered as part of the territorial sea or of the high seas, the right of "innocent passage" would not be affected (Art. 5). The outer limit of the territorial sea was "the line, every point of which is at a distance from the nearest point of the baseline equal to the breadth of the territorial sea" (Art. 6).

Art. 7 regulated the position in bays, the coast of which belonged to a single State, granting the status of internal waters to bays not more than 24 miles wide at the mouth, to larger bays for a sector within a 24-mile baseline, and in certain other cases, e.g. "historic bays." Arts. 8 and 9 included in the territorial sea the "outermost permanent harbour works which form an integral part of the harbour system," as well as roadsteads normally used for the loading, unloading, and anchoring of ships. The territorial sea of an island would be measured in accordance with the above provisions (Art. 10).

Where the coasts of two States were opposite or adjacent to each other neither of them was entitled, failing agreement between them to the contrary, to extend its territorial sea beyond the "median line . . . equidistant from the nearest points on the baselines from which the breadth of the territorial seas of each of the two States is measured." This, however, would not apply "where it is necessary by reason of historic title or other special circumstances to delimit the territorial seas of the two States in a way which is at variance with this provision" (Art. 12).

Right of "Innocent Passage." Under Art. 14 "ships of all States, whether coastal or not, shall enjoy the right of innocent passage through the territorial sea," including stopping and anchoring as far as "incidental to ordinary navigation or necessary by *force majeure* or distress" Passage was "innocent" so long as it was "not prejudicial to the peace, good order, or security of the coastal State," but passage of foreign fishing vessels would not be considered innocent "if they do not observe such laws and regulations as the coastal State may make . . . in order to prevent these vessels from fishing in the territorial sea." Submarines would be required to navigate on the surface and to show their flag.

Innocent passage must not be hampered by the coastal State (Art. 15), which might, however, suspend it temporarily in specified areas, "without discrimination amongst foreign ships, . . . if such suspension is essential for the protection of its security", a suspension would not be permissible, however, through straits "which are used for international navigation between one part of the high seas and another part of the high seas or the territorial sea of a foreign State" (Art. 16). [This provision was opposed by Saudi Arabia which did not recognize it.] Any foreign ships exercising the right of innocent passage must comply with the laws and regulations enacted by the coastal State in conformity with the present Convention and other rules of international law (Art. 17).

Arts. 18-23 (*a*) forbade the levying of charges on foreign ships for their passage through the territorial sea, except for specific services rendered, and then without discrimination, (*b*) restricted the criminal jurisdiction of the coastal State in relation to those ships; (*c*) prohibited the stopping or diversion of ships for the purpose of exercising civil jurisdiction in relation to a person on board, or the arrest of the ship for the purpose of any civil proceedings, except in respect of liabilities incurred by the ship during or for its voyage through the waters of the coastal State, and (*d*) extended the application of all these rules to government-owned ships operated for commercial purposes, and of certain rules to those operated for non-commercial purposes.

Contiguous Zones. Art. 24 regulated the position in zones of the high seas contiguous to the territorial sea of a coastal State, limiting such zones to up to 12 miles from the shore baselines, with special provisions for the coasts of States situated opposite or adjacent to each other. Within a contiguous zone, the coastal State was authorized to prevent infringements of its Customs, fiscal, immigration, or sanitary regulations which might be committed within its territory or territorial sea, and to punish infringement of such regulations.

Concluding Provisions. Arts. 25-32 provided (i) that conventions or other international agreements already in force should not be affected; (ii) that the present Convention should be open for signature until Oct. 31, 1958, by all countries which were members of the U.N or of any of its specialized agencies, and by any other State invited by the General Assembly to become a party; (iii) that signatures were subject to ratification [without a time-limit]; (iv) but that States belonging to the aforementioned categories who had not signed before Nov. 1, 1958, could afterwards still accede by depositing their instruments of accession. (v) The Convention would come into force 30 days after the ratifications or accessions by 22 countries had been deposited with the U N. Secretary-General. (vi) Thereafter any signatory country might request a revision after five years, the decision on any steps to be taken lying with the U.N. General Assembly.

Convention on the High Seas.

Freedom of the High Seas. Arts. 1 and 2 laid down that "the high seas (i.e. "all parts of the sea that are not included in the territorial sea or any internal waters of a State") being open to all nations, no State may validly purport to subject any part of them to its sovereignty." Freedom of the high seas would be subject to the conditions laid down by the present convention and by "the other rules on international law." It comprised, *inter alia*, both for coastal and non-coastal States, freedom of navigation, freedom of fishing, freedom to lay submarine cables and pipelines, and freedom to fly over the high seas. It was stipulated that "these freedoms and others which are recognized by the general principles of international law, shall be exercised by all States with reasonable regard to the interests of other States in their exercise of the freedom of the high seas."

Land-locked Countries. Under Art. 3 "States having no sea coast should have free access to the sea." Accordingly, land-locked countries should be granted by their neighbouring coastal States (or any State lying between them and the coastal State) (*a*) free transit on a basis of reciprocity, and (*b*) the right for their ships to enter and use the coastal State's seaports on conditions equal to those accorded to the coastal State's own ships or to the ships of any other States All such matters should be regulated by mutual agreement, and taking into account the rights of the countries concerned

Nationality of Ships. Art 5 allowed each State to fix the conditions for the grant of its nationality to ships, their registration in its territory, and the right to fly its flag. Ships would have the nationality of the State whose flag they were entitled to fly, but "there must exist a genuine link between the State and the ship" and "the State must effectively exercise its jurisdiction and control in administrative, technical, and social matters." Ships must in principle sail under the flag of one State only and might not change their flag during a voyage or while in a port of call, except in the case of a real transfer of ownership or change of registry. A ship sailing under the flags of two or more States, using them according to convenience, would be treated as one without nationality. All ships would be subject on the high seas to the exclusive jurisdiction of the State whose flag they flew. These provisions would not prejudice the question of ships officially flying the flag of an intergovernmental organization (Art. 7).

Status of Warships. Warships, as well as ships owned or operated by a State and used only on governmental non-commercial service, would enjoy complete immunity on the high seas from the jurisdiction of any State other than the flag State (Arts. 8-9).

Safety at Sea. States must take measures for ships under their flag to ensure safety at sea in conformity with generally accepted international standards, including signals, communications, the prevention of collisions, construction, equipment, sea-worthiness, and "the manning of ships and labour conditions for crews, taking into account the applicable international labour instruments" (Art. 10).

In the event of collisions or any other navigation incidents on the high seas, penal or disciplinary proceedings might be instituted against the master or any member of the crew only by the authorities either of the flag State or of the State of which the incriminated person is a national, and only the flag State might order the arrest or detention of the ship, even for investigation (Art. 11).

Art. 12 laid down the duty of all ships to render assistance to persons or other ships in distress "insofar as he [the master] can do so without serious danger" to his own ship, crew, or passengers.

Prevention of Slave Trade and Piracy. All States must adopt effective measures against the use of their ships for slave transport, it being stated that "any slave taking refuge on board any ship, whatever its flag, shall *ipso facto* be free" (Art. 13).

All States were required to co-operate "to the fullest possible extent" in the repression of piracy on the high seas or in any other places outside the jurisdiction of any State; piratical acts committed by warships, government ships or government aircraft whose crews had mutinied and taken control of the ship or aircraft would be treated in the same way as acts committed by a private pirate ship (Arts. 14-18) On the high seas every State might seize a pirate ship or aircraft or a ship taken by piracy and controlled by pirates, and arrest the persons and seize the property on board, any further action against the pirates, the ship, etc., being up to the courts of the State which carried out the seizure (Art. 19). Seizures effected without adequate grounds would render the State making the seizure liable for compensation for loss or damage to the State the nationality of which was possessed by the seized ship or aircraft (Art. 20).

A seizure on account of piracy might only be carried out by warships or military aircraft or other ships or aircraft on government service authorized to that effect (Art. 21).

Right of Search. Art. 22 laid down that "except where acts of interference derive from powers conferred by treaty, a warship which encounters a foreign merchant ship on the high seas is not justified in boarding her unless there is reasonable ground for suspecting that the ship is engaged in piracy or in the slave trade or that, though flying a foreign flag or refusing to show its flag, the ship is in reality of the same nationality as the warship." In such case the warship might proceed to verify the ship's right to fly its flag (sending over a boat under the command of an officer) and, if suspicion remained after the documents had been checked, to carry out a further examination on board, "with all possible consideration." If the suspicions proved unfounded, and provided the ship had not committed any act justifying them, it must be compensated for any loss or damage sustained.

"Hot Pursuit." Under Art. 23 "the hot pursuit of a foreign ship may be undertaken when the competent authorities of the coastal State have good reason to believe that the ship has violated the laws and regulations of that State." Such pursuit must be commenced within the internal waters, or the territorial sea, or the contiguous zone of the pursuing State, and might only be continued outside if the pursuit had not been interrupted. If the foreign ship was within a contiguous zone the pursuit might only be undertaken if there had been a violation of the rights for the protection of which the zone was established. The right of hot pursuit ceased "as soon as the pursued ship enters the territorial sea of its own country or of a third State."

Hot pursuit was not deemed to have begun unless the pursuing ship had "satisfied itself by such practicable means as may be available" that the ship pursued, or one of its boats or other craft working as a team and using the ship pursued as a mother ship, were within the limits of the territorial sea (or within the contiguous zone); it could only be commenced after a visual or auditory signal to stop had been given at a distance within sight or sound of the foreign ship

Hot pursuit might be carried out only by warships or military aircraft or specially authorized other ships or aircraft on government service; when effected by an aircraft the latter must itself actively pursue the ship until a ship or aircraft of the coastal State, summoned by the pursuing aircraft, arrived to take over the pursuit, unless the aircraft was itself able to arrest the ship. It would not suffice to justify an arrest on the high seas that the ship was merely sighted by the aircraft as an offender or suspected offender, unless it had been both ordered to stop and pursued without interruption by the aircraft or other aircraft or ships. Compensation for loss or damage must be paid to ships stopped or arrested on the high seas in circumstances not justifying the hot pursuit.

Anti-Pollution Measures. All States were required to prevent the pollution of the seas by the discharge of oil, the exploitation and exploration of the sea bed and its subsoil, and the dumping of radio-active waste, and to "co-operate with the competent international organizations in taking measures for the prevention of pollution of the seas or air space above, resulting from any activities with radio-active materials or other harmful agents" (Arts. 24-25).

Arts. 26-29 regulated the laying of submarine cables and pipelines and laid down measures for their protection.

Concluding Provisions. These were analogous to those of the Convention on the Territorial Sea.

The issue of nuclear weapons tests at sea had played an important part in the discussions on the convention in the second committee.

Mr. Akira Oha (Japan), opening the debate on March 11, pointed out that under the draft prepared by the International Law Commission, States were "bound to refrain from any acts which might adversely affect the use of the high seas by nationals of other States"; he argued that in the Japanese view this implied that "the freedom of the sea should not be violated by nuclear tests." British, U.S., and other delegates maintained, however, that this question could not be settled in isolation from the current international negotiations on disarmament in general and the suspension of the testing and use of nuclear weapons in particular.

The following three resolutions relating to nuclear tests at sea were put forward during the debate, but only the third was put to a vote in the committee and was subsequently approved by the conference as a whole:

(1) A resolution jointly sponsored by the Soviet Union, Czechoslovakia, Poland, and Yugoslavia, which proposed that the words "States are bound to refrain from testing nuclear weapons on the high seas" be added to the draft article defining the nature of the freedom of the high seas. This was opposed by Britain, the U.S.A., Pakistan, and Turkey on the above-mentioned grounds.

(2) A British resolution that the question of nuclear tests should be referred to the General Assembly. This was opposed by Albania, Czechoslovakia, India, Japan, Rumania, the Soviet Union, the United Arab Republic, and Yugoslavia, because it failed to record the apprehension felt by many countries about nuclear tests.

(3) An Indian compromise resolution which in its final form (*a*) recognized "the serious and genuine apprehension of many States that nuclear explosions constitute an infringement of the freedom of the seas"; (*b*) recommended that the matter be referred to the General Assembly for "appropriate action," in view of the fact that the question of nuclear tests and production was still under review by the Assembly, the Disarmament Commission, and the Governments concerned. In this form the Indian resolution was adopted by 50 votes to four (Chile, Ecuador, Japan, and Peru), with 12 abstentions (including the Soviet bloc and Yugoslavia).

Convention on Fishing and Conservation of the Living Resources of the High Seas.

General Rights and Duties. Arts. 1-3 laid down that all States had a right for their nationals to engage in fishing on the high seas subject to (*a*) their treaty obligations; (*b*) the interests and rights of coastal States; (*c*) the provisions laid down in subsequent Articles. However, they had the duty of adopting, or co-operating with other States in adopting, any measures necessary for the conservation of the living resources of the high seas, primarily in order to secure a supply of food for human consumption.

If the nationals of two or more States were engaged in fishing in any areas of the high seas, each State must, at the request of another, enter into negotiations with a view to drawing up an agreement prescribing for its nationals the necessary conservation measures; if no agreement was reached within 12 months, any of the parties might submit the matter for settlement to a special commission of five members, as set out below (Art. 4). Other States whose nationals might subsequently engage in fishing in the same areas must apply those measures (which must not "be discriminatory in form or act") to their own nationals within seven months of the date on which the measures had been notified to the Director of the U.N. Food and Agriculture Organization. If the other States failed to accept the measures, and there was no agreement within 12 months, any of the interested parties might refer the matter to the special commission (see above); meanwhile the measures would remain obligatory pending the commission's decision, unless the latter decided otherwise (Art. 5).

Special Rights of Neighbouring Coastal States. Coastal States were entitled to take part in any system of research and regulation for conserving the living resources in areas of the high seas adjacent to their territorial waters, even if their nationals did not fish there. A State whose nationals were engaged in fishing in these areas must, at the coastal State's request, enter into negotiations with a view to agreement on necessary conservation measures; it must not enforce any such measures opposed to those adopted by the coastal State, but might initiate negotiations with the coastal State with a view to drawing up agreed measures (Art. 6).

Any coastal State might unilaterally adopt conservation measures if negotiations with other States had not led to an agreement within six months; these measures, however, would only apply to other States if they were (i) urgently necessary in the light of existing knowledge of the fisheries, (ii) based on appropriate scientific findings, and (iii) not discriminatory against foreign fishermen. The measures would remain in force pending the settlement of any doubt as to their validity and, if not accepted by the other States concerned, must be submitted for settlement to the special commission (Art. 7).

Any State which had a special interest in the conservation of the living resources of an area of the high seas adjacent to its coast, even if its nationals did not at present fish there, might request other States whose nationals did so to take the necessary conservation measures; failing agreement within 12 months, the first State might submit the matter to the special commission for settlement (Art. 8).

Arbitration Procedure. Unless the parties to a dispute agreed to another method of peaceful settlement under Art. 33 of the U.N. Charter, the dispute would be submitted to a specially-constituted commission of five members. If the parties were unable to agree on the commission's membership, the members would be named by the U.N. Secretary-General in consultation with the parties and with the President of the International Court of Justice and the Director-General of FAO. The commission would have to give its decision within five, or in exceptional cases, eight months. If, subsequently, substantial changes in fish stocks or methods of fishing should alter the factual basis of the commission's award, any State concerned might request the others to negotiate with a view to prescribing modifications in the conservation measures, failing agreement within two years, any State might again resort to the arbitration procedure (Arts. 9-12).

Special Fishing Methods. Art. 13 permitted a coastal State to regulate in areas of the high sea adjacent to its territorial waters "fisheries conducted by means of equipment embedded in the floor of the sea," provided (i) that its nationals had conducted the fisheries for a long time; (ii) that non-nationals were allowed to participate in them on equal terms, unless the fisheries had been reserved to nationals of the coastal State by long usage.

Concluding Provisions. These were analogous to those of the other Conventions.

Convention on the Continental Shelf.

Definition of Continental Shelf. Art. 1 defined the continental shelf a novel concept in international law and never before the subject of a multinational treaty- as (*a*) "the seabed and subsoil of the submarine areas adjacent to the coast, but outside the area of the territorial sea, up to the point where the waters above are 200 metres deep, or beyond that limit if the depth allows exploitation of natural resources"; (*b*) the seabed and subsoil of similar submarine areas adjacent to the coasts of islands.

Exploitation of Natural Resources. Art. 2 gave coastal States exclusive rights to exploit mineral and other non-living resources of the shelf, as well as living organisms belonging to "sedentary species," i.e. "organisms [such as oysters] which at the harvestable stage are either immobile under the seabed or cannot move except in constant physical contact with the seabed or the subsoil." These rights of the coastal State would not, however, affect the legal status of the waters above the shelf as high seas, nor that of the airspace above them (Art. 3).

Subject to its right to take "reasonable measures" for exploiting the continental shelf and its natural resources, the coastal State must not impede the laying or maintenance of submarine cables or pipelines, nor must the exploitation result in unjustifiable interference with (*a*) navigation, fishing, or conservation of the living resources of the sea; (*b*) oceanographic or other research intended to be published. Subject to these provisions, a coastal State might construct and operate on the continental shelf installations necessary for its exploitation and that of its natural resources, and after giving due notice-- establish round them safety zones up to 500 metres wide. These zones, which must be clearly marked by lights, buoys, etc., would not possess the status of islands, and would not affect the delimitation of the territorial waters of the coastal State; in the zones the coastal State must undertake all appropriate measures for protecting the living resources of the sea from harmful agents.

The coastal State's consent would be necessary for any research concerning the continental shelf; such consent must not normally be withheld, however, if "qualified institutions" wished to undertake "purely scientific research into the physical or biological characteristics of the continental shelf," subject to the right of the coastal State to participate in the research and to the publication of its results (Arts. 4-5).

States with Opposite Coasts. Where the same continental shelf was adjacent to the territories of two or more States with coasts opposite each other the boundary of the coastal shelf appertaining to each State would be determined by mutual agreement; failing agreement, and unless another boundary was justified by special circumstances, it would be the median line "every point of which is equidistant from the nearest points of the baselines from which the breadth of the territorial sea of each State is measured" (Art. 6).

Concluding Provisions. These were the same as in the other conventions.

Protocol on Settlement of Disputes and Resolutions.

Protocol. This provided for (*a*) the compulsory jurisdiction of the International Court of Justice in "disputes arising out of the interpretation or application of any Convention on the Law of the Sea,"

except for disputes in relation to the Convention on Fishing and Conservation of Living Resources where a special arbitration procedure was introduced by that convention (see above); (*b*) the reference of disputes either to an arbitral tribunal or to a conciliation commission if both parties to the dispute agreed within two months to adopt one of these procedures instead of resorting to the International Court; reference to the latter would still be open, however, if the recommendations of the conciliation commission were not accepted by all parties within two months.

Resolutions. Apart from the question of nuclear tests on the high seas (see above), the resolutions dealt largely with mutual co-operation in the conservation of fish and other living marine resources in the high seas. One of them requested all States "to prescribe . . . those methods for the capture and killing of marine life, especially of whales and seals, which will spare them suffering to the greatest extent possible." Another recommended that, where for the purpose of conservation it became necessary to limit the total catch of stocks of fish in an area of the high seas adjacent to the territorial sea of a coastal State, any other State fishing in that area should "collaborate with the coastal State to secure just treatment of such situation", this should be done by "establishing agreed measures which shall recognize any preferential requirements of the coastal State resulting from its dependence upon the fishery concerned while having regard to the interests of other States"; and that "appropriate conciliation and arbitral procedures" should be established for the settlement of any disagreement.

Other resolutions (*a*) requested the International Atomic Energy Agency to "take whatever action is necessary to assist in steps in controlling the discharge and release of radioactive materials into the sea, in promulgating international standards, and in drawing up internationally acceptable regulations to prevent pollution of the sea by radioactive materials in amounts which would adversely affect man and his marine resources; (*b*) requested the U.N General Assembly to arrange for the study of the juridical regime of "historic waters," including "historic bays."

Signature of Conventions.

After the final session of the Conference, the conventions on the territorial sea, on the high seas, and on the continental shelf were signed on April 29 by 17 countries, viz., Argentina, Canada, China (Nationalist), Colombia, Costa Rica, Cuba, Denmark, Dominican Republic, Ghana, Guatemala, Haiti, Iceland, Israel, Nepal, Siam, Uruguay, and Yugoslavia. With the exception of Guatemala, these countries also signed the convention on fishing and conservation of resources on the high seas. The optional protocol on the settlement of disputes was signed by 13 countries, viz., Canada, China (Nationalist), Colombia, Costa Rica, Cuba, Denmark, Dominican Republic, Ghana, Haiti, Israel, Nepal, Uruguay, and Yugoslavia. A. INDIA - PAKISTAN. — Serious Incidents on Indian-Pakistani Borders. - Delhi Meeting between Mr. Nehru and Mr. Noon. - Agreement on Majority of Border Disputes.

A series of incidents on the frontiers of India and East Pakistan, together with an incident on the Punjab-West Pakistan border in which several Indian policemen were killed, led to a period of tension between the two countries in the spring and again in August. Details of these incidents are given below.

The Surma River Sector. The River Barak, which flows westward through Assam, forks at the border town of Bhanga, the northern fork being known as the Surma and the southern as the Kusiyara. The Surma forms the frontier for 13 miles north of Bhanga between the Cachar district of Assam and the Sylhet district of East Pakistan; whereas the Indian Government, however, claims that under the Radcliffe Award the whole river up to the left high bank belongs to India, the Pakistani Government claims that the midstream forms the boundary in accordance with the Award's general principle. This difference had previously led to incidents in November-December 1954, February 1956 (see 14894 A), November 1956, and October 1957.

According to the Indian Government, Pakistani villagers began to harvest crops grown illegally on an islet in the river on March 11; it was alleged that when an Indian border patrol protested Pakistani forces had opened fire, whereupon Indian forces had fired back in self-defence, and that there had been further unprovoked Pakistani firing in adjoining areas during the following week. The Pakistani Government, on the other hand, claimed that Indian forces had fired across the river at peasants working in their fields on the south bank, that Pakistani police had only returned the fire in self-defence on March 13, and that further firing by Indian forces had occurred on March 18-20, causing the Pakistani police to reply for their protection. Although the Deputy Commissioners of Cachar and Sylhet concluded three successive cease-fire agreements on March 21, March 27 and April 8, sporadic firing by both sides continued until April 10, each side blaming the other for having started the firing.

The Pakistani Foreign Ministry stated early in April that two passengers in a train inside Pakistani territory had been killed by Indian fire on March 28, and that two other Pakistanis had been seriously wounded in the earlier incidents. Indian sources gave the number of Indian casualties as two persons killed and seven wounded. Firing began again on May 11 in the area of Karimganj (on the Kusiyara, west of Bhanga) and continued until May 23, when a fourth cease-fire came into force.

After a two months' interval, during which only occasional minor incidents were reported, Pakistani troops, according to Indian statements, occupied the Indian village of Tukergram (on the Kusiyara) during the night of Aug. 6-7 and opened fire along the entire 13-mile stretch of the Surma; Pakistani reports, however, alleged that the firing had been begun by the Indian forces. Tukergram changed hands several times during the following three weeks but finally remained in Pakistani possession. The firing spread on Aug. 10 to the entire length of the Karimganj-Bhanga sector of the frontier, and continued at intervals until a cease-fire came into effect on Aug. 26. Indian official sources said on Aug. 25 that four civilians had been killed and several wounded in this area since Aug. 6.

The Khasi-Jaintia Hills Border. North-west of the Surma sector, on the border of the Khasi-Jaintia Hills district in Assam and the Sylhet district, Pakistani forces were stated to have fired across the frontier on a number of occasions during April 4-9. The small Indian frontier town of Dawki was fired on by Pakistani troops during May 15-23, women and children being evacuated from the town, and again on Aug. 13.

The Tripura Border. The Pakistani Government sealed off the Tripura border on Aug. 4, and sent troops which occupied the village of Lakhimpur during the night of Aug. 6-7, two Pakistani soldiers and two Indian policemen being killed in the fighting. The accounts of the circumstances given by the two sides differed considerably. According to the Pakistani Government, Lakhimpur had been in Pakistan's possession until it was seized by Indian troops on July 30. On the other hand, the Indian Prime Minister, Mr. Nehru, said on Aug. 11, that although the Demarcation Commission had agreed that the area containing Lakhimpur should ultimately go to Pakistan, it had also been agreed that the actual transfer of territory should not be carried out piecemeal but should only take place when demarcation was completed. He also claimed that Lakhimpur had been in India's possession, and alleged that the fact that the attacks on this village and on Tukergram had taken place simultaneously suggested that they were part of a co-ordinated plan.

The Fazilka Incident. Seven members of the Punjab police were killed on June 3 in an incident at Amruka (12 miles from the town of Fazilka), on the border of Punjab and West Pakistan. The Indian Government alleged that Pakistani border police had since April 14 trespassed on the right bank of the Amruka canal, which was in India's possession, although the demarcation of the territory remained to be completed. On June 3 Indian and Pakistani police officers had met on a bridge over the canal to discuss the situation, but while their conference was in progress Pakistani police had suddenly opened fire, killing seven Indian policemen. The Indian and Pakistani Divisional Commissioners subsequently held an inquiry into the incident, but failed to reach agreement on the facts.

As a result of an exchange of correspondence between Mr. Nehru and Mr. Noon, the Indian and Pakistani Prime Ministers, it was agreed on Aug. 20 that they should meet in Delhi on Sept. 9 to discuss means of preventing border incidents, and following further exchanges a cease-fire came into effect on the border between India and East Pakistan from midday on Aug. 26.

In a letter of Aug. 8, Mr. Noon referred to alleged Indian encroachments at Lakhimpur and in the Patharia Forest (on the Tripura-East Pakistan border) and asked for the withdrawal of the Indian forces from this area. In his reply, Mr. Nehru, whilst repudiating Mr. Noon's allegations, suggested that they should meet to discuss border disputes, and appealed to him to reopen the Tripura-East Pakistan frontier. Both proposals were accepted on Aug. 16 by Mr. Noon, who suggested that a conference of the heads of the Foreign Ministries of the two countries, which had been fixed for Aug. 23, should be held after the Prime Ministers' meeting, and should be asked to settle the details of their decisions. As the result of a further exchange of letters, however, it was finally agreed on Aug 20 that the heads of the Foreign Ministries should meet in Karachi on Aug. 30, and that Mr. Nehru and Mr. Noon should meet in Delhi on Sept. 9.

In accordance with these arrangements, delegations from both countries led respectively by Mr. M. J. Desai (Commonwealth Secretary in the Indian Ministry of External Affairs) and by Mr. M. S. A. Baig (Foreign Secretary in the Pakistani Ministry of Foreign Affairs and Commonwealth Relations) had discussions in Karachi from Aug. 30-Sept. 2. Mr. Noon told

the press on Sept. 1 that the two Secretaries had not been able to reach an agreement on any major border question, and that the talks had "almost completely failed to produce any solution". A joint communiqué issued on Sept. 3, however, stated that "some progress" had been made on the question of existing territorial disputes; that "constructive proposals" for their settlement would be submitted to the two Prime Ministers for discussion at their meeting; and that unsolved disputes would be referred to an impartial tribunal. It had also been decided to exchange on Sept. 9 all prisoners taken during the border incidents.

The joint communiqué also said that both delegations had "deplored" the recent border incidents involving the loss of lives and the disruption of the social and economic life of the border populations, and had emphasized "the full determination of their Governments to maintain peaceful conditions on the border and to issue the necessary instructions." It had also been decided that instructions should be issued to the State Governments and the Survey authorities concerned to take all steps which would help in expediting demarcation, and that certain principles had been laid down for the technical handling of the demarcation procedure.

Mr. Noon visited Delhi from Sept. 9-11 and had three long meetings with Mr. Nehru, at which Mr. Desai and Mr. Baig were also present. A communiqué issued on Sept. 11 said that the two Prime Ministers had had "frank and friendly" discussions on border problems, and continued:

"They arrived at agreed settlements in regard to most of the border disputes in the eastern region. They also agreed to an exchange of enclaves of the former Cooch-Behar State in Pakistan and Pakistani enclaves in India. Some of the border disputes—namely, two regarding the Radcliffe and Bagge Awards in the eastern region and five in the western region—require further consideration.

"The Prime Ministers agreed to issue the necessary instructions to their survey staff to expedite demarcation in the light of the settlements arrived at and to consider further methods of settling the disputes that are still unresolved. In regard to the Hussainiwala and Sulcimanki disputes, the Foreign Secretary of the Government of Pakistan [Mr. Baig] and the Commonwealth Secretary of the Government of India [Mr. Desai] will, in consultation with their engineers, submit proposals to the Prime Ministers.

"The Prime Ministers agreed that, when the areas are exchanged on agreed dates as a result of the settlement and demarcation of these disputed areas, an appeal should be made to the people in areas exchanged to continue staying in their present homes as nationals of the State to which the areas are transferred.

"The Prime Ministers further agreed that, pending settlement of unresolved disputes and demarcation and exchange of territory by mutual agreement, there should be no disturbance of the *status quo* by force, and peaceful conditions must be maintained in the border regions. Necessary instructions will be issued to the respective States and to local authorities on the border.

"The Prime Ministers agreed to keep in touch with each other with a view to considering various steps to be taken to further their common objective of maintaining and developing friendly and co-operative relations between their two countries."

Fuller details of the settlement reached were given by Mr. Noon on his return to Karachi on Sept. 11 and by Mr. Nehru in the *Lok Sabha* on the following day.

The disputes, it was pointed out, had arisen from ambiguities in the Radcliffe and Bagge Awards (see 8813 A, 10693 A) which left room for differences of interpretation; e.g. in one area the description of the boundary in the Radcliffe Award was inconsistent with the delineation of the boundary on the map adopted by Mr. Justice Radcliffe. Mr. Noon stated that the two unsettled disputes in the eastern region referred to in the communiqué concerned the course of the Feni River (on the Tripura-East Pakistan border) and the course of the Kusiyara; although a ruling on the latter had been given by the Bagge Tribunal, certain questions remained unresolved and an area with about 30 villages, which was in India's possession, was claimed by Pakistan. Mr. Nehru also referred to an unresolved dispute over the Patharia Hills Reserve Forest (on the Assam-East Pakistan frontier), and stated that the Chief Secretaries and Conservators of Forests of the two States would be asked to draw up a provisional boundary, pending a final settlement, to prevent disputes over the cutting of the timber.

The disputes on which agreements were reached were as follows:

(1) The territories covered by the Bagge Award on the West Bengal-East Pakistan frontier, where demarcation had already been completed, would be exchanged by Jan. 15, 1959.

(2) Four other disputes concerning the West Bengal-East Pakistan frontier were considered, in two of which a compromise settlement was reached, whilst in the other two Pakistan abandoned her claims.

(3) The dispute over the Surma and Piyain rivers would be decided by adopting the latest pre-partition boundary notifications. Whatever the demarcation adopted, full facilities of navigation on these rivers would be given to both sides. In another dispute concerning the Assam-East Pakistan frontier Pakistan abandoned her claim.

(4) On the Tripura-East Pakistan border, India agreed to give Pakistan a small area of Tripura through which the East Bengal railway passes.

(5) The enclaves of the former Cooch-Behar State in East Pakistan and the Pakistani enclaves in West Bengal would be exchanged without compensation. [For the origin of these enclaves see the note on page 13128.] Under the agreement, Pakistan will receive about 28 square miles of territory, with a population of about 11,000, in return for about 17 square miles, with a population of about 9,000 which will go to India. The decision to make such an exchange was taken in principle in 1953, but was never put into effect, as no agreement was reached on how West Bengal should be compensated for the extra territory to be transferred to Pakistan.

Of the five disputed areas in the western region on which an agreement has yet to be reached, four were on the Punjab-West Pakistan border; these included the Hussainiwala canal headworks, near which incidents had occurred in 1956 (see 14984 A), and the Sulemanki canal headworks. The other dispute concerned the islet of Chhad Bet, on the Bombay-West Pakistan border, which had also formed the subject of incidents in 1956.

The communiqué of Sept. 11 made no further reference to the agreement reached at the Foreign Secretaries' conference for setting up an impartial tribunal to settle unresolved border disputes, as the two Prime Ministers failed to agree on this point.

Mr. Noon said on Sept. 11 that there had "never been any disagreement on the question that border disputes which the two countries are not able to resolve by negotiation should be referred to an impartial tribunal for adjudication and final settlement." He continued: "I conveyed it to the Prime Minister of India that the remaining unresolved disputes could be referred for final settlement to a tribunal only if India agreed to implement *in toto* the award given by the Bagge Tribunal. The Indian Prime Minister did not find it possible to agree to this, and suggested that the Indian point of view in regard to the findings given by the Bagge Tribunal should also be specifically referred to a tribunal which may be set up for deciding unresolved border disputes. I endeavoured to convince the Prime Minister of India that there was no justification for referring the decision given by a final adjudicating authority to any other tribunal. The sanctity and finality of an award given by an impartial tribunal must be accepted and honoured. If any compromise were made in this matter no one would have any confidence in any tribunal which may be set up by us in future to go into other disputes. It was on account of this difficulty that we would not agree to constitute an impartial tribunal to which unresolved disputes of the western region may be referred for adjudication and final settlement."

The Indian view on this question was outlined as follows by the political correspondent of the *Hindu*: "According to Pakistan, so far as the eastern wing is concerned, the only question for consideration is 'implementation' of the Radcliffe and Bagge Awards. Although Pakistan does not actually say it in so many words, it would like the question of 'interpretation' of awards to be settled in regard to the West Pakistan border. But in India's view the same principle must be applied to both wings, whether it be 'interpretation' or 'implementation.' As an alternative, India suggested that her point of view may also be referred to arbitration. But Pakistan declined to accept the suggestion . . ."

In reply to questions in the *Lok Sabha* on Sept. 12, Mr. Nehru expressed the opinion that the proposed border adjustments were interpretations of the Radcliffe and Bagge Awards, and that Parliament's consent would therefore not be required constitutionally for the transfer of territory to Pakistan. (Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta)

A. BELGIUM-NETHERLANDS. — Joint Training for Air Forces.

It was officially announced in Brussels and The Hague during the second half of September that the Belgian and Netherlands Ministers of Defence had agreed on the integration of the training of the Air Force personnel of the two countries. The integration would start with the joint training of pilots, the first stage of which would be under Belgian supervision and would take place at the Kmina Air Base in the Belgian Congo, while the second part would be under the supervision of the Dutch Air Force.

It was also announced that the Dutch-Belgian integration plan would include the maintenance of guided missiles. It had been agreed that the Belgian forces would undertake the maintenance work on the first type of guided missiles to be obtained by the two Air Forces, and that the Netherlands would be in charge of the maintenance service for the second type.—(Netherlands News Agency - La Nation Belge)

A. RELIGIOUS LIFE. — The Lambeth Conference. - Anglican Pronouncements on Ecclesiastical, Moral, International, Racial, and Domestic Issues.

The ninth Conference of "Bishops in full Communion with the See of Canterbury" was convened at Lambeth Palace, London, from July 5-Aug. 9 by the Archbishop of Canterbury (Dr. Fisher) in his *ex-officio* capacity as chairman Of the 310 Bishops who attended as members, approximately one-third came under the direct jurisdiction of the Archbishop of Canterbury (either within the U.K. or overseas); one-third represented the Episcopal Church in the U.S.A.; and one-third belonged to the following main groups of regional Anglican Churches within the Commonwealth: (*a*) Canada; (*b*) India, Pakistan, Burma, and Ceylon; (*c*) Australia and New Zealand; (*d*) West and Central Africa; (*e*) South Africa; (*f*) the West Indies. The Anglican Communion in Japan was also represented.

Leading representatives from European Churches in 'Intercommunion' with the Anglican Church (notably the German Lutheran Church and the Greek and Russian Orthodox Churches) attended the opening sessions of the Conference as guests and observers, but took no part in its deliberations

['Full Communion' had previously been defined as applying to Churches which, though not necessarily "of the same denominational or confessional family," shared "unrestricted *communio in sacris*, including mutual acceptance of ministries"; the state of 'Intercommunion' applies to the varying degrees of relationship established by agreement between the Anglican Church and certain other Churches.]

Prior to the opening of the Conference, Dr. Fisher received the members in Canterbury Cathedral on July 3, and in his address to them outlined the outstanding considerations which would influence their deliberations.

The Archbishop said that the world was "afraid, angry, and a prey to its passions . . . desperately needing to discover how, and at what price, friendship, harmony, and peace among men can be had" now that "old methods of peace-making and reconciliation have failed." The Conference would therefore give its attention to "those factors—cultural, racial, and national—which . . . put peace to flight" and also to "those varied modern conditions" which threatened "the stable existence of the family and the home"

The Conference considered the reports previously compiled by five committees and six sub-committees, each of which had been assigned a special field of investigation. After discussion, these recommendations were embodied, either wholly or in part, in 131 Resolutions which were then formally adopted without dissent. Since, however, the function of the Conference was essentially deliberative, its authority was advisory and not legislative; its Resolutions will therefore only become binding if the Convocations and Synods of Anglican Provinces subsequently choose to make them so in their particular spheres. Nevertheless, Dr. Fisher said that the Resolutions would "set the course of the Anglican Communion for the next 10 years."

The Report of the Conference, published on Aug. 26, consisted of three documents, viz.:

(1) An Encyclical Letter, intended for circulation throughout the dioceses of the Anglican Communion, which summarized the findings of the Conference and emphasized its salient considerations;

(2) The 131 Resolutions, formally adopted;

(3) The reports of the committees on which the Resolutions had been based.

The Encyclical Letter.

In their Letter, the Bishops emphasized that their deliberations had concerned "not only domestic problems concerning the Anglican Communion and Christendom," but also "some of the fundamental issues which confront the whole of mankind." There were "no simple answers" to "many of these baffling questions," but the key to their solution in every case was "reconciliation." Christians incurred the obligations of "earthly as well as heavenly citizenship," and should recognize their responsibilities (i) for the policies of their own countries; (ii) for working positively for peace; (iii) for opposing policies proceeding from "selfish nationalism or lust for power"; (iv) for respecting the peoples of other countries in their rights to freedom; (v) for demanding a greater sharing of the world's resources. The Letter included pronouncements on the following three major contemporary problems:

World Peace. Though the Conference had declared that the use of nuclear weapons was "repugnant to the Christian conscience," some members had felt that, "so long as such weapons exist, their use might be preferable to political enslavement." It had therefore not proved possible to reach unanimous agreement that such weapons were not morally justifiable "in any circumstances", neither had there been agreement as to whether the banning of them should be universal or merely unilateral. Nevertheless, because the "abolition of nuclear weapons of indiscriminate effect and destructive power by international agreement is an essential step towards the abolition of war itself," it was the duty of Christians to press for the banning of such weapons through their governments, which should accept "such limitations of their own sovereignty as may be required to ensure inspection and control."

An interim statement on the subject of world peace issued by the Conference on Aug. 5 had declared that true peace could be achieved not merely by banishment of war, but by the unselfish establishment of a new order in which (i) men are free to live under justice, (ii) world resources are developed and distributed for the benefit of all; (iii) war is made only against poverty, ignorance, disease, and oppression; (iv) the results of man's knowledge and discovery are used not for destruction, but for enlightment and health.

Racial Issues. After stating that racial tension "threatens the stability of whole communities" and "is a challenge to the Christian conscience," the letter declared that Christians were committed to the principle that "every man, of whatever colour or race . . . should be given the right to exercise responsible freedom in all aspects of our human life"

The Family. The Letter provided the first authoritative Anglican expression of the view that "the procreation of children is not the sole purpose of Christian marriage," and that "family planning . . . in such ways as are mutually acceptable to husband and wife in Christian conscience and secure from the corruptions of sensuality and selfishness is a right and important factor in Christian family life." In countries where the "population is increasing so fast that the survival of young and old is threatened," methods of birth-control "medically endorsed and morally acceptable" had become a "necessity." Stability in married life should be helped (i) by pre-marital instruction from the clergy, and (ii) by "organization of industry" to minimize the "disrupting effects" of "movement and re-settlement."

The Archbishop of Canterbury, at a press conference on Aug. 25, described the differences of opinion as regards the use of nuclear weapons as "exactly the same conflict as between pacifist and non-pacifist;" the "deep cleavage of Christian opinion throughout the world" on this issue, he said, had been similarly reflected and expressed by the British Council of Churches and the World Council of Churches (see 15540 A).

On the question of family planning he denied that the Conference pronouncements amounted to saying that birth control was "an economic and social necessity." Such planning, he pointed out, so far from necessarily implying limitation, might involve increase; the criterion was "the orbit of what you can bring up or hope to bring up to the glory of God . . ." He added: "If you are going to have 15 children and the last five are going to need Public Assistance, you have no right to do it."]

The Resolutions.

A summary of the most significant Resolutions is given below under the five subject headings which represent the five 'themes' of the Conference; together with other relevant findings of the appropriate committees which were not embodied in the Resolutions.

The Authority of the Bible. The Conference re-examined the message of the Bible "at a time when it is being re-discovered by modern theologians and its message re-assessed," the following being the principal Resolutions adopted in this connexion:

(i) "The Bible discloses the truths about the relation of God and man which are the key to the world's predicament."

(ii) There must be co-operation between theologians and "men of science and modern learning . . . in the study of their respective modes of thought and speech."

(iii) While the doctrine of Fundamentalism (i.e. the literal interpretation and acceptance of the Biblical text) was not specifically rejected, the Conference qualified its affirmation that the Bible possessed "the authority of God's truth" by adding that this did not involve "ascribing inerrancy to every statement which the Bible contains."

(iv) The Bible, having been compiled at a time when "the world was restless, torn by calamity, and seemingly near to catastrophe" had particular authority in the "similar environment of today."

(v) Neither the Bible nor the Church could be understood apart from each other.

Church Unity and the Church Universal. The basic requirements for unity within the Anglican Communion were defined by re-affirmation of the 'Lambeth Quadrilateral' of 1920, *viz.* (i) acceptance of the Scriptures; (ii) affirmation of the Nicene Creed; (iii) the sacraments of Baptism and Holy Communion; (iv) "a ministry acknowledged by every part of the Church." Acceptance of the "historic episcopate" was a further essential. Schemes had been proposed for the establishment of "United Churches" in different parts of the Commonwealth in which these fundamentals would be adapted and modified to meet regional needs and understanding. In this connexion the following particular Resolutions were adopted:

(i) Schemes for United Churches in Northern India, Pakistan, and Ceylon were welcomed and approved, and the assistance of a "small commission of Bishops" was offered to these Churches should they need help in effecting the proposals for a unified ministry.

(ii) It was suggested that the Ceylon Scheme should be a model for plans for United Churches in West Africa and in the Archbishopric of Jerusalem

(iii) Bishops of Churches within the Anglican Communion which had joined a United Church should be invited to Lambeth, but decisions on Anglican policy would remain with those having Anglican jurisdiction.

[In the case of the Church in South India, which it was hoped would become a United Church together with the Churches in South Africa and the West Indies, the Committee discussing this question had reported progress, but had mentioned two obstacles still to be overcome, viz. (*a*) whereas the five Provinces within the CSI had agreed to acknowledge Orders of Bishops and episcopally ordained Presbyters of the CSI itself, the Provinces of South Africa and the West Indies would so far only recognize Anglican clergy of the CSI; (*b*) similar objections had been raised by the Anglican community of Nandyal (Southern India), but a commission appointed by the Metropolitan of India had suggested, after a visit, that the establishment of an Anglican Diocese of Nandyal might provide a solution.]

With a view to attaining a "unity in Christian fellowship for all men plainly to see" in the Church Universal, the Resolutions included the following Anglican aims.

(i) Unity with non-episcopal Churches "by a process of mutual assimilation" in the case of the Presbyterians, and by eventual "organic union" with the Methodists (see 15718 A),

(ii) Doctrinal agreement with the Eastern Orthodox Church "and other ancient Churches";

(iii) Agreement "in faith and order which would lead to the healing of the breach with the Church of Rome."

[The Committee had recorded satisfaction at the attainment of union, in the sense of Full Communion, with the 'Old Catholics' of Holland.]

Progress in the Anglican Communion. The Resolutions on this theme were sub-divided into three main issues, which are summarized below.

(i) *Revision of the Prayer Book.* The Conference recommended that the 1662 Book of Common Prayer ("a cherished part of our heritage which is a common bond of unity between us") should be revised with the following basic considerations in mind: (*a*) revival of the aim of the compilers of the first Prayer Books of the Church of England, i.e., to recover the forms of worship of the Primitive Church, (*b*) retention of the "safeguards" of the 'Lambeth Quadrilateral' (see above); (*c*) meeting the needs of interpretation in the regional Churches in Africa and elsewhere. It was also resolved (i) to request the Archbishop of Canterbury to appoint an advisory committee to prepare general recommendations on the structure of the service of Holy Communion, for the guidance of any Anglican province contemplating regional revision of its Eucharistic rite; (ii) that the Kalendar of Saints should be revised "in the light of Scriptural fact, the perpective of history, and widespread local desire over a good period of time."

[The last revision of the Prayer Book was submitted to Parliament in 1928, but was not accepted. The uses of the 1928 Book have, however, subsequently been employed wherever they have enjoyed local diocesan approval, notably in the services of Holy Matrimony and Holy Communion. The Committee dealing with this question proposed to the Conference detailed liturgical alterations and additions, which were accepted as guiding principles for revision, but were not incorporated in the Resolutions.]

(ii) *Missionary Strategy.* It was resolved (i) that an Advisory Council should be set up, consisting of the Archbishop of Canterbury, the Primates, the Presiding Bishops and Metropolitans, together with clerical and lay representatives of extra-provincial dioceses and a permanent secretary, "to deal effectively with the world-wide strategy of the Anglican Communion"; (ii) that an Anglican Congress (on the lines of that of 1954) should be held in 1963 with the same objective. Other Resolutions in this connexion commended the use of the "modern media" of journalism, radio, and television in the "world-wide task of evangelism."

(iii) *Ministries and Manpower.* It was resolved that the Anglican Ministry should be strengthened by (*a*) the development of "United (theological) Colleges" for the training of ordinands for the United Churches, to ensure "Anglican discipline and worship" and to create "better understanding between the several Churches"; (*b*) that Anglican Provinces should consider restoring the office of Deacon "to its primitive place as a distinctive Order in the Church," instead of its being "a probationary period for the priesthood" as at present; (*c*) that provision of a supplementary Ministry might be accomplished by permitting, "in suitable conditions," the combination of the priesthood with a lay occupation.

Conflicts between and within Nations. The Resolutions dealt with two aspects of this theme—international and racial.

International. (i) "War as a method of settling international disputes is incompatible with the teaching of Jesus Christ"; (ii) the goal of all nations should be "nothing less than the abolition of war itself"; (iii) the leading Governments should frame a "comprehensive international disarmament treaty" aiming at the progressive reduction of armed forces and conventional armaments to a security minimum; (iv) the U.N. should be "strengthened" by revision of its Charter.

[The appropriate Committee had defined six causes of "present-day international conflict," viz. (*a*) the insecurity of long-established nations; (*b*) the emergence of newly-independent nations; (*c*) the lack of a firm "philosophy of history"; (*d*) the dogma that only scientific truth is real; (*e*) the pressures of "over-starvation and over-population", (*f*) the drive for raw materials. Referring to the disagreement on the issue of nuclear weapons (see above), the Committee had emphasized that this did not "absolve any one of us from personal decision." No specific recommendations for the revision of the U.N. Charter were drawn up.]

Racial. (i) "Neither race nor colour is a barrier to any aspect of that life in family or community for which God created all men"; (ii) in multi-racial societies, "members of all races should be allowed a fair and just share in the Government of their country," and "the right to associate freely in worship, in education, and in industry."

[The Committee dealing with the racial issue, of which the Archbishop of Capetown (Dr. Joost de Blank) was chairman, had listed particular areas of racial tension, including the U.S.A., Israel and the United Arab Republic, India, the Far East, Africa, Australia, and Britain. Specific recommendations had included a warning to the Church in West Africa "to learn to live and work in the merging secular States"; an end to "patronage and even paternalism" in Central Africa; a modification of the "unwillingness" to receive coloured immigrants into Australia; and an enumeration of the duties of Christians under "a Government holding power . . . against the will of the majority of its people," Communism, as such, not being mentioned.]

The Family in Contemporary Society. The following Resolutions covered the principal contemporary problems of family life:

Family Planning. Declaring that "responsible parenthood requires a wise stewardship of the resources and abilities of the family, as well as thoughtful consideration of the varying population needs and problems of society," the Conference gave its approval to the principle, as "morally right," to control the size of a Christian family "in such ways as are mutually acceptable in Christian conscience."

Divorce. Proclaiming its belief that marriages were often broken by "tension resulting from a sense of injury overcoming the duty of forgiveness," the Conference insisted that "no husband or wife has the right to contemplate even legal separation until every opportunity of reconciliation and forgiveness has been exhausted." A further Resolution recommended consideration of a procedure to "define marital status" (such as already existed in some Anglican Provinces), in view of the recognized facts that (*a*) secular authorities in many countries granted a divorce on grounds which the Church could not accept; and (*b*) such a divorce might be sought, or granted, when in the eyes of the Church no marital bond existed.

Marriage Discipline. The Conference Resolutions of 1948 were re-affirmed; these had laid down (i) that the marriage of one whose former partner is still living may not be celebrated with the rites of the Anglican Church; and (ii) that those so divorced (i.e. with a partner still living), yet desiring to be admitted to the sacrament of Holy Communion, should be referred to the discretion of their Bishop.

Monogamy. The Conference affirmed its belief that monogamy was "the divine will" and therefore "true for every race of men," but recognized that the introduction of monogamy in a polygamous society had raised social and economic problems "which the Church has not yet solved."

Family Stability. Resolutions in this connexion called for "decent and suitable" housing conditions and, having drawn attention to "the increasing proportion of old people in the world," emphasized the responsibility of children for the needs of elderly parents who, if possible, should be "kept within the family circle." Warning was given against "widespread reliance on artificial means of responding to the restlessness of the age," e.g. gambling, excessive drinking, and drugs.

[The appropriate Committee had considered and condemned two contemporary controversial practices—artificial insemination (see 16109 A) and sterilization—but neither was dealt with by Resolution. As regards polygamy, it was suggested that the whole problem should be referred to the Advisory Council on Missionary Strategy.]

The Conference proceedings were concluded with a service in Westminster Abbey on Aug. 10, when the address was given by the Presiding Bishop of the Protestant Episcopal Church of the U.S.A. (the Right Rev. Henry Knox Sherrill).

Dr. Sherrill said that "at no time since 1914" had there been "a period of tranquillity," with the result that "society and individuals" had been subjected to a "tremendous strain" with which he doubted whether the Church had been "sufficiently or effectively concerned." Urging "a temper of mind which, with due reverence for the past, had courage to be contemporary," he declared that "many ecclesiastical meetings, discussions, and even controversies were irrelevant to the vital issues of our times"—a fact which was recognized by the "blessed common-sense" of ordinary people, who readily distinguished between "the vital and the secondary." Bishops were "not only administrators, but shepherds" for whom there could be "no substitute for personal contact," and during the Conference they had succeeded in discussing human and international problems "with a deep sense of pastoral concern."

Lambeth Invitation to Archbishop Makarios.

It was stated at Lambeth Palace on May 21 that Archbishop Makarios of Cyprus had been invited to attend the Lambeth Conference. This information aroused considerable public criticism, expressed in the Press as well as in Parliament, because of the Archbishop's persistent failure to condemn the Eoka terrorist campaign in Cyprus.

The Archbishop of Canterbury, in a statement issued on May 22, explained that in this matter he had not acted "as an official of the Church of England as such, but as the chairman of a Conference drawn from many countries and many races entirely outside the English political scene." The invitation in question had resulted "from an exclusively ecclesiastical decision" without any political significance, and the Government departments concerned, who had been informed "several months before," had regarded it as such

Dr. Fisher added that it was customary to invite to the Conference leaders of certain Churches in Europe, with which the Anglican Communion had "fraternal relations," as guests and observers, and Archbishop Makarios had been included as the representative of the Eastern Orthodox Church in Cyprus. Other Patriarchs of that Church in Istanbul, Athens, Antioch, Jerusalem, Alexandria, Moscow, Bulgaria, and Rumania had been similarly invited, and to have omitted the representative of the Church of Cyprus "would have been interpreted by the other Orthodox Churches not as an ecclesiastical, but as a political action."

Archbishop Makarios announced his acceptance of the Lambeth invitation on June 3. In the House of Lords on June 17 Lord Teviot urged the Government to prevent the Archbishop's admission to the U.K., "in view of the past and present activities of Archbishop Makarios and the distress caused to many of our people who are mourning relatives murdered in Cyprus." The Secretary for Commonwealth Relations (Lord Home) pointed out, however, that the Archbishop "enjoyed the normal rights of a citizen of the U.K. and Colonies," and that H.M. Government had no power to exclude him.

During a BBC interview on June 25, Dr. Fisher distinguished between his official and personal attitudes towards Archbishop Makarios, and added: "I know as well as anybody what a bad character he is." On the following day Archbishop Makarios sent a message to Lambeth Palace saying that he would be unable to attend the Conference because of "other commitments."

The Primate of Greece, Archbishop Theoklitos, announced in Athens on June 27 that no representative of the Eastern Orthodox Church in Greece would attend the Conference, as a protest against Dr. Fisher's "most improper language" and "public attack" on Archbishop Makarios; on the following day the delegation from the Patriarchate of Alexandria was recalled on similar grounds. The text of a telegram sent by Dr. Fisher to the Primate of Greece in reply was released on July 5. In this the Archbishop of Canterbury expressed "sincere regret" at having used an "unpremeditated phrase," and explained that his criticism of Archbishop Makarios—"whose ecclesiastical office" he "highly honoured"—had been "confined strictly to certain political aspects" and had "expressly excluded reflections on his personal character."

Despite this controversy the Greek Orthodox Church was represented at the Conference by its permanent representative in London, Archbishop Athenagoras of Thyateira, in his capacity as representative of the Patriarchate of Constantinople.—(Lambeth Conference Report - Church Times - Times - Daily Telegraph - Manchester Guardian) **(1948 Lambeth Conference, 9591 A; Closer Relations with Methodists and Presbyterians, 15718 A; Attitude to Nuclear Tests, 15540 A; Attitude to A.I.D., 16109 A.)**

Note. The first Lambeth Conference was held in 1867; thereafter it was to be convened every 10 years, but this sequence had been upset by the two World Wars. The last two Conferences had been held in 1948 and 1930.

A. EASTERN GERMANY - UNITED ARAB REPUBLIC. — Economic and Technical and Scientific Co-operation Agreements.

It was officially announced in East Berlin and Cairo on Aug. 29 that, following discussions by a U.A.R. delegation in Berlin, agreements on (i) economic and technical and (ii) scientific co-operation had been signed between the German Democratic Republic and the United Arab Republic.

The agreements provided (*a*) that Eastern Germany would grant to the U.A.R. a credit of £E 7,500,000 for the long-term supply to the latter country of complete industrial installations and equipment, as well as of other engineering products; (*b*) that Eastern Germany would assist in the industrialization of the U.A.R. through the despatch of specialists; and (*c*) that Egyptian scientists and technicians would be enabled to study at East German universities and to receive practical training in East German factories and institutes.—(Neues Deutschland, East Berlin - Le Monde, Paris)

B. FRENCH AFRICA. — Presidency of Territorial Executive Councils transferred from Governors to Former Vice-Presidents. - New High Commissioners for French West and Equatorial Africa.

The French Government decided on July 24 to transfer the presidency of all the territorial Executive Councils (*conseils de gouvernement*) in French West Africa, French Equatorial Africa, and Madagascar to their former Vice-Presidents, who would henceforth be known as Presidents.

Under the provisions of the *loi-cadre* for the overseas territories of June 23, 1956, and the decrees implementing it, the Executive Councils in the various French African territories had hitherto been presided over by the respective Governors as the chief representatives of the French Republic. The Vice-Presidents elected by the Territorial Assemblies formed under the *loi-cadre*—had previously exercised only restricted prerogatives, such as presiding in the Governor's absence, advising the Governor on the distribution of portfolios, and offering the collective resignation of the Council's members if they had lost the confidence of the Territorial Assembly.

The reform now introduced meant that the Governors would in future only take part in the deliberations of the Territorial Councils, and assume the chairmanship, when questions relating to foreign affairs, defence, justice, Customs, posts and telegraphs, and other items reserved to the French Government were discussed. For the consideration of all other matters, however, the Councils would meet under the chairmanship of their elected Presidents, the title of Vice-President being abolished.

M. Jacques Soustelle, the French Minister of Information, stressed the importance of the Cabinet's decision and pointed out that it was a further step towards the new status which the overseas territories would gain under the new Constitution and in accordance with the choice to be made by their electorate in the forthcoming referendum.

Previously it had been announced on July 15 that the French Government had decided to appoint M. Pierre Messmer High Commissioner in French West Africa, in succession to M. Gaston Cusin. M. Messmer had hitherto been High Commissioner in French Equatorial Africa, in which post he was succeeded by M. Yvon Bourges, Governor of Upper Volta. Both M. Messmer and M. Bourges had over a long period co-operated with M. Cornut-Gentille, High Commissioner in French Equatorial Africa from 1958-51, and in French West Africa from 1951-56, and now Minister for *France d'outre-mer* in General de Gaulle's Cabinet.—(Le Monde, Paris)

(Prev. rep., Loi-cadre, 15585 A)

C. UNITED KINGDOM. — Higher Status for Export Credits Department.

The Board of Trade announced on Aug. 12 that, on the recommendation of a committee under the chairmanship of Sir Eric Speed, it had been decided to raise the status of the Export Credits Guarantee Department and to make substantial changes in its organization and senior staff. Furthermore, the functions of the Export Guarantees Advisory Council would be extended to include advising on general policy.

The committee, whose report had been largely concerned with "detailed matters of organization," had made two major recommendations:

(1) It rejected the suggestion, widely made at one time, that export credit insurance should be conducted through a statutory public corporation, as was the case in some other countries. It concluded that the work should go on being done by a Government department "because of its use of public funds, its relation to the broader aspects of economic policy, and its dependence on information from Government sources."

(2) While the committee recognized that "the highly developed and comprehensive facilities enjoyed by British exporters had been administered wisely and with competence," the business done by the department had increased tenfold since 1946, and it was time it was upgraded in its status within the hierarchy of Government departments. An increase in its senior staff would allow senior posts to be filled "from a wider field of experienced administrators."

It was announced that in implementation of these recommendations the senior official in charge of the Department, hitherto known as Comptroller-General, would in future have the designation of Secretary, and would be responsible directly to the President of the Board of Trade. Mr. L. J. Menzies, one of the advisers to the Governors of the Bank of England, who had for many years been actively engaged in foreign exchange operations and policy, had been appointed Secretary, would take over on Oct. 6, and would be in charge of the post "for two or three years." There would also be two new Under-Secretaries, while the present Comptroller-General (Mr. R. H. Owen) would be transferred to another official appointment. (Times - Daily Telegraph - Manchester Guardian - Board of Trade Journal - Financial Times) **(Prev. rep. Export Credits Guarantee Dept., 14956 A; 12558 A)**

A. ITALY. — Signor Fanfani's Policy Statement. - Parliamentary Votes of Confidence. - Signor Fanfani's Visits to Washington, London, Bonn, and Paris.

The Government of Signor Fanfani received a vote of confidence in the Senate on July 12 by 128 votes to 111, with two abstentions, and in the Chamber of Deputies on July 19 by 295 votes to 287, with nine abstentions and four deputies not taking part in the division. In both Houses the left-wing and right-wing parties, as well as the Liberals, all voted against the Government, which was only supported by the Christian Democrats and the Social Democrats led by Signor Saragat. In the Chamber, however, the six Republicans, the three members of the South Tirol People's Party, and the deputy representing the Val d'Aosta abstained, thus giving the Government the slender majority of eight votes. The two abstentions in the Senate were also by the representatives for the Val d'Aosta and South Tirol.

The full voting figures for the Chamber were: For the Government—272 Christian Democrats, 22 Social Democrats, and Signor Olivetti (*Communità* movement) Against the Government—139 Communists, 83 left-wing (Nenni) Socialists, 24 Neo-Fascists (Italian Social Movement), 17 Liberals, 14 Popular Monarchists, and 10 National Monarchists.

In his statement, which he read in both Houses on July 9 prior to the debates on the Government's policy, Signor Fanfani outlined his programme as follows:

Foreign Policy. After affirming his Government's faithful adherence to the Atlantic and European Community treaties, Signor Fanfani declared that they would direct their efforts towards the achievement of European political unity by means of direct elections in all member-countries to the European Parliamentary Assembly. He added, however, that in the Italian view the member-countries, both of the European Community and the Atlantic Alliance, had not yet entirely fulfilled their obligations. "Italy demands," he added, "that in the interest of the permanent defence of their common security and of a lasting solidarity, all problems of any member-country which might affect common obligations should be discussed in advance."

Defining Italy's position "within the regional framework," Signor Fanfani said that of her four neighbours, France was an ally with whom they had restored a fruitful and active friendship, whilst Switzerland, Austria, and Yugoslavia were either neutrals by right or were aiming at achieving that status, and Italy "favours their neutrality." He undertook to consolidate Italy's links with her Mediterranean neighbours—Greece, Turkey, and Spain—and added: "The Arab countries of the Middle East and North Africa, as well as Israel, maintain friendly relations with us and we wish to make these still more active, thus widening the sphere of prosperity while at the same time consolidating freedom along the Mediterranean shores. We are confident that the conflicts which still upset certain areas are approaching their end and that peace with order and justice will return for the benefit of all."

Internal Policy. Dealing with Church-State relations, Signor Fanfani declared that while the autonomy of the State would be protected, the Lateran Treaties would be respected, and expressed complete confidence that these treaties would continue to be likewise respected by the Church authorities.

Internal reforms would include, *inter alia*, the abolition of remaining Fascist laws; legislation laying down the procedure for a referendum; the further gradual implementation of the regional system; Senate reform (including the introduction of terms of equal length for both Chambers), parliamentary control over State activities not covered by the Budget; and a 10-year educational plan involving an expenditure of about 800,000,000,000 lire (about £460,000,000).

Social Legislation. The Government would take steps against the danger of a recession. The effectiveness of collective agreements would be legally recognized; there would be a reform of social insurance; and financial and technical provision would be made for an extension of small landholdings, particularly by splitting up large estates (*latifondi*) and middlemen's holdings (*mezzadrili*) and by assisting depressed mountain areas.

Economic Legislation. The Prime Minister announced that legislation would be introduced (*a*) against monopolies and financial chain organizations; (*b*) for the concentration in one public agency of all State-owned enterprises or of State participations in the energy sector; (*c*) for a further extension of the term of the *Cassa del Mezzogiorno* (the Government agency for the administration of the development plan for Southern Italy); and (*d*) for agricultural development schemes in which it would be stipulated that improvements must be carried out by the beneficiaries within a fixed period, under threat of expropriation in the event of non-fulfilment.

Taxation Policy. There would be severe measures against tax evasion; more direct taxation; and, as regards indirect taxes, greater discrimination between consumer goods of an essential nature and luxuries.

Following the confidence votes, Signor Fanfani visited Washington, London, Bonn, and Paris for discussions with the U.S., British, German Federal, and French Governments. As his visits coincided with the recent Middle East crisis an important part of his talks was devoted to this problem. In this connexion it was reported in the international Press that Signor Fanfani had informally suggested a three-point "plan" aimed at bringing about greater political stability and better economic conditons in the Middle East area. The three aspects of Signor Fanfani's suggestions were summarized as follows:

(1) The great Powers should undertake to respect and guarantee mutually the territorial integrity of the Middle East countries and the present political *status quo*, such an agreement to be concluded under the auspices of the United Nations;

(2) The countries belonging geographically to the Middle East region, the majority of whom were members of the Arab League, should on their part undertake in a separate agreement to abstain mutually from all interference in each other's internal affairs, and notably to end any hostile propaganda against each other by means of the Press or the radio,

(3) The economic development of the Middle East would be financed by a kind of international corporation which could be joined by any country with sufficient resources and credit, Italy being willing for her part to contribute financially to a fund of this kind.

Visit to the U.S.A.

Signor Fanfani arrived in Washington on July 28, and on July 29-30 had discussions with President Eisenhower and Mr. Dulles.

A joint statement issued on July 30 said that the President and Signor Fanfani had discussed "a wide range of topics of mutual interest" and had "examined in an atmosphere of friendship and understanding the present world situation, including the Middle East and the problems surrounding a possible meeting of Heads of Government within the framework of the U.N." They had "found themselves in satisfactory accord" on the recent developments in the Middle East, and "also agreed on the importance of the position of Italy with respect to her interests in the Mediterranean and in the Middle East, and hence on the importance of ensuring means whereby Italy's views might be taken into account on a continuing basis." They had arranged "to remain in close contact."

After reaffirming "that the combined strength and co-ordinated action of the free and independent countries of the North Atlantic Alliance" were "vital to the peace and security of both countries" and would remain the "corner-stone of their foreign policies," the communiqué went on: "The President and the Secretary of State [Mr. Dulles] expressed full recognition of the contribution being made by Italy in the development of closer political and economic association between the countries of Europe for the purpose of improving the well-being of their peoples. The Prime Minister outlined the programme he proposed with regard to his country's economic problems, including foreign trade. The U.S. representatives expressed their appreciation and their confidence that increased economic ties between the United States and Italy might contribute favourably to this programme."

During his stay Signor Fanfani also addressed both Houses of Congress and spoke at a luncheon of the National Press Club. In his latter address Signor Fanfani said, *inter alia*, that in the Italian view "the explosions of nationalism" in the Middle East region were "not exclusively due to certain well-known foreign influences"; they were "historical movements" and it was "essential that they should not be exploited by Communist propaganda." The problems in the area were "essentially economic," and, "taking account of the important progress already achieved by the Arab nations," the Italian Government and people were "willing to contribute to the working out and implementation of any plan for the development of the Middle East."

Visit to Britain.

From Washington Signor Fanfani flew to London, where he had discussions on Aug. 1 with Mr. Macmillan, Mr. Selwyn Lloyd, and Mr. Maudling (Paymaster-General, in charge of negotiations for a European Free Trade Area).

A communiqué issued on Aug. 1 said that the Ministers were "highly gratified with the result of their consultations, which reflected the traditional friendship between the two countries and covered the whole field of international affairs, with particular reference to the Middle East, a high-level meeting of the Security Council, and the proposed European Free Trade Area."

It was understood that Signor Fanfani had explained to the British Ministers his Government's plans for joint economic development in the Middle East, concurrent with an attempt at a general political settlement after tackling the Lebanon and Jordan issues. As regards the European Free Trade Area, both countries were agreed on the desirability of seeing such an area established without delay.

Visit to Western Germany.

On Aug. 2 Signor Fanfani arrived in Bonn, where he had discussions with the Federal Chancellor, Dr. Adenauer. A communiqué issued afterwards emphasized the importance of mutual consultations as a condition for an effective improvement of the international situation and international relations.

Visit to France.

The Italian Prime Minister completed his tour of Western capitals by visiting Paris on Aug. 7-8. During his stay he conferred with General de Gaulle and the French Foreign Minister, M. Couve de Murville, who had previously visited Rome for discussions with Signor Fanfani on July 27. Signor Fanfani also visited Allied Supreme Headquarters and reviewed with General Norstad, the Allied Supreme Commander, the military situation and Italy's contribution to the alliance.

A joint statement issued on Aug. 8 said that it was "the wish of the two Governments to consult each other in an increasingly regular and close manner," and that the talks, which had dealt with "the international situation in general and the Middle East in particular," had been marked by "a spirit of friendship and confidence" and had shown "the identity of the two Governments' points of view."

It was unofficially reported that, as in the other Western capitals, Signor Fanfani had explained his views about the Middle East, emphasizing the need to take the existence of Arab nationalism into account, the importance of ceasing to pretend that the Soviet Union had no interest in the Middle East, and the folly of trying to keep her at arms length in that area.

Between his return from Bonn and his visit to Paris, Signor Fanfani had talks with M. Spaak, the Secretary-General of NATO, who had come to Rome on Aug. 5, a communiqué saying that there had been "a complete identity of views" on all problems discussed.—(Corriere d'Informazione and Corriere della Sera, Milan - Giornale d'Italia, Rome - New York Times - Times - Daily Telegraph - Frankfurter Allgemeine Zeitung - Le Monde, Paris) **(Prev. rep. 16267 A.)**

A. SWEDEN. — Defence. - Order for British "Bloodhound" Missiles.

It was announced in Bristol and Stockholm on Sept. 23 that the Royal Swedish Air Board had placed an order with Bristol Aircraft Limited for the Bristol-Ferranti *Bloodhound* ground-to-air guided weapon system. The size of the order, which was placed after a full examination of the technical merits of all available surface-to-air guided missile systems, was not disclosed.

The *Bloodhound*, which is now going into service with the R.A.F. as its first surface-to-air guided weapon, was described as the "longest range semi-active homing missile in the free world." With radar equipment, control posts, and launchers for the missiles themselves, it constitutes a complete and largely automatic defence system which is self-contained except for the need to receive early warning. Equipped with four rocket booster motors to provide the initial thrust and accelerate it to supersonic speed, the *Bloodhound* is afterwards propelled by two Bristol *Thor*-type ramjet engines. It was stated that the *Bloodhound* was in quantity production and was at present completing acceptance trials in Australia.

By placing the order Sweden became the first oversea country to select a British guided weapons system.—(Times - Daily Telegraph - Svenska Dagbladet, Stockholm)

B. ITALY. — Contracts for British and American-built Atomic Power Stations in Southern Italy.

The contract between the Nuclear Power Plant Company of Knutsford (Cheshire) and the *Società Italiana Meridionale Energia Atomica* (SIMEA)—a subsidiary of *AGIP Nucleare*—for the construction of a 200-megawatt nuclear power station of the Calder Hall type at Latina, 50 miles south of Rome, was signed in Geneva on Aug. 31. The contract, worth over £10,000,000 for British industry, was the outcome of the agreement signed in London last May by Signor Enrico Mattei and Sir Claude Gibb, Britain thereby becoming the first country to export a nuclear power station anywhere in the world.

It was announced in Rome on Sept. 25 by the *Società Electronucleare Nazionale* (a firm formed by a group of Italian electricity companies) that it had awarded a contract for the construction of a 150-megawatt nuclear power plant to the International General Electric Company of the U.S.A. The station—the second to be built in Italy—would be constructed on the River Garigliano, near Naples; would have a boiling water, enriched uranium reactor; and was expected to be partly financed through a loan from the International Bank.

The bidding for the contract, in which several British, French, and U.S. firms took part, was held under the auspices of the International Bank and the Italian Government. International General Electric is a subsidiary of the General Electric Company which is at present building a similar atomic power plant at Dresden (Illinois).

It was stated in Rome that 70 per cent of the component parts of the plant would be built in Italy.—(Giornale d'Italia, Rome - Times - Daily Telegraph - New York Times - New York Herald Tribune) **(Prev. rep. 16162 A.)**

C. SOVIET UNION. — M. Khrushchev's Proposals for Reform of Educational System. - Compulsory Industrial and Agricultural Work for Students.

A memorandum by M. Khrushchev proposing radical changes in the Soviet educational system was published on Sept. 21, after endorsement by the Central Committee of the Soviet Communist Party. In brief, it proposed that the present ten-year system of general education (starting at the age of seven) should be replaced by an eight-year system, followed by two years in a factory or collective farm before the student could proceed to a university or other institution of higher learning. University students would also be called upon to spend two or three years in "productive work" before graduation. M. Khrushchev urged that these proposals should be the subject of "broad discussions" by Government and party organizations and in the Press, after which the necessary legislative action should be taken by the Union Republics.

In presenting these proposals, M. Khrushchev admitted the existence of many shortcomings in the present educational system, notably the following: (*a*) as a result of "important influence by parents," many children were admitted to secondary schools despite the fact that they had done badly in the entrance examinations; (*b*) parents were holding out before the children the "bogy" that they would become "ordinary workers" unless they did well at school—an attitude which was "an insult to workers in a socialist society"; (*c*) many students completing the 10-year educational course (i.e. secondary-school leavers) went "unwillingly" to work in factories and collective farms, considering such work as "beneath their dignity"; (*d*) in the universities, children of workers and collective farmers constituted only a small proportion of the student body (in Moscow only 30 to 40 per cent), whereas children of professional and intellectual workers, etc., were in a preponderant majority. All this meant that the schools and universities were becoming "divorced from life," and it was therefore necessary that every student should do "socially useful labour" without any exception, irrespective of "the positions of their parents in society."

M. Khrushchev proposed that the 10-year educational system should be replaced by a new system divided into two stages—a first stage of general education, compulsory for all and lasting seven or eight years; followed by a second stage of two years' vocational training in town or countryside. Alternatively, students completing their seven or eight years' general education could work at the "point of production" (i.e. in factories or collective farms in their district) while simultaneously taking vocational training courses at evening or correspondence schools; pupils who successfully combined study and work should be given leave from their jobs to study for two or three days a week. A great expansion in the system of evening and correspondence schools would enable everyone to acquire a complete secondary education and subsequently a higher education; to avoid overtaxing the strength of pupils, study courses in such schools should last three or four years. As an exception, there should be appropriate secondary schools for children of outstanding ability (e.g. in mathematics, the arts, or music) to enable them to acquire an education necessary for the continuation of their studies at institutions of higher learning. A transitional period of three or four years would be necessary to carry out this reorganization, during which time many of the 10-year schools now functioning would have to be retained.

As regards admissions to institutions of higher learning (e.g. universities), M. Khrushchev suggested that students enrolled should have "a record of practical work" in addition to the necessary scholastic attainments. Moreover, admission to universities should be based not only on scholastic attainments but also on the recommendation of such organizations as the trade unions and the Young Communist League. Students admitted to institutions of higher learning should continue at their jobs in industry and agriculture during the first two years of tuition; in the third year they should be given leave from their jobs to study for two or three days a week, and only in the last two years would they be full-time students.

The *Manchester Guardian* correspondent on Soviet affairs (Mr. Victor Zorza) wrote as follows on M. Khrushchev's recommendation concerning political and trade union approval for admission to institutions of higher education: "In this way presumably M. Khrushchev hopes to prevent the admission into the universities of the children of the new 'middle class' whose social and political pretensions in the past few years have led to the emergence in the universities of 'opposition' trends . . . As in other societies, the children of professional people and intellectuals have gravitated to the universities, in this way tending to perpetuate the new social divisions which have emerged in Russia since the Revolution. This 'new class' has acquired enough power to question, if not to oppose, the policies of the Communist party, and M. Khrushchev wishes to do away with it by the method outlined." (Times - Manchester Guardian - Soviet Embassy Press Department, London) **(16014 A; 15899 A; 15119 A.)**

OCTOBER 4—11, 1958

A. ORGANIZATION OF AMERICAN STATES. — Foreign Ministers' Meeting in Washington. - Setting-up of Inter-American Economic Development Institution. - Increased Economic Co-operation between Member-countries. - Mr. Dulles's Visit to Brazil. - President Kubitschek's Proposals for "Operation Pan-America."

A meeting of the Foreign Ministers of the 20 Latin American Republics and the U.S.A. was held in Washington on Sept.23-24 to discuss "inter-American relations and problems, particularly those of an economic nature, and to review the international scene." A communiqué issued on Sept. 24 announced that it had been agreed (1) to set up an inter-American economic development institution; (2) to intensify efforts to establish regional markets in Latin America; (3) that the Council of the Organization of American States should set up a special commission to examine various proposals for economic co-operation and development; (4) that urgent efforts should be made to solve the problem of commodities basic to the economy of certain Latin American countries.

The essential parts of the communiqué issued by the 21 Foreign Ministers after their Washington meeting were as follows:

"The Ministers recognize that in the history of the world the solidarity of the American States has been of great importance. They reaffirm that solidarity, which is founded on the principles of the Charter of the Organization.

"The present period of evolutionary change in the political, economic, and social structure of society calls for a renewed dedication to the inter-American ideals of independence, political liberty, and economic and cultural progress, and for a reaffirmation of the faith of the American nations in their capacity to proceed dynamically toward the realization of those high ideals.

"The Ministers are confident that their exchange of views and informal conversations will have fruitful results. They agree to recommend that their Governments instruct their representatives on the Council of the Organization of American States to consider the desirability of holding more frequently similar informal meetings of Foreign Ministers and other high-ranking government representatives.

"The Ministers are of the opinion that, in keeping with the aspirations and needs of the peoples of America, . . . action to promote the greatest possible economic development of the Continent must be intensified. They are certain that a harmonious and carefully planned joint effort to that end will contribute enormously to strengthening the solidarity of the hemisphere and to the well-being of all Americans.

"The Foreign Ministers are deeply gratified at the affirmation, made by President Eisenhower, that the U.S. Government is prepared to lend its full co-operation in achieving concrete results in the common effort to promote the economic development of the American countries . . .

"They furthermore consider that this is the proper time to review and strengthen inter-American co-operation in the economic field, as has been suggested by President Kubitschek of Brazil and in the proposals of various American Governments

"The Ministers recommend that, during the coming period before the 11th inter-American conference, special attention be given to working out additional measures of economic co-operation, taking as the point of departure the proposals by the Government of Brazil in its memorandum of Aug. 9, 1958, concerning the plan known as 'Operation Pan-America' [i.e. the proposals referred to on page 16378], any other specific proposals that the other Governments of the Republics of the hemisphere may wish to submit in connexion with the . . . promotion of economic development, and the following proposal by the Argentine Foreign Minister: 'Preparation and immediate execution of a broad hemispheric programme to train experts for economic development in the fields of engineering, agronomy, industrial engineering, economics, public administration, and business administration.'"

"For this purpose, and to facilitate other informal talks, the Ministers are of the opinion that the Council of the O.A.S. should set up a special commission of the Council on which the Governments of the 21 American Republics would be represented. As the commission reaches conclusions regarding measures that might be taken, it should submit its reports to the Council of the Organization. Then the necessary action may be taken to have those proposals or measures carried out through the organs of the Organization, or directly by the Governments, as may be appropriate.

"The Ministers are also of the opinion that practical measures may be taken now in connexion with certain specific proposals. These are:

(1) The establishment of an Inter-American economic development institution in which all the American countries would participate. For this purpose the Inter-American Economic and Social Council should convene as soon as possible a specialized committee of Government representatives, as recommended by the Buenos Aires economic conference [see below]. It is recommended that this committee meet in continuous session until it completes draft articles of the agreement for the proposed institution, which will be signed at a later date.

(2) Intensification of efforts to establish regional markets in Latin America. It would be well for the Governments directly concerned and the international organizations directly interested, chiefly the Organization of American States, the Economic Commission for Latin America, and the Organization of Central American States, to expedite their studies and recommendations on concrete measures directed toward the establishment of regional markets in Central and South America. The Ministers suggest that a report on this important project be submitted to the members of the O.A.S. not later than the 11th inter-American conference. In this connexion the Ministers note that the U.S. Government has made known that it is prepared to assist financially in the establishment of solvent industries, through appropriate agencies, under suitable conditions, with a view to promoting enjoyment of the benefits of regional markets through public and private investment.

"The Ministers again express their constant concern about the problems of markets for basic products. They are in agreement that the economic structure of the majority of the American Republics requires that solutions to these problems be sought urgently, for which purpose consultations should be carried out between the interested members of the O.A.S., on bilateral and multilateral bases, as well as with the producer and consumer countries of other geographic areas . . ."

The meeting of the 21 Foreign Ministers followed the incidents during Vice-President Nixon's visit to Latin American countries earlier in the year, and the subsequent proposal by President Kubitschek of Brazil to President Eisenhower suggesting that steps be taken to repair inter-American relations [see 16377 A]. It had been preceded by Mr. Dulles's visit to Brazil on Aug. 4-5 during which the U.S. Secretary of State had long discussions with President Kubitschek, Senhor Negrão de Lima (the Brazilian Foreign Minister), and Senhor Lucas Lopes, the Minister of Finance.

A joint communiqué issued at the conclusion of the talks stated that the Brazilian statesmen and Mr. Dulles had exchanged views "about the international situation and those problems relating to the movement of hemispheric unity which President Kubitschek has called 'Operation Pan-America.'"

As a result of the "frank and cordial" talks (the communiqué went on) the two Governments had (i) reaffirmed their determination to carry out all obligations under the Charter of the Organization of American States; (ii) expressed "complete agreement to seek formulation of policies designed not only to strengthen the defence of the values of Western civilization but also to give a greater creative momentum towards the attainment of this goal"; (iii) agreed that "Latin America has an important role to play among the nations of the world," and that it was "highly desirable that Latin America take an even more active part in formulating those broad international policies which guide the free world"; (iv) reiterated their conviction "that the strengthening of the American community requires among other measures dynamic efforts to overcome the problems of under-development . . . inseparable from the collective security of the hemisphere"; (v) reaffirmed "that it has become necessary to fight with determination for religious and democratic principles, for the right of nations to freedom, and for respect for man's individuality and dignity . . . now challenged by the greed of atheistic Communism"; (vi) reaffirmed their determination to "continue along the line of broader contact and consultation already successfully started among the American Republics"; (vii) agreed that both Governments should suggest to the other American Republics that their Foreign Ministers should meet at regular intervals in the framework of the O.A.S., "not just to deal with problems of immediate urgency but to discuss on a regular basis any and all problems of mutual concern, bearing in mind their common responsibilities when peace and freedom are threatened"; (viii) agreed that the consultation between their two countries should be continued.

A press statement issued by the Brazilian Foreign Office mentioned that specific questions affecting Brazilian-U.S. relations which had been discussed by Mr. Dulles, Senhor Negrão de Lima, and Senhor Lucas Lopes had included (i) the coffee situation and the measures aiming at achieving stability in the international coffee market, especially the continued support by both countries of the Coffee Study Group; (ii) Brazilian efforts to increase her oil production; (iii) problems connected with products of specific importance to the economy of certain areas of Brazil; (iv) the Brazilian economic development programme and the foreign exchange requirements to finance it.

The U.S. decision to support the setting-up of an inter-American economic development institution, and its willingness to consider the working-out of commodity agreements aimed at stabilizing prices of basic raw materials, constituted a complete reversal of earlier U.S. policies. It was partly due to the previous U.S. attitude that an inter-American economic conference which was held at Buenos Aires from Aug. 15 to Sept. 4, 1957, under the auspices of the Organization of American States, failed to agree on a general economic charter for the Americas and on the establishment of a new bank to aid Latin American economic development. The only two

major decisions adopted by that conference were the formulation of an "Economic Declaration of Buenos Aires" and a resolution calling for studies and proposals for the creation of a Latin American common market. Under the Economic Declaration of Buenos Aires the participating Governments reiterated their intention to increase the volume of trade and reduce trade barriers, to make a co-operative effort to solve the problems of producers of basic raw materials subject to excessive price fluctuations, to take measures to attract foreign capital and stimulate private investments, to establish sound financial and monetary systems in Latin America, and to increase technical co-operation through the Organization of American States. Another resolution which was approved (against U.S. objections) had directed the Inter-American Economic and Social Council to carry out studies looking towards international commodity agreements.—(New York Times - Brazilian Government Bulletin - Bank of London and South America Fortnightly Review) **(Prev. rep. 16377 A.)**

A. INDIA. — Oil Discovery in Bombay State.

The Indian Minister for Mines and Oil, Mr. K. D. Malaviya, announced in the *Lok Sabha* on Sept. 12 that oil had been discovered near Lunej Pin Point, at the head of the Gulf of Cambay in Bombay State.

He said that the oil had first been struck on Sept. 4 at a depth of 5,368 feet and that it had proved to be under considerable pressure. The Minister added that while there was "reason for cautious optimism" it would be necessary to continue further fairly intensified drilling and testing before it was certain whether a commercially exploitable oilfield had been struck; nevertheless, the discovery of oil in this hitherto neglected region had enormously increased the possibilities of the area. Mr. Malaviya stated on Sept. 16, after an inspection of the new oil-well at Lunej Pin Point, that explorations for oil would be intensified in the Cambay basin and that the investigations would include both drilling and intensified geophysical work.

The operations at Cambay are carried on by the Oil and Natural Gas Commission.—(The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. Oilfields, 16028 A.)

B. EUROPEAN COMMUNITIES. — Inauguration of Court of Justice.

The Court of Justice of the three European Communities—the European Coal and Steel Community, the European Economic Community (Common Market), and the European Atomic Energy Community (Euratom)—was officially inaugurated in Luxemburg on Oct. 7.

Professor A. M. Donner (Netherlands) had previously been appointed president of the Court, its other members being Signor N. Catalano (Italy), M. L. Delvaux (Belgium), M. Ch. L. Hammes (Luxemburg), Herr O. Riese (Western Germany), Signor R. Rossi (Italy), and M. J. Rueff (France). Except for Signori Catalano and Rossi, the judges had been members of the Court of Justice of the European Coal and Steel Community, which was replaced by the new Court.

M. L. Lagrange (France) and Herr M. Roemer (Western Germany), who had been Advocates-General at the E.C.S.C. Court, were appointed to the same post with the new Court. (High Authority of E.C.S.C., Luxemburg)

(Prev. rep. 15951 A.)

C. UNITED STATES - NEPAL. — Agreements on U.S.-Nepalese Economic Co-operation.

Agreements for U.S.-Nepalese co-operation in 10 major development projects were signed in Katmandu on May 31.

It was provided that the U.S.A. would contribute $1,880,400 and supplies worth about $346,000, while Nepal would contribute 4,000,000 Indian rupees ($800,000). The projects covered agricultural development, public works, the building of industrial development centres, erection of bridges, village developments, an anti-illiteracy campaign, training of teachers, public health services, and disease control, as well as prospecting for gold in Nepal's river valleys.

The new chief of the U.S. operations mission in Nepal (Mr. Russell Drake) stated on Sept. 28 that, under a recent revision of the general agreement covering U.S. aid to Nepal, the latter country had been given sole authority in the administration of projects, and Americans would be attached only as advisers with a status similar to that of the Indian aid mission; previously an American co-director had been attached to each aid project.—(New York Times - Times)

(Prev. rep. 15449 C; 14747 A.)

D. UNITED KINGDOM - UNITED STATES. — Ten-year Extension of Fulbright Agreement.

The Anglo-American Fulbright Agreement of Sept. 22, 1948, providing for the interchange of American and British students, teachers, and scholars, was extended for a further 10 years in a Note exchange between Mr Ormsby-Gore (Minister of State for Foreign Affairs) and Mr. John Hay Whitney (the U.S. Ambassador in London) on Sept. 22.

The agreement of 1948 was named after Senator J. W. Fulbright (Democratic Senator from Arkansas and a former Rhodes scholar), who persuaded Congress to agree that the proceeds of the sale of American surplus stores in Britain and other countries should be used to finance an interchange of students, teachers, and scholars. This principle was laid down in U.S. legislation, and agreements with over 30 Governments were subsequently concluded to implement it.

It was stated that during the first 10 years of the Anglo-American agreement, 3,400 British applicants had received awards covering their travel expenses to enable them, with the help of other grants or through scholarships, to spend a year at American universities. A total of 3,100 American students and teachers (including 150 students annually) were enabled to carry out post-graduate studies at British universities, the grants in their cases covering all expenses. Other activities covered by the agreement include awards to U.S. lecturers and scholars who wish to work for a year in British colonial territories, the grant of travel expenses for British scholars who wish to visit the U.S.A.; grants for exchanges in music, drama, sculpture, and librarianship; contacts between British and U.S. social workers; and the sponsoring, with the help of the Rockefeller Foundation, of American studies conferences in Britain, the first of which was held at Cambridge in 1952. The amount made available annually for this interchange is about £357,000.

The agreement is administered by the United States Educational Commission in the United Kingdom, which consists of seven U.S. citizens appointed by the American Ambassador (who is himself honorary chairman of the Commission) and seven U.K. citizens appointed by the Foreign Secretary. The Commission is not, however, concerned with the selection of American scholars for work in British universities. - (Times - Daily Telegraph - New York Times)

E. SOUTH AFRICA. — Report of Decimal Coinage Commission. - Introduction of Decimal Coinage recommended.

The report of the Decimal Coinage Commission was tabled in the South African House of Assembly on Sept. 10. The majority of the Commission, comprising both Nationalist and Opposition members, recommended the introduction of a decimal system, with a basic unit equivalent to 10s. and divided into 100 cents (each having a value of 1.2d). There should be silver coins of 50, 20, 10, 5, and 2½ cents, and bronze coins of ½ and ¼ cent.

Of the 75 opinions received by the Commission, 56 (including the five big banks) were in favour of making the main currency unit equivalent in value to 10s. Only eight advocated a main unit equal to the pound (also to be divided into 100 cents), although the sponsors of such a reform included the Revenue Department, the Railways, the Chambers of Commerce, and the Life Assurance offices. The gold mines favoured the pound system, but divided into 1,000 mils.

The Commission said that the factual information incorporated in the report was based on the assumption that the official date of the introduction of the new system would be in February 1961, and that the entire task of machine conversion would be completed by September 1962. It recommended, therefore, that the Government should announce its decision before the end of 1958, and legislate early in 1959. It also suggested that there should be a two-year conversion period during which the present currency system [which is identical with the British system] would remain in force.

It was estimated that the new currency system would cost the Government £9,171,000, including £8,666,000 in compensation to machine companies and owners of machines such as adding machines, electric petrol pumps, cash registers, and price-computing scales.

Among the names suggested for the new currency unit are kruger, gulde, rand, daalder, and kasteel.—(State Information Department, Pretoria - Cape Times) **(Prev. rep. 14804 E.)**

F. CHRISTMAS ISLAND (Indian Ocean). — Transfer to Australian Sovereignty.

Christmas Island, in the Indian Ocean, became Australian territory on Oct. 1 under an Order-in-Council of Sept. 15 providing for the transfer of the administration of the island from the United Kingdom to the Commonwealth of Australia. Australian legislation authorizing Australian acceptance of the island had been passed by both Houses of the Australian Parliament towards the end of August. The earlier Australian legislation referred to in 16189 A had merely requested the transfer and provided for parliamentary consent to the steps constitutionally needed to bring it about.—(Daily Telegraph - Manchester Guardian - Australian News and Information Bureau) **(Prev. rep. 16189 A.)**

A. NORTHERN RHODESIA. — New Constitutional Proposals. - Disagreement in Legislative Council.

Proposals for constitutional changes, dealing with franchise qualifications, representation in the Legislative Council, and the composition of the Executive Council, were published by the Northern Rhodesian Government as a White Paper on March 28. The recommendations, which represented the outcome of discussions between the Governor (Sir Arthur Benson) and all shades of European and African political opinion lasting over a year, are summarized below.

New Franchise. The Government's proposals were based on the consideration that "if the franchise were limited to Europeans and to those few Africans who have, at the moment, achieved European standards [i.e. in education and financial standing] the African race would be seriously under-represented." The opposing theories of dividing Northern Rhodesia into European and African territorial spheres of influence or of universal adult suffrage had both been rejected in favour of a scheme based on principles which had "found wide acceptance among informed local opinion of all parties," viz. (i) that politics should be encouraged to develop on party, not racial, lines; (ii) that racial representation should gradually give place to a "common voters' roll" As a first step, it was therefore proposed that there should be two voters' rolls—"general" and "special"; qualifications for inclusion in these rolls would be based on the requirements incorporated in the Federal Electoral Act of 1957 [see 15987 A and p 15783, col. 2], but the required standards of education and income would be set at a lower level for "specially qualified" voters than for those "ordinarily qualified." The next stage would be to raise the initially low qualification standards for "specially qualified" voters progressively over a period of ten years, in accordance with the anticipated African advance educationally and economically, until eventually they achieved parity with the "general" qualifications, thereby permitting the substitution of a single category of "ordinary" voters

Legislative Council. It was proposed that the Legislative Council should consist of a Speaker and 30 members two nominated by the Governor, six Colonial Office officials, and 22 elected (see below).

[The present Council (elected and nominated in 1954) consists of 8 official and 18 unofficial members. Of the latter, six represent African interests (two nominated Europeans and four Africans appointed by the African Representative Council), the other 12 are elected members, but the great majority of Africans had been excluded from voting by the existing franchise qualifications. In 1957 only 11 Africans were included in the electoral roll.]

Of the 22 members to be elected, 18 would represent 12 "ordinary" constituencies (covering the principal European residential districts) and six "special" constituencies (including the predominantly African areas) The "ordinary" constituencies would mainly comprise the Crown lands near the Rhodesian Railway, together with some Native Reserve and Native Trust land, and would contain approximately 18,000 "ordinary" and 17,000 "special" voters. The "special" constituencies would be chiefly rural districts away from the Rhodesian Railway, but including some small areas of Crown land, which were expected to provide 7,300 "special" and 1,100 "ordinary" voters.

In order to safeguard the principle that "no race need fear the domination of another," it was proposed (*a*) that all votes cast would be effective, provided that in "ordinary" constituencies the total of "special" votes did not exceed one-third of the "ordinary" votes; and similarly, that in "special" constituencies the "ordinary" votes were not more than one-third of the "special" votes; (*b*) that two additional seats should be reserved for Africans in the area of the 12 "ordinary" (predominantly European) constituencies, and two further seats for Europeans in the area of the six "special" (predominantly African) constituencies.

The two nominated members of the Council would be named by the Governor only after he had consulted with the leader of the party returned with the greatest number of seats; unlike the present nominated members, they would no longer represent specifically African interests.

Every voter would be entitled to two votes– one to count in full, and the other to be "devalued" in accordance with the proportions of "ordinary" and "special" voters in the constituency.

Executive Council. This would consist of nine Ministers (four *ex-officio* and five unofficial) with the Governor acting as President reversing the existing proportion of five official and four unofficial members. Four of the new Unofficial Ministers [i.e. without portfolio] would be required to be successful "ordinary" election candidates; two of them would each have the support of an Assistant Minister (the equivalent of a Parliamentary Secretary) working under him. At least one Unofficial Minister and one Assistant Minister would be Africans.

The White Paper justified the admitted "complexity" of the proposals by the requirements of Northern Rhodesia's "complex society," and claimed that the following advantages for the African would ensue: (i) the plan would be "a definite step away from racialism"; (ii) the balance between the Executive and Legislative Councils would be retained; (iii) Africans would be able to ensure representation on the Legislative Council by members of their own race, "so long as it matters to them"; (iv) "a clear path" would be set "for the development of full parliamentary government and self-government in partnership and co-operation."

Disagreement on Proposals in Legislative Council. - Mr. Lennox-Boyd on Implementation of Proposals.

During May and June the proposals were discussed at meetings of the seven African Provincial Councils, four of which passed motions rejecting them while another three, in the words of the U.K. Colonial Secretary (Mr. Lennox-Boyd), "welcomed certain aspects . . . while adversely criticizing others"

On July 11 the White Paper scheme was presented to the Legislative Council for discussion; the Speaker's ruling that this was "a complicated motion" necessitated each clause being voted upon separately and thus becoming subject to amendment. In the course of an eight-day debate, during which the scheme was attacked by the European and African members from entirely opposite viewpoints, 52 amendments were moved, 15 being adopted and 37 negatived. Two important substantive clauses were negatived against the votes of the official members: (*a*) the provision in the franchise proposals for a "second vote" and conditions for its valuation (see above), and (*b*) the composition of the Executive Council. As all groups in the Council agreed that failure to accept these two major points destroyed the balance and coherence of the plan as a whole, it was unanimously decided to delete the words "to recommend the foregoing proposals . . . as a balanced plan" from the final clause.

In view of these developments, the Governor and eight Legislative Council members left Lusaka for London on July 22 to submit the three fundamentally different standpoints to the Colonial Secretary. The all-party delegation consisted of the Chief Secretary to the Government (Mr. E. D. Hone), the Member for Lands and Local Government (Mr. J. H. Roberts, United Federal Party, leader of the unofficial members), the Member for Mines and Works (Mr. W. G. Dunlop, U.F.P.), the Member for Education and Social Services (Mr. H. Franklin), Mr. S. R. Malcolmson (U.F.P.), Mr. J. Gaunt (Ind.), and two African members, Mr. P. Sokota and Mr. S. H. Chileshe. The talks at the Colonial Office lasted until July 30, but no agreement was reached.

Despite these disagreements, Mr. Lennox-Boyd announced on Aug. 1, in the course of a debate in the British House of Commons, that he intended to proceed with the plans for constitutional reform in Northern Rhodesia, and that these would be introduced in two stages by two successive Orders-in-Council, viz :

(1) An Order, which would be made during the parliamentary recess, to enable the Northern Rhodesian Government to go ahead with the delimitation of constituencies and registration of voters;

(2) An Order, which would not be made until after the House had re-assembled in October, incorporating the remaining provisions of the scheme, including those for the holding of elections.

Mr. Lennox-Boyd explained that the first Order-in-Council would be tied to the second, but that the interval between them would enable M.P.s to consider the scheme as a whole, and to decide whether or not to press for a debate upon it. If Parliament approved the plan, "precious time in the summer" would be saved; if it did not, the only harm done would be "that a great deal of work by busy people in Northern Rhodesia will have been wasted." Since the life of the present Legislative Council was due to end on Jan. 19, 1959, and the law required that elections must be held within three months of that date, it was intended to introduce a new Constitution and wider franchise in time to operate at these elections.

The Colonial Secretary's statement was repeated in a dispatch to the Governor of Northern Rhodesia published in Lusaka on Sept. 11. This also contained several amendments to the original proposals of the Northern Rhodesian Government, notably (i) that the number of Unofficial Ministers in the Executive Council should be 6 and not 5, and that two of these should be Africans; (ii) that in the case of "ordinary" voters, whether European or African, their "second vote" should not be devalued (see above) in constituencies where they represented a minority.

Federal Government's Criticism of Proposals. - Rejection of Proposals by Africans and Dominion Party.

Strong criticism of the proposals sanctioned by the Colonial Secretary was expressed by Sir Roy Welensky, the Prime Minister of the Federation of Rhodesia and Nyasaland, in a statement on Sept. 18.

Speaking at a Press conference, Sir Roy Welensky said that "in only one respect has . . . Mr. Lennox-Boyd met the Federal Government's point of view," i.e. in the matter of devaluation of "second" votes. He particularly criticized the rejection of the Federal Government's claim that the Executive Council should have as its President not the Governor, but an elected Chief Minister, and that it should

"consist predominantly of Ministers of his own choosing." He also took exception to the proposed compulsory appointment of two African Ministers to the Executive Council, which he described as an "open application of the colour bar in reverse" and a "flat betrayal" of the Federal constitutional principle that in making any appointment "regard shall be had only to competence, experience, and suitability." Sir Roy described the proposals as a whole as "fundamentally unacceptable" because they represented "no advance towards responsible government," and said that so far from moving away from racial political bias, they were likely to perpetuate it. He suggested that Africans themselves would be disturbed by the fact that the two members of their race who would be appointed to the Executive Council would be Legislative Council members nominated by the Governor and without responsibility to any organized body of opinion, European or African.

After the arrival of the U.K. Home Secretary (Mr. Butler) on a private visit to the Rhodesian Federation, Sir Roy announced on Sept. 26 that he had "made representations at the highest level about the proposals for constitutional change in Northern Rhodesia," and had urged that these should be discussed at a conference between the Governments of the U.K., the Federation, and Northern Rhodesia. He said that it would be "improper" to reveal the nature of these representations, but disclosed that he had particularly protested against the lack of proper consultation with the Federal Government, which instead of being consulted during the discussions in which the proposals had been formulated, had "merely been invited to comment on the set proposals which were ready for publication."

Mr. Butler, before leaving Salisbury for London, said on Oct. 2 that Sir Roy had put the Federal Government's views "in a most reasonable and temperate manner, but with great strength." However, because of the present commitments of the Colonial Secretary and the Secretary for Commonwealth Relations, he (Mr. Butler) could make no pronouncement as to the likelihood of holding a conference, such as Sir Roy had proposed, until he had consulted his Cabinet colleagues.

Previously, Mr. J. Roberts (leader of the U.F.P. in Northern Rhodesia) had sent a cable to the Colonial Secretary on Sept. 16 urging him either to visit Northern Rhodesia for further discussions, or to give an assurance that he was prepared to reconsider the proposals. Mr. Lennox-Boyd had replied that though he was unable to make such a visit at the present time, he was willing to receive "further representations." Mr. Roberts had thereupon cabled a number of suggested amendments on behalf of the 10 U.F.P. members of the Legislative Council, adding, however, that pending Mr. Lennox-Boyd's further reply there would be no question of precipitating a "constitutional crisis" through the resignation of the three U.F.P. members of the Executive Council, as had been contemplated.

Mr. W. J. Field, Federal President of the Dominion Party (the official Opposition) also issued a statement during September saying that his party regarded the proposals as unacceptable.

"It is obvious," Mr Field said, "that the motive behind the changes is an attempt to obtain 'near parity' between Europeans and Africans," whereas Dominion Party principles insisted that "the basic qualification for the franchise should be a civilization test." He added that the qualifications proposed for "special" voters were so low that they "must result in almost half the voters' roll consisting of illiterates or semi-literates."

The African members of the Northern Rhodesian Legislative Council declared on Sept. 25 that they regarded the constitutional plans as "a betrayal of Africans to white settlers," and complained that their demands for "parity" in the Legislative and Executive Councils had been ignored. They added: "Europeans, who are a minority of the community, have no justification to continue dominating African interests ... Africans can administer just as well, if not better, than some of the European deadwood in the present Legislative Council." (Times - Daily Telegraph - Manchester Guardian - Federal Information Dept., Salisbury - Commonwealth Survey)

A. NETHERLANDS - WESTERN GERMANY. — Dutch Adherence to London Debts Agreement.

It was announced in Frankfurt and The Hague on Sept. 4 that the London agreement on German external debts had become effective for the Netherlands as from Aug. 1, following ratification by the Dutch States-General.—(Frankfurter Allgemeine Zeitung - Netherlands News Agency)

(Prev. rep. 12920 A.)

B. LONDON. — New Lord Mayor.

Sir Harold Gillett, Alderman of Bassishaw, was elected Lord Mayor of London at Guildhall on Sept. 29 for the civic year 1958-59, in succession to Sir Dennis Truscott. The new Lord Mayor is senior partner in the chartered accountants' firm of Dixon Wilson, Tubbs and Gillett.—(Times) **(15794 C.)**

C. AVIATION. — Inauguration of British "Comet IV" Service on London-New York Route. - New Trans-atlantic Record for West-to-East Flight.

The world's first transatlantic jet service was inaugurated on Oct 4 by the British Overseas Airways Corporation, using de Havilland *Comet IV* jet airliners. Two *Comets* crossed the Atlantic simultaneously in opposite directions on the London-New York route, a new transatlantic record being set up by the machine (*Delta Bravo*) flying on the west-to-east route.

Delta Bravo, commanded by Captain T. B. Stoney, flew from Idlewild (New York) to London Airport in the record time of six hours 12 minutes, averaging 580 m.p.h. for the 3,560-mile flight; taking off from Idlewild at 12.01 noon (G.M.T.), she touched down at London Airport at 6.13 p.m. The machine on the east-west flight (*Delta Charlie*, commanded by Captain Roy Millichap) flew from London to Idlewild in 10 hours 12 minutes, including a 70-minute stop at Gander (Newfoundland) for refuelling; the actual flying time was nine hours two minutes -viz., five hours 58 minutes from London to Gander (at an average speed of 420 m.p.h.) and three hours four minutes from Gander to Idlewild (average speed 370 m.p.h.), against headwinds of 52 to 80 m.p.h. Both flights were commercial, with fare-paying passengers on board. *Delta Bravo* carried 28 passengers (including Mr. Basil Smallpeice, managing director of B.O.A.C., and 23 British and American journalists) and a crew of 16, while *Delta Charlie* carried 31 passengers (including Sir Gerald d'Erlanger, chairman of B.O.A.C.) and a crew of 15.

B.O.A.C.'s *Comet IV* jet service to New York will be on a weekly basis in each direction until the second half of November, when daily services come into operation. Of the 19 *Comet IV's* ordered by B.O.A.C., four have already been delivered, and the next B.O.A.C. *Comet* route (London to Tokio *via* Hong Kong) will open in the spring of 1959. *Comets* will be introduced on the service to Australia later in 1959, and to South Africa probably in 1960.

By inaugurating the *Comet IV* transatlantic service on Oct. 4, B.O.A.C. beat their American rivals Pan-American Airways—as the first airline in the world to operate a regular transatlantic service with jet airliners. Pan-American Airways plan to start a service from New York to Paris and Rome using *Boeing-707* jet airliners--on Oct. 26, and a daily service from New York to London by mid-November.

In a message to Sir Geoffrey de Havilland hailing the *Comet IV's* achievement, Mr. Macmillan said that "the whole nation takes pride in the fact that a British aircraft has led the world." High tribute to the British achievement was also paid in the United States, the *New York Times* commenting that B.O.A.C. had "brought the commercial jet air age into reality."—(Times - Daily Telegraph - New York Times)

D. TUNISIA. — Agreement for Construction of Pipeline from Algerian Oilfields to Tunisian Coast.

The Tunisian *Journal Officiel* of July 9 published a Bill approving the conventions signed on June 30, 1958, by the Tunisian Government and the *Compagnie de Transports par Pipe-line* (Trapsa) for the construction of a pipeline carrying oil from the Edjelé oilfield in Algeria through Tunisian territory to the Gulf of Gabès, and laying down the conditions for its use. The Trapsa Company is a subsidiary of the French *Compagnie de Recherche et d'Exploitation de Pétrole au Sahara*, which is prospecting and exploiting the Edjelé oilwells in the Western Sahara. It was planned that the pipeline should be completed by the end of 1960 with an annual capacity of 5,000,000 tons of oil, to be increased later to 13,000,000 tons. (Le Monde, Paris) **(Prev. rep. 16153 A; 15697 A.)**

E. UNITED STATES. — Record Submerged Cruise by U.S.S. "Seawolf." - Sixty Days under the Sea.

The U.S. nuclear submarine *Seawolf* (3,400 tons), commanded by Commander Richard B. Laning, surfaced on Oct. 6 off New London, Connecticut, after remaining submerged for 60 days—nearly twice as long as the previous record of 31 days 5½ hours set up in May last by the nuclear submarine *Skate*. The *Seawolf* began her underwater cruise on Aug 7 at an undisclosed point in mid-Atlantic, having on board a crew of 116 officers and men. Commander Laning stated that the cruise was uneventful and that the submarine could have remained submerged for a much longer period. (New York Times) **(Prev. rep. 16385 B; 16329 A.)**

A. SINGAPORE. — Further London Discussions on New Constitution. - State of Singapore Bill enacted. - Creation of State of Singapore.

The State of Singapore Bill, creating the State of Singapore and enabling the Queen to make an Order-in-Council embodying its Constitution, was given an unopposed second reading in the U.K. House of Commons on July 11. After passing through the House of Lords, it received the Royal Assent on Aug. 1.

The Colonial Secretary (Mr Lennox-Boyd), in moving the second reading, said: "The purpose [of the Bill] is to provide for the Constitution of the State of Singapore. Many people fear that the extent and vigour of the Communist threat in Singapore is such that our interests would be imperilled if we concede further constitutional advance . . . The Government have most seriously weighed the risk, but have come to the conclusion that this is the best step they can take." He added that since the elected Government of Singapore under its Chief Minister, Mr. Lim Yew Hock, had "boldly and vigorously tackled the threat," the British Government saw no ground for "denying them further responsibility."

Mr. Creech Jones (Lab.), a former Colonial Secretary, welcomed the Bill on behalf of the Opposition, "not only because it is liberal in character but also because it has won the goodwill and consent of the people of Singapore," adding that "the Constitution went as far as was practicable."

The Act represented the final outcome of the Singapore Constitutional Conference held in London during March and April, 1957 (see 15557 A), when the substance of the new constitutional provisions had been agreed. Subsequently, an all-party delegation led by Mr. Lim Yew Hock (the Chief Minister of Singapore) had arrived in London on May 12, 1958 to discuss with the Colonial Secretary the terms of the Order-in-Council which would give effect to the new Constitution, and to check the draft against the findings of the 1957 Conference. Other members of the delegation were: Mr. Chew Swee-kee (Minister of Education and member of the Labour Front); Mr. Lee Kuan Yew (People's Action Party); Mr. Lim Choon Mong (Liberal-Socialist Party); and Inche Abdul Hamid bin Haji Jumat (United Malay National Organization). The following main points, arising out of the draft Constitution, were settled at these talks, which ended on May 27:

Protection of Malay and other Minority Rights and Privileges. The Minorities Clause in the first draft of the Constitution (see p. 15557, first column) should be re-drafted to emphasize the duties and responsibilities imposed on the Singapore Government to foster and further the interests of all minorities, "in particular those of the indigenous population, the Malays."

Qualifications of Candidates for the Legislative Assembly. The Singapore Legislative Assembly should itself decide on the age and residential qualifications of its candidates.

Civil Servants. The basic salaries and pensionable allowances of members of the Public Service Commission and of public officers should not be altered to their detriment.

First Public Service Commission. The first Public Service Commission under the new Constitution should be appointed by the Head of State on the advice of the Prime Minister the present members continuing to act until the new appointments were made.

State Advocate-General. This appointment should be made by the Head of State acting upon the advice of the Prime Minister, who would determine its duration at the time of appointment. The post might be combined with that of Permanent Secretary to the Ministry of Justice. The present Solicitor-General would act as Advocate-General in the meantime.

Temporary Restriction on Subversive Elements. Persons detained in Singapore for subversive activities should be barred from participating in the first Assembly. [This condition, which had been the subject of disagreement at the 1957 Conference, was opposed by the delegation. Mr. Lennox-Boyd, however, had insisted upon it, although he agreed that it should not be incorporated in the Constitution but in a separate instrument—which, he said, would in any case be necessary to provide for elections to the first Assembly.]

Defence. The U.K. would retain the lands occupied for defence purposes and would have the right to acquire further land, this right being exercised "in accordance with agreed constitutional process." [It was stated that this agreement would not be embodied in the Constitution, but would be recorded by an exchange of letters between the Colonial Secretary and the Chief Minister.] It was also agreed that the arrangements laid down in the defence and mutual assistance agreement between Britain and the Malayan Federation should be the model for resolving all questions relating to the security and policing of British military bases and installations in Singapore.

Status of U.K. High Commissioner. The Commissioner would be accorded "an official precedence appropriate to his status and functions," and "his precedence should be senior to, and different from, that of the representatives in Singapore of other Commonwealth and foreign countries." It was agreed, however, that this point would not be included in the new Constitution and that there should be an exchange of letters to that effect.

It was also agreed that the Commissioner should not only be provided with the agenda of meetings of the Singapore Cabinet, but also with a list of all matters discussed by the Cabinet but not on the agenda; moreover, he should be informed of the Cabinet's discussions and conclusions relating to matters which, in the Prime Minister's opinion, either affected the responsibility of the U.K. for defence or external affairs, or were matters which the U.K. Government might wish to raise before the Internal Security Council

Mr. Lim Yew Hock, who returned on June 15, said that all the political parties which had been represented in London saw the future of Singapore in three stages—viz. (i) internal self-government; (ii) merger with the Malayan Federation; (iii) complete independence. He added that it had been agreed in London that the new Constitution would be reviewed in four years' time "in the light of experience gained." In a press statement on Sept. 22 he declared that political leaders in Singapore were not yet satisfied with the proposed wording of the Order-in-Council dealing with self-government, though its general content was satisfactory; a third draft of the agreement had therefore been sent back to the Colonial Office for amendment to remove any ambiguity.

Municipal Elections.

The People's Action Party, by winning 13 out of the 14 seats contested in the municipal elections of December, 1957, became the dominant force in Singapore's first all-elected multi-lingual City Council. The election results were as follows: People's Action Party 13; Liberal-Socialist Party 7; Labour Front (Government party) 4; Workers' Party 4; United Malay National Organization 2; Independents 2.

At the first meeting of the new Council on Dec. 24, 1957, Mr. Ong Eng Guan (P.A.P.) was elected Mayor without opposition. On his proposal the Council decided subsequently that the mace should be removed from the House as "an emblem of colonialism."

The P.A.P. secured a further seat on the City Council on July 26, 1958 by winning a by-election in the Kallang ward—a predominantly Chinese constituency. The P.A.P. candidate (a Malayan who had been detained in 1956 under the security law against subversion) polled 4,279 votes against 3,566 for the Labour Front candidate (a Chinese).

Anti-Subversion Legislation.

On Aug. 11 the Legislative Assembly passed a Bill authorizing the following special detention powers:

(1) The detention of any person "in the interests of public safety, peace, and good order" for a period not exceeding six months at the order of the Chief Secretary.

(2) The extension of the above detention period from six months to a maximum of two years at the discretion of the Governor.

(3) The arrest by any police officer of "any person whom he believes should be detained under the ordinance" without a warrant, until inquiries had been made.

The Chief Secretary (Mr. E. B. David), introducing the Bill, said that there had been 150 gang fights during 1957 and 157 during the first half of 1958, as against only 25 clashes in 1956 and 24 in 1955. Since July 1, 1958, there had been 51 fights and 6 murders.

The Bill followed outbreaks of gang warfare which had culminated in the arrest of 79 suspects during Aug. 11 and 12. All those arrested were under the age of 21, the majority belonging to two of the known gangs (which, together with secret societies in Singapore, had been estimated to total 368). The Government was particularly concerned at the nature of the weapon most commonly used in this type of gang warfare—i.e. bulbs or bottles charged with acid.

A Bill renewing for a further year the Preservation of Public Security Ordinance was passed by the Legislative Assembly on Oct. 9 by 21 votes to 7.

In moving the Bill, **Mr. Lim Yew Hock** told the Assembly that an extension of the emergency laws was necessary because the new Constitution to come into force in 1959 was "a prize which the Communists must not be allowed to capture." **Mr. Lee Kuan Yew** said that the People's Action Party would vote against the Bill, as the party had no mandate to change the stand it had adopted when the measure was first introduced in 1955. However, because of the deep concern of the Federation of Malaya in this issue, he wanted to state that if the People's Action Party came to power it would retain the Ordinance so long as emergency laws were necessary in the Federation of Malaya, and "we shall take no steps which would undermine the interests of the Federation."

Dr. Chuang Chu Lin, former principal of the Chung Cheng secondary school, who, together with 48 pupils from his and other local schools, had been detained under the Banishment Ordinance since Sept. 26, 1957 for participation in subversive activities (see 15890 A), was released on Aug. 6, 1958.

Appointment of Chief Justice.

Mr. Justice Tan Ah Tah was sworn in on Aug. 18 as the first Asian acting Chief Justice of Singapore, pending the retirement of Sir John Whyatt.—(Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey)

(Prev. rep. 15890 A; 16041 A; 16275 B.)

A. UNITED KINGDOM. — Racial Disturbances in Nottingham and West London. - Condemnation by Government and Opposition. - West Indian Ministers' Visit to Britain.

A series of clashes between coloured immigrants and local residents, mostly young hooligans of the "teddy boy" type, occurred between Aug. 30 and Sept. 7 in Notting Hill and adjacent areas of West London. Similar though less serious disturbances had taken place in Nottingham on Aug. 23 and 30. Details of the disorders in London and Nottingham are given below.

Nottingham.

Fighting between white and coloured people broke out on Aug. 23 in the St. Ann's Well Road district of Nottingham, and continued for several hours before order was restored by the police using Alsatian dogs and firemen using hoses. A large number of men and women were injured by bottles, knives, and razors, and eight white people, including a policeman, had to be taken to hospital. The Assistant Chief Constable afterwards attributed the outbreak of the fighting to a small number of coloured men, mostly West Indians, who began attacking whites as a reprisal for a series of incidents during the previous fortnight in which "teddy boys" had assaulted coloured men.

On Aug. 30 about 500 "teddy boys," including a gang from Leicester, gathered in the same district, planning a reprisal attack; the police had been warned of their plans, however, and had been concentrated in the area in force. After three coloured men had been rescued from the crowd by the police, the coloured population all left the streets. Fighting nevertheless broke out between the police and the crowd after a photographer had let off a magnesium flare and hundreds of people rushed back thinking it was a fire. The Chief Constable of Nottingham said at a subsequent press conference that this had not been a racial riot, and described the crowd as "irresponsible teddy boys and persons who had had a lot to drink."

Five men were sentenced to three months' imprisonment in Nottingham magistrates' court on Sept. 1 for threatening behaviour likely to cause a breach of the peace, and 15 men and youths to fines ranging from £10 to £30; three were acquitted. Before passing sentence the presiding magistrate gave warning that when dealing with similar lawlessness the court would "act with the utmost severity."

West London.

The first serious incident in West London occurred in the early hours of Aug. 24, when nine youths aged between 17 and 20 toured the Shepherds Bush and Notting Hill districts in a car on a "nigger hunting" expedition during which they attacked five coloured men with iron bars, table legs, and other weapons, gravely injuring three of them. At their subsequent trial at the London Central Criminal Court, the youths, who all pleaded guilty, were each sentenced on Sept. 15 to four years' imprisonment.

Passing sentence, Mr Justice Salmon said: "It was you men who started the whole of this violence in Notting Hill. You are a minute and insignificant section of the population who have brought shame upon the district in which you lived, and have filled the whole nation with horror, indignation, and disgust. Everyone, irrespective of the colour of their skin, is entitled to walk through our streets in peace, with their heads erect, and free from fear. That is a right which these courts will always unfailingly uphold. As far as the law is concerned you are entitled to think what you like, however foul your thoughts, to feel what you like, however brutal and debased your emotions; to say what you like, providing you do not infringe the rights of others or imperil the Queen's peace. But once you translate your dark thoughts and brutal feelings into savage acts such as these, the law will be swift to punish you, the guilty, and to protect your victims.

"I bear in mind what has been said on your behalf. you are young and have no previous convictions. Your victims, though grievously injured, after two or three weeks in hospital have sufficiently recovered to be allowed to return home, and it is unlikely that they will suffer any permanent physical ill effects from your savage attacks. But for those facts I would have imposed much longer sentences. As it is I am determined that you and anyone anywhere who may be tempted to follow your example shall clearly understand that crimes such as this will not be tolerated in this country, but will inevitably meet in these courts with the stern punishment which they so justly deserve."

During the night of Aug. 30-31 fighting began in the Notting Hill district among a crowd of about 200 white and coloured people; a petrol bomb was thrown into a house occupied by coloured people, and other houses were stoned. Running fights between more than 400 white and coloured people went on continuously for four hours on the following evening (Aug. 31), police who intervened being attacked and a number injured. On Sept. 1 a West African student was chased through the streets by a gang of youths shouting "lynch him," until he took refuge in a shop, and later the same day a mob of about 2,000 youths and children went through the streets breaking the windows of houses occupied by coloured people; in one street the residents retaliated by throwing milk bottles from their roofs. A crowd of youths shouting "down with niggers" and headed by a banner with the slogan "deport all niggers" paraded through the streets on Sept. 2, but were quickly dispersed by large police forces brought to the area.

Although the situation subsequently calmed down in Notting Hill, the disorders spread eastward into Bayswater and Paddington and westward into Shepherds Bush on Sept. 1, and continued until Sept. 7. After a crowd of youths had attacked a club for West Indians in Bayswater on Sept. 2 a fight began in which petrol bombs and bottles were thrown, and in Paddington a house occupied by a coloured family was set on fire by a gang of youths on Sept. 4.

About 150 people were arrested for taking part in the disorders. Five white men, aged between 17 and 23, were sentenced to terms of imprisonment ranging from 18 months to two years at the Central Criminal Court on Sept. 19, on a charge of fighting and making an affray in Notting Hill on Aug. 31, eight other men (three of them coloured) being acquitted. [An "affray" is the legal term for a fight of two or more people armed with weapons in a public place, which might frighten or terrorize reasonable people.] Five white and seven coloured men had previously been sentenced by London magistrates' courts to terms of imprisonment ranging from 14 days to three months for possessing offensive weapons, using threatening words and behaviour, or insulting behaviour, and a large number of other persons were fined.

The Background of the Disturbances.

Nottingham has a coloured population of about 3,000 (some 2,000 of whom live in the St. Ann's Well Road district), as against 330,000 whites. It was stated in the Press that racial relations in the past had been good; that there was no colour bar in public houses, dance halls, and other public places; and that the coloured community, with a few exceptions, were described by the police as "very well behaved." Between 5,000 and 7,000 coloured people, mostly West Indians, live in the Notting Hill district in London.

Three main causes of tension were suggested in the Press - the housing shortage in both areas; associations between white girls and coloured men; and (in Nottingham though not in London) competition for employment. Many coloured immigrants had managed to save enough money to buy small houses on mortgage, a fact which was resented by homeless whites, and in some cases had attempted to evict white tenants. Friendships between white girls and coloured men were also resented, especially by the younger white men; prejudice existed against mixed marriages; and a few coloured men in both London and Nottingham were known to be living on the immoral earnings of white girls. In Nottingham a local recession had led to short-time working in certain industries, and had aroused fears of coloured competition for jobs among unskilled workers, although in fact the proportion of coloured people among the unemployed (430 out of a total of 2,000) was extremely high

The *Manchester Guardian's* London correspondent pointed out that in the Notting Hill area "violence and hooliganism have been a regular feature of life for years. Gangs of youths have, for months past, roamed the streets on the week-end evenings, breaking windows and causing trouble . . . Thus the police are insisting that the disturbances are an extension of hooliganism rather than racial riots. They say that the new feature is that the youths are turning their attention to the coloured population, and committing against them the same acts of violence that they have been of late inflicting on café proprietors, other gangs, and each other."

Officials of the British Caribbean Welfare Service suggested that in West London the rioters had been deliberately incited to violence. The officials alleged that attacks on coloured people had begun after the Union Movement (formerly the British Union of Fascists), led by Sir Oswald Mosley, had distributed leaflets in the Notting Hill area which bore a picture of Negroes carrying spears entering Britain while white men left Britain for the Dominions, and read: "Take action now. Protect your jobs. Stop coloured immigration. Houses for white people—not coloured immigrants. A square deal for the Negro in his own country. People of Kensington act now. Your country is worth fighting for. Fight with the Union Movement." During the riots the Union Movement continued to distribute its leaflets in Notting Hill, and held frequent open air meetings there.

Another extremist organization reported to have distributed leaflets and held open air meetings in Notting Hill during the riots was the National Labour Party, a small body which had recently broken away from the League of Empire Loyalists. Its leaflets demanded a ban on coloured immigration, and declared that Britain was "steadily being taken over by the triumphant alien."

Statements by Government and Opposition Leaders.

After talks between Mr.Macmillan and the Home Secretary (Mr. Butler), the following statement was issued from 10, Downing Street on Sept. 3 :

" The Home Secretary has reported to the Prime Minister on the incidents involved in racial disturbances in Nottingham and Notting Hill. These incidents have an immediate and a long-term importance.

" The immediate aspect involves the maintenance of law and order. The Government and the authorities concerned wish to make it clear that the utmost strictness will be observed in the impartial enforcement of the law and in preventing the illegal carrying of offensive weapons Meanwhile, it is important that the significance of these incidents should not be exaggerated at home or overseas. The general public can best contribute by the exercise of the utmost discretion in avoiding situations in which they may become unwittingly involved [The Metropolitan Police had appealed to the public on Sept. 2 to assist in preserving order, and had pointed out that the situation was " seriously worsened by the presence of sightseers who often unwillingly themselves become involved."]

" As regards the wider aspects of policy, H.M. Government have for some little time been examining the result of this country's time-honoured practice to allow free entry of immigrants from Commonwealth and colonial countries. While this study of major policy and its implications and effects on employment will continue, H.M. Government do not think it right to take long-term decisions, except after careful consideration of the problem as a whole."

Mr. Butler stated on Sept. 5 that there were about 200,000 coloured people in the United Kingdom, of whom about 110,000 were from the West Indies and 54,000 from India and Pakistan. The number of immigrants had recently increased, and their arrival had coincided with a slackening in the demand for unskilled labour. The number of coloured workers officially unemployed at the end of July had been 17,100, apart from those who had not registered, and the proportion of unemployment among coloured people was therefore greater than among the normal working population.

Mr. Butler also said in his statement that after a personal investigation of the outbreaks he was satisfied that the scope of the incidents was within the power of the police to control, whether in the Metropolitan area or in the provinces. " But," he added, " we have no intention of allowing extremist elements to take advantage of the situation. I should make it clear that disturbance of the peace, especially when it takes the form of anti-colour demonstrations, is universally condemned by public opinion of all shades.

" We are rightly proud in this country of the fact that racial discrimination never has been part of our life or our law. We have prided ourselves on our hospitality to our fellow-beings from Commonwealth and colonial territories who enjoy the right of unrestricted entry to the mother country. We are, in fact, the only Commonwealth country which has no powers to exclude or expel citizens of other Commonwealth countries. Moreover, British subjects from Commonwealth countries can acquire citizenship of the U.K. and colonies by registration after 12 months' residence. All British subjects, white and coloured, enjoy absolute equality before the law."

Turning to the recent disorders, Mr. Butler said that " fortunately only a few people have been injured and only slight damage caused to property, mostly broken windows " ; he reiterated his appeal to the public to keep away from disturbances. On the Government's future policy, which they would discuss with the West Indies Ministers, the Home Secretary said : " The one general statement it is possible to make about our policy at the present time is that we must be guided in our examination of the various problems by the interests both of the coloured people themselves and of our own people, and that we should not take rush decisions in an atmosphere of unrest . . . It is in that calm and sensible way that we shall reach a typical British solution without doing violence to our British tradition."

Mr. Gaitskell, Leader of the Opposition, and the General Council of the T.U.C., issued statements on Sept. 3 and 4.

Mr. Gaitskell's statement was as follows : " Whatever local difficulties there may be, nothing can justify the rioting and hooliganism of the past few days. Such behaviour can only damage the reputation of our country in the world, weaken the unity of the Commonwealth, and increase racial tension without in any way solving the underlying social and economic problems. I hope that public opinion everywhere will express itself strongly against these deplorable outbreaks of street violence (which must be suppressed with the utmost firmness), and that everybody will respond to the appeal issued by the police, whose conduct throughout in a most difficult situation has been admirable."

The statement of the General Council of the T.U.C. condemned the disorders as " vicious hooliganism," and emphasized that " it is the duty of trade unionists and all other responsible citizens to aid the authorities in preventing a recurrence of such disorderly and dangerous demonstrations." It added : " Evidence is accumulating that elements which propagated racial hatred in Britain and Europe in pre-war days are once more fanning the flames of violence. The authorities must therefore, while dealing in an exemplary way with the rioters, also seek out those who are inciting civil disorder and act against them with the full severity of the law . . . "

Mr. Rogers and Mr. Tomney (the Labour M.P.'s for North Kensington and North Hammersmith respectively, whose constituencies include the Notting Hill and Shepherds Bush areas) discussed the disturbances with Mr. Renton (Parliamentary Under-Secretary, Home Office) on Sept. 3. Mr. Rogers afterwards expressed the opinion that the Government should restrict the entry of coloured people into overcrowded areas, take powers to deport undesirables, recruit coloured members for the C I D. to help in detecting criminal activities among coloured people, and restrict the licensing of basement clubs.

Under the British Nationality Act of 1948, anyone who satisfies the immigration officers by the production of a passport that he is a British subject, a Commonwealth citizen, or a " citizen of the United Kingdom and Colonies," may enter the country without restriction, and cannot be deported even if found guilty of a criminal offence.

A motion expressing the view that this arrangement should be reconsidered had been tabled in the House of Commons by three Labour members (Mr. Harry Hynd, Mr. Albert Evans, and Mr. Tomney), two Conservatives (Mr. Ronald Bell and Mr. James Lindsay), and an Independent (Sir Frank Medlicott), and was debated on April 3. Replying to the motion, Miss Hornsby-Smith (Joint Under-Secretary for Home Affairs) said : " It would be a completely new departure for the Government to exercise control of immigrants from the Commonwealth, and any measures, even partial or selective, to control immigration would require legislation. We are anxiously watching the situation, but we remain reluctant to contemplate any departure from our traditional readiness to receive all citizens who have the status of a British subject."

A second motion had been tabled in May urging the Government to amend the immigration laws on the basis of reciprocity with Commonwealth and colonial territories, " all of which both impose restrictions on the entry of nationals of the United Kingdom and reserve the right to deport such nationals for grave misdemeanours." It was signed by 31 Conservatives, two Labour members, and Sir Frank Medlicott.

Commonwealth Reactions to Disturbances. - West Indian Ministers' Visit to Britain.

Mr. Norman Manley (Chief Minister of Jamaica) and Dr. Carl Lacorbinière (Deputy Premier of the West Indies Federation) flew to London on Sept. 5, and were joined on Sept. 7 by Dr. Hugh Cummins (Prime Minister of Barbados). The three Ministers had long talks with Mr. Butler and Mr. Lennox-Boyd (the Colonial Secretary) on Sept. 8-10, and met the Prime Minister at a luncheon party at 10, Downing Street on Sept. 12 ; others who were present included Mr. Ram Karran (Minister for Communications and Works, British Guiana), Dr. Patrick Solomon (Deputy Chief Minister of Trinidad), Mr. Lennox-Boyd, Mr. Macleod (Minister of Labour), and Mr. Renton.

A Home Office statement issued after the meeting on Sept. 8 said that " frank and cordial discussions " had taken place on the issues arising from the disturbances, and that the Home Secretary had undertaken " to examine the various representations made by the [West Indies] Ministers, and to maintain contact with them and their Governments with a view to resolving outstanding difficulties." Mr. Manley said after the meeting that he was " very satisfied " and that there had been " mutual understanding, which is most important."

After the Prime Minister's luncheon party on Sept. 12 it was authoritatively stated in the Press that Mr. Macmillan had reaffirmed the Government's determination not to depart from the present policy of allowing free entry into the U.K. to all British subjects of the Commonwealth and the Colonies. The Ministers from the West Indies had, however, been informed that the Government were considering taking action to deport undesirable immigrants, and had asked to be fully consulted as the proposals were formulated. It was also stated that British Ministers had been impressed by the account given by the West Indies Ministers of their efforts to warn intending emigrants of the difficulties which they might encounter in Britain, and to weed out people with criminal records, but that suggestions that some further voluntary restriction on emigration might be imposed had not been well received by the West Indies Ministers.

During their visit Mr. Manley, Dr. Lacorbinière, and Dr. Cummins made a tour of areas with large coloured populations, visiting Notting Hill, Brixton (south-west London), Nottingham, and Birmingham, and addressed meetings of coloured people. They also had discussions with the civic authorities in London, Nottingham, and Birmingham, and while in the last-named city praised the special efforts made to assist the gradual integration of West Indians into community life.

Mr. Manley made a number of statements on West Indian emigration to Britain and the need for developing industries in the West Indies.

At a press conference on Sept. 10, Mr. Manley said: "We do not consider it right or practicable to limit emigration in any way, and we do not propose to do it. If emigration is to be limited by law, then England must on her own responsibility decide to do it in England, due regard being paid to what will happen to the Commonwealth if England's traditional policy of the open door is closed. That is England's business, not mine" The West Indian immigrants, he emphasized, were not "the dead beats of the West Indies" but "people who have saved a little money; who have a little land and sell that; who had jobs and who come here hoping to acquire higher skills and one day to return." The employment situation in Britain was watched with great care, and posters were prominently displayed all over Jamaica warning would-be emigrants that there was unemployment in England and that they should make sure they had a job before they left. Jamaica, however, had had a chronic condition of unemployment for at least 20 years, nor would it be possible for the Government in the foreseeable future to create enough employment to avoid the necessity of emigration Whilst admitting that some West Indians in Britain were engaged in vice, he denied that their behaviour was the cause of the troubles, and pointed out that of 130 men prosecuted in the Metropolitan area in 1957 for living on immoral earnings, 64 were British and 66 immigrants, of whom only 15 were West Indians.

Mr. Manley subsequently explained on Sept. 12 that no Jamaican with a single conviction for a crime of violence was allowed to leave for England without the Jamaican Home Secretary's special permission; that if there was any doubt about his likelihood to abstain from violence, his case would be considered collectively by the Cabinet, and that any person with three convictions for any offence was disqualified from holding a passport. In addition, no person under 18 or over 50 might leave Jamaica without producing evidence that there would be someone to look after him. Dr Cummins had previously stated that the Barbados Government was applying similar restrictions on intending emigrants.

In another press statement on Sept. 12 Mr. Manley stressed that Jamaica's unemployment problem could in the long run only be solved by the island's further industrialization. He appealed for British firms to develop and establish industries in Jamaica, which, he pointed out, was "strategically well-placed for the Central American and South American markets and as the central unit of the West Indian Federation." Unemployment there varied from 15 or 18 per cent to 25 per cent seasonally, however, and he did not wish England to think that "we are trying to deal with this problem only by exporting people." He stated that in the past five years at least 80 per cent of the new capital invested in Jamaica had come from the U.S.A. and Canada, and cited as an example of British lack of enterprise the bauxite mining industry; British firms had investigated and rejected Jamaican deposits, he said, although they lay under a mere nine inches of topsoil, and after only seven years' development by three U.S. companies Jamaica was now the largest exporter of bauxite in the world.

On his return to Jamaica on Sept. 19, Mr. Manley warned Jamaicans not to stream to Britain, as there was much unemployment among West Indians there, and as it would get "a good deal worse before it gets any better." The West Indies Federal Government, in a statement issued on the same day, announced that it would consider publicity measures to acquaint intending migrants with the unemployment situation in Britain; that it was prepared to examine any proposals by the British Government about the deportation of undesirable immigrants; and that it would intensify community work in areas where West Indians had settled in Britain, in co-operation with the local authorities.

Reactions to the disturbances in other Commonwealth countries with coloured communities resident in Britain are summarized below.

Ghana. Mr. E. O. Asafu-Adjaye (the Ghanaian High Commissioner in London) informed the British Government on Sept. 3 that citizens of Ghana had been involved in "incidents of assault and provocation" during the disturbances, and asked for more police protection and vigilance in Notting Hill and several other London areas.

Nigeria. The Commissioners for the Federation and for the three Regions of Nigeria called at the Colonial Office on Sept. 5 to express their anxiety at the disorders. The Federal Minister of Health, Mr. Ayo Rosiji, said in London on the same day that many Nigerians had suffered maltreatment and that there should be more police protection for them. He pointed out that Nigerians did not come to Britain to work but only as students, and expressed the opinion that the trouble was due to "the influx of West Indians"

Dr. Azikiwe (Prime Minister of Eastern Nigeria), who arrived in London on Sept. 8 for the forthcoming constitutional conference, said that the British Commonwealth had always set an example of liberalism on racial issues, and that this had more than anything else been responsible for its survival. Control of immigration was applied in many countries, including Nigeria, where it was limited to undesirables, but he would not support any idea of controlling immigration solely on a racial basis. "If a change is made it becomes a fundamental issue," he added, "and naturally we would not like to remain in a Commonwealth where we would be second-class citizens"

British Guiana. Dr. Jagan, the Prime Minister of British Guiana, moved a resolution in the Legislative Council on Sept. 5 expressing "grave concern" over the disturbances, and asking the Colonial Secretary to take all measures to ensure the safety and well-being of coloured people

Indian and Pakistani Immigration into Britain.

Mr. Sadath Ali Khan (Parliamentary Secretary to the Indian External Affairs Ministry) told the *Lok Sabha* on Aug. 14 that the British Government had recently drawn the Indian Government's attention to the large influx into Britain of Indians seeking employment, and had given the number of Indian immigrants during 1955, 1956, and 1957 as 5,100, 5,600, and 6,600 respectively. Mr. Nehru (the Prime Minister) pointed out that many of the immigrants did not know any language except Punjabi, with the result that they became itinerant vendors and might affect the employment situation. He added: "We have not encouraged these people. In fact, we have discouraged them. It is not to our credit that people who have no resources or educational background should go there."

An Indian official spokesman stated in London on Sept. 12 that the Government had strictly controlled emigration to Britain during the past three years, since it had become known that people were being encouraged to emigrate without any great assurance of a job in Britain. Would-be emigrants were required to provide a financial guarantee of at least Rs. 1,500 (about £112) and to undergo a medical examination, and the Intelligence Bureau also investigated all applicants for passports.

A spokesman of the Pakistani High Commission in London said on the same day that since the spring of 1958, when many Pakistanis in Britain were found to be unemployed or even destitute, emigrants had been required to prove that they had a working knowledge of English, and that they had been offered a job or that possibilities of employment were good. They were also required to pay a repatriation deposit of Rs. 2,500 (about £187), which covered the cost of an air ticket from London to Karachi (about £130). Prior to the introduction of these regulations, the number of Pakistanis entering Britain had been higher than the number of Indians; about 2,000 were known to have arrived by air during February 1958, and to have begun drawing national assistance on their arrival.—(Times - Daily Telegraph - Manchester Guardian - The Statesman, Calcutta) **(Prev. rep. 15451 A.)**

A. ISRAEL. — Purchase of British Submarines.

It was announced in London and Jerusalem on Oct. 8 that the British Government had agreed to sell to Israel two S-class submarines which were "surplus to requirements"; that the first—H.M.S. *Springer*—would be handed over on Oct. 9; and that the second—H.M.S. *Sanguine*—would be delivered in two or three months. It was stated that the sale had been made "on normal commercial terms."

Springer and *Sanguine* were both built by Cammell Laird at Birkenhead in 1945, but *Springer* had been extensively modernized in 1951-52. Both submarines are fully operational and, it was stated, were suitable for use in the Mediterranean, though not for service in the Gulf of Akaba [suggesting that they are not at present "tropicalized"].

It was authoritatively stated in the British Press that the sale did not constitute any change in British policy and had been made in the light of the Tripartite Declaration of May 1950, in which Britain, France, and the U.S.A. declared that, to avoid an arms race, they would supply arms to Israel and the Arab States only for internal security and in accordance with their legitimate defence needs [see 10745 A]. In selling the submarines the British Government was said to have taken into account the fact that the United Arab Republic had acquired six Soviet submarines since 1957, three having been received in June 1957 (see 15599 A) and three more in April 1958 from Poland (see 16111 B); five of these submarines are of the large Soviet W-class, and one is a smaller type.

H.M.S. *Springer* was formally transferred to the Israeli Navy at Portsmouth on Oct. 9; it was stated that she would be renamed *Tanin* (Crocodile). The two submarines are the first military equipment supplied by Britain to Israel since the Suez crisis of November 1956. They are the first submarines acquired by the Israeli Navy.—(Times - Daily Telegraph - Manchester Guardian - Israeli Government Press Office)

B. ARAB LEAGUE. — Adhesion of Morocco and Tunisia.

The Council of the Arab League unanimously decided on Oct. 1 to accept membership applications from Morocco and Tunisia, bringing its total membership to 10. The other members of the League are Iraq, Jordan, Lebanon, Libya, Saudi Arabia, Sudan, the United Arab Republic, and Yemen. (Times - Daily Telegraph) **(Prev. rep. 14645 C.)**

KANSAS CITY, MO. PUBLIC LIBRARY NOV 1 1958

OCTOBER 11—18, 1958

A. VATICAN. — Death of Pope Pius XII.

His Holiness Pope Pius XII (Eugenio Pacelli) died in the early hours of Oct. 9 at his summer residence at Castelgondolfo, in the Alban Hills near Rome. He was 82 years of age.

Eugenio Pacelli was born in Rome on March 2, 1876, the son of Filippo Pacelli, a distinguished ecclesiastical lawyer, and his wife the Marchesa Virginia Graziosa, a member of an Italian noble family. Ordained in 1899, he entered the Papal Secretariat of State in 1901 during the pontificate of Benedict XV, and for 16 years thereafter had extensive diplomatic experience under two eminent Secretaries of State, Cardinal Merry del Val and Cardinal Gasparri. Monsignor Pacelli (as he then was) visited England in 1908 for the Eucharistic Congress in London, and again in 1911 as a member of the Papal envoy's suite at the Coronation of King George V. His first important appointment in the Papal diplomatic service was in 1913, when he became Secretary for Extraordinary Ecclesiastical Affairs. In the following year he became Under-Secretary of State under Cardinal Gasparri, in which capacity he helped to draw up the peace proposals whereby Pope Benedict XV tried to end the First World War in 1917.

In addition to his diplomatic duties throughout this period, Mgr. Pacelli was engaged for 13 years on the extensive task of codifying Canon Law, which had been entrusted to him by Benedict XV. On the completion of this task in 1917 Pope Benedict appointed him Papal Nuncio to Bavaria, and subsequently (1920) to the new German Republic. During his 12 years in Germany (1917-29) Mgr. Pacelli negotiated Concordats between the Holy See and Bavaria and, after protracted diplomatic negotiations, between the Holy See and the German Republic, the latter treaty being concluded in 1929.

After the conclusion of the Concordat with Republican Germany, Mgr. Pacelli was recalled from Berlin by Pope Pius XI (who had ascended the papal throne in 1921) and created a cardinal in December 1929. A few weeks later (February 1930) Cardinal Pacelli was appointed Papal Secretary of State in succession to Cardinal Gasparri; one of his first tasks in that post was to work out the detailed application of the Lateran treaties which had been concluded between the Holy See and Italy. In 1933 he negotiated with National-Socialist Germany a general Concordat by which he hoped to save the liberties of the Roman Catholic Church in Germany under the Nazi regime. In the following year he attended the Eucharistic Congress in Buenos Aires as Papal legate, while in 1936 he made an 8,000-mile tour of the United States, travelling mostly by air.

In 1935 Cardinal Pacelli had been appointed by Pius XI as Cardinal Camerlengo (Chamberlain of the Holy Roman Church), an office in which the administration of the Church is vested during the interregnum between the death of a pope and the election of his successor. On the death of Pius XI in February 1939, it accordingly fell to Cardinal Pacelli as Camerlengo to preside over the funeral ceremonies and the period of the interregnum.

On March 2, 1939 (his 63rd birthday) Cardinal Pacelli was elected to the Papal throne by the Sacred College, taking the title of Pius XII. Since the 16th century there had been no precedent for the election of a Secretary of State, and, in view of the threatening international situation, it was widely felt that the choice had fallen on Cardinal Pacelli because of his great diplomatic experience and knowledge of international affairs. Throughout the summer of 1939 the new Pope and his Secretary of State, Cardinal Maglione, did all in their power to avert the outbreak of war; when Hitler launched the Second World War by invading Poland, Pope Pius XII at once extended his public sympathy to the Polish nation in the person of Cardinal Hlond, the Patriarch of Cracow.

After the outbreak of war Pope Pius did all in his power to mitigate its brutalities and to bring about an early peace based on justice for all nations and respect for national independence. His desire for such a peace was stressed in his first Christmas allocution to the College of Cardinals and in exchanges of messages with President Roosevelt, whilst his implicit denunciation of Nazi aggression was evidenced in messages to the Sovereigns of the Netherlands, Belgium and Luxemburg when those countries were invaded early in 1940. At the same time Pope Pius made strenuous but unavailing efforts to prevent Italy from entering the war. During later stages of the conflict he devoted much thought to the principles upon which a just peace should be based, and enunciated a five-point peace programme broadly similar to the principles underlying the Atlantic Charter. At the time of the Allied advance on Rome he made frequent appeals to both sides that the Italian capital should be declared an open city, and it was largely as a result of his efforts that Rome was liberated without suffering any devastation.

The Holy See, although virtually cut off from the outside world from mid-1940 until the liberation of Rome in 1943, did a great amount of humanitarian work, both in the spiritual and temporal fields, in alleviating the distress and suffering caused by the war. A Vatican Information Service was set up which collected and issued by radio and letter the names of prisoners of war in many parts of the world; in addition, large sums of money were sent to bishops throughout Europe for the relief of exiles and the feeding of the destitute, while in the immediate period before the liberation of Rome the Holy See provided daily meals for some 40,000 people in the Italian capital. After the liberation the Pope immediately resumed contact with the outside world, and the Vatican organized large-scale relief aid for the war-devastated areas of Italy and other European countries.

After the war ended, Pope Pius held a consistory in 1946—the first of his reign—at which he created the unprecedented number of 32 new cardinals to restore the Sacred College to its full membership of 70 (the College of Cardinals had been reduced by deaths to only 38 members). All but five of the new cardinals were non-Italians, with the result that the Italian proportion of the Sacred College was greatly reduced. The new cardinals were drawn from all parts of the world and included the first Chinese cardinal in the Roman Catholic Church—Cardinal Tien, Archbishop of Peking, who was subsequently driven from China by Communist persecution. The 1946 consistory was also noteworthy for the creation of native Hierarchies in China, India, and Africa.

The Pope's second consistory of 1952 left the Italian and non-Italian proportions of the Sacred College practically unchanged—less than one-third Italian and over two-thirds non-Italian. It was noteworthy for the creation of the first Indian cardinal of the Church (Cardinal Gracias, Archbishop of Bombay) and for the conferment of the Red Hat on two prelates from Communist countries—Mgr. Stepinac (Archbishop of Zagreb), who had been imprisoned in Yugoslavia, and Mgr. Wyszynski (Archbishop of Warsaw), who had been persecuted by the then Stalinist regime in Poland.

Among the historic events of Pope Pius's reign were the proclamation in 1950 of the dogma of the Assumption of the Blessed Virgin; the celebration of the Marian Year (1954), held to mark the 100th anniversary of the dogma of the Immaculate Conception; the beatification (1951) and subsequent canonization (1954) of his predecessor Pius X; and the important archaeological excavations at the Vatican in connexion with the attempt to locate the Tomb of St. Peter.

The Pope was particularly concerned during the post-war years at the persecution to which the Roman Catholic Church was being subjected in the Communist countries of Eastern Europe and in China; he denounced Communism and the Communist philosophy of life in numerous speeches, broadcasts and encyclicals, his elevation of Cardinals Stepinac and Wyszynski to the Sacred College being regarded as a practical expression of sympathy and support for the Church in countries where it was subjected to restriction and persecution. Pope Pius also made a great number of pronouncements—notably in his Christmas broadcasts—on the problems of world peace, cessation of nuclear tests, the need for "humanizing" science and technology in the modern age, and, in particular, on the necessity for a more spiritually-based world order in an age of materialism.

A distinguished scholar with expert knowledge of a great many subjects, the Pope also made pronouncements on a great variety of other matters ranging from modern art and music to astronomy, sport, the role of the journalist, and the impact on society of films, radio and television; in addition, he issued many statements defining the Church's attitude to such social problems as birth-control, painless childbirth, artificial insemination, psychiatry, euthanasia, and the use of drugs in incurable diseases. He was a fluent linguist in six languages—Latin (the official language of the Holy See), Italian, French, English, German and Spanish.

Apart from being one of the most widely-travelled Popes, the late Pope Pius was also one of the most accessible, both to Catholics and non-Catholics; for many years he had received vast numbers of pilgrims and visitors of all nationalities and all walks of life, and in 1957 alone he gave audiences to nearly 1,000,000 people and made 132 speeches in many different languages. Both in the Catholic and non-Catholic world his moral authority was very great, and he was widely regarded as one of the most brilliant and distinguished occupants of the Papal Chair in modern times.

During the latter years of his life Pope Pius suffered from recurrent attacks of ill-health, the first of which occurred early in 1954. He was again taken seriously ill towards the end of that year but made a rapid recovery after the doctors had despaired of his life; it was subsequently disclosed, with official Vatican authorization, that the Pope's recovery from this illness followed immediately upon a personal vision of Jesus Christ. Thereafter the Pope remained in good health until, three days before his death, he was stricken with an attack of cerebral thrombosis to which he eventually succumbed.

Since the death of Cardinal Maglione in 1944 Pope Pius had been in effect his own Secretary of State; no successor was appointed to replace Cardinal Maglione, though the Pope was assisted by two Pro-Secretaries of State—Monsignori Montini and Tardini.

The embalmed body of Pope Pius was brought from Castelgondolfo on Oct. 10 to lie in state at St. Peter's, after a service of absolution at the Church of St. John Lateran. The 18-mile route from Castelgondolfo to Rome along the Appian Way was lined by vast numbers of people who had gathered to pay homage to the late Pontiff; it was estimated that about 1,000,000 persons were assembled as the cortège passed through the capital to St. Peter's. Pope Pius XII was buried in St. Peter's on Oct. 13, in a crypt where the bodies of 143 former Popes are interred. The ceremony was attended by all members of the Sacred College in Rome, dignitaries of the Holy See and the Papal Court, relatives of the late Pope Pius, the Diplomatic Corps accredited to the Vatican, and representatives of the Italian Government and of many foreign Governments, including a number of Foreign Ministers. For the first time in history the scene was carried by television over the Eurovision system into many millions of homes in a number of European countries.

Tributes to the late Pope were paid by Heads of State and Heads of Government throughout the world, including Queen Elizabeth II, President Eisenhower, President Gronchi, President Coty, Queen Juliana of the Netherlands, President Heuss, Mr. Macmillan, General de Gaulle, Signor Fanfani and Dr. Adenauer. Similar tributes were paid by leaders of all the Christian Churches, both Catholic and non-Catholic.

The testament of Pope Pius XII was made public by Vatican Radio on Oct. 10. It was worded as follows :

" *Miserere mei, Deus, secundum misericordiam tuam* [Have mercy on me, O God, according to Thy loving kindness].

" These words which, aware that I was unworthy and unequal of them, I pronounced at the moment in which with trepidation I accepted election as Supreme Pontiff, I now repeat with ever more foundation at a time in which knowledge of the deficiencies, of the failures, of the sins committed during so long a pontificate and in so grave an epoch has made more clear to my mind my insufficiency and unworthiness.

" I humbly ask pardon of all whom I may have offended, harmed, or scandalized by word or by deed.

" I pray those whose affair it is not to bother to erect any monuments to my memory : sufficient it is that my poor mortal remains should be laid simply in a sacred place, the more obscure the better.

" I do not need to ask for prayers for my soul. I know how many are those that the custom of the Apostolic See and the piety of the faithful causes to be offered for every Pope who dies.

" Nor do I need to leave a ' spiritual testament,' as so many zealous prelates are in praiseworthy fashion accustomed to do : because the not inconsiderable number of acts and speeches emanated or pronounced by me by reason of my office suffice to make known, to whoever should by chance desire to know, my thought on different religious and moral questions.

" Therefore I name as my universal heir the Holy Apostolic See, from which I have had so much as from a most loving mother."

Immediately after the Pope's death a " preparatory general congregation " of all cardinals in Curia—i.e. those permanently residing in Rome—was summoned by the " special congregation " consisting of Cardinal Tisserant, Dean of the Sacred College, Cardinal Fumasoni-Biondi, head of the Order of Cardinal Priests, and Cardinal Canali, head of the Order of Cardinal Deacons. [The three-man " special congregation " comes into existence whenever the Papacy is vacant.] At this meeting, held at the Vatican on Oct. 9, the 15 cardinals in Curia elected Cardinal Masella (Bishop of Palestrina) as Camerlengo—the highest executive office in the Church while the Papacy remains vacant. The cardinals also elected Mgr. Alberto di Jorio (head of the Secretariat of the Sacred College) as Papal Secretary of State during the interregnum between the death of Pope Pius and the election of his successor.

As stated above, the late Pope Pius XII (then Cardinal Pacelli) had been appointed Camerlengo during the reign of his predecessor, Pius XI. No such appointment was made during his own 19-year reign, and it was therefore necessary for the " preparatory general congregation " to choose one of its members to fill this office in the interregnum.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - The Universe - Catholic Times)

(Prev. rep. Pope Pius XII, Election, 3467 A.)

The Sacred College. Owing to deaths in recent years, the membership of the College of Cardinals was 55 at the decease of Pope Pius XII —15 less than its full complement. By nationality, 18 of the 55 cardinals are Italian, six French, three American, three Brazilian, three Spanish, two Argentinian, two Canadian, two German, two Portuguese, and one each of Armenian, Australian, Belgian, Chilean, Chinese, Colombian, Cuban, Ecuadorean, Hungarian, Indian, Irish, Polish, Syrian, and Yugoslav nationality. The members of the Sacred College are :

Italian. Clemente Micara (78), Cardinal Bishop of Velletri; Giuseppe Pizzardo (81), Cardinal Bishop of Albano; Benedetto Aloisi Masella (79), Cardinal Bishop of Palestrina; Federico Tedeschini (84), Cardinal Bishop of Frascati; Pietro Fumasoni-Biondi (86), Prefect of the Congregation *de Propaganda Fide*; Maurilio Fossati (82), Archbishop of Turin; Elia dalla Costa (86), Archbishop of Florence; Ernesto Ruffini (70), Archbishop of Palermo; Celso Costantini (82), Archbishop of Theodosia; Gaetano Cicognani (79), Archbishop of Ancira; Angelo Giuseppe Roncalli (76), Patriarch of Venice; Valerio Valeri (74), Archbishop of Ephesus; Pietro Ciriaci (72), Archbishop of Tarsus; Marcello Mimmi (76), Archbishop of Naples, Giuseppe Siri (52), Archbishop of Genoa; Giacomo Lercaro (66), Archbishop of Bologna; Alfredo Ottaviani (67). Pro-Secretary of the Congregation of the Holy Office, and Cardinal Deacon; Nicolà Canali (84), Cardinal Deacon.

French. Eugène Tisserant (74), Cardinal Bishop of Ostia and Dean of the Sacred College; Achille Liénart (74), Bishop of Lille; Pierre-Marie Gerlier (78), Archbishop of Lyons; Clément-Emile Roques (77), Archbishop of Rennes; Maurice Feltin (75), Archbishop of Paris; Georges François-Xavier Marie Grente (86), Archbishop of Le Mans.

American. Edward Mooney (76), Archbishop of Detroit; Francis Spellman (69), Archbishop of New York; James Francis McIntyre (72), Archbishop of Los Angeles.

Brazilian. Carlos Carmelo de Vasconcelos (68), Archbishop of São Paulo; Jaime de Barros Camara (64), Archbishop of San Sebastiano, Rio de Janeiro; Augusto Alvaro da Silva (82), Archbishop of São Salvador do Bahia.

Spanish. Enrique Pla y Deniel (81), Archbishop of Toledo; Benjamin de Arriba y Castro (72), Archbishop of Tarragona; Fernando Quiroga y Palacios (58), Archbishop of Santiago de Compostela.

Argentinian. Jaime Luis Copello (78), Archbishop of Buenos Aires; Antonio Caggiano (69), Bishop of Rosario.

Canadian. James Charles McGuigan (63), Archbishop of Toronto; Paul-Emile Léger (54), Archbishop of Montreal.

German Josef Frings (71), Archbishop of Cologne; Josef Wendel (57), Archbishop of Munich.

Portuguese. Emmanuel Gonçalves Cerejeira (69), Patriarch of Lisbon, Theodosio Clemente de Gouveia (69), Archbishop of Lourenço Marques (Mozambique).

Armenian. Gregory Peter XV Agagianian (63), Patriarch of Cilicia and Pro-Prefect of *Propaganda Fide.*

Australian. Norman Thomas Gilroy (62), Archbishop of Sydney.

Belgian. Joseph Ernest Van Roey (84), Archbishop of Malines.

Chilean. José Mario Rodriguez (92), Archbishop of Santiago.

Chinese Thomas Tien Chen-sien (68), Archbishop of Peking.

Colombian. Crisanto Luque (69), Archbishop of Bogotá.

Cuban. Manuel Arteaga y Betancourt (78), Archbishop of San Cristoforo, Havana.

Ecuadorean. Carlos Maria de la Torre (84), Archbishop of Quito.

Hungarian. Jozsef Mindszenty (66), Archbishop of Esztergom.

Indian. Valerian Gracias (57), Archbishop of Bombay.

Irish. John D'Alton (75), Archbishop of Armagh.

Polish. Stefan Wyszynski (57), Archbishop of Gniezno and Warsaw.

Syrian. Ignatius Gabriel Tappouni (79), Patriarch of Antioch.

Yugoslav. Aloysius Stepinac (70), Archbishop of Zagreb.

Theoretically, any Roman Catholic can be elected to the Papacy whether he is a priest or not; in practice, however, the choice has fallen on a cardinal for the past 600 years. Since the 16th century every Pope has been an Italian; the last non-Italian Pope was Hadrian VI, a Fleming, who reigned in 1522-23.

A. LITERATURE. — Book Selections for September.

Selected books published in Great Britain, the United States and France are given below :

Great Britain. Aron, Robert—" The Vichy Régime, 1940-1944." Translated from the French. (Putnam, 42s.)

Chapman, Hester—" The Last Tudor King : A Study of Edward VI." (Jonathan Cape, 28s.)

" Concise Encyclopaedia of World History." Edited by John Bowle. (Hutchinson, 50s.)

Constance, Arthur—" The Impenetrable Sea." (Oldbourne, 16s.)

Djilas, Milovan—" Land without Justice." An Autobiography of the Author's Youth in Montenegro. Translated from the Serbo-Croatian. (Methuen, 25s.)

Hibbert, Christopher—" King Mob : The Story of Lord George Gordon and the Riots of 1780." (Longmans, 21s.)

Pasternak, Boris—" Dr. Zhivago." A Novel, translated from the Russian. (Collins, 21s.)

Renault, Mary—" The King Must Die." A Novel, based on a Reconstruction of the Life of Theseus. (Longmans, 16s.)

de Riencourt, Amaury—" The Coming Caesars." Translated from the French. (Jonathan Cape, 25s.)

Steinbeck, John—"The Log from the Sea of Cortez." (Heinemann, 18s.)

Tillion, Germaine—" Algeria : The Realities." Translated from the French. (Eyre & Spottiswoode, 10s. 6d.)

Toynbee, Arnold J.—" East to West : A Journey round the World." (Oxford University Press, 21s.)

Wrench, Sir Evelyn—" Alfred, Lord Milner : The Man of No Illusions." (Eyre & Spottiswoode, 42s.)

United States. Brooks, Van Wyck—" The Dream of Arcadia : American Writers and Artists in Italy, 1760-1915." (Dutton, New York, $4.50)

Tuchman, Barbara W.—" The Zimmermann Telegram." The Story of the German Proposal to Mexico in 1917. (Viking Press, New York, $3.95)

France. Camus, Albert—" Actuelles III : Chronique algérienne, 1939-1958." (N.R.F., Paris)

B. INDIA. — New Governor of Punjab.

Mr. N. V. Gadgil, a former Minister in the Central Government, was sworn-in on Sept. 15 as Governor of Punjab, succeeding Dr. C. P. N. Singh.—(The Statesman, Calcutta)

(Prev. rep. 15282 A.)

A. UNITED STATES. — Racial Desegregation in Schools. - The Little Rock Controversy. - Supreme Court rejects School Board's Petition for Suspension of Integration. - Little Rock High Schools closed by Governor Faubus. - Anti-integration Bills passed by Arkansas State Legislature. - Integration rejected in Local Referendum.

The controversy aroused by the introduction of nine Negro pupils into Little Rock Central High School advanced a further stage on June 21, when Judge Lemley of the Federal District Court granted a petition by the Little Rock School Board for leave to suspend racial integration for 2½ years—i.e. until January 1961.

In support of its petition the Board referred to incidents which had occurred at Central High School, including 40 small fires on the school premises and the receipt of 43 bomb threats, necessitating searches of the building, as a result of these incidents, the Board said, 200 pupils had been temporarily suspended and two permanently expelled, and the tension caused by the presence of Negro pupils had "adversely affected the educational process."

Judge Lemley ruled that the Negro pupils' "personal interest in being admitted to the public schools on a non-discriminatory basis as soon as practicable . . . must be balanced against the public interest, including the interest of all students and potential students"; he therefore ordered that they should be transferred to a coloured school which he described as equal in its facilities to those obtaining at Central High School. This ruling, he pointed out, did not constitute a yielding to unlawful force or violence, but was simply an exercise of discretion intended to allow a breathing-spell and to preserve educational standards.

An application for a stay of execution of his order which had been filed on behalf of the National Association for the Advancement of Coloured People (NAACP), pending a decision on an appeal to the Federal Appeals Court, was rejected by Judge Lemley on June 23 on the grounds that "it will in all probability take months to carry the case through the Court of Appeals and the U.S. Supreme Court . . . and in the meantime the situation at Central High School, which we have found to be intolerable from an educational standpoint, would continue." A petition by the NAACP asking the Supreme Court to consider the case immediately, in view of its "imperative importance," was also rejected on June 30; the Supreme Court, however, expressed confidence that, in view of "the vital importance of the time element in this litigation," the Federal Court of Appeals would review the case "in ample time to permit arrangements to be made for the next school year."

The Federal Appeals Court at St. Louis set aside Judge Lemley's order on Aug. 18 by six votes to one, only Chief Judge Gardner dissenting.

The Court's majority ruling said that the "turmoil, chaos and bedlam" in Central High School had been caused, not by the presence of the Negro pupils, but by popular opposition to their presence, pointing out that none of the Negro pupils had been responsible for the incidents on the school premises. It commented that "at no time did the Board seek injunctive relief against those who opposed by unlawful acts the lawful integration plan, which action apparently proved successful in the Clinton, Tenn., and Hoxie, Ark., situations" (see 15359 A). "If more rigid and strict disciplinary methods had been adopted and pursued in dealing with those comparatively few students who were ringleaders in the trouble-making, much of the turmoil and strife within Central High School would have been eliminated."

The ruling continued: "An impossible situation could well develop if the District Court's order were affirmed. Every school district in which integration is publicly opposed by overt acts would have 'justifiable excuse' to petition the courts for delay and suspension in integration programmes. An affirmance of 'temporary delay' in Little Rock would amount to an open invitation to elements in other districts to overtly act out public opposition through violent and unlawful means . . . The issue plainly comes down to the question of whether overt public resistance, including mob protest, constitutes sufficient cause to nullify an order of the Federal Court directing the Board to proceed with its integration plan. We say that the time has not yet come in these United States when an order of a Federal Court must be whittled away, watered down, or shamefully withdrawn in the face of violent and unlawful acts of individual citizens in opposition thereto . . ."

At a press conference on Aug. 20, President Eisenhower read a prepared statement emphasizing the duty of the State authorities to enforce the courts' decisions, and giving a clear warning that any "defiance of this duty" would lead to action by the Federal Government. The statement ran as follows:

"Because there are still some phases of this case pending in the courts it would not be appropriate for me to express my view on the case itself. This case, however, or any person's agreement or disagreement with its outcome, must not be confused with the solemn duty that all Americans have to comply with the final orders of the court. Nor should we lose sight of the fact that the maintenance of order to permit compliance with the final order of the court is the responsibility of each State.

"Each State owes to its inhabitants, to its sister States, and to the Union the obligation to suppress unlawful forces. It cannot by action or deliberate failure to act permit violence to frustrate the preservation of individual rights as determined by a court decree. It is my hope that each State will fulfil its obligation with a full realization of the gravity of any other course.

"Defiance of this duty would present the most serious problem, but there can be no equivocation as to the responsibility of the Federal Government in such an event. My feelings are exactly as they were a year ago. As I said then: 'The very basis of our individual rights rests upon the certainty that the President and the Executive branch of Government will support and ensure the carrying out of the decisions of the Federal Courts'

"Every American must understand that if an individual, community, or State is going successfuly and continuously to defy the courts, then there is anarchy. I continue to insist that the common sense of the individual and his feeling of civic responsibility must eventually come into play if we are to solve this problem."

On a petition by the Little Rock School Board, the Appeals Court granted on Aug. 21 a stay of integration at Central High School to allow the School Board to appeal to the Supreme Court, and on the same day the Little Rock superintendent of schools (Mr. Virgil T. Blossom) announced that Central High School would reopen on Sept. 2 as "an all-white school." Counsel for the NAACP accordingly appealed to the Supreme Court on Aug. 22 to rescind the Appeals Court's ruling before the school reopened, as otherwise the Negro children would be "relegated back to segregated schools for at least a year." In view of the urgency of the matter, Chief Justice Warren announced on Aug. 25 that the Supreme Court would interrupt its summer recess to meet in special session on Aug. 28 to hear arguments in the case; this was the first such session the court had held since it met to consider the Rosenberg case in 1953 (see 13139 A).

Governor Faubus, commenting on the President's statement of Aug. 20, had denied that the Supreme Court's original ruling on racial integration in schools was constitutional. He added: "If it is the purpose of Mr. Eisenhower's statement to reaffirm his position of last fall [autumn], that it is my duty as Governor to use the military to enforce integration in any school district in this State, then I must say that my position of last fall is unchanged. I do not interpret my constitutional duties to cover any such theory as that advanced by the President."

On Aug. 23 Governor Faubus issued a proclamation stating that "conditions exist that in my judgment seriously endanger public education in the State of Arkansas and the peace and tranquillity of the citizens of this State," and convening a special session of the Arkansas State Legislature for Aug. 26 to enact laws "to regulate the administration and financing of public schools and education, and to make appropriations for such purposes." Mr. Blossom stated on Aug. 25 that, pending action by the State Legislature and the Supreme Court, the reopening of Little Rock schools had been postponed until Sept. 8.

The State Legislature passed on Aug. 27-28 a group of six Bills proposed by Mr. Faubus, the most important of which empowered the Governor to close any integrated school where violence had occurred or was threatened; this Bill was approved in the House of Representatives by 94 votes to one, and in the Senate by 33 votes to none. Among the other Bills adopted were several directed against the NAACP, which had been drafted by the State Attorney-General, Mr. Bennett. The measures passed by the special session were as follows:

(1) The Governor might close any school or schools because of "actual or impending violence" which might follow on integration "forced by the executive, legislative, or judicial branch of the Federal Government," or where Federal forces were used to enforce integration. In such circumstances a referendum would be held within 30 days to decide whether the school or schools should be reopened on an integrated basis; unless a majority of the total electorate in the district voted in favour of integration, the school or schools would remain closed and other provisions would be made for the pupils' education. If a school board refused to comply with the Governor's orders in such a case, he was empowered to remove it and replace it by a nominated body.

(2) State funds would be withheld from any school closed under the previous Act, and transferred to other public or private schools accepting its pupils.

(3) Pupils of integrated schools might be transferred to segregated schools if they so requested.

(4) Separate classes might be set up inside integrated schools for pupils refusing to attend lessons with pupils of another race.

(5) A $100,000 fund was set up to cover the cost of these measures.

(6) The reopening of schools in the Little Rock district was postponed until Sept. 15.

(7) A school board might be recalled on the petition of 15 per cent of the qualified voters.

(8) All teachers and employees in State schools were required to file affidavits giving the names of societies to which they had belonged in the past five years.

(9) Certain "corporations," including the NAACP, were forbidden to practise law inside the State.

(10) All private organizations and clubs were required to file reports on their membership and activities.

(11) The State Attorney-General was empowered to seize the records of any organization.

(12) Breaches of the peace performed with the intention of forcing a test case in the courts were brought under the heading of the crime of "barratry" [vexatious litigation or incitement thereto].

(13) Incitement of any person by another to institute legal proceedings was forbidden.

(14) Disturbances on school property, including "loud and offensive talk," were prohibited.

When the Supreme Court met on Aug. 28, counsel for the NAACP asked the court to rescind both the stay of integration granted by the Appeals Court and Judge Lemley's original order. He was supported by Mr. J. Lee Rankin, the Federal Solicitor-General, who maintained that the basic question was "whether the law should recoil before the threat of violence." Counsel for the Little Rock School Board asked for time to enable the Board to prepare its case against the Appeals Court's decision. The Court finally ordered the Board to file the reasons for its appeal by Sept. 8, and announced that it would hear oral argument on Sept. 11.

Mr. Faubus stated on Aug. 31 that, as a "tactical manoeuvre," he had not yet signed the Bills passed by the State Legislature, including that postponing the reopening of Little Rock schools, and would not do so until the Supreme Court had finally acted; the School Board's decision to reopen Central High School on Sept. 8 thus remained in force. The Board decided on Sept. 1, however, to postpone the reopening until Sept. 15, on the ground that to open Central High School before the Supreme Court's hearing would be interpreted as an act of bad faith.

After hearing argument on the case, the Supreme Court unanimously affirmed on Sept. 12 the Appeals Court's judgment of Aug. 18, and set aside its staying order of Aug. 21. Chief Justice Warren stated that, in view of the imminent commencement of the new school year at Central High School, the Court deemed it important to make prompt announcement of its judgment; the reasons for its decision would be made public in due course.

President Eisenhower issued a statement on the same day declaring that anarchy would result if the Supreme Court's order were defied, and appealing to "the sense of civic responsibility that animates the vast majority of the citizens to avoid defiance of the Court's orders in this matter." States and localities, he pointed out, had a constitutional duty to maintain peace and order, and if that duty were discharged lawless elements would not be able to deprive children of their constitutional rights by force and violence.

The Little Rock School Board announced on Sept. 12 that Central High School would reopen on Sept. 15, and that the Negro pupils would be admitted "as there is now, apparently, no other choice." Later the same day, however, Governor Faubus signed the Bills passed by the State Legislature and issued a proclamation closing the four high schools in Little Rock from Sept. 15, on the grounds that "domestic violence within Little Rock school district is impending" and that "a general, suitable, and efficient educational system cannot be maintained in the senior high schools of the Little Rock school district because of integration of the races in such schools." He also ordered a referendum on integration to be held in the city on Oct. 7.

The closing of the high schools—which affected four schools with a total of 3,480 pupils, including a Negro school—aroused considerable opposition in Little Rock. Over 300 pupils were transferred by their parents to other schools, and a "Women's Emergency Committee to Open Our Schools" was formed to work for integration. The local presbytery of the Presbyterian Church adopted a resolution urging Mr. Faubus to withdraw his proclamation, whereupon the Governor asserted that "a large number of ministers in the Presbyterian Church have been very effectively brainwashed" by "left-wingers and Communists."

Apparently as a result of pressure by parents, Mr. Faubus announced on Sept. 16 that the date of the referendum had been advanced to Sept. 27. As an interim measure, lessons by television were broadcast to the high school pupils from Sept. 22 by local commercial stations.

Six residents of Little Rock, all but one of whom were prominent segregationists, obtained a charter on Sept. 17 for a "Little Rock Private School Corporation." In a broadcast on the following day, Mr. Faubus stated that if the voters in the referendum rejected integration, the school facilities would "become surplus and not needed for public school purposes," thereby leaving the School Board "free to lease the buildings to a suitable private agency." This plan, he maintained, was legal because the Federal Government had no authority to require any State to operate public schools or to tell a State Government for what purposes it might levy taxes, and also because the Supreme Court's ruling against segregation did not apply to private schools, even though they received aid from State and Federal sources. Mr. Faubus's arguments were questioned, however, in a joint statement by 61 Little Rock lawyers, who contended that "existing public school facilities of this district cannot be legally operated with any public funds as segregated private schools," and that consequently the real issue in the referendum would be "whether we shall open our schools under the court-approved plan of limited integration or close them altogether."

The Little Rock School Board asked the Federal District Court on Sept. 23 to decide whether it would be in contempt of court if it leased the four high schools to a private corporation, and asked for an immediate ruling so that the schools could be reopened with a minimum of delay. The NAACP asked the Court on the following day to advise the board either that it could not lease the schools, or that integration must be retained if they were leased; a memorandum filed by the Justice Department as a "friend of the court" supported the NAACP's petition on the ground that "the status of the school as a public institution is not changed by projecting into its operation a private corporation of this nature." Federal District Judge Miller, however, ruled on Sept. 25 that only a three-judge Federal court could decide on the question, which involved the constitutionality of the Bills passed by the Arkansas State Legislature; he therefore dismissed the NAACP and Justice Department's petitions without prejudice, so that the petitioners could seek relief in another court.

The referendum held in Little Rock on Sept. 27 resulted in a majority of 19,470 to 7,565 against integration. Although only 27,035 people voted, out of a total electorate estimated at about 40,000 (including 7,000 negroes), the number of voters taking part was over twice as large as in any previous ballot on educational matters, and only 1,000 fewer than in the Democratic Party primary in July, in which Governor Faubus was nominated for a third term of office. The wording of the ballot (in which voters were asked to decide for or against racial integration at all schools in the district) was criticized as misleading by opponents of Mr. Faubus, who pointed out that the School Board's plan had envisaged only gradual integration over a six-year period.

After obtaining an assurance from Mr. Bennett that their action would be legal, the board formally leased the four high schools to the Private School Corporation on Sept. 29, whilst reserving the right to resume control of the buildings at any time. Under the lease, which expired in 1965, the corporation agreed to pay for the use of the schools, which were described as "surplus property," and to take over the contracts of the teachers and other school employees. Later the same day, however, two Federal judges, sitting in Omaha (Nebraska), issued a temporary order, on the petition of the NAACP, restraining the board from "taking further action to transfer possession, control, or operation, directly or indirectly, of the Little Rock schools" and forbidding any alteration in the "*status quo* of the senior schools insofar as their integrated status is concerned." The St. Louis Court of Appeals extended this order on Oct. 6, whilst deferring its ruling on the NAACP's petition for a permanent injunction. In view of this development, the chairman of the Private School Corporation (Dr. Thomas Raney) announced on Sept. 30 that the attempt to reopen the high schools on a private segregated basis was being abandoned, and that the closing of the senior high schools was now "the full responsibility of the Federal Government and the NAACP."

The Supreme Court published the reasons for its judgment on Sept. 29; a summary will be given in the next issue. (New York Times - New York Herald Tribune)

A. KENYA. — Implementation of Constitutional Reform. - Election of Additional African Members. - Elected African Members' Opposition to Constitutional Proposals. - New Multi-racial Ministry. - Creation of State Council. - Progress of Mau Mau Rehabilitation.

The new Constitution which had been announced by the Colonial Secretary (Mr. Lennox-Boyd) on Nov. 8, 1957 [see 15869 A] and incorporated in a White Paper published on Nov. 15, 1957, was brought into operation by an Order-in-Council on April 15, 1958. Two aspects of the 1957 proposals had previously been amplified in a dispatch from Mr. Lennox-Boyd to the Kenya Government, published as a White Paper on Feb. 13 and containing the following recommendations :

Special Seats in Legislative Council. It was proposed that those seeking nomination as candidates for election to the 12 new non-Government seats in the Legislative Council should each have the support of five existing Council members who were not public officers. [The 1957 proposals had left the nature of the qualification for nomination in abeyance.] Existing Council members, other than public officers, would be eligible for nomination, but if elected they would vacate their present seats ; if a member holding a constituency seat was elected, there would be a by-election.

Council of State. The White Paper defined the composition, powers, and functions of the proposed first Council of State as follows :

(1) The Council, in the first instance, would consist of a chairman and 10 members nominated by the Governor " on instructions from the Crown." They could not be members of the Legislative Council, but would " inevitably . . . include persons of all races " though not chosen " on any principle of sectional representation." Four of them would hold office for 10 years, three for seven years, and three for four years.

(2) Decisions of the Council would be by majority vote, the chairman having a casting vote.

(3) The Council's powers would relate only to " differentiating measures " of legislation, i.e. to " any Bill or instrument, any of the provisions of which are, or are likely in their practical application to be, disadvantageous to persons of other communities—either directly, by prejudicing persons of that community, or indirectly, by giving an advantage to persons of another community."

A measure could be classed as " differentiating " either by the Governor (" in the interests of the Colony's security ") or by the Council of State. In the latter case two different procedures would be followed, according to whether the measure was one of " ordinary " or " subordinate " legislation, viz. :
